A short historical reference is not out of order here. In 1859 the House, by a close vote, directed that the desks be removed and benches substituted, although the dimensions of the Hall were not changed. In February, 1860, by a vote of 95 yeas to 86 nays, the desks were restored. With the spacious and comfortable Office Building for the use of Members, the vote would now be different. With the removal of the desks and chairs, undoubtedly the present space on the floor is not needed. We have now offices in the new Office Building where our papers, books, and documents are kept and our daily routine work, not necessary on the floor, can be done. When it is contemplated that the hall of the House of Commons is but 60 feet long by 45 feet wide, with an area of but 2,700 square feet, and seats 673 members, it can readily be seen that the present floor space is not necessary. Allow me to state that my experience of more than twelve years on the floor of this House has demonstrated to me that I can speak with greater ease in the open air in Texas to several thousand people than in the House of Representatives under present conditions. There should be a change, and this plan proposes removing the partition wall south of where I stand and the one above the Speaker's desk, retaining the rectangular form of the House and pushing it southward to the open air. When these partition walls are taken out, we have five spacious windows in direct connection with the open air to the southward, giving pure atmosphere and abundant ventilation.

The Speaker's stand will be moved southward, corresponding with its present position. There will be large lobbies to the northward in the present Hall corresponding to the Senate marble room, and on the four corners of the new one will be

large retiring and smoking rooms. These changes will increase the convenience of Members by giving them much larger smoking rooms and ample space for conference and conversation beyond the hearing of the proceedings on the floor. Behind the seats will be folding leaves with sufficient room for writing, making notes, and placing manuscript while a Member is speaking. By this change, reducing the House of Representatives one-third in size, and removing the desks and seats, the Chamber can be made to easily seat 450 Members.

Mr. Speaker, there is not much more to be added by me to what I have already said. The controlling element with me touching this resolution is one pertaining to better ventilation and more wholesome atmosphere on this floor. As the present Chamber is constructed it has proven to be almost a death trap, and undoubtedly the health and lives of many Members have been endangered by the foul air we breathe. The present House is simply a hall within a hall, a box within a box, and should have been changed years ago.

Mr. WEBB. Will the gentleman allow me to ask him a question?

Mr. HENRY of Texas. Certainly.

Mr. WEBB. I have noticed that this Scheme B reduces the seating capacity of the gallery from 594, as at present, to 288. Do you not think that is reducing the number of people who can come to hear the deliberations of this House below the number that ought to be provided for?

Mr. HENRY of Texas. Under the present plans, as I understand them, if it is desired, the capacity of the galleries can be enlarged to twice the space here mentioned.

Mr. WEBB. This resolution adopts Scheme B, and Scheme B says that 288 seats can be furnished in the gallery.

Mr. McCALL. If the gentleman will permit me.

Mr. HENRY of Texas. Certainly.

Mr. McCALL. The architect reports that he can much extend the gallery space in Scheme B.

Mr. WEBB. In that case it is more acceptable.

Mr. HENRY of Texas. That is the purport of my remark.

Mr. STANLEY. Those who come to the galleries usually come to see, rather than to hear.

Mr. HENRY of Texas. They usually see more than they hear under present conditions in the House.

Mr. WALDO. Will the gentleman allow me to ask him a question?

The SPEAKER. The time of the gentleman has expired.

Mr. HENRY of Texas. Will the gentleman give me just one minute?

Mr. McCALL. I yield one minute more to the gentleman.

Mr. WALDO. Is there any provision in this scheme for desks under which a Member can have more space when he is making extended remarks?

Mr. HENRY of Texas. I understand not, but there is space in front there that could be used.

And now, gentlemen, for the sake of comfort, health, and orderly proceeding, let us vote to remove the partitions and open this great Hall to the south, letting in God's fresh air and bright sunshine, that it may sweep through these corridors and purify the surroundings, bringing intellectual vigor and physical strength to the Representatives of the people. [Loud applause.]

Mr. McCALL. Mr. Speaker, I have received the following letter from the gentleman from Texas [Mr. BURLESON], which I desire to read:

COMMITTEE ON APPROPRIATIONS,
HOUSE OF REPRESENTATIVES,
Washington, D. C., February 27, 1909.

MY DEAR MR. MCCALL: I regret very much that I will not be able to be on the floor when consideration of your resolution for the remodeling of the Assembly Hall of the House of Representatives is given. I have always taken a deep interest in the movement for this reform and do not hesitate to state that I believe favorable action on your resolution will not only make the discharge of our duties more pleasant and satisfactory to ourselves, but will result in more carefully considered legislation for our country.

Sincerely, yours, A. S. BURLESON.

In reference to what I said about the galleries, I meant that under Scheme B the gallery accommodations can be very much extended over what is now shown in the plan. Will the gentleman from Mississippi occupy three minutes?

Mr. WILLIAMS. Mr. Speaker, I have voted against all plans that have heretofore been brought in for the reconstruction architecturally of the House and for the alteration and the reconstruction of the conveniences of the Members. I voted against all plans with benches, because I knew that I myself would not be comfortable upon a bench, and did not think that anybody else would be. I voted against the schemes presented because none of them reached the essential point. The essential thing that ought to be mandatory, in my mind, is direct communication with the open air. Now, this plan carries us down to the south wall of the building and gives us direct communication with the open air.

There are two causes of existing conditions. One is bad air, and the other is hot air in the shape of private conversation, constantly interrupting the Members who are trying to speak. The reason of the constant conversation is that the Member does not hear and he does not want to be bored to death sitting stock still and holding his hands. Now, if this plan is adopted Members can hear, and those who can hear and are hearing will be very impatient with those who will not let them hear even better. And those who can hear as a rule will want to hear, and that will bring about silence in itself.

But the great thing that makes me advocate the plan is this: That it does not bring benches in, but leaves chairs; and secondly, that it carries us to the open air. No sort of artificial ventilation that I have ever seen is worth a copper cent.

I never knew any way of getting pure air except by getting immediate access to open air. I want to see this plan tried. Perhaps it is a little out of taste for me to say anything in favor of it, because I am going out, and I will never have to suffer its inconveniences if there shall be any. Equally, however, I shall never enjoy its conveniences, if such shall be the result.

When the matter was up before, I think it was I who suggested, or maybe proposed, a motion that there should be instructions that the architect, in making his plans, should see if he could not move this box within a box in which we sit to the corner of this building, or if not to its corner, at least to one of its sides, so as to get at the open air.

Mr. LLOYD. Do you understand that this takes us to the outer wall, or just to the second wall?

Mr. WILLIAMS. It takes us to the outer wall so far as air connection by windows is concerned.

Mr. THOMAS of North Carolina. I do not think the gentleman fully understands the matter.

Mr. WILLIAMS. It takes us to the outer air so far as its communication with the Hall is concerned, because it leaves those arches with absolutely free communication with the windows.

Mr. THOMAS of North Carolina. For the information of Members will the gentleman allow me to state what I understand Scheme B will do?

Mr. WILLIAMS. If it is a question concerning the details of the plans concerning which the gentleman desires to interrogate me, the gentleman had better ask the gentleman from Massachusetts [Mr. MCCALL], who can answer more accurately than I.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 28243. An act to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes, had further insisted upon its amendments Nos. 58 and 59, disagreed to by the House of Representatives, had agreed to the further conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HALE, Mr. PERKINS, and Mr. TILLMAN as the conferees on the part of the Senate.

The message also announced that the Senate had passed the following resolutions:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Hon. DANIEL L. D. GRANGER, late a Representative from the State of Rhode Island.

Resolved, That the business of the Senate be now suspended, in order that fitting tribute may be paid his memory.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased the Senate do now adjourn.

Also:

Resolved, That the Senate has heard with profound sorrow of the death of Hon. ARIOSTO A. WILEY, late a Member of the House of Representatives from the State of Alabama.

Resolved, That the business of the Senate be now suspended, in order that a fitting tribute may be paid to his memory.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the widow and family of the deceased.

Also:

Resolved, That the Senate expresses its profound sorrow on account of the death of the Hon. LLEWELLYN POWERS, late a Member of the House of Representatives from the State of Maine.

Resolved, That the business of the Senate be now suspended in order that fitting tribute may be paid to his memory.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Also:

Resolved, That the Senate has heard with profound sorrow of the death of the Hon. ASBURY C. LATIMER, late a Senator from the State of South Carolina.

Resolved, That as a mark of respect to the memory of the deceased Senator the business of the Senate be now suspended to enable his associates to pay proper tribute to his high character and distinguished public services.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased Senator.

Also:

Resolved, That the Senate expresses its profound sorrow on account of the death of the Hon. ADOLPH MEYER, late a Member of the House of Representatives from the State of Louisiana.

Resolved, That the business of the Senate be suspended in order that fitting tribute may be paid to his memory.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Also:

Resolved, That the Senate has heard with profound sorrow of the death of Hon. ABRAHAM LINCOLN BRICK, late a Member of the House of Representatives from the State of Indiana.

Resolved, That the business of the Senate be now suspended in order that a fitting tribute may be paid to his memory.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

RIVER AND HARBOR BILL.

Mr. BURTON of Ohio. Mr. Speaker, I ask unanimous consent that the House nonconcur in the Senate amendments to the bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes, and ask for a conference.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the House disagree to the Senate amendments to the following bill, of which the Clerk will read the title, and ask for a conference.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection, and the Speaker appointed as conferees on the part of the House Mr. BURTON of Ohio, Mr. ALEXANDER of New York, and Mr. SPARKMAN.

HALL OF THE HOUSE.

The House resumed consideration of House joint resolution 265.

Mr. THOMAS of North Carolina. Mr. Speaker, for the information of Members of the House, I wish to say, in reply to what has been said by the gentleman from Mississippi, that Scheme B does not contemplate carrying the Hall back to the extreme south end of the Capitol. It does contemplate taking out the partition which runs back of the Speaker's chair; but the Members' lobby will remain as it now is. The only way in which we will get air will be by the windows in the press gallery.

Mr. McCALL. I was going to ask the gentleman whether the five windows in the press gallery will not open directly into the Hall?

Mr. THOMAS of North Carolina. They will.

Mr. McCALL. Then, of course, we shall be connected with the outer air.

Mr. THOMAS of North Carolina. In that way; yes.

Mr. WILLIAMS. We shall be moved back to the wall behind the present one, and the gallery will run from that wall slopingly up to the outer wall, and will reach, at the back part of the outer wall, the south wall of the building.

Mr. McCALL. Yes.

Mr. WILLIAMS. With the windows in there?

Mr. McCALL. Yes.

Mr. WILLIAMS. So that the bad air can escape and the fresh air can come in. The polluted atmosphere of the rooms is caused by the inability of the bad air to escape from the place we are in rather than by the intrusion of any bad air from the outside.

Mr. THOMAS of North Carolina. Now, Mr. Speaker, I wish to say one word more and I shall feel that I have discharged my duty. I am just as much in favor of proper ventilation and good acoustics in the Hall as anybody, but the proposition is not alone for pure air and better acoustics. The resolution means new seating arrangements and complete reconstruction of the Hall. The joint resolution carries an appropriation of $350,000, and when the change is made it will be a permanent change.

Mr. STERLING. Will the gentleman yield?

Mr. THOMAS of North Carolina. I will.

Mr. STERLING. I would like to ask the gentleman if the committee has any estimate as to what this change will cost?

Mr. THOMAS of North Carolina. Three hundred and fifty thousand dollars.

Mr. STERLING. And how soon will the change be made?

Mr. THOMAS of North Carolina. I do not know; I suppose it will be made some time during the recess of Congress after the extra session.

Mr. STERLING. Would it not take a year to do the work?

Mr. THOMAS of North Carolina. I am unable to tell the gentleman, and I will have to refer him to the Superintendent of the Capitol.

Mr. STERLING. Has the gentleman any assurance that the acoustic properties of the Hall will be any better after the change, or is it an experiment?

Mr. THOMAS of North Carolina. As I understand, the acoustic properties will be better simply because of the decrease of the size of the Hall, which will still retain its rectangular shape, and be decreased in size one-third.

Mr. STANLEY. I want to ask the gentleman from Massachusetts a question. Will the gentleman yield?

Mr. McCALL. Yes.

Mr. STANLEY. These windows, I believe, are on the south side of the building?

Mr. McCALL. Yes.

Mr. STANLEY. And they are large enough to let in the sunlight?

Mr. McCALL. When we wish to let it in.

Mr. STANLEY. The reason I ask is this: The gentleman from Massachusetts is a much better scientist than I, but I understand that the physical presence of sunlight in a room or a building of this kind is as necessary as to have fresh air, in order to keep it in a healthful condition.

Mr. McCALL. I can not be sure about that; but, as the gentleman says, these windows are on the south side of the building. Now, Mr. Speaker, I yield two minutes to the gentleman from New York [Mr. PAYNE].

Mr. PAYNE. Mr. Speaker, when Mr. Reed was Speaker of the House he came to the conclusion that no man could preserve order in the House while the Hall was so large. Every Speaker, and everyone who has presided over this House, has found the same difficulty and for the same reason. When the proposition came up a year ago to make the Hall smaller, it was coupled with one or two other propositions that prevented me from voting for it. In the first place, it took out all the desks so that no Member could make any memorandum during the sessions of the House, for debate or otherwise, and then it left us without a place in which we could put papers that might be needed at any moment for use in debate.

This plan overcomes that difficulty, and substitutes another but smaller desk on which a Member can make memoranda, and a place where he can put his papers. That plan also increased the difficulty about ventilation. We have now a sort of box within a box that shuts us from the outside air. The plan last year proposed a partition on each side of the Hall, cutting off about 30 feet and tending to make a third box inside of the present box, keeping us from the outer air.

At that time I opposed it, and said that some plan ought to be devised by which we could move the Hall to the outer air, There is plenty of air and light outside, and God knows we need it enough here, and I thought we ought to have it. It was somewhat on that suggestion, made by myself and others, that the House voted down the plan.

[The time of Mr. PAYNE having expired, the gentleman from Massachusetts, Mr. MCCALL, yielded one minute more.]

Mr. PAYNE. Then a resolution was passed referring this matter to the Superintendent of the Capitol, requiring him to devise a plan that would bring the Hall to the outside air. This plan does it, and not only gives us windows above, but gives us an opportunity to get outside air from the windows below by opening the doors at the south end of the Hall. It reduces the size of the Hall one-third; it leaves a lobby at the back of the present Hall where Members can meet visitors, and it seems to me it answers every requirement, except possibly one. I do not know but that I should be better pleased if it cut the Hall down still more. I see the plans call for 450 seats.

I would like it if a plan could be adopted that cut it down to 400, if that would make it effectual forever to keep the membership of the House below 400. [Applause.] I would go a

little further and amend the Constitution in that respect, if I could, because you can not trust the Members of the House under the influences that come here to increase the number of Members every time a new apportionment is made. I hope the plan will be adopted.

Mr. DOUGLAS. Mr. Speaker, I would like to ask the gentleman from Massachusetts a question and to settle something that I have not been able to settle in my own mind. As I understand it, there is a lobby back of the seats, a Member's lobby. What becomes of the space above that lobby, which is up here now.

Mr. McCALL. A large part of that space will be taken up by the gallery being made deeper. Did the gentleman from Alabama [Mr. CLAYTON] desire time?

Mr. CLAYTON. Mr. Speaker, the gentleman from Massachusetts [Mr. McCALL] kindly agreed to give me three minutes, but I think it perfectly manifest that the House is in thorough accord with the gentleman's views, and therefore, being in accord with those views also, I think it unnecessary to say anything further.

Mr. McCALL. How is it as to the gentleman from New York [Mr. COCKRAN]?

Mr. COCKRAN. I think it is unnecessary to say anything more.

Mr. McCALL. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on suspending the rules and agreeing to the resolution.

The question was taken, and the rules were suspended, and the resolution was passed.

WASHINGTON, SPA SPRINGS AND GRETTA RAILROAD COMPANY.

Mr. SMITH of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill (S. 9006) to amend an act authorizing the Washington, Spa Springs and Gretta Railroad Company of Maryland to enter the District of Columbia, approved February 18, 1907, which I send to the desk and ask to have read.

The Clerk read as follows:

Be it enacted, etc., That section 18 of an act authorizing the Washington, Spa Springs and Gretta Railroad Company of Maryland, a corporation created by the laws of the State of Maryland and authorized by an act of Congress approved February 18, 1907, to extend its line into the District of Columbia, be, and the same is hereby, amended to read as follows:

"SEC. 18. That the construction of the said extension on the lines of said railroad company within the District of Columbia shall be commenced within six months from the passage of this act and shall be completed and cars in operation within one year from the passage of this act, in default of which this act shall be void and of no effect: *Provided,* That the tracks of the Washington, Spa Springs and Gretta Railroad shall be located approximately in the middle of Bladensburg road, as the same shall be ultimately widened to a width of 90 feet; and that the Washington, Spa Springs and Gretta Railroad Company shall, in conjunction with its track construction, grade and macadamize, to such section and profile as is approved by the Commissioners of the District of Columbia, a width of 15 feet on both sides of its track construction; and that the Washington, Spa Springs and Gretta Railroad Company shall bear and defray all costs of this widening, which shall be done to the entire satisfaction of the Commissioners of the District of Columbia: *And provided further,* That all the rights, duties, obligations, and requirements as to permits and deposits contained in the act of February 18, 1907, authorizing the Washington, Spa Springs and Gretta Railroad Company of Maryland to enter the District of Columbia shall, in conjunction with this amendment, remain in full force and effect."

The SPEAKER. Is a second demanded?

Mr. SIMS. I demand a second.

The SPEAKER. A second is ordered.

Mr. SMITH of Michigan. Mr. Speaker, this railroad company was authorized to extend its lines into the District of Columbia by an act passed in February, 1907. Through no fault of the railroad company, it has been unable to complete its line in the meantime.

Mr. SIMS. Mr. Speaker, there seems to be no objection to this bill.

Mr. SMITH of Michigan. I certainly do not desire to take up any more time than necessary.

Mr. BUTLER. I do not understand what the bill is.

Mr. SMITH of Michigan. It is a bill to amend section 18 of the law passed February 18, 1907, authorizing the Washington, Spa Springs and Gretta Railroad Company to come into the District over the Bladensburg highway. If there are no further questions, I ask for a vote.

The SPEAKER. The question is on the motion of the gentleman from Michigan to suspend the rules and pass the bill.

The question was taken, and the motion was agreed to.

COMMISSION ON NAVAL ORGANIZATION.

The SPEAKER laid before the House the following message from the President of the United States (S. Doc. No. 743), which was read and, with the accompanying papers, referred to the Committee on Naval Affairs and ordered printed:

To the Senate and House of Representatives:

I send you herewith the final report of the Commission on Naval Reorganization, which outlines a new departmental system. Accompanying is the letter from Mr. Justice Moody sent to me in transmitting the report. I have expressed to Justice Moody and his associates my profound sense of obligation for the admirable work they have done.

I invite your attention to the sound and conservative character of this report. It is in full accord with American policy, for it recognizes the complete supremacy of the civil power as regards the military no less than the civil or manufacturing side of naval administration. Nothing drastic is recommended as to the bureaus or other agencies by means of which the purely business affairs of the Navy Department are now administered. These are simply coordinated and brought under the general control of the Secretary in such manner as to secure unity of effort and action. The recommendation for the creation of the two councils, the Secretary's general council and his military council, are based upon the fundamental and all-essential proposition that a navy exists and ought only to exist for war and for war alone; for the efficacy of the navy in securing and guaranteeing peace depends absolutely upon its evident efficiency for war. Preparation for war can only be thorough and complete if the Secretary has the same expert military assistance and the same advisers in time of peace as in time of war. The proposed plan has this object in view. It should be remembered that perfection of organization and training and perfect preparedness cost no more than slipshod inefficiency in so spending money as to disregard, or even prevent or impede, proper training and preparedness. The plan outlined does not imply any greater expenditure of money than at present. It provides merely that the money should be spent wisely instead of as at present spending it so that a certain proportion is wasted in friction or in useless work. Training and preparation are essential elements of success in war. It is necessary to have the best ships and to have a sufficient number of them; but the number and character of ships will not necessarily bring victory. Efficiency in organization and personnel must be the main dependence in securing victory where there is even an approximate equality in material.

To supplement and finish the work of this commission another commission must eventually be designated, to take up the proposed plan and complete it as to details; but no plan can be satisfactory if there is deviation from the essential military principles specified in this report. These principles are those which all sound naval experts have come to recognize as fundamental. I call your attention to the fact that the commission, whose conclusions I lay before you, was composed of five rear-admirals, two ex-Secretaries of the Navy, and an ex-Member of the House of Representatives, who, throughout his term of service in the House, was one of the most able and resolute champions that the navy has ever had in Congress.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 27, 1909.*

HARRY KIMMELL.

The SPEAKER laid before the House the following message from the President of the United States, which was read:

To the House of Representatives:

In compliance with the resolution of the House of Representatives, the Senate concurring, of February 26, 1909, I return herewith House bill No. 17214, entitled "An act for the relief of Harry Kimmell, a commander on the retired list of the United States Navy."

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 27, 1909.*

Mr. HUFF. Mr. Speaker, I move a rereference of that bill to the Committee on Naval Affairs.

The SPEAKER. Without objection, the bill and message will be referred to the Committee on Naval Affairs.

There was no objection.

LEAVE OF ABSENCE.

By unanimous consent, Mr. BARTLETT of Nevada was granted leave of absence indefinitely, on account of sickness.

FOREST HILL CEMETERY, SCRANTON, PA.

Mr. NICHOLLS. Mr. Speaker, I ask unanimous consent to discharge the Committee of the Whole House on the state of the Union from further consideration of the bill which I send to the Clerk's desk at this time and that the said bill be passed.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent that the Committee of the Whole House be

discharged from the consideration of the following bill and it be considered at this time. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 28055) to authorize the Secretary of War to donate one condemned brass or bronze cannon and cannon balls to the soldiers' plot in Forest Hill Cemetery, Scranton, Pa.

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to donate to the soldiers' plot in Forest Hill Cemetery, Scranton, Pa., one condemned brass or bronze cannon, with suitable outfit of cannon balls, which may not be needed in the service; the same to be placed by the Lieutenant Ezra S. Griffin Post, No. 139, Grand Army of the Republic, on the soldiers' plot in the Forest Hill Cemetery, located at Scranton, Pa., in honor of the soldiers and sailors from that county who served their country and State: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

ENROLLED BILLS SIGNED.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 15681. An act for the relief of the Compañía de los Ferrocarriles de Puerto Rico; and

H. R. 4286. An act for the relief of John Shull.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 9067. An act to grant pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and dependent relatives of said soldiers.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills and joint resolution:

H. R. 21896. An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes;

H. R. 27068. An act to extend the time for the completion of the Alaska Central Railway, and for other purposes;

H. R. 24149. An act granting to the Montana, Wyoming and Southern Railway a right of way across the Fort Keogh Military Reservation, Mont.;

H. R. 15939. An act authorizing the Secretary of Commerce and Labor to exchange property;

H. R. 25823. An act to amend an act entitled "An act to extend the time for the completion of the Valdez, Marshall Pass and Northern Railway, and for other purposes," approved February 21, 1907;

H. R. 12499. An act for the relief of Clarence Frederick Chapman, U. S. Navy; and

H. J. Res. 231. Joint resolution authorizing the Director of the Census to collect and publish additional statistics.

SITE FOR ALEXANDER HAMILTON MEMORIAL, ETC., WASHINGTON, D. C.

Mr. HAMILTON of Michigan. Mr. Speaker, I ask unanimous consent for the immediate consideration of House joint resolution 225, authorizing the selection of a site and the erection of a pedestal for the Alexander Hamilton Memorial in Washington, D. C.

The SPEAKER. The gentleman from Michigan asks unanimous consent to discharge the Committee of the Whole House from the further consideration of the following resolution and to consider the same. The Clerk will report the resolution.

The Clerk read as follows:

Joint resolution 225 authorizing the selection of a site and the erection of a pedestal for the Alexander Hamilton Memorial in Washington, D. C.

Resolved, etc., That the chairman of the Committee on the Library of the Senate, the chairman of the Committee on the Library of the House of Representatives, the Secretary of the Treasury, and the president and secretary of the Alexander Hamilton National Memorial Association are hereby created a commission and authorized to select a site upon the property belonging to the United States in the city of Washington, other than the Capitol and Library grounds, for the erection of the Alexander Hamilton Memorial, to be presented by the Alexander Hamilton National Memorial Association to the people of the United States.

SEC. 2. That for the preparation of the site so selected and the erection of a pedestal upon which to place the said memorial, under the direction of the commission hereby created, the sum of $10,000, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated.

The SPEAKER. Is there objection?

Mr. SULZER. Mr. Speaker, reserving the right to object, I only desire to say just a word in connection with this resolution. I would be much more pleased if it also provided for a monument to Thomas Jefferson. The latter did much more for his country than Hamilton. There is no monument in Washington to Thomas Jefferson, and it seems to me that the people for whom he did so much and this great Government he helped to mold and shape have been neglectful in the matter. I have no objection to a monument to Hamilton, but I would like to see a great memorial to Jefferson in the Capital City of the Republic.

Mr. PAYNE. Mr. Speaker, I want to say to my colleague that if the friends of Thomas Jefferson see fit to propose a monument in the city of Washington, I have no doubt the site will be selected very cordially by the Government of the United States.

Mr. SULZER. And $10,000 appropriated?

Mr. PAYNE. This is a monument to be put up by the Alexander Hamilton Memorial Association.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

OUTWARD ALIEN MANIFESTS ON CERTAIN VESSELS.

Mr. BENNET of New York. Mr. Speaker, I ask unanimous consent for the present consideration of the bill S. 7785.

The SPEAKER. The gentleman from New York asks unanimous consent for the present consideration of the bill which the Clerk will report.

The Clerk read as follows:

An act (S. 7785) relative to outward alien manifests on certain vessels.

Be it enacted, etc., That until the provisions of section 12 of the immigration act of February 27, 1907, relating to outward alien manifests, shall be made applicable to passengers going out of the United States to Canada by land carriage, said provisions shall not apply to passengers going by vessels employed exclusively in the trade between the ports of the United States and the Dominion of Canada and the Republic of Mexico.

The committee amendment was read, as follows:

Line 4, after the word "February," strike out the word "twenty-seventh" and insert in lieu thereof the word "twentieth."

The SPEAKER. Is there objection?

Mr. SULZER. Mr. Speaker, reserving the right to object, I would like to have some explanation of this bill.

Mr. BENNET of New York. I shall be very glad to give it to my colleague. When we passed the immigration act in 1907, we added a new provision that hereafter there should be statistics collected of the outgoing aliens, so as to show at the end of the year what was the net increase or decrease of the alien population. These statistics are valuable. But between Canada and the United States there is a constant daily passage of Canadians. It is of no value to collect those statistics. We expressly exempted railroads crossing the border between Canada and the United States from the operation of the law, because the statistics would not only be valueless but misleading, but we neglected to exempt in that act that steamship company which runs from Boston to a port somewhere in Canada, and in so far as statistics are collected of the daily passage of aliens between the two countries they are not only valueless but misleading, and this bill corrects that defect.

Mr. HARRISON. How does this correct it?

Mr. BENNET of New York. By providing that until we make a law applicable to railways it shall not be applicable to the steamship line.

Mr. WILSON of Pennsylvania. By what method do you determine the number of Canadians that come to this country and remain here, if you gather no statistics there?

Mr. BENNET of New York. I will say to my friend from Pennsylvania [Mr. WILSON] that at the border stations and on the railroads we make every attempt through our immigration officials to obtain the number of Canadians that come here and remain here permanently. But the Canadians that cross the river at Detroit daily and come into the United States at Niagara and go back at night there is no use in attempting——

Mr. WILSON of Pennsylvania. The position of the gentleman is that no matter which way you attempt to get the statistics they will be inaccurate?

Mr. BENNET of New York. Absolutely; yes, sir.

Mr. SABATH. Mr. Speaker, the ranking member of the Committee on Immigration [Mr. BURNETT] is opposed to this bill, and he is not here, and for that reason I am obliged to object.

Mr. BENNET of New York. Mr. Speaker, I move to suspend the rules and pass the bill.

Mr. SABATH. You may get it through when he is here.

Mr. SULZER. I trust that that motion will not prevail.

Mr. BENNET of New York. Mr. Speaker, I withdraw the request.

Mr. SABATH. I do it because Mr. BURNETT is not present.

NORTHWEST MISSOURI STATE UNIVERSITY LIBRARY MARYVILLE, MISSOURI 64468

SPECIAL PEACE OFFICERS AND EMPLOYEES, ALASKA SCHOOL SERVICE.

Mr. CALE. Mr. Speaker, I move to suspend the rules and take up for consideration the bill S. 8058, as amended.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (S. 8058) authorizing the Attorney-General to appoint as special peace officers such employees of the Alaska school service as may be named by the Secretary of the Interior.

Strike out all after the enacting clause and insert:

"That the Attorney-General shall have power to appoint, in his discretion, any person employed in the Alaska school service who may be designated by the Secretary of the Interior as a special peace officer of the division of the district of Alaska in which such person resides; and such special peace officer shall have authority to arrest, upon warrant duly issued, any native of the district of Alaska charged with the violation of any of the provisions of the Criminal Code of Alaska (act March 3, 1899, 2d supp. Rev. Stat., p. 1003) or any amendment thereof, or any white man charged with the violation of any of said provisions to the detriment of any native of the district of Alaska; and such peace officer shall also have authority to make such arrests, without warrant, for a crime committed or attempted in his presence, or when the person arrested has committed a felony, although not in his presence, or when a felony has in fact been committed and he has reasonable cause for believing the person arrested to have committed it; and any person so arrested shall be taken, in accordance with such rules and regulations as may be prescribed by the Attorney-General, and without unnecessary delay, before a United States commissioner or other judicial officer for trial: *Provided, however,* That no person so appointed shall be entitled to any fees or emoluments of any character whatsoever for performing any of the services herein mentioned, but may be allowed, in the discretion of the Attorney-General, expenses actually and necessarily incurred in connection with such services."

The SPEAKER. Is there objection?

There was no objection.

So the rules were suspended and the bill was passed.

PUBLIC LANDS, IMPERIAL COUNTY, CAL.

Mr. SMITH of California. Mr. Speaker, I move to discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill H. R. 28190, and ask unanimous consent for its present consideration.

The SPEAKER. The Clerk will report the bill.

Mr. SMITH of California. Mr. Speaker, I want to ask also that the bill S. 9373 be substituted. They are identical, although it had not been reported back from the committee.

Mr. PAYNE. Let us find out whether the Senate bill is here, if the gentleman is going to try to pass it.

Mr. SABATH. What is it about? I would like to know.

The SPEAKER. The gentleman from California [Mr. SMITH] asks unanimous consent to discharge the Committee on the Public Lands from the further consideration of the bill S. 9373, and pass the same, there being a similar bill reported from that committee on the calendar. The Clerk will read.

The Clerk read as follows:

An act (S. 9373) to provide for the sale of isolated tracts of public land in Imperial County, Cal.

Be it enacted, etc., That all the allotted portions of townships 13, 14, 15, and 16 south, of ranges 11, 12, 13, 14, 15, and 16, and of fractional township 17 south, of ranges 15 and 16, all east of San Bernardino meridian, which are 10 chains or less in width and lie between or abut on entered or patented lands, shall be sold at private sale for cash, at such price and under such regulations as the Secretary of the Interior shall prescribe, but not at less than $2.50 an acre: *Provided,* That any entryman or owner of such entered or patented tracts shall have a preferred right to buy one-half of all such lots as abut on lands held under his entry or owned by him within six months after the time when the said Secretary shall fix the price of such tracts, and this preferred right shall not prevent such entryman or owner from buying all of any such abutting lots as may remain unsold at the expiration of said six months.

Mr. GAINES of Tennessee. Mr. Speaker, reserving the right to object, I would like to ask the gentleman——

Mr. SMITH of California. I will explain what it is. There was a resurvey of the public lands in the Imperial Valley.

Mr. GAINES of Tennessee. Why do you sell it for cash during this panic? Why do you not make it six, twelve, and eighteen months?

Mr. SMITH of California. The tracts interlying, where the two surveys come together, are very small, sometimes only a fraction of an acre, and frequently 2 or 3 acres, to the half mile of frontage on the farm. In some cases farmers have located their buildings unintentionally just outside of their farms. The largest lot I know of is about 13 acres.

Mr. GAINES of Tennessee. That does not answer, I think, my inquiry. Why do you sell for cash instead of giving them a chance on time?

Mr. SMITH of California. They have so much money in that country that they do not want time.

Mr. GAINES of Tennessee. How much is it worth per acre?

Mr. SMITH of California. As it lies in a desert state, it is worth about nothing. But when it is under irrigation it is worth about a hundred dollars an acre.

Mr. HARRISON. Is any of it cultivated now?

Mr. SMITH of California. I think in some cases the farmers have extended their irrigation beyond the boundaries of their claim proper.

Mr. HARRISON. It is to enable the farmers that have encroached beyond the irrigation section to purchase the land?

Mr. SMITH of California. Yes, sir.

Mr. HARRISON. How much is there in the largest body of land?

Mr. SMITH of California. The largest body is 13 acres and a fraction, and that would be divided by this bill between the two farms where it lies, giving each one about 6 acres.

Mr. CLAYTON. Mr. Speaker, I would like to ask the gentleman a question. I observe from the reading of the bill that it provides that this land may be sold at private sale.

Mr. SMITH of California. Yes, sir.

Mr. CLAYTON. Now, is there any Senegambian in that wood pile—private sale?

Mr. SMITH of California. Well, I will give you the color of the gentleman, and you can name him. [Laughter.] It is not desired that anybody should go in and get these little narrow strips to the annoyance of the farmers; and it gives the farmer there the first privilege of buying any of that land abutting on his land.

Mr. CLAYTON. This is to be a private sale, but, as I understand it, in no sense a secret matter? There will be publicity, so that there is no Senegambian in it?

Mr. SMITH of California. I do not think there is.

Mr. CLARK of Missouri. Is this land down in the fruit belt?

Mr. SMITH of California. No, sir. It is in the Imperial Valley, where the chief occupation is raising alfalfa, melons, and general farm products.

Mr. CLARK of Missouri. It is worth about $100 to $150 an acre, is it not, when you get water on it?

Mr. SMITH of California. Yes, sir.

Mr. CLARK of Missouri. I object.

Mr. SMITH of California. I hope the gentleman will not object. As the land lies in a state of nature, it is not productive.

Mr. CLARK of Missouri. I understand land around there is not worth three whoops unless it is irrigated.

Mr. SMITH of California. It derives its great value from irrigation. I hope the gentleman will not object. The Land Department is very anxious to clear up the titles to this land.

Mr. CLARK of Missouri. The Land Department is not anxious to get rid of government lands, is it?

Mr. SMITH of California. In this particular case, it is.

Mr. CLARK of Missouri. How much will land sell for around there?

Mr. SMITH of California. Why, in a state of nature it practically has no price.

Mr. CLARK of Missouri. How much do they have to pay to enter it?

Mr. SMITH of California. About $2.50 an acre. It is nearly all homesteaded.

Mr. CLARK of Missouri. This land is already surrounded by farms that are irrigated, is it not?

Mr. SMITH of California. It lies in little narrow strips from 5 to 10 rods wide, where the surveys have not come together, and that leaves a little narrow strip between two farms, and they want to sell that little narrow strip to the abutting farmers. The largest area is 13 acres, and they want to divide that between two farmers, each one getting about 6½ acres.

Mr. CLARK of Missouri. What is the provision in this bill about the price?

Mr. SMITH of California. Not less than $2.50 an acre, or whatever other price the Secretary of the Interior may fix.

Mr. CLARK of Missouri. And the fellows who want to go on it have already applied?

Mr. SMITH of California. They will.

Mr. CLARK of Missouri. And that shuts out anybody else?

Mr. SMITH of California. I do not think anybody would want to buy any of these little strips, where there is not more than a few acres, unless they wanted to annoy the abutting farmers.

Mr. CLARK of Missouri. Did you not say that there were 30 acres in one place?

Mr. SMITH of California. Thirteen acres between two of the farms. It nearly all lies in a long narrow strip.

Mr. CLARK of Missouri. I withdraw my objection.

Mr. SMITH of California. A discrepancy was made in the surveys, and this permits the farmers to buy the land abutting.

The SPEAKER. Is there objection?

Mr. SULZER. I desire to ask the gentleman one more question. This is a very good bill and ought to pass, ought it not?

Mr. SMITH of California. Yes, sir; I think so.

The SPEAKER. The Chair hears no objection.

The bill was ordered to a third reading, read the third time, and passed.

The SPEAKER. A corresponding House bill (H. R. 28190), of the same title, on the House Calendar, will be laid on the table.

RECESS.

Mr. PAYNE. Mr. Speaker, I move that the House take a recess until 11 o'clock on Monday morning.

The motion was agreed to; and accordingly (at 6 o'clock and 53 minutes p. m.) the House was declared in recess.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of examination and survey of Jamaica Bay, Rockaway Inlet, and waters having outlet in Dead Horse Inlet, New York (H. Doc. No. 1488)—to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

A letter from the chairman of the Immigration Commission, transmitting a statement relative to the work and expenditures of the commission (H. Doc. No. 1489)—ordered to be printed as a House document.

A letter from the assistant clerk of the Court of Claims, transmitting a copy of the findings filed by the court in the case of Lewis B. Brasher against The United States (H. Doc. No. 1491)—to the Committee on War Claims and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. HOBSON, from the Committee on Naval Affairs, to which was referred the bill of the House (H. R. 27429) to promote the cause of international peace and arbitration, reported the same with amendments, accompanied by a report (No. 2282), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BARTHOLDT, from the Committee on Public Buildings and Grounds, to which was referred the bill of the House (H. R. 28377) for the erection of a public building for the Geological Survey and other offices, reported the same without amendment, accompanied by a report (No. 2284), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. WANGER, from the Committee on Expenditures in the Post-Office Department, to which was referred House Document No. 1076, regarding expenditures for traveling expenses, Post-Office Department, submitted a report (No. 2283) thereon, which report was ordered printed.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. SMITH of California, from the Committee on the Public Lands, to which was referred the bill of the House (H. R. 27457) to withdraw from entry and sale and granting to the city of Los Angeles, Cal., certain lands therein described, reported the same with amendment, accompanied by a report (No. 2281), which said bill and report were referred to the Private Calendar.

ADVERSE REPORTS.

Under clause 2 of Rule XIII, adverse reports were delivered to the Clerk and laid on the table, as follows:

Mr. KITCHIN, from the Committee on Claims, to which was referred the bill of the House (H. R. 6041) for the relief of the Bath Iron Works and others, reported the same adversely, accompanied by a report (No. 2279), which said bill and report were laid on the table.

He also, from the same committee, to which was referred the bill of the House (H. R. 15101) for the relief of the Bath Iron Works and others, reported the same adversely, accompanied by a report (No. 2280), which said bill and report were laid on the table.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. BARTHOLDT: A bill (H. R. 28377) for the erection of a public building for the Geological Survey and for other offices—to the Committee on Public Buildings and Grounds.

By Mr. BROWNLOW: A bill (H. R. 28378) to limit the effect of the regulation of commerce between the several States and with foreign countries in certain cases—to the Committee on the Judiciary.

By Mr. RYAN: A bill (H. R. 28379) to promote the safety of employees and travelers on railroads by compelling common carriers by railroad to properly man their trains—to the Committee on Interstate and Foreign Commerce.

By Mr. HINSHAW: A bill (H. R. 28380) providing for the establishment of a national park in Gage County, Nebr.—to the Committee on the Public Lands.

By Mr. GAINES of Tennessee: A bill (H. R. 28381) concerning inventions by government employees—to the Committee on Patents.

By Mr. BEDE: A bill (H. R. 28382) to legalize the construction of a bridge across the Mississippi River at Hill City, Aitkin County, Minn.—to the Committee on Interstate and Foreign Commerce.

By Mr. WILSON of Illinois: Resolution (H. Res. 601) for the appointment of two additional clerks to the Committee on Enrolled Bills—to the Committee on Accounts.

By Mr. GAINES of Tennessee: Resolution (H. Res. 602) creating a "department of highways and good roads"—to the Committee on Rules.

By Mr. BENNET of New York: Resolution (H. Res. 603) relative to protection of the person of the President of the United States—to the Committee on Rules.

By Mr. JENKINS: Joint resolution (H. J. Res. 264) proposing an amendment to the Constitution of the United States, providing for succession to the Presidency and Vice-Presidency—to the Committee on the Judiciary.

By Mr. McCALL: Joint resolution (H. J. Res. 265) providing for certain changes in the arrangement of the Hall of the House of Representatives—to the Committee on the Library.

By Mr. ALLEN: Joint resolution (H. J. Res. 266) to change name of Branch avenue, in the District of Columbia, to Huntington avenue—to the Committee on the District of Columbia.

By Mr. STEVENS of Minnesota: Memorial of the legislature of Minnesota, urging improvement of the Minnesota River and the Red River of the North—to the Committee on Rivers and Harbors.

By Mr. CALDER: Memorial of the legislature of Wyoming, relating to creation of forest reserves—to the Committee on the Public Lands.

By Mr. BURLEIGH: Memorial of the legislature of Maine, in favor of the volunteer retired list bill—to the Committee on Military Affairs.

By Mr. GRONNA: Memorial of the legislature of North Dakota, relating to the issuance of bonds for the improvement of rivers, harbors, and waterways—to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. ANTHONY: A bill (H. R. 28383) granting a pension to Franklin Barbour—to the Committee on Pensions.

Also, a bill (H. R. 28384) granting a pension to William H. Scheer—to the Committee on Pensions.

By Mr. CHAPMAN: A bill (H. R. 28385) for the relief of Andrew Yewell—to the Committee on Claims.

Also, a bill (H. R. 28386) granting an increase of pension to Jacob J. Staiger—to the Committee on Invalid Pensions.

By Mr. EDWARDS of Georgia: A bill (H. R. 28387) granting an increase of pension to Joseph A. Noble—to the Committee on Invalid Pensions.

By Mr. GREENE: A bill (H. R. 28388) for the relief of Spencer Borden—to the Committee on Claims.

By Mr. HOUSTON: A bill (H. R. 28389) for the relief of the estate of James D. Hays—to the Committee on War Claims.

Also, a bill (H. R. 28390) granting an increase of pension to William Davis—to the Committee on Invalid Pensions.

By Mr. JOHNSON of Kentucky: A bill (H. R. 28391) for the relief of the estate of Joseph M. Moss, deceased—to the Committee on War Claims.

By Mr. KIMBALL: A bill (H. R. 28392) for the relief of the estate of J. Howard Sheffer, deceased—to the Committee on War Claims.

Also, a bill (H. R. 28393) for the relief of Ambrose D. Vallandingham—to the Committee on War Claims.

By Mr. LANGLEY: A bill (H. R. 28394) granting a pension to Patrick Daly, jr.—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28395) granting a pension to George F. Goss—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28396) for the relief of G. W. Adkins—to the Committee on War Claims.

Also, a bill (H. R. 28397) for the relief of Elizabeth Caskey—to the Committee on War Claims.

Also, a bill (H. R. 28398) granting an increase of pension to James H. Phelps—to the Committee on Invalid Pensions.

By Mr. McHENRY: A bill (H. R. 28399) granting a pension to Edwin H. Moyer—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28400) granting an increase of pension to James M. Wiest—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28401) granting an increase of pension to Jacob B. Gettes—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28402) granting an increase of pension to William H. Morton—to the Committee on Invalid Pensions.

By Mr. SWASEY: A bill (H. R. 28403) granting a pension to Freeman B. Andrews—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28404) to remove the charge of desertion from the military record of Frank Cooper—to the Committee on Military Affairs.

Also, a bill (H. R. 28405) granting an increase of pension to Winfield S. Howe—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ANSBERRY: Petition of Defiance (Ohio) Lodge, No. 147, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

By Mr. ANTHONY: Petitions of the Topeka Milling Company, of Topeka; the Kelley & Lysle Milling Company, of Leavenworth; the C. Hoffman & Son Milling Company, of Enterprise; and the Inter Ocean Mills (Willis Norton & Co.), of Topeka, all in the State of Kansas, outlining certain changes desired in the tariff schedule on flour and in its application in our relations with foreign countries—to the Committee on Ways and Means.

By Mr. BUTLER: Petition of Mary Adelaide Jeffries, of Swarthmore, Pa., favoring S. 5117 and H. R. 18445, to investigate and develop methods of treatment of tuberculosis—to the Committee on Appropriations.

By Mr. CALDER: Petition of National Forest Conservation League, favoring a duty of $2 per thousand on certain kinds of lumber—rough fir, cedar, spruce, etc.—to the Committee on Ways and Means.

Also, petition of Westinghame, Church, Kerr & Co., against any further legislation calculated to hamper railroads—to the Committee on Interstate and Foreign Commerce.

Also, petition of the Veteran Association of the Fifth New York Volunteer Infantry, favoring S. 1045, to protect monuments on battlefields of Bull Run—to the Committee on Military Affairs.

Also, petition of Thomas A. Dowling, of Brooklyn, N. Y., urging passage of the pension bill for soldiers' widows—to the Committee on Invalid Pensions.

Also, petition of the Louisiana Purchase Exposition committee on legislation, proposing a monument to Thomas Jefferson on the site of the St. Louis Exposition, to be built out of any surplus remaining in settlement of its affairs—to the Committee on Appropriations.

Also, petition of the National Lime Manufacturers' Association, of Riverton, Va., for an appropriation to enable the Geological Survey to investigate the manufacture of lime—to the Committee on Appropriations.

Also, petition of the board of directors of the National Business League of America, against a national consular school—to the Committee on Foreign Affairs.

By Mr. DARRAGH: Petition of L. S. Morey and 22 other citizens of Edmon, Mich., against passage of Senate bill 3940—to the Committee on the District of Columbia.

By Mr. DAWSON: Petition of Iowa Retail Hardware Association, against parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

By Mr. ESCH: Petition of C. Meyer and other citizens of Eleva, Wis., against a reduction of tariff on farm products—to the Committee on Ways and Means.

By Mr. FOCHT: Petition of citizens of Newport, Pa., favoring H. R. 18445, for treatment of tuberculosis—to the Committee on Appropriations.

By Mr. FORNES: Petition of National Pocahontas Memorial Association of New York City, protesting against S. 4453, for monument to Pocahontas at Jamestown, Va.—to the Committee on the Library.

Also, petition of National Business League of America, against a national consular school—to the Committee on Foreign Affairs.

By Mr. FOWLER: Petition of the Quinn & Boden Company, of Rahway, N. J., against H. R. 28192—to the Committee on Patents.

Also, petition of Rahway Lodge, No. 1075, Benevolent and Protective Order of Elks, for an American elk reservation in Wyoming—to the Committee on the Public Lands.

Also, petition of the Mothers' Association and Rev. A. C. Nickerson, of Plainfield, N. J., favoring H. R. 24148, for federal bureau for children—to the Committee on Expenditures in the Interior Department.

By Mr. FULLER: Petition of board of directors of National Business League of America, against creation of a national consular school—to the Committee on Foreign Affairs.

Also, petition of the Haddorff Piano Company, of Rockford, Ill., against the parcels post and postal savings banks—to the Committee on the Post-Office and Post-Roads.

Also, petition of J. B. Ralston & Son, opposing parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

Also, petition of David Hunter, of Rockford, Ill., against parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. GILLETT: Petition of citizens of Athol, Mass., favoring removing from the widows' pension laws the bar of the date of marriage—to the Committee on Invalid Pensions.

Also, petition of citizens of Orange and Fitchburg, favoring legislation for the investigation of tuberculosis—to the Committee on Appropriations.

Also, petition of New Salem Grange, Patrons of Husbandry, favoring parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

Also, petition of Greenwich Grange, Patrons of Husbandry, of Greenwich Village, favoring a national highways commission—to the Committee on Agriculture.

By Mr. GOULDEN: Petition favoring the children's bureau bill—to the Committee on Expenditures in the Interior Department.

Also, petition of the United Confederate Veterans of New Orleans, La., for amendment to Hepburn rate bill, giving free transportation to members of the Grand Army of the Republic posts and United Confederate Veterans camps—to the Committee on Interstate and Foreign Commerce.

Also, petition of National Pocahontas Memorial Association of New York City, protesting against S. 4453, for monument to Pocahontas at Jamestown—to the Committee on the Library.

By Mr. GRONNA: Petition of Minot (N. Dak.) Lodge, No. 1089, Benevolent and Protective Order of Elks, favoring a reserve for the American elk—to the Committee on the Public Lands.

By Mr. HAMMOND: Petition of N. J. Desch & Co. and 11 other citizens of Minnesota Lake, Minn., against a parcels post—to the Committee on the Post-Office and Post-Roads.

Also, petition of J. N. Jacobsen and 29 other citizens of Hills, Minn., against tax on tea or coffee—to the Committee on Ways and Means.

Also, petition of Rosenberger & Currier, favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. HAUGEN: Petition of citizens of Fourth Congressional District of Iowa, against a duty on tea and coffee—to the Committee on Ways and Means.

By Mr. HAYES: Petitions of Joseph Maher and 245 others, of Tacoma and Seattle and intervening towns, and J. N. Snodgrass and 367 others, of Tacoma and other parts of Washington, favoring an effective Asiatic exclusion law against all Asiatics excepting merchants, students, and travelers—to the Committee on Foreign Affairs.

By Mr. HENRY of Connecticut: Petitions of Mashapaug Lake Grange, No. 101; L. L. Lowry and others; Somers Grange, No. 105; and Andover Grange, No. 76, for a national highways commission and federal aid in construction of highways (H. R. 15837)—to the Committee on Agriculture.

By Mr. HOWELL of New Jersey: Petitions of F. S. Shinn and John R. Parker, of Lakewood, N. J., favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. HUFF: Paper to accompany bill for relief of W. Scott King (H. R. 27449)—to the Committee on Military Affairs.

By Mr. HULL of Iowa: Petition of Iowa Retail Hardware Association against parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

By Mr. JOHNSON of Kentucky: Papers to accompany bills for relief of estate of Alexander Williams; H. M. Moss, heir of Joseph M. Moss; and Mary H. Letcher, executrix of estate of Thomas K. Letcher—to the Committee on War Claims.

By Mr. KIMBALL: Papers to accompany bills for relief of Ruth W. Spurr, heir of J. Howard Sheffer; J. N. Yager and other heirs of S. C. Yager; George W. McIntyre; and Ambrose D. Vallandingham—to the Committee on War Claims.

Also, petition of Paris (Ky.) Lodge, No. 373, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

By Mr. LONGWORTH: Petition of Newtown Council, No. 230, and Walnut Hills Council, No. 125, Junior Order United American Mechanics, for an effective exclusion law against all Asiatics save merchants, students, and travelers—to the Committee on Foreign Affairs.

By Mr. LOUD: Petition of merchants of Pinconning, Mich., against parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. MARSHALL: Memorial of the senate and house of representatives of North Dakota, favoring issuance of $500,000,000 2 per cent bonds for waterway improvement—to the Committee on Rivers and Harbors.

Also, petition of Heinrich Steinhauer, for legislation to prevent the inhuman and brutal treatment of German-Russian immigrants at Ellis Island—to the Committee on Immigration and Naturalization.

By Mr. POLLARD: Petition of Nebraska legislature, for appropriation for a clock on the post-office building in Lincoln, Nebr.—to the Committee on Public Buildings and Grounds.

By Mr. PRAY: Petition of Great Falls Lodge, No. 214; Bozeman Lodge, No. 463; Billings Lodge, No. 394; Missoula Lodge, No. 383; Virginia City Lodge, No. 390; and Silver Bow Lodge, No. 240, Benevolent and Protective Order of Elks, all in the State of Montana, for reservation for the care of the American elk—to the Committee on the Public Lands.

Also, petition of citizens of Montana, against Sunday-closing bill (S. 3940)—to the Committee on the District of Columbia.

By Mr. REYNOLDS: Petition of Johnstown (Pa.) Lodge, No. 175, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

By Mr. ROBERTS: Petition of citizens at Ford Hall meeting, Boston, Mass., evening of February 21, favoring H. R. 24148, for federal bureau for children—to the Committee on Expenditures in the Interior Department.

Also, petition of Melrose (Mass.) Lodge, No. 1631, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

By Mr. SHERLEY: Paper to accompany bill for relief of C. Lee Hawkins, administrator of estate of Reuben W. Hawkins—to the Committee on War Claims.

By Mr. SIMS: Paper to accompany bill for relief of M. D. Meriwether—to the Committee on War Claims.

Also, petition of Pleasant Springs Colored Farmers' Progressive Union, No. 74, for the granting of a pension to those colored people who were slaves at and prior to the year 1861—to the Committee on Pensions.

By Mr. SNAPP: Petition of certain residents of Elwood, Ill., favoring parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

By Mr. SPERRY: Resolutions of the men's class of the United Church of New Haven, Conn., favoring the children's bureau bill—to the Committee on Expenditures in the Interior Department.

Also, resolutions of the Connecticut Congress of Mothers, favoring the children's bureau bill—to the Committee on Expenditures in the Interior Department.

By Mr. STEPHENS of Texas: Petition of Amarillo Lodge, Benevolent and Protective Order of Elks, for an American elk reservation in Wyoming (H. R. 21980)—to the Committee on the Public Lands.

By Mr. STEVENS of Minnesota: Joint memorial of state legislature of Minnesota, against enactment of the McCumber grain-inspection bill—to the Committee on Interstate and Foreign Commerce.

Also, petition of the Millers' Club of Minnesota, against tax levied on American flour by European countries—to the Committee on Ways and Means.

Also, petition of the Minnesota Mercantile Company, of Stillwater, Minn., favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

Also, petition of St. Paul (Minn.) Lodge, No. 50, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

Also, petition of St. Paul Board of Trade, for a national highways commission and federal aid in construction of highways (H. R. 15837)—to the Committee on Agriculture.

By Mr. SWASEY: Papers to accompany bills for relief of Frank Cooper and Freeman B. Andrews—to the Committee on Invalid Pensions.

Also, paper to accompany bill for relief of Winfield S. Howe—to the Committee on Invalid Pensions.

Also, petition of citizens of Greene, Me., in favor of the parcels-post bill—to the Committee on the Post-Office and Post-Roads.

By Mr. THISTLEWOOD: Petition of Commercial Club of Metropolis, Ill., favoring appropriation for improvement of inland waterways—to the Committee on Rivers and Harbors.

By Mr. WANGER: Preamble and resolution disapproving of the creation of a national consular school, adopted by the board of directors of the National Business League of America at Chicago, February 15, 1909—to the Committee on Foreign Affairs.

By Mr. WEBB: Petition of merchants of Cleveland County, against the parcels post and postal savings banks—to the Committee on the Post-Office and Post-Roads.

By Mr. WHEELER: Petition of Joseph A. Schofield and 92 others, of Warren County, Pa., against removal of duty on crude oil—to the Committee on Ways and Means.

By Mr. WILEY: Petition of E. P. Rigsby and others, of Shell, Ala., against reduction of the duty on lumber—to the Committee on Ways and Means.

By Mr. WOOD: Petition of citizens of Trenton, N. J., favoring the children's bureau bill—to the Committee on Expenditures in the Interior Department.

Also, petition of Princeton Agricultural Association and Mercer Grange, No. 77, Patrons of Husbandry, of Hopewell, N. J., for a national highways commission and federal aid in construction of highways (H. R. 15837)—to the Committee on Agriculture.

Also, petition of Lambertville (N. J.) Lodge, No. 1070, Benevolent and Protective Order of Elks, for a reserve in Wyoming for the American elk—to the Committee on the Public Lands.

SENATE.

MONDAY, *March 1, 1909.*

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. Edward E. Hale.

The Secretary proceeded to read the Journal of the proceedings of Saturday last, when, on request of Mr. KEAN, and by unanimous consent, the further reading was dispensed with.

The VICE-PRESIDENT. The Journal stands approved.

COMPANIES B, C, AND D, TWENTY-FIFTH INFANTRY.

Mr. HOPKINS. Mr. President, on the 23d of February the Senate had under consideration the bill (S. 5729) to correct the records and authorize the reenlistment of certain noncommissioned officers and enlisted men belonging to Companies B, C, and D of the Twenty-fifth U. S. Infantry who were discharged without honor under Special Orders, No. 266, War Department, November 9, 1906, and the restoration to them of all rights of which they have been deprived on account thereof.

That bill, as I understand it, was a substitute for what is known as the "Foraker bill," touching the Brownsville matter. I was not present at the time of the consideration of the bill. There were two votes taken upon the bill; one on the amendment that was offered by the senior Senator from Virginia [Mr. DANIEL] to strike out section 2 of the bill, and the other on the passage of the bill itself.

I find that in the arrangement of pairs I am recorded in favor of the amendment and against the bill. This is an error. Had I been present I should have voted against the amendment offered by the Senator from Virginia, and I should have voted for the bill on its final passage. I desire to make this statement in order to correct the RECORD as I find it.

CREDENTIALS.

Mr. FOSTER. Mr. President, in the absence of the senior Senator from Georgia [Mr. BACON], on account of sickness, I present the credentials of the junior Senator from Georgia [Mr. CLAY].

The credentials of A. S. CLAY, appointed by the governor of Georgia a Senator from that State for the term beginning March 4, 1909, to fill the vacancy in the term until the next meeting of the legislature thereof, were read and ordered to be filed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had passed the following bills:

S. 5729. An act to correct the records and authorize the reenlistment of certain noncommissioned officers and enlisted men belonging to Companies B, C, and D of the Twenty-fifth U. S. Infantry who were discharged without honor under Special Orders, No. 266, War Department, November 9, 1906, and the restoration to them of all rights of which they have been deprived on account thereof;

S. 9006. An act to amend an act authorizing the Washington, Spa Springs and Gretta Railroad Company, of Maryland, to enter the District of Columbia, approved February 18, 1907; and

S. 9373. An act to provide for the sale of isolated tracts of public land in Imperial County, Cal.

The message also announced that the House had passed the following bills with amendments, in which it requested the concurrence of the Senate:

S. 6055. An act to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia;

S. 8058. An act authorizing the Attorney-General to appoint as special peace officers such employees of the Alaska school service as may be named by the Secretary of the Interior;

S. 9278. An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors; and

S. 9421. An act granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors.

The message further announced that the House had passed the following bills and joint resolutions, in which it requested the concurrence of the Senate:

H. R. 28055. An act to authorize the Secretary of War to donate one condemned brass or bronze cannon and cannon balls to the soldiers' plot in Forest Hill Cemetery, Scranton, Pa.;

H. R. 28376. An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes;

H. J. Res. 225. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Alexander Hamilton memorial in Washington, D. C.;

H. J. Res. 261. Joint resolution authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America in the year 1912;

H. J. Res. 262. Joint resolution extending the operation of an act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes; and

H. J. Res. 265. Joint resolution to rearrange and reconstruct the Hall of the House of Representatives, and for other purposes.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27061) to provide for the appointment of an additional district judge in and for the western district of Washington.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. BURTON of Ohio, Mr. ALEXANDER of New York, and Mr. SPARKMAN managers at the conference on the part of the House.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice-President:

S. 9067. An act to grant pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and dependent relatives of said soldiers;

S. 9422. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors;

S. 9454. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors;

H. R. 4286. An act for the relief of John Shull; and

H. R. 15681. An act for the relief of the Compañía de los Ferrocarriles de Puerto Rico.

RIVER AND HARBOR APPROPRIATION BILL.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. FRYE. I move that the Senate insist upon its amendments and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed Mr. NELSON, Mr. GALLINGER, and Mr. MARTIN conferees on the part of the Senate.

HOUSE BILLS REFERRED.

H. R. 28055. An act to authorize the Secretary of War to donate one condemned brass or bronze cannon and cannon balls to the soldiers' plot in Forest Hill Cemetery, Scranton, Pa., was read twice by its title and referred to the Committee on Military Affairs.

H. R. 28376. An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

H. J. Res. 225. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Alexander Hamilton memorial in Washington, D. C., was read twice by its title and referred to the Committee on the Library.

H. J. Res. 261. Joint resolution authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America, in the year 1912, was read twice by its title and referred to the Committee on Foreign Affairs.

H. J. Res. 262. Joint resolution extending the operation of an act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes, was read twice by its title and referred to the Committee on Commerce.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented petitions of the State Child Labor Committee of Boston, and of the Ford Hall Citizens Meeting of Boston, in the State of Massachusetts; of the Woman's Municipal League of Brooklyn; of Eliza C. Tappan, of Glen Cove; and of sundry citizens of Pelham, all in the State of New York, praying for the passage of the so-called "children's bureau bill," which were ordered to lie on the table.

He also presented a joint memorial of the legislature of Oregon, which was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, secretary of state of the State of Oregon and custodian of the seal of said State, do hereby certify:

That I have carefully compared the annexed copy of senate joint memorial No. 6, twenty-fifth legislative assembly of the State of Oregon, adopted by the senate February 10, 1909, and concurred in by the house February 19, 1909, together with the indorsements thereon, and that it is a full, true, and complete copy of the original as filed in the office of the secretary of state of the State of Oregon on the 23d day of February, 1909, and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 23d day of February, A. D. 1909.

[SEAL.] F. W. BENSON,
Secretary of State.

Senate joint memorial 6.

Whereas there is pending in the Congress of the United States a bill providing for instruction in forestry in the colleges of agriculture and mechanic arts and for experiments in forestry in the agricultural experiment stations located in the different States, providing for an appropriation of $2,500 per annum to each branch of these institutions located in the several States for such purposes; and

Whereas the protection and perpetuation of our forests is of vital importance, said industry being one of the most valuable to all our people

and one which should be protected and encouraged in every possible way: Therefore be it

Resolved by the senate and house of representatives of the State of Oregon, That it is the sense of the people of the State of Oregon that this bill should pass and that our Representatives in Congress and in the Senate of the United States use all honorable means in assisting in its passage; and be it further

Resolved, That a copy of this memorial be forwarded to the Senate and House of Representatives of the United States in Congress assembled and to each of our Representatives and United States Senators by the secretary of state.

Concurred in by the house February 19, 1909.

C. N. MCARTHUR, *Speaker.*

Passed by the senate February 10, 1909.

JAY BOWERMAN, *President.*

Indorsed: Senate joint resolution 6, Wm. H. Barry, chief clerk; filed February 23, 1909, F. W. Benson, secretary of state.

The VICE-PRESIDENT presented a joint memorial of the legislature of Oregon, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of House joint memorial No. 2, twenty-fifth legislative assembly of the State of Oregon, adopted by the house January 22, 1909, and concurred in by the senate, February 9, 1909, together with the indorsements thereon, and that it is a full, true, and complete copy of the original as filed in the office of the secretary of state of the State of Oregon on the 23d day of February, 1909, and of the whole thereof.

In testimony whereof, I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 23d day of February, A. D. 1909.

[SEAL.] F. W. BENSON,
Secretary of State.

House joint memorial 2.

To the honorable Senate and House of Representatives of the United States of America:

Your memorialists, the legislative assembly of the State of Oregon, most respectfully represent that—

Whereas the grain growers of the Pacific coast are compelled to handle their grain in bags on account of the principal market for their product being in Europe, which necessitates the shipping of grain around by ocean, and the consequent use of bags for holding grain to prevent the shifting of the cargo; and

Whereas the grain producers of the Pacific coast are at a disadvantage on account of their great distance from market, as they are farthest away from the point of consumption of their product, and consequently pay a higher freight rate and receive a lower price for their product; and

Whereas the grain growers of the Pacific coast are further handicapped by the fact that they are forced, on account of high freight rates, and their situation to pay more for their machinery than is paid by grain producers in any other part of this country, or by any of their competitors in any other part of the world; and

Whereas the duty on grain bags and on burlap cloth used in the manufacture of grain bags, wool bags, and for inclosing hop products, affords substantially no protection to American labor and but small protection to American manufacture, and it will be impossible to ever build up a large industry in the manufacture of such articles, and we therefore believe as a protective measure, it fails of its object, being more oppressive than protective, and a heavy tax on the industries on which the Pacific coast depend mainly for their prosperity, and as a means of producing revenue is unfair as it falls as a burden on those already burdened by the high cost of producing grain and other products and the low price at which they must sell the same. Therefore

Your memorialists request your honorable body to remove the duty on burlap described by section 341 of the Dingley tariff, 1897, and admit the goods enumerated in that section into the United States free of duty; and to amend section 343 of the present Dingley tariff to read as follows: Bags or sacks made from plain woven fabrics, of single jute yarn, not dyed, colored, stained, painted, printed, or bleached, and not exceeding 30 threads to the square inch, counting the warp and filling, one-half of 1 cent per pound.

Be it resolved by the legislative assembly that the secretary of state is hereby instructed to transmit a copy of this resolution to Hon. C. W. FULTON and Hon. JONATHAN BOURNE, United States Senators, and to Hon. W. R. ELLIS and Hon. W. C. HAWLEY, Representatives from Oregon, and respectfully request them to use their utmost endeavor to have the above-mentioned duties removed.

Passed the house January 22, 1909.

C. N. MCARTHUR,
Speaker of the House.

Passed the senate February 9, 1909.

JAY BOWERMAN,
President of the Senate.

Indorsed house joint memorial 2, W. F. Drager, chief clerk; filed February 23, 1909; F. W. Benson, secretary of state.

The VICE-PRESIDENT presented a joint memorial of the legislature of Oregon, which was referred to the Committee on Forest Reservations and the Protection of Game, and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of house joint memorial No. 11, twenty-fifth legislative assembly of the State of Oregon, adopted by the house February 19, 1909, and concurred in by the senate Februry 20, 1909, together with the indorsements thereon, and that it is a full, true, and complete copy of the original as filed in the office of the secretary of state of the State of Oregon on the 23d day of February, 1909, and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 23d day of February, A. D. 1909.

[SEAL.] F. W. BENSON,
Secretary of State.

Joint memorial 11.

Whereas the bill in the United States Congress to acquire forest lands on the Eastern Appalachian Mountains, in the States of New Hampshire and Maine at the north, and in Virginia, West Virginia, North Carolina, South Carolina, Georgia, Tennessee and Kentucky at the south, has three times passed the United States Senate, was recommended in a special message once by President William McKinley and twice by Theodore Roosevelt, has the unqualified approval of the President-elect, William H. Taft, and has now been recommended to the House of Representatives by a vote of 10 to 4 in the Committee on Agriculture; and

Whereas the governor of Massachusetts, Curtis Guild, jr., has asked the governor and people of Oregon to lend their support to the passage of this measure at this session of Congress before it adjourns on March 4: Therefore be it

Resolved by the senate and house of representatives of the State of Oregon, That the passage of this measure by the Federal Government is approved. Be it further

Resolved, That the people of this State and the legislature thereof favor the appropriation of moneys by the Congress of the United States for acquiring title to and reforesting deforested areas, whenever and wherever this policy may be necessary in any of the States of the Union, and the governor is hereby requested to transmit copies of this resolution to members of the Oregon delegation in Congress.

Adopted by the house February 19, 1909.

C. N. MCARTHUR,
Speaker of the House.

Concurred in by the senate February 20, 1909.

JAY BOWERMAN,
President of the Senate.

Indorsed: House joint memorial 11, W. F. Drager, chief clerk; filed February 23, 1909, F. W. Benson, secretary of state.

The VICE-PRESIDENT presented a joint memorial of the legislature of Orgeon, which was referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, secretary of state of the State of Oregon and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial No. 5, twenty-fifth legislative assembly of the State of Oregon, adopted by the senate February 3, 1909, and concurred in by the house February 12, 1909, together with the indorsements thereon, and that it is a full, true, and complete copy of the original as filed in the office of the secretary of state of the State of Oregon on the 19th day of February, 1909, and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 23d day of February, A. D. 1909.

[SEAL.] F. W. BENSON,
Secretary of State.

Senate joint memorial 5.

Whereas in this and many other States where prohibition or local option prevail liquor dealers residing in territory where prohibition or local option do not prevail continually ship intoxicating liquors of all kinds into the territory in which prohibition or local option has been voted; and

Whereas such shipments have been held to constitute interstate commerce when the same are shipped from one State into another, the regulation of which is entirely within the power of Congress: Therefore be it

Resolved by the senate of the State of Oregon (the house of representatives concurring), That we hereby respectfully memorialize Congress to enact a law prohibiting shipments of intoxicating liquors from a State or Territory in which neither local option nor prohibition prevails into a State or Territory in which the same does prevail.

Concurred in by the house February 12, 1909.

C. N. MCARTHUR, *Speaker.*

Adopted by the senate February 3, 1909.

JAY BOWERMAN, *President.*

Indorsed: Senate joint memorial No. 5, Wm. H. Barry, chief clerk; filed February 19, 1909, F. W. Benson, secretary of state.

The VICE-PRESIDENT presented a joint memorial of the legislature of Oregon, which was referred to the Committee on Forest Reservations and the Protection of Game and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial No. 11, twenty-fifth legislative assembly of the State of Oregon, adopted by the senate February 15, 1909, and concurred in by the house February 19, 1909, together with the indorsements thereon, and that it is a full, true, and complete copy of the original as filed in the office of the secretary of state of the State of Oregon on the 23d day of February, 1909, and of the whole thereof.

In testimoy whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 23d day of February, A. D. 1909.

[SEAL.] F. W. BENSON,
Secretary of State.

FEBRUARY 12, 1909.

To the honorable Senate and House of Representatives of the United States:

Your memorialists, the legislature of the State of Oregon, respectfully represent that in common with the people of this Commonwealth we appreciate and commend the efforts which the President of the United States has been and is making looking to the conservation of the nat-

ural resources of the country. The appointment of a National Conservation Commission and state commission to bring about cooperation on the part of the National Government and the several States, aside from having brought to the attention of the country the rapid depletion of its natural resources, is arousing a deep interest in the subject which is likely in the very near future to bring about active cooperation upon the part of the National and state governments for the preservation of those resources which have not been exhausted, and as well for the renewal of those which are capable of being renewed. As a part of this general scheme the Inland Waterways Commission, appointed by the President, has been a factor in the conservation movement, and in our opinion the Congress of the United States should make liberal appropriations to aid in the movement which the President has inaugurated and which promises much for the future well-being, development, and enrichment of our country, for the perpetuation of our institutions, and the protection of generations yet unborn.

Therefore we, the legislature of the State of Oregon, representing the people of the State, do respectfully memorialize Congress to make liberal appropriations to aid in the movement between the Nation and the States for the conservation of our natural resources, so that the work of the National Conservation Commission, assisted by the Inland Waterways Commission and the several state commissions, may not be delayed or hindered, but continue uninterrupted in accordance with the policies outlined by the President of the United States and indorsed and commended by the President-elect.

Concurred in by the house February 19, 1909.

C. N. MCARTHUR,
Speaker.

Adopted by the senate February 15, 1909.

JAY BOWERMAN,
President.

Indorsed: Senate joint memorial 11, William H. Barry, chief clerk; filed February 23, 1909, F. W. Benson, secretary of state.

The VICE-PRESIDENT presented a joint memorial of the legislature of South Dakota, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

STATE OF SOUTH DAKOTA,
DEPARTMENT OF STATE.

UNITED STATES OF AMERICA, *State of South Dakota:*

I, Samuel C. Polley, secretary of state of South Dakota, and keeper of the great seal thereof, do hereby certify that the attached instrument of writing is a true and correct copy of house joint resolution No. 17, as passed by the legislature of 1909 of the State of South Dakota, with all the indorsements thereon and of the whole thereof, and has been compared with the original now on file in this office.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of South Dakota.

Done at the city of Pierre, this 25th day of February, 1909.

[SEAL.] SAMUEL C. POLLEY,
Secretary of State.

House joint resolution memorializing Congress to maintain and increase the tariff upon wool.

Be it resolved by the house of representatives of the State of South Dakota (the senate concurring):

Whereas foreign competition in the wool market is so strong that the price of wool in the United States is frequently reduced below the price of production and a great and profitable industry is crippled thereby; and

Whereas it is with proper protection perfectly possible for the farmers of the United States to not only supply the entire American demand for wool, but to as well produce large quantities for exportation: Therefore

Resolved, That the legislature of the State of South Dakota hereby petitions the Congress of the United States to maintain the tariff upon wool in the revision of the tariff schedules now in contemplation.

I hereby certify that the within act originated in the house and was known in the house files as house joint resolution No. 17.

JAMES W. CONE,
Chief Clerk.

STATE OF SOUTH DAKOTA, *Office of secretary of state, ss:*

Filed February 23, 1909, at 5.15 o'clock p. m.

SAMUEL C. POLLEY,
Secretary of State.

A joint resolution memorializing Congress to maintain and increase the tariff upon wool.

M. J. CHANEY,
Speaker of the House.

Attest:
JAMES W. CONE, *Chief Clerk.*

HOWARD C. SHOBER,
President of the Senate.

Attest:
L. M. SIMONS, *Secretary of the Senate.*

The VICE-PRESIDENT presented a concurrent resolution of the legislature of Kansas, which was ordered to lie on the table and be printed in the RECORD, as follows:

House concurrent resolution 21.

Whereas the National House of Representatives have declined to make any appropriation for the maintenance of the several pension agencies of the United States, and by this action on their part are making a strong effort to consolidate the 18 agencies into one, to be located in the city of Washington;

Whereas there are many pensioners on the rolls of the Topeka agency that are almost wholly dependent upon their pensions for their support and maintenance, and by such consolidation it would cause a delay of ten to fifteen days longer than it does now in receiving their pension checks from Washington, thereby in a measure working a hardship upon them; and

Whereas the Topeka (Kans.) Agency is more nearly the center of the veteran population of the United States, and in consequence thereof the largest agency, and that the records will show transacts the business of the office at a less ratio of expense than other agencies, with less employees; and

Whereas a number of the clerks at said agency are veterans of the civil war, a large percentage of whom own their homes, and a removal of said agency to Washington would work a pecuniary loss to them should they be assigned to accompany the agency; and if not, work an injustice upon men well qualified and fitted by reason of their experience to perform any of the clerical labor assigned them, by reason of throwing them in competition with younger applicants for clerical positions in business life; and

Whereas should such contemplated consolidation take place, and some or all of the veteran employees be thrown out of employment, it would work a hardship upon them, in this, that owing to their advancing in age it would be impossible for them to embark or engage in any business for themselves or to obtain employment in any other capacity: Therefore be it

Resolved by the house of representatives of the State of Kansas (the senate concurring therein), That we hereby earnestly protest against the consolidation of all the agencies into one, and that we urge and request our delegation in Congress to use all honorable means to defeat such a measure.

Resolved, That a copy of this resolution be transmitted to each of our Members of Congress and Senators, the President of the Senate, the Speaker of the House, and to the Senate and House Committee on Appropriations.

I hereby certify that the above concurrent resolution originated in the house, and passed that body February 4, 1909.

J. N. DOLLEY,
Speaker of the House.
W. T. BECK,
Chief Clerk of the House.

Passed the senate February 17, 1909.

W. J. FITZGERALD,
President of the Senate.
Z. E. WYANT,
Secretary of the Senate.

Approved February 23, 1909.

W. R. STUBBS, *Governor.*

STATE OF KANSAS,
OFFICE OF THE SECRETARY OF STATE.

I, C. E. Denton, secretary of state of the State of Kansas, do hereby certify that the above and foregoing is a correct copy of the original enrolled bill now on file in my office.

In testimony whereof I have hereunto subscribed my name and affixed my official seal this 24th day of February, 1909.

[SEAL.] C. E. DENTON,
Secretary of State.

Mr. du PONT presented a petition of Industry Council, No. 25, Junior Order of United American Mechanics, of New Castle, Del., praying for the enactment of legislation to prohibit the immigration of Asiatics into the United States and the Territory of Hawaii, except merchants, students, and travelers, which was referred to the Committee on Immigration.

Mr. BRANDEGEE presented a petition of Local Lodge No. 899, Benevolent and Protective Order of Elks, of Stamford, Conn., and a petition of Local Lodge No. 360, Benevolent and Protective Order of Elks, of New London, Conn., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

Mr. SMOOT presented a petition of sundry citizens of Salt Lake City, Utah, praying for the enactment of legislation to create a volunteer retired list in the War and Navy departments for the surviving officers of the civil war, which was referred to the Committee on Military Affairs.

Mr. BURKETT presented a petition of Local Lodge No. 1049, Benevolent and Protective Order of Elks, of Nebraska City, Nebr., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented petitions of sundry citizens of Chadron, Comstock, Alma, Holbrook, Overton, Sutton, Wymore, Pawnee City, Verdon, Lincoln, O'Neill, and Plattsmouth, all in the State of Nebraska, praying for the enactment of legislation to prohibit the interstate transportation of intoxicating liquors, which were referred to the Committee on the Judiciary.

Mr. DEPEW presented a petition of Local Lodge No. 535, Benevolent and Protective Order of Elks, of White Plains, N. Y., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a petition of Greensburgh and Mt. Pleasant District Council, United Brotherhood of Carpenters and Joiners of America, of Irvington, N. Y., praying for the passage of the so-called "children's bureau bill," which was ordered to lie on the table.

Mr. HALE presented a petition of the Society of Friends of Vassalboro, Me., praying for the enactment of legislation to prohibit the interstate transportation of intoxicating liquors, which was referred to the Committee on the Judiciary.

He also presented petitions of the congregation of the First Methodist Episcopal Church of Bangor, of the congregation of the Baptist Church of Ellsworth, and of the Maine Branch, In-

ternational Order of the King's Daughters and Sons, of Brunswick, all in the State of Maine, praying for the passage of the so-called "children's bureau bill," which were ordered to lie on the table.

Mr. FRYE presented a memorial of the legislature of Maine, which was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

STATE OF MAINE.

Whereas it has been the policy of this country from the beginning to maintain a small Regular Army, and in times of war to rely upon the patriotism of the people to rally as volunteers in defense of the national flag; and

Whereas it is a recognized fact that the civil war, 1861 to 1865, forms the most sanguinary chapter in the history of the world, that the Regular Army during that struggle was maintained at about 25,000 men, while the volunteers numbered more than 2,500,000 of officers and enlisted men; and

Whereas it is a recognized fact that the Union of these States was preserved and the national authority maintained by the patriotism, fortitude, and valor of the volunteers, to whom this great united people, now enjoying the inestimable blessing of a preserved Union, owe a debt of gratitude that can never be paid: Therefore

Resolved, by the senate and house of representatives of the State of Maine, That we request the Senators and Representatives of the Sixtieth Congress from the State of Maine to aid in the prompt enactment of a law in effect creating a volunteer retired list, upon which may be placed with retired pay, upon application, the surviving volunteer officers of the army, navy, and marine of the United States and noncommissioned officers and privates who served with credit during the civil war, such survivors now constituting a small remnant of that body of gallant men who led the Union forces to final victory.

Resolved further, That in our opinion the precedents of congressional legislation fully justify the enactment of this law, namely, the acts of 1822 and 1832, granting full pay during life to the surviving officers and enlisted men of the army, navy, and marine of the Revolution; the act of 1901, retiring Charles A. Boutelle, a volunteer officer of the Union Navy, with the rank and retired pay of a captain of the navy; the acts of 1904, 1906, and 1907, granting increased rank and retired pay to the officers of the Regular Army and Navy, based solely on the ground that they had served with credit during the civil war, and the act of 1905, providing for the retirement of two officers of volunteers, namely, Generals Joseph R. Hawley and P. J. Osterhaus, with the rank and pay of brigadier-general: Therefore it is further

Resolved, That in our opinion the bill now pending in Congress and reported favorably by the Committee on Military Affairs, by the provisions of which retired pay is to be given to officers and enlisted men alike who served in the Volunteer Army of the late civil war.

Resolved, That the secretary of state be instructed to forward a copy of these resolutions to each of the United States Senators from Maine and to each Member of the United States House of Representatives of Maine.

In senate, February 23, 1909: Adopted; sent down for concurrence.
F. G. FARRIGTON, *Secretary.*

House of representatives, February 24, 1909: Adopted in concurrence.
E. M. THOMPSON, *Clerk.*

A true copy of record.
Attest:
[SEAL.]
A. I. BROWN,
Secretary of State.

Mr. FRYE presented a petition of sundry citizens of Maine, praying for the passage of the so-called "rural parcels-post" and "postal savings banks" bills, which was referred to the Committee on Post-Offices and Post-Roads.

He also presented a memorial of sundry citizens of Augusta, Me., remonstrating against any curtailment of the powers conferred upon the Bureau of Chemistry, Department of Agriculture, in administering the pure-food law, which was referred to the Committee on Agriculture and Forestry.

He also presented a memorial of the State Press Association, of Augusta, Me., remonstrating against the enactment of legislation denying to publishers of daily and weekly newspapers the right to send at the pound rate their publications to subscribers who may be in arrears of payment for more than three months or one year, which was referred to the Committee on Post-Offices and Post-Roads.

He also presented a petition of the State Press Association, of Augusta, Me., praying for the enactment of legislation permitting the publishers of newspapers to accept transportation from railroads in payment for advertising, which was referred to the Committee on Interstate Commerce.

Mr. DICK presented petitions of Local Lodges Nos. 390, 75, 1130, 1139, 973, 156, and 305, of Newark, Findlay, Marysville, Fostoria, Greenville, Athens, Bucyrus, and Salem, all of the Benevolent and Protective Order of Elks, in the State of Ohio, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

He also presented petitions of sundry citizens of Ohio, praying for the passage of the so-called "rural parcels-post" and "postal savings banks" bills, which were referred to the Committee on Post-Offices and Post-Roads.

He also presented a petition of the Association of Credit Men of Toledo, Ohio, praying for the adoption of certain amendments to the present bankruptcy law, which was referred to the Committee on the Judiciary.

Mr. GAMBLE presented memorials of sundry citizens of South Dakota, remonstrating against the treatment accorded German-Russian immigrants by government officials upon their arrival at Ellis Island, N. Y., on account of their alleged suffering from trachoma, which were referred to the Committee on Immigration.

Mr. BRIGGS presented petitions of the Potteries Selling Company, of Trenton; of the American Oil and Supply Company, of the Newark Association of Credit Men, and of Albert C. Courter & Co., all of Newark, in the State of New Jersey; and of the L. E. Waterman Company, of New York City, N. Y., praying for the adoption of the so-called "Sherley amendment" to the present bankruptcy law, which were referred to the Committee on the Judiciary.

He also presented petitions of the Bureau of Associated Charities of Newark, of the Children's Aid and Protective Society of Orange, of the Child Labor Committee of East Orange, of the Woman's Club of Orange, and of the Thursday Morning Club, of Orange, all in the State of New Jersey, praying for the passage of the so-called "children's bureau" bill, which were ordered to lie on the table.

He also presented petitions of Local Lodges Nos. 1070, 434, 276, 848, 128, 733, 580, 996, 293, 885, 891, 60, and 784, of Lambertville, Bayonne, Atlantic City, Mount Holly, Asbury Park, Bridgeton, Millville, Burlington, Camden, Plainfield, Mount Clair, Paterson, and Perth Amboy, all of the Benevolent and Protective Order of Elks, in the State of New Jersey, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

He also presented memorials of sundry citizens of New Jersey, remonstrating against the enactment of any legislation inimical to the railroad interests of the country, which were referred to the Committee on Interstate Commerce.

Mr. FRAZIER presented a petition of the Retail Shoe Dealers' Association of Nashville, Tenn., praying for the repeal of the duty on hides, which was referred to the Committee on Finance.

He also presented a memorial of sundry business firms of Tennessee, remonstrating against the passage of the so-called "rural parcels-post bill," which was referred to the Committee on Post-Offices and Post-Roads.

He also presented petitions of Local Lodge No. 825, of Johnson City; of Local Lodge No. 712, of Dyersburg, all of the Benevolent and Protective Order of Elks; of the C. E. Baylor Company, of Morristown; and of the J. T. McTeer Clothing Company, of Knoxville, all in the State of Tennessee, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

Mr. BOURNE presented a joint memorial of the legislature of Oregon, which was referred to the Committee on Forest Reservations and the Protection of Game and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of house joint memorial No. 11, twenty-fifth legislative assembly of the State of Oregon, adopted by the house February 19, 1909, and concurred in by the senate February 20, 1909, together with the indorsements thereon, and that it is a full, true, and complete copy of the original as filed in the office of the secretary of state of the State of Oregon on the 23d day of February, 1909, and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 23d day of February, A. D. 1909.

[SEAL.] F. W. BENSON, *Secretary of State.*

Joint memorial 11.

Whereas the bill in the United States Congress to acquire forest lands on the eastern Appalachian Mountains, in the States of New Hampshire and Maine at the north, and in Virginia, West Virginia, North Carolina, South Carolina, Georgia, Tennessee, and Kentucky at the south, had three times passed the United States Senate, was recommended in a special message once by President William McKinley, and twice by Theodore Roosevelt, has the unqualified approval of the President-elect, William H. Taft, and has now been recommended to the House of Representatives by a vote of 10 to 4 in the Committee on Agriculture; and

Whereas the governor of Massachusetts, Curtis Guild, jr., has asked the governor and people of Oregon to lend their support to the passage of this measure at this session of Congress before it adjourns on March 4: Therefore be it

Resolved by the senate and house of representatives of the State of Oregon, That the passage of this measure by the Federal Government is approved; and be it further

Resolved, That the people of this State and the legislature thereof favor the appropriation of moneys by the Congress of the United States for acquiring title to and reforesting deforested areas whenever and wherever this policy may be necessary in any of the States of the

Union, and the governor is hereby requested to transmit copies of this resolution to members of the Oregon delegation in Congress.

Adopted by the house February 19, 1909.

C. N. MCARTHUR,
Speaker of the House.

Concurred in by the senate February 20, 1909.

JAY BOWERMAN,
President of the Senate.

Indorsed: House joint memorial 11, W. F. Drager, chief clerk; filed February 23, 1909, F. W. Benson, secretary of state.

Mr. BOURNE presented a joint memorial of the legislature of Oregon, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, secretary of state of the State of Oregon and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of house joint memorial No. 2, twenty-fifth legislative assembly of the State of Oregon, adopted by the house January 22, 1909, and concurred in by the senate February 9, 1909, together with the indorsements thereon, and that it is a full, true, and complete copy of the original as filed in the office of the secretary of state of the State of Oregon on the 23d day of February, 1909, and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 23d day of February, A. D. 1909.

[SEAL.]

F. W. BENSON,
Secretary of State.

House joint memorial 2.

To the honorable Senate and House of Representatives of the United States of America:

Your memorialists, the legislative assembly of the State of Oregon, most respectfully represent that—

Whereas the grain growers of the Pacific coast are compelled to handle their grain in bags on account of the principal market for their product being in Europe, which necessitates the shipping of grain around by ocean, and the consequent use of bags for holding grain to prevent the shifting of the cargo; and

Whereas the grain producers of the Pacific coast are at a disadvantage on account of their great distance from market, as they are farthest away from the point of consumption of their product, and consequently pay a higher freight rate and receive a lower price for their product; and

Whereas the grain growers of the Pacific coast are further handicapped by the fact that they are forced, on account of high freight rates and their situation, to pay more for their machinery than is paid by grain producers in any other part of this country or by any of their competitors in any other part of the world; and

Whereas the duty on grain bags and on burlap cloth used in the manufacture of grain bags, wool bags, and for inclosing hop products affords substantially no protection to American labor and but small protection to American manufacture, and it will be impossible to ever build up a large industry in the manufacture of such articles, and we therefore believe as a protective measure it fails of its object, being more oppressive than protective, and a heavy tax on the industries on which the Pacific coast depend mainly for their prosperity, and as a means of producing revenue is unfair, as it falls as a burden on those already burdened by the high cost of producing grain and other products and the low price at which they must sell the same: Therefore

Your memorialists request your honorable body to remove the duty on burlap described by section 341 of the Dingley tariff, 1897, and admit the goods enumerated in that section into the United States free of duty, and to amend section 343 of the present Dingley tariff to read as follows: "Bags or sacks made from plain woven fabrics, of single jute yarn, not dyed, colored, stained, painted, printed, or bleached, and not exceeding 30 threads to the square inch, counting the warp and filling, one-half of 1 cent per pound:" Be it

Resolved by the legislative assembly, That the secretary of state is hereby instructed to transmit a copy of this resolution to Hon. C. W. FULTON and Hon. JONATHAN BOURNE, United States Senators, and to Hon. W. R. ELLIS and Hon. W. C. HAWLEY, Representatives from Oregon, and respectfully request them to use their utmost endeavor to have the above-mentioned duties removed.

Passed the house January 22, 1909.

C. N. MCARTHUR,
Speaker of the House.

Passed the senate February 9, 1909.

JAY BOWERMAN,
President of the Senate.

Indorsed: House joint memorial 2, W. F. Drager, chief clerk; filed February 23, 1909, F. W. Benson, secretary of state.

Mr. BOURNE presented a joint memorial of the legislature of Oregon, which was referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of Senate joint memorial No. 5, twenty-fifth legislative assembly of the State of Oregon, adopted by the senate February 3, 1909, and concurred in by the house February 12, 1909, together with the indorsements thereon, and that it is a full, true, and complete copy of the original as filed in the office of the secretary of state of the State of Oregon on the 19th day of February, 1909, and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 23d day of February, A. D. 1909.

[SEAL.]

F. W. BENSON,
Secretary of State.

Senate joint memorial 5.

Whereas in this and many other States where prohibition or local option prevails liquor dealers residing in territory where prohibition or local option do not prevail continually ship intoxicating liquors of all kinds into the territory in which prohibition or local option has been voted; and

Whereas such shipments have been held to constitute interstate commerce when the same are shipped from one State into another, the regulation of which is entirely within the power of Congress: Therefore be it

Resolved by the senate of the State of Oregon (the house of representatives concurring), That we hereby respectfully memorialize Congress to enact a law prohibiting shipments of intoxicating liquors from a State or Territory in which neither local option nor prohibition prevails into a State or Territory in which the same does prevail.

Concurred in by the house February 12, 1909.

C. N. MCARTHUR, *Speaker.*

Adopted by the senate February 3, 1909.

JAY BOWERMAN, *President.*

Indorsed: Senate joint memorial 5, William H. Barry, chief clerk; filed February 19, 1909, F. W. Benson, secretary of state.

Mr. BOURNE presented a joint memorial of the legislature of Oregon, which was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, secretary of state of the State of Oregon and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial 6, twenty-fifth legislative assembly of the State of Oregon, adopted by the senate February 10, 1909, and concurred in by the house February 19, 1909, together with the indorsements thereon, and that it is a full, true, and complete copy of the original as filed in the office of the secretary of state of the Stats of Oregon on the 23d day of February, 1909, and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

F. W. BENSON, *Secretary of State.*

Senate joint memorial 6.

Whereas there is pending in the Congress of the United States a bill providing for instruction in forestry in the colleges of agriculture and mechanic arts, and for experiments in forestry in the agriculture experiment stations located in the different States, providing for an appropriation of $2,500 per annum to each branch of these institutions located in the several States for such purpose; and

Whereas the protection and perpetuation of our forests is of vital importance, said industry being one of the most valuable to all our people and one which should be protected and encouraged in every possible way: Therefore be it

Resolved by the senate and the house of representatives of the State of Oregon, That it is the sense of the people of the State of Oregon that this bill should pass, and that our Representatives in Congress and in the Senate of the United States use all honorable means in assisting in its passage; and be it further

Resolved, That a copy of this memorial be forwarded to the Senate and House of Representatives of the United States in Congress assembled and to each of our Representatives and United States Senators by the secretary of state.

Concurred in by the house February 19, 1909.

C. N. MCARTHUR, *Speaker.*

Passed by the senate February 10, 1909.

JAY BOWERMAN, *President.*

Indorsed: Senate joint resolution 6, Wm. H. Barry, chief clerk; filed February 23, 1909, F. W. Benson, secretary of state.

[SEAL.]

F. W. BENSON,
Secretary of State.

FEBRUARY 12, 1909.

To the honorable Senate and House of Representatives of the United States:

Your memorialists, the legislature of the State of Oregon, respectfully represent that, in common with the people of this Commonwealth, we appreciate and commend the efforts which the President of the United States has been and is making looking to the conservation of the natural resources of the country. The appointment of a National Conservation Commission and state commission to bring about cooperation on the part of the National Government and the several States, aside from having brought to the attention of the country the rapid depletion of its natural resources, is arousing a deep interest in the subject which is likely in the very near future to bring about active cooperation upon the part of the national and state governments for the preservation of those resources which have not been exhausted, and, as well, for the renewal of those which are capable of being renewed. As a part of this general scheme, the Inland Waterways Commission, appointed by the President, has been a factor in the conservation movement and, in our opinion, the Congress of the United States should make liberal appropriations to aid in the movement which the

President has inaugurated and which promises much for the future well-being, development, and enrichment of our country, for the perpetuation of our institutions, and the protection of generations yet unborn.

Therefore, we, the legislature of the State of Oregon, representing the people of the State, do respectfully memorialize Congress to make liberal appropriations to aid in the movement between the Nation and the States for the conservation of our natural resources, so that the work of the National Conservation Commission, assisted by the Inland Waterways Commission and the several state commissions, may not be delayed or hindered, but may continue uninterrupted in accordance with the policies outlined by the President of the United States and indorsed and commended by the President-elect.

Concurred in by the house February 19, 1909.

C. N. MCARTHUR, *Speaker.*

Adopted by the senate February 15, 1909.

JAY BOWERMAN, *President.*

Indorsed: Senate joint memorial 11, Wm. H. Marry, chief clerk; filed February 23, 1909, F. W. Benson, secretary of state.

Mr. HEYBURN presented a joint memorial of the legislature of Idaho, which was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

(Certificate of certified copy.)

STATE OF IDAHO,
DEPARTMENT OF STATE.

I, Robert Lansdon, secretary of state of the State of Idaho, do hereby certify that the annexed is a full, true, and complete transcript of house joint memorial No. 6 by waterways and drainage committee, which was filed in this office the 19th day of February, A. D. 1909, and admitted to record.

In testimony whereof, I have hereunto set my hand and affixed the great seal of the State. Done at Boise city, the capital of Idaho, this 19th day of February, A. D. 1909.

[SEAL.]

ROBERT LANSDON,
Secretary of State.

House joint memorial 6. By waterways and drainage committee.

To the honorable the Senate and the House of Representatives and the Rivers and Harbors Committee thereof in the United States of America in Congress assembled:

Your memorialists, the legislature of the State of Idaho, respectfully represent that—

Whereas the navigation of the Pend d'Oreille River is obstructed by a rocky gorge at Albany Falls, and

Whereas the elimination of said obstruction and construction of certain locks therein would extend navigation a distance of 200 miles, making an outlet and transportation facilities for the entire metaline country to the Pend d'Oreille Lake, and

Whereas said improvements would farther reclaim by drainage an area of 45,000 acres of rich soil, and would materially benefit the sanitary condition of the entire country: Therefore

We, your memorialists, earnestly pray that the necessary appropriations for said improvements be made at this session of Congress, and that said improvements be executed as rapidly as may be, and your memorialists will ever pray.

This house joint memorial No. 6 passed the house of representatives on the 27th day of January, 1909.

PAUL CLAGSTONE,
Speaker of the House of Representatives.

This house joint memorial No. 6 passed the senate on the 5th day of February, 1909.

L. H. SWEETSER,
President of the Senate.

I hereby certify that the within house joint memorial No. 6 originated in the house of representatives of the legislature of the State of Idaho during the tenth session.

JAMES H. WALLIS,
Chief Clerk of the House of Representatives.

Mr. BORAH presented a joint memorial of the legislature of Idaho, which was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

(Certificate of certified copy.)

ROBERT LANSDON,
Secretary of State.

Senate joint memorial 3. By Macbeth.

To the honorable Senate of the United States of America in Congress assembled:

Your memorialists, the legislature of the State of Idaho, respectfully represent that—

Whereas the mining industry we believe to be second in importance only to agriculture; and

Whereas one of the greatest things, in our judgment, to the credit of the United States Government is its cooperation through the Department of Agriculture with the American farmer; and

Whereas we believe a similar cooperation with the miner through a bureau of mines and mining would prove of great assistance to the mining industry; and

Whereas the frequent explosions and the terrible loss of life resulting therefrom, especially in the coal regions of this country, demand the assistance of this Government in discovering some method by which such shocking loss of life may be avoided; and

Whereas the terrible waste in our mining resources is taking place, which through proper assistance from the Federal Government could largely be avoided; and

Whereas we are reliably informed that a bill is now pending in the United States Senate for the creation of a bureau of mines and mining, and that such a bill has already passed the Lower House of Congress: Therefore be it

Resolved by the senate of the State of Idaho (the house of representatives concurring therein), That we most respectfully urge upon the United States Senate the importance of an early passage of such bill, and that a copy of this memorial be forwarded to the Secretary of the United States Senate and to our Senators by the secretary of state.

I hereby certify that the within senate joint memorial No. 3 originated in the Senate during the tenth session of the legislature of the State of Idaho.

F. A. SHAW,
Secretary of the Senate.

The within senate joint memorial No. 3 passed the senate on the 5th day of February, 1909.

L. H. SWEETSER,
President of the Senate.

The within Senate joint memorial No. 3 passed the house of represenatives on the 13th day of February, 1909.

PAUL CLAGSTONE,
Speaker of the House of Representatives.

Mr. BORAH presented a joint memorial of the legislature of Idaho, which was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

(Certificate of certified copy.)

STATE OF IDAHO,
DEPARTMENT OF STATE.

I, Robert Lansdon, secertary of state of the State of Idaho, do hereby certify that the annexed is a full, true, and complete transcript of the house joint memorial No. 3, by Anderson, which was filed in this office the 22d day of January, A. D. 1909, and admitted to record.

In testimony whereof, I have hereunto set my hand and affixed the great seal of the State. Done at Boise City, the capital of Idaho, this 22d day of January, A. D. 1909.

ROBERT LANSDON,
Secretary of State.

House and joint memorial 3. By Anderson.

To the Congress of the United States:

Your memorialists, the legislature of the State of Idaho, do urgently request that your honorable body do before adjourning pass a general appropriation bill, making appropriations for continuing the improvements now being made on the Columbia and Snake rivers.

The secretary of state is hereby directed to forward a copy of this memorial to each of our Senators and Representatives in Congress.

This house joint memorial No. 3 passed the house of representatives on the — day —, 1909.

PAUL CLAGSTONE,
Speaker of the House of Representatives.

This house joint memorial No. 3 passed the senate on the 13th day of January, 1909.

L. H. SWEETSER,
President of the Senate.

I hereby certify that the within house joint memorial No. 3 originated in the house of representatives of the legislature of the State of Idaho during the tenth session.

JAMES H. WALLIS,
Chief Clerk of the House of Representatives.

Mr. BORAH presented a joint memorial of the legislature of Idaho, which was referred to the Committee on Forest Reservations and the Protection of Game and ordered to be printed in the RECORD, as follows:

House joint memorial. By Parsons.

To the Senate and House of Representatives of the United States in Congress assembled:

Your memorialists, the legislature of the State of Idaho, respectfully represent:

That the county of Idaho, in the State of Idaho, contains in total 7,213,490 acres of land, of which 911,165 are surveyed lands, and that the remaining acreage of the county of Idaho is absorbed by the national forest reserves, and contains 5,036,480 acres. That the rentals of and from these reserves in the year 1906 (the last report obtainable) amounted to but $1,729.90.

That within the boundaries of these reserves there are not less than 25 mining camps, in more or less condition of real and bona fide stages of development, and that there is now in this county of Idaho not less than 20 stamp mills of from 2 to 30 stamps capacity.

That from the eastern terminus of the Clearwater branch of the Northern Pacific Railroad, at the town Stites, Idaho, in the county of Idaho, to the mining camps of Newsome, Elk City, Dixie, Oro Grande, Buffalo Hump, and Concord there is but one wagon road to the camps above mentioned, and that this wagon road passes over three heavily timbered mountain ranges of high elevation, and that said wagon road is at times almost and at other times wholly impassable for the mail, passenger, and freight traffic, to which use it was intended to serve, and that the conditions as above described prevail for long periods of time in the seasons of fall, winter, and spring, thereby causing great delay in the transporting of mail, passengers, and freight, and keeping up the cost of production, of living, and for freight rates, retarding the progress of that part of the county of Idaho to such an extent as to almost prohibit development along any lines of investment.

That during the first eleven months of the year 1908 Idaho County produced $119,389.91 in metal value, practically all gold, the above-mentioned camps having produced the greater portion of the total.

That a good wagon road to the within-mentioned camps from the city of Grangeville, the county seat of Idaho County, and now the terminus of the Lapwai branch of the Northern Pacific Railroad, would be of inestimable value to not alone the mining, but the agriculture, grazing, timber, and postal service as well.

That a wagon road could be constructed on practically a water grade and avoiding the high ranges and the heavy timbered and snow-covered route, as is now the only manner of reaching the camps herein mentioned, if the following-described route be considered, viz:

Commencing at Grangeville, thence in an easterly direction by way of Mount Idaho, the Dewey mine, and "The Cove," to the South Fork of Clearwater River; thence up the said South Fork of the Clearwater River to Fourmile Creek; thence diverging into two branches, one of which would extend on up the South Fork of the Clearwater River to the Elk Basin via the American River grade, and the other branch would extend on up the Fourmile Creek to the mining camps of Oro Grande, Buffalo Hump, and Dixie, thereby opening up a vast scope of country, not now available, to postal routes or for grazing or agriculture and mining purposes.

That the distance and the time essence of the interests involved would be greatly lessened by the above route, and the Nation, State, and county would be benefited to an extent beyond any practical doubt of the project.

That the distance covering the proposed route would be 75 miles, and that a reasonable estimate of the cost to construct said wagon road, as contemplated, would be not more than $75,000, and that this expenditure would be the means of opening up one of the most promising resources of wealth in the northwestern part of the United States of America.

And your memorialists further represent, that said county of Idaho is compelled to exercise police power and maintain criminal jurisdiction over the immense national forest reserves of 5,036,430 acres, being larger in extent than the combined States of Rhode Island, Delaware, and Connecticut; and the only revenue that the said Idaho County receives from the Forest Reserve Department is 10 per cent of the rentals of said reserve lands, which is not sufficient to cover the cost of a single criminal case originating in the above-mentioned reserves.

We therefore pray that the sum of $75,000 may be appropriated by the honorable House of Representatives and the Senate of the United States for the surveying, construction, and building of a wagon road, as herein set forth, and that there may be provided a suitable commission or board, by appointment, to superintend such construction and building of said wagon road.

That the secretary of state is hereby directed to forward to the Senate, the House of Representatives of the United States, and to our Representatives in Congress copies of this memorial.

Mr. McCREARY presented a paper to accompany the bill (S. 9322) for the relief of the estate of James O. Harrison, deceased, which was referred to the Committee on Claims.

He also presented a paper to accompany the bill (S. 9323) for the relief of William H. Nolcini, which was referred to the Committee on Claims.

Mr. BURKETT presented a memorial of the legislature of Nebraska, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed in the RECORD, as follows:

Hon. ELMER J. BURKETT,
Washington, D. C.

DEAR SIR: I have the honor to transmit to you herewith a copy of house roll No. 79, a joint and concurrent resolution passed by the legislature of the State of Nebraska, thirty-first session, as follows:

Respectfully submitted.

FREMNOR CONE, *Chief Clerk.*
C. W. POOL, *Speaker.*

Be it enacted by the legislature of the State of Nebraska:

SECTION 1. That the legislature of the State of Nebraska hereby memorializes and most respectfully requests the Congress of the United States to cause to be erected at its earliest convenience, on the top of the federal building in Lincoln, Nebr., a large clock with four dials, said clock to strike the hour and also the half hour.

SEC. 2. That the chief clerk of the house be instructed to send certified copies of this resolution to the Senators and Representatives of this State in the Congress of the United States at Washington.

Mr. GAMBLE presented a joint resolution of the legislature of South Dakota, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

STATE OF SOUTH DAKOTA,
DEPARTMENT OF STATE.

UNITED STATES OF AMERICA, *State of South Dakota:*

I, Samuel C. Polley, secretary of state of South Dakota and keeper of the great seal thereof, do hereby certify that the attached instrument of writing is a true and correct copy of house joint resolution No. 17, as passed by the legislature of 1909 of the State of South Dakota, with all the indorsements thereon and of the whole thereof, and has been compared with the original now on file in this office.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of South Dakota. Done at the city of Pierre, this 25th day of February, 1909.

[SEAL.]

SAMUEL C. POLLEY,
Secretary of State.

House joint resolution memorializing Congress to maintain and increase the tariff upon wool.

Be it enacted by the house of representatives of the State of South Dakota (the senate concurring):

Whereas foreign competition in the wool market is so strong that the price of wool in the United States is frequently reduced below the price of production and a great and profitable industry is crippled thereby; and

Whereas it is with proper protection perfectly possible for the farmers of the United States to not only supply the entire American demand for wool, but to, as well, produce large quantities for exportation: Therefore

Resolved, That the legislature of the State of South Dakota hereby petitions the Congress of the United States to maintain the tariff upon wool in the revision of the tariff schedules now in contemplation.

I hereby certify that the within act originated in the house and was known in the house files as "house joint resolution No. 17."

JAMES W. CONE, *Chief Clerk.*

STATE OF SOUTH DAKOTA, *Office of Secretary of State, ss:*

Filed February 23, 1909, at 5.15 o'clock p. m.

SAMUEL C. POLLEY,
Secretary of State.

A joint resolution memorializing Congress to maintain and increase the tariff upon wool.

M. J. CHANEY,
Speaker of the House.

Attest:
JAMES W. CONE, *Chief Clerk.*

HOWARD C. SHOBER,
President of the Senate.

Attest:
L. M. SIMONS, *Secretary of the Senate.*

Mr. STONE presented sundry affidavits to accompany the bill (S. 8983) for the relief of the estate of Joseph Kulage, deceased, which were referred to the Committee on Claims.

REPORTS OF COMMITTEES.

Mr. ALDRICH, from the Committee on Finance, to whom was referred the bill (H. R. 12712) for the relief of the estate of Samuel J. Rogers, reported it without amendment.

Mr. SMOOT, from the Committee on Patents, to whom was referred the bill (S. 9440) to amend and consolidate the acts respecting copyright, reported it without amendment and submitted a report (S. Rept. No. 1108) thereon.

Mr. FULTON, from the Committee on Claims, to whom was referred the bill (H. R. 2950) for the relief of certain officers of the U. S. Signal Corps, reported it without amendment and submitted a report (S. Rept. No. 1107) thereon.

HEARING BEFORE COMMITTEE ON CLAIMS.

Mr. KEAN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred Senate resolution 301, submitted by Mr. FULTON on the 26th ultimo, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the stenographer employed to report the hearing before a subcommittee of the Committee on Claims, February 16, 1909, be paid from the contingent fund of the Senate, and that the hearing be printed.

HEARINGS BEFORE COMMITTEE ON TERRITORIES.

Mr. KEAN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred Senate resolution 309, submitted by Mr. BEVERIDGE on the 27th ultimo, reported it without amendment, and it was read, as follows:

Resolved, That the Committee on Territories, or any subcommittee thereof, be authorized to send for persons and papers and to administer oaths, employ a stenographer, and to report such hearings as may be had in connection with any subject which may be pending before said committee, and have said hearings printed for the use of the committee; that the committee may sit during session of the Senate; and that the expenses thereof be paid out of the contingent fund of the Senate.

Mr. KEAN. I ask unanimous consent for the present consideration of the resolution.

Mr. OWEN. Mr. President, I wish to object to the resolution.

The VICE-PRESIDENT. The Senator from Oklahoma objects to the present consideration of the resolution. It will go to the calendar.

CROW RESERVATION, MONTANA.

Mr. KEAN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred Senate resolution 298, submitted by Mr. CLAPP on the 25th ultimo, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on Indian Affairs, by subcommittee or otherwise, be, and it is hereby, authorized to investigate the affairs of the Crow Reservation, in the State of Montana. Said committee is authorized to send for persons and papers, to administer oaths, and to sit during the session of Congress or during recess, at Washington or elsewhere, and to have the testimony taken printed, the expense of such investigation to be paid out of the contingent fund of the Senate.

PUBLIC BUILDINGS.

Mr. SCOTT. I ask unanimous consent to call up the bill (H. R. 28167) to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public-building acts, and for other purposes.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Buildings and Grounds with amendments.

Mr. SCOTT. I ask that the formal reading of the bill be dispensed with and that it be read for action on the committee amendments.

The VICE-PRESIDENT. The Senator from West Virginia asks that the formal reading of the bill be dispensed with, that the bill be read for amendment, and that the committee amendments be first considered. Without objection, it is so ordered. The Secretary will proceed to read the bill.

The Secretary proceeded to read the bill.

The first amendment was, on page 2, line 6, after the word "otherwise," to strike out the proviso, in the following words:

Provided, That the limit of cost heretofore fixed shall not be exceeded in the acquisition of such site and the erection of a suitable building thereon.

The amendment was agreed to.

The next amendment was, on page 3, to strike out section 7, in the following words:

SEC. 7. That the Secretary of the Treasury be, and he is hereby, authorized and directed, in his discretion, to apply not to exceed $7,000, or so much thereof as may be necessary, of the amount heretofore authorized for the erection of a suitable building for the accommodation of the United States post-office at West Point, Miss., for the acquisition of a suitable site, in addition to the $5,000 heretofore authorized for the acquisition of a site.

The amendment was agreed to.

The next amendment was, on page 4, section 10, line 15, after the word "authorize," to strike out:

The Secretary of the Treasury to acquire, by purchase, condemnation, or otherwise, a site for a new custom-house building at Boston, Mass., at not to exceed $500,000, or, in his discretion, to cause plans to be prepared for the enlargement, remodeling, or extension of the present custom-house building in said city; and for this purpose he is hereby authorized and empowered to select and employ a special architect for the purpose and to compensate him for his services on the basis of the schedule of the American Institute of Architects; and so much of the appropriation heretofore made for the acquisition of a new site as may be necessary is hereby made available for that purpose.

And in lieu thereof to insert:

And direct the Secretary of the Treasury to cause plans to be prepared for the enlargement, remodeling, or extension of the present custom-house building in said city, for which purpose he is hereby authorized and empowered to select and employ a special architect and to compensate him for his services on the basis of the schedule of the American Institute of Architects; and the said section 5 is hereby further amended so as to authorize and direct the Secretary of the Treasury to proceed with the enlargement, remodeling, or extension of the said custom-house building in accordance with such or other suitable plans; and the $500,000 heretofore appropriated for the purchase of a site is hereby made available for said enlargement, remodeling, or extension: *Provided*, That the total cost of said enlargement, remodeling, or extension of said custom-house building shall not exceed $1,800,000, including expenses incident to the temporary removal of the force employed in the custom-house during the enlargement, remodeling, or extension.

The amendment was agreed to.

The next amendment was, on page 7, after line 14, to insert as an additional section the following:

SEC. 15. That the item contained in section 5 of the act of Congress entitled "An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes," approved May 30, 1908, for "United States post-office at Washington, D. C., $500,000," be, and the same is hereby, amended so as to add to the same the following provision:

That if any balance remains within said limit after acquiring the site herein authorized, the Secretary of the Treasury be, and he is hereby, authorized to expend the same in the preparation of the necessary plans.

Mr. GORE. Is the bill being considered by unanimous consent?

The VICE-PRESIDENT. It is being considered by unanimous consent.

Mr. GORE. I desire to object to its further consideration.

Mr. LODGE and others. Too late!

The VICE-PRESIDENT. It is too late for an objection to stop the consideration of the bill.

Mr. GORE. I wish to have a little time for the consideration of an amendment I have heretofore offered. I desire to explain it to the Senate.

Mr. LODGE. The bill will be open to amendment after the committee amendments have been disposed of.

The VICE-PRESIDENT. The bill is before the Senate for consideration, and the question is on agreeing to the last amendment reported by the committee.

The amendment was agreed to.

The VICE-PRESIDENT. Are there further committee amendments?

Mr. SCOTT. There are no further committee amendments.

The VICE-PRESIDENT. The bill is as in Committee of the Whole and open to amendment.

Mr. LODGE. I offer the following amendment, to which I do not think the chairman of the committee will have any objection.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 3, line 2, after the word "Massachusetts," it is proposed to add:

And in his discretion may purchase a site at Plymouth, Mass., at a cost in excess of the limit heretofore fixed for such site: *Provided*, That the limit of cost for both site and building shall not exceed $87,000, heretofore fixed as the total limit of cost.

Mr. SCOTT. There were a number of amendments before the committee providing that a part of the appropriation that had been authorized for buildings should be transferred to the purchase of sites. The full committee turned all those amendments down. This amendment is worded a little differently, because it provides that the total cost shall not exceed the amount of the authorization, as I understand it.

Mr. LODGE. Absolutely. It is not intended to increase it at all. It is only intended to give a little more to the site and a little less to the building.

The amendment was agreed to.

Mr. GORE. I desire to offer the amendment which I submitted a few days ago and which was referred to the Committee on Public Buildings and Grounds.

The VICE-PRESIDENT. The Senator from Oklahoma proposes an amendment, which will be read by the Secretary.

The SECRETARY. It is proposed to insert at the end of the bill the following:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, a site for a federal building in the city of Lawton, Okla., and he is authorized to expend for such purpose the proceeds arising from the sale of lots 31 and 32 of block 41 of the official plat of the city of Lawton, Okla., as provided for by section 33 of the so-called "public building act," approved May 30, 1908.

And the Secretary of the Treasury is further authorized and directed to use any additional amount that may be necessary arising from the sale of the south half of section 30, township 2 north, range 11 west of the Indian meridian, in Oklahoma, which said proceeds were set apart for the construction of a federal building in Lawton by section 30 of an act entitled "An act to authorize the Secretary of the Interior to issue patents in fee to purchasers of Indian lands, under any law now existing or hereafter enacted, and for other purposes," approved May 29, 1908: *Provided, however*, That the cost of the site shall not exceed $30,000.

Mr. KEAN. I should like to ask the Senator from West Virginia if the bill authorizes the construction of any new buildings anywhere.

Mr. SCOTT. None at all, and no appropriation of money.

Mr. GORE. Mr. President, I should like to submit a word in explanation of the amendment.

The half section referred to in the amendment adjoins my home town on the north. It was public land, and a measure was passed at the last session providing for its platting and sale as a part of the town site. Twenty per cent of the proceeds were set apart for the erection of a federal building in the city of Lawton. The sale has been had, and $56,000, the 20 per cent of the proceeds, is now available for the construction of this building.

By section 30 of the public-buildings act of the last session it was provided that the two lots referred to in the amendment and owned by the Government of the United States, but not

adapted for the location of a federal building, should be sold and the proceeds applied to the purchase of another site for a federal building. The public-buildings act passed at the last session by an amendment offered by myself provided that the proceeds arising from this sale of lots should be applied to the purchase or condemnation of another site "as herein provided by law." But somehow it happened that the wording was changed so as to read "as may hereafter be provided by law;" so that we now have the $56,000 in cash available for the building, we have the authority already to sell the lots referred to in this amendment, and authority to invest it in the purchase of another site "as may hereafter be provided by law," whereas it should have been "as herein provided by law." It was simply a clerical error of some sort.

The object of this amendment is to straighten out that mistake and authorize a reinvestment from the sale which has already been provided by law, which it was intended to provide for, so that the building can go on without the delay of a year or two in its construction. It is simply to correct an oversight that occurred between the word "herein" and the word "hereafter" in the legislation of the last session.

Mr. SCOTT. Mr. President, the object of this small bill from the House is apparent on its face; and the object the Committee on Public Buildings and Grounds had was to keep it as nearly as it came from the House as possible without appropriating a dollar or adding to the cost of sites. There was a disposition to take from money that had been appropriated for *public buildings* a portion of the money and add to the pay for sites. Your committee fully realized that if that was done, at the next Congress there would be a bill authorizing an additional sum for the erection of the buildings. Therefore we held the bill down without allowing a dollar of appropriation to go in, and cut off all such amendments.

I hope the Senator from Oklahoma will not press this amendment, because if he does there are dozens of Senators here, I know, who will want to get in similar amendments to the bill, and it will simply result in the defeat of the entire bill, as I have been assured from the House that if we amend it in any material way different from the design of the House committee they will not consider it.

Mr. GORE. Mr. President, I am anxious to respect the wish of the Senator from West Virginia as well as that of the committee, but I do not believe that any Senator here would object to this change, because it was purely an oversight in the drafting of the measure at the last session. It does not provide for the appropriation of a single dollar. On the contrary, the money is already on hand, and orders have been issued by the Secretary of the Treasury for the sale of the lots referred to in the amendment.

Mr. McCUMBER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Oklahoma yield to the Senator from North Dakota?

Mr. GORE. Certainly.

Mr. McCUMBER. Just for a question. I wish to ask the Senator from Oklahoma if, under the provisions of his amendment, a certain portion of the sum which has heretofore been appropriated for the building is not allowed to be used for a site, and if therefore we would not hereafter have to appropriate enough more for the building to make up the difference?

Mr. GORE. I do not think that is true. The limit of the building was fixed at $100,000 last year. The cash now received from the sale of the half section is $56,000. The amendment does provide for the application of a portion of the sum to the purchase of a site, if necessary, but I will ask leave to strike out that portion of the amendment rather than have it defeated. It occurred to me that probably the proceeds from the sale of the lots already provided for would not be sufficient, but I would rather take that risk than have it fail, because it would go over for a year, while the money is on hand and orders have already been issued by the Secretary of the Treasury for the sale of these lots.

Mr. McCUMBER. Will not the Senator agree to so modify his amendment that the entire amount appropriated last year for the building and site shall not be in excess of the amount fixed by reason of this amendment, so that it shall be within the amount appropriated last year?

Mr. SCOTT. Not to exceed that sum.

Mr. McCUMBER. Not to exceed $100,000.

Mr. GORE. Of course, the proceeds of the lots are additional.

The VICE-PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from Oklahoma.

The amendment was rejected.

Mr. OWEN. I move to strike out the proviso on page 2, section 2, beginning with the word "provided," in line 6, and to insert:

And the sum of $75,000 is hereby appropriated for such purpose.

Mr. SCOTT. I hope that amendment will not be agreed to.

Mr. ALDRICH. We will vote it down.

Mr. OWEN. Mr. President, I wish to call the attention of the Senate to the fact that the bill last year made no provision for the purchase of a site at Muskogee, which is the most important city in eastern Oklahoma. It will cost at least $75,000 to get a decent site for the building, and the amount originally proposed for the construction of the building ought not to be diminished over what was fixed as the standard last year.

Of course I appreciate the fact that it is not desirable to increase the appropriation, but the Senate has already appropriated the money for the building.

Mr. BEVERIDGE. How much was appropriated?

Mr. OWEN. Two hundred thousand dollars.

Mr. BEVERIDGE. And there is no site?

Mr. OWEN. And there is no site. Now it is proposed to take away from that $200,000, $75,000 for the purchase of a site.

Mr. BEVERIDGE. I am in hearty sympathy with the Senator.

Mr. OWEN. It is my own town, and I think it is only reasonable, since Congress has made a proper appropriation for the building, that the appropriation should not be diminished for the purpose of covering the site, but, as a matter of good logic and good government, a permanent site ought to be provided and a sufficient sum of money should be appropriated to carry out the intention of Congress heretofore shown in the public-buildings act of last year.

Mr. BEVERIDGE. Mr. President——

The VICE-PRESIDENT. Does the Senator from West Virginia yield to the Senator from Indiana?

Mr. BEVERIDGE. I will not ask the Senator to yield.

Mr. SCOTT. I am in charge of the bill, but if the Senator wants to take the floor——

Mr. BEVERIDGE. I understand. I merely wanted to support this amendment; that is all. If the Senator wishes first to reply to the Senator from Oklahoma, I will defer. I was going to say only two or three sentences, but I will wait until the Senator gets through.

Mr. SCOTT. I am sure the Senator from Oklahoma does not want to put this amendment on the bill, with the assurance that it will absolutely defeat the bill and we will have no bill at all. I can say that to him, I think, as positively as a man can state anything without its being absolute. Members of the House have told me, the chairman of the committee of the House has told me, that if we carry any appropriation in the bill at all they would not consider it. The Senator from Oklahoma has his remedy at the next session in getting a bill through covering an additional appropriation for the site, but I ask him not to put it on this bill and defeat it.

Mr. OWEN. In view of the statement of the chairman of the committee I will withdraw the amendment, and rely upon the committee to make proper provision for the site at the next session of Congress.

Mr. SCOTT. I am much obliged to the Senator.

The VICE-PRESIDENT. The Senator from Oklahoma withdraws his amendment.

Mr. WETMORE. On page 3, after line 2, I move to insert after the amendment already agreed to at that place a new section in the following words:

SEC. —. That the Secretary of the Treasury may, in his discretion, disregard the provision requiring sites to be bounded upon at least two sides by streets in so far as the same shall apply to the village of Penn Yan, N. Y.

Mr. SCOTT. The committee will accept that amendment.

The amendment was agreed to.

Mr. HEYBURN. After section 3, on page 2, I move to insert:

SEC. 4. That out of the money heretofore appropriated for public buildings at Boise, Idaho, so much thereof as may be necessary to purchase additional grounds may be used for that purpose: *Provided*, That such action shall not increase the appropriation for buildings and grounds.

Mr. SCOTT. The committee will accept that amendment.

The amendment was agreed to.

Mr. GORE. I desire to submit the amendment I offered a while ago in a shape to conform to the suggestion of the Senator from North Dakota, omitting all that occurs after the words "the official plat of the city of Lawton." Then that merely straightens out the difficulty that resulted from the mistake in the previous legislation.

Mr. SCOTT. That is to insert no additional cost.

Mr. LODGE. I suggest to frame it like the Plymouth amendment.

Mr. SCOTT. Frame it like the Plymouth amendment.

The VICE-PRESIDENT. The Secretary will read the amendment as modified.

The SECRETARY. It is proposed to add to the bill the following as an additional section:

SEC. 18. That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, a site for a federal building in the city of Lawton, Okla., and he is authorized to expend for such purpose the proceeds arising from the sale of lots 31 and 32 of block 41 of the official plat of the city of Lawton, Okla., as provided for by section 33 of the so-called public building act approved May 30, 1908: *Provided*, That the limit of cost for both site and building shall not exceed $100,000, in addition to the proceeds arising from the sale of the lots herein designated.

Mr. SCOTT. I will accept that amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

PAYMENT OF PENSIONS.

Mr. McCUMBER. I am directed by the Committee on Pensions, to whom was referred the bill (H. R. 28285) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors, to report it favorably without amendment, and I submit a report (S. Rept. No. 1105) thereon. Under the exigencies of the case I will ask unanimous consent for the immediate consideration of the bill.

The VICE-PRESIDENT. The Secretary will read the bill for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendmeut, ordered to a third reading, read the third time, and passed.

Mr. McCUMBER. I ask unanimous consent, as a portion of the morning business, that we consider the unobjected pension bills upon the Calendar. I make this request because they are quite long and unless we get them out of the way it will be impossible to engross and enroll them in time for signature. It will not take more than ten or fifteen minutes to dispose of them.

The VICE-PRESIDENT. The Senator from North Dakota asks unanimous consent that the Senate proceed to the consideration of the unobjected pension bills on the Calendar. Is there objection?

Mr. GORE. I desire to submit some morning business.

The VICE-PRESIDENT. Does the Senator from Oklahoma object to the request of the Senator from North Dakota?

Mr. GORE. I should like to submit some formal morning business first.

The VICE-PRESIDENT. The Senator from Oklahoma objects.

DONATION OF CONDEMNED CANNON, ETC.

Mr. LODGE. I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 28304) granting certain obsolete ordnance for ornamental purposes, to report it favorably with amendments.

I should like the attention of the Senate for a moment that I may explain what the bill is. There have been many bills passed by the Senate giving cannon for soldiers' monuments. The House has consolidated all those and some of their own in one bill, to which the Senate committee has added a few more, and I ask for the present consideration of the bill because it is the only way of disposing of all these bills, in which many States and many localities are interested.

The VICE-PRESIDENT. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The first amednment was, in section 4, page 2, line 11, after the word "to," where it first occurs, to strike out the word "furnish" and insert "donate;" and in line 12, after the words "South Carolina," to strike out "two" and insert "four," so as to make the section read:

SEC. 4. That the Secretary of War be, and he is hereby, authorized and directed to donate to the State of South Carolina four condemned brass or bronze "Napoleon" guns, with carriages and with a suitable outfit of cannon balls, which may not be needed in the service, to be placed on statehouse grounds: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

The amendment was agreed to.

The next amendment was, in section 16, page 6, line 16, after the word "carriages," to insert "and with a suitable outfit of cannon balls," so as to make the section read:

SEC. 16. That the Secretary of War be, and he is hereby, authorized and directed to donate to the county of Warrick, in the State of Indiana, four condemned bronze fieldpieces, with their carriages and with a suitable outfit of cannon balls, which may be available and may not be needed in the service, the same to be placed in the park surrounding the county court-house in the city of Boonville, Ind: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

The amendment was agreed to.

The next amendment was, in section 17, page 7, line 1, after the word "carriages," to insert "and with a suitable outfit of cannon balls," so as to make the section read:

SEC. 17. That the Secretary of War be, and he is hereby, authorized and directed to donate to the State of Florida two condemned bronze fieldpieces, with their carriages and with a suitable outfit of cannon balls, which may be available and may not be needed in the service, the same to be placed on the state capitol grounds in the city of Tallahassee: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

The amendment was agreed to.

The next amendment was, in section 19, page 7, line 16, after the word "carriage," to insert "and with a suitable outfit of cannon balls," so as to make the section read:

SEC. 19. That the Secretary of War be, and he is hereby, authorized and directed to donate to the State of Delaware a condemned bronze fieldpiece, with its carriage and with a suitable outfit of cannon balls, which may be available and may not be needed in the service, the same to be placed in the park facing the state capitol at Dover, Del.: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

The amendment was agreed to.

The next amendment was, in section 25, page 9, line 13, after the word "to," where it occurs the first time, to strike out the word "deliver" and insert "donate;" in line 13, after the word "Massachusetts," to strike out "two" and insert "four;" and in the same line, after the word "cannon," to insert "with their carriages," so as to make the section read:

SEC. 25. That the Secretary of War is hereby authorized and directed to donate to the mayor of Somerville, Mass., four condemned bronze or brass cannon, with their carriages, to be placed at a soldiers' monument in that city: *Provided*, That the Government shall be at no expense in connection with this gift.

The amendment was agreed to.

The next amendment was, in section 26, page 9, line 21, after the word "carriages," to insert "and a suitable outfit of cannon balls," so as to make the section read:

SEC. 26. That the Secretary of War be, and he is hereby, authorized and directed to donate to the county court of Mercer County, W. Va., two condemned bronze fieldpieces, with their carriages and a suitable outfit of cannon balls, which may be available and may not be needed in the service, the same to be used in the park surrounding the court-house, in the town of Princeton, W. Va.: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

The amendment was agreed to.

The next amendment was, in section 32, page 11, line 20, after the word "cannons," to insert "with their carriages and a suitable outfit of cannon balls," so as to make the section read:

SEC. 32. That the Secretary of War be, and is hereby, authorized to donate to the town of Jasper, Ind., two condemned brass or bronze cannons, with their carriages and a suitable outfit of cannon balls, for the soldiers' monument of Jasper, Ind.: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

The next amendments were to insert the following as additional sections:

SEC. 34. That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of Mannington, in the State of West Virginia, one condemned bronze fieldpiece, with its carriage, which may be available and may not be needed in the service: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 35. That the Secretary of War be, and he is hereby, authorized to donate to the Winfield Scott Monument Association, of Elizabeth, N. J., if the same can be done without detriment to the public service, two condemned bronze fieldpieces, with their carriages, in connection with an equestrian statue to be erected to the memory of the late Lieut. Gen. Winfield Scott, U. S. Army.

SEC. 36. That the Secretary of War be, and he is hereby, authorized and directed to donate to the State of Nebraska two condemned bronze fieldpieces, with their carriages and a suitable outfit of cannon balls, which may be available and may not be needed in the service, the same to be placed on the state capitol grounds in the city of Lincoln: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 37. That the Secretary of War is hereby authorized and directed to deliver to the governor of the State of Michigan four bronze or brass condemned cannon, with their carriages and a suitable outfit of cannon balls, in ornamentation of a life-sized statue to be erected to the memory of Gen. George A. Custer, late of the United States Army: *Provided*, That the Government shall be at no expense in connection with this gift.

SEC. 38. That the governor of the State of Michigan be granted, on behalf of the State of Michigan, permission to use all that part or residue of the bronze or brass condemned cannon granted the said State of

Michigan by joint resolution of Congress, approved June 23, 1906, to be used to make a life-size statue of Stevens T. Mason, late governor of that State, for the purpose of making statuette facsimiles of said statue, or for other purposes: *Provided*, That the Government shall be at no expense in connection therewith.

SEC. 39. That the Secretary of War be, and he is hereby, authorized and directed to donate to the Chaffee Light Artillery Veterans' Association, of Denver, Colo., the two light 12-pounder guns of obsolete pattern, together with the carriages, limbers, implements, and equipments accompanying the same, now in the possession of the said organization: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 40. That the Secretary of War be, and he is hereby, authorized and directed to donate to the State of Louisiana two condemned bronze fieldpieces, with their carriages and a suitable outfit of cannon balls, which may be available and may not be needed in the service, the same to be placed on the statehouse grounds in the city of Baton Rouge: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 41. That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of New Orleans, in the State of Louisiana, two condemned bronze fieldpieces, with their carriages and a suitable outfit of cannon balls, which may be available and may not be needed in the service, the same to be placed in Lafayette square fronting the city hall: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 42. That the Secretary of War be, and he is hereby, authorized and directed to donate to the town of Greenville, in the State of Maine, one condemned bronze fieldpiece, with its carriage and a suitable outfit of cannon balls, which may be available and may not be needed in the service, to be placed in the unorganized tract of land of Kineo, Me., on the east shore of Moosehead Lake, on the lawn in front of the yacht clubhouse: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 43. That the Secretary of War be, and he is hereby, authorized and directed to donate to the board of supervisors of the county of Campbell, in the State of Virginia, two condemned bronze or brass fieldpieces, with carriages, cannon balls having been already donated by the United States to be placed in the yard of the county courthouse: *Provided*, That no expense shall be incurred by the United States in the transportation or delivery thereof.

SEC. 44. That the Secretary of War be, and is hereby, authorized and directed to donate to the board of supervisors of the county of Fluvanna, State of Virginia, two condemned bronze fieldpieces, with carriages, and with a suitable outfit of cannon balls, the same to be placed on the monument lot at Palmyra, the seat of said county, beside the monument located on said lot: *Provided*, That no expense shall be incurred by the United States in delivering the same.

SEC. 45. That the Secretary of War be, and he is hereby, authorized and directed to donate to the board of supervisors of the county of Albemarle, State of Virginia, two condemned bronze or brass fieldpieces, with carriage, and with a suitable outfit of cannon balls which may not be needed in the service, the same to be placed on the courthouse lawn in Charlottesville, Albemarle County, Va., beside the monument to be erected there: *Provided*, That no expense shall be incurred by the United States in delivering the same.

The amendments were agreed to.

The next amendment was, in section 47, page 12, line 13, after the word "cannon," to insert "and their accessories," and in line 14, after the word "of," to insert "for such purposes," so as to make the section read:

SEC. 47. That the Chief of Ordnance is hereby authorized to sell, without advertisement, for public parks, public buildings, and soldiers' monuments purposes surplus obsolete brass or bronze cannon, carriages, and cannon balls at such prices as he may deem reasonable and just: *Provided*, That hereafter obsolete brass or bronze cannon and their accessories shall not be disposed of for such purposes except as provided for in this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

NAVAL APPROPRIATION BILL.

Mr. HALE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 58 and 59.

EUGENE HALE,
GEORGE C. PERKINS,
B. R. TILLMAN,
Managers on the part of the Senate.
GEORGE E. FOSS,
HENRY C. LOUDENSLAGER,
LEMUEL P. PADGETT,
Managers on the part of the House.

The report was agreed to.

Mr. HALE. That disposes of the naval appropriation bill.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. HALE. Mr. President, I am directed by the Committee on Appropriations, to whom was referred the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, to report it with amendments (S. Rept. 1106).

I want to call the attention of the Senate to the fact that this is a very great bill with a great many subjects upon it and involving the expenditure of a great deal of money. The Senate did not receive it until Saturday. The subcommittee and the full committee have been at work upon it ever since, and they have done the best under the conditions that is believed possible. There are a great many new amendments suggested by the committee and a great many provisions have been stricken out. There is not time for Senators, nor has there been for the committee, to make any extensive examination or survey into many of the provisions of the bill, and the committee is, I may say, at the mercy or the discretion of the Senate.

I have already notified the Government Printing Office to hurry the bill as reported by the committee with the amendments, and later in the afternoon, if we get it in time, I may ask the Senate to begin its consideration; but I am clearly of the opinion that to complete it the Senate must submit to the inconvenience of a night session. We have had but one heretofore, and have been most fortunate. Owing to the general feeling of Senators and their forbearance, we have made great progress; but we can not get this bill and the remaining bills through without perhaps a night session each night. I was going to say, in order that Senators may be prepared, that later I shall ask the Senate to take a recess, say from half-past 5 o'clock to 8 o'clock, for the consideration of this appropriation bill.

Mr. LA FOLLETTE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from Wisconsin?

Mr. HALE. Yes; certainly.

Mr. LA FOLLETTE. I wanted to inquire of the Senator from Maine if the bill would be placed upon the desks of Senators, with the report, as soon as it is printed?

Mr. HALE. I have requested that as soon as the bill is sent up a copy of it be placed on the desk of each Senator, in order to facilitate whatever examination we can make, and I shall be glad if Senators will make such examination—I know the Senator from Wisconsin will.

I think the Senate appreciates the condition we are in. We are doing the best we can under the circumstances. I hope that hereafter we shall get bills sent over from the other House earlier; but we have now to adapt ourselves to the situation. The suggestion of the Senator from Wisconsin has practically already been complied with. As I have stated, I have requested that a copy of the bill be furnished each Senator.

HALL OF THE HOUSE OF REPRESENTATIVES.

The VICE-PRESIDENT laid before the Senate the joint resolution (H. J. Res. 265) to rearrange and reconstruct the Hall of the House of Representatives, and for other purposes, which was read twice by its title.

Mr. WETMORE. I ask unanimous consent for the present consideration of the joint resolution the title of which has just been stated.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

Mr. WETMORE. I desire to offer some amendments of a merely formal character to the joint resolution. I send them to the desk, and I should like to have them stated.

The VICE-PRESIDENT. The first amendment proposed by the Senator from Rhode Island will be stated.

The SECRETARY. On page 1, line 10, after the word "and," it is proposed to strike out "nineteen" and insert "twenty-nine."

The amendment was agreed to.

Mr. BAILEY. Do I understand that these are amendments to the joint resolution which the Secretary has just read?

The VICE-PRESIDENT. They are amendments proposed to the joint resolution.

Mr. WETMORE. They are simply clerical.

Mr. BAILEY. I was going to suggest that I thought it was hardly competent for us to say what the House should do with its Hall; but if these are mere clerical amendments, I have no objection to them.

Mr. WETMORE. They are proposed at the request of the House.

The VICE-PRESIDENT. The Secretary will state the next amendment.

The SECRETARY. After the word "Congress," page 1, line 11, it is proposed to insert "passed by the House on May 12, 1908, calendar day of May 27, 1908."

The amendment was agreed to.

Mr. WETMORE. Mr. President, in connection with the joint resolution I should like to have the Secretary read the letter which I send to the desk.

The VICE-PRESIDENT. Does the Senator desire the letter read or inserted in the RECORD?

Mr. WETMORE. I should prefer to have it read, as it is quite short.

The VICE-PRESIDENT. The Senator from Rhode Island asks that the letter which he sends to the desk may be read. Without objection, the Secretary will read as requested.

The Secretary read as follows:

HOUSE OF REPRESENTATIVES UNITED STATES,
COMMITTEE ON THE LIBRARY,
Washington, D. C., March 1, 1909.

Hon. GEORGE PEABODY WETMORE,
Chairman Committee on the Library, United States Senate.

MY DEAR SENATOR WETMORE: Permit me to call to your attention House joint resolution 265, of which I inclose you a copy, which was passed by the House on Saturday.

It might be thought that the matter was under the jurisdiction of the House alone, but it seemed to me the structural changes were so important and the amount required so considerable that it should be by joint resolution, to be passed as a regular legislative enactment. I suppose, however, the comity of the situation would still make the wish of the House, upon the matter, if not decisive, at least of very great influence.

It is unnecessary for me to bring to your attention the enormous size of the Hall of the House, which is by far the largest legislative chamber in the world, making it very difficult for a Member even with a good voice to be heard. The reduction of the size of the Hall has been advocated for a good many years, and, conspicuously, by Speaker Reed. It was passed on Saturday by so decisive a vote that a division was not called for. The contemplated change, while much reducing the size of the Hall, will still leave it with a floor area in excess of 5,000 square feet, as compared with the floor area of the Senate Chamber of about 4,000 square feet. It allows for a considerable increase in the membership of the House. That is a matter for future Congresses, and reasonable provision should be made for the contingency that the number of Members may be increased. The Hall of the House would still be large enough to seat the two Houses in joint meeting.

I notice that in the resolution a mistake was made, referring to a resolution passed at the last session. I should appreciate it very much if you would bring the matter before the Senate to-day and ask for the passage of the resolution with the amendment, which I add below.

Sincerely, yours,

S. W. MCCALL.

The joint resolution was reported to the Senate as amended, and the amednments were concurred in.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time and passed.

BILLS INTRODUCED.

Mr. McCREARY introduced the following bills, which were severally read twice by their titles and referred to the Committee on Claims;

A bill (S. 9502) for the relief of the estate of Moses Singleton, deceased;

A bill (S. 9503) for the relief of the estate of W. H. H. Thompson and Caroline Thompson, deceased;

A bill (S. 9504) for the relief of the estate of J. Howard Sheffer, deceased;

A bill (S. 9505) for the relief of Susan M. Stone, administrator of the estate of Mary H. S. Robertson, deceased; and

A bill (S. 9506) for the relief of the estate of Caleb Maratta, deceased (with the accompanying paper).

Mr. PAYNTER (by request) introduced the following bills, which were severally read twice by their titles and referred to the Committee on Claims:

A bill (S. 9507) for the relief of the estate of John M. Higgins, deceased (with the accompanying paper);

A bill (S. 9508) for the relief of George H. Galloway, administrator of the estate of Logan M. Dishman, deceased (with the accompanying paper);

A bill (S. 9509) for the relief of Ambrose D. Vallandingham (with the accompanying paper);

A bill (S. 9510) for the relief of the estate of W. C. Russell, deceased;

A bill (S. 9511) for the relief of the estate of Thomas Wallace, deceased; and

A bill (S. 9512) for the relief of the estate of John A. Erdman, deceased.

Mr. STONE introduced a bill (S. 9513) for the relief of the estate of George P. Dorriss, deceased, which was read twice by its title and referred to the Committee on Claims.

Mr. BAILEY (by request) introduced a bill (S. 9514) for the relief of Oliver P. Boyd, which was read twice by its title and referred to the Committee on Claims.

Mr. BURKETT. I introduce a bill, and ask that it, with the accompanying papers, be referred to the Committee on Education and Labor.

The bill (S. 9515) to promote the safety of employees and travelers upon railroads by compelling common carriers by railroad to equip their locomotives with safe and suitable boilers and appurtenances thereto, was read twice by its title.

Mr. KEAN. That bill should go to the Committee on Interstate Commerce.

Mr. BURKETT. It is a bill with reference to boiler inspection, and should go to the Committee on Education and Labor. It relates to a communication received from the Interstate Commerce Commission in response to a resolution of inquiry that I had passed the other day, as the Senator will recall, asking as to the number of enginemen killed by boiler explosions. It is a bill to provide for boiler inspection, and should go to the Committee on Education and Labor.

Mr. KEAN. Then the title of the bill is misleading.

Mr. BURKETT. The title may be misleading; but that is the object of the bill.

Mr. KEAN. If the bill relates to commerce, it should go either to the Committee on Commerce or to the Committee on Interstate Commerce.

The VICE-PRESIDENT. The Senator from Nebraska asks that the bill be referred to the Committee on Education and Labor. Without objection it is so ordered.

Mr. TAYLOR introduced a bill (S. 9516) for the relief of the estates of Thomas A. Elliott and Adaline Elliott, deceased, which was read twice by its title and referred to the Committee on Claims.

Mr. PENROSE introduced a bill (S. 9517) providing for the construction of a bridge at Walmsleys Crossing, Taos County, N. Mex., which was read twice by its title and referred to the Committee on Commerce.

He also introduced a bill (S. 9518) providing for the construction of bridges across Red River, Taos County, N. Mex., and for other purposes, which was read twice by its title and referred to the Committee on Commerce.

Mr. FRAZIER introduced a bill (S. 9519) for the relief of the heirs of Turner Smith, deceased, which was read twice by its title and referred to the Committee on Claims.

Mr. GAMBLE introduced a bill (S. 9520) granting to the State of South Dakota a certain amount of land in lieu of a like amount of land heretofore granted to the State and subsequently appropriated by the United States for forest-reservation purposes, and for other purposes, which was read twice by its title and referred to the Committee on Public Lands.

Mr. TILLMAN introduced a bill (S. 9521) for the relief of the lawful heirs of George Henry Guerard, which was read twice by its title and referred to the Committee on Claims.

Mr. OWEN introduced a bill (S. 9522) for the relief of the Western Miami Indians, which was read twice by its title and referred to the Committee on Indian Affairs.

Mr. McCUMBER introduced a bill (S. 9523) for the relief of certain government contractors, which was read twice by its title and referred to the Committee on Claims.

He also introduced a bill (S. 9524) for the relief of certain American citizens, which was read twice by its title and referred to the Committee on Claims.

Mr. CURTIS introduced a bill (S. 9525) for the relief of Daniel W. Boutwell, which was read twice by its title and, with the accompanying papers, referred to the Committee on Claims.

Mr. DICK introduced a bill (S. 9526) to grant two cannon to the Ohio Northern University at Ada, Ohio, which was read twice by its title and referred to the Committee on Military Affairs.

Mr. BANKHEAD introduced a bill (S. 9527) for the relief of the heirs of Calvin Lacey, which was read twice by its title and referred to the Committee on Claims.

Mr. DANIEL introduced a bill (S. 9528) for the relief of the heirs or the estates of James L. Miller, deceased, and others, which was read twice by its title and referred to the Committee on Claims.

Mr. CLARK of Wyoming introduced a bill (S. 9529) for the relief of Francis Beach and certain other army officers and their heirs or legal representatives, which was read twice by its title and referred to the Committee on Claims.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. LODGE submitted an amendment authorizing the Secretary of the Treasury to settle certain claims, intended to be proposed by him to the sundry civil appropriation bill, which, with the accompanying memoranda, was referred to the Committee on Appropriations.

He also submitted an amendment proposing to appropriate $80,083.50 to be paid by the Secretary of War to properly ac-

credited representatives of certain religious orders in the Philippine Islands, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations.

Mr. RAYNER submitted an amendment proposing to pay to the State of Maryland $72,000, being the principal sum advanced by that State to the United States under the provisions of a joint resolution passed by the general assembly, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations.

Mr. HEYBURN submitted an amendment proposing to appropriate $1,000 to pay William Grant Lieuallen and William E. Burns $500 each for extra services rendered in transferring, rearranging, remarking, cleaning, and refiling the bills, reports, documents, and laws in the Senate document room, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. BURKETT submitted an amendment proposing to appropriate $210,000 for the purchase of certain parcels of ground in the District of Columbia to provide for a site for an addition to the Government Printing Office, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations.

Mr. TILLMAN submitted an amendment authorizing the Auditor for the Navy Department, in the settlement of the accounts of George M. Stackhouse, paymaster, United States Navy, to credit him with the sum of $1,606, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. DEPEW submitted an amendment relative to the settlement of the judgment against Edmund B. Jordan, collector of internal revenue of the United States for the first district of New York, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate $4,800.50 to pay the National Automatic Fire Alarm Company, of Washington, D. C., for the maintenance of the automatic fire-alarm system now in certain buildings of the Government Hospital for the Insane, intended to be proposed by him to the sundry civil appropriation bill, which, with the accompanying papers, was referred to the Committee on Appropriations.

Mr. DANIEL submitted an amendment proposing to appropriate $1,200 for payment to the treasurer of the Mount Vernon Avenue Association of Virginia, assignee of the State of Virginia under the act of the general assembly of Virginia, approved March 5, 1888, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. WETMORE submitted an amendment proposing to appropriate $700 to reimburse Edmund M. Talcott, assistant surveyor of the District of Columbia, for damages incurred by an incorrect survey made during the year 1905, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. TAYLOR submitted an amendment authorizing the President of the Senate to issue certificates of salaries to the Senators from Oklahoma, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to to the Committee on Appropriations.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 23717) to extend the time for construction and beginning construction of the Alaska Short Line Railroad in Alaska.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice-President:

H. R. 16743. An act for the removal of the restrictions on alienations of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes; and

H. R. 27523. An act making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1910.

WITHDRAWAL OF PAPERS—WILSON ZURMEHLY.

On motion of Mr. FORAKER, it was—

Ordered, That there may be withdrawn from the files of the Senate all papers relating to the bill (S. 4951, 60th Cong., 1st sess.) granting a pension to Wilson Zurmehly, there having been no adverse report on said bill.

ENROLLMENT OF OSAGE INDIANS.

On motion of Mr. CURTIS, it was—

Ordered, That the hearings had before the Committee on Indian Affairs on matters relating to the enrollment of certain persons as members of the Osage tribe of Indians, etc., be printed as a document.

CALUMET RIVER BRIDGE.

Mr. HEMENWAY. I ask unanimous consent for the present consideration of the bill (S. 9405) to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River in the State of Indiana.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Commerce with an amendment, in section 1, page 2, line 2, after the word "March," to strike out "third" and insert "twenty-third," so as to make the section read:

That the Chicago, Lake Shore and Eastern Railway Company, a corporation organized under the laws of the States of Indiana and Illinois, its successors and assigns, be, and they are hereby, authorized to construct, maintain, and operate a railroad bridge and approaches thereto across the Calumet River in the northwest quarter of section 4, township 36 north, range 8 west of the second principal meridian, in Lake County, in the State of Indiana, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DISTRICT BUILDING ASSOCIATIONS.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 6055) to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia, which were, on page 2, line 11, after "shall," to insert: "not exceed the sum of $25 for the first $500,000 or fractional part thereof of assets and the sum of $10 for each additional $100,000 or fractional part thereof of assets, and;" on page 3, line 5, to strike out all after "act" down to and including "act," in line 7; on page 4, after line 2, to insert:

SEC. 2. That there be added to the Code of Law for the District of Columbia a new section, to stand as section 691a, and to read as follows:

SEC. 691a. That any building association incorporated or unincorporated, organized and existing under the laws of the District of Columbia, or any State or Territory, to do or now doing, in the District of Columbia, a building-association business or otherwise operating as a building association, shall be subject to all the provisions of the foregoing section of this act in respect of the powers of the Comptroller of the Currency hereunder, and any such association or corporation shall at all times keep on deposit with the Comptroller of the Currency in money or stocks, bonds or mortgages or other securities to be approved by said officer not less than 20 per cent per annum of its capital and surplus as security for its depositors and creditors, and as a guarantee for the faithful performance of its contracts, and may also make such further deposit of its assets as above described with the comptroller for such purpose as it may from time to time desire so to do.

Mr. GALLINGER. I move that the Senate concur in the amendments made by the House of Representatives.

Mr. KEAN. What is that, Mr. President?

Mr. GALLINGER. It is a bill dealing with loan associations in the District of Columbia.

The VICE-PRESIDENT. The Senator from New Hampshire moves that the Senate concur in the amendments made by the House of Representatives to the bill.

Mr. NELSON. Mr. President——

The VICE-PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Minnesota?

Mr. GALLINGER. I yield to the Senator.

Mr. NELSON. Mr. President, that motion ought not to prevail, and I object to it at this time. I think the bill ought to go to the Committee on the District of Columbia.

Mr. BURKETT. Let the last section as proposed to be amended be read.

The VICE-PRESIDENT. The Secretary will read the last section as proposed to be amended.

The Secretary read as follows:

SEC. 2. That there be added to the Code of Law for the District of Columbia a new section, to stand as section 691*a*, and to read as follows:

SEC. 691*a*. That any building association incorporated or unincorporated, organized and existing under the laws of the District of Columbia or any State or Territory to do or now doing in the Dis-

trict of Columbia a building-association business or otherwise operating as a building association, shall be subject to all the provisions of the foregoing section of this act in respect of the powers of the Comptroller of the Currency hereunder, and any such association or corporation——

Mr. BURKETT. Mr. President, that covers as much as I desire read. I should like to ask the Senator in charge of the bill if that does not introduce a new element which, I think, the committee has not considered. That, I understand, is the ground of the objection, and the Senator may be able to explain it. The amendment begins by inserting the words "District of Columbia." Those words are not in the copy of the bill as it passed the House and as it appears in the RECORD of Saturday, and there has been some objection from Senators in reference to that part of it. Perhaps the Senator from New Hampshire can explain it.

Mr. GALLINGER. I will say that the bill relates only to the District of Columbia, and that such a bill could only relate to the District of Columbia.

Mr. BURKETT. I understand that, but the bill which recently passed the Senate was to control the banking institutions that were branches of outside corporations that came into the District of Columbia to do business. This seems to include, also, the institutions located and organized in the District of Columbia and puts them on the same basis as the others coming in from the States. That is the objection that has been made to the bill. The words "District of Columbia" seem, according to the RECORD, to have gotten into the bill since it was passed by the House.

Mr. GALLINGER. This is the House bill precisely as it passed. The RECORD must be incorrect in that regard.

Mr. CULLOM. It is incorrect, I know.

Mr. BURKETT. The RECORD is here.

Mr. GALLINGER. As read by the Secretary, it is the bill as it comes from the House and is accurate, of course.

What I desire to say—and it is only a word in this connection—is that we have had banks and loan associations in this District with very little supervision and there has been very serious trouble. At the last session we made progress and put certain banking institutions under the jurisdiction of the Comptroller of the Currency and got rid of some of the scandal.

In reference to the loan associations, I understand that there are very serious matters connected with them. One of them recently failed and brought disaster to some good people. The Comptroller of the Currency is very anxious that this bill, following the line of legislation relating to banks, shall be enacted. My only purpose is to give security to the people who are investing in the loan associations in this District.

I hope there will be no objection to agreeing to the amendments which the House of Representatives have made, for I believe they are very good amendments.

Mr. NELSON. Mr. President, as the bill was reported from the Committee on the District of Columbia and passed by the Senate, I have no objection to it, nor have I any objection in respect to two of the amendments made by the House of Representatives, but one of the House amendments will be utterly destructive of the work and usefulness of these loan and building associations. That amendment requires them to deposit 20 per cent of their funds in the Treasury Department. There is no objection to putting the building and loan associations under the jurisdiction of the Comptroller of the Currency. I think it is proper enough that they should be required to report to him, but the amendment of the House to which I refer goes a step further. It requires, as I have said, the loan and building associations to deposit 20 per cent of their funds with the Secretary of the Treasury. This would seriously cripple them by requiring them to keep a large amount of their funds idle. The money deposited in the Treasury Department would draw no interest and would be of no practicable use. Instead of allowing the building associations to use that money for the purposes for which they were created, namely, loaning it out to people who want to engage in building, the House amendment would cripple the associations.

I trust, therefore, that the bill will be sent to conference and that the objectionable amendment will be eliminated, for, in my view, that is the only objectionable feature of the bill.

Mr. GALLINGER. Mr. President, for the purpose of complying with the request of the Senator from Minnesota [Mr. NELSON], I move that the Senate disagree to the amendments made by the House of Representatives, ask for a conference with the House on the amendments, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice-President appointed Mr. GALLINGER, Mr. DILLINGHAM, and Mr. MARTIN as the conferees on the part of the Senate.

ELLIS W. JOY.

Mr. BORAH. I am directed by the Committee on Claims, to whom was referred the bill (H. R. 14290) for the relief of Ellis W. Joy, to report it without amendment.

Mr. STONE. I ask unanimous consent for the present consideration of the bill just reported.

The Secretary read the bill, and, there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to pay to Ellis W. Joy, of Andrew County, Mo., $300, unlawfully collected from him by the board of enrollment in the State of Ohio, to furnish a substitute when drafted for service in the army, he not being a citizen of Ohio at the time and serving as a soldier with the Missouri troops.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

COURTS IN TEXAS.

Mr. CULBERSON. I am directed by the Committee on the Judiciary, to whom was referred the bill (H. R. 28305) to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State and to detach it from the Fort Worth division of said court, to report it without amendment.

The bill is a local Texas court bill, and, notwithstanding what has been said by the Senator from West Virginia [Mr. SCOTT], I ask him to allow unanimous consent to be given for its present consideration. It is quite an important matter, though purely local.

The VICE-PRESIDENT. The Senator from Texas asks unanimous consent for the present consideration of the bill named by him.

Mr. SCOTT. I object.

The VICE-PRESIDENT. Objection is made.

Mr. SCOTT. I shall object to all requests for unanimous consent until I secure the consideration of the Military Academy appropriation bill.

CONSIDERATION OF PENSION BILLS.

Mr. McCUMBER. I now wish to renew my request for unanimous consent for the consideration of the unobjected pension bills upon the calendar.

RED RIVER BRIDGE AT SHREVEPORT, LA.

Mr. FOSTER. I ask unanimous consent for the present consideration of the bill (H. R. 28193) to authorize the city of Shreveport to construct a bridge across Red River.

The VICE-PRESIDENT. Does the Senator from North Dakota yield to the Senator from Louisiana?

Mr. McCUMBER. I yield for morning business.

Mr. FOSTER. I ask unanimous consent for the present consideration of the bill named by me.

Mr. McCUMBER. I yield to the Senator.

The Secretary read the bill; and, there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

C. M. COX.

Mr. TALIAFERRO. I ask unanimous consent for the present consideration of the bill (S. 8200) for the relief of C. M. Cox.

The VICE-PRESIDENT. Does the Senator from North Dakota yield to the Senator from Florida?

Mr. McCUMBER. I am ready to yield for morning business; but that is all.

Mr. TALIAFERRO. It is only a short bill and will take but a moment.

Mr. SCOTT. Will the Senator from North Dakota yield to me for a moment?

Mr. BAILEY. Mr. President, I do not understand that unanimous consent has been granted to the Senator from North Dakota.

Mr. McCUMBER. Unanimous consent has not been granted, but I have the floor, waiting, and have been yielding until the request is granted.

Mr. TALIAFERRO. Will the Senator yield to me for a moment to ask for the present consideration of the bill I have named?

Mr. McCUMBER. I yield to the Senator.

The VICE-PRESIDENT. The Senator from Florida asks unanimous consent for the present consideration of the bill named by him.

Mr. SCOTT. I will have to object to unanimous consent. If we are going to take up bills, I have the Military Academy appropriation bill, for which I desire consideration.

The VICE-PRESIDENT. The Senator from North Dakota [Mr. MCCUMBER] has the floor, and he has yielded to the Senator from Florida.

Mr. MCCUMBER. I have yielded to the Senator.

The VICE-PRESIDENT. The Senator from Florida asks unanimous consent for the present consideration of a bill, the title of which will be stated.

The SECRETARY. A bill (S. 8200) for the relief of C. M. Cox.

Mr. SCOTT. Mr. President, I shall not object to that bill, but I shall object to any more bills being considered at this time by unanimous consent, and I give notice to that effect.

The VICE-PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Claims with amendments, in line 6, before the word "dollars," to strike out "twenty-six" and insert "sixteen;" and in line 7, before the word "cents," to strike out "forty-five" and insert "twenty-five," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any moneys not otherwise appropriated, to C. M. Cox, of Bonifay, Holmes County, Fla., the sum of $316.25, for services rendered as United States commissioner in and for the northern district of Florida.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ADDITIONAL DISTRICT JUDGE FOR WASHINGTON.

Mr. DEPEW submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27061) to provide for the appointment of an additional judge in and for the western district of Washington, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate and agree to the same.

That the House recede from its disagreement to the amendment of the title of the bill and agree to the same.

CHAUNCEY M. DEPEW,
J. B. FORAKER,
LEE S. OVERMAN,
Managers on the part of the Senate.

JOHN J. JENKINS,
D. S. ALEXANDER,
HENRY D. CLAYTON,
Managers on the part of the House.

The report was agreed to.

RELATIONS BETWEEN CONGRESS AND THE EXECUTIVE DEPARTMENTS.

Mr. BAILEY. Mr. President, I rise to a question affecting a high privilege of the Senate. I have before me several responses which the heads of various departments have made recently to resolutions of the Senate, and an examination of them discloses the fact that they deny the power of this body to demand papers or information in the possession of those departments, notwithstanding the fact that those papers or that information may relate to matters within our jurisdiction and control. It is true that the denial is not made in so many words. It is made by implication and might, therefore, escape, and I have no doubt it has escaped, the attention of many Senators.

It is in the merely formal part of these replies, and until within the last few days I did not myself know that the heads of departments have for more than a year been replying to our resolutions in this form. I have here "a letter from the Secretary of the Treasury, transmitting, in response to the Senate resolution of February 18, 1908, copies," and so forth. This response is dated on the 13th of April, 1908, and after quoting the resolution of the Senate, the Secretary proceeds:

I beg to inclose herewith, by the direction of the President.

There are other responses in substantially the same language, varying, but the variation is immaterial, some of them reading "according to the direction of the President;" but they generally follow this form, and say "by the direction of the President."

Mr. President, I might, and other Senators might, have overlooked this matter as unimportant or irrelevant, except for the message which the President of the United States sent to the Senate a short while ago; and in view of that message this language can not be mistaken either in the purpose of it or in the meaning of it. It is intended to deny the power of the Senate to demand these papers and this information. It is equivalent to declaring that unless the President directed the head of a department to send these papers or to give this information, the papers would not be sent or the information would not be given. This, sir, is such a distinct challenge of a right which the Senate has exercised, and which the departments have recognized, from the foundation of this Government that we can not allow it to pass in silence. We must take notice of it now or else by our silence we will be deemed to have acquiesced in the modern and startling doctrine of the President that the Senate has no power to command the departments to send information or papers to this body.

I shall not detain the Senate now to discuss the question, because it is too plain to require discussion. It is one of the few questions upon which there has never been a division of opinion in the Senate or elsewhere. But even if it needed discussion I could add nothing to what the Senator from Georgia and the Senator from Colorado have already said upon the subject within the last thirty days. I might, however, be tempted to debate it if it were not for the fact that Congress approaches its expiration, and that every hour between this and the adjournment will be required for matters that can not be neglected and which ought not to be postponed. In view of that, I shall occupy no further time of the Senate unless it is made necessary by something which shall be said in opposition to the resolutions which I now offer, and for which I ask immediate consideration.

The VICE-PRESIDENT. The Senator from Texas submits resolutions and asks unanimous consent for their present consideration. The resolutions will be read for the information of the Senate.

The Secretary read the resolution, as follows:

Senate resolution 317.

Resolved, That the response which the Secretary of the Treasury made under date of April 13, 1908, to a resolution of the Senate adopted February 18, 1908, shall be returned to him by the Secretary of the Senate, with the statement that the Senate of the United States declines to receive any communication from the head of any department which denies, either expressly or by implication, its right to demand all papers and information in the possession of any department and relating to matters within its jurisdiction or control.

Resolved further, That the Secretary of the Senate be instructed to examine the files of the Senate for the Sixtieth Congress, and whenever he finds a similar communication from the head of any department stating that such communication was made by the direction of the President, or an equivalent expression, he shall return the same to the head of the department making it, with the statement specified in the foregoing resolution.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolutions?

Mr. ALDRICH. Mr. President, while we may agree mainly to the proposition suggested by the Senator from Texas [Mr. BAILEY], I think the matter of too much importance to be acted upon without the consideration of a committee. I therefore suggest to the Senator from Texas that he allow the resolutions to be referred to the Committee on the Judiciary, with the hope that they will report promptly upon them.

Mr. BAILEY. That means, Mr. President, the Senate will take no action on the matter. If I can have any reasonable assurance that the Senate will be permitted to vote upon the resolutions, I will very cheerfully agree to their going to the committee.

Mr. ALDRICH. I should hope——

Mr. BAILEY. My own opinion is that it is one of the few things that does not need the attention of a committee. I think the Senator from Rhode Island will not stand in his place and controvert the proposition announced in the resolutions. I think the Senator from Rhode Island will not tell the Senate that, in his opinion, any head of a department has the right to decline to make an answer to a resolution of this body demanding papers or information.

Mr. ALDRICH. I have no question myself that the Senate has the right to direct the Secretary of the Treasury to report to the Senate without reference to the President or to any other power, but I am not certain now of the remedy that should be proposed, and I am not certain about what the precise action of the Senate should be. I think the resolutions should be considered by the appropriate committee, and I therefore move that they be referred to the Committee on the Judiciary.

Mr. BAILEY. Mr. President, I shall demand the yeas and nays on the question; and if the Senate hereafter is to suffer under this executive insolence, I want the RECORD to show who it is that defends the encroachments of the executive department against the privileges of the Senate; and on the motion of the Senator from Rhode Island I ask for the yeas and nays.

The VICE-PRESIDENT. The Senator from Rhode Island moves that the resolutions submitted by the Senator from Texas

be referred to the Committee on the Judiciary. On that motion the Senator from Texas demands the yeas and nays.

The yeas and nays were ordered.

Mr. NELSON. I ask to have the resolutions again read.

The VICE-PRESIDENT. The Secretary will again read the resolutions at the request of the Senator from Minnesota.

The Secretary again read the resolutions.

Mr. BORAH. I understand that the yeas and nays have been demanded on the question of referring the resolutions to the committee?

The VICE-PRESIDENT. That is the fact.

Mr. BORAH. I merely want to say, before I cast my vote, that I have no doubt of the correctness of the position of the Senator from Texas, but I shall vote the other way simply because I believe that the resolutions are of sufficient importance to be considered by a committee.

Mr. BAILEY. I can understand how the Senator from Idaho feels that way and other Senators may feel that way; but, lest anybody should misunderstand what this means, I will say to the Senator from Rhode Island now that if the majority will agree that the resolutions shall be reported back and voted on before we adjourn, I will withdraw my demand for the yeas and nays and will agree that the resolutions go to the committee. The reason I resist his motion to refer the resolutions to the committee is because I feel perfectly satisfied that it is equivalent to disposing of this matter without deciding it.

Mr. ALDRICH. That is certainly not my purpose, and, while I can not speak for the Judiciary Committee, I should hope that they would be able to report at this session their conclusions.

Mr. BAILEY. The Senator from Wyoming [Mr. CLARK], the chairman of the Judiciary Committee, is in his seat. If the Senator from Wyoming will say that his committee will report the resolutions back, so that the Senate may dispose of them, I will withdraw the demand for the yeas and nays.

Mr. CLARK of Wyoming. The chairman of the Judiciary Committee is not prepared to say that any resolution will be reported back from that committee. The committee has been wrestling in vain for a number of weeks, earnestly and faithfully, with a resolution referred to it, and has arrived at no satisfactory conclusion. The Committee on the Judiciary has this morning held what it supposed was its last meeting. I say that for the information both of the Senator from Texas and the Senator from Rhode Island. Of course the Judiciary Committee will use its utmost endeavor to comply with any order the Senate may make.

Mr. BAILEY. I did not feel at liberty to say what the Senator from Wyoming has just said to the Senate, though I understood that to be the condition of business before that committee. I think the Senator from Rhode Island must now understand that a reference of the resolution to the Committee on the Judiciary means a refusal of the Senate to decide the question. I shall demand the yeas and nays, and I am going to record it as my prediction that there will be no report on the resolutions, and that the Senate will adjourn with these messages on its files without taking notice of this denial of the powers which for a hundred years it has exercised without question.

Mr. ALDRICH. I deny the right of the Senator from Texas to assume that because the Members of the Senate shall vote to refer a resolution in an orderly and proper manner to one of the standing committees of this body for its consideration they are opposed to the resolutions upon which the Senator asks to have peremptory action at this moment. The Senate has not been in the habit of treating these serious questions in that way, and I assume that it will not establish a precedent of that kind. I have no doubt whatever that the Committee on the Judiciary, if this matter is referred to it, will take it into immediate consideration. I have no doubt it will follow the instructions of the Senate, the tacit instructions of the Senate, and consider it at once. It is the proper committee of this body to consider it. It is a question important in character, and while immediate action may be satisfactory to the Senator from Texas, every Member of this body has a right to consider it, and to consider it with a view of all the consequences of their action.

Our relations to the executive department constitute a matter of vital concern to us all, and I am sure the Senator from Texas can not expect the Senate at his suggestion to act in this precipitate manner upon the resolutions; and I again protest against the assumption that if we vote to refer them to the committee we are necessarily opposed to the proposition which he has laid down.

Mr. BAILEY. The Senator from Rhode Island may protest to his heart's content, but that will not deter me from repeating that the very purpose of sending the resolutions to the committee is to avoid a direct vote upon them. If the Senator from Rhode Island were not familiar with this matter, if other Senators here needed time to determine for themselves and according to their own best judgment whether or not the head of a department has the right to withhold papers and information from the Senate when demanded by the Senate, I would cheerfully agree that the matter was too important to be decided offhand. But the Senator from Rhode Island and every other Senator in this body are prepared now and here to answer that question. The Senator from Rhode Island is prepared to answer it for himself, and I take it every other member of this body is. It is not a new question. If it were, I would agree that it would require time for deliberation and time for debate. But one of the most remarkable debates that ever occurred in this Chamber arose on this very question, under Cleveland's administration, when the Senators on the other side of the Chamber were not only affirming the right of the Senate to have the papers and documents and information in the possession of the departments transmitted here under the call of the Senate, but they went further and demanded that President Cleveland should transmit papers which he claimed were private and not official papers.

The Judiciary Committee then had this question under consideration, and while that great committee divided in its opinion and in its report upon the case then at bar, there was absolutely no division among its members as to the right of the Senate to demand papers, documents, and information relating to matters within the jurisdiction and control of the Senate. I have not for some little time examined the report of the committee, but I am under the impression that the latter part of the first resolution is a quotation, almost word for word, from the report of the committee in which this right of the Senate was asserted.

If the majority chooses to say it is not within its power to demand this information, if the majority chooses to say that it is willing to sit here and have response after response made to its resolutions containing a denial, distinct, though by implication, of the power of the Senate to demand this information, they must take the responsibility. I intend, so far as I am concerned, to assert and to defend the right of the Senate; and I only now desire to say—and I put what I prophesy against the protest of the Senator from Rhode Island—that if the resolutions are referred to the Committee on the Judiciary they will not be reported back before the close of this session. If they are reported back and the Senate is given an opportunity to vote upon them then I shall cheerfully rise in my place and tender my apology to the Senator from Rhode Island and the Republican majority.

Mr. HEYBURN. Mr. President, I should be ready to vote upon this question were it not for the fact that I am in doubt as to whether the rule suggested by the Senator from Texas [Mr. BAILEY] is applicable to the Secretary of War and the Secretary of the Navy. I am only inclined to think it is not. The President is the Commander in Chief of the Army and Navy; and I desire the RECORD to show that when I vote upon the question of the reference of the resolutions I reserve that question in my mind, and my vote will not be indicative of my views upon the question.

Mr. LODGE. Mr. President, this seems to be a very large and important question, covering a great deal of historical as well as constitutional ground. I have heard the resolutions read but once at the desk. I do not pretend to grasp their full purport. But it is too large a question, even if it is reported here, to settle in the closing hours of the Congress, rushed with business as we are, and will be, every minute from now till the 4th of March. I do not think it ought to be decided in the closing hours of the session, and I sincerely hope the resolutions will be referred to the committee for preliminary consideration.

Mr. FORAKER. I ask that the resolutions may be again reported. I was absent from the Senate Chamber when they were offered.

The VICE-PRESIDENT. The Secretary will again read the resolutions, at the request of the Senator from Ohio.

The Secretary read as follows:

Resolved, That the response which the Secretary of the Treasury made, under date of April 13, 1908, to a resolution of the Senate, adopted February 18, 1908, shall be returned to him by the Secretary of the Senate, with the statement that the Senate of the United States declines to receive any communication from the head of any department which denies, either expressly or by implication, its right to demand all papers and information in the possession of any department and relating to matters within its jurisdiction or control.

Resolved further, That the Secretary of the Senate be instructed to examine the files of the Senate for the Sixtieth Congress, and whenever he finds a communication from the head of any department stating that such a communication was made by the direction of the President, or an equivalent expression, he shall return the same to the head of the department making it with the statement specified in the foregoing resolution.

Mr. FORAKER. Mr. President, the resolutions have reference to a practice that has been recently resorted to, of which I think the Senate should take some notice. I was not aware until within the last two or three weeks that resolutions positively directing the heads of departments to make reports to the Senate were answered by the heads of departments "by direction of the President," as though but for that direction they would not answer the demand of the Senate. It seems to me, in the light of the practice that has obtained here from the beginning of the Government and in the light of what we have common knowledge of, that is in direct conflict with the Senate's prerogative, and that the Senate owes it to its dignity and to its rights and privileges to take notice of and to break up that practice if it be within its power to do so. That should be done perhaps by resolutions of this character, but I am not sure, having heard the resolutions read only just now, that I thoroughly understand them or that they are in the form in which I would be willing to vote for them.

Mr. BAILEY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Ohio yield to the Senator from Texas?

Mr. FORAKER. With pleasure.

Mr. BAILEY. In order that every Senator may be sure as to what the resolutions mean, and in order that every Senator may have an opportunity to make such suggestions as he sees fit, if the Senator from Rhode Island will withdraw the motion to refer the resolutions to the Committee on the Judiciary I will cheerfully allow the resolutions to lie on the table until to-morrow, in order that all may have the fullest opportunity to consider them.

Mr. ALDRICH. I will not withdraw my motion, but I am willing to let the resolution go over until to-morrow.

Mr. BAILEY. Of course the Senator may withdraw it and renew it to-morrow, but I am willing——

Mr. ALDRICH. It is not necessary to do that.

Mr. BAILEY. I am willing that it shall go over until to-morrow with the motion pending.

Mr. FORAKER. Will the Senator from Texas allow me to ask him why he recites in the resolution a communication dated April 13, 1908, instead of a communication that has come in within the last two or three days? I saw within a week an answer from the head of some one of the departments that was sent here "by direction of the President," as though except for that direction he would not send it at all.

Mr. BAILEY. I will say to the Senator from Ohio that when I dictated the resolution I instructed my secretary to obtain the earliest one that had been sent in that form. When I came to look among my papers a moment ago I did not find the communication which he had specified in the resolution, and I hurriedly and in pencil here changed the one which he had had to one that I happened to have before me. I have four or five of them here. There is one from the Secretary of the Navy, there is one from the Secretary of War, there is one from the Secretary of Commerce and Labor. I think probably there is one from every department. I selected the Secretary of the Treasury because I thought that the strongest, in view of the fact that there is a statute requiring him in certain cases to communicate information to Congress.

Mr. FORAKER. I wish to make a suggestion to the Senator from Texas. If I understand the last paragraph of the second resolution, it is in the nature of a direction to the Secretary of the Senate to ascertain what other communications have come here "by direction of the President" instead of in answer to resolutions of the Senate, and to return all such, or something to that effect. Would it not be better so to amend the resolution as that the Secretary shall report to the Senate, and let the Senate direct that they be sent back, if that should be done? I hope it will not be necessary for us to resort to anything which is discourteous, but I do hope the Senate will stand for its own rights about this matter, for I regard it as of the highest importance. If you concede that the head of a department is not to answer a direction from the Senate except when the President shall give him permission or direction to do so, all authority over the heads of departments is at an end.

Mr. BAILEY. The Senator from Ohio——

Mr. FORAKER. I was about to say, having those apprehensions about the form of the resolution, I would not be opposed to having it go to the Committee on the Judiciary or to some other proper committee if it were not that the end of the session is in sight, as the Senator suggests, and it may be impossible to get a hearing before that committee prior to the 4th of March.

Mr. BAILEY. I will say to the Senator from Ohio, in response to what he has said about the second resolution, that I drew it in that form for the reason that I did not consider it wise or safe to return one or two or three and possibly overlook others and not return them. Therefore, in order to put all the departments on precisely the same plane, who had made precisely the same response, I proposed to instruct the Secretary of the Senate to examine the files.

Now, if the Senator from Rhode Island is willing that this matter shall go over until to-morrow with his motion to refer it to the Judiciary Committee pending, I am perfectly willing that the matter shall take that course.

Mr. ALDRICH. I have no objection whatever to that course being taken, but I desire to remind the Senator from Texas and the Senate that at this stage of the session, with the public business in the condition in which it now is, it will be utterly impossible for the Senate to enter upon a discussion of this grave question of the comity which is due from one great department of the Government to another without imperiling the public business. I shall feel bound to resist any lengthy discussion of this question if it is within my power to do so.

Mr. BAILEY. Let me say to the Senator from Rhode Island that if the departments had respected the comity that ought to exist between the two branches of the Government this question would never have been here. But let the resolution go over until to-morrow.

The VICE-PRESIDENT. The resolution will lie on the table, with the motion of the Senator from Rhode Island to refer pending.

Mr. BAILEY. Subject to call to-morrow.

Mr. BURROWS. I desire that the resolutions shall be printed.

The VICE-PRESIDENT. The resolutions will be printed.

LEGISLATIVE, ETC., APPROPRIATION BILL.

Mr. WARREN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have been unable to agree.

F. E. WARREN,
J. A. HEMENWAY,
H. M. TELLER,
Managers on the part of the Senate.

HENRY H. BINGHAM,
F. H. GILLETT,
L. F. LIVINGSTON,
Managers on the part of the House.

Mr. WARREN. I move that the Senate further insist upon its amendments in disagreement, and ask a further conference with the House, and that the Vice-President shall appoint the conferees, the same as those before appointed.

The motion was agreed to; and the Vice-President appointed Mr. WARREN, Mr. HEMENWAY, and Mr. TELLER conferees on the part of the Senate at the further conference.

ARMY APPROPRIATION BILL.

Mr. WARREN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26915) making appropriation for the support of the army for the fiscal year ending June 30, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 5, 6, 7, 11, 12, 13, 15, 18, 19, 24, 30, 51, 52, 58, 59, and 60.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 4, 8, 9, 14, 16, 17, 20, 21, 22, 23, 25, 26, 27, 28, 29, 31, 33, 34, 34½, 36, 37, 38, 39, 42, 43, 44, 45, 46, 47, 48, 59, 50, 53, 54, 55, 56, and 62, and agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: Insert at the beginning of said amendment the words *"Provided further,"* so that the amendment will read: *"Provided further,* That the act approved May eleventh, nineteen hundred and eight, for the support of the army for the fiscal year ending June thirtieth, nineteen hundred and nine, in so far as it relates to the payment of six months' pay to the widow of an officer or enlisted man, and so forth, be amended as follows: Strike out the words 'contracted in the line of duty' and insert in lieu thereof the words 'not the result of his own misconduct;'" and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "three million five hundred thousand;" and the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the amount proposed in the amendment insert "one hundred thousand;" and the Senate agree to the same.

Amendment numbered 40: That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "seventy-seven thousand one hundred;" and the Senate agree to the same.

Amendment numbered 41: That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: In line 14 of said amendment strike out the colon and the words "And provided," and strike out all of lines 15, 16, 17, and to the period in line 18, so that the amendment will read: ": *Provided further*, That of the foregoing total amount eighteen thousand dollars, or so much thereof as may be necessary, shall be immediately available for the purchase of one thousand four hundred acres of land, more or less, adjoining the military reservation of Fort D. A. Russell, Wyoming, as an addition to the rifle range: *And provided further*, That three thousand six hundred dollars of the foregoing total amount, or so much thereof as may be necessary, shall be immediately available for the purchase of the southeast quarter of the northwest quarter and the east half of section two, in township one south, range one east of the Salt Lake meridian, as an addition to the target range of Fort Douglas Military Reservation, in the State of Utah;" and the Senate agree to the same.

Amendment numbered 57: That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment as follows: In line 8 of said amendment strike out the words "upon consideration of all the circumstances" and the commas preceding and following same, so that the amendment will read: "The Secretary of War is hereby authorized to convey to the owners of premises which encroach upon the military reservation of Fort Marion, in the city of St. Augustine, Fla., all the right, title, and interest of the United States in and to the portions of the reservation which have been occupied by them, under license or claim of title, upon the payment by said owners of such sums of money as the Secretary of War shall determine proper to be paid for the said lands;" and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In line 12 of said amendment strike out the word "provided," and insert the words "appropriated, to be expended from the amount appropriated in this act for water and sewers at military posts," so that the amendment will read: "For the acquiring of water rights and necessary lands therewith connected for a permanent water supply for Fort William Henry Harrison, in Montana, the amount of twenty thousand dollars appropriated therefor by the act approved May eleventh, nineteen hundred and eight, entitled 'An act making appropriation for the support of the army for the fiscal year ending June thirtieth, nineteen hundred and nine,' is hereby reappropriated and made available, and forty thousand dollars additional, or so much thereof as may be necessary for said purposes, including the acquiring of water rights and lands for intakes and right of way for pipe lines from such intakes to said fort, is hereby appropriated, to be expended from the amount appropriated in this act for water and sewers at military posts; and the Secretary of War is hereby authorized to acquire such rights and lands by purchase or by condemnation proceedings;" and the Senate agree to the same.

F. E. WARREN,
J. B. FORAKER,
JAS. P. TALIAFERRO,
Managers on the part of the Senate.
J. A. T. HULL,
JAMES HAY,
Managers on the part of the House.

STATEMENT.

The managers on the part of the Senate, at the conference on the disagreeing votes of the two Houses on the bill (H. R. 26015) making appropriation for the support of the army for the fiscal year ending June 30, 1910, submit the following written statement in explanation of the effect upon the total appropriation carried by the bill resulting from the action agreed upon and submitted in the accompanying conference report on the amendments of the Senate, namely:

Amount of bill as reported to Senate		$102,509,050.34
Added during consideration of bill by Senate:		
National road from St. Louis to Jefferson Barracks		127,000.00
Amount of bill as passed by Senate		102,636,050.34
Amounts dropped in conference:		
Contingent expenses at military posts	$2,500	
Pay of officers of the line	108,800	
Longevity pay of officers of the line	32,780	
Private secretary to Chief of Staff	2,400	
Pay of officers in Medical Department	151,100	
Pay of retired enlisted men	200,000	
Encampment and maneuvers, organized militia	175,000	
Barracks and quarters	500,000	
Roads, walks, wharves, and drainage	50,000	
Shooting galleries and ranges	5,000	
Road from Highway Bridge to Arlington	44,000	
National road from St. Louis to Jefferson Barracks	127,000	
Water rights for Fort William Henry Harrison (specific appropriation dropped, but expenditure authorized from total appropriation for water and sewers at military posts)	40,000	
		1,438,580.00
Amount of bill as reported by conferees		101,197,470.34

F. E. WARREN,
J. B. FORAKER,
J. P. TALIAFERRO,
Managers on the part of the Senate.

Mr. WARNER. I should like to ask the chairman of the Committee on Military Affairs a question. I was unable to determine by the numbers what amendments were agreed to or disagreed to. I ask him whether the amendment put on the bill by a vote of the Senate for building a road from the city limits of St. Louis through the Jefferson Barracks grounds to the national cemetery was concurred in by the other House?

Mr. WARREN. I am very sorry to say to the Senator from Missouri that all the amendments which proposed to build roads of that character went out in conference. We were compelled to surrender those in order to get an agreement. The rules of the House have been changed. The report must be voted on there as a whole. It seemed to be desirable to get a full report, and we were compelled to drop that and a few other similar matters.

Mr. WARNER. The sorrow of the Senator in charge of the bill does not exceed mine. I was in hopes that that amendment, which was put on by a vote of the Senate, would be insisted upon by the Senate conferees.

Mr. WARREN. I am sure if the Senator had been one of the managers of the conference he would have felt that every effort had been put forward to save that particular amendment, but it was impossible to save any of them and secure the report which has just been made.

The report was agreed to.

Mr. WARREN. I move that the report be printed as a Senate report.

The motion was agreed to.

INDIAN ALLOTMENTS.

Mr. GORE. I submit a resolution and ask for its present consideration.

The resolution (S. Res. 316) was read, as follows:

Resolved, That the Attorney-General is directed to inform the Senate:

1. As to the number of suits to cancel conveyances of Indian allotments that have been brought in the eastern judicial district of Oklahoma since May 27, 1908.

2. The number of such suits involving allotments, if any, from which the restrictions had been removed either by the Secretary of the Interior or by act of Congress.

3. The number of such suits which have been tried upon their merits, and whether judgments were rendered in favor of the plaintiff or the defendant.

4. The number of such suits which have been settled otherwise than by trial, either by compromise, dismissal, or in any other way.

5. The number and names of the special attorneys or special agents who have assisted in the bringing of these suits, together with the date of their employment and the amount of compensation which they have been paid.

6. How many of the suits above referred to, both where the land was restricted and where it was unrestricted, were brought upon the request of the allottees, and how many were brought without such request.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. KEAN. I do not think I have any objection to the resolution, but I should like to look at it before it is passed, and I ask the Senator to let it go over until to-morrow.

Mr. GORE. Very well.

The VICE-PRESIDENT. The resolution will be printed and lie over until to-morrow.

REVISION OF THE PENAL CODE.

Mr. HEYBURN. I have been withholding a request for action on a conference report for a long time while the Senator from North Dakota [Mr. MCCUMBER] has yielded to various Senators. The time is running rapidly, and I shall soon be called upon to object to the transaction of other business.

PENSIONS AND INCREASE OF PENSIONS.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 9421) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors.

Mr. MCCUMBER. I move that the Senate nonconcur in the amendments of the House and ask a conference with the House on the disagreeing votes of the two Houses, the conferees to be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed Mr. BURNHAM, Mr. CURTIS, and Mr. TALIAFERRO conferees on the part of the Senate.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 9278) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors.

Mr. MCCUMBER. I move that the Senate nonconcur in the amendments of the House and ask a conference with the House on the disagreeing votes of the two Houses thereon, the conferees to be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed Mr. BURNHAM, Mr. CURTIS, and Mr. TALIAFERRO conferees on the part of the Senate.

PAYMENT OF PENSIONS.

Mr. MCCUMBER. I ask unanimous consent that the Senate proceed to the consideration of the unobjected pension bills on the calendar.

The VICE-PRESIDENT. Is there objection? The Chair hears none. The first unobjected pension bill on the calendar will be proceeded with.

The bill (H. R. 27049) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors was considered as in Committee of the Whole.

The bill was reported from the Committee on Pensions with amendments.

The first amendment was, on page 16, after line 16, to strike out lines 17 to 20, inclusive, in the following words:

The name of Benjamin F. Green, late of U. S. S. Princeton, Minnesota, and Fort Jackson, United States Navy, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 17, after line 8, to strike out lines 9 to 12, inclusive, in the following words:

The name of Henry G. Chritzman, late surgeon Fifty-seventh Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 38, line 3, before the word "dollars," to strike out "seventy-two" and insert "fifty," so as to make the clause read:

The name of Warren S. Dungan, late lieutenant-colonel Thirty-fourth Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

The bill (H. R. 27469) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors was considered as in Committee of the Whole.

The bill was reported from the Committee on Pensions with amendments.

The first amendment was, on page 5, line 19, before the word "dollars," to strike out "twenty" and insert "thirty," so as to make the clause read:

The name of Jacob W. Truxel, late of Company G, Sixty-sixth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 17, after line 21, to strike out lines 22 to line 2, inclusive, on page 18, in the following words:

The name of John E. Robeson, late of Company D, Twentieth Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 24, after line 15, to strike out lines 16 to 20, inclusive, in the following words:

The name of Emma C. Homer, widow of Horace Homer, late of Company E, Thirty-third Regiment Pennsylvania Volunteer Infantry, and acting medical cadet, United States Army, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 33, after line 15, to strike out lines 16 to 19, inclusive, in the following words:

The name of Charles P. Egbert, late of Company B, Mason's battalion, Pennsylvania Emergency Militia, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

Mr. PENROSE. I ask that the Senate disagree to the committee amendment.

The amendment was rejected.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossd and the bill to be read a third time.

The bill was read the third time and passed.

The bill (H. R. 27249) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors was considered as in Committee of the Whole.

The bill was reported from the Committee on Pensions with amendments.

The first amendment was, on page 2, line 2, after the word "Navy," to insert "and pay him a pension at the rate of $30 per month," so as to make the clause read:

The name of Harry M. Haughawout, late apprentice seaman, U. S. S. Pensacola, United States Navy, and pay him a pension at the rate of $30 per month.

Mr. WARNER. I wish to make a parliamentary inquiry. If the Senate amendment is agreed to, will it be subject to amendment after all the committee amendments are agreed to?

The VICE-PRESIDENT. The bill is open to amendment now. It would not be open to amendment again while in Committee of the Whole. It would be open to amendment when the bill is reported to the Senate.

Mr. WARNER. I move, in line 3, page 2, before the word "dollars," that the word "thirty" be stricken out and the word "fifty" inserted.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 2, after line 15, to strike out lines 16 to 19, inclusive, in the following words:

The name of Florence A. Scott, widow of Douglas M. Scott, late captain and commissary of subsistence, United States Army, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

Mr. PENROSE. I ask that the committee amendment be disagreed to.

The amendment was rejected.

The next amendment was, on page 3, line 9, after the word "Corps," to insert "and pay him a pension at the rate of $36 per month," so as to make the clause read:

The name of Manuel P. Grundisch, late of United States Marine Corps, and pay him a pension at the rate of $36 per month.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

POSTAL SAVINGS BANKS.

The VICE-PRESIDENT. The hour of 1 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated by the Secretary.

The SECRETARY. A bill (S. 6484) to establish postal savings banks for depositing savings at interest, with the security of the Government for repayment thereof, and for other purposes.

Mr. CARTER. I ask unanimous consent that the unfinished business be temporarily laid aside.

The VICE-PRESIDENT. The Senator from Montana asks unanimous consent that the unfinished business of the Senate be temporarily laid aside. Without objection, it is so ordered.

PAYMENT OF PENSIONS.

The bill (H. R. 28046) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The bill (H. R. 27974) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors was considered as in Committee of the Whole.

The bill was reported from the Committee on Pensions with amendments.

The first amendment was, on page 3, line 8, before the word "dollars," to strike out "twenty" and insert "thirty," so as to make the clause read:

The name of Matilda B. M. Higgins, widow of Robert H. Higgins, late captain Company D, Fifty-ninth Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 32, after line 12, to strike out lines 13 to 17, inclusive, in the following words:

The name of Willis B. Blackwell, late of Company H, One hundred and thirty-eighth Regiment United States Colored Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The bill (H. R. 28047) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors was considered as in Committee of the Whole.

The bill was reported from the Committee on Pensions with amendments.

The first amendment was, on page 4, after line 23, to strike out:

The name of Edward Kerns, late of Company M, Second Regiment Ohio Volunteer Infantry, war with Spain.

The amendment was agreed to.

The next amendment was, at the top of page 5, to strike out:

The name of John H. Gray, late of Company A, First Regiment Tennessee Volunteer Infantry, war with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 5, after line 4, to strike out:

The name of Martha Rebecca Young, helpless child of Benjamin H. Young, late of Captain Broadnax's company, Alabama Volunteers, Creek Indian war, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 8, after line 3, to strike out:

The name of Elise Boettcher, widow of Edward Boettcher, late of U. S. S. Cushing and Vermont, United States Navy, and pay her a pension at the rate of $12 per month, and $2 per month additional on account of the minor child of said Edward Boettcher until he reaches the age of 16 years.

Mr. BURROWS. I ask the Senate to disagree to that amendment.

The amendment was rejected.

The next amendment was, on page 13, line 20, after the word "Spain," to insert "and pay him a pension at the rate of $50 per month," so as to make the clause read:

The name of William J. McGreevy, late of Company A, Sixteenth Regiment Pennsylvania Volunteer Infantry, war with Spain, and pay him a pension at the rate of $50 per month.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The VICE-PRESIDENT. This completes the special order.

JAMES H. DE COSTER.

Mr. SCOTT. Mr. President——

Mr. FRYE. Will the Senator allow me to have a little bill passed, that will take but a minute?

Mr. SCOTT. Are you sure it will take only a minute?

Mr. FRYE. I am sure it will pass in a minute. I ask the Senate to proceed to the consideration of the bill (H. R. 5728) for the relief of James H. De Coster.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to pay $465.95 to James H. De Coster, postmaster at Mechanic Falls, Androscoggin County, Me., for postage stamps and post-office funds stolen from the post-office at Mechanic Falls aforesaid on May 30, 1900, and charged to James H. De Coster and paid for by him in his settlement with the Post-Office Department.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. FRYE. Thank you.

MILITARY ACADEMY APPROPRIATION BILL.

Mr. SCOTT. I ask unanimous consent to call up House bill 28059, the Military Academy appropriation bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes, which had been reported from the Committee on Military Affairs with amendments.

Mr. SCOTT. I ask that the formal reading of the bill be dispensed with, and that it be read for action on the committee amendments.

The VICE-PRESIDENT. The Senator from West Virginia asks that the formal reading of the bill be dispensed with, that the bill be read for amendment, and that the committee amendments be first considered. Without objection, it is so ordered. The Secretary will proceed with the reading of the bill.

The Secretary proceeded to read the bill.

The first amendment was, on page 2, line 9, after the word "Academy," to strike out the semicolon and insert a colon.

The amendment was agreed to.

The next amendment was, under the subhead "Permanent establishment," on page 3, line 16, after the word "quartermaster's," to strike out "depot" and insert "department," so as to make the clause read:

For pay of 1 line officer, on duty in quartermaster's department at academy, in addition to pay as first lieutenant, $400.

The amendment was agreed to.

The next amendment was, on page 6, after line 13, to insert:

One stable sergeant, $360.

The amendment was agreed to.

The next amendment was, on page 6, line 15, before the word "sergeants," to strike out "Six" and insert "Five;" and in line 16, before the word "dollars," to strike out "two thousand one hundred and sixty" and insert "one thousand eight hundred," so as to make the clause read:

Five sergeants, $1,800.

The amendment was agreed to.

The next amendment was, on page 12, after line 7, to insert the following proviso:

Provided, That the extra pay provided by the preceding paragraphs shall not be paid to any enlisted man who receives extra-duty pay under existing laws or army regulations.

The amendment was agreed to.

The next amendment was, on page 12, after line 16, to strike out the following proviso:

Provided, That the extra pay provided by the preceding paragraphs shall not be paid to any enlisted man who receives extra-duty pay under existing laws or army regulations.

The amendment was agreed to.

The next amendment was, under the subhead "Pay of civilians," on page 16, line 5, before the word "dollars," to strike out "nine hundred" and insert "one thousand one hundred," so as to make the clause read:

For pay of one stenographer and typewriter in the adjutant's office, $1,100.

The amendment was agreed to.

The next amendment was, on page 17, line 13, before the word "hundred," to strike out "two" and insert "four," so as to make the clause read:

In all, to civilians employed at Military Academy, $77,458.

The amendment was agreed to.

The next amendment was, on page 17, line 17, before the word "dollars," to strike out "twenty-seven thousand three hundred and fifty-three" and insert "twenty-six thousand nine hundred and seventy-three," so as to make the clause read:

Total pay of Military Academy, $626,973.33.

The amendment was agreed to.

The next amendment was, on page 17, line 24, before the word "thousand," to strike out "one" and insert "two;" and in the same line, after the word "necessary," to insert the following proviso:

Provided, That hereafter the Board of Visitors to the Military Academy shall consist of five members of the Committee on Military Affairs of the Senate and seven members of the Committee on Military Affairs of the House of Representatives, to be appointed by the respective chairmen thereof, who shall annually visit the Military Academy on such date or dates as may be fixed by the chairmen of the said committees; and the superintendent of the academy and the members of the Board of Visitors shall be notified of such date by the chairmen of the said committees, acting jointly, at least fifteen days before the meeting. The expenses of the members of the board shall be their actual expenses while engaged upon their duties as members of said board, and their actual expenses for travel by the shortest mail routes *Provided further*, That so much of sections 1327, 1328, and 1329, Revised Statutes of the United States, as is inconsistent with the provisions of this Act, is hereby repealed.

The amendment was agreed to.

The next amendment was, on page 19, line 10, before the word "furnaces," to strike out "and;" and in line 11, before the word "mica," to insert "and," so as to make the clause read:

For fuel and apparatus, namely: Coal, wood, charcoal, stoves grates, heaters, furnaces, ranges and fixtures, fire bricks, clay, sand, and for repairs of steam heating and coal conveying apparatus, grates, stoves, heaters, ranges, furnaces, and mica, $30,000.

The amendment was agreed to.

The next amendment was, on page 20, after line 10, to insert:

For one typesetting machine, $3,700.

The amendment was agreed to.

The next amendment was, on page 20, after line 12, to insert:

For one 16-page cylinder press, $2,500.

The amendment was agreed to.

The next amendment was, on page 20, after line 14, to insert:

For one paper-cutting machine, $700.

The amendment was agreed to.

The next amendment was, on page 20, after line 15, to insert:

For six small electric motors, at $100 each, $600.

The amendment was agreed to.

The next amendment was, on page 20, after line 17, to insert:

For closets for stock, and office furniture, $600.

The amendment was agreed to.

The next amendment was, on page 23, line 22, after the word "one," to strike out "reflectorscope," and insert "reflectoscope," so as to make the clause read:

For purchase of 1 reflectoscope, $660.

The amendment was agreed to.

The next amendment was, on page 26, line 12, after the word "all," to insert "for expenses of the Board of Visitors and;" and in line 15, before the word "dollars," to strike out "twenty thousand five hundred and thirty-three" and insert "twenty-nine thousand six hundred and thirty-three," so as to make the clause read:

In all, for expenses of the Board of Visitors and for current and ordinary expenses, $129,633.

The amendment was agreed to.

The next amendment was, under the subhead "Miscellaneous items and incidental expenses," on page 26, line 22, before the word "wicking," to strike out "and;" and in the same line, after the word "wicking," to insert "and electric lamps and supplies," so as to make the clause read:

For gas coal, oil, candles, lanterns, matches, chimneys, wicking, and electric lamps and supplies for lighting the academy building, chapel, library, cadet barracks, mess hall, shops, hospital, offices, stables, and riding hall, sidewalks, camp, and wharfs, $10,000.

The amendment was agreed to.

The next amendment was, on page 29, line 5, before the word "dollars," to strike out "seven hundred and ninety-nine thousand seven hundred and eighty-six" and insert "eight hundred and eight thousand six hundred and eighty-six," so as to make the clause read:

Total Military Academy, $808,686.33.

The amendment was agreed to.

The next amendment was, under the subhead "Buildings and grounds," on page 29, line 15, before the word "dollars," to strike out "one hundred and fifty" and insert "three thousand one hundred and fifty," so as to make the clause read:

For repairs to ordnance laboratory and other buildings pertaining to the department of ordnance and gunnery and materials for roads and walks, and for repairs to machinery and tools, $3,150.

The amendment was agreed to.

The next amendment was, on page 31, after line 13, to insert:

For beginning the development of the general plan for landscape improvements of the West Point Military Reservation, designed under contract by authority of the Secretary of War, $2,500.

The amendment was agreed to.

The next amendment was, on page 31, after line 20, to insert:

For preserving and marking Revolutionary forts, redoubts, and batteries, and other historic sites, situated within the limits of the West Point Military Reservation, $3,200.

The amendment was agreed to.

The next amendment was, on page 32, line 17, before the word "dollars," to strike out "twenty-four thousand and thirty-five" and insert "thirty-two thousand seven hundred and thirty-five," so as to make the clause read:

Total buildings and grounds, $1,732,735.

The amendment was agreed to.

The next amendment was, on page 32, after line 17, to insert:

Hereafter whenever any cadet shall have finished three years of his course at the Military Academy, the succeeding appointment may be made from his congressional district, or at large, in accordance with the existing law.

Mr. TILLMAN. I ask the Senator in charge of the bill to tell us what that means.

Mr. SCOTT. Will the Senator please restate his question? I did not catch it.

Mr. TILLMAN. I refer to the amendment on page 32 of the bill, beginning with line 18. I want to know why the amendment is there and what it means.

Mr. SCOTT. I will say to the Senator from South Carolina that the adoption of the amendment will mean the addition of a certain numbers of cadets—the appointment of one by each Representative and Senator in order to fill the vacancies which occur at the Military Academy and for the accommodations that we have now provided for additional cadets.

I am credibly informed by the superintendent of the academy that when a cadet has been there for three years, under this provision each Senator and Member of the other House would have the right to appoint a cadet before the graduation of the cadet who had served only three years in the academy. This would mean an increase of 88 cadets.

Mr. TILLMAN. The language is very obscure; at least it seems so to me, because I recall that some eight or ten years ago—twelve years ago, possibly—one of our Representatives, whose cadet failed, had a cadet appointed from some other State. The amendment says "at large." What does that mean, unless it means that the President shall appoint the cadet?

Mr. SCOTT. This does not provide for the President to make the appointment.

Mr. TILLMAN. It does not say that the Senator or Representative shall appoint.

Mr. SCOTT. The provision of the general law, as the Senator will see if he will refer to it, provides for Senators and Members of the House of Representatives making the appointments. I want to say to the Senator that these appointments would only increase the number of cadets by 88.

Mr. TILLMAN. It is not a question of how many it increases the number of cadets, but it is a question of whether they are to come from the same congressional district or from the same State, depending upon whether they had their appointment originally from the Representative or the Senator.

Mr. SCOTT. It provides only that the cadets shall be appointed in conformity with law; and the law is that they must come from the congressional districts, in the case of appointment by Representatives, but in the case of appointments by Senators, of course, the Senator would select the cadet from any part of his State he chose. It does not prevent him from taking a cadet from anywhere within, for instance, the State of South Carolina. All of that is provided for by the general law. This only gives the right to appoint a cadet one year in advance. Heretofore the law has been that a cadet must be graduated and thereby create a vacancy before an appointment could be made. This provision, as I have said, makes it possible for an appointment to be made a year in advance.

Mr. FRAZIER. Mr. President——

The VICE-PRESIDENT. Does the Senator from West Virginia yield to the Senator from Tennessee?

Mr. SCOTT. Certainly.

Mr. FRAZIER. Mr. President, in view of the inquiry of the Senator from South Carolina, I would suggest an amendment to the chairman of the committee in order that this provision

may be entirely clear. The purpose of it is very apparent to those who were instrumental in framing the amendment; but it may not be so clear to others. I would suggest an amendment after the word "or," in line 20, by inserting the words "from the State."

Mr. SCOTT. I will accept that amendment.

Mr. FRAZIER. The purpose of the amendment is simply to increase the number of cadets in the corps.

The VICE-PRESIDENT. Will the Senator from Tennessee kindly restate his amendment?

Mr. FRAZIER. After the word "or," in line 20 on page 32, I move to insert the words "from the State."

Mr. SCOTT. Then the provision will read "from the State at large."

Mr. FRAZIER. Yes, sir.

Mr. SCOTT. I accept that.

The VICE-PRESIDENT. The amendment proposed by the Senator from Tennessee will be stated.

The SECRETARY. In the committee amendment, on page 32, line 20, after the word "or," the last word in the line, it is proposed to insert the words "from the State," so as read:

Hereafter whenever any cadet shall have finished three years of his course at the Military Academy, the succeeding appointment may be made from his congressional district, or from the State at large, in accordance with existing law.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Tennessee [Mr. FRAZIER] to the committee amendment.

The amendment to the amendment was agreed to.

Mr. KEAN. As I understand, this amendment of the committee increases the number of cadets at West Point by 88. It is general legislation, and I make the point of order against it.

Mr. SCOTT. Mr. President, I hope the Senator from New Jersey will withdraw that point of order. The increase of cadets by 88 under this proposed law at the expiration of 1914, we will say, will only increase the number of second lieutenants about 30. We have accommodations, and we have spent millions of dollars at West Point for accommodations to take care of these young men. We have the superintendent and the instructors, and we need the second lieutenants for the army, which, in the course of the weeding out during their academy course, I am sure will not exceed 30 in addition to the second lieutenants. I hope the Senator from New Jersey will withdraw his objection to this amendment.

Mr. KEAN. Mr. President, we are increasing every day the pension list and the retired list, as well as creating rank and new officers. I can not withdraw the point of order.

The VICE-PRESIDENT. The Senator from New Jersey insists upon his point of order.

Mr. KEAN. We do not want to increase the army now in time of peace.

The VICE-PRESIDENT. The Chair sustains the point of order.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 32, after line 21, to insert:

The Secretary of War is hereby authorized to permit Mr. Demetrio Castillo, jr., of Cuba, to receive instruction at the Military Academy at West Point: *Provided*, That no expense shall be caused to the United States thereby, and that the said Demetrio Castillo, jr., shall agree to comply with all regulations for the police and discipline of the academy, to be studious, and to give his utmost efforts to accomplish the courses in the various departments of instruction: *And provided further*, That in the case of the said Demetrio Castillo, jr., the provisions of sections 1320 and 1321 of the Revised Statutes shall be suspended.

The amendment was agreed to.

The next amendment was, on page 33, after line 8, to insert:

The President of the United States is hereby authorized, by and with the advice and consent of the Senate, to appoint J. Randolph Peyton, late a cadet at the Military Academy at West Point, to the position of second lieutenant of infantry in the army, and to place him upon the retired list with the pay of a retired second lieutenant of infantry.

The amendment was agreed to.

The reading of the bill was concluded.

Mr. SCOTT. Before the passage of the bill, I want to appeal once more to the Senator from New Jersey [Mr. KEAN] to withdraw his point of order against the amendment on page 32, beginning with line 18, and I ask that the letter which I send to the desk may be read by the Secretary.

Mr. FORAKER. I want to offer an amendment, Mr. President.

Mr. SCOTT. I ask for the reading of the letter which I send to the desk, and I call the attention of the Senator from New Jersey to it.

Mr. KEAN. The Senator from New Jersey is listening.

The VICE-PRESIDENT. The Senator from West Virginia asks that the letter which he sends to the desk may be read by the Secretary. Without objection, the Secretary will read, as requested.

The Secretary read as follows:

WAR DEPARTMENT,
Washington, February 23, 1909.

Hon. F. E. WARREN,
Chairman Committee on Military Affairs,
United States Senate, Washington, D. C.

SIR: Under date of December 23, 1908, a memorandum was submitted to the chairman Committee on Military Affairs, United States Senate, bearing upon the question of increasing the corps of cadets at West Point. This matter was also taken up during the hearings on the Military Academy bill conducted at West Point.

I consider this the most important item of new legislation for the army which Congress is likely to take up at this session, and therefore I desire to lay before you the following additional facts bearing thereupon:

Since June 30, 1898, there have been 2,953 appointments to commissions in the army, exclusive of the medical department. One thousand five hundred and fifty-nine of these were to fill vacancies caused by increases in the army through legislative enactments and 1,394 were to fill vacancies caused by officers leaving the service through retirement, death, resignation, dismissal, etc. During this period 883 cadets were graduated at the Military Academy. Subtracting this number 883 from 1,394, it will be seen that the number of cadets graduated at the Military Academy during this period of ten years was 511 less than the number of vacancies in the army caused by casualties, so that without considering the increases in the army the cadets graduated from West Point have averaged 52 per year less than the vacancies caused by casualties. During the last five years the classes at West Point have been larger; they have averaged 105 per year, so that during the last five years the number of cadets graduated per year has averaged 35 less than the number of vacancies caused by casualties. I think that very few persons, either in the army or out of it, realize that during the past ten years the Military Academy has not only not furnished a single graduate to fill a vacancy made by increases in the army, but that the graduating classes have averaged 51 short of the number necessary to replace ordinary casualties, such as deaths, resignations, retirements, etc. The result of this has been that in the whole line of the army only 38.6 per cent of the officers are graduates of West Point, while 61.4 per cent are nongraduates.

It may be thought that the great number of casualties during the last ten years—1,394—has in a large degree been due to the fact that a number of old civil-war veterans have left the service during this time and that in the future the number of vacancies caused by casualties will be very much less, and therefore the necessity for additional cadets from West Point will in a short time be passed over. An investigation of the records, however, for the period covering the last thirty years shows that this assumption is entirely wrong. From 1878 to 1898 there was an average of 67.15 vacancies per year. This was practically .4 per cent of the authorized strength of the line of the army during that time. From 1898 to 1908 there was an average of 139.4 vacancies per year, which is about 4 per cent of the present authorized strength of the line of the army. During the years 1898, 1899, and 1900 the average number of vacancies per year was about the same as it is now—140 per year—but the strength of the army was less, so that during the last thirty years the average number of vacancies has been consistently the same proportionally, except during these three years, when it was somewhat greater, and there is no reason to believe that during the next twenty years it will not average about the same. The fact that there are relatively few old officers in the army who will create vacancies by retiring for age is offset by the fact that a large number of the officers who entered the Regular Army as a result of the Spanish-American war are not as well equipped mentally or physically for the army as those who have entered it under normal conditions. These officers are constantly dropping out because of physical retirement, inability to keep up in their studies, as result of courts-martial, resignation, etc. This is illustrated by the fact that of the 541 officers who left the active list of the army during the last four years, 61 only retired for age, and the remaining 480 created vacancies by reason of death, resignation, etc. Of the 480, 36 were general officers, 51 were colonels, 27 were lieutenant-colonels, 62 were majors, 91 were captains, 114 were first lieutenants, and 99 were second lieutenants.

The proposed increase in the corps of cadets would result in the graduation of about 130 cadets per year, beginning three years hence. Without considering any probability of a future enlargement of the army, this number will be barely sufficient to fill the vacancies caused in the army by ordinary casualties. Congress has made generous appropriations for increasing the facilities at West Point, and this enlargement of the institution has now progressed to the extent that about 125 more cadets can be accommodated. I therefore earnestly request that your committee use all possible efforts to have incorporated in the Military Academy bill the provision for increasing the corps, which was recommended and fully explained in the memorandum above referred to.

Very respectfully,

ROBERT SHAW OLIVER,
Acting Secretary of War.

Mr. SCOTT. I now ask that the telegram which I send to the desk may be read.

The VICE-PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

WEST POINT, N. Y., *February 27.*

Hon. FRANCIS E. WARREN:

Have just made up results of candidates' entrance examination, which are as follows: One hundred and twenty-seven qualified and to be admitted, 108 failed to report, and 10 failed to complete examination. This leaves corps of cadets even 100 short. Can not recommend too strongly favorable consideration of proposition to increase the strength of the corps. Should increase be granted, of course the cadets will not enter until next year, so that it will make no change in appropriation for this year.

SCOTT, *Superintendent.*

Mr. SCOTT. I hope the Senator from New Jersey will withdraw his point of order.

Mr. KEAN. Mr. President——

The VICE-PRESIDENT. Does the Senator from West Virginia yield to the Senator from New Jersey?

Mr. SCOTT. Certainly.

Mr. KEAN. Mr. President, I do not believe in this proposed increase in the corps of cadets at the Military Academy. I therefore make the point of order against the amendment; but I am so strongly appealed to on all sides by Senators who, I suppose, are interested in the appointment of cadets, and so forth, that I shall have to yield. I withdraw the point of order.

Mr. TILLMAN. Then, Mr. President, I renew the point of order.

The VICE-PRESIDENT. The Senator from New Jersey [Mr. KEAN] withdraws his point of order against the amendment referred to, and the Senator from South Carolina [Mr. TILLMAN] renews the point of order——

Mr. TILLMAN. That it is general legislation.

The VICE-PRESIDENT. The Chair is of the opinion that the point of order is well taken, and sustains the point of order.

Mr. FORAKER. I will help out to the extent of two, if the amendment which I now send to the desk can be adopted.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to insert at the end of the bill the following:

That the President is hereby authorized to reinstate former cadets William T. Rossell, jr., and Harry G. Weaver as cadets in the United States Military Academy at West Point in the class next below that from which they were dismissed as cadets.

Mr. DICK. Against that amendment I desire to lodge a point of order.

The VICE-PRESIDENT. What is the point of order?

Mr. DICK. That it is legislation upon an appropriation bill.

The VICE-PRESIDENT. The Chair is of the opinion——

Mr. du PONT. Mr. President, I should like the Senator from Ohio to withhold his point of order temporarily to allow me to say a few words on the amendment.

The VICE-PRESIDENT. Does the Senator from Ohio yield to the Senator from Delaware?

Mr. DICK. I gladly do that.

The VICE-PRESIDENT. The Senator from Ohio withholds the point of order.

Mr. du PONT. Mr. President, while the amendment before the Senate has my cordial support, I fully concur in the general proposition that discipline must be maintained at the Military Academy.

Mr. President, hazing is a practice not indigenous to the soil of America, much less to that of West Point. Like very many other habits and customs, it has come to us from Europe, and the "fagging" system, which has existed for centuries in the English public schools, may be fairly considered as its direct ancestor. Hazing has existed—I will not say it exists—at the Naval Academy at Annapolis, and it is a common practice in very many of our colleges and schools throughout the country, and, if the public prints are to be believed, it has even manifested itself in some institutions dedicated to the exclusive education of the gentler sex.

My personal observation and, I may add, my personal experience of hazing at the Military Academy is not of recent date, but at the period to which I refer the preponderance of public opinion in regard to hazing, both in and out of the army, may be fairly described as one of benevolent toleration, if not of tacit approval, and it was considered by many that hazing, as then practiced, did no harm and was formative of character in many cases, being a useful experience to the verdant and unsophisticated young man who had been leading the "simple life" in some remote rural community, as well as to the bumptious and conceited youth from one of our great cities, possibly a relative of some high official under the Government.

The state of affairs which confronted the newcomers who then joined the academy may be thus briefly described: They had to reckon with the first and third classes of cadets, the second class being absent on furlough. The first class, who had been three years at the academy, almost without exception, deemed it beneath their dignity to interfere with the newcomers. The third class, immensely impressed by the fancied importance derived from a twelve months' service at the Military Academy, and keenly reminiscent of their own experiences as new cadets the year before, indulged in all sorts of pleasantries and harmless practical jokes at the expense of those who had just joined, these annoyances occasionally reaching a point where the manhood or self-respect of the newcomer impelled him to resist. In such cases, public opinion compelled the tormentor to give personal satisfaction to the aggrieved new cadet, who could always rely upon a first class man's seeing that he had fair play.

The reflection, Mr. President, that it was a very unpleasant thing to be soundly thrashed by anybody, and particularly and especially disagreeable for a patrician third class man to be thrashed by a plebeian new cadet, probably did as much, in a quiet way, to keep hazing within reasonable bounds as the statutes and regulations of later days.

As time went on, however, Mr. President, the state of affairs just portrayed underwent a radical change. The first class men apparently abandoned the dignified and self-respecting attitude of former days and lost the commanding influence they once enjoyed in the corps of cadets. The third class was permitted to form itself into a sort of guild of tormentors, which selected as its champion and bully the strongest and most athletic member of the class, who alone would give personal satisfaction to any aggrieved new cadet. This abominable and cowardly custom, utterly subversive of the elementary principles of fair play, practically prevented the newcomers from obtaining any redress whatever at the hands of the old cadets, and encouraged the latter, immune from being called personally to account, to the perpetration of all sorts of contemptible indignities and brutal insults.

Outraged public opinion throughout the whole country quickly found its expression in the Halls of Congress in the shape of the exceedingly drastic statute which I will now read:

The Superintendent of the Military Academy shall make such rules, to be approved by the Secretary of War, as will effectually prevent the practice of hazing; and any cadet found guilty of participating in or encouraging or countenancing such practice shall be summarily expelled from the academy and shall not thereafter be reappointed to the Corps of Cadets or be eligible for appointment as a commissioned officer in the Army or Navy or Marine Corps until two years after the graduation of the class of which he was a member. (Sec. 1496, Military Laws of the United States, act of March 3, 1901, 31 Stat., 911.)

This act provides for the summary dismissal of any cadet who, first, may be actually guilty of hazing; second, of any cadet who may encourage hazing; and, third, of any cadet who may countenance hazing, "countenance" being defined in the dictionary "to encourage, to favor, to approve, to aid, to abet."

It would seem that the military or moral turpitude involved is surely different in the three categories of offenses cited in the act, it being certainly more reprehensible to haze than to approve or to favor hazing, yet no distinction whatever is made in the punishment, summary dismissal being the penalty for any and all offenses.

The act also prescribes that the Superintendent of the Military Academy shall make such rules, to be approved by the Secretary of War, as will effectually prevent the practice of hazing.

It is submitted, Mr. President, that the rules thus made when approved by the Secretary of War have the force of law. Let us see what these rules are. They are embodied in paragraph 143 of the Regulations of the United States Military Academy, and this paragraph is divided into three sections, which I will not read, but ask that they may be incorporated in these remarks.

The VICE-PRESIDENT. In the absence of objection, permission is granted.

The matter referred to is as follows:

143. SECTION 1. Any cadet who shall strike, lay hands upon, treat with violence, disturb in his room or tent, or offer bodily harm to a new cadet or candidate, with intent to punish, injure, annoy, molest, or harass the same; or who shall, with the same intent, invite, order, compel, or permit a new cadet or candidate to sweep his room or tent, make his bed, bring water, clean his arms, equipments, or accouterments, or perform any other menial service for him, or to assume any constrained position, or to engage in any form of physical exercise; or who shall, with the same intent, invite, order, or compel any new cadet or candidate to eat or drink any article of food, or to take into his mouth any article whatever, or to do for him anything incompatible with the position of a cadet and gentleman; or any cadet whose duty it is to enforce camp, barrack, or mess regulations who shall permit any new cadet or candidate to eat or drink any article of food, or to take into his mouth any article whatever, in violation of said regulations, shall be summarily dismissed from the Military Academy.

SEC. 2. Any cadet found guilty of participating in, or encouraging or countenancing the practice of hazing shall be summarily expelled from the academy and shall not thereafter be reappointed to the Corps of Cadets, or be eligible for appointment as a commissioned officer in the Army or Navy or Marine Corps until two years after the graduation of the class of which he was a member. (Act of Congress, approved March 2, 1901.)

SEC. 3. Hazing under the provision of section 2 of this paragraph is defined to be any of the acts enumerated in section 1 of this paragraph, or any other treatment accorded a candidate or a cadet who has been connected with the Military Academy less than one year of a harassing, tyrannical, abusive, shameful, insulting, or humiliating nature, or that may endanger the physical well-being of such candidate or cadet.

Mr. du PONT. The first section prohibits all conceivable forms of physical annoyance or disturbance of new cadets, both violent and mild, which are enumerated with minute detail, as well as any description of menial service, compulsory or voluntary, and imposes the penalty of summary dismissal on all offenders.

The second section simply recites the act of Congress which I have read and which, as we have seen, requires the summary expulsion from the Military Academy of all offenders.

The third section, after referring to this provision for summary expulsion, officially defines hazing to be "any of the acts enumerated in section 1," which would seem to include every form of annoyance other than facial contortions, jocular remarks, and verbal insults. That these may be covered, the section ends by including in the definition of hazing "any other act of a harassing, tyrannical, abusive, shameful, insulting, or humiliating nature."

From the report accompanying the bill it will be seen, Mr. President, that the authorities of the Military Academy have, in direct contravention of the express terms of the statute, as well as of those of their own regulations, which have the force of law, deliberately recommended the suspension for one year of six cadets found guilty of hazing, and that such recommendation has been approved by the War Department.

This action, Mr. President, is a virtual confession by all concerned of the impossible character of the Draconian statute, with its ancillary rules of equally Draconian severity emanating from the Superintendent of the Military Academy. More than this, it is a complete demonstration of the absolute inefficacy of the measures taken to "prevent the practice of hazing."

Mr. President, General Grant, I believe, has declared that the rigid enforcement of a bad law was the quickest and best method of having it amended or repealed, and the Secretary of War has very wisely observed that it is the certainty and not the severity of punishment which deters offenders.

Let us then amend this Draconian statute, Mr. President, so as to require the immediate expulsion of all cadets who may be guilty of cruel outrage, of brutal violence, or of ungentlemanly conduct to the newcomers, and so as to leave it to the discretion of the military authorities to punish the less grave forms of hazing by suspension or such other penalties as may seem, in their judgment, adequate and appropriate.

Under sane and reasonable regulations rigidly enforced, I am persuaded, Mr. President, that the discipline of the Military Academy will be improved and that hazing at West Point will be better controlled and minimized, if not entirely eliminated.

Mr. DICK. Is any other Senator desirous of discussing the question? [A pause.]

Mr. President, this bill, S. 7486, now offered as an amendment, authorizes the President to reinstate William T. Rossell, jr., and Harry G. Weaver as cadets in the United States Military Academy.

Rossell and Weaver were dismissed from the Military Academy on the 24th of August last in pursuance of orders from the President and Secretary of War. Both were first class men, and Rossell was one of the honor men of his class. The specific charge against them is that of hazing, although the Secretary of War denies that they were expelled for that cause.

The Secretary of War, in his recommendation in the matter, which was approved by the President, said:

> Rossell seems to have been a ringleader in interfering with the plebes, and in at least one instance, and probably more, laid hands upon them, although not violently, and intimated when objection was made that the victim should either submit or fight. This probably brings him directly within the law, and I see no other course than that he should go. Weaver seems to have been not quite so pronounced in his behavior, although he was guilty of practically the same thing as Rossell.
>
> "The act of Congress that forbids hazing and directs regulations to be made by the authorities of the academy does not prescribe what hazing is. This is not a technical term, and we can only ascertain the meaning of the word by reference to standard dictionaries. Webster's International Dictionary defines hazing: 'To harass or annoy by playing abusive or shameful tricks upon; to humiliate by practical jokes—used especially of college students; as the sophomores hazed a freshman.' The Century and Standard dictionaries give practically the same definition.
>
> "Now, none of the acts shown to have been committed by these young men come within this definition of hazing. The evidence shows that while the offenders directed the plebes to 'brace'—that is, stand at attention with their shoulders thrown back, rub buckles, clean guns, bring water from the spring, fall in at the first assembly call, instead of five minutes later at the second call—still none of these acts can hardly be fairly brought within this definition. They all, undoubtedly, were improper interference with the plebes, constituting an assumption of authority over them in direct conflict with the regulations, for which severe punishment should be meted out.
>
> "But the act of Congress which forbids hazing is extremely drastic in character, in that it provides that any cadet found guilty of hazing shall be summarily dismissed from the academy, and, in addition, shall not be reappointed to the corps of cadets or be eligible for appointment as a commissioned officer in the Army and Navy or Marine Corps until two years after the graduation of the class of which he was a member. This being so, I do not feel that it is just to extend the operations of this severe statute by implication, especially in view of the fact that, in my judgment, the offenses of which these young men were undoubtedly guilty can be adequately punished without resorting to the extreme penalty of expulsion. It is the certainty of punishment rather than the severity that deters the commission of offense. At the same time, it should be made very clear to all the young men at the academy that obedience to the regulations imposed and the observance of a proper deportment toward the younger members is exacted.
>
> "I therefore recommend that Cadets Rossell and Weaver be dismissed from the academy."

The act of Congress above referred to which prohibits hazing, was contained in the Military Academy appropriation bill, approved March 2, 1901, and reads as follows:

> *Provided further*, That the Superintendent of the Military Academy shall make such rules, to be approved by the Secretary of War, as will effectually prevent the practice of hazing; and any cadet found guilty of participating in or encouraging or countenancing such practice shall be summarily expelled from the academy and shall not thereafter be reappointed to the corps of cadets or be eligible for appointment as a commissioned officer of the Army or Navy or the Marine Corps until two years after the graduation of the class of which he was a member. (31 Stat. L., 911.)

The history of this enactment is as follows: A special House committee was appointed by a resolution passed December 11, 1900, to investigate hazing at West Point, and spent three weeks taking testimony. The committee submitted a unanimous report, which dealt at length with conditions then prevailing at the academy, and reported a bill which it asked to have enacted into law, believing its passage would greatly tend to the maintenance of discipline there and that its passage was necessary for that purpose. The proposed bill was not passed, but the above proviso was enacted.

Subsequent events only strengthened my firm belief that the bill proposed by that special House committee should have been passed. I have no feeling whatever against these two young men whose restoration to the Military Academy is provided for by this bill. If only their personal fortunes were involved, I would not withhold my support for an instant. Much larger interests, however, are at stake. The discipline of the entire corps of cadets at West Point is a much more important question, and the officers responsible for the instruction and discipline of the institution are unalterably opposed to the restoration. The law itself expressly prohibits the reappointment to the corps of any cadet found guilty of participating in or encouraging or countenancing the practice of hazing. The Secretary of War, however, quotes the common dictionary definition of hazing and concludes that none of the offenses charged against these young men came under that head. The worst practice charged against them, he says, is that the offenders directed the plebes to "brace." On the subject of "bracing" I ask to quote the following extract from the report of the special House committee above referred to which investigated hazing at West Point:

> The committee substantially confined its inquiries to the time since June, 1897, when the present senior or first class entered the academy. During all of this period new cadets have been placed in barracks in June and have remained there until July, when they have gone into camp and remained there until late in August, when they returned to barracks. While in barracks before going into camp they have been denominated by the upper class men as "beasts" and their quarters called "beast barracks." After the new cadets have moved from barracks to camp they have been styled "plebeians" or "plebes," and this has continued until received into full fellowship at the end of the first year. While the fourth class men have been in barracks before camp they have been instructed by the upper class men officially in charge of them that they must always obey all orders given them by upper class men. The upper class men at the academy are all substantially on a social equality, but a great gulf divides them from the fourth class.
>
> The upper class men have gradually evolved an entire code of unwritten laws governing their relations with fourth class men, as well as the whole course of conduct which should be pursued by the latter. Under this code no friendships are formed between the upper class men and the lower class men; they have no social intercourse or relations. Except where the parties have been acquainted before entering the academy, the upper class man treats the fourth class man as unknown, a stranger, and an inferior. The fourth class man has no right to speak socially to the upper class man, and when he speaks to him on business he addresses him as "mister" or "sir." No fourth class man should gaze, stare, or even look squarely at an upper class man, but drop the eyes when in one's presence, and failure to do so is a punishable offense.
>
> It is the duty of a fourth class man when in the presence of an upper class man to stand at attention, as if in the presence of a superior officer. A fourth class man should be sober and dignified, as becomes one in training for the grave duties of an army officer, and he must at all times abstain from laughing or smiling, upon the one hand, or looking sullen, upon the other. The record shows that where a cadet has looked sullen upon being hazed he has been called out, and if he smiled he has been punished.
>
> The fourth class man must obey all orders of an upper class man and pay him the same respect due from an upper class man to the officers of the academy. After the fourth class men go into camp each is assigned, by lot or otherwise, to some upper class man as special-duty man, and as such must discharge the duties of a body and tent servant. He must sweep his superior's tent, put up and make down his bed, adjust the flaps of his tent, carry water; clean braces, brasses, breastplate, and other trimmings, guns, bayonets, and swords; clean and care for his clothes, taking out dirty collars and cuffs and putting in clean ones; take dirty clothes to the laundry and bring clean ones back, make out hop cards, copy reports, and discharge other similar duties.
>
> It is but justice to say that while under the cadet code a special-duty man is bound to do all these things, many of the upper class men fail to require that they all be performed; but, so far as your committee have discovered, all upper class men have required the performance of some of them. This special duty continues during camp. The upper class men, profiting no doubt by what they have learned from their predecessors and the aid of their own fertile ingenuity, have resorted to more than 100 distinct methods of annoying and harassing fourth class men. Your committee will not attempt to name or describe them all, but will name a number, describing them briefly when the name

itself does not sufficiently do so. They are divided into three general classes:

First. Things done professedly for the good of fourth class men or of the service.

Second. Things done to punish fourth class men for violations of the upper class code.

Third. Things done apparently without purpose, except to annoy, or for the mere amusement of upper class men.

Chief among the first of these classes is—

Bracing.—This consists in requiring the fourth class man to throw his shoulders back until the blades meet, draw his chin in, to a wholly unnatural degree, draw his abdomen up, and so walk that his toes touch the ground before his heels. It is claimed this is done to give a military carriage; but it has the contrary effect. It is such an exaggeration of the attitude of a soldier and is so irksome that when relieved from constraint the inevitable tendency is to more than normal relaxation and a slouchy carriage. The upper class man has required the fourth class man to brace at all times on the company streets, in camp, and frequently on other occasions, and this has on more than one occasion resulted in the victim fainting. Some doubt is cast upon the absolute belief upon the part of cadets that bracing is necessary to a good military bearing, and that it is their duty to practice it to attain that end, as they never brace an upper class man, no matter how slouchy he may be. Bracing is prohibited at the academy and has been frequently severely punished, but has been constantly and defiantly persisted in up to the time of the hearing by your committee.

"Bracing" was at that time clearly understood to be included in the category of hazing; and any act done to harass or annoy fourth class men, which sometimes results in the victim fainting, is clearly entitled to be classed under that head.

At the time the special House committee concluded the taking of testimony at West Point the following paper was presented, signed by the presidents of the four academic classes, promising on behalf of the cadets then at the academy to discontinue hazing. That communication is as follows:

WEST POINT, N. Y., *January 19, 1901.*

SIR: Having become cognizant of the manner in which the system of hazing as practiced at the Military Academy is regarded by the people of the United States, we, the cadets of the United States Military Academy, while maintaining that we have pursued our system from the best motives, yet realizing that the deliberate judgment of the people should, in a country like ours, be above all other considerations, do now reaffirm our former act abolishing the exercising of the fourth class men, and do further agree to discontinue hazing—the requiring of fourth class men to eat anything against their desire and the practice of "calling out" fourth class men by class action—and that we will not devise other similar practices to replace those abandoned.

Respectfully submitted.

For the first class:

W. REESE BETTISON,
President Class 1901.

For the second class:

B. O. MAHAFFEY,
President Class 1902.

For the third class:

QUINN GRAY,
President Class 1903.

For the fourth class:

JOSEPH A. ATKINS,
Representing Class 1904.

The SUPERINTENDENT UNITED STATES MILITARY ACADEMY.

The House committee expressed its belief that the cadets then in the academy would live up to these resolutions, observing at the same time, though, that there was no express promise to cease "bracing," although the communication expressly promised to abolish the exercising of fourth-class men, under which head "bracing" clearly comes. The four classes then in the academy have long since graduated and four more classes have come and gone.

As we stated in that House committee report, the ingenuity of cadets in inventing new forms of hazing is so great that it is impossible to name and describe them all in a statute. The present act on the statute books covering this point is, however, broad enough and was intended to cover and prevent all forms of hazing; and while these young men may not have been the worst offenders at the time of the occurrences which led to their dismissal, and it is possible the main ringleaders were never discovered, yet there is no question at all that they were engaged in these practices for which they were dismissed and that the good of the institution and the maintenance of discipline there demand carrying out the provisions and intent of the law.

If cadets who have been dismissed for these practices can come to Congress and be reinstated in the academy in defiance of the opposition of the superintendent, then discipline will be seriously impaired and the corps of cadets will be encouraged in a feeling, apt to become too prevalent, that the Military Academy is maintained for their special benefit, and that they, and not the army officers placed over them, control the conduct of the Military Academy; and it appears necessary that occasionally some drastic measure be taken to impress these young gentlemen with their real relation to the institution where the Government is educating and training them to be officers in the army of the United States.

Therefore the dismissal of these cadets was not only justified, but was demanded by the law and the circumstances, and it would be a serious mistake to reverse that action by making possible their reappointment. Experience shows that even the loss of a year's time at the Military Academy does not always make these young men mend their ways. A cadet was in August, 1898, convicted by general court-martial of harassing and annoying fourth class men and was sentenced to suspension, without pay, for one year. The day he returned he required a fourth class man to stand on his head and recite a humiliating verse, and upon the recommendation of the superintendent he was, with the approval of the Secretary of War, summarily dismissed.

Other conditions found to exist at the academy eight years ago, and which continue, were complained of by this special House committee. Quoting from that report:

There are 71 United States Army officers at the academy, including the superintendent—10 tactical officers and about 60 instructors—making about 1 officer to every 6 cadets. This would appear to be a sufficient number of officers to enforce discipline, but unfortunately in practice no one but the superintendent and tactical officers is charged with any duties in relation to discipline. Section 163 of the regulations, as established by the War Department, provides that each of the academic officers who knows of any violation of discipline shall report it. This regulation has become obsolete; but it was always so construed as to be of no value. Under the construction given it, if an academic officer saw a cadet in such condition as to clearly indicate he had been in a fight it was not his duty to report it. If he saw a fight he should so report, but if he saw the parties returning from the field of battle, bearing every evidence that they had been in a fight, he should not report it. This refined distinction applied to all the offenses, and was based on the thought that reports of offenses should not be made on suspicion, but on knowledge, ignoring the fact that evidences of breaches of discipline could be reported as distinct from charges. The result is that 11 persons are solely charged with maintaining discipline, in a reservation of more than 2,000 acres and more than 2 miles long, over about 450 cadets.

By the first and second sections of a bill introduced and reported herewith this fault is thought to be in a measure cured by requiring every officer at the academy to report every matter coming to his attention tending to indicate a breach of discipline, and requiring the superintendent to investigate all matters so reported.

This will not alone be sufficient to furnish adequate surveillance. The academy has two mess halls, and there is only one army officer present to watch the two, with between 400 and 500 cadets. In camp there is no adequate provision for surveillance by army officers, and it is almost wholly under the care of cadet officers and sentinels.

Complaint has been made before your committee that cadet officers are unfair in reporting fourth class men for demerits. It is not claimed that this unfairness consists in so reporting fourth class men when not guilty; but it has been claimed that cadet officers are inclined to more rigidly report odious fourth class men than others, and a few of the upper class men, when upon the witness stand, have avowed that they would do this. The majority, however, deny that they would be guilty of any such injustice. Your committee feel that if army officers were more directly in charge of the cadets and brought into more close contact with them that the danger of fourth class men being thus unjustly reported for demerits would be reduced. Aside from this, however, your committee are convinced that the presence of more army officers in the camp at all hours of the day and night is absolutely essential to the thorough maintenance of discipline.

Your committee also believe that if more army officers were in and about the camp it would lead to more intimate association and higher mutual respect and regard, and thus enable the officers more effectually to impress upon the cadets the degrading character of the offenses sought to be suppressed and the better purposes to which cadets should devote themselves.

Again, the close association of selected and experienced army officers with the cadets would greatly aid in the education of the latter and the improvement of their military character, instilling in their minds a high conception of the soldier's duty. At the close of academic studies in June the professors and instructors have leave of absence until the resumption of such studies in the following September, and so it is that throughout the camp and during the time when the most difficulty is experienced in maintaining discipline the reservation is almost entirely stripped of officers.

This should be remedied either by shortening the leave of the professors and instructors and requiring that only a part have leave at a time or by the assignment of such other army officers to the academy during that period as will effectually administer proper discipline.

It is to my mind clearly a mistake to leave the maintenance of discipline of these cadets when in their summer camp to the cadet officers. There should be army officers in attendance in sufficient numbers to see that the proper discipline is maintained; that the rules of the academy and of Congress are not violated; and that all improper practicing of the new men be stopped. Until some provision of this kind is made, it is more than likely that the country will continue to be treated at more or less frequent intervals with eruptions such as occurred there last summer and at previous times in the history of the academy.

As I said before, so far as these young men are concerned personally, I would be pleased to see them restored to the academy did I not believe that the best good of the institution and the maintenance of discipline there require that there be no relaxation of the penalty imposed for violation of the rules, regulations, and laws, with which they were thoroughly well acquainted.

Mr. President, in my judgment, those most to be consulted and whose judgment is most to be considered in disposing of the question of hazing at the United States Military Academy are the officers who are in charge and upon whom rests the responsibility of the discipline of that institution. All military men will agree that the basis for all discipline, whether in mili-

tary academies or in military organizations, is reverence for law and respect for authority; and if this sentiment is to pervade the army, the first place to teach it and the first place to enforce it is in the Military Academy of the United States, where we are educating men to be officers and gentlemen.

Some years ago, while I was a Member of the House of Representatives, a scandal occurred at the Military Academy, due to hazing. It was my fortune or misfortune to be placed upon the special committee previously mentioned, and together with my colleagues we made a searching and thorough investigation of the conditions which obtained at the academy at that time. I confess that when we went at the task my associates upon that committee shared with me the general impression that innocent hazing in an institution of learning, even at a military academy, was not a vicious or altogether bad practice. But at the end of a month's thorough search the committee were so thoroughly convinced—and I may say in passing that one of the members of that committee was a graduate of the institution—that our report and recommendations as to the legislation which now stands upon the statute books was without dissent, all agreeing that hazing destroyed discipline at the academy and that it worked harm in the army itself. The evil then does not cease in the classes at West Point. These vicious practices may go still further and work incalculable harm at a time of great emergency.

But, sir, in the inquiries made we ascertained, first, that a code had obtained there with reference to hazing, and so secretly was it carried on that even the officers in charge were not aware of its extent or its viciousness. More than a hundred methods of annoyance and harassment had been perpetrated upon the new cadets, and so thoroughly had it taken hold upon the older cadets of the institution that they came to think that neither the officers in charge nor the Congress had any right to interfere with their traditional rights with respect to this long-time practice.

There appeared before the committee a young man with a broken jaw, who insisted that in a hazing episode his jaw had been broken by his best friend. There were numerous cases where young men were hazed into convulsions. Of some others it was thought they would never recover their full strength and health; and in the particular case that we were called upon to inquire into, where the young man had died subsequent to his hazing and his leaving the academy, it was not possible for the committee to determine whether his death resulted from hazing or possibly from some other cause. But, sir, we found that it resulted in practices so humiliating, so distasteful, so harmful, that scores of cadets retired from the academy upon one excuse or another rather than to endure the persecution that had been put upon them by their elders.

The law was passed. Within a year or two some objections were made, as are now made, to the rigidity of its provisions. A consultation was had at that time with General Mills, then Superintendent of the Military Academy, inviting his attention to the proposed change, believing that if discipline was to be improved by a modification of the law, Congress ought to listen to his recommendations. But as superintendent of the academy, who had then served several years, and who had been present when this investigation or inquiry was made, he said the law worked so well that he would hesitate to recommend a single change in any of its provisions.

As to this particular case now under consideration, I have seen these cadets who were dismissed, and agree with the Secretary of War that they are young gentlemen of merit, capacity, and soldierly appearance, but can not agree with the Secretary as to some of his conclusions. In this matter it is not the men who offended with whom we are expected to deal, so much as the discipline at the academy, and for the complete elimination of hazing at that institution. These are the things for Senators to consider. In my judgment, supported by the officers of the academy in the correspondence now before the Senate, the restoration of the cadets dismissed for hazing will invite a return of these vicious practices and be destructive of discipline at the academy, which carried to its logical conclusion can bring no other result than destruction of discipline to the army itself.

These men had served three years, were within a few months of graduation, and the hearings show that all were perfectly familiar with the laws and regulations regarding hazing. Consequently their disobedience was not only a violation of the rules of the academy and of the regulations of the army, but an open defiance of the law of Congress.

One of the considerations for us to take into account in disposing of this matter is, Shall we permit cadets, being educated under the bounty of the Government for high positions in the public service, to defy with impunity the laws of Congress, and, defying law, to jeopardize authority in an institution where above all else the most important factor of their education is respect for law and duly constituted authority?

When this matter first came to the attention of the authorities it had been so quietly and secretly conducted that not an officer in the institution knew about it. The board was not created for the purpose of inquiring into any special case which had been called to its attention, but upon inquiry by the members of the board phases of hazing were discovered, and upon very careful inquiry it was found to have again crept into the institution to a very considerable degree, so much so that regretfully and reluctantly these men were dismissed. Under all the pressure that could be brought to bear by those higher in authority the superintendent and his subordinate officers of the academy, to their credit be it said, have protested against the restoration of these cadets until such time as the law itself had been fully satisfied, the course duly taken fully vindicated, and discipline at the academy safeguarded.

I regret that the Committee on Military Affairs reported favorably this bill to restore these cadets when it was introduced without having first called before it the officers of the institution or having had submitted to it the correspondence that passed between the War Department and the President and the academy officials.

In my judgment with such information the committee would have withheld a favorable report. In my judgment this correspondence would have estopped the Committee on Military Affairs from making the report now before the Senate, and because of the protest which those charged with the discipline of the institution have made—those upon whom we place the responsibility for the conduct of the academy in the training of these cadets, and upon whom so much of their future conduct depends—Mr. President, I object to favorable action, even though the proposed legislation in the form offered were in order.

The Secretary of War, seeking for some excuse for the restoration of these young men, who impressed him so favorably personally, searches for definitions of "hazing" in various dictionaries. I will not attempt to read them. They are in the report before the committee. The Secretary would have done better if he had sought for the definition as framed under the law of Congress by the Academy Board at West Point, and if under that law and those definitions he had arrived at his conclusion, I am satisfied he, too, would have said that under the law these men could not be restored.

I am not finding fault with his recommendations. That is entirely his official responsibility. But I can not share, as a Senator, in doing anything looking to the encouragement of hazing on the one side or the destruction of discipline at the military institutions of our country on the other.

It will not do to say that a military institution is upon the same basis as a civil educational institution. It is entirely different in character. Its chiefest instruction is discipline—respect for authority and enforcement of law—and where anything else is permitted, much less encouraged, it goes to final indifference and the possible destruction of law and order in the Government they are expected to serve.

These cadets are not boys. They are considered as men. By an opinion of the Attorney-General in 1824, they were considered officers of the army. It is no part of their business, certainly no part of their instruction, to carry on affairs of hazing, humiliating and insulting and punishing those whom they term their "inferiors" because of their shorter service in the academy. Nor am I putting the blame—I am not willing to put all the blame—on what we term the "older classmen" at the academy.

When the House committee made its recommendations, among the things suggested was that at the summer camp, where nearly all of this misconduct is perpetrated, in place of six or eight or ten tactical officers in charge of the camps, while the other sixty or seventy instructors are scattered over the country taking their summer vacations, a sufficient number of officers ought to be in charge so as to maintain discipline in every company and throughout the camp and compel complete obedience to the rules and regulations on the part of every cadet and an entire absence of the sort of persecution that has at times obtained. Plenty of officers at the camp would enforce proper respect and conduct.

Mr. President, just one word in conclusion, as I do not care to detain the Senate too long with a discussion which might cover hours of time, if the time were ours to dispose of, for if there were time I should like to read from the regulations which were made by the authorities at the Military Academy dealing with this subject. I should like to read extracts from an ad-

dress delivered by General Schofield, when he was superintendent of the Military Academy at West Point. I should like to read a few extracts from the report of the House committee when it made an investigation in 1901. But I will satisfy myself by reading a letter from Colonel Scott, the superintendent of the academy, as a last and final appeal in favor of sustaining the course of himself and associates in their efforts and endeavors to enforce the academy rules and regulations and the laws of Congress dealing with this unjust practice. This is an indorsement upon the bill that was referred to the superintendent for his comment. He says:

[Received back, A. G. O., December 20, 1908.]

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., December 19, 1908.

Respectfully returned to The Adjutant-General, United States Army, War Department, Washington, D. C.

The subject of hazing has always been a most difficult one and productive of much trouble in the past. Its consequences are not to be at all compared with similar acts committed in a civilian college or university. The records show that the superintendents for more than forty years have endeavored in vain to completely abolish it. A few years ago it brought about a congressional investigation and a special law against it. This caused a cessation for a time, but it is always liable to crop out suddenly and should be kept down with a strong hand, and the authorities here should be supported by the higher authorities, or it will work great damage to the discipline and good name of the Military Academy. It is against the sentiment of the American people, whose school this is, and who have forbidden it through their Congress by a special act.

The dismissal of these cadets was recommended regretfully after an investigation by a board of officers which gave the subject the most careful consideration. The cadets were well aware of the consequences of their acts; they had had the benefit of three years' instructions and were within a year of their graduation, when, if ever, they should have attained sufficient dignity and sense of responsibility to their Government to prevent them from such acts; and as much as the consequences to the cadets themselves are regretted, it is impossible to recommend any action that will permit the cadets of West Point to believe that the acts of Congress do not mean what they purport and can be violated with impunity.

H. L. SCOTT,
Colonel, U. S. Army, Superintendent.

[Third indorsement.]

To the Chief of Staff.

F. C. A.

The A. G. O., *December 21, 1908.*

Mr. President, I ask permission to insert in my remarks certain data important to the discussion.

The VICE-PRESIDENT. Without objection, permission is granted.

The matter referred to is as follows:

[House of Representatives. Report No. 2768. Fifty-sixth Congress, second session.]

INVESTIGATION OF HAZING AT THE UNITED STATES MILITARY ACADEMY.

Mr. DICK, from the special committee appointed under House resolution 307, passed December 11, 1900, providing, among other things, for an investigation of hazing at the United States Military Academy, at West Point, in the State of New York, submits the following unanimous report to accompany H. R. 14127.

The committee began the taking of testimony at Bristol, Pa., on January, 4, 1901, and the hearings continued at Bristol, Philadelphia, West Point, and Washington until January 24, 1901.

The committee substantially confined its inquiries to the time since June, 1897, when the present senior or first class entered the academy. During all of this period new cadets have been placed in barracks in June and have remained there until July, when they have gone into camp and remained there until late in August, when they returned to barracks. While in barracks before going into camp they have been denominated by the upper class men as "beasts" and their quarters called "beast barracks." After the new cadets have moved from barracks to camp they have been styled "plebeians," or "plebes," and this has continued until received into full fellowship at the end of the first year. While the fourth class men have been in barracks before camp they have been instructed by the upper class men officially in charge of them that they must always obey all orders given them by upper class men. The upper class men at the academy are all substantially on a social equality, but a great gulf divides them from the fourth class.

The upper class men have gradually evolved an entire code of unwritten laws governing their relations with fourth class men, as well as the whole course of conduct which should be pursued by the latter. Under this code no friendships are formed between the upper class men and the lower class men; they have no social intercourse or relations. Except where the parties have been acquainted before entering the academy, the upper class man treats the fourth class man as an unknown, a stranger, and an inferior. The fourth class man has no right to speak socially to the upper class man, and when he speaks to him on business he addresses him as "mister" or "sir." No fourth class man should gaze, stare, or even look squarely at an upper class man, but drop the eyes when in one's presence, and failure to do so is a punishable offense.

It is the duty of a fourth class man when in the presence of an upper class man to stand at attention, as if in the presence of a superior officer. A fourth class man should be sober and dignified, as becomes one in training for the grave duties of an army officer, and he must at all times abstain from laughing or smiling, upon the one hand, or looking sullen, upon the other. The record shows that where a cadet has looked sullen upon being hazed he has been called out, and if he smiled he has been punished.

The fourth class man must obey all orders of an upper class man and pay him the same respect due from an upper class man to the officers of the academy. After the fourth class men go into camp each is assigned, by lot or otherwise, to some upper class man as special duty man, and as such must discharge the duties of a body and tent servant. He must sweep his superior's tent, put up and take down his bed, adjust the flaps of his tent, carry water, clean braces, brasses, breastplate, and other trimmings, guns, bayonets, and swords, clean and care for his clothes, taking out dirty collars and cuffs and putting in clean ones, take dirty clothes to the laundry and bring clean ones back, make out hop cards, copy reports, and discharge other similar duties.

It is but justice to say that while under the cadet code a special-duty man is bound to do all these things, many of the upper class men fail to require that they all be performed; but so far as your committee have discovered, all upper class men have required the performance of some of them. This special duty continues during camp. The upper class men, profiting, no doubt, by what they have learned from their predecessors and the aid of their own fertile ingenuity, have resorted to more than one hundred distinct methods of annoying and harassing fourth class men. Your committee will not attempt to name or describe them all, but will name a number, describing them briefly when the name itself does not sufficiently do so. They are divided into three general classes:

First. Things done professedly for the good of fourth class men or of the service.

Second. Things done to punish fourth class men for violations of the upper class code.

Third. Things done apparently without purpose, except to annoy, or for the mere amusement of upper class men.

Chief among the first of these classes is—

Bracing.—This consists in requiring the fourth class man to throw his shoulders back until the blades meet, draw his chin in to a wholly unnatural degree, draw his abdomen up, and so walk that his toes touch the ground before his heels. It is claimed this is done to give a military carriage, but it has the contrary effect. It is such an exaggeration of the attitude of a soldier and is so irksome that when relieved from constraint the inevitable tendency is to more than normal relaxation and a slouchy carriage. The upper class men have required the fourth class man to brace at all times, on the company streets, in camp, and frequently on other occasions, and this has on more than one occasion resulted in the victim fainting. Some doubt is cast upon the absolute belief upon the part of cadets that bracing is necessary to a good military bearing and that it is their duty to practice it to attain that end, as they never brace an upper class man, no matter how slouchy he may be. Bracing is prohibited at the academy and has been frequently severely punished, but has been constantly and defiantly persisted in up to the time of the hearing by your committee.

Under the like claim as to their motives, the upper class men have deprived fourth class men of the privileges accorded to them by the authorities, such as having Saturday afternoon leave, and have ordered fourth class men to abstain from reading and letter writing except on Sunday.

The following are some of the second class of annoyances which have been imposed on fourth class men:

Eagling.—This consists in the fourth class man standing on his toes with his arms extended, dropping down to a sitting posture, rising part way, waving his arms like wings, again depressing his body to a sitting posture, rising in like manner, and continuing this during the period or for the number of times required. A fourth class man has frequently been required to eagle 100 and 200 times, and in some cases 300 to 400 times, and in at least one case above 600 times.

Wooden willying.—This consists in a fourth class man taking the regulation gun and drawing it up to the position of "fire;" then dropping it to the position of "ready," and continuing this for the period or number of times required. This has frequently been required 100 to 200 times.

Doing footballs.—This consists in lying on the back and without bending the knees drawing the legs up until they are at right angles with the body and then dropping them to the earth, continuing this for such period or number of times as may be required. A lower class man has frequently been required to do this from 75 to 100 times.

Choo-chooing.—This consists in lying on the back and working both legs and arms in imitation of the motion of the wheels of a locomotive.

Dipping.—This consists in placing one's body face down with his hands and toes on the ground or with the toes on the ground and the hands on a bucket, box, or the like, holding the body as straight as possible and raising and lowering it by the use of the arms alone.

Taking plebe's rest.—This consists in standing on the toe of one foot—say, the left—and raising the right leg up, resting the right elbow on the knee and the chin in the right hand.

Stretching.—This consists in hanging by the hands from a bar or rail on the canvas shelf in the tent known as the stretcher, with the legs bent at the knees, so as to be sure and have no support from below. A fourth class man is frequently required to hang this way until he drops from exhaustion.

Holding out gun.—This consists in holding out both arms in front and at right angles with the body and supporting upon the hands a regulation gun.

Swimming to Newburg.—This consists in lying face down and working the hands and feet as if swimming.

Sitting on bayonet.—This consists in assuming while on one's feet a sitting posture, with the bayonet standing point up under him, so that if through weariness he allows his body to sink down, he will be punctured with the bayonet.

Holding out Indian clubs.

Holding out dumb-bells.

Holding out the cleaning box.

Sweating.—This consists in putting a fourth class man in a tent with sides and back down and making him put on his rain coat, and frequently wrap himself in the bedclothing, and remain there any time required up to about half an hour. This is done in July and August and has more than once resulted in the fourth class man fainting.

Soirées.—It has been a common practice to call several fourth class men into a tent at one time between supper and tattoo and put them through numerous forms of exercising, usually making them eagle, wooden willie, do footballs, and hang on the stretcher. These meetings have been known as "soirées."

Requiring the taking of hot sauce.—For a long time there has been kept at the academy in connection with the mess what is known as "tropical sauce," which is similar to tabasco sauce. It is commonly known at the academy as "hell sauce." Sometimes it is spoken of as "pepper sauce" in the evidence, but it is much stronger than ordinary pepper sauce. It contains a large amount of oil of capsicum and is intended for use in soup and other foods, and by reason of its highly irritant character is not fit for use by itself when undiluted. It has with great frequency been administered as a punishment to fourth class men at mess, both while in camp and in barracks, and at some times at places other than the mess, in doses usually from 2 to 5 drops, but quite often in doses of 15 drops, and in some cases between 1 and 2 teaspoonfuls.

Eating quinine.—Cadets have been required to chew up as high as four quinine pills at a time, and after thoroughly masticating, swallow them.

The following are some of the third class of annoyances which have been imposed:

Qualifying.—This consists in requiring a fourth class man to eat at one sitting an extraordinary amount of some otherwise unobjectionable article, such as molasses, prunes, peach pie, or cabbage. In qualifying on molasses, a cadet must usually eat at one time a soup plate full. In qualifying on prunes, he has been made to eat as high as 130. A number of cadets have become nauseated by this process.

Feet inspection.—This consists in going to a fourth class man's bed with a candle and pulling the covers off his feet and inspecting them, and while doing so intentionally, but apparently by accident, dropping hot grease from the candle on the bare feet.

Dragging a man out of bed.—This is usually done by taking hold of the bed and dragging it and its occupant into the company street; but it has been done by taking the victim by the heels and dragging him out.

Throwing sentinel in the ditch while on duty.

Sliding on soaped floor.—This is done in the bathroom, and the fourth class man is made while naked to slide over the floor after it has been soaped.

Standing on head in bathtub filled with water.—In this the fourth class man is usually required, while standing as indicated, to recite something, and as a result the water runs into his nose and mouth and strangles him.

Standing on head in tent between tattoo and taps.—Whenever an upper class man puts his foot into a fourth class man's tent between tattoo and taps the lower class man must at once stand on his head; and some upper class men require fourth class men, while in this position, to recite something and make a left-hand salute with the right foot. Of late, to avoid being caught, it has been the practice of the upper class men from in or across the company street to say, "My foot is in your tent," and thereupon the fourth-class man must act as if the foot were in fact there.

Standing orders.—When these orders are given, a fourth class man is required to stand up the entire day except while at mess and sink.

Pillow fights.—These, harmless in themselves, are a serious wrong, because the upper class men order the fourth class men to engage in them at night, and then the latter are charged with demerits for making a disturbance in camp and thus lose standing in their class.

Cold baths in the company street.—A fourth class man is required to entirely strip himself and run down the company street while parties on the sides throw cold water on him. The indecency of this performance needs no comment.

Many of the things done by the upper class men are boyish pranks and are known as "funny formations," but even these are frequently conducted in such a way as to outrage the noblest feelings of the heart.

Philip H. Sheridan, jr., was compelled to ride a broomstick up and down the company street, saying, "Turn, boys, turn; we are going back," in mockery of his illustrious father's achievement at Winchester.

Your committee feel that a sufficient number of the methods used to harass and annoy have been named and explained to enable the House to understand their general nature. As this system grew and became more and more oppressive it became necessary to have some effective means to coerce obedience to these unlawful behests of upper class men, and to meet this demand a system of fighting has gradually grown up which is shocking in its character. Each of the upper classes has a regular fighting committee, and whenever it is reported, for example, to the president of the third class that some fourth class man has refused to obey any of the unlawful and illegal orders of an upper class man, or has in some other important respect violated the upper class code, all of which, it must be borne in mind, is in direct conflict with the regulations and rules of the academy, the president calls his fighting committee together, and, if it thinks the charge true, it orders the fourth class man called out and names the man who is to whip him.

There is usually an appearance of fairness about this in that an effort is made to have the combatants as nearly the same weight, height, and length of arm as possible, and the upper class man selected can not weigh above 10 pounds more than the lower-class man and must not greatly exceed him in height or length of arm. There is no fairness in it, in fact, however, as most of these fights take place while in camp and when the fourth class man has been in camp but a few days and during that time has been drilling four hours a day with a regulation and is usually so exhausted as to be weaker than when he came to the academy. The evidence shows that many of the lower class men leave their first camp thinner and lighter than they entered. On the other hand, the upper class man is hardened by more than a year's careful athletic training.

While upper class cadets insist that these fights are fair, they substantially all agree that the object of these fights is to punish the lower class man, and the upper class man who is to fight is selected with the intention and purpose of having him whip the fourth class man. A conclusive proof of the unfairness and inequality of these fights is found in the fact that so far as appears in more than forty conducted since June, 1897, the fourth class men have won four and two have been declared draws. It is perhaps fair to say that the fact that upper class men win an overwhelming majority of these fights may not be due wholly to superior strength or talent, but in part to the fact that the upper class men have greater familiarity with what is expected in such a contest, have more class and personal pride, and fight with more vigor and tenacity.

Some of the witnesses testified that if a fourth class man has conscientious convictions against fighting he is not bound to fight if he, in general, lives up to the like high ideal. This is largely theoretical, however, as the evidence shows no case of a fourth class man asking to be excused on this ground. There is also testimony that in one case after a fourth class man had fought more than once a chivalric upper class man announced that he had fought enough and if there were to be any more fights he would take the lower-class man's place. Unless excused because of his conscientious convictions, or because some upper class man has thus volunteered to fight his battles for him, a fourth class man is not at liberty to decline a challenge to fight sent by an upper class fighting committee, but must accept or be cut by the entire school, both the upper class men and his own. When the time for the fight arrives the parties retire to the appointed place, which, while in camp, is usually Fort Putnam, Fort Clinton, or Battery Knox, but at all other times at some room in the barracks or gymnasium. Each combatant is accompanied by two seconds from his own class, supplied with towels, sponges, and the like. At the fights, aside from the principals and their seconds, are the referee, timekeeper, and sentinels—usually four. All of these except the fourth class man and his two seconds are upper class men.

We do not find, however, that there has ever been any unfairness upon the part of the referee as against the fourth class man in his rulings. The sentinels are so posted as to preclude all possibility of anyone catching the parties in the act of fighting. When the fight takes place out of doors, a ring about 24 feet in diameter is marked off, but in barracks and in the gymnasium the ring is usually, of necessity, smaller. Each of the combatants strips off everything but a pair of trunks and a pair of rubber-soled shoes, and the fight commences with bare fists, and is conducted substantially according to Marquis of Queensberry rules, with two-minute rounds and one-minute rests. In one respect the fight is governed by West Point, as distinguished from Marquis of Queensberry rules. A fight to a finish has a more vicious meaning here than elsewhere. Theoretically when a man is clearly whipped his seconds may throw up the fight. The record shows, however, but one instance of this being attempted, and in that the principal was the upper class man in the fight and refused to abide by his seconds' advice. To show his grit and courage the defeated party, although helpless so far as fighting is concerned, must nominally go on so long as by any possibility he can come back to the ring, even though he is incapable of doing anything but take punishment. Many of the witnesses say that he must fight until knocked insensible; others say that of course he would be excused when physically incapable of coming up again.

The character of the fights thus indulged, not occasionally, but more than 40 times since June, 1897, is illustrated by the fact that there is evidence that in almost all instances the defeated party has had to go to the hospital, and in about half the cases the successful one has likewise gone.

The system is very well illustrated by the history of the Keller-Booz fight, hereafter fully described. This system of fighting has been the chief instrumentality for the maintenance of the authority of the upper class men over fourth class men. Presumably the fourth class men would refuse to be hazed beyond endurance but for the fact that their alternative is to submit to fight, with every prospect of defeat, or be cut by all the cadets at the academy.

In the opinion of this committee, when this system of fighting has been destroyed the worst forms of hazing must die with it. Such fights as these are felonies in many of the States. They have gone on for years at West Point, and no one has been punished during the period covered by the investigations by your committee, and the time has now arrived when Congress must decide whether the fights, substantially everywhere else treated as high crimes, shall continue to go on at the military reservation at West Point.

It is, of course, impossible to determine with mathematical accuracy just what has been the effect of this long course of cruel and annoying treatment upon fourth class men. We do know that several, notably Cadets MacArthur, Breth, and Burton, were hazed into convulsions; that many more, including Cadets Hascall, Kensel, McGinnis, and Pegram, were hazed until they fainted. Cadet van Natta, and perhaps others, have been hazed until sick. Cadets Booz and Breth were both treated with great severity, and were never well after they left the academy, and each died in his young manhood before the graduation of his class; but we can not affirmatively find that their death was caused by their treatment.

The foregoing description of the system of hazings and customary treatment of new cadets at the academy will aid in the understanding of the history of the late Oscar L. Booz, his conduct and treatment at the academy, the manner in which the grave newspaper charge came to be made that his death resulted from hazing whilst a cadet, and the extent to which there is foundation for such charge.

Oscar L. Booz, of Bristol, Pa., nominated as alternate, satisfactorily passed the preliminary physical and mental examinations for admission to the academy at Fort McHenry, Md., in March, 1898, and (the person nominated for cadet having failed in such examinations) was admitted to the Academy June 20, 1898, aged 18 years 11 months.

He had been graduated from the Bristol Public High School in 1896, was a student in Rittenhouse Academy, a private school in Philadelphia, during the succeeding academic year, and took the special course preparatory to admission to the United States Military Academy at St. Luke's Academy, Bustleton, Philadelphia, Pa., during the fall, winter, and part of spring of 1897-98, receiving the customary certificate or diploma for completing the course. In all this school experience his course was steadily progressive, and he showed uniform and marked proficiency in all branches studied, which included those he took up after returning to barracks at the Military Academy.

His physical condition before entering the academy was supposedly good, although he was not looked upon as particularly robust or much given to athletics. A preliminary to his nomination as alternate cadet was an examination in the summer of 1897 by Doctor Martin, who reported:

"He is organically sound, but * * * his chest muscles are not as well developed as could be desired, owing largely to little or no physical training. His expansion is fair, but can be improved by exercise. I have told him this and recommended a systematic course to be pursued, and no doubt by spring he will be in good condition and in a way to pass a physical examination."

Just what course in athletics was taken at St. Luke's the principal could not state, nor did he know that Booz needed special training.

From April 23 to May 14, 1898, he was under treatment of Doctor Martin for acute pharyngitis, and, although supposedly cured at the last date, he did not return to St. Luke's for a final two weeks' review of studies, writing that he felt that rest would be more beneficial to him.

His moral character was excellent; of gentle manner, he was unfailing in fidelity to truth and duty; of sincere piety, he was free from cant and was joyous in making those about him happy, and a secret inquiry to discover his real character, among those unbiased in affection, fully corroborated the testimony of the witnesses summoned by the burgess of Bristol.

His first experience at the academy was entirely agreeable, the words and tone of the letters he wrote friends voicing content and his demeanor attracting the notice of his fellow-classman A. R. Burnam, jr., who testified of him:

"He struck me as being a very pleasant sort of fellow, and I asked him to be my tent mate in camp. (We thought there would be two in a tent, but Albert was assigned to the same tent.) He was considered witty. They had a good deal of fun out of him on account of his name."

His treatment, save, perhaps, in the demands upon him to swallow tabasco sauce, which will be later noticed, was about the same as that of most cadets until several days or a couple of weeks after getting in camp on returning from supper, when a third-class man told him to leave the ranks and he made no attempt to do so. His conduct was strictly correct under the regulations lawfuly established, but under the lawless class despotism in vogue it was offensive, evidencing imper-

tinence, and the word was passed of his need of discipline and watch kept that a reasonable excuse might be furnished to administer chastisement. Many orders doubtless were given and not obeyed, but his conduct, being strictly correct, did not furnish the desired plausible pretext for a challenge to fight until the opportunity came late in July, when he was a night sentinel on post No. 5.

The orders for guard in camp are that sentinels will divide their posts into four equal parts. During the day they will walk the two middle parts, and between retreat and reveille their entire posts, except as otherwise prescribed in special orders for particular posts, and the special order for No. 5 was to walk that portion of the post in rear of the near-by company tents from tattoo until taps.

The corporal of this guard was not familiar with these orders, and on stationing Booz gave him the instruction appropriate before taps, and he proceeded to walk accordingly. This being observed by a third class man, the latter (without authority) proceeded to tell him to walk the entire post; others also demanded this course, and one says he kindly advised him, but he insisted in following the corporal's instructions. It was variously reported that he "mumbled something;" that he made various rejoinders, but there is no positive evidence of any response. He evidently believed the advice and command of the cadets were like the lawless ones he had oft before received, and paced the post his directing officer had indicated.

The corporal of the guard being called and not knowing what the post really was, got the copy of orders, learned that the demand to walk the entire post was proper, instructed Booz accordingly, and the latter proceeded to comply with the new and correct instructions.

The following day the "contumacy," "impertinence," or whatever the act of disregarding the directions of third class men was appropriately termed, was reported to the fighting committee of that class, with the alleged rejoinders and their insolence in words and manner, as no one could testify yet, as "it was said," etc., and (possibly after the mockery of a pretended hearing) he was called out and ordered to weigh and select his seconds. The third class men who had kindly *sought to make* him understand his post had in the meantime sought him, explained the serious offense of a guard not walking post, read the appropriate article of war, with its penalty of death or such other penalty as the court-martial might impose, and expressed the conviction that Booz would be reported, court-martialed, and shot, making "his eyes bulge pretty much; it sort of takes the wind of fourth class men to tell them the war regulations." This cadet also testifies he knew that Booz was not a sound man physically, but did not know that he was called out, and if he had known it would not have allowed the fight to occur at that time, although in the interview, for effect, he told him that if he (Booz) was of his size he would call him out and thrash him.

Owing to Booz being on guard July 30, the fight did not come off until August 6, Saturday being the only day when he could leave camp. His opponent was 2 pounds lighter, with the like trifling shorter height and reach, but was superior in every other respect, having had a year's training in the academy gymnasium and being in fine health, with seconds used to such encounters, and the referee, timekeeper, and sentinels all being upper class men, who, with every disposition to be just, felt the "plebe" was a sinner in need of punishment. He knew from the start he had no chance of winning, yet went to the scene of combat with apparent confidence and forced the fighting in the first round, landing once or oftener, but ineffectively, until a blow in one of his eyes brought blood and demoralized him, and in his mortification he wept.

In the second round he soon received a blow which his opponent at first described to a fellow-cadet as on the solar plexus, which sent him to the ground, and after some inconclusive efforts he declared he could fight no more, and was counted out. He was treated with entire deference by all parties to the contest during its continuance and at its conclusion, and returned to camp crestfallen and with bleeding nose, one black eye, the other eye with a cut under it, a couple of loosened teeth, and a bruise on his body near the heart. His opponent sought him and advised him that if he was seriously hurt he go to the hospital, giving in this action the best testimony of respect.

But the *same* veracious though invisible and undiscoverable witnesses who had heard him reply insolently to the commands to walk post properly saw him return to camp smiling and heard him boast of the easy trick whereby he had avoided severe punishment in the fight, and the anger of upper class men was aroused and his action in the fight was branded as lacking in spirit and disgraceful in an embryo soldier. That he had ever before been in a fight or had any knowledge of the duty under the cadet code of fighting to complete exhaustion has not been shown and is not believed, wor while upper class participants in the fight say he must have known the code, his seconds did not know it at the time and supposed he did all that honor demanded until they learned differently from upper class men on return to camp, one of them then becoming so incensed that he visited his principal, whom he had left with friendly respect a couple of hours before, and told him he was a disgrace to his class.

Some time after returning from the fight Booz was summoned to the near-by tent of Cadet Caples, who had reported him for not taking proper position as sentinel at command "posts" on being relieved at 6.50 a. m., August 3, and to which report an explanation had been sent the commandant of cadets that the report was a mistake, that he had faced properly and that the new sentinel faced the wrong way. Caples testified that he explained to Booz, whose nose was still bleeding, the serious offense in the estimation of the corps of making a false explanation, which he claims Booz acknowledged his to be. He denied threatening to scar Booz for life, as the latter wrote home had been done by the cadet reporting him, but it is evident his talk was severe and intended to terrify, and that no vigorous rejoinder was made. The corps ethics regarded as unjustifiable an explanation possibly true inherently, or believed so to be, but which could not be substantiated, and Booz may have confessed his inability to prove his contention, but no fair admission of falsehood was made by him, and he was evidently sincere in his contention. The commandant of cadets apparently took this view, for, while declining to accept the explanation, he made no charge of bad faith against Booz. This incident was later supposed by some to have been the cause, or one of the causes, of the fight, but it is clearly of later date than the calling out.

A considerable number of cadets took up the charge of failure to make an honorable fight and showered him with insulting comments, one of them declaring he would have kicked him (Booz) in the face if present when he failed to continue fighting, and several declaring he would always be in disfavor in the corps and in the army, if he got there; and the following day he wrote home announcing the fight and its results, saying, "the fellows here are brutes, and they have evil in their minds," and asking his father to grant him permission to resign. During the remainder of his stay at the academy an insulting remark would be dropped from time to time in his hearing to annoy him or provoke a fight, although most of the cadets knew or cared nothing of his affair, and the more dignified of those who knew and disapproved his part quietly ignored him, while his tent and room mate and other near friends remained steadfast in kind regard.

Before leaving Bristol the Sunday school of which he was a member gave him a reception and a handsome copy of the Holy Bible, and on entering the academy he united with the Y. M. C. A. and was a regular attendant at its meetings and a church communicant. He read his Bible regularly without hindrance, although occasionally the remark was made outside the tent that that was a pretty slick way to deadbeat, the innuendo being that the reading was for protection from annoyance by third class men, who refrained from their operations upon fourth class men while the latter were at devotions, reading the Scriptures, or performing any act of religion. He told his sister that a cadet had asked him to produce the Bible, and she inferred it was to deprive him of it, but the inference was without warrant.

The president of the Y. M. C. A., in a letter to Rev. Alexander Allison, D. D., who preached Booz's funeral sermon, said a cadet had seen Booz reading a novel held within the Bible, to deceive; but the cadet who made the statement testified he was not justified in making the charge, and it was unwarranted by the facts.

It has not been possible to definitely learn exactly when the taking of tabasco sauce was first required of Booz, but it was probably near the middle of July, in small doses, the quantity being later enlarged, especially after he got into disfavor. His tent mate, Burnam, was amazed at the quantity he said he was taking, and at the order to finish a bottle before breaking camp (a period of about two weeks), but he did not know if the order was seriously given, insisted upon, or fully complied with. Booz complained that it was ruining his stomach, and in answer to an inquiry from his father and brother, replied that "he was forced to take it—had to swallow it or strangle."

It has been inferred and charged that the force referred to was physical, but the evidence and fair inferences are all to the contrary, and the statement that it had to be swallowed or the victim be strangled is explained by the testimony of his tent mate, Albert; that he (Albert) and two others were told to stand up with mouths open, and that then a few drops of the sauce was squirted in, and nothing would be more natural than to swallow as the only relief from strangling in the sensation of pain following. Had physical force been used at any time in administering the irritant it would not only have been in conflict with the cadet code, but would surely have been mentioned by Booz to Burnam, if not to his father or brother. The force used was of a kind which could only be realized by him who underwent the torment.

The effect upon the throat tissues and digestive organs of the frequent swallowing of tabasco sauce, raw and in immoderate quantities, has never been observed and is therefore unknown, and the medical and surgical experts whose testimony was taken could only theorize that it was probably injurious. There is no testimony that Booz or any other unwilling taker of the sauce complained at, or at any period within weeks of, the taking of inability to swallow food.

The return to barracks and of the second class from furlough at the end of August marked a change of table companions in the mess hall, and Booz never after mentioned tabasco sauce to any cadet friend, and was probably thenceforth exempt from this form of torment, and sufficiently so from all other forms that, if health had permitted, he would have been able to pursue his studies, which then began, with ardor and success; yet the reverse was the case.

His roommate says of him after return to barracks:

"He studied very litle; complained every night, almost. He would say he got dizzy, and complained of his eyes."

First Lieutenant Jervey, instructor of modern languages, testified:

"Booz's face was colorless—ghostly. He was in my section four weeks. His marks were quite high the first week, but steadily declined thereafter."

First Lieutenant Coe, instructor of mathematics, testified:

"Booz looked to me that he might have something the matter with him constitutionally. He had a very pasty complexion. * * * His physical appearance led me to suppose that he probably was physically unwell, and that probably had a great deal to do with his mental condition. * * * His marks for the first three weeks brought him next to the lowest in the class. * * * He could not have passed the January examination."

His father having consented, Booz resigned the cadetship because of trouble with his eyes and was granted leave of absence October 5, 1898, when the resignation was accepted, to take effect October 31, 1898.

October 19, 1898, he consulted Doctor Wallace, a Philadelphia physician, who makes a specialty of the eye, complaining of trouble with the eyes and headache, and receiving treatment for a couple of weeks. December 23, 1898, he returned to Doctor Wallace and took a week or ten days' further treatment. The trouble with his eyes the doctor regarded as insufficient, in a young man of his age, to produce all the symptoms he complained of. The eyes were weak, due to a very exhausted condition—some profound depression of the system, the doctor supposed, without being able to decide whether it was the "inducing premonitions of tuberculosis" or caused by cruel treatment, but with a belief that severe treatment was much more likely the cause, and that physical injury, severe training, athletic exercises, drills, or studies would account for the trouble. Glasses and tonics were prescribed, and the patient was regarded as having been restored to health at the termination of the treatment.

Except as the foregoing may have extended into 1899, Booz does not appear to have had any medical treatment in that year. March 21 he wrote, describing the trouble with his eyes, especially since he had been home from West Point; that he had to wear glasses, and saying:

"I complained a little about my eyes when I was at St. Luke's, but thought it a trivial matter."

January 5, 7, 8, 9, 12, 15, and 21, 1900, he was treated by Doctor Martin for a catarrhal condition of the throat, and May 17, 21, 30, and June 2 and 11 for possible tubercular pharyngitis. He then got treatment from Doctor Weaver and later consulted Doctor Groom, who sent him to Dr. J. Solin-Cohen, the eminent throat specialist, on August 2. The latter diagnosed the case as tubercular laryngitis, and told the patient's sister the fatal nature of the disease, but treated the case until in November, when the patient failed in strength, and after treatment by Doctors Abbott and Weaver, respectively, he died at his home, in Bristol, December 3. Enunciation during the last few days was well-nigh impossible, but on the day before dying, being at times delirious, he exclaimed: "Have the tent ready; the inspector is coming;" and again, "They ought to have my throat."

The members of Booz's family entertained the conviction that the administration of tabasco directly occasioned the fatal disease of the throat, and based it largely upon the erroneous supposition that that disease developed very soon after returning from the academy, and that some of the physicians named were consulted soon after the treatment

by Doctor Wallace, instead of after the lapse of a full year, as shown by the evidence. They stated their belief to friends, and the story, with great embellishment, got into print and received highly sensational treatment.

December 1, 1900, the football team of the Military and Naval academies played their annual match at Philadelphia, and the newspapers of about that day, in the account of Booz's alleged maltreatment at the Military Academy, stated that, after being beaten, a fiery liquid had been pourred down his throat and that a red-hot iron had been thrust down his throat. The superintendent and other officers and the cadets were naturally indignant, and it was incorrectly assumed by most of them that the statements in their worst form were from Booz and the publications procured by him or his family, and in this belief, and with the feeling it engendered, the investigation into his career at the academy was conducted by those who had been his fellow-cadets. The statements of the superintendent were garbled and distorted in publication, so that needless passion was thrown about what should have had the calmest survey. The bereaved family never assailed the academy, its superintendent, or the body of the corps of cadets, or sought or intentionally originated or contributed to the sensational controversy.

It is purely speculative as to when the tubercular bacilli infected Booz, Doctor Solis-Cohen saying it is possible, but highly improbable, that he had his fatal disease on entering the academy. The consensus of medical opinion is that a weakened and depressed system makes infection possible, where otherwise the disease would be successfully resisted, and this weakness and depression existed for weeks after return from the academy. Whether injuries in the fight, disturbance of the stomach, irritation of the throat, mortification of feelings, and other superadded ordeals to the severe but proper duties of a cadet created the depression in Booz, and without these unlawful exactions he could have studied and gained in strength and vigor, are also problems beyond human knowledge to determine.

And the like commentary must be made respecting the case of John Edward Breth, who entered the academy June, 1897, was found deficient in mathematics January 25, 1898, and died in October, 1899, of typhoid pneumonia. It is clear that no academy incident could have caused this fatal disease, but it is supposed by the family and their physician that a nervous twitching was brought on by the severe hazings to which Breth was subjected and that his strength was sapped and he could not so well resist the disease or be controlled by the remedies administered. The photograph of this young man shows an exceptionally fine, pleasing, and intelligent countenance, and the impression on the beholder and the tenor of his former life are not in harmony with the testimony of his alleged awkwardness and dullness, and suggest the thought that severe and lawless exactions denied him his rightful opportunity and can not leave agreeable reflections to his cruel tormentors, the chiefs of whom were long since dismissed for dishonesty.

But while we can not fix upon hazing the responsibility for these two deaths, the possibility that it hastened them and the blot it throws on the otherwise fair and glorious fame of the academy, its conflict with proper training and discipline, and unfitness in this new century, urge the adoption of the reasonable, yet we believe effective, measures for its eradication and the promotion of discipline at the academy hereafter proposed by this committee.

It has been charged that Booz was persecuted because of his religion, and it was also charged by Mr. Albert that he was driven out of the academy because he was a Hebrew. Fully realizing that there should be no room in the academy for racial or religious ostracism, your committee made some special inquiry on the subject, and finds that on the whole a man's religious opinions are highly respected there. Cadet Meyer once called Cadet Albert "a damned Jew," but this was an isolated case, and Mr. Meyer claims to have done so because he thought Mr. Albert was attempting to conceal his race. Ex-Cadet Albert testified that Cadet Jordan also called him "a damned Jew" while he was at the academy. The conduct of these cadets was reprehensible, but in view of the fact that there was no evidence of like conduct by others and nothing to indicate that Meyer or Jordan were ever guilty of similar behavior at any other times, your committee feels convinced that Hebrews are usually treated with respect, and this conviction is strengthened from the fact that there are two Hebrews now at the academy, both of whom testify that they have never been subjected to any maltreatment whatever on account of their race or religion.

The evidence shows that it has been the rule not to haze cadets while reading the Bible or at the Y. M. C. A. The president of the Y. M. C. A. for the academic year 1899–1900 was Harry Mitchel, and it appears that he was sometimes called "Saintly Harry," "Saintly Mitchel," and "Prayer-Meeting Mitchel." While this could not be approved, it appeared that he was highly respected, and that those appellations were not used as terms of reproach.

Your committee is pleased to report that the cadets, as a class, have not been guilty of assailing men because of their race or religion.

Your committee having thus briefly told the nature of the treatment of fourth class men as gathered from about 5,000 pages of typewritten record, next call attention to the means employed by the authorities to suppress the evil, the difficulties met with, and the need for legislation from Congress.

At the outbreak of the Spanish war Lieutenant-Colonel Hein was commandant of cadets, and he was during the war also acting superintendent. In September, 1898, Colonel Mills was appointed superintendent and Lieutenant-Colonel Hein was retained as commandant of cadets. Both these officers have diligently sought to suppress the more serious forms of hazing, and have had a considerable measure of success, but many causes have contributed to defeat their efforts. The fourth class men refuse to tell the authorities anything about the abuse imposed upon them, first, because it is considered dishonorable to do so, and, second, because they believe they would be called out or otherwise seriously punished if they did. Hazing sometimes takes place in barracks and in daytime, but it usually takes place in an unlighted tent at night, between supper and tattoo, and this, of course, increases the difficulty of discovering and punishing the offenders. In this connection it is well to call attention to another cruelty of the system as it has been practiced. As the worst hazing is usually conducted in the dark, the tormentor, by his choice of time and place, has deprived himself of all ability to tell when his victim is exhausted.

Notwithstanding these and other difficulties, which will be referred to later, the superintendent diligently continued his efforts against hazing and to convince the cadet corps of its cowardly and degrading character. Cadet Phillip S. Smith was, in August, 1898, convicted by general court-martial of harassing and annoying fourth class men, and was sentenced to suspension without pay for one year. The day he returned, August 29, 1899, he required Cadet U. S. Grant, jr., to stand on his head and recite a humiliating verse, and upon the recommendation of the superintendent he was, with the approval of the Secretary of War, dismissed from the academy. In August, 1900, Cadet William F. Harrell was detected compelling Cadet Hunter to stand on his head in a bath tub full of water, as heretofore explained, and was, under recommendation of the superintendent, with the approval of the Secretary of War, dismissed from the academy.

A great number of severe punishments less than expulsion have from time to time been meted out to offenders, and finally, in September, 1898, the upper classes adopted resolutions pledging themselves to cease exercising fourth class men. The cadets are not all in accord as to just what this meant, but it is generally agreed that it included eagling, wooden-willying, doing footballs, choo-chooing, dipping, stretching, and the like; and it is equally agreed that it did not include bracing, dosing with hell sauce, qualifying, requiring service of special-duty men, or fighting.

Your committee ought, in fairness, to say that these resolutions have been kept by the upper class men in good faith, according to their several constructions of them, and as a result the camp of 1900 was the best in years and the most free from odius forms of hazing; but, as about twenty challenge fights have taken place since the adoption of these resolutions, it can not be claimed that an ideal condition was attained thereby.

There are 71 United States army officers at the academy, including the superintendent—10 tactical officers and about 60 instructors—making about 1 officer to every 6 cadets. This would appear to be a sufficient number of officers to enforce discipline, but unfortunately in practice no one but the superintendent and tactical officers is charged with any duties in relation to discipline. Section 163 of the regulations, as established by the War Department, provides that each of the academic officers who knows of any violation of discipline shall report it. This regulation has become obsolete; but it was always so construed as to be of no value. Under the construction given it, if an academic officer saw a cadet in such condition as to clearly indicate he had been in a fight it was not his duty to report it. If he saw a fight he should so report, but if he saw the parties returning from the field of battle, bearing every evidence that they had been in a fight, he should not report it. This refined distinction applied to all the offenses and was based on the thought that reports of offenses should not be made on suspicion, but on knowledge, ignoring the fact that evidences of breaches of discipline could be reported as distinct from charges. The result is that 11 persons are solely charged with maintaining discipline, in a reservation of more than 2,000 acres and more than 2 miles long, over about 450 cadets.

By the first and second sections of a bill introduced and reported herewith this fault is thought to be in a measure cured by requiring every officer at the academy to report every matter coming to his attention tending to indicate a breach of discipline, and requiring the superintendent to investigate all matters so reported.

This will not alone be sufficient to furnish adequate surveillance. The academy has two mess halls, and there is only one army officer present to watch the two, with between 400 and 500 cadets. In camp there is no adequate provision for surveillance by army officers, and it is almost wholly under the care of cadet officers and sentinels.

Complaint has been made before your committee that cadet officers are unfair in reporting fourth class men for demerits. It is not claimed that this unfairness consists in so reporting fourth class men when not guilty; but it has been claimed that cadet officers are inclined to more rigidly report odious fourth class men than others, and a few of the upper class men, when upon the witness stand, have avowed that they would do this. The majority, however, deny that they would be guilty of any such injustice. Your committee feel that if army officers were more directly in charge of the cadets and brought into more close contact with them that the danger of fourth class men being thus unjustly reported for demerits would be reduced. Aside from this, however, your committee are convinced that the presence of more army officers in the camp at all hours of the day and night is absolutely essential to the thorough maintenance of discipline.

Your committee also believe that if more army officers were in and about the camp it would lead to more intimate association and higher mutual respect and regard, and thus enable the officers more effectually to impress upon the cadets the degrading character of the offenses sought to be suppressed and the better purposes to which cadets should devote themselves.

Again, the close association of selected and experienced army officers with the cadets would greatly aid in the education of the latter and the improvement of their military character, instilling in their minds a high conception of the soldier's duty. At the close of academic studies in June the professors and instructors have leave of absence until the resumption of such studies in the following September, and so it is that throughout the camp and during the time when the most difficulty is experienced in maintaining discipline the reservation is almost entirely stripped of officers.

This should be remedied either by shortening the leave of the professors and instructors and requiring that only a part have leave at a time or by the assignment of such other army officers to the academy during that period as will effectually administer proper discipline.

In the tenth section of the bill reported herewith the Secretary of War is directed to meet this need. Under the present regulations one guilty of fighting or hazing may be dismissed or otherwise less severely punished. Your committee believe, and have so provided in the third and fourth sections of the proposed bill, that challenge fighting and the more serious forms of hazing should be punished by dismissal, and that the superintendent, charged by the first section with suppressing these evils, should have the power to take final action upon the findings of courts-martial and courts of inquiry adjudging a cadet guilty thereof. Not long since a cadet was dismissed from the academy and was shortly thereafter appointed to the Marine Corps, and now outranks all his former classmates. To avoid the repetition of such things, and to further punish the more serious offenses just referred to, the fifth section of the proposed bill prohibits all such appointments.

The ingenuity of cadets in inventing new forms of hazing is so great that it is impossible to name and describe them all in a statute, and for this reason the sixth section of the proposed bill directs all forms not specifically described to be suppressed under regulations lawfully made. Prior to June, 1879, regulations of the academy required cadets to answer all questions touching breaches of discipline, but at that time an amendment to paragraph 125 exempted a cadet from answering questions if the answer would criminate him. Your committee thinks this amendment was intended to be literally construed; that it was intended only to exempt the cadet where his answers would subject him to the criminal law in the ordinary course of its administration, and not when his answers would simply subject him to discipline while at the academy. Doubtless in the administration of such discipline one should be protected against the use of his answers in a criminal proceeding against

him, and we think this was the intention of the amendment in question. Its construction by the cadets has been wholly different from this. They have always construed it to mean that no cadet need answer any question if the answer would tend to subject him to discipline.

To illustrate the working of this regulation: About 18 cadets know of each fight—the members of the fighting committee which orders it, numbering about 6, the 2 principal combatants, 4 seconds, the referee, the timekeeper, and usually 4 sentinels. With this system of sentinels it is impossible to ever catch the parties in the act of fighting, and under the construction of the regulation in question every one of the 18 persons who knows anything about it is exempt from testifying. In this situation it is not to be wondered at that fighting has not been suppressed. The present superintendent made application to the War Department to amend the regulation so as to require all questions to be answered, but the department refused to do so, and we think rightly, because it had no power to protect the cadet from the subsequent use of his own evidence against him in a criminal proceeding. Later the regulation on this subject was so amended as to make the superintendent the judge of whether answering a question would tend to criminate the cadet, but while this made the superintendent the judge, he was in duty bound to decide correctly and excuse every cadet from answering criminating questions. Congress has the power the War Department lacks to at once compel every cadet to answer all questions as to breaches of discipline, and at the same time protect him against his evidence being used against him in a subsequent criminal proceeding, and thus defend all his constitutional and other rights, and the seventh section of the proposed bill, in the judgment of your committee, will accomplish this.

The present superintendent at one time, being unable with the means at hand to discover the perpetrators of certain offenses, attempted to convene a court of inquiry to aid him in doing so, but the War Department held such proceeding was unauthorized.

The ninth section of the proposed bill provides such authority, with ample safeguards for the protection of the rights of all.

Regulations of the academy have in the past been made by the War Department, upon the proposal of the superintendent. The academic board has not been consulted. The superintendent and commandant of cadets and other tactical officers are usually only at the academy for a short time. On the other hand, the academic board is composed of persons permanently located there. The tactical department is constantly changing; the academic board is substantially continuous. While fully indorsing the changes made while the academy has been under Colonel Mills and Lieutenant-Colonel Hein, your committee thinks that the regulations have been so frequently tampered with and changed by newcomers as to make them voluminous and lacking in homogeneous character. Your committee feel that the academic board, continuous in character and always interested in and familiar with its needs, should be consulted and given part in this work, and the eleventh section of the proposed bill so provides.

The regulations of the academy have been adopted at so many different times and have been so frequently changed that they are now very numerous, complex, and lacking in harmony and simplicity. To the end that they may be more thoroughly learned, understood, and obeyed, they should be thoroughly revised and simplified.

The night the taking of the testimony closed at West Point a paper was presented to your committee by the superintendent, Colonel Mills, and the presidents of the four classes, as follows:

WEST POINT, N. Y., *January 19, 1901.*

SIR: Having become cognizant of the manner in which the system of hazing as practiced at the Military Academy is regarded by the people of the United States, we, the cadets of the United States Military Academy, while maintaining that we have pursued our system from the best motives, yet realizing that the deliberate judgment of the people should, in a country like ours, be above all other considerations, do now reaffirm our former action abolishing the exercising of the fourth class men, and do further agree to discontinue hazing—the requiring of fourth class men to eat anything against their desire and the practice of "calling out" fourth class men by class action—and that we will not devise other similar practices to replace those abandoned.

Respectfully submitted.

For the first class:

W. REESE BETTISON,
President Class 1901.

For the second class:

B. O. MAHAFFEY,
President Class 1902.

For the third class:

QUINN GRAY,
President Class 1903.

For the fourth class:

JOSEPH A. ATKINS,
Representing Class 1904.

THE SUPERINTENDENT UNITED STATES MILITARY ACADEMY.

It is the belief of the committee that the present cadets will live up to those resolutions, as, upon the whole, they are a truthful set of young men. It should be observed, though, that there is no express promise to cease bracing; and upon some other subjects the resolutions are ambiguous. Trusting and believing that these resolutions will be kept, your committee thinks the bill introduced herewith should be passed to cover matters not contained in the resolutions and to avoid the revival of practices abolished thereby.

Your committee were, upon the whole, favorably impressed with the general bearing of the cadets and their manner and conduct, and were particularly so impressed as to the fourth class men, finding in their demeanor and conduct evidence of the improvement wrought by the partial abolition of hazing during the present academic year.

Your committee, however, were astonished to find that something at the academy has benumbed the consciences of most of these otherwise creditable young men as to the treatment due from the strong and experienced to the weak, the embarrassed, and the inexperienced. Before concluding, your committee ought to say that while substantially all fourth class men have been hazed to some degree and substantially all upper class men have in some measure engaged in the practice of hazing, a few fourth class men have wholly escaped and a few upper class men have entirely abstained from hazing, and we find a very large number of the upper class men have always been opposed to the more serious and brutal forms.

The War Department furnished your committee a complete transcript of the evidence taken before the court of inquiry which lately investigated affairs at the Military Academy, and the officers of both the Department and of the academy have at all times courteously aided this committee in every way in its efforts to discover the truth. The committee saw fit to adopt the testimony taken before the court of inquiry, so far as it extended, as part of its own evidence, and has utilized it in all respects as if taken before the committee, and has been greatly aided thereby.

The committee returns herewith, as an appendix to this report, the record of all the evidence taken by it, including the evidence taken before the court of inquiry before referred to.

It is the sense of your committee that the passage of the following bill would greatly tend to the maintenance of discipline, and that its passage is necessary for that purpose; and it therefore respectfully recommends that it do pass:

"SECTION 1. That the superintendent of the United States Military Academy at West Point, in the State of New York, shall suppress all challenge fighting and every form of hazing at the academy, and shall, whenever advised of any facts tending to indicate any violation by a cadet or cadets of the laws of the United States, the regulations of the academy or its rules, at once investigate the same in person or cause to be convened a court of inquiry to do so, as hereinafter provided.

"SEC. 2. That it shall be the duty of every professor, assistant professor, academic officer or instructor, as well as every other officer stationed at the academy, to promptly report to the superintendent any fact which comes to his attention tending to indicate any violation by a cadet or cadets of the laws of the United States, the regulations of the academy or its rules.

"SEC. 3. That any cadet who shall act upon or be a member of any fighting or like committee, send, carry, or accept or order a challenge to fight, or be in any manner concerned or engaged in a fight preceded by a challenge, or order, or shall act as a referee, timekeeper, second, or sentinel thereat, or shall upbraid, abuse, or insult, or in any way maltreat any candidate or cadet because of his having refused to send or accept a challenge, or order to fight, shall be dismissed by the superintendent.

"SEC. 4. That any cadet who shall direct, invite, or request any candidate or cadet to eat or drink anything for the purpose of punishing, annoying, or harassing him, or who shall, without lawful authority, direct or require any candidate or cadet to brace, or engage in any form of physical exercise, shall be dismissed by the superintendent.

"SEC. 5. No cadet dismissed under either of the two preceding sections shall be in any way reinstated or reappointed to the academy; and no such cadet shall ever be appointed to any office in the Army, Navy, or Marine Corps.

"SEC. 6. All forms of hazing not herein expressly provided for shall be suppressed, under such regulations as shall now exist or may hereafter be lawfully established for the academy.

"SEC. 7. Every cadet shall at all times be required to answer all questions pertaining to infractions of the laws of the United States, the regulations of the academy or its rules put to him by any court-martial, court of inquiry, or any officer of the academy; and upon his refusal so to do he shall be dismissed by the superintendent. But his evidence shall not be considered as against him in passing upon his guilt or innocence of any such infractions, nor shall it be used against him in any criminal proceeding or civil action for damages.

"SEC. 8. When the superintendent knows or has reason to believe that any cadet is subject to the punishment prescribed in sections 3, 4, or 7 hereof, he is authorized to and shall at once convene a court-martial composed of not less than three commissioned officers to try such cadet. The finding of such court-martial, when approved by the superintendent, shall be final, and any cadet found guilty by it under any one of the said sections shall be dismissed, as in such section provided.

"SEC. 9. Whenever the superintendent shall report to the Secretary of War that he has reason to believe that there have been infractions by one or more cadets of the laws of the United States, the regulations of the academy or its rules, and that he has been unable to ascertain the perpetrator or perpetrators thereof, or to obtain sufficient evidence to warrant action, the Secretary of War shall at once convene a court of inquiry to inquire into such supposed infractions, with directions, without unnecessary delay, to report the evidence taken by them and their findings and recommendations, all of which shall when returned be transmitted to the superintendent, who shall thereupon enforce the laws, regulations, and rules as against all persons so reported to have violated them: *Provided*, That when evidence shall be adduced before such court of inquiry tending to show any infraction by a given cadet of the laws of the United States, the regulations of the academy or its rules, said cadet shall be at once notified and shall be entitled to be at all times present while the inquiry is going on as against him, and to have witnesses called in his behalf and to otherwise defend himself.

"SEC. 10. It shall be the duty of the Secretary of War to assign to the academy a sufficient number of officers of the army to at all times strictly enforce the laws of the United States, the regulations of the academy and its rules, and to furnish such instruction and surveillance as may be necessary to insure that end; and he shall make such regulations as are necessary to produce such direct contact between the officers and cadets as will result in a thorough enforcement of this act.

"SEC. 11. Regulations of the academy, not inconsistent with the laws of the United States, shall be made by the Secretary of War. The superintendent may from time to time propose any change in or amendment to such regulations; but before doing so shall convene the academic board, which shall vote upon the advisability of the proposed change or amendment, and its vote shall be forwarded to the Secretary of War by the superintendent with his proposal. The academic board may from time to time propose any change or amendment to the regulations; but such proposal shall be made through the superintendent and shall be accompanied with his recommendation.

"Nothing in this act shall deprive the superintendent of the authority to make internal rules for the government of the academy not inconsistent with the laws of the United States or the regulations of the academy."

IRVING P. WANGER.
WALTER I. SMITH.
EDMUND H. DRIGGS.
B. T. CLAYTON.

AN ADDRESS DELIVERED BY MAJ. GEN. J. M. SCHOFIELD TO THE CORPS OF CADETS, UNITED STATES MILITARY ACADEMY, WEST POINT, N. Y., MONDAY, AUGUST 11, 1879.

YOUNG GENTLEMEN: I have some words to say to you, and I will try to detain you no longer than may be necessary.

I have chosen this mode, rather than that of a printed order, of saying what I wish to strongly impress upon your minds, partly because I

am doing my duty toward you, as your instructor, quite as much as my duty toward the Government, as your commander.

I am about to speak to you upon the subject of the treatment of new cadets by their seniors in the corps; and I have first to say that I do not hold you as individuals primarily nor chiefly responsible for the offenses which many of you have committed against new cadets. The practice of hazing has prevailed in most, if not all, of the institutions of learning both in this country and in England for many generations. It has always been condemned by the more enlightened and generally denounced by the regulations, yet it has generally been tolerated as a supposed unavoidable evil which did no great amount of harm and some good. Like the institution of slavery, until recently tolerated in this country because it had been inherited from our ancestors, it has even been defended by many on the assumed ground that it was rather beneficial than otherwise to the poor victims.

Enlightened public opinion throughout the civilized world now condemns slavery, both because it is a violation of the natural rights of man and because it is injurious to all concerned.

The venerable vice of hazing is of the same general character. It is a violation of the equal rights given by nature and guaranteed by law. It is the forcible deprivation of your fellow cadet or student of the quiet enjoyment of the rights given him by his appointment and guaranteed him by the laws and regulations. It is, therefore, nothing more nor less than robbery. In some cases it is even more offensive and humiliating to the victim than would be the forcible deprivation of his money or his watch. Not only reason and good morals, but also the law, rank these two offenses as essentially the same in kind.

Probably few of you have ever thought of the subject in this light, and doubtless the most of you may be shocked at this first view of its true character, but none of you will need more than a moment's reflection to correctly perceive it.

The spirit of hazing is even more nearly allied to that of the wanton incendiary who plies the torch for the fiendish pleasure of dancing around the ruin and misery that he has wrought. The same spirit which causes the small boy to delight in torturing his smaller and humbler neighbor moves the third class man who "yanks" and throws water on a "plebe," and finally develops, in time of war, into the wanton destroyer of institutions of charity and of learning and works of art. The seed sown in youth, or possibly inherited, can not fail to bear its fruit in time unless the weed is eradicated.

The practice of hazing is both injurious and humiliating to its victims and degrading to those who engage in it. It unduly excites class feeling, which is always quite strong enough, and has often engendered animosities which many years have not sufficed to allay.

Class associations are but temporary, and are of very little effect after graduation. Your constant associates after you leave the academy must be the members of higher and lower classes. The memory of ill-treatment will remain with its victim as long as he lives. You can never be a "brother officer" to him whom you once degraded. The stern discipline of a commanding officer will soon be forgotten when it can be remembered that he always treated his subordinates with justice and due respect. But wanton injustice and contumely can never be forgotten, except by a spirit too mean to feel its sting.

The practice of hazing has not at West Point even the poor excuse that is urged for it at civil colleges, for the military discipline and instruction which all new cadets must necessarily undergo, are quite sufficient to cure them of any undue egotism with which they may be afflicted upon entering the academy. But no consideration of mere utility, even if that could be fairly urged, could justify the violation of individual rights. Hazing is essentially criminal and must therefore be suppressed.

Like all vicious and illegal indulgences, the practice of hazing tends toward revolting extremes. In former times at West Point it was confined, with rare exceptions, to comparatively harmless sport. Sometimes the treatment was quite rough and accompanied by more or less of vulgarity. But any approximation to degrading or insulting treatment was almost unknown. The use of such names and epithets in speaking to a new cadet as seem now to be comparatively common would then have been instantly followed by bloodshed. Thirty years ago, if a new cadet had been assailed with the words "you d——n slimy beast," he would have done his best to kill his assailant on the spot. Anyone who would have addressed another in such words would have been denounced and "cut" even by his own class.

But by degrees, here as elsewhere, the poison seems to have spread and become more and more virulent, until now insulting and opprobious names and epithets are applied to new cadets, and they are subjected to degrading treatment, such as no gentleman can possibly justify or defend. Yet such conduct seems to excite no particular emotion among cadets, and is tamely submitted to by the victims. Even many of the younger graduates, who have probably gone through the same experience when cadets, seem not to have recovered from the demoralizing effect. Better, far better, that West Point be destroyed and its greatness exist hereafter only in history than that such a standard of gentlemanly honor become the established standard of the corps of cadets.

Again, the general toleration of this vicious habit naturally leads to a combination among classmates to protect those who are guilty of it. Thus those who are justly proud of the title of gentlemen and who wish to guard it with jealous care find themselves indorsing and defending the most ungentlemanly acts, and are finally led into an unlawful combination to protect from just punishment those who are guilty of acts which all must condemn. Thus it is that habitual indulgence in practices which are essentially wrong inevitably leads to crime.

The very foundation of civil society is mutual respect for individual rights. And nowhere is such mutual respect more strictly enjoined and rigidly enforced than in military organizations. Without it tyranny on the one hand and disaffection and mutiny on the other must destroy the efficiency of an army. Those who wantonly inflict insult and abuse upon their inferiors and those who tamely submit to such treatment from those who may be placed over them are alike unworthy to be the soldiers of a free country.

Military law necessarily prohibits, under the severest penalty, any act of retaliation by the inferior for abusive treatment on the part of a superior on duty. But the law points out the proper mode of redress in such cases, and he who fails to avail himself of this mode and tamely submits to unlawful treatment stands dishonored as lacking the courage to defend himself. He who possesses true courage will defend himself from wrong by all lawful means, denounce his assailant, and bring him to justice. It is an extremely false notion of honor that compels a man to submit to any violation of his personal rights rather than to bring his oppressor to lawful punishment. His honor requires of him precisely this lawful mode of redress.

It is a great mistake to confound this lawful denunciation of those guilty of personal wrongs with the odious office of a public informer. It is the duty of the officers of the law to detect and bring to punishment those who violate any public right. Voluntary informers are justly regarded with disfavor. So in the corps of cadets it is the duty of the officers, sentinels, and others on duty to report all violations of the regulations, and not the duty of cadets in general to voluntarily inform on their companions. But as the citizen brings before the magistrate one who assaults him or robs his house, so the cadet should report anyone who violates his personal rights and defend himself, so far as he lawfully may, against such abuse. Self-defense is the first law of nature. He who declines it forfeits his manhood.

The most odious of all forms of tyranny is the tyranny of a mob—that is, of an unlawful combination of many persons to overawe an individual and compel him to submit to wrong or deter him from the exercise of his rights or the denunciation of those who have wronged him. Of this character are class combinations to force a cadet to submit to hazing or to punish him in any way if he complains of those who abuse him. A young man of real courage will defy such threats, let the consequences be what they may. It were better to suffer anything than to tamely submit to tyranny.

The spirit which dictates hazing and its official counterpart, a harsh instead of a mild mode of imparting military instruction and enforcing obedience, is radically wrong. The best and most successful commanders of all grades are those who win the respect, confidence, and affection of their subordinates by justice and firmness, tempered by kindness. The discipline which makes the soldiers of a free country reliable in battle is not to be gained by harsh or tyrannical treatment. On the contrary, such treatment is far more likely to destroy than to make an army. It is possible to impart instruction and give commands in such manner and in such tone of voice as to inspire in the soldier no feeling but an intense desire to obey. While the opposite manner and tone of voice can not fail to excite strong resentment and a desire to disobey. The one mode or the other of dealing with subordinates springs from a corresponding spirit in the breast of the commander. He who feels the respect which is due to others can not fail to inspire in them regard for himself. While he who feels, and hence manifests, disrespect toward others, especially his inferiors, can not fail to inspire hatred against himself.

The differences among men are far less than they generally seem. It is only when the difference is really trifling that it seems to those concerned so very great. Thus the cadet of one year's standing thinks he sees an enormous gap between himself and the newcomer, and looks down upon the latter as a mere animal whom he may justly torture as a small boy does a cat. While to the more distant and impartial observer the difference between them is barely perceptible and may be wholly obliterated by the scratch of a pen, as has been illustrated by some recent examples.

A veteran soldier sees but little difference between the different grades, from his own down to that of a junior cadet, and treats all with nearly equal respect. It would be well for young soldiers to profit by such examples. The road to military honor will be guarded all the way by the hearts of those who may be your subordinates. You can not travel that road unless you can command those hearts.

This practice of hazing is now unanimously condemned by all those in high authority in the Government, by all the eminent men of the country, and by the public press. Even the parents of those cadets who have suffered punishment denounce the practice. The most that any plead for is forgiveness for the follies of boys who are not old enough to know better. Are you, young gentlemen, willing to be regarded as boys? To be treated as boys who are not old enough to know how to behave yourselves? No! I have disdained, on your behalf, to consider the subject in this light. You are old enough and have sense enough to see this matter in its true light. Many of you have not so seen it heretofore, because you have been badly instructed. Partly from the practice at other institutions where you have been educated, partly from association with rough companions in all parts of the country, and much more from inheritance of a vicious practice which has so long been indulged here, you have imbibed false notions of the character of this practice. But now, since the view of it entertained by all those in authority has been clearly pointed out to you, I shall not give my assent to the proposition that you are not old enough to understand it, or that you are not men and gentlemen enough to accept and act upon it. If the time ever comes when the corps of cadets must be treated like boys instead of like men and gentlemen, then I shall retire and leave the application of the ferrule or the birch to some one else.

I have spoken to you, gentlemen, thus plainly because it is my duty as your instructor to make the matter as plain to you as possible, and my duty as your commander to leave you in no doubt of the requirements of the Government as to your future conduct. I have done so the more freely and without reserve because I acquit you of the primary and chief responsibility for the custom which I so strongly condemn. I trust we now clearly understand each other and know what our line of conduct in the future must be.

ANNUAL REPORT OF GEN. WESLEY MERRITT TO THE ADJUTANT-GENERAL WAR DEPARTMENT, OCTOBER 3, 1883.

[Extract.]

The practice of hazing, some instances of which have come to the knowledge of the authorities during the year, may deserve a passing notice in a report of this character. I observe that my predecessors for the last twenty-five years have reported at one time or another that the practice has been broken up. I am sorry to believe that they have without exception been mistaken. By repressive measures the evil has at times been restricted to its lowest limits, but it has never been eradicated. Just the moment repression has ceased the brutal custom has sprung up with new features of brutality. While I do not favor threats to repress disorders, or pledges from cadets as a means of eradicating violations of the regulations, I am certain that the best means of maintaining discipline in any organization is the certainty of a summary punishment, just but severe, in all cases of intentional offense. If cadets wantonly violate the regulations in anything which involves their dismissal, they do so under one or another of the convictions that they will not be detected or that some influence will prevent their punishment. In this matter of hazing, the authorities here will indulge in no half-hearted means to detect the offenders. In the matter of punishment the experience of the past should convince the guilty that they may not expect mercy from the War Department. Under these circumstances I see no reason why the pernicious practice may not permanently be put an end to.

REPORT OF GENERAL ERNST, DATED SEPTEMBER 7, 1895.

[Extract.]

The evil of hazing is one of long standing here. The situation is different from that at Harvard or other similar great institutions. At those places are congregated a very large number of young men, many of whom never become known to each other. The newcomers take their places quietly, not presenting any great difference in personal appearance, and not being suddenly and forcibly injected into the daily life of the older students. Here the number of young men is small; none can be looked upon by the others with indifference, and the new cadets are immediately brought into close personal contact with the older ones in camp, at drill, at meals, etc. A year's training at the academy makes a marked contrast in manners and bearing, and often in ideas of virtue and honor, between the older cadets and the new. A feeling of superiority exists here with the older cadets to a greater degree than at Harvard, the temptation to show it is greater, and when it takes the vicious form of hazing the opportunities for indulging it are greater. The failure of the authorities to put a stop to it should not be judged by the state of affairs at Harvard.

It has been my endeavor, as it has that of the commandant of cadets, to eradicate the evil or at least to reduce it and prevent its grosser forms. Every form of it has been forbidden and has been punished, but I have not been sanguine of complete eradication while the conditions continue the same and human nature remains what it is. * * *

The measures now employed to repress hazing will probably result in its further reduction and restriction. More severe punishments can, of course, be applied, but they will hardly be more effective than the present ones, unless made thoroughly drastic, such, for example, as summary dismissal by the superintendent. The remedy most available seems to lie in continued vigilance, increased if possible, in the detection of offenders.

Proceedings of a board of officers convened at West Point, N. Y., pursuant to the following order.

Special Orders, No. 137.

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., July 16, 1908.

[Extract.]

1. Under paragraph 128 of the regulations for the United States Military Academy, a board of officers to consist of Lieut. Col. Robert L. Howze, commandant of cadets; Capt. Morton F. Smith, Twentieth Infantry; Capt. Charles P. Summerall, Second Field Artillery, will assemble at West Point, N. Y., at 10 o'clock a. m. on Friday, the 17th instant, or as soon thereafter as practicable. Capt. George S. Simonds, Twenty-second Infantry, will act as recorder of the board.

The board will make a careful investigation to determine whether or not the regulations for the United States Military Academy referring to hazing are being strictly observed by cadets, and to this end will call before it all persons who may be necessary. The board will submit a written report of the result of its investigations.

* * * * * * * *

By order of Colonel Scott:

J. S. HERRON,
Captain, Second Cavalry, Adjutant.

WEST POINT, N. Y., *July 18, 1908.*

The board met, pursuant to the foregoing order, at 4 p. m.

Present: Lieut. Col. Robert L. Howze, commandant of cadets; Capt. Charles P. Summerall, Second Field Artillery; Capt. George S. Simonds, Twenty-second Infantry, recorder. Absent: Capt. Morton F. Smith, Twentieth Infantry, on duty on the target range.

The board then called before it the following cadets:

Of the first class: Cadet Capt. Gerble, Cadet Acting Sergeant Gee, Cadet Privates Anderson and Colley.

Of the third class: Cadet Corporal Hicks, F. H., Cadets Privates Sandeford, Hatch, Cowles, Jones, B. Q., and Flint.

Of the fourth class: Cadet Privates Edwards, E. C., Hocker, Harrison, and Smith, J. N.

The order convening the board and paragraphs 128 and 143, Regulations for the United States Military Academy, were read to them collectively, and they were called individually and the following oath administered to each one:

"You do swear that the evidence you shall give before this board of investigation shall be the truth, the whole truth, and nothing but the truth; so help you God."

After which the following or similar questions were asked them generally:

1. Do you understand the meaning of the term "hazing?"
2. Do you believe that there are at present any violations of the regulations concerning hazing?
3. In what do these violations consist?
4. Have you seen or heard of any cases in which upper class men have gone to fourth class men's tents and required them to assume constrained positions? If so, describe the occurrences and name the participants.
5. Have you seen or heard of any cases in which fourth class men have been required to go to upper class men's tents and assume constrained positions? If so, describe the occurrences and name the participants.
6. Have you seen or heard of any cases in which fourth class members of the detachment of the guard, taking its meals separate from the battalion, have been annoyed or interfered with in any way? If so, describe the occurrences and name the participants.
7. Have you seen or heard of any cases in which fourth class men reporting their departure at the guard tent have been annoyed or interfered with? If so, describe occurrences and name participants.
8. Are fourth class men required by upper class men to work most of their spare time on their own equipment, forbidden to go out of camp in the afternoon or to take a nap, or forbidden to make down their beds until a certain time in the evening?
9. Have you seen or heard of any cases in which fourth class men have made down beds for upper class men? If so, describe the occurrences and name the participants.
10. Have you seen or heard of any cases in which fourth class men have been required or permitted to perform menial service for upper class men?
11. Have you seen or heard of any cases in which fourth class men have cleaned rifles or equipments for upper class men? If so, describe the occurrences and name the participants.
12. Have you seen or heard of any cases in which fourth class men have carried water for upper class men? If so, describe occurrences and name participants.
13. Have you seen or heard of any other cases of menial service? If so, describe occurrences and name participants.
14. Have you seen or heard of any cases in which fourth class men have been given punishments of any kind? If so, describe occurrences and name participants.

Capt. Morton F. Smith, Twentieth Infantry, arrived before any material part of the evidence had been taken and took his seat as a member of the board.

The board continued taking evidence until 6.45 p. m., when it adjourned to meet at 8.30 p. m.

GEO. S. SIMONDS,
Captain, Twenty-second Infantry, Recorder.

WEST POINT, N. Y., *July 20, 1908.*

The board met pursuant to adjournment at 8.30 p. m., all the members and the recorder being present.

The board proceeded to an examination of all the evidence. From a careful consideration of all the evidence submitted the board finds the following facts:

1. That cadets generally understand the meaning of the term "hazing," as defined in the Regulations for the United States Military Academy.
2. That minor violations of these regulations are being committed, such as asking fourth class men foolish questions, interfering with them at the guard tent, keeping them in camp during the afternoons to work on their equipments, forbidding them to go to bed until after tattoo, most of which practices seem to be the result of understood customs rather than specific orders.
3. That the following serious violations of the regulations have been practiced during this encampment:

a. Menial service.
b. Punishments.

MENIAL SERVICE.

1. Requiring, permitting, or inviting fourth class men to make down beds for upper class men.
2. Requiring, permitting, or inviting fourth class men to clean rifles and equipments for upper class men.
3. Requiring, permitting, or inviting fourth class men to carry water for upper class men.
4. Requiring, permitting, or inviting fourth class men to sweep out tents for upper class men.

PUNISHMENTS.

1. Compelling them to assume constrained positions as a punishment. This refers to an exaggerated position of attention, commonly called "bracing."
2. Compelling them to double time, as a punishment for failing to be out of their tents at first call, a definite number of tours between their tents and the fourth class sink.
3. Compelling fourth class men to perform other duties as a punishment.
4. Compelling fourth class men to pick up ants in the company street and to wrestle with each other as a punishment and for the amusement of upper class men.
5. Challenging them to fight by offering to give them satisfaction, personal or otherwise, if said fourth class men are not satisfied with the treatment accorded them by upper class men.

With reference to more serious violations, the practices seem to differ somewhat in different companies, but it may be said that there have been several cases of menial services in some form, and punishments by bracing are general throughout the corps.

From a careful consideration of the above evidence obtained from all the classes now present in the corps, the board find, in addition to the general facts above stated, the following specific cases of hazing:

ROSSELL.

Requiring or permitting fourth class men to perform menial service by folding his cot and sweeping out his tent.

Laying hands upon and treating with violence fourth class men; pushing his hand into the stomachs and chins of said fourth class men while bracing them as punishment.

Tyrannizing over fourth class men; challenging them to fight by offering to give them satisfaction, personal or otherwise, if said fourth class men were not satisfied with the treatment accorded them by upper class men.

Tyrannizing over and humiliating fourth class men; requiring them to collect certain number of ants from a tree and on the ground in the vicinity of his tent; and requiring fourth class men to wrestle between the tents for his amusement and that of other upper class men.

Entering the tents of fourth class men for the purpose of annoying, harassing, and punishing said fourth class men by bracing them severely.

B. Q. JONES.

Requiring fourth class men of his company to double time back and forth from company street to sink as a punishment, between June 16 and July 11, 1908.

H. G. WEAVER.

Tyrannizing over fourth class men; challenging them to fight, by offering to give them satisfaction, personal or otherwise, if said fourth class men were not satisfied with the treatment accorded them by upper class men.

Tyrannizing over fourth class men; commandant of table, requiring or permitting him to sit for a period of time with feet raised to the bottom of dining table while at meal.

Entering the tent of fourth class men for the purpose of annoying, harassing, and punishing said fourth class man by bracing him severely.

Laying hands upon and treating with violence another cadet; pushing his hand into the stomach and chin of a fourth class man while bracing him as punishment.

G. W. CHASE.

Inviting and permitting fourth class men to perform menial service for him by making down his bed during the last week in June and on or about July 13, 1908.

PRUDE.

Requiring fourth class men to "brace" for definite periods of time as punishment.

Entering the tents of fourth class men for the purpose of annoying, harassing, and punishing said fourth class men by bracing them severely.

I. SPALDING.

Laying hands upon and treating with violence another cadet; pushing his hand into the stomach and chin of a fourth class man while bracing him as a punishment.

Tyrannizing over a fourth class man; challenging him to fight by offering him satisfaction, personal or otherwise, if said fourth class man was not satisfied with the treatment accorded him by upper class men.

Entering the tent of a fourth class man for the purpose of annoying, harassing, and punishing said fourth class man by bracing him severely.

NALLE.

Entering the tent of fourth class men for the purpose of annoying, harassing, and punishing said fourth class men by bracing them and requiring them to stand on their toes for periods of time.

J. A. GILLESPIE.

Laying hands upon and treating with violence another cadet; pushing his hand into the stomach and chin of a fourth class man while bracing him as punishment.

Tyrannizing over a fourth class man; challenging him to fight by offering him satisfaction, personal or otherwise, if said fourth class man was not satisfied with the treatment accorded him by upper class men.

Entering the tent of a fourth class man for the purpose of annoying, harassing, and punishing said fourth class man by bracing him severely.

The evidence in the above cases is conclusive. In the cases of Cadets Rossell and Jones, B. Q., it is supported by the testimony of practically every fourth class man in their respective companies, and by the testimony of practically every upper class man who was called before the board.

The practice of double-timing tours, inaugurated by Cadet Jones, B. Q., has been kept up from the beginning of camp until about a week ago. The evidence shows that he has caused every fourth class man in his company, except one, to undergo this punishment, and that as many as 18 tours have been run off consecutively.

The evidence further shows that these serious violations of the regulations have come into vogue during the present encampment, and that they have increased in frequency and severity down to the present time.

In view of the serious nature of these offenses, of the flagrant manner in which they were committed, and of the sudden occurrence and rapid growth of these former practices of hazing, which in the past few years had been entirely stamped out, the board is of the opinion that immediate action is imperative, and recommends that Cadets William T. Rossell, jr., and Harry G. Weaver, first class, United States Military Academy, and Cadets B. Q. Jones, G. W. Chase, William W. Prude, Isaac Spalding, W. Nalle, jr., J. A. Gillespie, third class, United States Military Academy, be summarily dismissed.

The board then, at 5.45 p. m., adjourned sine die.

ROBT. L. HOWZE,
Lieutenant-Colonel, U. S. Army, Commandant of Cadets.
MORTON F. SMITH,
Captain Twentieth Infantry.
C. P. SUMMERALL,
Captain, Second Field Artillery.
GEO. S. SIMONDS,
Captain, Twenty-second Infantry, Recorder.

Approved July 21, 1908, at West Point, N. Y.

H. L. SCOTT,
Colonel, U. S. Army, Superintendent.

Special Orders, No. 141.

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., July 21, 1908.

2. In accordance with the approved findings and recommendations of a board of officers convened under paragraph 128, Regulations United States Military Academy, by Special Orders, No. 137, current series, these headquarters, and consisting of Lieut. Col. Robert L. Howze, commandant of cadets; Capt. Morton F. Smith, Twentieth Infantry, senior instructor of infantry tactics; Capt. Charles P. Summerall, Second Field Artillery, senior instructor of artillery tactics, and Capt. George S. Simonds, Twenty-second Infantry, recorder, and in obedience to an act of Congress, approved March 3, 1901 (31 Stat. L., 911), to prevent the practice of hazing at the Military Academy, and under authority contained in paragraph 130, Regulations United States Military Academy, the following-named cadets will proceed forthwith to their homes, there to await the action of the Secretary of War:

Cadets William T. Rossell, jr., and Harry G. Weaver, first class, and Byron Q. Jones, George W. Chase, jr., William W. Prude, jr., Isaac Spalding, William Nalle, jr., and James A. Gillespie, third class.

By order of Colonel Scott:

J. S. HERRON,
Captain, Second Cavalry, Adjutant.

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., July 21, 1908.

SIR: I have the honor to forward herewith proceedings of a hazing board which I have approved, and thereafter issued the inclosed order. This action has been made necessary by the law and by the fact that the practice of hazing, always latent in every educational institution, and which has been kept down heretofore with effort, suddenly started up within a short while, and needs an energetic and radical action to prevent its further spread. It has been kept so secret that it was not until after this board had begun its work that it was known the practice had partially revived, and nothing but prompt and severe treatment will avail to keep it down.

Very respectfully,

H. L. SCOTT,
Colonel, U. S. Army, Superintendent.

THE ADJUTANT GENERAL, U. S. Army,
War Department, Washington, D. C.

WAR DEPARTMENT,
Washington, July 22, 1908.

MY DEAR MR. LOEB: Herewith I beg to hand you a letter from the Superintendent of the Military Academy, inclosing proceedings of a hazing board recommending the dismissal of a number of cadets. As shown by inclosed printed order, these cadets have been directed to proceed to their homes to await the action of the Secretary of War. I have the honor to submit this matter for the consideration of the President, attention being invited to the following provision of law governing the subject of hazing at the Military Academy:

"The Superintendent of the Military Academy shall make such rules, to be approved by the Secretary of War, as will effectually prevent the practice of hazing; and any cadet found guilty of participating in or encouraging or countenancing such practice shall be summarily expelled from the academy and shall not thereafter be reappointed to the corps of cadets or be eligible for appointment as a commissioned officer in the Army or Navy or Marine Corps until two years after the graduation of the class of which he was a member." (Act of March 3, 1901, 31 Stat. L., 911.)

The return of the inclosed papers is requested, with such instructions of the President as he may care to issue.

Very truly, yours,

ROBERT SHAW OLIVER,
Acting Secretary of War.

Mr. WILLIAM LOEB, Jr.,
Secretary to the President, The White House.

OYSTER BAY, N. Y., *July 23, 1908.*

MY DEAR SECRETARY: Returning herewith the papers in the hazing cases at the Military Academy, which accompanied your letter of the 22d instant, I beg to state that the President approves of the action taken.

Very truly, yours,

WM. LOEB, Jr.,
Secretary to the President.

Hon. ROBERT SHAW OLIVER,
Acting Secretary of War.

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., August 15, 1908.

MY DEAR MR. SECRETARY: When we parted in New York I understood that you intended to send the papers in the case of the cadets, with your indorsement containing certain specific directions, back here for compliance and return the results to you for the necessary action and in this way preserve the sequence and record.

I find, however, upon my return from the test ride at Fort Ethan Allen that no papers have arrived, and a purported interview in the newspapers seems to convey the idea that you were waiting for some independent action on my part, which leaves me in doubt as to whether I am to wait for the papers and written instructions or not, but I would greatly prefer to get them.

Very sincerely, yours,

H. L. SCOTT,
Colonel, U. S. Army, Superintendent.

Hon. LUKE E. WRIGHT,
Secretary of War, Washington, D. C.

WAR DEPARTMENT,
Washington, August 17, 1908.

MY DEAR COLONEL SCOTT: I have your letter of the 15th instant with reference to the West Point hazing cases. You will recall that at our interview with the President he expressed a desire to have a reconsideration of the cases of all the cadets except the two first class men, and that a recommendation be made that the other six be turned back a year. I have been expecting to get a recommendation from you to this effect. I return herewith the principal papers in the case; that is, the record of the evidence obtained from the witnesses, the proceedings of the board, and the finding. I suggest that it might be well for you to send your recommendations to me based on our last conversation with the President at Oyster Bay. I recall that you stated that one man was a worthless sort of fellow, and probably it will be in the interests of the service to take advantage of this opportunity to get rid of him.

I trust you will take this matter up as soon as possible, as I am anxious that the matter should be ended.

Very sincerely, yours,

LUKE E. WRIGHT.

Col. HUGH L. SCOTT,
Superintendent U. S. Military Academy, West Point, N. Y.

AUGUST 19, 1908.

MY DEAR MR. PRESIDENT:

* * * * * * *

In talking this case over with Colonel Scott to-day it seems that his principal reason for recommending the expulsion of Cadet Jones is that he assumed to direct the plebes to fall into line at the first call, which was asserting the functions of an officer of the academy. At the same time he tells me that Jones is really one of the strongest characters and most promising cadet in his class. Indeed, on asking him the question, he said that in case he was called upon to raise a regiment for actual war he would rather have Rossell and B. Q. Jones for captains than any two youngsters in the academy. Undoubtedly Jones was guilty of serious misconduct in giving such an order to some or all of the plebes. At the same time, in my judgment, it can not be called hazing within the definition of that term as used in the Standard Dictionary. I have therefore concluded that there is no good reason why Jones should not be allowed to remain in the academy upon the terms and with the punishment hereafter suggested.

Rossell and Weaver are the suspended first class men. The former stands high in his class and is altogether a forceful and, I think, a manly chap. * * * Rossell seems to have been a ringleader in interfering with the plebes, and in at least one instance, and probably more, laid hands upon them, although not violently, and intimated, when objection was made, that the victim should either submit or fight. This probably brings him directly within the law, and I see no other course than that he should go. Weaver seems to have been not quite so pronounced in his behavior, although he was guilty of practically the same thing as Rossell. The remaining cadets are, I believe, third class men.

It seems to me that in dealing with these young men their difference in age and their length of service in the academy should be given consideration. Rossell and Weaver, as first class men, are much more matured, both in age and knowledge of the rules and consequence of their infraction, while the third class men had just ceased to be plebes; and, as they all say, and I have no doubt is the fact, were simply deviling the newcomers just as they themselves had been treated, and probably without any real reflection or perhaps knowledge of the gravity of their offenses as laid down in the rules. Under these circumstances I think a clear distinction should be drawn between the offenders belonging to the first and third classes.

The act of Congress that forbids hazing and directs regulations to be made by the authorities of the academy does not prescribe what hazing

is. This is not a technical term, and we can only ascertain the meaning of the word by reference to the standard dictionaries. Webster's International Dictionary defines hazing "To harass or annoy by playing abusive or shameful tricks upon; to humiliate by practical jokes; used especially on college students; as, the sophomores hazed a freshman." The Century and Standard dictionaries give practically the same definition. Now, none of the acts shown to have been committed by these young men come within this definition of hazing. The evidence shows that while the offenders directed the plebes to "brace"—that is, stand at attention with their shoulders thrown back—rub buckles, clean guns, bring water from the spring, fall in at the first assembly call instead of five minutes later at the second call, still none of these acts can hardly be fairly brought within this definition. They all undoubtedly were improper interference with the plebes, constituting an assumption of authority over them in direct conflict with the regulations, for which severe punishment should be meted out. But the act of Congress which forbids hazing is extremely drastic in character, in that it provides that any cadet found guilty of hazing shall be summarily dismissed from the academy, and in addition shall not be reappointed to the corps of cadets or be eligible for appointment as a commissioned officer in the Army or Navy or Marine Corps until two years after the graduation of the class of which he was a member. This being so, I do not feel that it is just to extend the operations of this severe statute by implication, especially in view of the fact that, in my judgment, the offenses of which these young men were undoubtedly guilty can be adequately punished without resorting to the extreme penalty of expulsion. It is the certainty of punishment rather than the severity that deters the commission of offenses. At the same time it should be made very clear to all the young men at the academy that obedience to the regulations imposed and the observance of a proper deportment toward the younger members is exacted.

I therefore recommend that Cadets Rossell and Weaver be dismissed from the academy, and that the other six be suspended with loss of all pay and allowances until June 15, 1909, when they will join the then third class. This is the course recommended by Colonel Scott, and I am inclined to think with him that it will be better to have them remain in their homes during the year of suspension rather than to go over the same course which they have just finished, which would be the case were they turned back a year and allowed to remain at the academy. He tells me that this is the usual procedure in such cases.

Sincerely, yours,

LUKE E. WRIGHT,
Secretary of War.

The PRESIDENT,
Oyster Bay, N. Y.

DEFINITIONS OF HAZING.

STANDARD DICTIONARY.

HAZE, *verb.* 1. To subject to sportive maltreatment; make the victim of severe practical jokes; play pranks upon; put through a harsh mock discipline; said of a student at a school or college.

"Quickly following my admission I was broken in by a course of *hazing*."—Memoirs of Lieutenant General Sheridan, volume 1, chapter 1, page 9.

2. To punish or harass by the imposition of excessively heavy or disagreeable tasks; said chiefly of seamen.

CENTURY DICTIONARY.

1. To harass with labor; punish with unnecessary work, as a seaman.

"Every shifting of the studding sails was only to haze the crew." (R. H. Dana, Two Years Before the Mast, p. 50.)

2. To play mischievous or abusive tricks on; try the pluck or temper of, especially by physical persecution, as lower-class students in a college, or newcomers in an establishment of any kind.

"'Tis the sophomores rushing the freshmen to haze." (Poem before Iadma, quoted in College Words, p. 251.)

WEBSTER'S INTERNATIONAL DICTIONARY.

1. To harass by exacting unnecessary, disagreeable, or difficult work.

2. To harass or annoy by playing abusive or shameful tricks upon; to humiliate by practical jokes—used especially of college students; as, the sophomores hazed a freshman.

OYSTER BAY, N. Y., *August 20, 1908.*

MY DEAR GENERAL WRIGHT: I cordially approve of what you say in your letter, and direct accordingly that Cadets Rossell and Weaver be dismissed from the academy and that the other six be suspended with loss of all pay and allowances until June 15, 1909, when they will join the then third class; and suggest that, if necessary, all of your letter, excepting the first paragraph, be given to the public.

* * * * * * *

Sincerely, yours,

THEODORE ROOSEVELT.

Hon. LUKE E. WRIGHT,
Secretary of War.

These papers relating to discharge of cadets seen by Assistant to the Chief of Staff to-day. The Chief of Staff is not in his office.

H. P. McC., *A. G.*

AUGUST 22, 1908.

House Military Committee (60th Cong., 2d sess.) requests report on House bill No. 23448, authorizing the President to reinstate William T. Rossell, jr., and Harry G. Weaver, as cadets in the United States Military Academy.

Received from War Department marked "A. G."

[First indorsement.]

WAR DEPARTMENT,
THE ADJUTANT-GENERAL'S OFFICE,
Washington, December 1½, 1908.

Respectfully referred to the Superintendent United States Military Academy, West Point, N. Y., for remark.

By order of the Secretary of War:

F. C. AINSWORTH,
The Adjutant-General.

[Received back, A. G. O., December 20, 1908.]

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., December 19, 1908.

Respectfully returned to The Adjutant-General, United States Army, War Department, Washington, D. C.

The subject of hazing has always been a most difficult one and productive of much trouble in the past. Its consequences are not to be at all compared with similar acts committed in a civilian college or university. The records show that the superintendents for more than forty years have endeavored in vain to completely abolish it. A few years ago it brought about a congressional investigation and a special law against it. This caused a cessation for a time, but it is always liable to crop out suddenly, and should be kept down with a strong hand, and the authorities here should be supported by the higher authorities or it will work great damage to the discipline and good name of the Military Academy. It is against the sentiment of the American people, whose school this is and who have forbidden it through their Congress by a special act.

The dismissal of these cadets was recommended regretfully after an investigation by a board of officers, which gave the subject the most careful consideration. The cadets were well aware of the consequences of their acts; they had had the benefit of three years' instructions and were within a year of their graduation when, if ever, they should have attained sufficient dignity and sense of responsibility to their Government to prevent them from such acts; and as much as the consequences to the cadets themselves are regretted, it is impossible to recommend any action that will permit the cadets of West Point to believe that the acts of Congress do not mean what they purport and can be violated with impunity.

H. L. SCOTT,
Colonel, U. S. Army, Superintendent.

[Third indorsement.]

To the Chief of Staff.

[Telegram.]

WASHINGTON, D. C., *December 30, 1908.*

I understand the academic board at West Point proposes to drop ———, first class man from Rhode Island. As his demerits are only a bare fraction over the limit prescribed by the board, I hope he may be given another chance.

GEO. PEABODY WETMORE, U. S. S.

Hon. LUKE E. WRIGHT,
Secretary of War, Washington, D. C.

[Telegram.]

CHATTANOOGA, TENN., *December 29, 1908.*

Please delay action in matter of dismissal of cadet from West Point until Tuesday next, when I will see you; am anxious for retention of ———, an appointee on personal grounds of the President.

JOHN A. MOON.

The SECRETARY OF WAR,
Washington, D. C.

[Telegram.]

CHATTANOOGA, TENN., *December 29, 1908.*

Please suspend action on Cadet ———, dismissed from West Point on account of failure in examination, till I can confer with you on Monday next.

J. B. FRAZIER.

Hon. LUKE E. WRIGHT,
Secretary of War, Washington, D. C.

WASHINGTON, D. C., *December 31, 1908.*

SIR: I have the honor to submit the following communication:

In the recent examination held at West Point I was declared deficient in conduct, as I received seven more than the number of demerits allowed for the six months ending November 30, 1908.

These demerits were not received for any offense which could in any way affect my standing as an officer and a gentleman, but for infractions of minor regulations which were in many cases unintentional.

Also, I was not aware that I was in danger of exceeding the allowed number until I had done so.

The offenses committed by me were not committed in a spirit of indifference or insubordination, but were due principally to thoughtlessness and to the fact that I did not realize the importance of the regulations which I broke.

For the aforementioned reasons, I request that clemency be shown me in this matter, and that if possible some other punishment be substituted for that of dismissal, which would prevent my following a career for which I have been preparing for the last four years and which has been the one aim of my life up to the present time.

Very respectfully,

———— ————,
Cadet Private, Company A, First Class, U. S. C. C.

The SECRETARY OF WAR
(Through military channels).

[First indorsement.]

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., December 2, 1908.

Respectfully referred, by direction of the superintendent, to the commandant of cadets for remark and recommendation.

J. S. HERRON,
Captain, Second Cavalry, Adjutant.

[Second indorsement.]

HEADQUARTERS UNITED STATES CORPS OF CADETS,
West Point, N. Y., January 4, 1909.

Respectfully returned to the adjutant, United States Military Academy, recommending that this application be disapproved.

Whenever at any time this cadet had more demerits than an average of 18 per month he was duly notified. He had free access to the books which exhibit the number of demerits cadets have, provided he was not serving special punishment. In that case it would have been a simple matter for him to have prevailed upon a classmate to get the information; further, he could have gotten the information by applying directly to this office.

The facts are that at the end of October he did not have a monthly average of 18 demerits, but during November, the last month of the six-month period, he committed offenses which resulted in his receiving some 41 demerits. It is evident that during this last month he deliberately and purposely disregarded the regulations in every way that he possibly could, going so far as to commit an intentional breach of confinement, for which he was awarded two months' special confinement and 10 demerits. This cadet has been not only indifferent to the observance of the regulations, but he has shown a thorough disregard of them, increasing in these respects as he has advanced in his cadetship.

The total number of demerits recorded against this cadet was 123. His case was carefully considered by a board of officers, which called upon him and weighed every claim and statement he had to make concerning the demerits recorded against him, and after giving him the benefit of all doubt recommended that 8 demerits be removed, which recommendation was approved. All but one member of the board voted upon the merits of this cadet's case without knowing the number of demerits involved. The board acted conscientiously, guarding well the cadet's interests, and at the same time the interests of the academy; if it erred at all it was distinctly on the side of leniency toward the cadet. The limit of demerits which a cadet may get during the six months is 108. This limit is sufficiently large for any cadet who desires and tries at all to keep within it—in fact, there was a distinct liberality shown in fixing this high limit.

The regulations concerning discipline have with but few modifications been enforced since the beginning of the academy; without the proper enforcements of these regulations the ends intended would not be accomplished; it would not be a fit place for the training of young men in the observance of discipline and the military regulations, and the good men of the country would not want their sons trained here. The aim of the institution would miss its mark. Fortunately, from the beginning and up to the present time when a cadet has without any doubt so violated the rules and regulations as to have received a number of demerits in excess of the authorized allowance he has invariably been discharged, and, I think, never reinstated or even turned back to another class.

The strict enforcement of these regulations is the main sustaining principle upon which the good name and reputation of the academy depend, and there should under no circumstances be any divergence therefrom. The fact that this is a military academy should not be lost sight of, and it is my fixed opinon that a young man, while in the atmosphere which surrounds him here, who so disregards the requirements of discipline and is declared deficient therein can rarely, if ever, make an efficient and capable officer, fitted for the serious responsibilities which will be imposed upon him. There are other and better young men ready to take his place, and certainly they should be given a chance to do so.

Should cadets who have been declared deficient in conduct be returned the effects on discipline would be seriously felt, and the respect which cadets should and at present do have for the authorities here would be very much lowered. Under no circumstances should cadets so discharged be reinstated.

ROBERT L. HOWZE,
Lieutenant-Colonel, U. S. Army, Commandant of Cadets.

[Third indorsement.]

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., January 9, 1909.

Respectfully referred to The Adjutant-General United States Army, War Department, Washington, D. C., inviting attention to the report of the academic board, which included consideration of the case of Cadet ————, first class, United States Military Academy, forwarded to The Adjutant-General United States Army, this date.

H. L. SCOTT,
Colonel, U. S. Army, Superintendent.

THE WHITE HOUSE,
Washington, January 4, 1909.

There are five young men who have been recommended for dismissal by the academic board at West Point for what seems to me insufficient reasons. They are Cadets ————, ————, ————, ————, and ————.

Can not the academic board be reconvened to consider again its action, so far as relates to these men? It seems to me that the needs of the service can be met by some arrangement less than discharge. I think it would be an entirely needless hardship to turn these boys out. If necessary, let them each go back one year.

THEODORE ROOSEVELT.

The WAR DEPARTMENT.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
January 5, 1909.

[Memorandum for The Adjutant-General.]

The Secretary of War directs that this letter of the President's be transmitted to the Superintendent of the Military Academy, with directions to reconvene the academic board for the purpose mentioned therein.

J. F. BELL,
Major-General, Chief of Staff.

[First indorsement.]

WAR DEPARTMENT,
THE ADJUTANT-GENERAL'S OFFICE,
Washington, January 5, 1909.

Respectfully referred to the Superintendent United States Military Academy, West Point, N. Y., with directions to reconvene the academic board for the purpose of considering again its action in the cases of these cadets.

By order of the Secretary of War:

F. C. AINSWORTH,
The Adjutant-General.

[Second indorsement.]

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., January 9, 1909.

Respectfully returned to the Adjutant-General, U. S. Army, War Department, Washington, D. C., inviting attention to the inclosed report of the academic board herewith.

H. L. SCOTT,
Colonel, U. S. Army, Superintendent.

Received back Adjutant-General's Office January 10, 1909, with one inclosure to second indorsement.

Informally to the Chief of Staff, January 11, 1909.

Received back, Adjutant-General's Office, January 13, 1909, with one additional inclosure, memorandum from Chief of Staff, as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
January 11, 1909.

MEMORANDUM FOR THE ADJUTANT-GENERAL.

The Secretary of War directs that the recommendations of the academic board contained in the last paragraph of its report, dated January 9, 1909, herewith, be carried out, by order of the President.

J. F. BELL,
Major-General, Chief of Staff.

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., January 9, 1909.

The academic board of the United States Military Academy, having before it the letter of the President of the United States of January 4, 1909, concerning the cases of Cadets ———— and ————, of the first class, ———— and ————, of the third class, deficient in discipline, and Cadet ————, of the third class, deficient in mathematics and drawing, desires to submit for his consideration the following presentation of the principles which have guided it in these and similar cases, and of the particular circumstances attending each of the cases under advisement.

In a great military school of the importance and high standing of this institution, the board conceives that one of its chief functions is the disciplinary training it confers and its efficiency as a character-forming mechanism. These attributes, which above all others go to the development of an efficient officer whose duties concern the command, the guidance, the well-being, and even the lives of those under him, and upon whom the country relies in time of emergency for the exhibition of the highest qualities of mind and character, are essentially matters of discipline, of self-control, of a sense of responsibility, and of conformity to law and authority.

These qualities are acquired only by habit and under an impartial enforcement of the regulations and orders which govern their daily duties. This disciplinary influence is progressive and cumulative and should, before the student is intrusted with command, have been assimilated and should have been productive of results sufficient to justify the authorities in certifying that he has qualified for the responsibility of command as an officer of the United States Army. Failure to show this acquirement on the part of the individual becomes increasingly represensible and indicative of incapacity for responsibility in proportion to the length of the period of probation.

During the first year of cadet service every leniency is shown in the consideration of the disciplinary shortcomings of the novice, and he is given abundant opportunity to adjust himself to the conditions of military service and requirements. During the second year the responsibilities are increased, the novitiate has been passed, and the cadet is familiar with the obligations and regulations and the necessity of conforming thereto. From that time forward, ignorance of the requirements of his environment are no longer to be pleaded in extenuation. Whatever breaches of discipline are committed are done with a full knowledge of their character and the consequences involved. By the time the cadet has attained the dignity of a first class man (corresponding to that of senior in college) not only has he become experienced in the exactions of the military life, but he has attained maturity of mind and of body; he is about to assume command and its responsibility. Furthermore, in the administration of discipline by cadet officers, as a cadet advances in class rank he is reported with much less frequency for trifling violations of discipline.

When a first class man, therefore, receives so many reports as to endanger his status it indicates a very high degree of carelessness and indifference to regulations.

Prior to this year, since 1884, but one first class man has been deficient in conduct.

In this connection, the board observes the fact that these cadets are no longer boys, but have attained the age of manhood. The actual ages of the four individuals now deficient in discipline are as follows: Cadets ——— and ———, first class, are, respectively, 22 years 11 months and 23 years 5 months of age. Cadets ——— and ———, third class, are, respectively, 23 years 1 month and 22 years 5 months of age. Cadet ——— is not in the same category, but is deficient in two studies, and his case will be referred to subsequently.

It has been urged in reference to the deficiency of these cadets in conduct that they have exceeded the limit by only a few demerits. In the first place, the limit of demerits fixed by the regulations of the Secretary of War is exceedingly liberal, and no cadet at any time, with reasonable attention to his duties, need come anywhere near the danger limit. The limit is made thus liberal for the purpose of affording no excuse to those who exceed it. The same plea could be urged in extenuation of a slight excess of any limit whatever, no matter how liberal it might be. To show that this plea is not valid in these cases, the board wishes to state the fact that the average number of demerits of the other cadets in the first class was 32, Cadets ——— and ——— having received, respectively, 118 and 123. Their final showing of 109 and 115, respectively, was due to the fact that a special board of officers was appointed to consider their deficiencies; to examine the nature of each report given; to afford the individuals opportunity to protest or explain in any case as to the justice or validity of the report; and to remove whatever reports in its judgment could be overlooked by a lenient construction of the circumstances under which they were given. This board cited the cadets before it, listened to any special explanation they had to give, and finally removed a certain number of reports in each case without knowledge of the number of demerits attaching to each report. This resulted in leaving Cadet ——— still deficient, with 109 demerits, and Cadet ——— also deficient, with 115.

In the case of Cadets ——— and ———, of the third class, the same process was put into operation by the board, with the result of leaving *these men deficient*, with 111 and 109 demerits, respectively.

In the third class the average number of demerits for the other members of that class was 56. It will be observed, therefore, that in the case of first class men, Cadet ——— had over three times the average number of demerits of his classmates, and Cadet ——— nearly four times that number. Cadets ——— and ——— had about twice as many as the average of their classmates.

Offenses against discipline are divided into seven classes, for each of which a fixed number of demerits is given. Cadets are stimulated to observe the regulations by dividing them into three grades according to conduct, each grade being given certain privileges. In the first class the first grade requires that a cadet shall obtain less than 18 demerits in six months; the second grade less than 42; and the third grade includes those who exceed the latter limit; in the third class these limits are 24 and 54, respectively. As showing how readily excessive demerits may be avoided, it can be stated that about 75 per cent of each class is habitually in the two upper grades.

It has been the practice of the academic board, therefore, to regard a deficiency in conduct as final, and as one of the most satisfactory proofs that can be secured of the unfitness of an individual for the military career. Deficiency in conduct is a clear evidence, after a certain period of probation, of a want of a proper sense of responsibility and subordination, which in the cases of the two first class men under consideration led to flagrant and overt acts against discipline. They could not have been ignorant of the fact that they had received many reports and were in more or less danger of deficiency. As long ago as last August the superintendent took occasion to publish a special order to the corps of cadets warning all of the necessity of the exercise of extreme care in regard to their conduct. In spite of and in defiance of these facts, these cadets deliberately committed an offense carrying the maximum number of demerits.

As stated above, the case of Cadet ——— is one of deficiency in studies and not in conduct. He stood at the bottom of the cadets deficient in mathematics and drawing after final examination for proficiency.

The academic board, with a long and intimate experience of the disciplinary methods of this institution, and the effects upon the cadets of unusual leniency, respectfully asks an earnest consideration of the very serious effect upon the morale of a body of young men who are being educated to high standards of conduct and of honor in seeing the disciplinary standards of the institution set aside in spite of the warnings of experience and the admonitions of their superior officers. If the young gentlemen of the corps feel that upon every occasion when they have brought upon themselves the penalties of failure, and when after the administration of the institution has conscientiously sat in judgment upon their status, a reversal can be obtained by an appeal to higher authorities, the administrative authority of the institution is brought into contempt and the powerful influences which an impartial operation of the governing mechanism of military education should bring about is nullified.

The board finds a growing tendency on the part of all those who, from one cause or another, have failed to come up to the standards of this institution to endeavor to secure by a presentation of their case and an appeal to the sympathies of friends in authority a reversal of judgment in their favor. The board believes that it is of the highest importance, in order that the standards and traditions of this institution may be maintained, that the hands of the academic authorities should be upheld. The academic board, far from being austere or harsh in its action upon cases of deficiency, either in conduct or studies, endeavors, on the contrary, to be most lenient, and acts only after long deliberation and careful inquiry into all the conditions surrounding each individual case.

If, after a consideration of this statement, the President is still of the opinion that leniency should be exercised in these cases, the board, in deference to the judgment and wishes of the President of the United States, recommends with reluctance that Cadets ——— and ——— be suspended without pay and allowances until January 1, 1910, and at that time turned back to join the then first class; that Cadets ——— and ——— be suspended without pay and allowances until August 28, 1909, and at that time turned back to join the then third class; that Cadet ——— be turned back to join the present fourth class immediately.

H. L. SCOTT,
Colonel, U. S. Army, Superintendent, President Academic Board.
J. S. HERRON,
Captain, Second Cavalry, Adjutant, Secretary Academic Board.

Mr. SCOTT. What is the ruling of the Chair?

The VICE-PRESIDENT. Does the Senator from Ohio insist upon his point of order?

Mr. DICK. Unless other Senators desire to discuss the question, I insist upon the point of order.

The VICE-PRESIDENT. The Chair is of the opinion that the point of order is well taken, and sustains it.

The bill was reported to the Senate as amended, and the amendments were concurrd in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

INTERMARRIAGE OF WHITES AND NEGROES.

Mr. MILTON. Mr. President, I ask the Chair to lay before the Senate the resolution submitted by me Saturday.

The Secretary read the resolution submitted by Mr. MILTON February 27, 1909, as follows:

Senate resolution 306.

Resolved, That the Committee on the Judiciary be discharged from further consideration of the bill (S. 8462) prohibiting the intermarriage of any white person to a negro in the District of Columbia, or in any Territory of the United States, and making the issuance of such marriage, if any, incapable of inheritance, and describing the penalty for such intermarriage, and defining the word "negro," and further prescribing a penalty for any person performing such marriage ceremony.

Mr. MILTON. Mr. President, in offering this resolution I am not actuated by any desire to reflect on the Judiciary Committee, but there are so many bills for this committee to consider and pass on that I desire to relieve it of any responsibility in reference to this measure. It needs no great deliberation by any committee, as there is not a Member of this body who is not fully informed as to the object of such a bill, and, I think, is prepared to vote on the measure. It contains no new matter; a similar law is now in force in 28 States and Territories of the United States, and in many of them has been in operation for years. The object of the bill is the preservation of the Union for the sons and daughters of the patriots whose life blood is the foundation of our great Republic. The race question and its distinctions has occupied public attention for many years and has been the cause of much discussion. Many of the States, notably in the South, where the question is paramount, provide separate schools, separate railroad and street cars, and other public accommodations and necessities for the white and black races. This is not true of the North, but I think there is no section of the Union that has as a whole advocated or even welcomed miscegenation between the white and negro races. Even during the years of reconstruction, when sectional prejudice and feeling was at its height, when the whole power of the Federal Government and state government, urged on by the feelings engendered by four years of war, was doing everything and bending every energy to put the negro on an absolute equality with the white people of this land, even when the southern state governments were in entire control of the carpetbagger and the negro, not one single Southern State repealed its laws prohibiting intermarriage.

South Carolina, which suffered as much as or more than any other State from negro misrule in 1865, before the state government went into the hands of the reconstructionists, enacted laws which specifically defined the rights of negroes. A short time after the statutes were adopted the reconstruction legislature repealed them, but added in the repealing act that it should not apply to that part of the statutes of 1865 which said that marriages between whites and colored should be illegal and void. Texas and Arkansas enacted in 1867 and 1868 laws against such intermarriages, which were not repealed.

Georgia's constitution of 1868 expressed—

The social status of the citizen shall never be the subject of legislation.

The Supreme Court upheld this clause in so far as it related to marriages.

The constitution of Alabama provides for this in the following outspoken terms:

The legislature shall never pass any law to authorize or legalize any marriage between any white person and a negro, or descendant of a negro.

The present status of the laws of the different States on intermarriage is that it is prohibited by the statutes of Alabama, Arizona, Arkansas, California, Colorado, Delaware, Florida, Georgia, Idaho, Indian Territory, Indiana, Kansas, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Nebraska, Nevada, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Virginia, and West Virginia. Six States have gone further, and, in addition to enacting laws in contravention of intermarriage, have also prohibited such in their respective constitutions.

These are: Alabama, Georgia, Florida, Mississippi, North Carolina, and Texas. These constitutions and statutes do not leave any doubt as to what parties are intended; the negro is clearly defined. Virginia and Louisiana say that there shall be no intermarriage between white persons and persons of color, and Virginia states further that a person of color is one that has as much as one-fourth negro blood. Arkansas, Colorado, Delaware, Idaho, Indian Territory, and Kentucky prohibit intermarriage between white persons and negroes or mulattoes. There is no specific definition of "mulatto." By such term we mean a person of mixed blood, one of whose ancestors was a negro and extends to the third generation, inclusive. Georgia says persons of African descent. Oklahoma and West Virginia say negroes. Florida also says negroes, but includes every person of one-eighth or more negro blood. So also do Indiana and Missouri. Alabama, Maryland, and North Carolina apply the restriction to negroes or persons of negro descent to the third generation, inclusive. Tennessee says negroes, mulattoes, or persons of mixed blood descended from a negro to the third generation, inclusive. The Nebraska law applies to persons of one-fourth or more negro blood. Arizona, California, Utah, and South Carolina use the word "negro." The Mississippi law applies to negroes or mulattoes, or persons who shall have one-eighth or more negro blood. All of the other States first named, not specifically mentioned, use one or more of these terms.

Senators will note that the laws prohibit marriages where there is one-eighth of negro blood. But you must not suppose that a negro of less degree of pure blood is any the less a negro. Most of the laws were passed before and shortly after the civil war, when the discussion of the negro question was warmer than it is now, and I think the men of that date adopted the view of a distinguished Southerner, whose name I do not now recall, who suggested there was no danger of further mixture after the third degree, as no child of less than one-eighth negro blood ever arrived at years of maturity. Whether this is true or not, I can not say, as I have never known any mixed persons except mulattoes, quadroons, and octoroons.

Should an attempt at intermarriage be made, the laws of these States are all sure and certain as to the effect. Indiana, Kentucky, Maryland, Nebraska, and North Carolina declare that such a marriage is void; Colorado and Missouri, that it is absolutely void; Arizona, Georgia, and Oregon, null and void; Delaware and Mississippi, unlawful and void; Arkansas, California, Idaho, and Indian Territory, that it is illegal and void. South Carolina says utterly null and void and of no effect. Louisiana says that such a marriage is prohibited. Florida says that such a marriage is unlawful—utterly null and void—and that the issue, bastards, are incapable of inheriting. In the States mentioned such a ceremony, although under license, has no force, and the parties are guilty of this offense and possibly others. The States not mentioned above prohibit intermarriage and prescribe punishment for violation of the law, but do not say what is the legal effect of such a marriage contract. These States have each enacted laws that inflict severe punishment on the parties of either race that attempt to intermarry, and punish the guilty parties by fines ranging from fifty to one thousand dollars, or by imprisonment ranging from three months to ten years, and in some States by both such fine and imprisonment.

One, and possibly more, of the States, while punishing both or either party, would seem to lay the principal guilt on the white person. A great many of the States provide similar punishment for the officer who issues a license for such intermarriage, and such punishment ranges from a fine of one hundred to one thousand dollars, or imprisonment not to exceed two years. Like punishment is imposed upon any minister, justice of the peace, or any person authorized to perform the marriage ceremony who does solemnize such ceremony between white and negro persons. This punishment consists of a fine or imprisonment, the fine not to exceed $1,000, imprisonment not to exceed three years. Cohabitation without marriage between whites and negroes is also punished by severe penalties, and in some of the States punishment for such offense between the two races is made much more severe than for similar offense between persons of the same race. The state courts have decided that the infliction of such a heavier penalty in such cases did not contravene the fourteenth amendment, and the Supreme Court of the United States has upheld this decision on the ground that the law does not discriminate against either race, inasmuch as it is impossible for the crime to be committed unless both races are represented and the punishment for each participant is the same. None of the States have ever made laws against intermarriage between other races than the Caucasian, with one exception. That is the State of North Carolina.

In this State it is unlawful for negroes to intermarry with Croatan Indians or go to the same school with them. At the date of the first English attempt to colonize the New World, there was an island off the coast of North Carolina called Croatan. A colony of 177 persons was landed on this island under Governor John White. Here was born Virginia Dare. Later, a part of the colonists under White had to go back to England to seek further aid. It was agreed that those left behind were to go over to the friendly Croatan Indians if they needed assistance. When Governor White returned, some months later, he found the settlement deserted and carved upon a tree near by the single word "Croatan." For some reason the party under White never went in search of the colonists. Tradition says that they went over to the Croatans and eventually became absorbed in that tribe, and this has received credence from the fact that many of the Croatan Indians have light complexions and blue eyes. These Croatan Indians claim descent from the lost colony, and they have received official recognition in North Carolina, and, I may say, to some extent in Florida as a separate race; and by the statutes of North Carolina the blood of these early settlers will not be further adulterated by intermarriage with the negro.

I have endeavored to lay before you the extent of the laws against intermarriage. A number of the States which prohibit intermarriage do not recognize the validity of such marriage when made in States that do recognize them. Mississippi prescribes punishment for those who attempt to intermarry in that State, and also an attempt to evade the law by marrying in another State and returning to Mississippi. Citizens of Georgia can not evade its law by going to another State. A mixed marriage was solemnized in Mississippi before such marriages were there prohibited and the parties moved to Tennessee, which State did prohibit such marriage. The court of Tennessee held that the marriage in Mississippi did not protect persons living in Tennessee:

> Each State is sovereign, a government within, of, and for itself, with the inherent and reserved right to declare and maintain its own political economy for the good of its citizens, and can not be subjected to the recognition of a fact or act contravening its public policy and against good morals as lawful because it was made or existed in a State having no prohibition against it or even promoting it.

A Virginia couple married in the District of Columbia and returned to Virginia, where they were promptly prosecuted. The court held that although the forms and ceremonies of marriage are governed by the laws of the place where the marriage is celebrated, the essentials of the contract depend upon and are governed by the laws of the place where the parties are domiciled at the time of the marriage and in which the matrimonial residence is contemplated. This decision was affirmed by the federal court. Such marriage of a Georgia man and a woman in the District of Columbia was had, and upon their return to Georgia they were promptly indicted and convicted of violation of the Georgia statute.

The District of Columbia, or the city of Washington, is the city of refuge for such couples, and almost without exception, when they have returned to their native States, they have been held amenable to the laws of that State. The only exception is the marriage of a white person and a negro in the State of Massachusetts, which then, in 1819, prohibited intermarriage. They were married in Rhode Island. The supreme court of Massachusetts held that the marriage was valid where it was celebrated, and was therefore valid everywhere, but, so far as I am informed, no other court has ever followed this decision. The state decisions and statutes which refuse to recognize such mixed marriages have been attacked on two grounds—Article I of section 10 of the Constitution of the United States, which says that no State shall pass any law impairing the obligation of contracts, and the fourteenth amendment to the Constitution, which says that no State shall make or enforce any law which shall abridge the privileges and immunities of citizens of the United States. Almost without exception the courts have held that the States shall have absolute control as to who shall marry or be held in that relation within its territory. In 1871 the Indiana court says:

> In this State marriage is treated as a civil contract, but it is more than a civil contract. It is a public institution established by God himself, is recognized in all Christian and civilized nations, and is essential to the peace, happiness, and well-being of society; in fact, society could not exist without the institution of marriage, for upon it all the social and domestic relations are based. The right of all the States to regulate and control, to guard, protect, and preserve this God-given, civilizing institution is of inestimable importance and can not be surrendered, nor can the States suffer or permit any interference therewith. If the Federal Government can determine who may marry in a State, there is no limit to its power. * * *

Other States have followed the same line of decision to the effect that marriage is more than a civil contract; that it is a

domestic institution, and that the State has absolute control over the question. Since I introduced the bill I have received quite a number of letters on this subject of intermarriage, all favorable to this bill, and I am indebted for citation of authorities and quotations of law to Mr. Gilbert T. Sephenson, of Cambridge, Mass.

I have endeavored to show that this bill does not need any further consideration from a constitutional standpoint, and that this question of race mixture and amalgamation is thoroughly understood, and that Senators are as well informed now as they will be later to vote on this matter. It needs decision now. I do not think anyone can or will question the historical fact that the mixture of an inferior and a superior race has always resulted detrimentally, and no thinking man or citizen desires to have the Caucasian race lose its force and standing as the dominant race. In this instance it goes even further; the negro is more than an inferior race. They present a number of points of difference which indicate a distinct species:

1. Abnormal length of arm, averaging two inches more than the Caucasian.
2. Projection of the jaws at a facial angle of 70 degrees, as against 82 for Caucasian.
3. Average weight of brain, being for gorilla 20 ounces, negro 35 ounces, European 45 ounces.
4. Full black eye with black iris and yellowish sclerotic coat.
5. Short, flat snub nose, depressed at base, broad at the extremity, dilating nostrils, and concave ridge.
6. Thick protruding lips showing inner red surface.
7. Exceedingly thick cranium, enabling him to butt with the head and resist blows which would break an ordinary European skull.
8. Correspondingly weak lower limbs, broad flat foot, divergent and sometimes prehensile big toe and projecting heel.
9. Complexion brown or blackish, due to abundance of coloring matter.
10. Short black hair and distinctly woolly.
11. Thick epidermis, emitting a peculiar rancid odor.
12. Frame of medium height and somewhat out of perpendicular.
13. The early ossification of the skull.

In the thousands of preceding years the negro race has never, of their own inherent force, elevated themselves one iota from their normal condition. There has been with them no advance in civilization or any of the arts and sciences. When they have been subjected to the elevating influence of civilization, received improvement from education and association with the superior races and then left to themselves, the tendency has rapidly been to return to their barbaric state. The press has just recently contained an account of their failure in Liberia and calls for aid from America. In Haiti and Santo Domingo, where they had come in contact with a high degree of civilization and had developed under its influence after the Government had come into their control, they rapidly retrograded, and it is believed by many that some of them have returned to barbarism and are even cannibals. These examples more than show their inferiority as a race or as mongrels.

Reading and investigation of history of races and examination of present conditions demonstrate the undesirability of rearing a race of mongrels. The danger grows greater, and the earlier it is avoided the better for the future of our country. And the most immediate danger is growing out of the District of Columbia. A recent account of a marriage between a white soldier cook and a negress stated that five mixed marriages had been solemnized between whites and negroes in this District within less than that number of months. A short walk through the principal streets of this city will disclose by the many shades of complexion and other characteristics that there is now and here much more danger than I have mentioned. The mulatto element is greater in proportion than in any other part of the Union. I think this is true of all parts of the North where the negro has lived for several generations. Washington is destined to be a great residential city for the wealthy. The idle rich, having exhausted the pleasures of wealth, naturally seek animal pleasures, and the human animal of mixed race is often exceedingly handsome and highly seductive. Unless this and other restrictive measures are taken, such a saturnalia of vice will here reign as has preceded the downfall of other rich and powerful nations. And the danger grows. The occasional social intercourse between a high dignitary and an illustrious negro or mulatto tends rapidly to break down the barriers of general social intercourse, and thus increases the danger.

Here, owing to the political affiliation and supposed or assumed obligations of the dominant political party to push at any cost the uplift of the negro, is vastly increasing the danger to their own race. Mixture of the two races will never create a new race, but the Caucasian will be lost, for one drop of negro blood makes a negro. No matter how white the skin or straight the hair, if either party or both parties to an intermarriage have any negro blood, the resulting offspring of such union may revert and be born a child of the jungle. I do not believe that any Democratic Senator on this floor would vote against this bill, nor do I think that any Republican Senator should do so. You men of the North have listened and hearkened to the call of your brother in black long enough. It is now time to listen to and heed the call of your own race in this matter, and enact measures to protect its purity. It is true that the call comes from the South, but when you drop for a moment your efforts for political advantage you recognize that we are the same race and that our efforts, according to our ideas of government, are as truly for the promotion of the welfare and advancement of our common country as are yours. We are both actuated by the same patriotism and you would be as averse as are we to the downfall of the Caucasian people. From my observation since I have been a member of your body, I do not believe that your abstract love of the negro is so great as to prevent your doing justice and right to your own race, even though the plea comes from one of a different political party.

If your adverse action on this measure would be caused by any fear of political changes in your own party, an examination of statistics will show you that if the entire negro vote were to change it would not affect the political complexion of a single State of the Union, and certainly no white Republicans could object to your joining in a movement for the purity and preservation of their own race. You men of the West are facing a similar peril of a different hue. Men of the North are not so proximate to danger as are we; but in all communities of the North where the negro has settled in numbers the same and even greater race antagonism is engendered. Quite recently you have accounts of race troubles in Pittsburg that will equal any in the South. And I was pleased when I read of the policeman who said, in substance, that he considered it a crime for a negro man to raise his hand at a white woman and would proceed accordingly, for it demonstrated anew that this race antagonism is confined to no section nor by state lines, and that others were awakening to opposition to the bleaching process that was advocated at some disgraceful dinner in New York in the spring of last year.

Mr. President, I do not advocate any abridgment of the rights before the law of the negro race nor any effort to prevent them having every opportunity for advancement, educational or otherwise. I have for more than ten years been president of the board of managers of the Florida State Reform School, and as such we have provided for the negro children equally as good buildings, teachers, and advantages as are provided for white children, but the two races do not work together or associate together or mingle together in any manner.

They have the same teachers, guards, and officials, except matrons. The reports and observations of the two races of children, under same conditions, same teachers, guards, and work, at the same place, and with all equal advantages and opportunities, show that the white children are superior in learning and labor and excel in every different kind of work, mental and physical, even in common farm labor. And the advance from the moral standpoint was so markedly in favor of the white race that I feared that all had not been done that could be done for the negro and that these children might do better under a person who did not or should not have any prejudice against them as a race. Therefore we employed as matron in the negro school a lady from New England, who had had experience in reform-school work and was filled with pity, kindness, and love for the downtrodden negro race. Within less than six months she resigned; said that she had changed her idea of the negro; she could do nothing for them; that there was no foundation to build on. After more than ten years of this work, I am of the opinion that the best we can do for them is to make good laborers, and, at that, they will not excel the Caucasian race and can not be depended upon to be law-abiding as a class. I am, in my section, recognized as a friend of the negro, and believe that I have as many friends among them as any white man in my country or more. I have lived among them all my life and have a kindly feeling for them. Therefore I am prompted in this bill by no antagonism to the rights of the negro, but am seeking to preserve my own race in its purity, and, incidentally, to enable each race to live together in harmony and quietude as far as possible.

And even the thinking negro will recognize that my efforts, if successful, will aid them to this end. This race antagonism is accentuated by the fear of social equality of the white race with a race that is made separate and further divergent than

any other race of the human family. But we are here together and should try to live together as best we may. Their presence in our land has proven a curse to the white man. They destroyed the peace and harmony between the North and the South. They brought four long years of bitter war; caused the death of thousands of our best citizens and the loss of millions of dollars of property, and now for more than forty years after the war we have not been able to get rid of this race question. The greatest desire of the negro, next to a white skin, is the longing for social equality and the resulting marriage with white people. This is natural, and more than proven by the many sexual crimes between the races, by the easy lapse from virtue of the white man and the brutal outrages of the male negro. Total separation of the races or the extinction of one must and will result; but until that time comes we can help the present trouble by enacting this bill into law and letting each race know that there is no chance of social equality, no danger of destroying the Caucasian race by mongrelization, nor of leaving our country to a posterity of race retrogrades. By enacting this legislation we will go far toward healing the differences between the North and South and bringing them back to a realization of their common brotherhood, and strengthening their efforts for the upbuilding of our Nation.

There is a growing movement that only well persons should marry. The Oregon senate has passed a bill that makes it a condition precedent to the issuance of marriage licenses that the applicants should present a certificate of good health from a reputable physician. A bill was recently introduced in the Pennsylvania legislature prohibiting the marriage of persons afflicted with pulmonary tuberculosis. Both of these bills have received favorable comment, which goes to show that public opinion is being awakened along the line of providing for a cleaner, healthier posterity, and, if such legislation is desirable, how much more to be desired is legislation to avoid the baleful and dreadful effect on our race of the taint of negro blood.

Mr. President, I had not intended to speak on this question, as I had hoped that the Judiciary Committee would report the bill favorably, and in that event some of the able Senators of that body would make all the speeches necessary for its passage, therefore I have not had time to prepare a speech which would do justice to the subject. But when I found that in spite of my repeated requests to them for action on the measure they would bring no report, I felt it my duty to endeavor to bring the measure before the Senate in this form, for the reasons above stated, and for the further reason, in order that the people of the South should know by the action of the dominant party in the Senate just how much relief they could expect from the incoming administration on this fear of social equality or race mixture, which always threatens us from the Republican party or some of its members. We want to know if the recent tour and sojourn in the South of the Republican leader means any real good to the South, any bringing us nearer to participation of the benefits of the General Government, or whether it is a case of the Greeks bearing gifts.

Now, Mr. President, in order that I may have this motion squarely before the people, I desire that the resolution be disposed of by a yea-and-nay vote.

Mr. HEYBURN. Mr. President, I move that the Senate now proceed to the consideration of the conference report on Senate bill 2982.

The VICE-PRESIDENT. The Senator from Florida [Mr. MILTON] has asked for a yea-and-nay vote on his resolution.

Mr. ALDRICH. What is the question, Mr. President?

The VICE-PRESIDENT. The Secretary will read the resolution.

Mr. ALDRICH. Before the roll call is proceeded with I should like to know on what we are called upon to vote.

The VICE-PRESIDENT. The Secretary will read the resolution.

The Secretary read the resolution submitted by Mr. MILTON February 27, 1909, as follows:

Senate resolution 306.

Resolved, That the Committee on the Judiciary be discharged from further consideration of the bill (S. 8462) prohibiting the intermarriage of any white person to a negro in the District of Columbia, or in any Territory of the United States, and making the issuance of such marriage, if any, incapable of inheritance, and describing the penalty for such intermarriage, and defining the word "negro," and further prescribing a penalty for any person performing such marriage ceremony.

Mr. FORAKER. I move that the resolution be laid on the table.

The VICE-PRESIDENT. The Senator from Ohio moves that the resolution lie on the table.

Mr. MILTON. I desire a yea-and-nay vote on the motion to lay on the table.

The VICE-PRESIDENT. Upon that motion the Senator from Florida has asked for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. FULTON (when his name was called). I have a general pair with the junior Senator from Arkansas [Mr. DAVIS], but I transfer that pair to the senior Senator from Washington [Mr. ANKENY] and vote. I vote "yea."

The roll call was concluded.

Mr. DILLINGHAM (after having voted in the affirmative). I inquire whether the senior Senator from South Carolina [Mr. TILLMAN] has voted?

The VICE-PRESIDENT. The Senator from South Carolina has not voted.

Mr. DILLINGHAM. Then, having a general pair with that Senator, I will withdraw my vote.

The result was announced—yeas 43, nays 21, as follows:

YEAS—43.

Aldrich	Clark, Wyo.	Frye	Perkins
Beveridge	Cullom	Fulton	Piles
Borah	Cummins	Guggenheim	Richardson
Bourne	Curtis	Heyburn	Scott
Briggs	Depew	Kean	Smith, Mich.
Brown	Dick	Kittredge	Smoot
Bulkeley	Dixon	La Follette	Sutherland
Burkett	Dolliver	Lodge	Warner
Burnham	du Pont	Long	Warren
Burrows	Flint	McCumber	Wetmore
Clapp	Foraker	Page	

NAYS—21.

Bailey	Gary	Milton	Simmons
Bankhead	Gore	Money	Stone
Culberson	Johnston	Newlands	Taliaferro
Daniel	McCreary	Overman	
Foster	McEnery	Owen	
Frazier	McLaurin	Paynter	

NOT VOTING—28.

Ankeny	Davis	Hemenway	Platt
Bacon	Dillingham	Hopkins	Rayner
Brandegee	Elkins	Knox	Smith, Md.
Carter	Gallinger	Martin	Stevenson
Clarke, Ark.	Gamble	Nelson	Taylor
Clay	Hale	Nixon	Teller
Crane	Hansbrough	Penrose	Tillman

So the motion to lay Mr. MILTON's resolution on the table was agreed to.

PRESIDENTIAL APPROVALS.

A message from the President of the United States by Mr. M. C. Latta, one of his secretaries, announced that the President had approved and signed the following acts and joint resolution:

On February 27, 1909:

S. 9017. An act for the establishment of a subport of entry at Ranier, Minn.;

S. 7378. An act to extend the time for the completion of a bridge across the Missouri River at or near Yankton, S. Dak., by the Winnipeg, Yankton and Gulf Railroad Company; and

S. R. 76. Joint resolution relative to homestead designations, made and to be made, of members of the Osage tribe of Indians.

FORTIFICATIONS APPROPRIATION BILL.

Mr. PERKINS submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 27054) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment.

GEO. C. PERKINS,
F. E. WARREN,
B. R. TILLMAN,
Managers on the part of the Senate.

WALTER I. SMITH,
JOSEPH V. GRAFF,
SWAGAR SHERLEY,
Managers on the part of the House.

The report was agreed to.

BOILER INSPECTION.

Mr. FRYE. I ask unanimous consent for the present consideration of the bill (H. R. 28175) to amend section 4434 of the Revised Statutes of the United States, and for other purposes.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. The first section proposes to amend section 4434 of the Revised Statutes as amended by the act approved February 28, 1895, so as to read:

SEC. 4434. No externally fired boiler having its shell constructed of iron or steel plates, exceeding an average thickness of thirty-eight one-hundredths of an inch, shall be employed on any steam vessel navigating the Red River of the North or rivers flowing into the Gulf of Mexico or their tributaries; and no externally fired boiler employed on any such steam vessel shall have less than 3 inches space between its shell and any of its internal flues, and not less than 3 inches space between such flues when any such flues are more than 5 inches in diameter, the measurements to be taken from the center of the length of the tapered section of said flues; and every such externally fired boiler employed on any such steam vessel shall be provided with a manhole in the lower part of the front head thereof, of such dimensions as may be prescribed by the Board of Supervising Inspectors, in all cases where the distance between its internal flues is less than 3 inches. Externally fired boilers having shells constructed of iron or steel plates not exceeding an average thickness of fifty one-hundredths of an inch may, in the discretion of the Supervising Inspector-General, be authorized and employed on steam vessels navigating the Atlantic and Pacific oceans, or salt-water bays, or sounds, or the Great Lakes, or any of them, and waters flowing to and from the same, or any of them: *Provided*, That on inspection, no plate that is by this act limited to a thickness of thirty-eight one-hundredths of an inch and no plate that is by this act limited to a thickness of fifty-one-hundredths of an inch shall be rejected for use if found to exceed those dimensions, respectively, if the approved average thickness thereof does not exceed the limits therein specified, and the amount of steam pressure that will be permitted to be carried in boilers constructed in accordance with the requirements of this act shall be determined from measurements showing the least thickness of the plates.

Section 2 provides that all externally fired boilers, constructed of iron or steel prior to the passage of this act and now in use on any such vessels, wherein the space between the shell and any of its internal flues or between such flues is less than 3 inches, shall be deemed lawfully constructed.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REVISION OF THE PENAL CODE.

Mr. HEYBURN. I ask unanimous consent for the consideration of the conference report on Senate bill 2982, to codify, revise, and amend the penal laws of the United States.

The VICE-PRESIDENT. Is there objection to the present consideration of the conference report?

Mr. OVERMAN. What report is that, Mr. President?

The VICE-PRESIDENT. The Secretary will state the report.

The SECRETARY. The report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

Mr. OVERMAN. I observe the Senator from Arkansas [Mr. CLARKE] is not in his seat. He wants to be heard on this subject.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Idaho?

Mr. OVERMAN. The Senator from Arkansas desires to be heard on this subject, and I will object to its consideration until he comes in.

Mr. HEYBURN. I ask for the present consideration of the report. The Senator from Arkansas was here a few moments ago.

Mr. OVERMAN. The Senator from Georgia [Mr. BACON] and also the Senator from Arkansas desire to be heard, I think, when this question comes up, and neither of them is present at this moment. I therefore ask the Senator from Idaho to withhold his request.

Mr. HEYBURN. I move that the Senate proceed to the consideration of the conference report.

The VICE-PRESIDENT. The Senator from Idaho moves that the Senate proceed to the consideration of the conference report.

Mr. CULBERSON. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. BULKELEY. I should like to have the motion stated.

The VICE-PRESIDENT. The Senator from Idaho [Mr. HEYBURN] moves that the Senate proceed to the consideration of the conference report.

Mr. BULKELEY. On the penal-code bill?

The VICE-PRESIDENT. That is the pending motion, on which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. FULTON (when his name was called). I again announce my general pair with the junior Senator from Arkansas [Mr. DAVIS], and transfer it to the senior Senator from Washington [Mr. ANKENY] and vote. I vote "yea."

The result was announced—yeas 49, nays 12, as follows:

YEAS—49.

Aldrich	Curtis	Gore	Perkins
Beveridge	Depew	Guggenheim	Piles
Borah	Dick	Hemenway	Richardson
Briggs	Dillingham	Heyburn	Scott
Brown	Dixon	Hopkins	Smith, Mich.
Bulkeley	Dolliver	Kean	Smoot
Burkett	du Pont	Kittredge	Sutherland
Burnham	Elkins	La Follette	Warner
Burrows	Flint	Lodge	Warren
Clark, Wyo.	Foraker	Long	Wetmore
Clarke, Ark.	Frye	McCumber	
Cullom	Fulton	McEnery	
Cummins	Gamble	Page	

NAYS—12.

Bailey	Daniel	McLaurin	Rayner
Bankhead	Johnston	Money	Stone
Culberson	McCreary	Overman	Taliaferro

NOT VOTING—31.

Ankenny	Davis	Martin	Platt
Bacon	Foster	Milton	Simmons
Bourne	Frazier	Nelson	Smith, Md.
Brandegee	Gallinger	Newlands	Stephenson
Carter	Gary	Nixon	Taylor
Clapp	Hale	Owen	Teller
Clay	Hansbrough	Paynter	Tillman
Crane	Knox	Penrose	

So Mr. HEYBURN's motion was agreed to.

Mr. BRIGGS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from New Jersey?

Mr. HEYBURN. For what purpose?

Mr. BRIGGS. That I may ask unanimous consent for the present consideration of Calendar No. 1031, being House bill 7048.

Mr. CLARKE of Arkansas. The matter that has just been taken up by a vote of the Senate may be disposed of for the present, with the consent of the Senator from Idaho [Mr. HEYBURN], so that it will not be necessary to yield to the Senator from New Jersey [Mr. BRIGGS]. I ask the Senator from Idaho to make the announcement regarding the conference report on the penal-code bill, according to the understanding we have arrived at.

Mr. HEYBURN. I would suggest that the Senator from Arkansas state the proposition which has been submitted.

Mr. CLARKE of Arkansas. The report of the conferees has recommended the adoption of all the amendments put upon the bill for the revision of the criminal code by the House in entire substitution for the amendments adopted by the Senate. These amendments are coincident in some particulars, but it is necessary to have some little time in which to reconcile or, at least, to understand the differences. That can be done by the time of the hour of the meeting of the Senate on to-morrow, and those of us who feel that we ought to have an opportunity to point out the matters of difference that are apparently irreconcilable should be permitted to do so. The Senator from Idaho in charge of the bill consents that it may be laid over until the meeting of the Senate to-morrow, at whatever hour that may be.

Mr. HEYBURN. Under conditions.

Mr. CLARKE of Arkansas. Under the condition that we will point out to him before that hour the particular defects or the particular objections that we have to the bill.

Mr. HEYBURN. And that it be the special order for 10 o'clock to-morrow morning.

Mr. CLARKE of Arkansas. That is entirely satisfactory.

Mr. HEYBURN. With that understanding only, the Senator from Idaho agrees that the matter may go over—with the understanding and consent of the Senate that the conference report be made the special order for 10 o'clock to-morrow morning. The additional time is asked by those who oppose the report.

Mr. ALDRICH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Rhode Island?

Mr. HEYBURN. In a moment. The time for the examination of the report as printed is asked because of the necessity for some consultation with a view of reaching an agreement. It is only because of that proposition that I am led to consent to the matter going over until to-morrow. I could not consent to its going over until to-morrow unless we had an understanding that it should be then taken up.

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Wyoming?

Mr. HEYBURN. Certainly.

Mr. WARREN. That I may understand the agreement, I will ask what effect would it have, if adopted, on the consideration of conference reports or, perhaps, the finishing of an appropriation bill already before the Senate?

Mr. HEYBURN. I can not agree that any other conference report shall have a higher status than this conference report.

Mr. WARREN. Certainly not.

Mr. HEYBURN. This is a conference report.

Mr. WARREN. But suppose the sundry civil appropriation bill is not finished to-night, and it should be desired to take it up in the morning and conclude it so that it may go to conference? Ought not the Senator to except the sundry civil appropriation bill?

Mr. HEYBURN. I would cheerfully do so, but I would not want that exception under the rule in any way to affect the parliamentary situation to-morrow.

Mr. WARREN. No.

Mr. HEYBURN. Of course, if the sundry civil bill is under consideration, I will at that time—not now—agree that this report be laid aside until the sundry civil bill is disposed of.

Mr. WARREN. What about the general deficiency bill?

Mr. HEYBURN. Has the general deficiency bill come over from the House?

Mr. WARREN. Yes; but it has not yet been reported.

Mr. CULBERSON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Texas?

Mr. HEYBURN. Certainly.

Mr. CULBERSON. I desire to ask the Senator if the conference report and the suggested amendments have been printed, so that we can have them before us?

Mr. HEYBURN. The report has been printed and was on each Senator's desk this morning. With that understanding——

Mr. ALDRICH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Rhode Island?

Mr. HEYBURN. Certainly.

Mr. ALDRICH. I would suggest that the Senator from Idaho modify his request by asking that the conference report be taken up at 10 o'clock to-morrow, and stop there. It will not do at this stage of the session to make any agreements as to time beyond that. All business will have to be subject to the will of the majority of the Senate. I certainly should not be willing that any consent should be given that would displace all the other business of the Senate. The Senator has a right to have his report taken up. I would suggest that he ask for unanimous consent that the consideration of the conference report be proceeded with at 10 o'clock to-morrow morning.

Mr. HEYBURN. That it be resumed at 10 o'clock to-morrow morning. That would be satisfactory. It could then only be laid aside by a vote.

The VICE-PRESIDENT. The Senator from Idaho asks unanimous consent that the further consideration of the conference report on what is known as the "penal-code bill" shall now cease, and that the consideration of it be resumed at 10 o'clock to-morrow morning. Is there objection? The Chair hears none, and it is so ordered.

HENRY A. TOLBERT.

Mr. BRIGGS. I ask unanimous consent for the present consideration of the bill (H. R. 7048) for the relief of Henry A. Tolbert.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to Henry A. Tolbert, of Barnegat, N. J., $3,185, that being the penalty exacted from him as surety for his son, Harry W. Tolbert, in default of the execution of his contract for the construction of a guardhouse and quarters at Fort Mott, N. J., in October, 1902.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

COURTS IN TEXAS.

Mr. CULBERSON. I ask unanimous consent for the present consideration of the bill (H. R. 28305) to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State and to detach it from the Fort Worth division of said court. The bill was reported by me this morning from the Committee on the Judiciary.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

NAVAL ACADEMY BAND.

Mr. DICK. I ask unanimous consent for the present consideration of the bill (H. R. 4521) to reorganize and enlist the members of the United States Naval Academy Band.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It provides that the Naval Academy Band shall consist of 1 leader, who shall have the pay and allowance of a second lieutenant in the Marine Corps; 1 second leader, with pay at the rate of $50 per month; 29 musicians, first class, and 11 musicians, second class; to be paid from the pay of the Navy; and that the members of the Naval Academy Band as now organized shall be enlisted in the Navy and credited with all prior service of whatever nature as members of the band, as shown by the records of the Naval Academy and the pay rolls of the ships and academy; and the leader and the enlisted musicians of the band shall be entitled to the same benefits in respect to pay, emoluments, and retirement arising from longevity, reenlistment, and length of service as are, or may hereafter become, applicable to other enlisted men of the Navy.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

P. H. M'DONOUGH.

Mr. BORAH. I ask unanimous consent for the present consideration of the bill (H. R. 13928) for the relief of P. H. McDonough, of Bardstown, Ky.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to Patrick Henry McDonough $250, in full payment for horses taken from him by the military forces of the United States and converted to their own use during the war of the rebellion.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

HERMAN ANDRAE ELECTRICAL COMPANY.

Mr. SMOOT. I desire to call up the bill (H. R. 8947) for the relief of the Herman Andrae Electrical Company, of Milwaukee, Wis.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to the Herman Andrae Electrical Company, of Milwaukee, Wis., $480, deducted by the Secretary of the Interior as a penalty under contract No. 15042, dated December 4, 1906.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

R. J. B. NEWCOMBE.

Mr. BURROWS. I ask for the present consideration of the bill (H. R. 8558) for the relief of R. J. B. Newcombe.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay R. J. B. Newcombe, his representatives or assigns, $960.04 for loss sustained in constructing wharf and boathouse at the life-saving station on South Manitou Island, Michigan.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ROAD IMPROVEMENT IN ALASKA.

Mr. WARREN. I am directed by the Committee on Military Affairs, to whom was referred the concurrent resolution (S. C. Res. 96) submitted by the Senator from Washington [Mr. PILES] on the 16th ultimo, to report it with an amendment. I call the attention of the Senator from Washington to the matter.

Mr. PILES. I ask for its present consideration.

The Senate, by unanimous consent, proceeded to consider the concurrent resolution which had been reported from the Committee on Military Affairs with an amendment to strike out, on page 2, lines 1 and 2 and the word "Territory" in line 3, so as to make the concurrent resolution read:

Whereas petitions have been received from the legislatures of the States of Oregon and Washington and from numerous commercial bodies on the Pacific coast and in Alaska for increased appropriations for the construction of wagon roads, bridges, and trails in the Territory of Alaska; and

Whereas several bills have been previously introduced in Congress providing for aid in railroad construction in the said Territory: Therefore be it

Resolved by the Senate (the House of Representatives concurring), That, for a better understanding of the requirements of Alaska in these respects, and to the end that a more systematic plan may be adopted, if found necessary, for the development of its resources, the Secretary of War be, and he is hereby, authorized to cause an examination to be made of the need for further road improvement in Alaska, in connection with the military and post roads, bridges, and trails now being constructed under War Department supervision, and to report thereupon, with recommendations, at the earliest practicable date.

The amendment was agreed to.

The resolution as amended was agreed to.

Mr. KEAN. The preamble should be stricken out.

Mr. WARREN. Yes.

The preamble was stricken out.

J. C. HAGGARD.

Mr. FRAZIER. I ask unanimous consent for the consideration at this time of the bill (H. R. 15755) for the relief of J. C. Haggard, of White County, Tenn.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to J. C. Haggard $73.59 for tax paid on 66.9 gallons of whisky, the warehouse having previously been unlawfully broken into and the whisky stolen, without fault or negligence on Haggard's part.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

F. S. JETTE & SON.

Mr. GUGGENHEIM. I call up for present consideration the bill (H. R. 2911) for the relief of F. S. Jette & Son, of Savannah, Chatham County, Ga., for damage done to their wharf by U. S. dredge *Cumberland*.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to F. S. Jette & Son $70 for money expended and labor performed in repairing damages done to their wharf at Savannah, Ga., by the U. S. dredge *Cumberland* on May 24, 1906.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SALE OF CERTAIN PUBLIC LANDS IN NEBRASKA.

Mr. BURKETT. I ask unanimous consent to call up the bill (H. R. 21492) to authorize the sale of certain public lands.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Interior to sell, at his discretion, for cash, any or all of the vacant public lands in township 8 north, range 30 west of the sixth principal meridian, in the State of Nebraska, which are embraced within the fractional subdivisions which resulted from disconnected surveys.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BOOKSELLERS IN THE DISTRICT.

Mr. LONG. I ask unanimous consent for the immediate consideration of the bill (S. 4094) to amend paragraph 43 of an act entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes," approved July 1, 1902.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to amend the paragraph referred to by adding thereto the following:

Provided, That such classification shall not be applied to booksellers.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PENSION OF CIVIL WAR ARMY NURSES.

Mr. SCOTT. I ask unanimous consent for the consideration of the bill (S. 185) increasing the pensions of nurses in certain cases.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Pensions with an amendment to strike out section 1 and insert in lieu thereof the following:

That all women who served six months or more as volunteer army nurses, whether under contract or otherwise, during the late civil war, and who rendered actual services as nurses in attendance upon the sick and wounded in any regimental, post, camp, or general hospital of the armies of the United States for a period of six months or more, and who are now or may hereafter be unable to earn a support, shall, upon making due proof of the performance of such services according to such rules and regulations as the Secretary of the Interior may provide, be placed upon the list of pensioners of the United States and be entitled to receive a pension of $12 per month, such pension to commence from the date of the filing of the application in the Pension Office after the passage of this act.

The amendment was agreed to.

Mr. KEAN. I desire to ask the Senator from West Virginia whether the bill limits the pension to $12.

Mr. SCOTT. It does.

Mr. KEAN. There is no increase?

Mr. SCOTT. No increase.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill granting pensions to volunteer army nurses of the civil war."

ADDITIONAL JUDGE FOR SOUTHERN DISTRICT OF NEW YORK.

Mr. DEPEW. I ask unanimous consent for the present consideration of the bill (H. R. 19655) providing for an additional judge for the southern district of New York, and for other purposes.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JOHN T. FREEMAN.

Mr. WETMORE. I desire to call up the bill (H. R. 21571) for the relief of John T. Freeman.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay $447.81 to John T. Freeman, chief musician Seventh Artillery Band, U. S. Army, in full payment on account of articles destroyed by fire at Fort Slocum, N. Y.

Mr. WARREN. From what committee does the bill come?

The VICE-PRESIDENT. It was reported from the Committee on Claims.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LAND GRANT TO LOS ANGELES, CAL.

Mr. FLINT. I ask unanimous consent for the consideration at the present time of the bill (S. 8929) withdrawing from entry and sale and granting unto the city of Los Angeles, in the State of California, certain lands therein described.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Lands with an amendment to strike out all after the enacting clause and insert:

That the Secretary of the Interior be, and he is hereby, empowered and directed to cause to be issued to the city of Los Angeles, in Los Angeles County, State of California, a patent to all of the land designated "Dry Salt Lake," embraced within the meandered lines thereof and lying within the exterior lines surrounding sections 28, 29, and 33, in township 32 south, range 34 east, Mount Diablo base and meridian, containing 251.11 acres, as designated on the plat of survey of said township made in the year 1855 and approved by the surveyor-general of California on May 14, 1856, situate in Kern County in said State, upon payment by said city to the United States therefor of the sum of $2.50 per acre, which lands have heretofore been withdrawn from entry and sale for the benefit of said city, and which withdrawal shall remain intact pending the entry of the land by said city: *Provided*, That said city shall first procure from all claimants or persons who have filed or made valid claims, locations, or entries on or to said lands, or any part thereof, proper relinquishments of all their claims thereto, and cause the same to be filed in the proper land office: *And provided further*, That said patent shall also contain the provision that all right, title, and interest of the United States in and to any lands in said sections 28, 29, and 33 not heretofore disposed of or conveyed are hereby granted, released, and relinquished to said city.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JUDICIAL DISTRICT OF NEBRASKA.

Mr. BURKETT. I ask unanimous consent to call up the bill (S. 9191) to amend an act entitled "An act to divide the judicial district of Nebraska into divisions and to provide for an additional district judge in said district."

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RESURVEY OF PUBLIC LANDS.

Mr. SMOOT submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24835) authorizing the necessary resurvey of public lands, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment in line 12, striking out the word "twenty" and inserting the word "five."

That the House recede from its disagreement to the amendments of the Senate in line 4, striking out the words "in the manner" and inserting "as he may deem wise under the rectangular system;" and agree to the same.

REED SMOOT,
FRANK T. FLINT,
J. H. BANKHEAD,
Managers on the part of the Senate.
F. W. MONDELL,
A. J. VOLSTEAD,
JOSEPH T. ROBINSON,
Managers on the part of the House.

The report was agreed to.

LOAN OF NAVAL EQUIPMENT TO MILITARY SCHOOLS.

Mr. DICK. I ask unanimous consent for the present consideration of the bill (S. 4434) to amend an act entitled "An act

to authorize the Secretary of the Navy to loan naval equipment to certain military schools," approved March 3, 1901.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CHARLES LENNIG & CO.

Mr. PAYNTER. I ask for the present consideration of the bill (H. R. 9755) for the relief of Charles Lennig & Co.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to Charles Lennig & Co., Philadelphia, Pa., for damage to their works, due to the accidental explosion on August 6, 1902, of a quantity of cartridges at Frankford Arsenal, Philadelphia, Pa.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CARTER & BOOKER.

Mr. OWEN. I ask unanimous consent for the present consideration of the bill (S. 9351) to authorize the Postmaster-General to settle the accounts of Carter & Booker, and for other purposes.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CORRY, PA., A PORT OF DELIVERY.

Mr. PENROSE. I desire to call up the bill (H. R. 24327) to make Corry, Pa., a port of delivery in the district of Erie, Pa., and extending to it the privilege of section 7 of the act of June 10, 1880.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

NATHANIEL HUNTLEY.

Mr. WARREN. I ask for the present consideration of the bill (H. R. 24995) for the relief of Nathaniel Huntley.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes that in the administration of the pension laws the record of the muster of Nathaniel Huntley into the military service of the United States as a member of Company E, Fifth Regiment Michigan Cavalry Volunteers, shall be held to be void and without effect, Huntley never in fact having been mustered into the service as a member of that organization and never having rendered any service with it, but served as a member of Company A, One hundred and fourth Regiment New York Volunteers, and was honorably discharged from that organization.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

E. C. MANSFIELD.

Mr. CRANE. I ask unanimous consent for the consideration of the bill (S. 8324) for the relief of E. C. Mansfield.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to credit the accounts of E. C. Mansfield, postmaster at Boston, Mass., with the sum of $215.67, on account of the loss of $215.67 of the postal funds stolen from the Back Bay station of that post-office.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JACKSON PRYOR.

Mr. FRAZIER. I ask unanimous consent for the consideration of the bill (H. R. 8545) for the relief of Jackson Pryor.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to correct the military record of Jackson Pryor, late of Company D, Twelfth Regiment Kentucky Volunteer Infantry, so as to grant him an honorable discharge as of the date when that company was mustered out of the service of the United States.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CODIFICATION OF THE POSTAL LAWS.

Mr. BORAH. I ask that the bill (S. 8803) to codify, revise, and amend the postal laws of the United States may go to the calendar under Rule IX.

The VICE-PRESIDENT. Without objection, it is so ordered.

EXECUTIVE SESSION.

Mr. KEAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After twenty minutes spent in executive session the doors were reopened.

LIST OF CLAIMS, JUDGMENTS, AND AWARDS.

Mr. HALE submitted the following resolution (S. Res. 318), which was considered by unanimous consent and agreed to:

Resolved, That the Secretary of the Treasury be, and he is hereby, directed to transmit to the Senate the following schedule and lists of claims, judgments, and awards requiring appropriations by Congress not heretofore reported to Congress at the present session, namely:

First. Schedule of claims allowed by the accounting officers of the Treasury under appropriations the balances of which have been exhausted or carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874.

Second. List of judgments rendered by the Court of Claims against the United States.

Third. List of judgments rendered by the Court of Claims in favor of claimants and against the United States under the act to provide for the adjudication and payment of claims arising from Indian depredations, approved March 3, 1891.

Fourth. List of judgments rendered against the United States by the circuit and district courts of the United States under the act to provide for bringing suits against the Government of the United States, approved March 3, 1887.

Fifth. List of awards made by the Spanish Treaty Claims Commission under the act to carry into effect the stipulations of article 7 of the treaty between the United States and Spain concluded on the 10th day of December, 1898, approved March 2, 1901.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice-President:

S. 5729. An act to correct the records and authorize the reenlistment of certain noncommissioned officers and enlisted men belonging to Companies B, C, and D, of the Twenty-fifth U. S. Infantry, who were discharged without honor under Special Orders, No. 266, War Department, November 9, 1906, and the restoration to them of all rights of which they have been deprived on account thereof;

S. 8554. An act authorizing the Secretary of the Interior to sell part or all of the surplus lands of members of the Kaw or Kansas and Osage tribes of Indians in Oklahoma, and for other purposes;

S. 8654. An act for the relief of certain occupants of unsurveyed public lands in Craighead County, Ark.;

S. 9242. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to the widows and dependent and helpless relatives of such soldiers and sailors; and

H. R. 28193. An act to authorize the city of Shreveport to construct a bridge across Red River.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. HALE. I move that the Senate proceed to the consideration of House bill 28245, the sundry civil appropriation bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. HALE. I ask that the formal reading of the bill be dispensed with, that the bill be read for amendment, and that the committee's amendments be first considered.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and the Secretary will proceed with the reading of the bill.

The Secretary proceeded to read the bill. The first amendment of the Committee on Appropriations was, under the subhead "Public buildings," on page 13, after line 19, to insert:

Everett, Wash., post-office and custom-house: For continuation of work under present limit, $40,000.

The amendment was agreed to.

The next amendment was, on page 19, after line 2, to insert:

Jacksonville, Fla., post-office and court-house: For tower clock and all work incident to its installation, $4,000.

The amendment was agreed to.

The next amendment was, on page 27, line 1, before the word "For," to insert "New York, appraiser's stores and custom-house," so as to make the clause read:

New York, appraiser's stores and custom-house: For the purchase of necessary materials and equipment and for all necessary services for the installation, at a cost not exceeding $175,000, of a pneumatic-tube service between the new custom-house and the appraiser's stores in New York, N. Y., $175,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 30, line 4, after the word "city," to insert "and the sum of $40,000, in addition to the amount heretofore authorized for purchase of site, may be used

for that purpose, but the limit of cost for site and building shall not be exceeded," so as to make the clause read:

Portland, Me., court-house: So much of section 1 of the public buildings act approved May 13, 1908, as applies to the post-office at Portland, Me., and the acquisition of additional ground therefor is hereby made applicable to the court-house in that city, and the sum of $40,000, in addition to the amount heretofore authorized for purchase of site, may be used for that purpose, but the limit of cost for site and building shall not be exceeded.

The amendment was agreed to.

The next amendment was, on page 30, after line 11, to insert:

Providence, R. I., post-office, court-house, and custom-house: For finishing quarters in attic for Civil Service Commission, $5,000.

The amendment was agreed to.

The next amendment was, on page 31, after line 8, to insert:

Riverside, Cal., post-office: For site and continuation of building under present limit, $50,000.

The amendment was agreed to.

The next amendment was, on page 38, line 4, after the word "dollars," to insert "and the Secretary of the Treasury is hereby authorized and directed to purchase such additional land as may be necessary for the enlargement of the post-office and court-house at Wilmington, Del., provided for in the public buildings act approved May 30, 1908, the cost of such land not to exceed the sum of $25,000, to be paid out of the total appropriation of $120,000 authorized in said act for such enlargement," so as to make the clause read:

Wilmington, Del., post-office and court-house: For completion of the enlargement, extension, remodeling, or improvement of building under present limit, $80,000, and the Secretary of the Treasury is hereby authorized and directed to purchase such additional land as may be necessary for the enlargement of the post-office and court-house at Wilmington, Del., provided for in the public buildings act approved May 30, 1908, the cost of such land not to exceed the sum of $25,000, to be paid out of the total appropriation of $120,000 authorized in said act for such enlargement.

The amendment was agreed to.

The next amendment was, on page 39, after line 13, to insert:

For Treasury building at Washington, D. C.: For repairs to Treasury, Butler, and Winder buildings and the grounds adjacent thereto, including personal services of skilled mechanics, $21,000.

The amendment was agreed to.

The next amendment was, on page 40, line 22, before the word "thousand," to strike out "fifty" and insert "thirty-eight;" and in line 25, after the word "same," to strike out "and not exceeding $12,000 for the Treasury, Butler, and Winder buildings at Washington, D. C., so as to make the clause read:

For repairs and preservation of public buildings: Repairs and preservation of custom-houses, court-houses, and post-offices, quarantine stations and marine hospitals, buildings and wharf at Sitka, Ala., buildings not reserved by the vendors on sites acquired for buildings or the enlargement of buildings, and other public buildings and the ground thereof, including necessary wire screens, under the control of the Treasury Department, exclusive of personal services, except for work done by contract, $538,000: *Provided*, That of this amount not exceeding $100,000 may be used for marine hospitals and quarantine stations, including wire screens for same.

The amendment was agreed to.

The next amendment was, on page 41, line 23, before the word "thousand," to strike out "and not exceeding $9,000 for the Treasury, Butler, and Winder buildings at Washington, D. C., four hundred," and insert "three hundred and ninety-one," so as to make the clause read:

Mechanical equipment for public buildings: For heating, hoisting, plumbing, gas piping (except for furniture lighting), ventilating, and refrigerating apparatus, vacuum-cleaning systems, interior pneumatic-tube and call-bell systems for all purposes, and repairs to the same, for all public buildings, including buildings not reserved by the vendors on sites acquired for buildings or the enlargement of buildings under the control of the Treasury Department, exclusive of personal services, except for work done by contract, and including not exceeding $40,000 for marine hospitals and quarantine stations, $391,000.

The amendment was agreed to.

The next amendment was, under the subhead "Revenue-Cutter Service," on page 51, after line 12, to insert:

For the construction of a steam launch for the United States Revenue-Cutter Service for duty in the waters of Puget Sound, $25,000.

The amendment was agreed to.

The next amendment was, on page 51, after line 15, to insert:

For constructing a suitable vessel or launch for the customs service, of such motive power as may be determined by the Secretary of the Treasury, for use at and in the vicinity of Portland, Me., $25,000.

The amendment was agreed to.

The next amendment was, on page 51, after line 19, to insert:

For the construction of a launch, of such motive power as may be determined by the Secretary of the Treasury, for the use of the customs service at and in the vicinity of Los Angeles, Cal., $10,000.

The amendment was agreed to.

The next amendment was, on page 51, line 23, to insert:

For the construction and equipping of a steam revenue cutter, for service in Narragansett Bay and adjacent waters, with headquarters at Newport, R. I., to take the place of the revenue cutter *Dexter*, $225,000.

The amendment was agreed to.

The next amendment was, on page 52, after line 3, to insert:

For the construction of a steam vessel for the Revenue-Cutter Service for anchorage duty at the port of New York, $80,000.

The amendment was agreed to.

The next amendment was, on page 52, after line 6, to insert:

For the construction and equipping of a steam revenue cutter of the first class for service in the waters of Key West, Fla., $250,000.

The amendment was agreed to.

The next amendment was, under the head of "Under Smithsonian Institution," on page 55, line 21, before the word "thousand," to strike out "three hundred" and insert "one hundred and ninety," so as to make the clause read:

For continuing the preservation, exhibition, and increase of the collections from the surveying and exploring expeditions of the Government, and from other sources, including salaries or compensation of all necessary employees, and all other necessary expenses, $190,000, of which sum $5,500 may be used for necessary drawings and illustrations for publications of the National Museum.

The amendment was agreed to.

The next amendment was, on page 56, after line 3, to insert:

For the following at the Wholesale Market square at Tenth, Eleventh, B, and Little B streets NW., in connection with the now approaching completion of the new National Museum building, for cement sidewalks, $850, and for the necessary grading, $150; in all, $1,000.

The amendment was agreed to.

The next amendment was, under the subhead "Interstate Commerce Commission," on page 61, after line 15, to insert:

Special witness of destruction of United States securities: For pay of the representative of the public on the committee to witness the destruction by maceration of government securities, at $5 per day while actually employed, $1,565.

The amendment was agreed to.

The next amendment was, in the item for Public Health and Marine-Hospital Service, on page 70, line 5, after the word "dollars," to insert "to be immediately available," so as to make the clause read:

To enable the Secretary of the Treasury to accept the proposal of the proper authorities of the Territory of Hawaii, in amount not to exceed $4,500, to make sufficient extension of the present water-supply system of the leper settlement on Molokai to provide an adequate water supply also to the leprosy investigation station of the United States, provided that the right is granted to said adequate water supply in perpetuity by the Territory of Hawaii, $4,500, to be immediately available.

The amendment was agreed to.

The next amendment was, on page 70, line 8, after the word "dollars," to insert "to be immediately available," so as to make the clause read:

For constructing boat landing at the leprosy investigation station, Hawaii, $1,000, to be immediately available.

The amendment was agreed to.

The next amendment was, under the head of "Under the Department of Commerce and Labor," on page 72, after line 6, to insert:

Light keepers' dwellings: For light keepers' dwellings and appurtenant structures, including sites therefor: *Provided*, That no dwelling erected hereunder at any one station shall exceed $6,500 in cost, $75,000.

The amendment was agreed to.

The next amendment was, on page 72, after line 13, to insert:

Point Judith breakwater lights, Rhode Island: For establishing lights and fog signals on the breakwaters of the National Harbor of Refuge, Point Judith, Rhode Island, and for erecting a keepers' dwelling, $18,500.

The amendment was agreed to.

The next amendment was, at the top of page 73, to insert:

Ambrose Channel, New York: For the purchase of buoys and equipment, $40,000.

The amendment was agreed to.

The next amendment was, on page 73, after line 2, to insert:

The sum of $15,000 appropriated by the sundry civil appropriation act, approved June 30, 1906, for a tank light-vessel for Ambrose Channel, New York Bay, may be used, together with the foregoing sum, for the purchase of buoys.

The amendment was agreed to.

The next amendment was, on page 73, after line 7, to insert:

Winter Quarter Shoal light-vessel, Virginia: For constructing, equipping, and outfitting complete for service a steel self-propelling light-vessel with a fog signal; and the Light-House Board is authorized to employ temporarily at Washington not exceeding three draftsmen, to be paid at current rates, to prepare plans for the light-vessel; such draftsmen to be paid from the appropriation for building this vessel; such employment to cease and determine on or before the date when, the plans for this vessel being finished, proposals for building this vessel are invited by advertisement, $135,000.

The amendment was agreed to.

The next amendment was, at the top of page 74, to insert:

Buffalo breakwater, North End light station, New York: For dredging the Buffalo breakwater, North End light station, New York, $43,200.

The amendment was agreed to.

The next amendment was, on page 74, after line 3, to insert:

Duluth Harbor entrance, north pier light station, Minnesota: For establishing a light on the north pier, entrance to Duluth Harbor, Lake Superior, Minnesota, $4,000.

The amendment was agreed to.

The next amendment was, on page 74, after line 7, to insert:

Alcatraz light station, California: For remodeling and reconstructing the Alcatraz light station, California, $35,000.

The amendment was agreed to.

The next amendment was, on page 74, after line 10, to insert:

Puget Sound, Washington: For establishing, under the direction and supervision of the Light-House Board, such aids to navigation in Puget Sound waters as may, in the opinion of the Secretary of Commerce and Labor, be considered advisable and necessary, $41,600.

The amendment was agreed to.

The next amendment was, on page 74, after line 16, to insert:

The unexpended balance amounting to $22,105.26 of the appropriation made by the act approved May 27, 1908, for the construction of a wharf and storehouse at Waaddah Island, Neah Bay, Washington, is hereby made available for purchase of a site and construction of a wharf and storehouses thereon, at some point on the northern coast of the State of Washington between Cape Flattery and Port Townsend, to be designated by the Secretary of the Treasury, for the use of the United States Revenue-Cutter Service.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Fisheries," on page 95, after line 12, to strike out:

Biological Station, Fairport, Iowa: For the necessary personal services for conducting and continuing the biological station at Fairport, Iowa, authorized and established under a provision in the sundry civil appropriation act for the fiscal year 1909, $7,800, or so much thereof as may be necessary.

And insert:

Biological Station, Fairport, Iowa: Director, at the rate of $1,800 per annum; superintendent of fish culture, at the rate of $1,500 per annum; scientific assistant, at the rate of $1,400 per annum; scientific assistant, at the rate of $1,200 per annum; foreman, at the rate of $1,200 per annum; shell expert, at the rate of $1,200 per annum; engineer, at the rate of $1,000 per annum; 2 firemen, at the rate of $600 per annum each; 2 laborers, at the rate of $600 per annum each; in all, $7,800, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 98, line 4, before the word "dollars," to insert "and forty;" and in line 7, after the word "dollars," to insert "*Provided*, That the engineer who has heretofore been employed in this position is hereby transferred to the classified service," so as to make the clause read:

Schooner Grampus: Master, $1,500; first mate, $1,080; second mate, $840; engineer, $840; cook, $600; 3 seamen, at $540 each; 1 cabin boy, $420; in all, $6,900: *Provided*, That the engineer who has heretofore been employed in this position is hereby transferred to the classified service.

The amendment was agreed to.

The next amendment was, on page 101, after line 18, to insert:

Fish hatchery, Green Lake, Maine: For completion of roadway from said station to county road, $2,700.

The amendment was agreed to.

Mr. McCREARY. I wish to offer an amendment, to come immediately after the amendment just adopted.

The VICE-PRESIDENT. The Senator from Kentucky proposes an amendment, which will be stated.

The SECRETARY. After line 21, on page 101, it is proposed to insert:

For the establishment of a fish-cultural station in the State of Kentucky——

Mr. HALE. Mr. President——

Mr. McCREARY. Let the amendment be read. It has not yet been fully read.

Mr. HALE. We are proceeding with the committee amendments, and the Senator's amendment can be offered after the committee amendments shall have been disposed of.

Mr. McCREARY. It will save time to offer it now, and the Senator——

Mr. HALE. The Senator's amendment will come in after we get through with the committee amendments.

The VICE-PRESIDENT. Only committee amendments are now being considered.

Mr. McCREARY. If the Senator objects to its consideration now, I will wait until we are through with the committee amendments.

The reading of the bill was resumed and continued to the end of line 14 on page 103.

Mr. GARY. I should like to have this provision explained by the Senator in charge of the bill. The information I desire is whether this is the appropriation for the Immigration Commission, created under the act of 1907? Is this for the expenses of the Immigration Commission?

Mr. HALE. I am not certain. This is for the expenditures for the general subject of immigration. How much of it goes to the commission and how much to the general service I do not know. I should not say, from reading the provision, that it applies to the commission. I think perhaps the Senator from Vermont [Mr. DILLINGHAM], who is chairman of the commission, can tell the Senator.

Mr. DILLINGHAM. Mr. President, from a hasty reading of the section it would appear that the receipts arising from the head tax on those admitted to this country have heretofore been held as a separate fund, and out of it there has been paid not only the expenses of the administration of the Bureau of Immigration, but the expenses of the commission. Under the provision of the bill that fund is covered into the Treasury, and there appears to be an appropriation of a lump sum, to be expended under the direction of the Secretary of Commerce and Labor, which seems to cover all the provisions of the immigration act of 1907.

Mr. GARY. That is the act creating the commission.

Mr. DILLINGHAM. The commission was created by that act, but I do not understand that there is in this bill any specific provision for the commission, which I think is an oversight.

Mr. GARY. That is the information I wanted.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the subhead "Miscellaneous objects, Department of Commerce and Labor," on page 104, after line 15, to strike out:

Special examiners, division of naturalization: For compensation, to be fixed by the Secretary of Commerce and Labor, of examiners, interpreters, clerks, and stenographers, for the purpose of carrying on the work of the division of naturalization, Bureau of Immigration and Naturalization, provided for by the act of Congress approved June 29, 1906, entitled "An act to establish a Bureau of Immigration and Naturalization and to provide for a uniform rule for the naturalization of aliens throughout the United States," and for their actual necessary traveling expenses while absent from their official stations, subject to such rules and regulations as the Secretary of Commerce and Labor may prescribe; and for the actual necessary traveling expenses of the officers and employees of the division of naturalization in Washington while absent on official duty outside of the District of Columbia, $150,000. A detailed report of the expenditures under the appropriations for this service shall be annually submitted to Congress at the beginning of each regular session thereof.

The amendment was agreed to.

The next amendment was, on page 105, after line 10, to strike out:

For the purpose of carrying into effect that part of section 13 of the act of June 29, 1906 (34 Stat., 596), which provides: "And in case the clerk of any court collects fees in excess of the sum of $6,000 in any one year, the Secretary of Commerce and Labor may allow to such clerk from the money which the United States shall receive additional compensation for the employment of additional clerical assistance, but for no other purpose, if in the opinion of the said Secretary the business of such clerk warrants such allowance," $25,000: *Provided*, That the total compensation for the additional clerical assistants authorized by that portion of the said section quoted above to be employed by the clerks of courts shall in no case exceed one-half the gross amount of fees collected by such clerks in naturalization cases during the fiscal year, and that the expenditures from this appropriation shall be in the manner and under such regulations as the Secretary of Commerce and Labor may prescribe.

The amendment was agreed to.

The next amendment was, on page 107, after line 10, to strike out:

Bureau of Standards: Toward procuring a testing machine to cost not exceeding $150,000, and for services in connection therewith, for the determination by the Bureau of Standards of physical constants and the properties of materials as authorized by law, $50,000, to be immediately available.

The amendment was agreed to.

The next amendment was, under the head of "Under the Department of the Interior," subhead "Public buildings," on page 107, after line 24, to insert:

For repairing the operating machinery of the electric elevator, in the west wing of the Patent Office building, $4,000.

The amendment was agreed to.

The next amendment was, on page 108, after line 2, to insert:

For additional steel stacks for the scientific library of the Patent Office, $2,000.

The amendment was agreed to.

The next amendment was, on page 108, after line 15, to insert:

Toward the construction of the fireproof building for committee rooms and offices for the United States Senate, provided for in the sundry civil act approved April 28, 1904, including not exceeding $50 for the purchase of necessary technical books, $123,000.

The amendment was agreed to.

The next amendment was, on page 108, after line 21, to insert:

The unexpended balance of the appropriation of $30,000 made for maintenance, including heating, lighting, and ventilation, miscellaneous items, and for all necessary services for the fiscal year 1909, is reappropriated and made available for the fiscal year 1910.

The amendment was agreed to.

The next amendment was, on page 109, line 4, after the word "Capitol," to insert "Senate Office Building," so as to make the clause read:

Improving the Capitol grounds: For the care and improvement of the grounds surrounding the Capitol, Senate Office Building, and House Office Building, pay of one clerk, mechanics, gardeners, for fertilizers, repairs to pavements, walks, and roadways, $27,500.

The amendment was agreed to.

The next amendment was, on page 109, in line 11, before the word "House," to insert "Senate Office Building," so as to read:

Lighting the Capitol and grounds: For lighting the Capitol and grounds about the same, including the Senate Office Building, House Office Building, Botanic Garden, Senate and House stables, and engine house, Maltby Building, and folding and storage rooms of the Senate and House of Representatives; for gas and electric lighting.

The amendment was agreed to.

The next amendment was, on page 110, after line 3, to insert:

Court of Claims building, District of Columbia: For plumbing, painting, and revolving door for the Court of Claims building, $7,986.

The amendment was agreed to.

The next amendment was, under the subhead "Public lands service," on page 114, line 2, after the word "dollars," to insert:

Provided, That persons employed under this appropriation shall be selected by the Secretary of the Interior, at a compensation of $60 per month each, and shall be entitled to the same leave of absence or leave for sickness with pay as is allowed by law to other employees of the executive departments.

Mr. CURTIS. In line 4, page 114, I move to strike out the word "sixty" and to insert in lieu thereof the words "seventy-five," so as to make the pay $75 per month.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, under the subhead "Surveying public lands," on page 120, line 6, before the word "thousand," to insert "and fifty," so as to make the clause read:

For topographical surveys in various portions of the United States, $350,000, to be immediately available.

The amendment was agreed to.

The next amendment was, on page 120, line 9, before the word "thousand," to insert "and sixty," so as to make the clause read:

For geological surveys in the various portions of the United States, $260,000, to be immediately available.

The amendment was agreed to.

The next amendment was, on page 120, after line 10, to strike out:

For paleontologic researches relating to the geology of the United States, $10,000.

The amendment was agreed to.

The next amendment was, on page 121, line 2, after the word "hundred," to strike out "one" and insert "two," so as to make the clause read:

For gauging the streams and determining the water supply of the United States, and for the investigation of underground currents and artesian wells, and the preparation of reports upon the best methods of utilizing the water resources, $200,000.

The amendment was agreed to.

The reading of the bill was continued to line 13, page 121.

Mr. HALE. I offer the following amendment to correct a misprint in the bill.

The SECRETARY. On page 121, strike out lines 8 to 13, inclusive, and insert:

For the continuation of the investigation of the structural materials belonging to or for the use of the United States, such as stone, clays, cement, etc., under the supervision of the Director of the United States Geological Survey, to be immediately available, $150,000.

The amendment was agreed to.

The next amendment was, on page 121, line 19, before the word "thousand," to insert "and fifty," so as to make the clause read:

For the continuation of the analyzing and testing of the coals, lignites, and other mineral fuel substances belonging to or for the use of the United States, in order to determine their fuel value, etc., under the supervision of the Director of the United States Geological Survey, $150,000.

Mr. HALE. This amendment should be disagreed to, because of the amendment just adopted. It goes to the previous clause.

The amendment was rejected.

The next amendment was, on page 122, line 8, to strike out the period and insert a semicolon.

The amendment was agreed to.

The next amendment was, on page 122, after line 11, to insert:

The Director of the Geological Survey shall hereafter furnish to any person, concern, or institution, in the interest of education and the dissemination of knowledge, that shall pay in advance the whole cost of material and services thereof, copies of any photographs or lantern slides in the possession of the United States Geological Survey, and the moneys received by the director for the same shall be deposited in the United States Treasury to the credit of the appropriation "Geological maps of the United States" of the said Geological Survey, and this provision shall become effective immediately.

The amendment was agreed to.

The next amendment was, on page 122, line 24, before the word "hundred," to strike out "three" and insert "five," and in the same line, before the word "thousand," to strike out "forty-two" and insert "ninety-two," so as to make the clause read:

In all, for the United States Geological Survey, $1,592,390.

The amendment was agreed to.

The next amendment was, under the subhead "Miscellaneous objects, Department of the Interior," on page 123, after line 1, to insert:

Expenses of testimony in disbarment proceedings: For actual and necessary expenses to enable the Secretary of the Interior to take testimony, and prepare the same, in connection with disbarment proceedings instituted against persons charged with improper practices before the Department of the Interior, its bureaus and offices, $3,000, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 128, after line 10, to insert:

To enable the Secretary of the Interior to pay the National Automatic Fire Alarm Company, of Washington, D. C., for the maintenance of the automatic fire-alarm system now in certain buildings of the Government Hospital for the Insane, placed there by said company under act of Congress, March 3, 1903, and a contract between said company and the said Secretary of the Interior, acting for the United States, dated September 17, 1903, there is hereby appropriated out of said sum of $100,000 the sum of $4,634.50, the bills for the same to be rendered by said company and paid monthly: *Provided*, That such changes are made in the installation of said system as have been recommended to the Secretary of the Interior in the report of date of August 18, 1908, of the committee on inspection heretofore appointed by him under said contract, the same to be made before July 13, 1909, to the satisfaction of said committee: *And provided*, That said system is maintained by said company as provided in said contract.

The amendment was agreed to.

The next amendment was in the items for Howard University, on page 129, after line 24, to insert:

For scientific building and equipment, in addition to donations therefor, $90,000.

The amendment was agreed to.

The next amendment was, on page 130, line 2, before the word "thousand," to strike out "ninety-three" and insert "three," so as to make the clause read:

For improvement of grounds and repairs of buildings, $3,000.

The amendment was agreed to.

The next amendment was, on page 130, line 12, after the word "Hospital," to strike out:

For salaries and compensation of the surgeon in chief, not to exceed $3,000, and for all other professional and other services that may be required and expressly approved by the Secretary of the Interior; in all, $28,500.

And insert:

For salaries and compensation of the superintendent, not to exceed $3,000; for assistant superintendent, resident physician, resident surgeon, resident gynecologist, resident obstetrician, resident pathologist, clerk, assistant clerks, pharmacist, assistant pharmacist, steward, cooks, engineer, assistant engineer, firemen, pathologist, seamstresses, superintendent of nurses, assistant superintendent of nurses, night supervisor of nurses, head nurses, pupil nurses, maids, waiters, drivers, laundresses, laborers, watchmen, anæsthetist, orderlies, elevator men, and dietitian, $34,380.

So as to make the clause read:

Freedman's Hospital: For salaries and compensation of the superintendent, not to exceed $3,000, etc.

The amendment was agreed to.

The next amendment was, on page 131, line 6, before the word "dollars," to strike out "forty-three thousand five hundred" and insert "forty-nine thousand three hundred and eight," so as to make the clause read:

In all, $49,308.

The amendment was agreed to.

The next amendment was, on page 131, after line 6, to insert:

For an additional wing to Freedmen's Hospital building, $55,700.

The amendment was agreed to.

The next amendment was, on page 131, after line 13, to insert:

Memorial to John Wesley Powell: For the purpose of procuring and erecting on the brink of the Grand Canyon, in the Grand Canyon Forest Reserve in Arizona, a memorial to the late John Wesley Powell, with a suitable pedestal, if necessary, in recognition of his distinguished public services as a soldier, explorer, and administrator of government scientific work, $5,000: *Provided*, That the design for said memorial and the site for the same shall be approved by the Secretary of the Interior.

The amendment was agreed to.

The next amendment was, under the head of "Under the War Department," subhead "Armories and arsenals," on page 131, after line 26, to insert:

For additional equipment for shop building for the manufacture of artillery ammunition, $23,500.

The amendment was agreed to.

The next amendment was, under the subhead "Buildings and grounds in and around Washington," on page 138, after line 9, to insert:

For continuing the improvement of Potomac Park: To commence the construction of a riverside drive in section 3 of Potomac Park, being that section east of the causeway of the Pennsylvania Railroad bridge, $50,000.

The amendment was agreed to.

The next amendment was, on page 139, after line 21, to insert:

For additional accommodations to the building erected for the offices of the President, and for each and every purpose connected therewith, including heating apparatus and light fixtures, and furniture, all to be done according to plans, the details of which shall be approved by the President, and completed in every respect within the sum hereby appropriated, $40,000, to be expended by contract or otherwise, in the discretion and under the direction of the President, to be immediately available.

Mr. CLAY. I should like to ask the Senator from Maine if any estimate has been made for this item. I remember that a few years ago we spent $60,000 on additions to the White House. I am unable to see why at this time the sum of $40,000 more is needed.

Mr. HALE. It is not for the convenience of the President; it is for the convenience of everybody who goes to the executive office and does business. When we provided for the little office building everybody realized that it was not large enough. It was a part of the provision by which we built it that the walls should be made so strong that at any time we could impose an additional story on the building.

This is for the purpose of giving what I think every Senator realizes should be given, additional space to the executive office. It is all on one floor. It is not half as large as the Senate Chamber. There is no privacy. The whole space is taken up by clerks and reporters, and there ought to be another story there for the President, for Cabinet meetings, and for reception rooms, which are entirely cut out. That is why this provision was put on here.

Mr. CLAY. Will the Senator tell us what department has estimated for this expenditure?

Mr. HALE. It does not come under any department; it comes under Congress.

Mr. CLAY. I have certainly seen it stated in the public press that the present Chief Magistrate of the Nation was unalterably opposed to any change in the present plan and to any enlargement whatever.

Mr. HALE. That is covered by the provision in this amendment, that if the new President does not approve of it, it will not be done. It is to be done under his control. The amendment is very carefully drawn. If the President does not want it, it will not be done.

Mr. CLAY. If the statement now made by the Senator from Maine is true, it is a great pity when we were enlarging the White House that the plans and specifications were not drawn so as to accommodate the public.

Mr. HALE. I suppose there is no instance anywhere in the world of a great officer like the President who has not three times the accommodation this little building furnishes to the President. I never go there that I do not feel it is not half or a quarter what ought to be given to the President. This amendment does not have to be estimated for by any department. It is a matter purely in the discretion of Congress. If the Senate does not want the amendment, I have no interest in it.

The amendment was agreed to.

The next amendment was, on page 140, after line 15, to insert:

For traveling expenses of the President of the United States, to be expended in his discretion and accounted for on his certificate solely, $25,000.

Mr. CLAY. Mr. President, just one word in regard to this item.

My understanding is that the question of the salary of the President of the United States is now in conference. The Senate passed a bill fixing the salary of the President of the United States at $100,000, which included traveling expenses. That bill has gone to the House, and I presume I do not violate any rule when I say that I understand the House cut the amount from $100,000 to $75,000, the $75,000 to include traveling expenses. The House did that on a vote. I understand that the conferees have not come to any terms in regard to it. I presume that the conferees will either fix the salary at $100,000, which shall include traveling expenses, or $75,000, which shall exclude traveling expenses.

Mr. WARREN. It is a little worse than that. The House may yet vote for even less than $75,000. The matter is still open in conference, and this item of course will not be closed in conference until the other is settled.

Mr. CLAY. I thought the House had already agreed to $75,000. The House voted $75,000.

Mr. WARREN. But it is still unsettled and it is liable to change, because to-day or to-morrow the House is to vote again on the same question.

Mr. CLAY. Certainly if we fix the salary in the legislative appropriation bill, including traveling expenses, it ought not to be included in this bill.

Mr. HALE. Then within ten minutes this amendment would go out so quickly you would not know what had become of it.

Mr. CLAY. I did not catch what the Senator from Maine said.

Mr. HALE. If there is any agreement reached, either for a salary of $100,000 or $75,000, this amendment will go out at once. It is inserted here only to put in traveling expenses if it should happen that the House insists on a salary of $50,000.

Mr. CLAY. I think the Senator is correct. If the House insists on a salary of $50,000, this item ought to go in.

Mr. HALE. That is why it is put in.

Mr. BORAH. Do I understand the Senator from Maine to say that in case the House conferees agree upon $75,000, this item will go out?

Mr. HALE. Undoubtedly.

The amendment was agreed to.

The next amendment was, on page 141, line 2, before the word "dollars," to strike out "fifteen" and insert "eighteen," so as to read:

Lighting the Executive Mansion and public grounds: For gas, pay of lamplighters, gas fitters, and laborers; purchase, erection, and repair of lamps and lamp-posts; purchase of matches, and repairs of all kinds; stoves, fuel, and lights for office and office stable, watchmen's lodges, and for the greenhouses at the nursery, $19,500: *Provided*, That for each 5-foot burner not connected with a meter in the lamps on the public grounds not more than $18 shall be paid per lamp for gas, including lighting, cleaning, and keeping the lamps in repair, under any expenditure provided for in this act.

The amendment was agreed to.

The next amendment was, in the item for lighting the Executive Mansion and public grounds, on page 141, line 18, after the word "exceed," to strike out "$18" and insert "$20.85," so as to make the proviso read:

And provided further, That not more than $6,000 of said appropriation may be expended for lighting, extinguishing, cleaning, repairing, and painting park lamps of a higher candlepower than those provided for above and not less than 60 candlepower, which lamps shall cost not to exceed $20.85 per lamp per annum and shall otherwise be subject to the restrictions of this paragraph.

The amendment was agreed to.

The next amendment was, on page 141, line 23, before the word "dollars," to strike out "eighty" and insert "eighty-five;" and in line 26, before the word "dollars," to strike out "four hundred and eighty" and insert "five hundred and ten," so as to make the clause read:

For lighting six arc electric lights in Executive Mansion grounds within the iron fence, at not exceeding $85 per light per annum, which sum shall cover the entire cost of lighting and maintaining in good order each of said lights, $510.

The amendment was agreed to.

The next amendment was, on page 142, line 2, before the word "dollars," to strike out "eighty" and insert "eighty-five," and in line 5, before the word "dollars," to strike out "four hundred and eighty" and insert "five hundred and ten," so as to make the clause read:

For lighting six arc electric lights at the propagating gardens, at not exceeding $85 per light per annum, which sum shall cover the entire cost of lighting and maintaining in good order each of said lights, $510.

The amendment was agreed to.

The next amendment was, on page 142, line 12, before the word "dollars," to strike out "eighty" and insert "eighty-five;" and in line 14, before the word "hundred," to strike out "four" and insert "eight," so as to make the clause read:

For lighting arc electric lights in public grounds, as follows: For 7 in grounds south of the Executive Mansion, 32 in Lafayette, Franklin, Judiciary, and Lincoln parks, 14 in grounds south of Executive Mansion and in Monument Park, and 27 in Potomac Park driveway, at not exceeding $85 per light per annum, which sum shall cover the entire cost of lighting and maintaining in good order each of said lights; in all, $6,800, one-half of which sum shall be paid from the revenues of the District of Columbia and the other half from the Treasury of the United States.

The amendment was agreed to.

The next amendment was, on page 142, line 20, before the word "dollars," to strike out "eighty" and insert "eighty-five," and in line 23, before the word "hundred," to strike out "two" and insert "four," so as to make the clause read:

For laying conduit, erecting 40 poles and lamps, and lighting same on macadam roadways in sections 1 and 2 of Potomac Park, at not exceeding $85 per light per annum, which sum shall cover the entire cost of lighting and maintaining in good order each of said lights, $3,400, one-half of which sum shall be paid from the revenues of the District of Columbia and the other half from the Treasury of the United States.

The amendment was agreed to.

The next amendment was, on page 144, line 8, after the word "dollars," to insert: "*Provided*, That hereafter no advertisement of any kind shall be displayed and no articles of any kind shall be sold in or around the Monument, except upon the written authority of the Secretary of War," so as to make the clause read:

For fuel, lights, oil, waste, packing, tools, matches, paints, brushes, brooms, lanterns, rope, nails, screws, lead, electric lights, heating apparatus, oil stoves for elevator car and upper and lower floors; repairs to engines, boilers, dynamos, elevator, and repairs of all kinds connected with the Monument and machinery; and purchase of all necessary articles for keeping the Monument, machinery, elevator, and electric plant in good order, $3,000: *Provided*, That hereafter no advertisement of any kind shall be displayed and no articles of any kind shall be sold in or around the Monument, except upon the written authority of the Secretary of War.

The amendment was agreed to.

The next amendment was, under the subhead "Engineer Department," on page 146, line 8, after the word "improvement," to strike out "in completion of contract authorization," so as to make the clause read:

Improving Hay Lake and Neebish channels St. Marys River, Michigan: For continuing improvement, $395,000.

The amendment was agreed to.

The next amendment was, on page 146, line 12, after the word "the," to strike out "completion" and insert "construction," so as to make the clause read:

For continuing improvement of Mississippi River between St. Paul and Minneapolis by the construction of Locks and Dams Nos. 1 and 2, $180,000.

The amendment was agreed to.

The next amendment was, on page 147, line 2, after the word "falls," to strike out "in completion of contract authorization," so as to make the clause read:

Improving St. Marys River, Michigan: For continuing improvement at the falls, $225,000.

The amendment was agreed to.

The next amendment was, on page 147, line 10, before the word "Aransas," to strike out "Improving" and insert "For improving," so as to make the clause read:

For improving Aransas Pass and Bay, Texas: For continuing improvement in completion of contract authorization, $90,000.

The amendment was agreed to.

The next amendment was, on page 148, line 21, after the word "extension," to strike out "in completion of contract authorization," so as to make the clause read:

Improving harbor at Cleveland, Ohio: For continuing improvement in accordance with plan for new harbor entrance and breakwater extension, $175,000.

The amendment was agreed to.

The next amendment was, on page 154, line 4, after the word "improvement," to strike out "in completion of contract authorization," so as to make the clause read:

Improving harbor at San Juan, Porto Rico: For continuing improvement, $300,000.

The amendment was agreed to.

The next amendment was, on page 155, line 5, before the word "improvement," to strike out "completing" and insert "continuing," so as to make the clause read:

Waterway from Pamlico Sound to Beaufort Inlet, North Carolina: For continuing improvement, $135,000.

The amendment was agreed to.

The next amendment was, under the subhead "Miscellaneous objects, War Department," on page 160, after line 22, to insert:

Water supply, Presidio of San Francisco: For the purchase of land and acquirement of water rights on Lobos Creek, California, to protect the water supply of the Presidio of San Francisco and to provide an independent water supply for military purposes in San Francisco Harbor, California, $100,000.

The amendment was agreed to.

The next amendment was, under the subhead "National Home for Disabled Volunteer Soldiers," on page 176, after line 4, to insert:

For flagstaff, $1,000.

The amendment was agreed to.

The next amendment was, on page 176, line 9, before the word "thousand," to strike out "one" and insert "two," so as to make the clause read:

In all, $402,700.

The amendment was agreed to.

The next amendment was, on page 179, after line 9, to insert:

For iron fence and gatehouse, $12,200.

The amendment was agreed to.

The next amendment was, on page 179, line 17, before the word "hundred," to strike out "thirty-six thousand six" and insert "forty-two thousand eight," so as to make the clause read:

In all, $442,800.

The amendment was agreed to.

The next amendment was, in the items for the Marion Branch Home, on page 180, line 11, to strike out "For improvement of coal shed and coal-handling appliances, $14,500" and insert "For insulation of hot water and steam pipes, $15,000."

The amendment was agreed to.

The next amendment was, on page 180, line 18, before the word "dollars," to insert "five hundred," so as to make the clause at the end of the items for the Marion Branch read:

In all, $297,500.

The amendment was agreed to.

The next amendment was, on page 183, line 23, after the word "surgeon," to insert "$3,500;" and on page 184, line 11, before the word "thousand," to strike out "sixty-six" and insert "sixty-five," so as to make the clause read:

For president of the board of managers, $4,000; secretary of the board of managers, $500; general treasurer, who shall not be a member of the board of managers, $4,000; inspector-general and chief surgeon, $3,500; assistant general treasurer and assistant inspector-general, $3,000; assistant inspector-general, $3,000; assistant inspector-general, $2,500; clerical services for the offices of the president, general treasurer, and inspector-general and chief surgeon, $15,500; clerical services for managers, $4,500; agent, $600; for traveling expenses of the board of managers, their officers and employees, $16,000; for outdoor relief, $1,000; for rent, legal services, medical examinations, stationery, telegrams, and other incidental expenses, $7,000; in all, $65,100.

The amendment was agreed to.

The next amendment was, on page 184, line 14, before the word "and," to strike out "eleven thousand" and insert "twenty-three thousand seven hundred," so as to make the clause read:

In all, for National Home for Disabled Volunteer Soldiers, $4,323,750.

The amendment was agreed to.

The next amendment was, on page 184, after line 20, to insert:

In addition to those classes of discharged soldiers and sailors now admissible to the National Home for Disabled Volunteer Soldiers, all honorably discharged soldiers and sailors who have served in the Philippines, in China, or in Alaska, who are now or who hereafter may become disabled by disease or otherwise, and by reason of such disability are incapable of earning a living, shall hereafter be admitted thereto.

The amendment was agreed to.

The next amendment was, under the head of "Under the Department of Justice," on page 187, after line 19, to insert:

Rent of buildings: For rent of buildings and parts of buildings in the District of Columbia, used by the Department of Justice, for the fiscal year 1910, $300.

The amendment was agreed to.

The next amendment was, under the head of "Judicial," subhead "The United States courts," on page 194, line 2, after the word "dollars," to strike out the following proviso:

Provided, That when persons subpœnaed to attend as witnesses for the United States make affidavit to the effect that they are without sufficient funds to pay their expenses to the place where attendance is required, there may be advanced, when so directed by the Attorney-General, to such intended witnesses sufficient funds to enable them to attend, the amounts so advanced to be deducted at the time of settlement from the fees to which they may be entitled.

The amendment was agreed to.

The next amendment was, on page 194, after line 10, to insert:

Jurors and witnesses in United States courts in the Territory of Hawaii shall receive the same compensation for mileage and attendance as is now provided by law for such jurors and witnesses in the Territories of New Mexico and Arizona.

The amendment was agreed to.

The next amendment was, under the head of "Civil Service Commission," on page 204, line 12, before the word "thousand," to strike out "two" and insert "ten," so as to make the clause read:

For rent of additional buildings or rooms, $10,000.

The amendment was agreed to.

The next amendment was, on page 205, after line 12, to insert:

Capitol police: The Board of Capitol Police is hereby authorized and directed to retain on the roll of the Capitol police, James F. Sellers, who was injured for life while in the discharge of his duties, the said James F. Sellers to be assigned to duty now performed by him in the Senate reception room.

The amendment was agreed to.

The next amendment was, on page 205, after line 18, to insert:

Bust of President Zachary Taylor: To enable the Joint Committee on the Library to purchase of Mrs. Lola Wood, widow and sole executrix of John Taylor Wood, esq. (who was a grandson of President Zachary Taylor), a bust of President Zachary Taylor in her possession, to be placed in the Capitol building, $2,000, or so much as may be necessary.

The amendment was agreed to.

The next amendment was, under the head of "Government Printing Office," at the top of page 210, to insert:

Except the appropriations for salaries in the office of the superintendent of documents, and for stores and general expense for the office of the superintendent of documents, all appropriations made herein

under "Government Printing Office" shall be considered in apportioning the allotments for printing and binding to the several executive departments, bureaus, and independent offices of the Government.

The amendment was agreed to.

The next amendment was, on page 210, line 8, to strike out "*And provided further*" and insert "*Provided.*"

The amendment was agreed to.

The next amendment was, on page 213, line 5, before the word "thousand," to strike out "fifteen" and insert "twenty-five," so as to make the clause read:

For the Navy Department, $153,000, including not exceeding $25,000 for the Hydrographic Office.

The amendment was agreed to.

The next amendment was, under the subhead "Public printing and binding," on page 214, after line 20, to insert:

For printing and binding the annual report of the director, monographs, professional papers, bulletins, water-supply papers, and the report on mineral resources, $140,000; and said amount shall cover all printing and binding on account of said publications of the Geological Survey.

The amendment was agreed to.

The next amendment was, on page 217, after line 6, to strike out:

The Public Printer may hereafter, in his discretion, pay printer linotype operators and printer monotype keyboard operators at a rate not exceeding 60 cents per hour: *Provided*, That when the exigencies of the service require that work be performed on Sunday the Public Printer may, in his discretion, pay to employees, not receiving annual salaries, not exceeding 50 per cent in addition to the regular rate paid for such work.

The amendment was agreed to.

The next amendment was, under the head of "The Isthmian Canal," on page 222, line 13, after the word "two," to insert "and the amount of bonds authorized by said section is hereby increased to $160,000,000," so as to make the proviso read:

Provided, That all expenditures from the appropriation herein and hereinafter made for the Isthmian Canal shall be paid from, or reimbursed to the Treasury of the United States out of, the proceeds of the sale of bonds authorized in section 8 of the said act approved June 28, 1902, and the amount of bonds authorized by said section is hereby increased to $160,000,000.

The amendment was agreed to.

The next amendment was, on page 225, after line 5, to strike out section 6, as follows:

SEC. 6. Hereafter all supplies of fuel, ice, stationery, and other miscellaneous supplies for the executive departments and other government establishments in Washington, when the public exigencies do not require the immediate delivery of the article, shall be advertised and contracted for by the Secretary of Commerce and Labor, instead of by the several departments and establishments, upon such days as he may designate. There shall be a general supply committee in lieu of the board provided for in section 3709 of the Revised Statutes as amended, composed of officers, one from each such department and other government establishment in Washington, designated by the head thereof, the duties of which committee shall be to make, under the direction of the said Secretary, an annual schedule of required miscellaneous supplies, to standardize such supplies, eliminating all unnecessary grades and varieties, and to aid said Secretary in soliciting bids based upon formulas and specifications drawn up by such experts in the service of the Government as the committee may see fit to call upon, who shall render whatever assistance they may require. The committee shall aid said Secretary in securing the proper fulfillment of the contracts for such supplies, for which purpose the said Secretary shall prescribe, and all departments comply with, rules providing for such examination and tests of the articles received as may be necessary for such purpose; in making additions to the said schedule; in opening and considering the bids; and shall perform such other similar duties as he may assign to them: *Provided*, That articles intended to be purchased in this manner are those in common use by or suitable to the ordinary needs of two or more such departments or establishments; but the said Secretary shall have discretion to amend the annual common supply schedule from time to time as to any articles that in his judgment can as well be thus purchased. In all cases only one bond for the proper performance of each contract shall be required, notwithstanding that supplies for more than one department or government establishment are included in such contract. Every purchase or drawing of such supplies from the contractor shall be immediately reported to said committee. No disbursing officer shall be a member of such committee. No department or establishment shall purchase or draw supplies from the common schedule through more than one office or bureau, except in case of detached bureaus or offices having field or outlying service, which may purchase directly from the contractor with the permission of the head of their department or establishment: *And provided further*, That telephone service, electric light and power service purchased or contracted for from companies or individuals shall be so obtained by him.

The amendment was agreed to.

Mr. OVERMAN. Mr. President, I notice that in the reading the Secretary has passed over page 219, where I find a provision which reads:

6. To continue the equipment and construction of the Panama Railroad, to be disbursed directly under the Isthmian Canal Commission, $700,000; no part of said sum shall be expended until the obligation of the Panama Railroad Company for the full amount thereof, and drawing 4 per cent interest, payable to the United States, shall have been delivered to the Secretary of the Treasury of the United States, and by him accepted.

I wish to ask the acting chairman of the committee what is the present status of the Panama Railroad Company? I understand that the United States Government owns the entire stock of that railroad. Is that correct?

Mr. HALE. I suppose so.

Mr. OVERMAN. Is there any such company now in existence as the Panama Railroad Company?

Mr. HALE. Yes; in a way it exists. It has been merged with the Government, but it is maintained as a nominal organization.

Mr. OVERMAN. Then, as I understand, it is proposed that this company shall issue bonds for the amount of money that is appropriated.

Mr. HALE. There are already bonds out, but it is all a governmental matter. It is only kept up nominally, but it has no jurisdiction and has no power outside of the Government.

Mr. OVERMAN. Who issues these bonds?

Mr. HALE. They are issued by the command of the Government, and the Government controls the railroad.

Mr. OVERMAN. Is there a board of directors and a president of that railroad company there now?

Mr. HALE. There is a board of directors.

Mr. OVERMAN. And they issue these bonds?

Mr. HALE. By direction of the Government.

Mr. OVERMAN. Why not appropriate the money directly?

Mr. HALE. I do not think it would make much difference. It is one hand washing the other.

Mr. OVERMAN. Taking money out of one pocket and putting it into another?

Mr. HALE. That is all. The whole thing is in the hands of the Government.

Mr. OVERMAN. Can the Senator tell me why that organization is kept up?

Mr. HALE. It was thought better, as a matter of business, to maintain that nominal organization, because they had the bonds already out. We thrashed that out in discussions in the Senate some years ago.

Mr. OVERMAN. A Senator suggests—I think the Senator from Missouri [Mr. STONE]—that Cromwell is on the board of directors of that organization. Is that true?

Mr. HALE. They have no power, and there is no profit at all in it for them.

Mr. OVERMAN. Is Mr. Cromwell any longer a director of that railroad company?

Mr. HALE. I do not know.

Mr. OVERMAN. Who are the directors?

Mr. HALE. I do not know, and I do not want to know.

Mr. OVERMAN. Does the Senator not think that the country would like to know who are the directors of that railroad company?

Mr. HALE. Yes; perhaps so; but the Senator understands that we have undertaken this whole gigantic enterprise and that we are embarked in it. Where it will end nobody can tell.

Mr. OVERMAN. I understand that, and I agree to the necessary appropriation; but I can not understand why the Government should make an appropriation for the construction of a railroad at one place of $700,000, and then have the company give bonds to the Government for this money when the Government owns the railroad.

Mr. HALE. It is not much more than a matter of bookkeeping.

Mr. OVERMAN. Then there is another item I see here, where we provide a million dollars for building another railroad. What is the difference between completion and construction of a railroad? I thought the railroad was already constructed.

Mr. HALE. The Senator understands that that railroad had to be changed on account of the plans.

Mr. OVERMAN. I understand that; but this item is for completion and construction of a railroad as it now exists—one item. The other is for relocating.

Mr. HALE. Quite likely part of it is for the railroad as it is now.

Mr. OVERMAN. The road has never been completed, then?

Mr. HALE. That I do not know.

Mr. OVERMAN. This item says for construction and completion. The other is for relocating, for equipment, and construction of the Panama Railroad.

Mr. HALE. It all relates to the same road. There is no doubt about that. I never, however, have been able to follow all of the intricacies, the changes, and the adaptation of the plans down there. I have read the report as carefully as I can, and I see plainly that the whole thing is in charge of the Government and that about all we shall have to do will be to appropriate the money.

Mr. OVERMAN. Who is now the president of this Panama Railroad Company?

Mr. HALE. I do not know.

Mr. OVERMAN. I am sorry the Senator can not give me the information.

Mr. HALE. I have not looked into that matter at all. I suppose, perhaps, the Senator from South Dakota [Mr. KITTREDGE] can tell.

Mr. KITTREDGE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from South Dakota?

Mr. HALE. Certainly.

Mr. KITTREDGE. Mr. President, I want to call the attention of the acting chairman of the committee to line 2, on page 220. According to that provision, the bonds there referred to are to pay 4 per cent interest. Virtually, then, the United States Government is to pay 4 per cent interest upon an obligation authorized by this section. Am I correct?

Mr. HALE. I do not know what was the rate of the old bonds, but, undoubtedly, under this arrangement these bonds will be 4 per cent bonds. I do not suppose the Government will ever pay any money out. It will all be in the Treasury.

Mr. KITTREDGE. Mr. President, if the Senator will yield to me——

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from South Dakota?

Mr. HALE. Yes.

Mr. KITTREDGE. My point is, that if there is a necessity to borrow money, why not borrow it upon the credit of the United States and pay 2 per cent interest, instead of on the credit of this railroad company and pay 4 per cent interest?

Mr. WARREN. May I ask the Senator from South Dakota what percentage of interest is paid for the Panama Railroad bonds now out?

Mr. KITTREDGE. There were items on the appropriation bill two years ago, as I now recollect, providing for the payment of the outstanding bonds of the Panama Railroad.

Mr. WARREN. Is the Senator from South Dakota able to say that all those bonds have been redeemed?

Mr. KITTREDGE. The bonds ought to have been redeemed under the provisions of the law to which attention is called.

Mr. WARREN. Was that permissive or was it mandatory?

Mr. KITTREDGE. I have not in mind the language, but the intention on my part, at least, was that those bonds were to be taken up and paid, because they drew 4 per cent interest or a higher rate.

Mr. WARREN. The Senator will notice the following words:

drawing 4 per cent interest, payable to the United States, shall have been delivered to the Secretary of the Treasury of the United States, and by him accepted.

So the bonds are in the Treasury of the United States. It is simply paying for what bonds, if any, are in the Treasury, and not bonds held by outsiders. In other words, the Panama Railroad is paying 4 per cent interest on bonds and the United States is collecting the 4 per cent on the same.

Mr. OVERMAN. Why pay any more interest than 2 per cent upon them?

Mr. WARREN. I was hoping to get more information from the Senator from South Dakota [Mr. KITTREDGE]. My opinion is that these bonds become a part of and are on the same basis with the old bonds. You will probably find, upon looking it up, that a lot of those old bonds are in the Treasury of the United States, the property of the United States, and this issue, of course, is made to fit under the same law upon which those bonds were issued, to bear the same rate of interest.

Mr. OVERMAN. Is this railroad company paying interest on these bonds to the Government at 4 per cent?

Mr. WARREN. It pays interest on the bonds wherever the bonds are owned. I have no doubt about that.

Mr. OVERMAN. The old bonds have not been taken up by the 2 per cent bonds, as we understood was to have been done.

Mr. WARREN. My opinion is that they were not entirely taken up. I am speaking, however, without the information that I hoped to get from the Senator from South Dakota. What I have stated is, however, my impression.

Mr. ALDRICH. Mr. President, the transaction is very simple. The Government of the United States expended $700,000 for this property, for which it received $700,000 of 4 per cent bonds, and put them in the Treasury. It gets 4 per cent rather than pays 4 per cent.

Mr. CLAY. Mr. President, was the amendment on page 222, in lines 13, 14, and 15, agreed to?

The VICE-PRESIDENT. The amendment at that point was agreed to.

Mr. CLAY. I was not aware of it. I have a motion to make in regard to that amendment. I shall wait, however, until the bill gets into the Senate.

The reading of the bill was resumed. The next amendment of the Committee on Appropriations was, on page 227, after line 9, to strike out section 8, as follows:

SEC. 8. Immediately upon the receipt of the regular annual estimates of appropriations needed for the various branches of the Government it shall be the duty of the Secretary of the Treasury to estimate as nearly as may be the revenues of the Government for the ensuing fiscal year, and if the estimates for appropriations, including the estimated amount necessary to meet all continuing and permanent appropriations, shall exceed the estimated revenues the Secretary of the Treasury shall at once transmit a detailed statement of all of said estimates to the President, to the end that he may, in giving Congress information of the state of the Union and in recommending to their consideration such measures as he may judge necessary, advise the Congress how in his judgment the estimated appropriations could with least injury to the public service be reduced so as to bring the appropriations within the estimated revenues, or, if such reduction be not in his judgment practicable without undue injury to the public service, that he may recommend to Congress such loans or new taxes as may be necessary to cover the deficiency.

The amendment was agreed to.

The next amendment was, on page 229, after line 9, to insert as a new section the following:

SEC. 9. The Secretary of the Treasury shall cause all unexpended balances of appropriations which remained on the books of the Treasury on the 1st day of July, 1904, except permanent specific appropriations, judgments and findings of courts, trust funds, and appropriations for fulfilling treaty obligations with the Indians, to be carried to the surplus fund and covered into the Treasury: *Provided*, That such sums of said balances as may be needed to pay contracts existing and not fully discharged at the date of this act shall remain available for said purposes. For the purposes herein declared no appropriation made prior to July 1, 1904, shall be construed to be a permanent specific appropriation unless by its language it is made available for use until expended.

The amendment was agreed to.

The reading of the bill was concluded.

Mr. DEPEW. I offer an amendment, to insert on page 104, after line 11, what I send to the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 104, after line 11, it is proposed to insert:

The act of May 27, 1908 (35 Stat., p. 330), is hereby amended by striking out the following: "Immigration station, Ellis Island, N. Y.: For dredging new channel to afford landing facilities for arriving aliens and their baggage, $65,000," and inserting "Immigration station, Ellis Island, N. Y.: For dredging new channel and constructing new wharf for affording landing facilities for arriving aliens and their baggage, $65,000."

Mr. HALE. Mr. President, so far as I can judge from the reading, this is not an additional appropriation, but only a substitution in more practical form for an old appropriation. So I do not object to it.

Mr. KEAN. I move to amend the amendment by inserting the word "harbor" after "New York." It reads "Ellis Island, New York." Ellis Island is not in New York.

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to amend the amendment by inserting the word "harbor" after the word "New York."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. FORAKER. I offer the amendment which I send to the desk, to come under the subhead "Department of State," on page 203.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 203, it is proposed to insert the following:

Payment to the Catholic Church in Porto Rico: To give effect on the part of the United States to the basis of settlement of all matters in dispute between the Roman Catholic Church in Porto Rico on the one part and the United States and the people of Porto Rico on the other part, signed at San Juan, P. R., on August 12, 1908, by commissioners for the United States, the Roman Catholic Church of Porto Rico, and the people of Porto Rico, respectively, the Secretary of the Treasury is hereby authorized to pay to the bishop of Porto Rico as the representative and trustee of the Roman Catholic Church in that island, and for the exclusive benefit of the Roman Catholic Church in Porto Rico, the sum of $120,000, in full satisfaction of all claims of every nature whatsoever relative to the properties claimed by the Roman Catholic Church in Porto Rico which are now in the possession of the United States, to wit, the building known as the Santo Domingo Barracks and the land pertaining thereto, and the site of the building formerly known as the Ballaja Barracks, now known as the Infantry Barracks, both properties in the city of San Juan, P. R.: *Provided*, That the Roman Catholic Church shall guarantee the title to, and shall relinquish all rights and actions regarding said properties, and that the said properties shall belong exclusively to the United States: *And provided further*, That upon the acceptance of this sum the Roman Catholic Church shall relinquish all claims of any kind whatsoever against the United States arising in Porto Rico prior to the approval of this act.

Mr. OVERMAN. Mr. President, I make the point of order on that amendment. I do not think it has been estimated for. It is too important a matter, appropriating as it does $120,000, to be put on this bill unless we know something about it.

Mr. LODGE. A bill similar to the amendment has passed the Senate, and so the amendment is clearly in order.

Mr. OVERMAN. I understand that this matter was up in the House of Representatives, when it was stricken from the

bill, and that it was before the committee there and not reported favorably, as I am informed.

Mr. FORAKER. The amendment in the form of a bill was reported without objection from the Committee on Pacific Islands and Porto Rico, and then it was passed in the Senate without any opposition. It provides simply for payment of a sum of money, arrived at by commissioners representing the United States and commissioners representing the Roman Catholic Church.

Mr. OVERMAN. It may be all right——

Mr. FORAKER. It is an agreed sum, sent here by the Secretary of State.

Mr. OVERMAN. It may be all right, but it is general legislation, and I should like to look into it.

Mr. FORAKER. And it was also favorably reported in the other House. It went out in the House simply on a point of order.

Mr. WARREN. And it has been estimated for.

Mr. FORAKER. It has been estimated for; and there is a printed report, which was published not only in pamphlet form, but also in the RECORD when the Senate passed the bill. So it seems to me it ought to go on the bill.

Mr. LODGE. I wish merely to say a word in regard to the point of order. This item has been estimated for, it has passed the Senate, and has been reported from a committee. So it is clearly taken out of the operation of the rule, I should think.

Mr. FORAKER. The amendment is clearly in order.

Mr. CLAY. Let me say to the Senator from Ohio that in the discussion in the House I thought there was some question made about the title to this property.

Mr. FORAKER. No; not that I know of. I did not read what occurred in the House.

Mr. CLAY. I think the Senator will find such to be the case if he will examine the RECORD.

Mr. FORAKER. This amendment provides that the title shall be guaranteed by the Roman Catholic Church to the United States.

Mr. CLAY. I know that in the House that feature of it was discussed, for I read it in the RECORD.

Mr. FORAKER. It may have been. I did not read the discussion in the House. I saw that it went out on a point of order, not of the merits at all; but inasmuch as it had been estimated for, had been arranged for by the Department of State, had been recommended by that department, had been unanimously reported from the Committee on Pacific Islands and Porto Rico, with a printed report, and had passed the Senate unanimously, it was regarded by me as clearly in order.

Mr. OVERMAN. I understand that even under the Spanish Government there was some doubt as to whether the church owned the property in question. There was some trouble about the title. I should like to look into it. I think the amendment proposes general legislation, and therefore I make the point of order against it.

Mr. WARREN. I remind the Senator that it was put on the bill by the Committee on Appropriations of the House.

Mr. FORAKER. I have stated that it was reported favorably by the Committee on Appropriations of the House and put on by the committee of the House as a part of the bill. It is printed in the bill, in the copy I have.

Mr. CULLOM. If anything is in order, it seems to me this amendment is.

Mr. FORAKER. Then it was reported from the Committee on Appropriations of the House and printed, on page 194, in the exact language employed here now, which is the same language, with a very slight change in phraseology, which was employed in the bill the Senate passed. I ask for a ruling whether or not the amendment is in order.

Mr. OVERMAN. I think the subject ought to be fully considered and discussed before it is acted on.

Mr. CLAY. The amendment certainly has not been considered, I will say to the Senator, by the Committee on Appropriations. I do not desire to dispute anything the Senator has said about the matter, but the sundry civil bill only came to the Senate on last Saturday from the House, carrying $138,000,000, and has had but a few hours' consideration by the committee and by the Senate.

Mr. FORAKER. If the Senator will allow me, so long ago as last Thursday or Friday I offered this amendment and had it sent to the desk and printed as an amendment that I proposed to offer when the bill should be taken up for consideration. I had it referred to the Committee on Appropriations. The Committee on Appropriations have had the amendment. I do not know why they did not act favorably upon it.

Mr. CLAY. To say the least, an item of this kind and of this size, it does seem to me, ought to be considered by the Committee on Appropriations before we act on it in the Senate.

Mr. FORAKER. I supposed it was considered there.

Mr. CLAY. The Senator from Maine [Mr. HALE], I know, is very particular about bringing all amendments before the committee, and if anything was said about this amendment I am not aware of it.

Mr. FORAKER. I do not know what occurred in the committee; but I know I did my full part about it. I ask for a ruling as to whether the amendment is in order.

The VICE-PRESIDENT. The Chair will submit the question to the Senate, Is the amendment in order? [Putting the question.] The ayes have it, and the amendment is in order. The question recurs on agreeing to the amendment.

The amendment was agreed to.

Mr. BULKELEY. I wish to offer an amendment. It proposes to strike out, on page 126, from line 20 down to line 4 on page 127 and to insert in lieu the language which I send to the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 126, beginning with line 20, it is proposed to strike out the remainder of the page and down to and including line 4 on page 127 and insert:

Platt National Park, Oklahoma: For protection and improvement of Platt National Park, Oklahoma, to be expended under the supervision of the Secretary of the Interior, $20,000. Of this amount the sum of $15,000 shall be expended in the construction of a sanitary sewer through the park, with laterals to intersect with others connecting the sewer system of the city of Sulphur, Okla.: *Provided*, That the municipality of Sulphur expend in the construction of said sewer system through the park the sum of $15,000.

Mr. BULKELEY. I offer this amendment for the reason that the bill as reported provided that the appropriation should be made out of funds now in the hands of the Secretary of the Interior. I have a letter from the Secretary of the Interior, in which he states——

Mr. HALE. This is in place of a provision in the bill, is it not?

Mr. BULKELEY. It is.

Mr. HALE. I do not object. It only expresses the details in better form.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. FRYE. I offer the amendment which I send to the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 204, after line 3, it is proposed to insert:

To enable the United States fittingly to participate in the Universal and International Exhibition to be held at Brussels, Belgium, April to November, 1910, $200,000, or so much thereof as may be necessary, to be expended under the direction of the Secretary of State.

Mr. FRYE. That amendment was very warmly recommended by the Secretary of State; it was unanimously approved by the Committee on Foreign Relations; and Brussels has always been friendly toward our expositions. I hope that my colleague will consent to inserting the amendment in the bill.

Mr. HALE. No; I certainly can not. I am very tired of these expositions. I am sorry, but I must make the point of order.

Mr. FRYE. It is clearly in order.

Mr. HALE. In what way?

Mr. FRYE. It was reported from the Committee on Foreign Relations and referred to the Committee on Appropriations.

Mr. HALE. But it is entirely new matter, and is not reported as an addition to any appropriation. It provides in terms for the participation of the United States in this exposition, and for such participation there is no law. We have to make the law; otherwise we could not participate in the exposition.

Mr. FRYE. I do not see, for the life of me, what point of order can be made against the amendment when, under the rule, it has been reported from the Committee on Foreign Relations, sent to the Committee on Appropriations, and recommended by the State Department.

Mr. HALE. If there was now authorization for our participation in the exposition, and we were appropriating money for that purpose in accordance with an estimate or a report of a committee, it would be in order; but we are providing for our participation in the exposition, and for that there is no law.

Mr. FRYE. The exposition is provided for at Brussels.

Mr. HALE. But not our participation in it.

Mr. FRYE. I know we have not agreed to participate; and this is for us to agree to it.

Mr. HALE. Besides, I do not think, in view of the condition of the Treasury, that we had better embark on any more of these expensive expositions.

Mr. FRYE. I have nothing further to say.

The VICE-PRESIDENT. What is the point of order the senior Senator from Maine makes?

Mr. HALE. That the amendment proposes general legislation for which there is no warrant of existing law.

The VICE-PRESIDENT. The Chair sustains the point of order.

Mr. CURTIS. I offer the amendment which I send to the desk, to come in on page 206.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 206, line 5, after the word "secretary," it is proposed to strike out "to the Public Printer, $2,500," and insert in lieu thereof the words "three thousand."

The amendment was agreed to.

Mr. CUMMINS. I offer the amendment which I send to the desk, to come in on page 206, line 13.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 206, line 13, before the word "dollars" where it occurs the first time, it is proposed to insert the words "two hundred and fifty," so that, if amended, it will read "chief timekeeper, $2,250."

Mr. HALE. That is all right, Mr. President.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. *DU PONT*. I offer the amendment I send to the desk.

The SECRETARY. On page 192, after line 19, it is proposed to insert:

The annual salary of the United States attorney for the district of Delaware shall be $3,000 per annum after the beginning of the fiscal year 1910.

The amendment was agreed to.

Mr. McCREARY. I offer the amendment I send to the desk.

The SECRETARY. On page 101, after line 21, insert:

For the establishment of a fish-cultural station in the State of Kentucky at some suitable point to be selected by the Secretary of Commerce and Labor, $25,000.

Mr. McCREARY. There is no fish-cultural station in Kentucky, and I hope the Senator from Maine will not raise the point of order on the amendment.

Mr. HALE. The committee adopted one rule. With the present condition of the Treasury the committee declined to report an appropriation for any fish station unless it had already been established by law, and there are eight or ten of them. I am sorry to say that in drawing the line it came right across the Senator's good and handsome face. But I do not see how I can avoid insisting upon the point of order.

Mr. McCREARY. Will the Senator permit it to be submitted to the Senate?

Mr. HALE. It is not for me to suggest about a matter being submitted to the Senate, nor is it for any Senator.

The VICE-PRESIDENT. What is the point of order?

Mr. HALE. The point of order is that there is no law.

The VICE-PRESIDENT. That it is general legislation?

Mr. HALE. Yes.

The VICE-PRESIDENT. The Chair sustains the point of order.

Mr. GORE. Mr. President, I have an amendment which I desire to offer. I will first ask whether it meets with objection on the part of the Senator from Maine. The amendment I desire to offer would come in on page 191, line 10, after the words "western judicial district of Oklahoma." As the amendment is of considerable length, I will not ask to have it read until I know whether the Senator from Maine objects to it. It provides for subdividing the eastern district of Oklahoma. It meets with the approval of the Congressmen representing that half of the State; it was prepared, as I understand, by one of those Congressmen, in conjunction with a representative of the Department of Justice. It has the approval of the presiding judge of that district, and also the indorsement of the bar of that judicial district.

A bill for this purpose is now in the Committee on the Judiciary of the Senate, and the chairman of the committee to-day very kindly agreed to report it as an amendment to another bill relating to a judicial district in Texas—a House bill. The senior Senator as well as the junior Senator from Texas has very kindly agreed that it may be attached to the bill. But as that measure originated in the House and is purely local, the lateness of the session causes me to fear to amend it may imperil the passage of the House bill. I therefore called the matter to the attention of the chairman of the Judiciary Committee, and stated that I would submit it in this place and in this connection. It is purely a local measure, and the people in that part of the State now have to travel from 200 to 250 miles to attend court. I should like very much to submit the amendment, if there is no objection to it.

Mr. HALE. Whatever may be my view about the propriety and the expediency of the amendment, it is clearly a matter of general legislation.

The VICE-PRESIDENT. The Chair understood the Senator from Oklahoma to say that he would not submit his amendment unless it met with the approval of the Senator from Maine.

Mr. GORE. Yes. I will not have it read.

The VICE-PRESIDENT. The amendment will not be read.

Mr. HALE. I have examined it.

Mr. BORAH. I offer an amendment, to be inserted on page 112, line 24, after the word "dollars."

The SECRETARY. On page 112, line 24, after the word "dollars," it is proposed to insert:

That the Secretary of the Interior be, and he is hereby, authorized to require all payments for water rights under the reclamation act of June 17, 1902, to be made to the special fiscal agents or other bonded fiscal officers of the Reclamation Service established under the provisions of said act, who shall collect, receive, deposit, and account for the moneys so paid as the building, operation, and maintenance charges, in pursuance of public notices issued under said act, and any other moneys which may come into their possession in connection with the operations under said act, and the Secretary may make regulations to govern such officers in the collection and deposit of and accounting for such moneys. The gross amount of such collection shall be deposited in the Treasury as repayments to the reclamation fund.

Mr. HALE. The Senator who offers the amendment is a very good lawyer. I should be willing to leave it to him whether this is not, of course, a scheme of general legislation.

Mr. BORAH. Undoubtedly; but I supposed the merit of the proposition might permit the Senate to pass it without objection.

The VICE-PRESIDENT. Does the Senator from Maine make the point of order against the amendment?

Mr. HALE. I have to insist on all these points.

The VICE-PRESIDENT. The amendment proposes general legislation, and the Chair sustains the point of order.

Mr. TELLER. In line 22, page 111, I move to strike out "ten" and insert "twenty-five."

Mr. HALE. There is no objection to the amendment.

The amendment was agreed to.

Mr. LA FOLLETTE. I offer the amendment I send to the desk.

The SECRETARY. After line 5, on page 175, it is proposed to amend by inserting:

For chaplain's quarters, $4,500.

Mr. LA FOLLETTE. I will say that this is estimated for and is very much needed.

Mr. HALE. It is all right. The committee would have put it in if it had known the facts.

The amendment was agreed to.

Mr. DILLINGHAM. On page 104, after line 4, I offer the amendment I send to the desk.

The SECRETARY. On page 104, after line 4, it is proposed to insert:

For the expenses of the commission provided for in section 39 of said act of February 20, 1907, including the salaries of the commissioners and their clerks and other employees, $250,000.

Mr. CLAY. I ask the Senator from Vermont whether that is in addition to the amount that has already been spent for the Immigration Commission?

Mr. DILLINGHAM. The Senate is probably aware that what is known as the "immigration fund," which is created by the head tax on aliens admitted into the United States, has always been held as a separate fund. By the provisions of the pending bill that fund is turned into the Treasury, and direct appropriations are made for carrying on the work previously carried on and paid for out of that fund. Immediately preceding the proposed amendment is the provision for carrying on the work of the Bureau of Immigration. By the act of 1907, the "immigration act," so called, the Immigration Commission was created, and the expenses were to be paid out of that fund. That has been carrying on its work, and the work is very largely completed. More than half of it is done.

It covers the entire country. I suppose there is a force of 70 or 80 men in different parts of the country to-day gathering information which eventually will be presented in reports to Congress.

Mr. CLAY. Can the Senator from Vermont state how much has been expended up to this time?

Mr. DILLINGHAM. Something over $300,000; about $330,000. I have not the exact figures at hand.

Mr. CLAY. Are we to spend $250,000 in addition to that sum?

Mr. DILLINGHAM. I think the work next year will probably cost about $200,000, and that will complete it.

Mr. CLAY. The entire work, then, will cost over a half a million dollars?

Mr. DILLINGHAM. It will cost a half a million dollars, and that sum we appropriate every year for the exclusion of the

Chinese alone; and I apprehend the work of this commission will be of more value to the country than has come under that provision of the law in twenty years. We never have had in the history of this Government any authoritative examination of the whole question of immigration as it affects the whole country—all of the States, all the branches of society, and all the branches of business.

The commission is carrying on the work in a scientific way. It presented a report to Congress Saturday last, which is now in the hands of the printer; and I will be very glad, indeed, to have every Senator read it.

This provision was in the House bill and went out on a point of order. If the amendment is not adopted, I judge from the hasty reading that I have made of the bill that, while the Bureau of Immigration will go on with its work administering the law, the work expressly authorized by Congress and now being conducted by the commission will fall to the ground and never be completed.

Mr. HALE. I think the Senator from Vermont is right about it. Of course it is an expensive piece of business, but I hope the results will amply repay for the money invested and appropriated. I agree with the Senator that unless this item is put either in this bill or some other bill, the deficiency bill, the work of the commission will be arrested.

Mr. FLINT. I offer an amendment to the amendment.

The VICE-PRESIDENT. The Senator from California proposes an amendment to the amendment, which will be stated.

The SECRETARY. It is proposed to add at the end of the amendment:

Provided, That no money shall be paid to any commissioner unless said commissioner devotes his entire time to the work of the commission.

Mr. LODGE. Mr. President, as one of those commissioners, I may say that I receive no salary or pay of any kind, so my remarks are disinterested. But I object to being compelled to devote all of my time to the commission, and it is really practically impossible to do that, as the chairman knows.

Mr. FLINT. I am speaking of those not in either branch of Congress. We are paying to each of those commissioners, not Members of Congress, $7,500 a year, the same amount of pay that is received by a Senator of the United States, and yet these commissioners are devoting their time to the work at which they were engaged before they received this appointment. It seems to me that when we are considering the expenses of the Government, it is a proper time to look at the expense of this commission, whose work, as has been said by a commissioner here, will cost half a million dollars, when we also make provision for the Department of Commerce and Labor, which does the same work as the commission. Either this commission should be abolished or the Bureau of Immigration in the Department of Commerce and Labor. Duplicate work is being done at great expense to the Government, and there is a conflict between these two departments—this commission and the Department of Commerce and Labor.

In addition to this, I do not agree with the statement made by the Senator from Vermont that the commission has accomplished anything, as far as the work is concerned on the Pacific coast, in the matter of Chinese smuggling into the United States. As a matter of fact, if Chinese have been smuggled into this country, then there have been a great many incompetent officials in the immigration department of the Government, not only here, but on the Pacific coast.

Mr. DILLINGHAM. I wish to say for the benefit of the Senator from California that there are no differences existing to-day between this commission and the Bureau of Immigration. From the time the commission was organized and began its work it has been its purpose and it has been its action to aid the Bureau of Immigration in carrying on its work, and every investigation which it has made it has made for the benefit of the bureau, but by officers outside of the force that administers the law.

I desire to say for the benefit of the Senator from California that the work done by the commission in southern California was turned over to the department, and the Bureau of Immigration took it up and of its own motion made every discharge of officials that has been made in California. Before those discharges were made the number of Chinese coming over the border was very large, and since those discharges were made the number coming in has been very small indeed. The commission did not do that; the department did it.

Mr. FLINT. I am not complaining of the discharge of officials in southern California. I think that was proper, if they were not efficient. The point I make is, Why limit the removal to three or four officials in southern California if this great scandal existed there? They should have gone to the fountain head here in the city of Washington if smuggling was going on. The mere discharge of two or three subordinates is not sufficient if a large number of Chinese were smuggled into the United States in southern California. The investigation should not have been allowed to stop with the discharge of three subordinates. The smuggling could not have gone on there unless those who were higher up were either incompetent or aware of what was being done.

Mr. DILLINGHAM. I do not propose to carry on any lengthy discussion with the Senator from California on the question of the work of the commission. I will merely say that was one small branch of the work of the commission which he has referred to. It was taken up by the department and the bureau and was ended long ago, and I hope for the good of the Government.

I desire to say a word in relation to salaries of the commissioners. I stand as my friend the Senator from Massachusetts [Mr. LODGE] stands. Six out of the nine commissioners are members of the Senate or the House, and under the law they get no pay whatever from the commission. Those six of us have given earnest, patient work to the affairs of the commission, and we believe the commission is doing a magnificent work.

The other men were appointed by the President of the United States under the authority of the act creating the commission, and their salaries were fixed by the President of the United States, as the act authorized him to fix the salaries. Two of those men are now holding other government employment, one as Commissioner of Labor and the other as Assistant Secretary of the Department of Commerce and Labor, and the salaries coming to them by reason of those offices are deducted from the salaries which the President fixed for them as members of the Immigration Commission.

Mr. SMITH of Michigan. Mr. President——

The VICE-PRESIDENT. Does the Senator from Vermont yield to the Senator from Michigan?

Mr. DILLINGHAM. I am very glad to yield.

Mr. SMITH of Michigan. I should like to ask the Senator what is the amount of the head tax?

Mr. DILLINGHAM. Four dollars upon each alien admitted.

Mr. SMITH of Michigan. Upon each alien?

Mr. DILLINGHAM. Upon each alien admitted; and the fund depends upon the number admitted each year.

Mr. SMITH of Michigan. Does the Senator know how much it aggregates?

Mr. DILLINGHAM. It differs with different years. One year we had a million and a quarter of immigrants come in.

Mr. SMITH of Michigan. Does the Senator know what it is for the current year?

Mr. DILLINGHAM. I do not remember the number.

Mr. LODGE. About $2,000,000 for this year.

Mr. DILLINGHAM. About $2,000,000 for this year.

Mr. LODGE. I think the immigration fell as low as a half million—between a half million and 600,000, as I remember.

Mr. SMITH of Michigan. Has it ever exceeded the $2,000,000 mark in any one year?

Mr. LODGE. The immigration began to fall off, and, as the Senator knows, it fell off very much within the last year or eighteen months.

Mr. SMITH of Michigan. Yes.

Mr. LODGE. The present head tax went on at the beginning of the fiscal year, July 1, 1907; so that the increased head tax of $4 has only been running about eighteen months, and it fell on reduced immigration. Before that it was $2.

Mr. SMITH of Michigan. I should like to ask whether the head tax applies to adults and children?

Mr. LODGE. Yes; it applies to all over 16 years of age.

Mr. SMITH of Michigan. All aliens?

Mr. LODGE. Yes.

Mr. SMITH of Michigan. Including adults and children?

Mr. LODGE. Children over 16 years of age.

Mr. GARY. I desire to ask the Senator from Vermont a question. He spoke of the salary of two of the gentlemen appointed by the President, but he did not mention the professor in Cornell University.

Mr. DILLINGHAM. Professor Jenks.

Mr. GARY. Is it not a fact that he is a regular lecturer at Cornell University, and has not abandoned his position as such? Is it not a fact that he is a lecturer also at Columbia College? The Senator stated a few days ago——

Mr. DILLINGHAM. Professor Jenks is a professor in Cornell University. During the present year I understand he has delivered three lectures a week. They are old lectures, made

from old material, to which he has given no care or preparation during the current year.

He has simply taken the time to deliver those lectures. He keeps a stenographer with him constantly, and gives his entire time to the work of the commission aside from that.

Mr. GARY. Is he not also engaged in lecturing at Columbia College in New York?

Mr. DILLINGHAM. I am not so informed.

Mr. GARY. I am.

Mr. DILLINGHAM. He was at one time, but not recently.

Mr. GARY. I simply state this for the reason that the Senator, when I was addressing the Senate, said that Professor Jenks gave practically his entire time to the work of the commission.

Mr. DILLINGHAM. I repeat the statement now.

Mr. GARY. I have made investigation, and I find that he is a regular professor at Cornell University. He is also a lecturer in Columbia College, and does other work besides. Now, how can he give all his time to the work of the commission?

Mr. DILLINGHAM. I do not know anything about it other than what I have mentioned. I do not think he is lecturing at Columbia at the present time. He formerly lectured there. He had one year's course of lectures, but he has not done anything of that kind recently that I am aware of.

Mr. BANKHEAD. I should like to inquire whether, if the amendment offered by the Senator from California is adopted, any member of the commission would be paid anything for his necessary expenses outside of his salary.

Mr. DILLINGHAM. I do not remember how the amendment reads.

Mr. BANKHEAD. I should like to understand that. I do not think the Senator from California intended it to go to that extent.

Mr. FLINT. I want them to have their traveling expenses. I have no objection to that.

Mr. LODGE. Let the amendment be stated again.

The VICE-PRESIDENT. The Secretary will read the amendment.

The SECRETARY. On page 104, after line 4, it is proposed to insert:

For the expenses of the commission provided for in section 39 of said act of February 20, 1907, including the salaries of the commissioners and their clerks and other employees, $250,000.

It is proposed to amend the amendment by adding the following proviso:

Provided, That no money shall be paid to any commissioner unless said commissioner devotes his entire time to the work of the commission.

Mr. DILLINGHAM. That answers it.

Mr. LODGE. That would cover the expenses.

Mr. BANKHEAD. The Senator thinks that would cover the expenses?

Mr. DILLINGHAM. I think it would. I hope the amendment to the amendment will not be adopted.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from California [Mr. FLINT] to the amendment of the Senator from Vermont [Mr. DILLINGHAM].

The amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on agreeing to the amendment proposed by the Senator from Vermont.

The amendment was agreed to.

Mr. MILTON. On page 72, after line 3, I move to insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any moneys not otherwise appropriated, to C. M. Cox, of Bonifay, Holmes County, Fla., the sum of $316.25, for services rendered as United States commissioner in and for the northern district of Florida.

Mr. HALE. I shall make a point of order against the amendment. It is a pure claim. The committee has kept all such claims off the bill.

The VICE-PRESIDENT. The Chair sustains the point of order.

Mr. MILTON. On page 118, after line 4, I move to insert:

That the interest of the United States in and to the land situated in Dade County, in the State of Florida, to wit: The northwest quarter of the northeast quarter of section 1, township 51, range 41 south and east, is hereby relinquished and released unto John M. Bryan, jr., of Dade County, Fla., and patent issue therefor: *Provided*, The said John M. Bryan, jr., pay $1.25 an acre for the land referred to prior to the issuance of the patent to him.

Mr. HALE. That is clearly subject to a point of order. It is pure legislation.

The VICE-PRESIDENT. The Chair sustains the point of order that the amendment is in the nature of general legislation.

Mr. PILES. At the end of page 74 I move to insert as a separate paragraph:

For establishing, under the direction and supervision of the Light-House Board, such aids to navigation in Alaskan waters as may, in the opinion of the Secretary of Commerce and Labor, be considered advisable and necessary, $140,000.

Mr. HALE. Is that estimated for or reported by a committee?

Mr. PILES. It is estimated for. A bill for this purpose has passed the Senate, and this amendment was referred to the Committee on Commerce and recommended for incorporation in the bill.

The amendment was agreed to.

Mr. DEPEW. On page 204, after line 3, I move to insert:

For the purpose of enabling the army and navy to participate in the Hudson-Fulton celebration, to be held on the Hudson River, New York, September 27 to October 2, 1909, $25,000, of which $15,000 shall be at the disposal of the Secretary of War and $10,000 at the disposal of the Secretary of the Navy.

Mr. HALE. Is this item estimated for by the Secretary of the Treasury or reported by any committee?

Mr. DEPEW. It has not been estimated for or reported by any committee. The State of New York, the city of New York, and private citizens are spending about $2,000,000 to celebrate the three hundredth anniversary of the discovery of the Hudson River. They are to reproduce the *Half Moon*, in which Henry Hudson went up the river. It seems as though the navy at least ought to participate in order to show the advance of the country since three hundred years ago, and the army ought also add to the dignity of the celebration. Without this amendment neither the navy nor the army can do anything in regard to it, because it takes place next September.

Mr. HALE. I am afraid I must insist on the point of order.

The VICE-PRESIDENT. Will the Senator from Maine kindly state his point of order?

Mr. HALE. It is an additional appropriation, neither estimated for nor reported by any committee.

The VICE-PRESIDENT. The Chair sustains the point of order.

Mr. RICHARDSON. On page 155, after line 15, I move to insert:

For reconstruction of bridge known as the Middle Bridge across inland waterway between Chincoteague Bay, Virginia, and Delaware Bay, Delaware, in accordance with estimate printed in House Document No. 538, Fifty-ninth Congress, first session, $12,044.

Mr. HALE. I make the point of order that that item has not been submitted as an estimate at this session nor reported by a committee.

The VICE-PRESIDENT. The Chair sustains the point of order.

Mr. HEYBURN. On page 112, after line 18, I desire to propose the amendment I send to the desk. I want to say to the Senate and to the Senator in charge of the bill that it simply proposes that the Government of the United States shall hand over property that it has in its possession as trustee for a county, in order that the county may build public buildings on it. It was deeded to the Government of the United States for the purpose of enabling the Government to pass title to the county, and it seems to require some action by Congress.

Mr. HALE. Let us hear what the amendment says.

The VICE-PRESIDENT. The amendment will be read.

The SECRETARY. On page 112, after line 18, insert:

That the United States relinquish unto the county of Kootenai, in the State of Idaho, all of its right, claim, or title to or the possession of that certain piece or parcel of land situated in Kootenai County, in the State of Idaho, being a part of lot 49, which is a portion of the Fort Sherman Military Reservation, described as follows: Beginning at a point 1,332 feet north of a stone monument at or about high-water mark on the east boundary of Fort Sherman Military Reserve (abandoned), said point being the northeast corner of the Coeur d'Alene and Spokane Railway terminal grounds, in section 14, township 50 north, range 4 Washington base meridian, said point being also the northeast corner of lot 49 of said military reserve (abandoned); thence running west along the north line of said terminal grounds 332 feet; thence southeasterly along a straight line 265 feet, more or less, to a point 252 feet south of and 252 feet west of the place of beginning; thence east 252 feet to the intersection with the east line of said terminal grounds; thence north along said east line 252 feet to the place of beginning; to have and to hold forever as a part of the public lands belonging to the said county of Kootenai.

Mr. HALE. Likely this is a good proposition, but if the Senator will allow me it has no place on the appropriation bill. It is clearly general legislation.

Mr. HEYBURN. It has passed this body.

Mr. HALE. That does not make it in order.

Mr. HEYBURN. I understand, but it is an appropriation of land instead of money, and land that the Government holds. We passed the bill here.

Mr. HALE. I know, but that does not make it in order.

The VICE-PRESIDENT. The Chair is of opinion that the amendment is in contravention of the rule, and sustains the point of order. If there be no further amendments as in Committee of the Whole, the bill will be reported to the Senate.

Mr. CLAY. I wish to call the attention of the Senator in charge of the bill to page 222. The provision there, beginning in line 6, reads:

In all, $33,638,000, the same to be available until expended: *Provided*, That all expenditures from the appropriation herein and herein-

after made for the Isthmian Canal shall be paid from, or reimbursed to the Treasury of the United States out of, the proceeds of the sale of bonds authorized in section 8 of the said act approved June 28, 1902, and the amount of bonds authorized by said section is hereby increased to $160,000,000.

Mr. President, if I remember correctly when we provided for the construction of the Isthmian Canal, we provided by law for the issuance of $120,000,000 of bonds. I remember that during the present session of Congress the junior Senator from Illinois [Mr. HOPKINS] introduced a bill providing for the issue of $500,000,000 of additional bonds. That bill was referred to the Committee on Interoceanic Canals and the committee reported back to the Senate that it had no jurisdiction of the subject-matter, and the bill was referred to the Committee on Finance. If the Finance Committee has ever acted in regard to this matter, I am not aware of the fact.

The Committee on Appropriations is not the proper committee to consider the issuance of bonds for the purpose of building the canal. Certainly such legislation ought to come either from the Committee on Interoceanic Canals or the Committee on Finance, and if there has been any action on the part of the Committee on Finance in regard to this matter, as I said, I am not aware of it.

When we provide for the issuance of bonds, the Finance Committee should provide the terms on which the bonds shall be issued. Certainly the Appropriations Committee has not provided for the issuance of thirty millions of bonds additional, believing that the additional $30,000,000 will complete the canal.

Mr. President, we have been told by the chairman of the Committee on Interoceanic Canals that it would take at least $250,000,000 or more bonds to complete the canal. I am sure that the Committee on Appropriations has not considered this matter in any way whatever. We have not discussed how many bonds ought to be issued. We have not had any hearing as to how much additional money will be required to complete the canal.

It is true that when the skilled engineers of the War Department made a critical examination and surveys of the situation there they reported to Congress that $139,000,000 would complete the canal, and the original act provided for $139,000,000.

Now, it has been stated that it will take $500,000,000. Such a statement is a reflection, Mr. President, upon the War Department. We sent the skilled engineers of the War Department to spend two years on the Isthmus to make a careful and critical examination as to the cost of this work.

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Maine?

Mr. CLAY. In one moment. They reported that $139,000,000 would be an ample sum for the purpose of completing the canal. Now, in two years, without any reason for this increased expenditure, we are told that it will take $500,000,000. There ought to be some reason, Mr. President, for this increase. I yield to the Senator from Maine.

Mr. HALE. I am entirely willing that the provision shall be struck out. There is money enough to go on for a while, and the amount provided here is not much more than a flea bite compared with what we shall have to appropriate hereafter. Soon enough for the Senator and for all of us, the Committee on Finance, in consultation with the Committee on Interoceanic Canals, the organs of the Senate, will report a measure that authorizes the new loan. It will not be for the amount given here, but it will be for a larger amount.

We shall find out (and nothing that we can do now will affect that) that in a few years to come we shall be called upon to continue to make appropriations in very large sums for this enormous work. The money will be forthcoming by borrowing, by loans. It is not of any importance in conducting the work whether this item goes into the bill. The subcommittee thought it was well enough to provide for this small increase. It is not very much. But if the Senator is troubled about it, I am entirely willing that it shall go out.

Mr. CLAY. I am not troubled about it. I have been troubled considerably in regard to the proposition that our engineers in the War Department went to the Isthmus and made a critical examination and an extensive report to Congress, and stated in the report that $139,000,000 would be ample for the purpose of completing a lock-dam canal.

Mr. HALE. I will say to the Senator——

Mr. CLAY. If any new conditions have arisen since that time whereby the expenses have been increased, conditions that were not known to the engineers sent by the War Department at that time, Congress has not been informed of the fact. Certainly, Mr. President, it is a very severe criticism upon the engineers of the War Department that they said three or four years ago this work could be completed for $139,000,000 and now we are told that it is to cost $400,000,000 or $500,000,000, without any additional reasons being alleged for the additional expense.

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Maine?

Mr. CLAY. Certainly.

Mr. HALE. I have no doubt everybody who made that guess is ashamed of it.

Mr. WARREN. They were not engineers of the War Department.

Mr. HALE. I say whoever made it.

Mr. CLAY. Part of them were engineers of the War Department.

Mr. HALE. We went into this thing in a blind way and we have stumbled along in a blind way ever since. I think a majority of the Senate were in favor of a sea-level canal, but the influences were such that they were drawn off and committed themselves to the lock-type of canal. We have had a great many examinations by high authorities, and only one thing has been omnipresent, and that is more money. That we meet everywhere. We have met and will meet again the demand for more money. No man, no board, no officer can make a guess on this enormous enterprise that the Government has gone into, but that it will be far exceeded by what will be called for in the future.

Mr. CLAY. Does the Senator say that this provision for $30,000,000 of additional bonds is simply to meet immediate demands?

Mr. HALE. It will last for a little while; that is all.

Mr. WARREN. Will the Senator from Georgia allow me?

Mr. CLAY. Certainly.

Mr. HALE. I am entirely willing that the provision shall go out.

Mr. WARREN. I do not think it ought to go out.

Mr. HALE. I do not think it ought, but it is not essential.

Mr. WARREN. On the 1st day of January we had spent $170,974,468.58; in round numbers, $171,000,000. So we have spent a great deal more money than we are now permitted to bond for. It is true that a part of it was not to be paid from the proceeds of the bonds, but if we are going to bond for any more there is no reason why we should not raise the limit to $160,000,000 now, for we surely will issue several times that amount before we get through. This proposes the same terms, the same interest, the same kind of bonds as were authorized in the original.

Mr. CLAY. Has the Senator any accurate information——

Mr. ALDRICH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Rhode Island?

Mr. CLAY. Certainly.

Mr. ALDRICH. I agree with the Senator from Maine that this proposition, as it now stands in the bill, had better go out. I am quite sure it will not be effective in the sale of the bonds of the class which is enumerated here. We have already issued bonds, as I remember it, to the extent of $84,000,000.

Mr. CLAY. The act provides for the issue of $130,000,000. That is my recollection.

Mr. ALDRICH. That leaves $46,000,000 yet to be issued. I am quite sure that not more than $46,000,000 will be issued between now and the regular meeting of Congress next December; and then probably it will be the duty of Congress to provide for other classes of bonds. I am very certain that $30,000,000 here authorized, in addition, of the class of bonds that are described in section 8, Spooner Act, could not be sold at par at the present time without the banking privilege. Therefore, I think this provision had better go out.

Mr. CLAY. That shows the importance of the Finance Committee taking up the question of issuing bonds to complete the canal.

Mr. ALDRICH. They can not probably sell between now and next December more than $46,000,000 of 2 per cent bonds; so I think there is no particular reason why this provision should stay in the bill.

Mr. CLAY. I agree with the Senator that it ought to go out. I do not think it ought to stay in the bill.

Mr. WARREN. I should like to ask the Senator from Rhode Island what was the lowest figure at which we sold bonds under the act before.

Mr. ALDRICH. We never sold any bonds under the provision of the act as it stands in this bill.

Mr. WARREN. This is a change of the original act?

Mr. ALDRICH. No; the original act was not changed. This provides for the class of bonds which was provided for in section 8 of that act, which were 2 per cent bonds, without the currency privilege. No 2 per cent bonds have ever been sold

at par without the currency privilege, and none could be sold. So that this provision would be inoperative if it should stay in the bill.

Mr. WARREN. Do I understand the Senator to say that the Panama bonds which have already been sold were not sold under the provisions of that act?

Mr. ALDRICH. They were sold under an amended provision of a subsequent date.

Mr. WARREN. This should include the subsequent amendment.

Mr. ALDRICH. It should include the subsequent legislation.

Mr. WARREN. I agree with the Senator as to that.

Mr. TELLER. Mr. President, there is not a man living who knows how many bonds we shall have to sell, and I suppose it will be a proper method of procedure to issue bonds as we need them. That is the way it seems to me. No one, from the President down, can give you any conception of what this canal is going to cost. The estimates of its cost have varied from time to time, as we all know.

Mr. President, to-morrow, if I can get an opportunity to do so, I want to spend about fifteen or twenty minutes on this canal proposition. I want to say a few words about the canal and to make a few predictions regarding it.

Mr. HALE. Now, Mr. President, let us have the bill reported to the Senate.

The VICE-PRESIDENT. The amendment in lines 13, 14, and 15, on page 222, without objection, is disagreed to.

Mr. CARTER. I offer an amendment, to come in at the bottom of page 137.

The VICE-PRESIDENT. The amendment proposed by the Senator from Montana will be stated.

The SECRETARY. At the bottom of page 137 it is proposed to insert:

For the purchase by the Commissioners of the District of Columbia, for park purposes, of the land included between Euclid street, Columbia avenue or Fifteenth street, W street or Florida avenue, and Sixteenth street extended, containing about 437,000 square feet, $550,000; also as an addition to the Rock Creek Park of the several parcels of land designated and marked as "A," "B," "C," and "D" on a map dated February 27, 1906, and called "Addition to Rock Creek Park," and on file in the surveyor's office of the District of Columbia, and embracing about 100 acres, $423,000: *Provided*, That the several pieces of land indicated and marked on said map as land to be dedicated, abandoned, or exchanged by the persons or parties owning, or who shall acquire, the same shall be, and shall be held to be, severally and respectively dedicated, abandoned, or exchanged when and as soon as the purchase money herein specified shall have been paid: *And provided further*, That the aforesaid sums hereby appropriated, or so much thereof as may be expended, shall be payable one-half from the revenues of the District of Columbia and one-half out of any money in the United States Treasury not otherwise appropriated.

Mr. HALE. The committee considered this amendment and rejected it. It is a new project. It is general legislation for the purchase of land. I make the point of order against it.

The VICE-PRESIDENT. The amendment is in contravention of the rule, and the point of order is sustained.

Mr. BAILEY. After the word "necessary," in line 13, on page 161, I move to insert what I send to the desk.

The VICE-PRESIDENT. The amendment proposed by the Senator from Texas will be stated.

The SECRETARY. On page 161, after the word "necessary," in line 13, it is proposed to insert:

For the purchase of 304.26 acres of land adjoining Fort Sam Houston for target range for small arms and drill ground, $70,000.

Mr. HALE. That amendment is of the same character as the previous one, and I make the same point of order against it.

The VICE-PRESIDENT. The amendment is general legislation, and is therefore obnoxious to the rule. The Chair sustains the point of order.

Mr. CARTER. I offer the amendment which I send to the desk, well knowing that the point of order was made against a like amendment presented by the junior Senator from Maine [Mr. FRYE].

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to insert on page 225, after line 5, the following:

For cooperation in the International Austro-Hungarian Exposition of the Chase, to be held in Vienna, Austria, beginning in May, 1910; for the collection, preparation, and transportation of specimens, objects, and materials necessary for said exposition; for salaries and traveling expenses, and for rental of temporary quarters, workshops, and storage rooms in the District of Columbia and elsewhere, the sum of $150,000, to be expended under the direction of the Secretary of State of the United States and to be immediately available.

Mr. CARTER. Mr. President, I understand the committee considered both this proposed amendment and the one presented by the junior Senator from Maine [Mr. FRYE] relating to Brussels. I can but express regret at the Government's failure to respond to the invitations extended by the respective governments of Belgium and Austria-Hungary. I do not intend to press this amendment, believing it is open to the point of order which has heretofore been sustained as to the Brussels amendment. I feel, however, that it is but proper to call the attention of the Senate to the peculiar situation in which the rejection of these two amendments leaves this Government.

On several occasions the Government of Belgium, and likewise the Government of Austria-Hungary, responded in most handsome fashion to invitations extended by authority of Congress to participate in expositions in this country—one at Chicago and the other at St. Louis.

Now that they call upon the Government of the United States to return the compliment, it seems rather unfortunate for us to decline to return that compliment or courtesy.

I will therefore ask unanimous consent that both the Brussels amendment and this amendment be added to the bill, and will say to the acting chairman of the committee that a very great reduction of the amount provided in each case would be acceptable rather than a complete defeat of the amendments. Unless some provision is made to recognize the invitations extended, they will have been entirely ignored. The Committee on Foreign Relations took this view, fully realizing that it was not desirable to make large appropriations at this time for any purpose; but common courtesy, it seems to me, requires that we shall give some reasonable recognition to the invitations of these two Governments so extended. I do not insist upon any particular amount, nor do I believe that either amendment is not subject to the point of order. I therefore ask unanimous consent of the Senate that these two amendments be accepted, and at the same time to announce to the acting chairman in charge of the bill that any amount appropriated which furnishes recognition of the invitation extended to this Government will be satisfactory.

Mr. HALE. Mr. President, we have a Committee on Expositions, which has been in session nearly two years—that is, since this Congress met—and all these subjects ought to be taken into consideration by that committee, which can give time to investigate participation in these outside foreign performances; but they ought not to be brought into the Senate within forty-eight hours of the close of the session for us to consider. So I am constrained to object to the request of the Senator from Montana and to make the point of order against the amendment.

The VICE-PRESIDENT. The point of order is sustained against the amendment, on the ground that it is general legislation.

Mr. CARTER. Mr. President, I seem to be very unfortunate; but I am not alone in having amendments rejected on points of order and otherwise, so I will ask a question.

Sometime ago I undertook to ascertain the cost of keeping government prisoners at the military prisons. I find on page 163 of this bill a provision appropriating a large sum of money for the extension of the military prison at Fort Leavenworth. I was astonished to find that there never had been a report made with reference to the disbursements or the management or the cost of maintenance of that prison, and I desire to ask the chairman of the Committee on Military Affairs [Mr. WARREN] what kind of government is provided by Congress for the military prison at Fort Leavenworth, and why it is that there is no report of the disbursements from that institution, which was established in 1873 or 1874?

Mr. WARREN. Mr. President, as to the earlier history of that prison I would not be able to give the Senator the information for which he asks. As I understand, it was a small concern originally, but it is now, or lately has been, receiving large additions, and is about to become a very large and important prison. The board of management, I think, is now comprised, or has been heretofore, of only three general officers. I would like to ask the Senator from Montana what his amendment proposes?

Mr. CARTER. In view of the fact that no one has ever reported anything with reference to the prison, I have an amendment which I shall offer which I think will secure reports hereafter.

Mr. WARREN. I should like to hear the amendment read.

Mr. CARTER. The amendment proposes to have the Board of Commissioners of the Soldiers' Home, which seem to make very elaborate and intelligent reports on matters committed to their care, take charge of this prison management. The amendment is self-explanatory.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 163, after the word "dollars," in line 21, it is proposed to insert the following:

Provided, That hereafter the government and control of the United States military prison shall, under the Secretary of War, be vested in the Board of Commissioners of the United States Soldiers' Home, which board shall consist, as at present, of the Surgeon-General, the Commissary-General, The Adjutant-General, the Quartermaster-General, the Chief of Engineers, the Judge-Advocate-General, and the governor of the home, and the president of said board, who shall be the senior in rank of the members thereof, shall submit annually to the Secretary of War,

for transmission to Congress, a full statement of the financial and other affairs of both the home and the prison for the preceding fiscal year.

Mr. WARREN. Mr. President, I observe that the amendment will not change the chairmanship of the board, but that it adds more general officers from the supply department. I see no objection to it myself.

Mr. CARTER. It adds to the board without increasing the expense. It will probably result in efficient management.

Mr. HALE. Mr. President, if the Senate is in favor of the amendment, I will accept it.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

HOUR OF MEETING.

Mr. HALE. I move that when the Senate adjourns to-day it adjourn to meet at 10 o'clock to-morrow morning.

The motion was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had passed the following bill and joint resolution, in which it requested the concurrence of the Senate:

H. R. 27926. An act to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River, in the State of Indiana; and

H. J. Res. 263. Joint resolution to provide for the distribution by Members of the Sixtieth Congress of documents, reports, and other publications.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice-President:

H. R. 5728. An act for the relief of James H. De Coster;

H. R. 23717. An act to extend the time for construction and beginning construction of the Alaska Short Line Railroad in Alaska;

H. R. 27061. An act to provide for the appointment of one additional district judge in and for the western district of Washington, and one additional district judge in and for the district of Oregon;

H. R. 28046. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors; and

H. J. Res. 265. Joint resolution to rearrange and reconstruct the Hall of the House of Representatives, and for other purposes.

TERMS OF COURT AT SPRINGFIELD, MASS.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 6074) to provide for holding terms of the United States circuit and district courts at Springfield, Mass., which were, in line 4, to strike out "terms" and insert "sessions;" line 7, to strike out "third" and insert "second;" in line 8, to strike out all after "of" down to and including "of" in line 9, and insert "December;" and after line 13 to insert:

SEC. 3. That suitable rooms and accommodations shall be furnished for holding said courts free of expense to the Government of the United States until such time as a federal building shall be prepared for that purpose in said Springfield.

Also, to amend the title so as to read: "An act to provide for holding sessions of the United States circuit and district courts at Springfield, Mass."

Mr. LODGE. I move that the Senate concur in the amendments of the House of Representatives.

The motion was agreed to.

CHICAGO, LAKE SHORE AND EASTERN RAILROAD COMPANY.

The bill (H. R. 27926) to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River, in the State of Indiana, was read twice by its title.

Mr. HEMENWAY. I ask unanimous consent for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DISTRIBUTION OF GOVERNMENT PUBLICATIONS.

The joint resolution (H. J. Res. 263) to provide for the distribution by Members of the Sixtieth Congress of documents, reports, and other publications, was read twice by its title, and referred to the Committee on Printing.

Mr. KEAN subsequently said: The Senator from West Virginia [Mr. ELKINS], who is a member of the Committee on Printing, was very anxious that House joint resolution No. 263 should be reported back from that committee, and he requested me to report it for him. I, therefore, on behalf of the Senator from West Virginia, report the joint resolution from the Committee on Printing.

Mr. STONE. I ask unanimous consent for the present consideration of the joint resolution.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution (H. J. Res. 263) to provide for the distribution by Members of the Sixtieth Congress of documents, reports, and other publications. It provides that all documents and books ordered to be published by the Sixtieth Congress which are actually printed prior to the first Monday in December next, to which Members of that Congress not Members of the Sixty-first Congress would have been entitled if published prior to the 4th day of March, shall be allotted such Members, and the term allowed to distribute the same shall be extended to the first Monday of December next.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JUDGES FOR HAWAII, ALASKA, ETC.

The VICE-PRESIDENT laid before the Senate the following concurrent resolution of the House of Representatives, which was considered by unanimous consent and agreed to:

House concurrent resolution 75.

Resolved by the House of Representatives (the Senate concurring), That the President be requested to return to the House of Representatives H. R. 21896, Sixtieth Congress, "An act to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes."

NATIONAL FORESTS.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 4825) for acquiring national forests in the Southern Appalachian Mountains and White Mountains, which was to strike out all after the enacting clause and to insert in lieu thereof a substitute.

Mr. BRANDEGEE. I move that the Senate disagree to the amendment of the House of Representatives, ask for a conference with the House on the disagreeing votes of the two Houses, and that the Chair appoint the conferees on the part of the Senate.

Mr. HEYBURN. Mr. President, I object to the appointment of conferees on the bill.

The VICE-PRESIDENT. The Chair will put the question. The Senator from Connecticut [Mr. BRANDEGEE] moves that the Senate disagree to the amendment of the House of Representatives, ask for a conference on the disagreeing votes of the two Houses thereon, the conferees on the part of the Senate to be appointed by the Chair.

Mr. HEYBURN. I object to the appointment of conferees.

Mr. TELLER. That is a bill that ought to come before the Senate in proper shape, and have some amendments made to it. I object to any conference on this bill in its present condition. Besides, Mr. President, there is not a quorum of the Senate present at this time. I therefore move that the Senate adjourn.

The motion was agreed to, and (at 6 o'clock and 50 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, March 2, 1909, at 10 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate March 1, 1909.

COLLECTOR OF INTERNAL REVENUE.

Claude I. Parker, of California, to be collector of internal revenue for the sixth district of California. A new office created by presidential order dated February 16, 1909.

UNITED STATES ATTORNEY FOR HAWAII.

A. L. C. Atkinson, of Hawaii, to be United States attorney for the Territory of Hawaii, vice Robert W. Breckons, resigned.

CONSUL-GENERAL.

William W. Handley, of New York, lately consul of class 7 at Trinidad, to be consul-general of the United States of class 5 at Boma, to which office he was promoted during the last recess of the Senate, vice James A. Smith, transferred and appointed to be consul-general of class 5 at Genoa.

COMMISSIONER OF IMMIGRATION.

Robert Watchorn, of New York, to be commissioner of immigration at the port of New York, N. Y., in the Department of Commerce and Labor, to take effect on February 11, 1909. (Reappointment.)

MEMBER OF THE PHILIPPINE COMMISSION.

Frank A. Branagan, of Ohio, to be a member of the Philippine Commission, to be effective March 1, 1909, vice W. Morgan Shuster, whose resignation has been accepted to take effect on that date.

ASSOCIATE JUSTICES SUPREME COURT OF NEW MEXICO.

Edward A. Mann, of New Mexico, to be associate justice of the supreme court of the Territory of New Mexico. A reappointment, his term having expired on December 12, 1908.

Ira A. Abbott, of New Mexico, to be associate justice of the supreme court of the Territory of New Mexico. A reappointment, his term having expired January 9, 1909.

PROMOTIONS IN THE NAVY.

TO BE CAPTAINS FROM DATES OPPOSITE THEIR NAMES.

Templin M. Potts, July 11, 1908;
Burns T. Walling, July 19, 1908;
Clifford J. Boush, July 20, 1908;
James H. Sears, August 1, 1908;
Abraham E. Culver, September 3, 1908;
Henry T. Mayo, September 7, 1908;
Charles C. Rogers, October 25, 1908;
John T. Newton, October 30, 1908;
Benjamin Tappan, October 30, 1908;
Charles F. Pond, November 12, 1908;
Walter McLean, December 15, 1908;
Washington I. Chambers, December 17, 1908;
James C. Gillmore, December 23, 1908; and
Charles A. Gove, January 7, 1909.

APPOINTMENT IN THE ARMY.

COAST ARTILLERY CORPS.

Engineer Guy Brandon Lawrason, Coast Artillery Corps, to be second lieutenant, with rank from February 26, 1909.

PROMOTIONS IN THE ARMY.

MEDICAL CORPS.

Lieut. Col. Louis Brechemin, Medical Corps, to be colonel from February 26, 1909, vice Adair, retired from active service.

Maj. Henry S. T. Harris, Medical Corps, to be lieutenant-colonel from February 26, 1909, vice Brechemin, promoted.

CAVALRY ARM.

Maj. Hoel S. Bishop, Fourteenth Cavalry, to be lieutenant-colonel from February 26, 1909, vice Hardie, Fifteenth Cavalry, retired from active service.

Capt. William S. Scott, Tenth Cavalry, to be major from February 26, 1909, vice Bishop, Fourteenth Cavalry, promoted.

First Lieut. Henry W. Parker, Second Cavalry, to be captain from February 26, 1909, vice Scott, Tenth Cavalry, promoted.

COAST ARTILLERY CORPS.

First Lieut. Henry H. Scott, Coast Artillery Corps, to be captain from February 25, 1909, vice Tobin, detailed as quartermaster.

Second Lieut. Louis L. Pendleton, Coast Artillery Corps, to be first lieutenant from February 25, 1909, vice Scott, promoted.

INFANTRY ARM.

Second Lieut. Donald D. Hay, Twenty-fifth Infantry, to be first lieutenant from October 31, 1908, vice Parker, Twenty-sixth Infantry, promoted.

Second Lieut. Philip G. Wrightson, Twentieth Infantry, to be first lieutenant from November 21, 1908, vice Herring, Sixteenth Infantry, retired from active service.

Second Lieut. George W. Ewell, Third Infantry, to be first lieutenant from November 21, 1908, vice Smith, Third Infantry, promoted.

Second Lieut. Claire R. Bennett, Eighth Infantry, to be first lieutenant from November 25, 1908, vice Spiller, Twenty-sixth Infantry, retired from active service.

Second Lieut. Bowers Davis, Sixth Infantry, to be first lieutenant from November 25, 1908, vice Sanford, Twenty-fourth Infantry, promoted.

APPOINTMENTS, BY TRANSFER, IN THE ARMY.

SIGNAL CORPS.

Capt. Arthur S. Cowan, Eighteenth Infantry, to the Signal Corps, with rank from March 7, 1907.

INFANTRY ARM.

Capt. Henry S. Hathaway, Signal Corps, to the Infantry Arm, with rank from March 7, 1907.

POSTMASTERS.

INDIANA.

John C. Jenkins to be postmaster at Fortville, Ind. Office became presidential January 1, 1908.

John H. Kimble to be postmaster at Brookville, Ind., in place of George E. Mullin. Incumbent's commission expired February 20, 1909.

MISSOURI.

A. H. Doermann to be postmaster at Eldorado Springs, Mo., in place of Edgar W. Prentiss. Incumbent's commission expired December 16, 1908.

B. P. Sigler to be postmaster at Bethany, Mo., in place of William R. Lewis. Incumbent's commission expired December 13, 1908.

NEW YORK.

Perrin C. Bailey to be postmaster at Wilson, N. Y., in place of Elmer A. Johnson. Incumbent's commission expired December 13, 1908.

NORTH DAKOTA.

Frank E. Heath to be postmaster at Beach, N. Dak. Office became presidential July 1, 1908.

CONFIRMATIONS.

Nominations confirmed by the Senate March 1, 1909.

CONSUL.

Edward L. Adams, of New York, to be consul of class 5 at Dublin, Ireland.

SECOND SECRETARY OF EMBASSY.

Thomas Ewing Dabney, of Louisiana, to be second secretary of the embassy at Mexico, Mexico.

THIRD SECRETARY OF EMBASSY.

Gustave Scholle, of Minnesota, to be third secretary of the embassy of the United States at Berlin, Germany.

SECRETARY OF LEGATION.

W. Bayard Cutting, jr., of New York, to be secretary of the legation of the United States at Tangier, Morocco.

COMMISSIONERS-GENERAL TO TOKYO EXPOSITION.

Francis B. Loomis to be a commissioner-general of the United States to the national exposition to be held at Tokyo.

Francis D. Millet to be a commissioner-general of the United States to the national exposition to be held at Tokyo.

Frederick J. V. Skiff to be a commissioner-general of the United States to the national exposition to be held at Tokyo.

UNITED STATES DISTRICT JUDGE.

John E. Sater to be district judge for the southern district of Ohio.

PHILIPPINE COMMISSIONER.

Frank A. Branagan member of the Philippine Commission.

ASSISTANT TREASURER OF THE UNITED STATES.

George S. Terry to be assistant treasurer of the United States.

POSTMASTERS.

CONNECTICUT.

William A. Smith, at Hazardville, Conn.

GEORGIA.

William C. Cole, at Lawrenceville, Ga.

IOWA.

William M. Boylan, at Hubbard, Iowa.

KANSAS.

Edwin J. Bookwalter, at Halstead, Kans.

KENTUCKY.

George W. Hutcheson, at Lawrenceburg, Ky.

LOUISIANA.

Bettie E. Glover, at Arcadia, La.

MAINE.

Clarence L. Ridlon, at West Paris, Me.

MICHIGAN.

William C. Metz, at St. Charles, Mich.

MINNESOTA.

Stephen E. Fay, at Raymond, Minn.
Jesse A. Maxwell, at Fulda, Minn.
Charles M. Nelson, at Elbow Lake, Minn.

MISSISSIPPI.

William J. Brigham, at Tunica, Miss.
Felicie L. Delmas, at Scranton, Miss.
Jennie D. Ligon, at Gloster, Miss.
L. Hilton Tubb, at Amory, Miss.

NEBRASKA.

Frank C. Evans, at Wisner, Nebr.
Albert C. McFarland, at Lynch, Nebr.

NEW YORK.

Thomas B. Lowerre, at Flushing, N. Y.

NORTH CAROLINA.

Charles M. Hoover, at Thomasville, N. C.
Jasper Z. Waller, at Burlington, N. C.

NORTH DAKOTA.

Thomas B. Hurley, at Bowbells, N. Dak.
Albert E. Hurst, at Rolette, N. Dak.
Elstow McKoane, at Ambrose, N. Dak.
John K. Soule, at Cogswell, N. Dak.

OHIO.

James H. Muir, at Pemberville, Ohio.
John K. Niesz, at Maumee, Ohio.

OKLAHOMA.

George W. Mellish, at Comanche, Okla.

PENNSYLVANIA.

Clarence L. Dindinger, at Zelienople, Pa.
John W. Zerbe, at Shamokin, Pa.

SOUTH DAKOTA.

Arthur B. Chubbuck, at Ipswich, S. Dak.
Orator H. La Craft, at Clark, S. Dak.

TEXAS.

Emily H. Ellis, at Toyah, Tex.
Hugh E. Exum, at Shamrock, Tex.
William B. Kirby, at Wellington, Tex.
John C. McBride, at Woodville, Tex.
H. W. Mullis, at McLean, Tex.
Lafayette Sharp, at San Augustine, Tex.
Jasper C. Williamson, at Kirbyville, Tex.

UTAH.

Clifford I. Goff, at West Jordan, Utah.

VERMONT.

Alma H. Ayer, at Richford, Vt.

WISCONSIN.

William W. Clarke, at Milton, Wis.
Thomas Gander, at Soldiers Grove, Wis.
Martin J. Gosa, at Palmyra, Wis.
Fred P. Harmon, at Belleville, Wis.

HOUSE OF REPRESENTATIVES.

MONDAY, *March 1, 1909.*

[*Continuation of legislative day of Tuesday, February 23, 1909.*]

The recess having expired, the House was called to order at 11 o'clock a. m. by the Speaker.

SPEECH OF HON. GEORGE W. COOK.

Mr. MANN. Mr. Speaker, I rise to present a privileged report.

The SPEAKER. The gentleman from Illinois, from the select committee appointed under House resolution 604, presents a privileged report (H. Rept. No. 2289), which the Clerk will read:

The Clerk read as follows:

The select committee appointed to consider the remarks of Hon. GEORGE W. COOK, delivered in the House on February 25 last and printed in the CONGRESSIONAL RECORD, on pages 3203 and 3204, and alleged to be in violation of the privileges of debate, beg leave to report that we have carefully and critically examined the speech of Mr. COOK referred to, and are of the opinion, and so report, that said speech does not, when treated as a whole, contain language in violation of the privileges of debate, and does not call for further action by the House; and your committee, therefore, respectfully requests to be discharged.

JAMES R. MANN.
JAMES B. PERKINS.
DAVID J. FOSTER.
HENRY D. CLAYTON.
WILLIAM M. HOWARD.

Mr. MANN. I move that the committee be discharged.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

SENATE BILLS ON THE PRIVATE CALENDAR.

Mr. MANN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the order which I send to the Clerk's desk.

The Clerk read as follows:

Ordered, That during the remainder of this calendar day it shall be in order in the House as in Committee of the Whole House to consider Senate bills on the Private Calendar to the consideration of which objection is not made by two Members.

Mr. FITZGERALD. Why two? It used to be three.

The SPEAKER. Is there objection?

There was no objection.

BRIDGE ACROSS CALUMET RIVER, INDIANA.

Mr. CRUMPACKER. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 27926) to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River, in the State of Indiana.

The Clerk read as follows:

Be it enacted, etc., That the Chicago, Lake Shore and Eastern Railway Company, a corporation organized under the laws of the States of Indiana and Illinois, its successors and assigns, be, and they are hereby, authorized to construct, maintain, and operate a railroad bridge, and approaches thereto, across the Calumet River in the northwest quarter of section 4, township 36 north, range 8 west of the second principal meridian, in Lake County, in the State of Indiana, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 3, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendment:

On line 2, page 2, strike out "third" and insert "twenty-third."

The SPEAKER. Is there objection?

There was no objection.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time; and was accordingly read the third time and passed.

UNITED STATES COURTS, SPRINGFIELD, MASS.

Mr. STERLING. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 6074) to provide for holding terms of the United States circuit and district courts at Springfield, Mass.

The bill was read, as follows:

Be it enacted, etc., That hereafter, and until otherwise provided by law, two terms of the district and circuit courts of the United States for the district of Massachusetts shall be held in each and every year in the city of Springfield, Mass., beginning, respectively, on the third Tuesday of May and the second Tuesday of November, to continue until the business is disposed of.

SEC. 2. That the marshal and clerk of said district shall each, respectively, appoint at least one deputy, to reside in said city of Springfield, and he shall also maintain an office at that place.

With the following amendments:

In line 4 strike out the word "terms" and insert the word "sessions."

Line 7, strike out the word "third" and insert the word "second."

Line 8, strike out the words "November, to continue until the business is disposed of" and insert the word "December."

Amend the title by striking out the word "terms" and inserting the word "sessions."

Add section 3:

"SEC. 3. That suitable rooms and accommodations shall be furnished for holding said courts, free of expense to the Government of the United States, until such time as a federal building shall be prepared for that purpose in said Springfield."

The SPEAKER. Is there objection?

There was no objection.

Mr. TIRRELL. Mr. Speaker——

Mr. STERLING. The gentleman from Massachusetts [Mr. TIRRELL] desires to say a word in reference to this bill.

The SPEAKER. Does the gentleman yield to the gentleman from Massachusetts?

Mr. STERLING. I do.

Mr. TIRRELL. Mr. Speaker, it seems somewhat ungracious to oppose this bill establishing terms of the circuit and district courts in Springfield, Mass. I do not wish to raise any captious opposition. I deem it my duty, however, to present some of the facts as they have been gleaned and presented to us by the judges of the circuit and districts courts of Massachusetts.

These courts were established in Massachusetts, to be held in the city of Boston in 1789, and have always held their sessions there.

For more than forty years after the establishment of those courts there were no railroads in Massachusetts. It took three days by stage coach to go from Boston to Springfield, where it is now proposed to establish terms of these courts.

The distance between Boston and Springfield is 98 miles. There are now express trains running hourly between those cities, so that you can pass from one to the other in less than three hours.

I have been an active practitioner of the bar for many years in eastern Massachusetts, and so far as I know there has never been any call for the establishment of terms of these courts in the western part of Massachusetts.

Massachusetts is a small State territorially. Many districts represented by Members here are larger geographically than the whole State of Massachusetts. It is only about 150 miles long, and over the greater portion of its length only about 50 miles wide.

There are three main lines of railroad that run through Massachusetts—the Fitchburg line through the northern part of the State, another line through the center, and the Boston and Albany system, which runs through the southern section of the State and Springfield. The three lines of communication have rendered it unnecessary heretofore, in the opinion of the people resident in that section and the lawyers in practice, to have any terms of this court in the western part of our Commonwealth.

The whole section covered by these two courts, if they are established by this bill, would be about one-seventh of this small State, and the amount of business possible to be considered much less than one-seventh. The judges of the courts in Massachusetts are high-minded, conscientious men, ready to perform their duty wherever and whenever called upon; they have not interfered in this matter, but simply have answered questions propounded to them to elicit the facts. They have furnished the facts, and I desire to call attention to them.

Take the circuit court. About a year ago an examination of the docket was made. The following condition was disclosed: There were 450 cases pending in equity, but only 37 of them were where one or the other of the parties resided in the territory covered by this bill. Two-thirds of these cases were conducted by lawyers who did not come from that section of the State. Therefore in the equity cases, gentlemen, there were only 2 per cent of all the cases pending that came from the territory that would be subserved if this bill was passed.

Now take up the cases on the law side of the court. There were pending 432 cases a year ago. Only 9 of these had one or both of the parties resident in the territory covered by this bill. Out of these 9 cases there is only 1 case where the attorneys were from Hampden County, where Springfield is located. In 5 cases the attorneys on both sides were from the city of Boston, leaving 1 case out of the 432 upon the law side of the circuit court of the district of Massachusetts where the parties were interested from that section of the State.

In the district court the docket showed in January of this year that there were 83 civil cases; 61 of these were in admiralty. There is not a single admiralty case that comes from the western section of the State. That leaves only 22 civil cases. In 20 of these the parties and counsel reside east of the city of Springfield, leaving only 2 cases remaining which come from the western part of Massachusetts.

Therefore you have this condition of things, that although there is apparently a large population in the western part of Massachusetts, there is very little business there for the United States courts. The business of the United States courts is east of the city of Springfield. There is no admiralty business in the western part of the State, and on the law side of the court only 1 case out of 422 pending where the parties interested reside in Hampden County, in which the city of Springfield is located.

Mr. STEPHENS of Texas. Will the gentleman yield?

Mr. TIRRELL. Certainly.

Mr. STEPHENS of Texas. Why are not the suits brought where the parties reside and the cause of action arises?

Mr. TIRRELL. The causes of action did arise there——

Mr. STEPHENS of Texas. How did they get jurisdiction in a part of the State where the cause of action did not arise or where the parties were not residents?

Mr. TIRRELL. The district now covers the entire State; the terms of court are held in Boston and all cases are tried there, but this bill proposes to establish two terms of the circuit and district court in the western section. I am trying to show that there is not sufficient business in the western part to justify the establishment of these terms of court in Springfield.

Mr. STEPHENS of Texas. Has the gentleman any statement by the judges of the amount of business?

Mr. TIRRELL. These are statements by the judges, who are opposed to the establishment of terms at Springfield, at present, not because they are unwilling to go that short distance to transact business, but because there is no call for it, in their judgment, commensurate with the expense and inconvenience which would be incurred.

Mr. STEPHENS of Texas. The gentleman thinks that the attorneys and litigants would not be convenienced, but is the gentleman aware that the Government has to pay the witnesses for traveling these distances?

Mr. TIRRELL. That does not apply in this case, which is based on the condition that there is insufficient business for those terms which would increase and not decrease expenses.

Mr. GRONNA. Mr. Speaker, this is not establishing a new district?

Mr. TIRRELL. No; but two terms of court for both the circuit and district courts.

Mr. GRONNA. I think there should be no objection to that.

Mr. TIRRELL. I am endeavoring to show that the amount of business is inadequate to justify this action.

Mr. GRONNA. As I understand it, this simply establishes the court in that particular city, in order to make it more convenient.

Mr. TIRRELL. Yes; that is it; that is the idea. Now, I want to show further what the state of things is in the district court. An examination was made on January 20, and at that time there were 1,870 bankruptcy cases pending. Since 1905 down to the present time there have been only 9 cases from the western section of Massachusetts covered by this bill, where there has been a hearing before the courts. That is, there is an average of less than four cases a year which have come up for hearing before the court from that part of the State. Therefore it seems to be entirely disproportionate to the expense that will be incurred and to the inconvenience to which the judges will be subjected to have a session of the court held there, when in bankruptcy cases, about the only character of case that could come up in that section of Massachusetts, there is an average of less than four a year.

Mr. STEPHENS of Texas. Is it not true that the judges could get paid for traveling expenses?

Mr. TIRRELL. Oh, that has nothing to do with it. They do not care anything about that.

Mr. STEPHENS of Texas. I think they ought to submit to some inconvenience in order to carry the courts to the people.

Mr. TIRRELL. It is not in the inconvenience of the judges alone. It is the expense of maintaining offices, clerks, and marshals, and so forth, and the loss of time to which the court would be subjected in going and coming, in opening courts, perhaps for a day or two, and then adjourning them without sufficient business to occupy the time of the court, which would be an inconvenience, take it as a whole, to the public business. Therefore, Mr. Speaker, solely for the reason that it has not been shown that there is any necessity for the establishment of these terms of court, that there is not sufficient business to justify it, that it would be an inconvenience and expense and a loss of time—in other words, because a proper case has not been made out, and because there has been no approval of this legislation, so far as I can learn, by the law department of the Government—I claim that this bill ought not to pass.

It is not a sufficient answer to the facts which I have presented to say that there is a large population in the western part of Massachusetts, unless with that you can couple and can prove that there is a sufficient business connected with that population to justify it also. While there is a population of three or four hundred thousand in the western part of Massachusetts, there is only a portion, in my judgment, of this population that would ever utilize these courts if they were established in the city of Springfield, because with these other lines of railroad paralleling the Boston and Albany, which runs through the city of Springfield, the people from other sections of this proposed district could go direct to Boston, because it would be more convenient for them to go there, although a little farther. So that in reality the statistics which I have given should really be cut down even more because very much of the business of this territory, as I have stated, would go to Boston, as it goes to-day. Boston being more convenient of access, they would go there. The question is right here: Are we justified with these facts in establishing terms of court in Springfield when there has not been during all the years of the establishment of this court sufficient business to justify any man who will look upon the matter with any economy in his system in advocating it? When western Massachusetts can show that there is a business which will justify the establishment of these terms of court even approximately, with the probability of an increase of business, then as a citizen of Massachusetts, representing its interest in part, I would gladly join in advocating such a measure, but I can not conscientiously on the proposition which is here submitted, where so little business is shown and where the judges of the court are unanimous in their opposition, lend my influence to pass this legislation. The only argument that can be advanced, it seems to me, in favor of this proposition is that if you have these terms of court established this business will increase.

That is no argument whatever, because the Congress of the United States is not establishing courts for the purpose of increasing litigation, of getting people to fight among themselves; but it is endeavoring to pacify and prevent litigation as far as possible. Yet the argument for the establishment of these terms of court is that while there is no business there now which would justify it, if they are established then business will start up and it will bring business into these courts. I can not agree to that proposition.

With these facts, Mr. Speaker, I submit this matter to the consideration of other Members of this body.

Mr. GILLETT. Mr. Speaker, I want to acknowledge the courtesy of my colleague [Mr. TIRRELL], a member of the committee, in connection with this bill. I appreciate that it is quite natural and proper that he, practicing in Boston, where the courts are now held, and practicing before the judges who object to this bill, should bring before the House the views of the judges on the question.

Springfield, where this bill purposes to have sessions of the court, is 100 miles from Boston and is a city of about 80,000 people. Still farther west, running to the New York border, is an entire congressional district, with a population of over 200,000; and north and east of Springfield, connected by trolley and largely tributary to it, is a further population of over 100,000, so there are about 400,000 people to whom Springfield is much more accessible than Boston and who would be convenienced by having sessions of the court there, and the Government would make a large saving in the expenses of witnesses and jurors.

The question just when a region is populous enough and has business enough to justify the establishment of a court can not be determined by any recognized standards, and is largely a matter of judgment. The Judiciary Committee has decided that Springfield presents such a case. The business being done in the United States court from the western part of the State is not a fair criterion of what would be done if there was a court there, because many cases which would be tried are doubtless abandoned because of the expense of the Boston trip, and most of the cases which can be brought in either the state or the United States court are now brought exclusively in the state court, because the counsel in the cases, by taking them to the United States court, would have to go to Boston, and that means generally—unless the case is a very lucrative one—that they would transfer the case to a Boston lawyer rather than leave their office and take the time to go there themselves; and therefore it is to the selfish interest of western Massachusetts lawyers to bring all their cases in the state court.

A comparison with the places where courts are held in other States will show, I think, conclusively that it would be very unfair to defeat this bill. Massachusetts has about the same population as all the other New England States combined, and excepting Maine it does not average much less in size.

Maine, with a population a third as large as Massachusetts, has terms of the United States court in three different places. New Hampshire, with a population an eighth of that of Massachusetts, has terms of court in two places. Rhode Island, with a population an eighth, has court in two places. Connecticut, with a population a third of Massachusetts, has court in two places. Vermont, with a population an eighth of Massachusetts, has court in four different places, and only the Congress before last a bill was passed giving to Vermont, which then had court in three places, the privilege of having terms in an additional city.

The population of western Massachusetts is larger than the population of any of these States except Maine and Connecticut, and all these New England States, despite their inferiority in population, have been granted more ample court privileges that Massachusetts. So, according to those precedents, western Massachusetts alone ought to have court in two places.

I think we have been very modest in our request, and if this bill passes we shall be able to determine by experience what the natural business of our section of the State is, and if it proves to be as large as members of the bar expect, we shall in the future feel justified in asking for still further accommodations.

This bill was prepared so as to meet as far as possible the objections of the judges, and to put to the test the question whether it would not be for the advantage of the United States Government and to the 400,000 people in western Massachusetts to have sessions of the United States courts in Springfield.

The SPEAKER. The question is on the amendments.

The question was taken, and the amendments were agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

The title was amended.

COMMITTEE ON WAYS AND MEANS.

Mr. PAYNE. Mr. Speaker, I offer the following resolution and ask unanimous consent for its immediate consideration.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 605.

Resolved, That those members of the Committee on Ways and Means who are Members-elect of the Sixty-first Congress, or a majority of them, are authorized, until the meeting of the first session of the Sixty-first Congress, to gather, through government agents or otherwise, such information as to them may seem fit for the completion of the bill for the revision of the tariff. And they are authorized to have such printing and binding done as they shall require, to employ an additional stenographer, and to incur such other expenses as may be deemed necessary by them; and all the expenses thereof shall be paid out of the contingent fund of the House on the usual vouchers approved by the present chairman of said committee.

The SPEAKER. Is there objection?

Mr. BARTLETT of Georgia. Mr. Speaker, I want to ask the gentleman in reference to this resolution. I do not desire to object to it. Does the gentleman propose to have additional clerical assistance to what was provided for by the emergency bill?

Mr. PAYNE. It is only to continue the present force until the special session is called on the 15th of March.

Mr. BARTLETT of Georgia. I understand it; but what I desire to inquire about is, here is a provision in the resolution to pay out of the contingent fund of the House for certain expenses. I have no objection to that, but——

Mr. PAYNE. I want to say to the gentleman that is all provided for up to this date and up to the 4th of March. Now we wish to continue the force until the 15th, and that is all there is in the resolution. It is only to continue the present order of things which the House ordered at the last session.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The question was taken, and the resolution was agreed to.

ALASKA SHORT LINE RAILROAD IN ALASKA.

The SPEAKER. The Chair lays before the House from the Speaker's table the following bill with a Senate amendment, which the Clerk will report.

The Clerk read as follows:

H. R. 23717. An act to extend the time for construction and beginning the construction of the Alaska Short Line Railroad in Alaska.

The Senate amendment was read.

Mr. HUMPHREY of Washington. Mr. Speaker, I move that the House agree to the Senate amendment.

The Senate amendment was agreed to.

TREATY BETWEEN UNITED STATES AND RUSSIA.

Mr. CAPRON. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 235, reported from the Committee on Foreign Affairs.

The SPEAKER. The gentleman from Rhode Island asks unanimous consent for the present consideration of the joint resolution which the Clerk will report.

The Clerk read as follows:

Joint resolution (H. J. Res. 235) concerning and relating to the treaty between the United States and Russia.

The SPEAKER. The Chair understands the gentleman desires the resolution to be read as amended and reported from the Committee on Foreign Affairs. Without objection, it will be read as amended.

There was no objection.

The Clerk read as follows:

Whereas it is alleged that the Government of Russia has continued up to the present time to refuse to visé, recognize, or honor passports presented to its authorities issued by the American Government to American citizens on the ground that the holders thereof were of the Jewish faith: Therefore be it

Resolved, etc., That the President of the United States be, and is hereby, requested to renew negotiations with the Government of Russia to secure, by treaty or otherwise, uniformity of treatment and protection to American citizens holding passports duly issued by the authorities of the United States, in order that all American citizens shall have equal freedom of travel and sojourn in such country without regard to race, creed, or religious faith, including a provision that the honoring or viséing of passports when duly issued and held by citizens of the United States shall not be withheld because or on account of the race, creed, or religious faith of their holders.

Mr. CAPRON. Mr. Speaker, I do not desire to delay the House on this matter, but I yield two minutes to the gentleman from New York [Mr. GOLDFOGLE].

Mr. GOLDFOGLE. Mr. Speaker, this resolution deeply concerns the honor and dignity of American citizenship and the respect due the American passport. The subject involved has been several times, in various forms, brought to the attention of Congress. It has been pressed on the attention of the State Department. It has been presented to the President of the

United States. Yet the evil complained of has not been remedied. Russia still violates her treaty obligations, and has persistently refused to honor the American passport held by our citizens of Jewish faith.

It is a deplorable fact that when a citizen of that faith presents for visé our passport to the Russian authorities it is discredited and dishonored. In the eyes of the Russian monarch it is a valueless document. It is to the Russian official a mere worthless paper. Though this condition has existed ever since our first treaty with Russia, our protests have gone unheeded, and America has suffered the humiliation which Russia has seen fit to place upon us when she refuses recognition to the passport of our citizen who bears it.

Let it be understood clearly that this bigoted restriction placed upon the entry into Russia of Israelites applies equally to native and naturalized citizens of this country. The refusal to recognize our passport when borne by a Jewish-American citizen is based on the fact that he is a Jew. That fact alone, however reputable he may be, makes him odious in the eyes of the Russian, and forthwith the passport bearing our seal of state counts for nothing. Such a situation, sir, is, I submit, intolerable. It calls not for mere finespun, polite diplomatic phrases, but for plain, outspoken diplomacy, which shall leave no doubt on Russia's mind that we shall permit her no longer insolently to disregard our passports. She must be given to understand that America will not suffer her citizens to be discriminated against by any foreign government merely on the ground of creed or religious faith.

While, in common with many of my colleagues here, I would have welcomed a more drastic form of resolution, yet I feel that this expression of the Congress of the country, speaking for over 85,000,000 people, will be productive of decided action by the incoming administration and convince Russia that the American people, true to the principles of our liberal and enlightened institutions, will not much longer suffer Russia to arrogantly dishonor the highest certificate that issues to our citizens to accredit them abroad and bestow on them when traveling in foreign lands the fullest protection of the American flag. [Applause.]

In 1902 I introduced a resolution of inquiry which brought this subject clearly before the American Congress. I took occasion to point out numerous instances of Russia's refusal to honor our passports, and pointed out her evasion of the obligation she owed our citizens under the treaty of 1832. I called attention to her outrageous treatment of the Jews within her borders, her barbaric treatment of them, her proscriptive policy, and her intolerant conduct toward these people within her dominion. With that phase of the matter we were, and we are, unable to deal.

We can not, of course, interfere with Russia in her own domestic affairs. But in dealing with the question this resolution directly affects we simply assert the integrity of our citizenship and the principle that Russia can not discriminate between our citizens, on religious grounds, when our passports are presented at her gate.

To assert less, Mr. Speaker, is to deny to our citizens, whether native or naturalized, that equality which is the boast and one of the very bulwarks of our American institutions.

Well, Mr. Speaker, the resolution of 1902 passed the House, and yet the State Department remained inactive and did absolutely nothing in the matter up to 1904.

In 1904 I secured the passage of the resolution which led to the correspondence between our Government and Russia, to which I shall presently allude. That resolution provided:

That the President be requested to renew negotiations with the governments of countries where discrimination is made between American citizens on the ground of religious faith or belief to secure by treaty or otherwise uniformity of treatment and protection to American citizens holding passports duly issued by the authorities of the United States, in order that all American citizens shall have equal freedom of travel and sojourn in those countries without regard to race, creed, or religious faith.

Agreeably to that resolution, Secretary Hay, in July, 1904, communicated with Ambassador McCormick at St. Petersburg and took occasion in his letter to say:

I have therefore to instruct you to inform Count Lamsdorff that the text of the foregoing resolution has been sent to you for your information and for your guidance in interpreting this expression of the feeling of the people of this country, through their direct representatives, as to the treatment of the citizens in question.

You will make known to his excellency the views of this Government as to the expediency of putting an end to such discriminations between different classes of American citizens on account of their religious faith when seeking to avail themselves of the common privilege of civilized peoples to visit other friendly countries for business or travel.

In carrying out his instructions, our American ambassador in August, 1904, laid before Count Lamsdorff, the imperial minister of foreign affairs in Russia, the text of the resolution. Before that time a copy of that resolution had been conveyed to Count Cassini, the Russian ambassador here at that time. I want to call especial attention to some of the sentences found in that excellent and well-prepared letter of our ambassador to the Russian Government. He says:

This resolution voices not only the feelings of the people, but also a principle which lies at the foundation of our Government. *It is for this reason that the question has been, is, and always will be a live question with us and liable to become acute and be brought forward at some time in such a way as to seriously disturb the friendly relations which have always existed between Russia and the United States.*

Aside from the belief that the treatment accorded by Russia to many of our most reputable and honored citizens is needlessly repressive, public opinion, as your excellency knows, plays a large part in the foreign relations as well as domestic affairs with us; and when underneath this public opinion there lies an important principle, as is the case in the United States, it can not be left out of account by those who have maintained the close relations which it is desired by my Government to see maintained with this great Empire and her august ruler.

For these strong and manly—nay, more—for these courageous words of our ambassador, those affected by the resolution owe much. It would have been well if these noble sentiments had been followed by an earnest and active negotiation and an insistence that Russia shall cease her proscription of our citizens and her "repressive" treatment of those who came to her with our passports.

But, sir, our administration, just as before, relaxed its efforts. Our State Department once more gave evidence of its indifference by failing to follow up the subject. It once again, so far as we know, lapsed into silence. Russia, cunning, crafty, quick in diplomacy to perceive, took advantage of the situation. She continued her policy. She discarded our passports; she let go unheeded the veiled threats of Ambassador McCormick.

That it may be seen that our American Department of State left itself open to the criticism that its acts of recent date gave Russia encouragement to continue her course of insolently dishonoring our passports, let me call attention to the circular letter issued by our American Secretary of State on May 28, 1907. It was an un-American document. It was unwarranted by the Constitution and the laws and opposed to the very spirit of our Republic. It first contained the usual caution to former Russian subjects contemplating returning to their native land, through citizens of our country; then tells them they can not, if they return to their country, expect immunity from the operation of the Russian law; and then contained this unusual, extraordinary, remarkable clause:

This department will not issue passports to former Russian subjects, or to Jews who intend going to Russian territory, unless it has assurance that the Russian Government will consent to their admission.

This circular was signed by Elihu Root and kept alive by its issuance to hundreds of American citizens for eight long months. Its offensive words were finally withdrawn by the Secretary of State and a new circular issued eliminating the offensive and objectionable words to which I have called special attention. Neither the circular nor the letter that accompanied it were withdrawn until I introduced a resolution on the subject in the early part of this Congress, and vigorously protested against the issuance of the circular.

With such a document emanating from the American Department of State, will anyone wonder that Russia felt we lacked sincerity in what Ambassador McCormick wrote, and that after all we were not so insistent in having the restrictions removed as one might suppose we were from the diplomatic correspondence to which I have called your attention.

It is time that this Government spoke out on this subject to Russia emphatically and distinctly. The insult tendered in her refusal to honor American passports is not an insult to the citizen that bears that passport alone; it is an affront to the American Government.

Happily and fortunately in this land all our citizens are equal before the law. Under our enlightened policy we accord equality to all who owe allegiance to the American flag. This country is too great to permit any longer any government to refuse to pay due respect to our passports, for our passport should be the safeguard of every American traveling, in times of peace, in every country and in every clime. [Applause.]

Upon this subject I desire to quote from a leading editorial in the Philadelphia Inquirer of January 21, 1909, these words:

The question which is so clamorously calling for settlement is by no means confined to those whom it most immediately affects. It is not whether persons of the Hebrew race shall be allowed, when provided with an American passport, freely to traverse Russian territory; it is not whether such persons shall enjoy the equal protection of the Russian law. It goes far beyond that. The question is whether the passport issued by the Department of State shall be recognized and accepted, no matter in whose hands it may be found, as an authoritative certificate of American citizenship, or whether any foreign official who chooses may refuse to accord such passport the credit which is due to it and may take upon himself to repudiate and ignore the rights and immunities to which as the appanages of American citizenship it certifies in its possessor, without eliciting from the Government of the United States any more effective action than a mildly academic remonstrance.

Now, Mr. Speaker, I trust that the resolution will pass without a dissenting vote. I indulge in the hope that the incoming administration will take up the subject in real earnest and push it vigorously and earnestly to secure results. But the subject will have the strongest indorsement when it comes backed by the action and approval of the American Congress. [Applause.]

The passage of this resolution by both the House and Senate will wield a strong moral effect, for it will not alone strengthen and encourage the Executive, but it will speak out loudly to Russia that public opinion on this question is aroused and that the American Government demands the cessation of her insulting treatment.

I ask the adoption of the report of the committee and the passage of the resolution.

APPENDIX.

Mr. Hay to Mr. McCormick.

No. 127.] DEPARTMENT OF STATE,
Washington, July 1, 1904.

SIR: On the 21st of April last the House of Representatives of the United States adopted a resolution in the following words:

"*Resolved*, That the President be requested to renew negotiations with the governments of countries where discrimination is made between American citizens on the ground of religious faith or belief to secure by treaty or otherwise uniformity of treatment and protection to American citizens holding passports duly issued by the authorities of the United States, in order that all American citizens shall have equal freedom of travel and sojourn in those countries, without regard to race, creed, or religious faith."

The subject to which this resolution relates has heretofore been the occasion of friendly but sincerely earnest representations to the Russian Government on the part of that of the United States. The instructions on file in your office and the correspondence had by your predecessors with the imperial foreign office leave no doubt as to the feeling of the Government of the United States in regard to what it has constantly believed to be a needlessly repressive treatment of many of the most reputable and honored citizens of the United States. Similar views have been expressed by my predecessors, as well as by myself, in conferences with the representatives of Russia at this capital. That these friendly representations have not hitherto produced the results so befitting the close intimacy of the relations of the two countries for more than a century and so much in harmony with their traditional amity and mutual regard is not, in the President's judgment, ground for relaxing endeavors to bring about a better understanding, if only on the score of expediency and reciprocal convenience.

I have therefore to instruct you to inform Count Lamsdorff that the text of the foregoing resolution has been sent to you for your information and for your guidance in interpreting this expression of the feeling of the people of this country, through their direct representatives, as to the treatment of the citizens in question. You will make known to his excellency the views of this Government as to the expediency of putting an end to such discriminations between different classes of American citizens on account of their religious faith when seeking to avail themselves of the common privilege of civilized peoples to visit other friendly countries for business or travel.

That such discriminatory treatment is naturally a matter of much concern to this Government is a proposition which his excellency will readily comprehend without dissent. In no other country in the world is a class discrimination applied to our visiting citizens. That the benefits accruing to Russia are sufficient to counterbalance the inconveniences involved is open to question from the practical standpoint. In the view of the President it is not easy to discern the compensating advantage to the Russian Government in the exclusion of a class of tourists and men of business whose character and position in life are such as to afford in most cases a guaranty against any abuse of the hospitality of Russia and whose intelligence and sterling moral qualities fit them to be typical representatives of our people and entitle them to win for themselves abroad no less degree of esteem than they enjoy in their own land.

I have, etc.,

JOHN HAY.

Mr. McCormick to Count Lamsdorff.

AMERICAN EMBASSY,
St. Petersburg, August 22, 1904.

YOUR EXCELLENCY: Under instructions from my Government, which I found awaiting me on my return from Carlsbad, I have the honor to bring before you for consideration at this time a subject which has been the occasion from time to time of friendly but sincerely earnest representations to the Russian Government on the part of that of the United States.

The feeling of the people of the United States, which is deep and widespread with reference to this subject, found expression in a resolution adopted on the 21st of April last by the House of Representatives. I assume that your excellency's attention was called to this resolution at the time of its adoption by his excellency Count Cassini, His Imperial Majesty's ambassador in Washington, and that a copy of the resolution was transmitted to you for your information.

As your excellency doubtless noted at the time, this resolution is conceived in a temperate spirit and expressed in moderate terms, such as to recommend its reception in a similar spirit, as well as the consideration of the subject which it brings forward.

The text of this resolution was sent to me for my information in interpreting this expression of the feeling of the American people as to the treatment of the citizens in question, and I here beg to insert the resolution as placing that expression on record, although, as above indicated, a copy of the resolution has already been transmitted to you by Count Cassini:

[Fifty-eighth Congress, second session.]

"CONGRESS OF THE UNITED STATES,
"*In the House of Representatives, April 21, 1904.*

"*Resolved*, That the President be requested to renew negotiations with the governments of countries where discrimination is made between American citizens on the ground of religious faith or belief to secure by treaty or otherwise uniformity of treatment and protection to American citizens holding passports duly issued by the authorities of the United States, in order that all American citizens shall have equal freedom of travel and sojourn in those countries, without regard to race, creed, or religious faith."

This resolution voices not only the feelings of the people, but also a principle which lies at the foundation of our Government. It is for this reason that the question has been, is, and always will be a live question with us and liable to become acute and be brought forward at some time in such a way as to seriously disturb the friendly relations which have always existed between Russia and the United States.

Aside from the belief that the treatment accorded by Russia to many of our most reputable and honored citizens is needlessly repressive, public opinion, as your excellency knows, plays a large part in the foreign relations, as well as domestic affairs, with us, and when underneath this public opinion there lies an important principle, as is the case in the United States, it can not be left out of account by those who have maintained the close relations which it is desired by my Government to see maintained with this great Empire and her august ruler.

"That friendly representations," as is set forth in my instructions, "have not hitherto produced results befitting the close intimacy of the relations of the two countries for more than a century, and so much in harmony with their traditional amity and mutual regard, is not, in the President's judgment, ground for relaxing endeavors to bring about a better understanding, if only on the score of its expediency and reciprocal convenience."

Moreover, in no other country in the world is class discrimination applied to our visiting citizens, nor can it be seen, from the practical standpoint, that the benefits accruing to Russia are sufficient to counterbalance the inconvenience involved. In the view of the President, "it is not easy to discern the compensating advantage to the Russian Government in the exclusion of a class of tourists and men of business whose character and position in life are such as to offer in most cases a guaranty against any abuse of the hospitality of Russia, and whose intelligence and sterling moral qualities fit them to be typical representatives of our people and to win for themselves abroad a no less degree of esteem than they enjoy in their own land."

It seems to me that there are higher grounds to which to appeal, and to which it is opportune to appeal at this time, than those of expedience and reciprocal convenience, evidences of the influence of which have manifested themselves in steps already taken toward the alleviation of the condition of the representatives of the race referred to within the Empire.

At this time, too, when the world is extending its congratulations to His Majesty on an event which has brought happiness to himself and gratification to his friends; when he is extending the imperial clemency to some justly under the ban of the law, it would seem fitting to take under consideration this larger question, a solution of which would not only tend to draw closer the relations between this great Empire and the United States, but also to arouse a responsive feeling of good will throughout the world.

The railway and the telegraph are breaking down the barriers of distance which have until now kept apart the peoples of the various nations of the earth; Russia has made a notable contribution to this object in the great system of railways constructed within the Empire, which are operated in close connection and harmony with those of the outside world. To throw this great railway system open more fully to those who would avail themselves of it for legitimate purposes is but to dedicate it to a use which would be of the greatest good to the Empire and the world at large.

Events have proven that no artificial barrier can keep out those who come with hostile intent or who, from without, seek to circulate ideas of hostile character. Is there any reason, therefore, why at least serious consideration should not now be given to the views of my Government as to the expediency of putting an end to such discriminations as now exist in Russia between different classes of American citizens on account of their religious faith when seeking to avail themselves of the common privilege of civilized peoples to visit other friendly countries for business or for travel?

In transmitting the views of my Government at this length, and personally adding some reasons for favorable action which seem to me to be cogent, I have been actuated by the desire, as your excellency will appreciate, to contribute something toward those friendly relations which have marked the past, and which I value. For this reason I lend myself most earnestly to the work of carrying out my Government's instructions, in the hope that the result will be such as to contribute to the removal of one question of disturbing character from the realm of discussion by a mutually satisfactory understanding concerning it.

I take this occasion to renew to your excellency the assurance of my high consideration.

ROBERT S. MCCORMICK.

Mr. McCormick to Mr. Hay.

No. 193.] AMERICAN EMBASSY,
St. Petersburg, October 7, 1904.

SIR: I have the honor to transmit to you herewith a copy and translation of a note received from Count Lamsdorff, imperial minister for foreign affairs, in reply to mine of August 22 last, relating to the resolution adopted by the House of Representatives of the United States on April 21 last, concerning "the freedom of travel and sojourn in Russia, without regard to race, creed, or religious faith," of all American citizens, which was transmitted to me in your dispatch No. 127, of July 1 last.

I have, etc.,

ROBERT S. MCCORMICK.

[Inclosure.—Translation.]

Count Lamsdorff to Mr. McCormick.

MINISTRY FOR FOREIGN AFFAIRS,
St. Petersburg, October 4, 1904.

Mr. AMBASSADOR: It is with special interest that I have become acquainted with the consideration expressed by your excellency in your note of the 9/22d of August, relative to certain facilities to be granted to American citizens of Hebrew faith with regard to their entry into Russia. In this connection I have the honor to inform you that a special commission has been instituted by supreme order on December 17, 1903, with the ministry of the interior, in view of generally revising the passport regulations actually in force.

The imperial ministry of foreign affairs having appointed a representative with this commission, I shall not fail to bring, through his intermediary, to the knowledge of that commission your views on the subject and the desire of the Federal Government, of which your excellency has been the interpreter.

I avail, etc.,

LAMSDORFF.

Mr. HARRISON. Mr. Speaker, this is a resolution of my colleague [Mr. GOLDFOGLE] to secure equality of treatment abroad for all American citizens. Upon two occasions I have presented to the House my view of this matter. It is therefore unnecessary for me to detain the House at great length this morning.

But I wish to call attention, however, to the fact that in the Committee on Foreign Affairs in the discussion of this matter it was unanimously agreed that our country should secure a revision of the treaty, if possible, looking to a correction of the abuse by Russia of the American passport. There were a number of members of the committee who thought it advisable to direct or to request the President of the United States to denounce the present treaty with Russia as outworn, and yet it was decided by a majority of that committee, in view of the fact that a new administration was incoming, that it would be indiscreet at the present time for us to request a denunciation of the treaty. It is evident to all of us, however, that some more vigorous step must be taken by America to secure the elimination of this abuse. It is now five years, so far as we are aware, since any positive stand has been taken by our country to secure a correction of this evil. It is therefore unquestionably the sentiment of this House that we should bring this matter to a head. But we do not wish to embarrass the incoming administration before they have had sufficient time to deal with the question.

In these days the foreign relations of the United States are attracting more attention than ever before in times of peace. Our institutions and our principles of government are daily gaining ground and winning admiration in the other countries of the world. No one of our principles is dearer to the heart of the American citizen than the American doctrine of complete freedom and equality of religion. For this noble principle we have raised an enduring standard. In but one respect have we failed of our ideal. We have, as yet, failed to secure from Russia a proper respect for this fundamental principle of our Government. They still assert the right to discriminate between different classes of American citizens, solely on the ground of religious belief. To the founders of this Republic such an idea would have been inconceivable. They would have cast aside as abhorrent the suggestion of what is now a dismal reality—that an American citizen, armed with the passport of the United States, should be halted at the boundary of a friendly power, questioned as to his religious belief, and rejected or refused admission because of such religion.

This is not a question of the naturalization or immigration laws. Only those ignorant of the facts or anxious to conceal the present distressing situation will so assert. The issue is presented more clearly by the case of the Hebrew born in America, of American ancestry. Such a man, whatever his achievements or services to his community and his country, however high his character and reputation, may be stopped, questioned, humiliated, and insulted at the boundaries of Russia, and finally refused admission because of a profession of his religious faith.

Mr. Speaker, this is intolerable. We have suffered this abuse too long. The time has come to call a halt, and to call so loudly that the Czar upon his throne may hear. If, with insidious cunning, the Russian diplomats can twist a clause of our treaty into fancied permission to their Government to so maltreat American citizens, let us denounce this treaty. Let us call upon our new administration for prompt and vigorous action. Let us assert once more and with patriotic vigor our equal rights before all men.

Mr. SABATH. Mr. Speaker, why the Committee on Foreign Relations has seen fit to refuse to report to this House this resolution as presented in its original form by my colleague from New York I do not know—nor do I understand. I have given the phraseology of the same thorough consideration, and to be sure there was nothing which could have been construed as being objectionable in the minutest detail. It requested the President and the Secretary of State, in very proper language, to demand that the treaty privileges with Russia in the treaty of 1832 be complied with and lived up to, both in letter and spirit.

As in all ratified treaties, there was a mutual understanding to enforce and regard all provisions, and since the day on which the treaty became effective and operative nothing has transpired which would cause a desire to alter or change the provisions of this treaty, unless it be the chicanery and total disregard of the fundamental principles of international law which Russia has persistently practiced—or is it perhaps that Russia is endowed with a special prerogative to violate and abuse and totally disregard the rights of citizens of the United States, under existing treaties?

It is to be regretted that the last three administrations have not only permitted but sanctioned these violations, notwithstanding the fact that the Government has repeatedly received notices and complaints from many citizens. Mr. Speaker, this resolution strikes deep at the national pride and polity of the United States, and when I rise to speak in favor of this meek, as amended, resolution, I rise to insist that our treaty obligations must be lived up to; that justice and equality should and must be granted to our citizens regardless of creed, and finally to point out the expediency for action in the matter. This question of the proper recognition of passports has dragged on for years, and justice demands that such deliberate, continuous discrimination and shameful insulting must cease. I believe that the time has come when this injustice, going on before our very eyes, must be absolutely eradicated; and knowing that there is no earthly possibility of having such initiative taken on the part of our Secretary of State, or the unjust, despotic, and barbaric administration of Russia, I believe that we, as the legislative body of the United States, must take action, even if the committee has seen fit to strike out the very basic essence of this resolution.

A few days before the last presidential election I read a copy of a letter written by Secretary Elihu Root, printed in one of the newspapers, and addressed to a certain gentleman in the city of New York, which caused me to believe that something would be really accomplished and some definite action would be taken to eradicate the abuses. Mind you, Mr. Speaker, this letter appeared shortly before the election, and was, of course, neatly published in all the papers, stating that progress was being made in the negotiations with Russia relative to securing from that country the proper recognition of our passports and passport privileges. And now what justification or real truth do we find for the article—what evidence of any progress or action in the matter have we? I sincerely hope that the department has not been making a political tool of so vital and important a question as this. It is exceedingly strange that no Member of this House, or this House as a body, has been able to obtain this information; and now, even six months after the publication of this letter, it is still impossible to obtain any information as to what the department has done.

Yes, Mr. Speaker, we must wait and read it in the papers. I assure you it will give me great pleasure some day to be able to read in the papers, knowing that we Members can not secure the information, that our Government has ceased making empty remonstrances without action to back them up, and that it will refuse in the future to aid a foreign government in violating its treaty at the expense of thousands of our own law-abiding citizens. It will give me still greater pleasure to know that our Government at all times properly considers and properly makes it a point to stand for the rights and privileges of each and every American citizen, regardless of creed or religion, whether it be on foreign shores or at home.

No, Mr. Speaker and gentlemen, it is not necessary for me to enumerate the sufferings of the Jew in Russia, or to point out the instances in which that Government has overstepped the bounds of humanity and committed deeds violating the most primitive demands of all enlightened civilization. The despotism, tyranny, prejudice, cold-blooded slaughter fests instigated by the Government, banishment, and smiliar atrocities practiced by that Government need no elucidation or proof.

True enough, this can only arouse our sympathies, for we are not to-day concerned and, to my great regret, can not change the internal administration of Russia; but when it comes to dealing with subjects of this Government, my own people, good Americans, faithful and liberty-loving citizens, it is time for us to interpose. As long as the Government of Russia refuses to visé the passports of Americans who profess the Hebrew religion, and as long as the Department of State of this country assists in the matter, we hypocritically place in jeopardy the time-honored standards of Americanism. And as long as the foundation stone of this Government is "equality of man," we can not sit idly by and willfully submit to trafficking with American ideals and institutions. As long as the treaty of 1832 with Russia provides that the citizens of the United States may travel and sojourn in Russia with absolute freedom, regardless of religion, we have little justification for complaint when our own institutions refuse to issue passports because of religion.

The toleration of such discriminations throws the odium and reflection arising therefrom not upon the citizens so discriminated against, but upon this Government. It places in mockery and ignores the basic principles of the Constitution, both in letter and in spirit; but the greatest insult and mockery of all comes from our Department of State in a circular issued May

28, 1907. It is so extreme and un-American that every true citizen must condemn it. It reads as follows:

RUSSIA—NOTICE TO AMERICAN CITIZENS, FORMERLY SUBJECTS OF RUSSIA, WHO CONTEMPLATE RETURNING TO THAT COUNTRY.

A Russian subject who becomes a citizen of another country without the consent of the Russian Government commits an offense against Russian law, for which he is liable to arrest and punishment if he returns without previously obtaining the permission of the Russian Government.

This Government dissents from this provision of Russian law, but an American citizen formerly a subject of Russia who returns to that country places himself within the jurisdiction of Russian law and can not expect immunity from its operations.

Jews whether they were formerly Russian subjects or not, are not admitted to Russia unless they obtain special permission in advance from the Russian Government, and this department will not issue passports to former Russian subjects or to Jews who intend going to Russian territory, unless it has assurance that the Russian Government will consent to their admission.

No one is admitted to Russia without a passport, which must be viséed or indorsed, by a Russian diplomatic or consular representative.

ELIHU ROOT.

DEPARTMENT OF STATE, *Washington, May 28, 1907.*

No fair-minded American, reading this circular, can find the slightest justification for it. No, Mr. Speaker, I absolutely deny the right of the department to have issued this circular, and I deny their pretension to make inquisition into the religious belief of an American citizen. I venture to say that there is no greater blot on the pages of American diplomatic history, and no greater insult than this was ever perpetrated on any people. On what grounds can anyone justify the Secretary of State in refusing, not only to naturalized American citizens who were formerly Russian subjects, but to all American Hebrews, the right and privilege of a passport unless Russia shall give consent before the passport is issued? Those born and reared in this country, and who may have figured in the most memorable chapters of our history, are not excluded.

If the Secretary of State can not obtain for American citizens rights secured to them under our treaty; if he can not make one of the sovereign rights unconditional upon the assent of a foreign ruler, he has no earthly right to take the matter in his own hands and assist Russia in carrying out her violations, thereby making us an accomplice to the whole injustice, fostering the internal narrow creedal policies of Russia and becoming mere puppets in the hands of a monster, salaaming at each beck and call. What justification had he for doing so, and why did he quietly retract it? For eight months these circulars were sent to all Americans applying for passports to Russia, and the moment there was a possibility of investigation the department attempted to smooth it over. If we are here as representatives of the American people, we are entitled to know.

If this same treatment would have been tendered to the Catholics or Presbyterians or any other creed a state of civil disruption would have been the result. My people are not only entitled to equal privileges, but to an apology from the then Secretary of State. And that is why I am using all my efforts of speech to insist—not urge, but insist—that our citizens of Hebrew faith, whether born in Russia, France, Germany, or the United States, shall have absolutely equal rights and privileges not only on paper, but in the actual practices of this Government. The Russian Government has constantly violated the letter and principle of this treaty, and we must make the humiliating confession that the most powerful government in the world has allowed the basic principle of its foundation to be violated and flaunted in its face, and, moreover, has assisted in the carrying out of the insulting and discrimination.

And not only in regard to the discrimination against the members of one creed, but even to the abuse of our extradition treaty of 1898, have we permitted the Russian Government to continue its course of treaty abuse and violation without protest or even the utterance of a refusal to longer tolerate the commission of her gross injustices.

There are innumerable instances where Russia has sought the extradition of political refugees on other extraditable offenses, which is absolutely against the treaty, and has thus caused the United States and many individuals considerable expense and time. In the case of Rudovitz, which was just recently decided by the Secretary of State, it had been clearly shown by the testimony of witnesses and documentary evidence that the deed committed by Rudovitz was committed at the time of a revolution in Russia, and that Rudovitz was a political refugee, a well-known fact to the Russian Government.

Notwithstanding this fact, a United States commissioner ordered his extradition, and had it not been for the unanimous protest of the American people the decision would never have been reversed and said Rudovitz would have been sent back to Russia and, no doubt, by this time executed, thereby establishing a precedent by which Russia could have demanded the extradition of hundreds of political offenders, and, at the same time, demonstrate to its thousands of liberty-seeking people that even the doors of the most enlightened country would be barred to them should they assist in any manner the struggle for their freedom and liberty. This clearly shows that Russia's abuse is not confined to this refusal to recognize American passports, but extends to our extradition treaty as well. Why this state of affairs has gone on so long, I can not understand. In 1904, Count Lamsdorff, the Russian minister of foreign affairs, stated that the matter of recognition of passports had been turned over to a special commission for investigation and that the matter would be adjusted at once.

Four years have elapsed, and up to the present time no step has been taken, and for all we know the commission may have died of old age trying to frame up an excuse which could satisfy the American people.

Gentlemen, this has gone too far, and the time for action is overdue. We have been relying on flimsy promises for too many years, and the injustices have piled into a pyramid of stain on the time-honored foundations of the American Government. And in the name of these principles I urgently insist that the United States carry forward unflinchingly the principles bequeathed us by our forefathers. Let us therefore insist that all nations, regardless of internal conditions, as long as they profess peace with us, must respect every American citizen whom his country vouches for, regardless of race, standing, or religion.

Notwithstanding the fact that this resolution is not what I had hoped for, nor what it really should be, I shall vote for it and sincerely hope that every Member of this House will do likewise, making it unanimous. Such action will, if nothing else, express the sentiment of the Representatives of the American people and will thereby serve notice on the incoming administration, particularly the Secretary of State, that the people of this country will no longer tolerate such unjust and un-American discrimination, and that not only Russia but our State Department, above all, should discontinue its policies and try to screen the injustices of the past. As to myself, Mr. Speaker, I shall in the future, as I have in the past, carefully follow the action of the department, whether it comply with the expression and will of the House, or if it will, as heretofore, with glorious convenience ignore our action, and I shall endeavor to the best of my ability to keep this House, as well as the American people, informed of the course of action taken, and shall unhesitatingly bring to light and place the responsibility and blame where it properly belongs.

Mr. CAPRON. Mr. Speaker, I yield two minutes to the gentleman from New York [Mr. SULZER].

The SPEAKER. The gentleman from New York [Mr. SULZER] is recognized for two minutes.

Mr. SULZER. Mr. Speaker, it is a matter of much gratification to me, and I know it will be to every liberal-minded and liberty-loving citizen in the land, that at last the Committee on Foreign Affairs of this House has reported a resolution to make Russia treat all American passports alike and without discrimination on account of race or religion. I concur in all that has been so well said this morning concerning this matter, and for one I want to stand up here in my place and say that if the Russian Government will not treat all passports of American citizens alike, regardless of race or religion, then the Government of the United States should immediately serve notice on the Russian Government that this country desires to abrogate the treaty existing between the two powers. We must notify Russia that we intend to do this. It is only fair, and it is only just, and it is only right to all our citizens. The Russian Government has no more right to discriminate against an American citizen on account of his race or his religion than we have to discriminate against a Russian subject sojourning in this country because the Russian citizen's religion, forsooth, is different from our own. I am opposed to any discrimination on account of race or religion. The Russian Government must be told in plain words that the United States will no longer tolerate her discrimination against our citizens simply because they are Jews. An American citizen's passport must be treated the same in every land and in every clime. That should be a fundamental principle of our foreign policy. For us to do less is, to say the least, humiliating and contrary to the letter and the spirit of our free institutions. I trust this resolution will pass, and I indulge the hope that the next Secretary of State will see to it that the Russian Government discontinues its discrimination against American citizens on account of their race and their religion. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. CAPRON. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. PARSONS] may extend his remarks on this subject in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. HITCHCOCK. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on this subject.

The SPEAKER. Is there objection?

There was no objection.

Mr. CAPRON. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on agreeing to the amendments.

The question was taken, and the amendments were agreed to, the joint resolution engrossed, the amendments to the preamble agreed to, and the joint resolution read a third time and passed.

MINORITY VIEWS—OCEAN-MAIL BILL.

Mr. SMALL. Mr. Speaker, I ask unanimous consent for a reprint of the views of the minority on the bill S. 28—the ocean-mail bill—so that an error may be corrected in the same.

The SPEAKER. The gentleman from North Carolina asks unanimous consent for a reprint of the views of the minority of the Committee on Post-Offices and Post-Roads on the bill S. 28—the ocean-mail bill—so that an error may be corrected in the same. Is there objection?

There was no objection.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendment of the Senate to bills of the following titles:

H. R. 27054. An act making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes;

H. R. 27061. An act to provide for the appointment of an additional district judge in and for the western district of Washington; and

H. R. 26394. An act making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 28193. An act to authorize the city of Shreveport to construct a bridge across Red River; and

H. R. 14290. An act for the relief of Ellis W. Joy.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. NELSON, Mr. GALLINGER, and Mr. MARTIN as the conferees on the part of the Senate.

The message also announced that the Senate had disagreed to the amendments of the House of Representatives to the bill (S. 6055) to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia.

FRANCIS J. PARKER.

Mr. HUGHES of West Virginia. Mr. Speaker, I desire to submit the following privileged report (H. Rept. No. 2285) from the Committee on Accounts.

The Clerk read as follows:

House resolution 574.

Resolved, That the Clerk of the House of Representatives is hereby authorized and directed to pay, out of the contingent fund of the House, to Francis J. Parker the sum of $108.30, being the amount due him as clerk-hire allowance for services rendered the late Hon. William H. Parker, a Representative from South Dakota, from June 1 to June 26, 1908, inclusive.

The question was taken, and the resolution was agreed to.

EDWARD J. CANTWELL.

Mr. HUGHES of West Virginia. Also the following (H. Rept. No. 2286):

The Clerk read as follows:

House resolution 578.

Resolved, That there shall be paid out of the contingent fund of the House to Edward J. Cantwell, administrator of the estate of William A. Watson, deceased, late a special messenger in the service of the House of Representatives, an amount equal to six months' salary of said Watson, and an additional amount, not exceeding $250, to defray the funeral expenses of said Watson; also the accrued salary due said Watson at the time of his death.

The question was taken, and the resolution was agreed to.

MICHAEL A. RATTIGAN.

Mr. HUGHES of West Virginia. Also the following:

The Clerk read as follows:

House resolution 579.

Resolved, That there shall be paid out of the contingent fund of the House to Michael A. Rattigan the sum of $62.44, being the amount due him as clerk to the late Representative Daniel L. D. Granger, of Rhode Island, from February 1 to February 14, 1909, both dates inclusive.

The question was taken, and the resolution was agreed to.

ADDITIONAL CLERK, COMMITTEE ON ENROLLED BILLS.

Mr. HUGHES of West Virginia. Also the following (H. Rept. No. 2287):

The Clerk read as follows:

House resolution 601.

Resolved, That the chairman of the Committee on Enrolled Bills be, and he is hereby, authorized to appoint two additional clerks to said committee, who shall be paid out of the contingent fund of the House at the rate of $6 per day during the remainder of the present session.

The amendment recommended by the committee was read, as follows:

In line 2, strike out the word "two" and insert the word "one;" in line 3, strike out the word "clerks" and insert "clerk."

Mr. CLARK of Missouri. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. CLARK of Missouri. Was not there a resolution or bill passed some years ago to have these enrolled bills printed instead of written?

The SPEAKER. There was.

Mr. CLARK of Missouri. Then what do we need with an additional clerk?

Mr. WILSON of Illinois. The bills have to be compared.

The amendment was agreed to.

The resolution as amended was agreed to.

DISTRIBUTION OF DOCUMENTS.

Mr. PERKINS. Mr. Speaker, I move to suspend the rules and pass the following joint resolution.

The Clerk read as follows:

House joint resolution 263 to provide for the distribution by Members of the Sixtieth Congress of documents, reports, and other publications.

Resolved, etc., That all documents and books ordered to be published by the Sixtieth Congress which are actually printed prior to the first Monday in December next, to which Members of that Congress not Members of the Sixty-first Congress would have been entitled if published prior to the 4th day of March, shall be allotted such Members, and the term allowed to distribute the same shall be extended to the first Monday of December next.

The SPEAKER. The gentleman from New York moves to suspend the rules and pass the joint resolution. Is a second demanded?

Mr. MANN. I demand a second.

The SPEAKER. Under the rules a second is ordered. The gentleman from New York [Mr. PERKINS] is entitled to twenty minutes and the gentleman from Illinois [Mr. MANN] is entitled to twenty minutes.

Mr. PERKINS. Mr. Speaker, this is a resolution which affects the distribution of documents by the outgoing Members, and therefore affects the rights of the incoming Members of the Sixty-first Congress.

Mr. KIMBALL. Mr. Speaker, we can not hear a word of what is being said.

The SPEAKER. The House will be in order. If the galleries will refrain from conversation, and if Members will refrain from conversation, in the opinion of the Chair there is no hall on earth that has as good acoustic properties as this Hall. [Applause.]

Mr. PERKINS. This resolution refers to the distribution of documents by Members of the Sixtieth Congress who are not Members of the Sixty-first Congress. It is reported by the Committee on Printing, for the judgment of the House, as to which is the fair course of procedure to be taken. The law as it now stands provides that an outgoing Member of Congress has the distribution of documents until the beginning of the first session of the following Congress. Under that rule the first session means, ordinarily, the first Monday of December, and the Members of the Sixtieth Congress not reelected to the Sixty-first would have all the documents printed down to the 1st of December next, and the incoming Member would have no documents for distribution until Congress met on the first Monday of December. That is the general law.

Now, as we all know, the Sixty-first Congress is to be called in special session on the 15th day of March instant. As a result, if no action is taken by Congress, the right of the outgoing Member to receive documents for distribution and to make distribution will cease on the 15th day of March, two weeks from

this date. On the other hand, it may be said in behalf of the incoming Members that ordinarily they are not required to attend sessions of Congress until the first Monday of December; but if the incoming Member is actually required to attend Washington in the middle of March to give his time during the session that begins then, it is, perhaps, fair that he receive the distribution of books from the time he comes here. Now, in answer to that, the outgoing Member says that when he first came to Congress he received no distribution until the December following the time of the beginning of his term. That is, if he served one term of two years, he had a distribution of documents for only fifteen months, whereas his successor, who also served a term of two years, would have a distribution of two years and nine months.

In view of that, the Committee on Printing has reported this resolution, which modifies the law, so as to provide that, notwithstanding the calling of the extra session in March, the time for the distribution of books to outgoing Members of Congress not Members of the Sixty-first Congress shall be extended to the first Monday of December; and the committee submits this to the judgment of the House as to whether, in view of all the circumstances, it is proper to extend the time for the distribution of books and the receipt of books to the outgoing Members to the first Monday of December. That is the law, if it were not for the extra session. But, in view of the fact that there is an extra session, the incoming Members would receive the distribution from the time they actually take their seats, unless this resolution is passed.

I reserve the balance of my time.

Mr. MANN. Will the gentleman allow me to ask him a question?

Mr. PERKINS. Certainly.

Mr. MANN. The resolution provides "for the distribution of all the documents and books ordered to be published by the Sixtieth Congress which are actually printed prior to the first Monday in December next."

Mr. PERKINS. Yes.

Mr. MANN. Now, will that include publications made under permanent law, such as the Yearbook, such as the Farmers' Bulletins, or even such as the geological reports or any other documents except those specifically ordered to be printed at the desk or by resolution?

Mr. PERKINS. In my judgment, this resolution as it is drawn would include, for instance, the Yearbook, because the appropriation for the Yearbook to be published next summer has already been made by the Sixtieth Congress. So I think the Yearbook that is now in process of preparation, which will be distributed, I suppose, next July, the authorization for which is contained in the appropriation bill that passed the Sixtieth Congress, would go to the outgoing Members under the wording of this resolution.

Mr. MANN. Regardless of the wording, I am not so sure as to the intent of the resolution. Is it the intent of the gentleman to provide in the resolution that all documents distributed through the folding room shall remain to the credit of the outgoing Member until the 1st of next December, subject to his order?

Mr. PERKINS. Excepting such documents as are authorized by the Sixty-first Congress at its session soon to begin. Of course, though they were printed at once, if a document was ordered printed by the Sixty-first Congress on the 15th of March and was ready for distribution on the 20th of March, it would go to Members of the Sixty-first Congress and would not be covered by this resolution.

Mr. KEIFER. I should like to ask a question for information.

Mr. PERKINS. I yield to the gentleman from Ohio for a question.

Mr. KEIFER. I only wish to understand the operation of this resolution if it be adopted. The publications that would go to the outgoing Members of the Sixtieth Congress up to the 1st of December next might be very considerable. How would that outgoing Member distribute those publications after the 1st of December next?

Mr. PERKINS. After the 1st of December next he could have them all sent to his own home, if they were still undistributed, and then he would have to make his own distribution.

Mr. KEIFER. We would have to distribute them without the franking privilege.

Mr. PERKINS. After next December.

Mr. KEIFER. And yet you give him the franking privilege for the purpose of distributing that publication.

Mr. PERKINS. No; I think not.

Mr. KEIFER. Everybody else gets it.

Mr. PERKINS. I know, but everybody else is a Member of the Sixty-first Congress. He has the right to the franking privilege for nine months, until the 1st of next December.

Mr. MANN. Mr. Speaker, this resolution is a proposition to discriminate——

Mr. STANLEY. Mr. Speaker, I ask for order. I want to hear the gentleman. He usually has something to say when he gets up.

The SPEAKER. The House will be in order.

Mr. MANN. Mr. Speaker, the resolution is a proposition, it seems to me, to make an unjust discrimination against the Members elected for the first time, in favor of those who go out.

Under the law a man is entitled to the documents belonging to his district until the first session of the next Congress meets, which in this case will be, I suppose, the 15th of March.

Mr. Speaker, I came here for the first time at the special session of Congress which passed the Dingley tariff law. It so happened that my predecessor was one of my best friends. The old documents that he had he turned over to me. I had constant requests for documents during that special session of Congress, and I should have felt outraged if Congress had provided that some antagonist perhaps of mine was to have the distribution of documents after I was sitting on the floor of the House, and when my constitutents wrote to me for documents, I had been obliged to say: "I have no documents, although a Member of Congress. Apply to the man whom I beat for renomination or reelection."

Mr. MARSHALL. I was in exactly that same fix at the first session of Congress when I was elected here. I was for months without documents. I provided myself the best I could; but this propositon is to cut me off and put my successor in a better condition than I was.

Mr. MANN. Oh, the gentleman suffered once under the law as it stood. He ought to be willing to treat his successor fairly and not ask Congress in selfishness to give him the documents which he believed when he came here belonged to the man who was in Congress.

Mr. MARSHALL. You want me to suffer again.

Mr. HINSHAW. I had a similar experience. I had no documents to distribute, and I applied to Hon. JAMES R. MANN for some documents, which he very kindly gave me, in that way supplying a very considerable number in my district and making good that deficiency in my document list.

Mr. MANN. Mr. Speaker, the new Members come here about the 15th of March, are sworn in, and they will have constant applications from their constituents for documents. How can it be considered fair to say that they shall have no documents; that their predecessors shall have all the documents until the 1st of next December? If Congress was not in session the situation would be different. But when a man comes here, when he is in Washington attending the sessions of Congress, it seems to me all decent regard for the consideration of other men will lead us to treat the newly elected Members of Congress fairly. We should not forget that, though we would like to favor those who go out, the new Members will be our colleagues after the 15th of March, and we ought not to discriminate in favor of those who are now here because we are fond of them, but remember that when they are gone we shall also be fond of those who succeed them. I now yield three minutes to the gentleman from Iowa [Mr. DAWSON].

Mr. DAWSON. Mr. Speaker, it may be somewhat ungracious to outgoing Members to oppose the passage of this resolution, but it seems to me that there is a question of right and wrong, a question of justice and injustice involved in this resolution. We ought to remember as a fundamental fact that the documents ordered by Congress and allotted for distribution are not provided for the personal use of the Members, but are provided and allotted to the districts themselves. That being so, the question for the House to determine is, Who is the proper man to make the distribution of those documents among his constituents? Is it right for the ex-Member of Congress to distribute the documents in the district after his successor has been elected, after his successor is in Washington and has been sworn in and is performing all the functions of a Representative of the district, when there is coming to him all the requests for documents from his district? I say it is not fair to deprive the real Representative of the distribution of the documents which belong to his district and place it under the control of one who has already had an "ex" put before his name and who has retired to private life.

Mr. ADAIR. Will the gentleman yield for a question?

Mr. DAWSON. Certainly.

Mr. ADAIR. Does the gentleman think it is fair to the Member who was elected two years ago and who goes out this year,

who did not have the documents to distribute from the 4th of March until the next December, to deprive him of that right now?

Mr. DAWSON. Let me answer the question of the gentleman by asking another: Did not the gentleman feel between the 4th of March, when he became a Member of this House, and the 4th of the following December, when he began to get documents, that an injustice was being done him during that period?

Mr. ADAIR. That is true, but that has been the rule in the past.

Mr. DAWSON. Does the gentleman want to perpetuate that injustice to Members who come hereafter? I believe that the injustice has worked long enough, and I am willing to lose my share of the documents when I go out in order to see that the men who come in after the 4th of March shall have justice accorded to them.

Mr. ADAIR. I want to say that this matter does not affect me, for I do not go out, but I sympathize with the Members who are affected.

Mr. MANN. Mr. Speaker, I now yield two minutes to the gentleman from Tennessee [Mr. GAINES].

Mr. GAINES of Tennessee. Mr. Speaker, I am opposed to this resolution. It looks like a resolution in favor of the Members who are reelected and in favor of the Member who is defeated and against his successor. I will not stand here and by my vote do my successor an injustice. I think this does do him an injustice, and I will not take the documents if they are put to my credit. [Applause.] I yield back the balance of my time.

Mr. PERKINS. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has ten minutes.

Mr. PERKINS. How much time has the gentleman from Illinois?

The SPEAKER. Eleven minutes.

Mr. PERKINS. I yield three minutes to the gentleman from Missouri [Mr. RUSSELL.]

Mr. RUSSELL of Missouri. Mr. Speaker, I wish that I may have order in the three minutes allotted to me.

The SPEAKER. The Chair sympathizes with that aspiration. [Laughter.]

Mr. RUSSELL of Missouri. Mr. Speaker, there are 77 Members of this House that will not be Members of the next House. I happen to be one of those unfortunate Members myself. These 77 Members are directly interested in this resolution. The balance of the Members of this House will not in any way be affected by it. It is not because I would be a beneficiary under this resolution that I now support it, but because I believe it is absolutely fair and just.

If this resolution is not passed, the 77 Members of this House, elected for the first time two years ago and who retire at the end of this session, will get the documents published by Congress for only fifteen months—that is, until the meeting of the extra session—while their successsors who may be here for two years will get the public documents for thirty-three months. I submit that that is not fair. I was elected two years ago last fall. I had hundreds of requests for publications from my constituents between the 4th of March and the 1st of December. I was compelled to write to all of them that all of the public documents in that interval were given to my predecessor, and that I would not be able to furnish them until December. I insist that my successor to-day can do what I did then, and say to the people who write him for public documents that under the law they will not be given to him until next December, and that he can not furnish them until then. The gentleman from Iowa, my friend Mr. DAWSON, says that this law is not fair, either to the Members heretofore or now, but it has been the law and submitted to by Members in the past, and it is not fair to change the rule now at the expense of those of us who go out, simply because there happens to be an extra session.

My friend from Tennessee [Mr. GAINES] says that he does not want these documents after his retirement. If he does not, he can turn them over to his successor, but I submit that because he does no want his documents is no reason why we who do want them should not have them. I want to say that I have received but one Yearbook, and if this resolution is not passed I will get no more, while my successor will in his two years' term get three. Last year we ordered the publication of the cattle book. It has not been printed yet; and if this resolution does not pass I will not get it, although ordered printed a year ago. Eulogies delivered in this House a year ago have not yet been printed, and unless this resolution passes I can not get them. I believe that if my successor were here and permitted to vote that he would be just enough and fair enough to vote for this resolution. [Applause.]

Mr. PERKINS. Mr. Speaker, I yield one minute to the gentleman from Pennsylvania [Mr. OLMSTED].

Mr. OLMSTED. Mr. Speaker, as I am not a retiring Member I am not affected in one way or the other by this proposition. It seems to me that it does not affect the Treasury in any way. It is just a question of distributing certain public documents. Shall they be sent out by the retiring or by the incoming Member from the same district? They will all go to the same districts; they will all get to the people in either event. The only question is whether they shall be distributed by the retiring Members or by the incoming Members. Each Member of Congress is elected for two years. Within that period certain public documents are ordered printed, but they are not all printed and ready for distribution by March 4. Ordinarily a retiring Member would have until the 1st of next December within which to distribute the documents which are not yet fully printed.

The only question is whether by reason of the extraordinary session he shall be deprived of that privilege and his successor gain that much. In no way does it affect the Treasury. It simply gives to each retiring Member the privilege of distributing two years of publications. If you give it to the new Member, he will have more than his fair share. It seems to me that justice to the retiring Member demands the passage of this resolution.

Mr. PERKINS. Mr. Speaker, I yield two minutes to the gentleman from North Dakota [Mr. MARSHALL].

Mr. MARSHALL. Mr. Speaker, this is simply a question of fair play. The question is whether the retiring Member shall have the privilege and the right of distributing his quota of documents for the full term for which he was elected, or whether there shall be taken away from him the right to distribute those documents for the greater part of a year. That is all there is to the question. In either event they go to the people. My successor is a nice gentleman, a personal friend of mine, and if this resolution passes there will be no reason why I can not share my documents with him if I desire, but it is up to me to say, and not the House, whether I want to do that or not. If you pass this resolution, you are taking away the right to distribute documents for the full term for which the retiring Members were elected.

Mr. COOPER of Wisconsin. Mr. Speaker, the gentleman talks about "my documents." As I understand it, they are paid for by the Public Treasury.

Mr. MARSHALL. I have not said my documents, but my right to distribute these documents. I say that you are taking away from the retiring Member his right to distribute those documents for his full term. Now, if I want to transfer them to my successor, that is my business, or if I want to send them to my constituents, that is also my business. In all fairness I hope the Members of the House will vote for this resolution.

Mr. MANN. Mr. Speaker, I yield one minute to the gentleman from Missouri [Mr. CAULFIELD.]

Mr. CAULFIELD. Mr. Speaker, I, too, am about to retire from Congress. I listened with great interest to the remarks of my colleague from Missouri [Mr. RUSSELL], but I think that for the very reasons that he stated for favoring this resolution I would vote against it. It seems to me that if we suffered an injustice by reason of the law that is no reason why we should visit that injustice upon our successors. I am going to be succeeded by a Democrat, but I feel that he has the right from the beginning of his term, as nearly as possible, to be the whole Congressman, and not have to refer matters to me, his predecessor.

I believe also that the distribution of documents is apt to be better done by a Member upon whom the responsibility of office directly rests than by one who, having retired from office, is apt to have become engrossed with other duties.

Mr. MANN. Mr. Speaker, I yield one minute to the gentleman from North Carolina [Mr. CRAWFORD].

Mr. CRAWFORD. Mr. Speaker, I happen to be one who is going out of this House against his will. [Laughter.] I have had experience heretofore for a long time, and in every instance when I have come here as a new Member I have found no documents to my credit; and the people at home have been asking me to send them documents, and, of course, I could only say that I had none. They do not know but that after the 4th of March, when the new Members come in, they have absolute control of everything in the way of publications. I happen to be succeeded by a Republican. I don't want him to have the experience I have had. I want nothing but that which belongs to me of right, nothing more, and when my successor comes here I want him to have every document that is published for a Member of Congress to distribute among his friends and constituents in the district. That is my feeling about it, and it is my judgment that he should have them

under the law. They do not belong to Members. It has been decided by an investigating committee of this House that the books do not belong to the Member, but to the district; and he is the agent simply to distribute these books and publications among the people at home, and therefore I can see no reason why the law should be changed. Why change it simply to keep a Member, who is going out, in contact with his people at home, as a matter of politics? There can be nothing else. [Applause.]

Mr. MANN. Mr. Speaker, I yield three minutes to the gentleman from New York [Mr. COCKRAN].

Mr. COCKRAN. Mr. Speaker, as an outgoing Member of Congress, my personal attitude toward this proposal has been fully described by the gentleman from Tennessee [Mr. GAINES], and the other Members who have spoken in the same vein. But it seems to me there is an aspect of this question which goes beyond the personal comfort or desires or interest of either the outgoing or the incoming Member, and that is the interest of the people of the United States in this distribution of government publications. I would be loath to believe that these documents are given to us for our own benefit, for our own personal delectation or to advance our individual political prospects. I prefer to believe, and I do believe, that they are intrusted to us as agents of this Government to be distributed among the people for their own benefit and enlightenment. Now, under our political system the terms of the Congress and the terms of each Member expire together, on March 4, and the new Congress ordinarily does not meet until the following December. There is an interval of several months after the end of an outgoing Member's term during which his successor has not been sworn into office and during which, therefore, he has not actively assumed his functions. Under those conditions it is entirely consistent with a sound public policy for the late Member, as a sort of holdover, to continue the distribution of public documents, not for his own benefit, but for the public benefit. When, however, an extra session brings the new Member into office and he is sworn in here, it becomes at once not only his right but his duty to charge himself with the distribution of every document printed by the Government to which the Representative from his district is entitled. It is no longer a question of authorizing a man who has been a Member to do something which he had been doing under the responsibility of his oath during an interim while his successor, the Member-elect, has not yet assumed his office in the sense of having qualified for it. It would be to exclude the fully qualified Member—the Member actually discharging his duty on the floor—from exercising one function of his office and to empower the man whom he has replaced and succeeded to continue the discharge of that particular public function, and I am opposed to any such reversal and confusion of functions, responsibilities, or privileges. [Applause.]

Mr. MANN. Mr. Speaker, I have only a word or two to say——

Mr. HUBBARD of West Virginia. Will the gentleman from Illinois be kind enough to state the existing law. Perhaps that has been done; if so, some of use have not been able to hear it.

Mr. MANN. Mr. Speaker, under the existing law, as I understand it, the ex-Member of Congress receives the public documents until the meeting of the first session of the ensuing Congress, so that if the Sixty-first Congress did not meet until the first Monday in December, the ex-Member of this Congress would be entitled to the public documents distributed through the folding room until that time, but as the next Congress will meet in extra session on the 15th of March, the rights of the ex-Member expires on the first day of the special session.

Mr. HUBBARD of West Virginia. And that law was in force when we were elected to this Congress.

Mr. MANN. Yes; and none of us declined an election—as a gentleman calls to my attention—not one of us declined an election because it was the general opinion that the special session would be called on the 15th of March. Some of the gentlemen who have spoken seem to think that these public documents are their private property, that they are printed by the Government as a perquisite to the Members of Congress, to be used for politics or any purpose they desire.

I have always considered that these public documents were printed for the public good, and they were only distributed by Members of Congress as a most convenient method of reaching the constituents in the different districts.

Mr. HAMILTON of Michigan. Mr. Speaker, will the gentleman permit a question?

Mr. MANN. I yield.

Mr. HAMILTON of Michigan. I simply want to ask the gentleman this question: How long has the retiring Member the franking privilege?

Mr. MANN. Until the 1st of December.

Mr. HAMILTON of Michigan. That is, for the purpose of distributing documents——

Mr. BARTLETT of Georgia. Mr. Speaker, will the gentleman permit——

Mr. MANN. Oh, it is a perquisite, maybe. I yield to the gentleman from Georgia.

I might say to the gentleman from Michigan [Mr. HAMILTON] that that is not for the purpose of distributing documents. The Member-elect has the franking privilege while the gentleman still occupies the seat.

Mr. HAMILTON of Michigan. The retiring Member's franking privilege applies to the distribution of all documents, as well as the sending of mail, does it not?

Mr. MANN. Yes; and the franking privilege applies to the Member-elect before his term of service commences.

Mr. HAMILTON of Michigan. I understand that.

Mr. BARTLETT of Georgia. I want to ask the gentleman if it is not possible to amend this resolution on account of the extraordinary session so as to apply to documents to be published, so that there will be sufficient for both the outgoing and the incoming Member? I do not think it would cost a great deal more.

Mr. MANN. Of course, Mr. Speaker, it is not practicable to do that under the terms of this resolution or the proposition to suspend the rules. The only way to do that would be to vote down this proposition, and then it might be reached. Now, Mr. Speaker, I yield whatever time I have remaining to the gentleman from New York [Mr. WALDO].

The SPEAKER. The gentleman has three minutes remaining.

Mr. WALDO. Mr. Speaker, I am one of the retiring Members, but I am opposed to this as I am to all legislation or resolutions for the benefit of particular persons. Because there happen to be 77 Members instead of 1 retiring from this Congress is no reason for changing the general law for the benefit of these particular persons. It is not the less special legislation in derogation of existing general law to give especial benefits to specified individuals.

The public documents published or ordered published during the Sixtieth Congress were not intended as personal emolument for the Members of that Congress, but for the information and instruction of the people of their districts. It is of no moment to the people as to whether the incoming or the outgoing Member answer their requests for public documents.

I am opposed to this proposed change in existing law and shall vote against it.

Mr. PERKINS. Mr. Speaker, I yield the balance of my time to the gentleman from Nebraska [Mr. NORRIS].

Mr. NORRIS. Mr. Speaker, it seems to me that the passage of this resolution is but an act of common justice. I would not do an injustice to the incoming Member; neither would I do an injustice to the outgoing Member. These gentlemen who have argued against the passage of the resolution have rather, I think, assumed that it was a proposition to change the permanent law. Now, if we had before us a proposition to change the law and let the documents be assigned by the men who went into the office at and from the time he actually went in—that is, from March 4—I would be in favor of it. But the defeat of this resolution will not change the general law, and we will come back after the coming Congress with men distributing documents up to the 1st of December, after they have gone out. Now, as a matter of fact——

Mr. DOUGLAS. Will the gentleman yield?

Mr. NORRIS. In a moment I will. As a matter of fact, I have in mind several instances of where men have been elected to this Congress for the first time. They got no documents to distribute until in December, more than one year following the time of their election. If this resolution does not pass, those men will lose that right on the 15th of March, giving them but a little more than one year of distribution of documents. Everybody will admit that is an injustice to them.

But that is not the end of it. Their successors, instead of having a distribution of documents for two years, the length of their terms, unless a special session of Congress should take it away, will have the right to distribute documents for nearly three years, although they may never be reelected to succeed themselves.

I submit, gentlemen, that it is nothing more than fair, both to the outgoing man and to the incoming man, that this resolution should pass, and that these Members who go out should be put on the same basis with Members who have gone out before, and that the Members who come in should be put on the same basis with all the balance of the Members who have come in.

I want to call your attention also to the fact that this resolution provides that such documents as are printed for the Sixty-first Congress and issued before the December following will be distributed by the incoming Member, giving him an advantage that his predecessor did not have and that none of the Members now have, and that Members who follow him, unless there is another special session, will have.

Mr. DOUGLAS. Will the gentleman yield?

Mr. NORRIS. I yield to the gentleman.

Mr. DOUGLAS. If this does not change existing law, what is the use of passing it?

Mr. NORRIS. It does not change permanent law, but it makes a change as to the distribution of documents from now until December.

Mr. DOUGLAS. It suspends?

Mr. NORRIS. It changes the law to that effect. I want to say to the gentleman that if it was a proposition to change permanent law and give the man who went in the right of distribution from March 4, I would vote for it. I would put everybody on an equal basis.

Mr. DOUGLAS. Did not the Members of Congress know what the law was when they were elected?

Mr. NORRIS. I suppose they did. They did not know that there was to be an extra session of Congress, though.

The SPEAKER. All time has expired.

The question is on suspending the rules and passing the joint resolution.

The question was taken, and the Speaker announced that the noes seemed to have it.

Mr. PERKINS. Division, Mr. Speaker.

The House divided; and there were—ayes 240, noes 81.

Mr. MANN. I ask for the yeas and nays.

The question was taken on ordering the yeas and nays.

The SPEAKER. Twenty-two gentlemen have arisen; not a sufficient number. The yeas and nays are refused; the ayes have it; the rules are suspended, and the joint resolution is passed.

APPALACHIAN AND WHITE MOUNTAIN FOREST RESERVE.

Mr. WEEKS. Mr. Speaker, I move to suspend the rules and pass the Senate bill 4825, as amended; that there be one hour and twenty minutes provided for debate on this question, the time to be equally divided between the gentleman from Kansas [Mr. SCOTT] and myself.

Mr. MANN. I make the point of order that that motion is not in order.

The SPEAKER. The gentleman will state his point of order.

Mr. MANN. The rule provides for the length of time debate shall be had on a motion to suspend the rules; and the motion to suspend the rules is made under that rule which provides for the length of time. I make the point of order that it is not in order to make a motion to suspend the rules under the rule of the House, which motion eliminates the rule itself. I have no objection to the gentleman asking unanimous consent.

The SPEAKER. The Chair is inclined to the opinion that the point of order is well taken. Possibly the gentleman could obtain unanimous consent.

Mr. WEEKS. Mr. Speaker, I move to suspend the rules and pass the Senate bill 4825 as amended. Pending that motion, Mr. Speaker, I ask unanimous consent that an hour and twenty minutes be had for debate on this question, forty minutes on a side, to be controlled by the gentleman from Kansas [Mr. SCOTT] and myself.

The SPEAKER. Is there objection?

Mr. MADDEN. Reserving the right to object, I would like to know what this bill is.

The SPEAKER. It is popularly known as the "Appalachian forestry bill." Is there objection to the request of the gentleman from Massachusetts as to the time for debate?

Mr. MADDEN. Reserving the right to object, I want to ask what this bill provides and whether there will be any opportunity for amendment to the bill while it is under consideration?

Mr. WEEKS. This bill is to be considered under a suspension of the rules, and there will be no opportunity for amendment.

The SPEAKER. The gentleman now asks unanimous consent that the time for debate be an hour and twenty minutes.

Mr. MADDEN. I propose to object unless we can have more time.

Mr. WEEKS. There will be an hour and twenty minutes instead of the forty minutes.

Mr. MADDEN. Mr. Speaker, I think an hour and twenty minutes is not sufficient time to be allowed for debate on an important question like this. Here is a question involving two millions every year.

Mr. WEEKS. One million dollars.

Mr. MADDEN. As a minimum, and I do not know what it will be in the years to come. It is too important a question to be decided in an hour and twenty minutes, and unless we can have more time I shall have to object. There ought to be sufficient time so that every Member of the House will understand the question.

The SPEAKER. Is there objection to the request touching debate of an hour and twenty minutes?

Mr. MADDEN. I ask unanimous consent, Mr. Speaker, that debate be continued for two hours and a half upon this question.

The SPEAKER. Is there objection?

Mr. MANN. I object.

Mr. MADDEN. Then I ask that it be two hours.

The SPEAKER. Is there objection to two hours of debate? [After a pause.] The Chair hears none.

Mr. MADDEN. To be controlled by the gentleman from Kansas [Mr. SCOTT] and the gentleman from Massachusetts [Mr. WEEKS].

The SPEAKER. The Clerk will report the bill. Without objection, the Clerk will report the substitute for the Senate bill.

The Clerk read as follows:

A bill (S. 4825) for acquiring national forests in the Southern Appalachian Mountains and White Mountains.

Be it enacted, etc., That the consent of the Congress of the United States is hereby given to each of the several States of the Union to enter into any agreement or compact, not in conflict with any law of the United States, with any other State or States, for the purpose of conserving the forests and the water supply of the States entering into such agreement or compact.

SEC. 2. That the sum of $100,000 is hereby appropriated and made available until expended, out of any moneys in the National Treasury not otherwise appropriated, to enable the Secretary of Agriculture to cooperate with any State or group of States, when requested to do so, in the protection from fire of the forested watersheds of navigable streams, and the Secretary of Agriculture is hereby authorized, and on such conditions as he deems wise, to stipulate and agree with any State or group of States to cooperate in the organization and maintenance of a system of fire protection on any private or state forest lands within such State or States and situated upon the watershed of a navigable river: *Provided*, That no such stipulation or agreement shall be made with any State which has not provided by law for a system of forest-fire protection: *Provided further*, That in no case shall the amount expended in any State exceed in any fiscal year the amount appropriated by that State for the same purpose during the same fiscal year.

SEC. 3. That the Secretary of Agriculture, for the further protection of the watersheds of said navigable streams, may, in his discretion, and he is hereby authorized, on such conditions as he deems wise, to stipulate and agree to administer and protect for a definite term of years any private forest lands situated upon any such watershed whereon lands may be permanently reserved, held, and administered as national forest lands; but such stipulation or agreement shall provide that the owner of such private lands shall cut and remove the timber thereon only under such rules and regulations, to be expressed in the stipulation or agreement, as will provide for the protection of the forest in the aid of navigation: *Provided*, That in no case shall the United States be liable for any damage resulting from fire or any other cause.

SEC. 4. That from the receipts accruing from the sale or disposal of any products or the use of lands or resources from public lands, now or hereafter to be set aside as national forests, that have been or may hereafter be turned into the Treasury of the United States and which are not otherwise appropriated, there is hereby appropriated for the fiscal year ending June 30, 1909, the sum of $1,000,000, and for each fiscal year thereafter a sum not to exceed $2,000,000, for use in the examination, survey, and acquirement of lands located on the headwaters of navigable streams or those which are being or which may be developed for navigable purposes: *Provided*, That the provisions of this section shall expire by limitation on the 30th day of June, 1919.

SEC. 5. That a commission, to be known as the National Forest Reservation Commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, and one Member of the Senate, to be selected by the President of the Senate, and one Member of the House of Representatives, to be selected by the Speaker, is hereby created and authorized to consider and pass upon such lands as may be recommended for purchase as provided in section 6 of this act, and to fix the price or prices at which such lands may be purchased, and no purchases shall be made of any lands until such lands have been duly approved for purchase by said commission: *Provided*, That the members of the commission herein created shall serve as such only during their incumbency in their respective official positions; and any vacancy on the commission shall be filled in the manner as the original appointment.

SEC. 6. That the commission hereby appointed shall, through its president, annually report to Congress, not later than the first Monday in December, the operations and expenditures of the commission, in detail, during the preceding fiscal year.

SEC. 7. That the Secretary of Agriculture is hereby authorized and directed to examine, locate, and recommend for purchase such lands as in his judgment may be necessary to the regulation of the flow of navigable streams, and to report to the National Forest Reservation Commission the results of such examinations: *Provided*, That before any lands are purchased by the National Forest Reservation Commission said lands shall be examined by the Geological Survey and a report made to the Secretary of Agriculture, showing that the control of such lands will promote or protect the navigation of streams on whose watersheds they lie.

SEC. 8. That the Secretary of Agriculture is hereby authorized to purchase, in the name of the United States, such lands as have been approved for purchase by the National Forest Reservation Commission at the price or prices fixed by said commission: *Provided*, That no deed or other instrument of conveyance shall be accepted or approved by the Secretary of Agriculture under this act until the legislature of the State in which the land lies shall have consented to the acquisition of such land by the United States for the purpose of preserving the navigability of navigable streams.

SEC. 9. That the Secretary of Agriculture may do all things necessary to secure the safe title in the United States to the lands to be acquired under this act; but no payment shall be made for any such lands until the title shall be satisfactory to the Attorney-General and shall be vested in the United States.

SEC. 10. That such acquisition may in any case be conditioned upon the exception and reservation to the owner, from whom title passes to the United States, of the minerals and of the merchantable timber, or either or any part of them, within or upon such lands at the date of the conveyance; but in every case such exception and reservation, and the time within which such timber shall be removed, and the rules and regulations under which the cutting and removal of such timber and the mining and removal of such minerals shall be done shall be expressed in the written instrument of conveyance, and thereafter the mining, cutting, and removal of the minerals and timber so excepted and reserved shall be done only under and in obedience to the rules and regulations so expressed.

SEC. 11. That whereas small areas of land chiefly valuable for agriculture may of necessity or by inadvertence be included in tracts acquired under this act, the Secretary of Agriculture may, in his discretion, and he is hereby authorized, upon application or otherwise, to examine and ascertain the location and extent of such areas as in his opinion may be occupied for agricultural purposes without injury to the forests or to stream flow and which are not needed for public purposes, and may list and describe the same by metes and bounds, or otherwise, and offer them for sale as homesteads at their true value, to be fixed by him to actual settlers, in tracts not exceeding 80 acres in area, under such joint rules and regulations as the Secretary of Agriculture and the Secretary of the Interior may prescribe; and in case of such sale the jurisdiction over the lands sold shall, ipso facto, revert to the State in which the lands sold lie. And no right, title, interest, or claim in or to any lands acquired under this act, or the waters thereon, or the products, resources, or use thereof after such lands shall have been so acquired, shall be initiated or perfected, except as in this section provided.

SEC. 12. That, subject to the provisions of the last preceding section, the lands acquired under this act shall be permanently reserved, held, and administered as national forest lands under the provisions of section 24 of the act approved March 3, 1891 (vol. 26, Stat. L., p. 1103), and acts supplemental to and amendatory thereof. And the Secretary of Agriculture may from time to time divide the lands acquired under this act into such specific national forests and so designate the same as he may deem best for administrative purposes.

SEC. 13. That the jurisdiction, both civil and criminal, over persons upon the lands acquired under this act shall not be affected or changed by their permanent reservation and administration as national forest lands, except so far as the punishment of offenses against the United States is concerned, the intent and meaning of this section being that the State wherein such land is situated shall not, by reason of such reservation and administration, lose its jurisdiction nor the inhabitants thereof their rights and privileges as citizens or be absolved from their duties as citizens of the State.

SEC. 14. That 25 per cent of all moneys received during any fiscal year from each national forest into which the lands acquired under this act may from to time be divided shall be paid, at the end of such year, by the Secretary of the Treasury to the State in which such national forest is situated, to be expended as the state legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which such national forest is situated: *Provided*, That when any national forest is in more than one State or county the distributive share to each from the proceeds of such forest shall be proportional to its area therein: *Provided further*, That there shall not be paid to any State for any county an amount equal to more than 40 per cent of the total income of such county from all other sources.

SEC. 15. That a sum sufficient to pay the necessary expenses of the commission and its members, not to exceed an annual expenditure of $25,000, is hereby appropriated, out of any money in the Treasury not otherwise appropriated. Said appropriation shall be immediately available, and shall be paid out on the audit and order of the president of the said commission, which audit and order shall be conclusive and binding upon all departments as to the correctness of the accounts of said commission.

Amend the title so as to read "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers."

The SPEAKER. Is a second demanded?

Mr. SCOTT. Mr. Speaker, I demand a second.

The SPEAKER. A second under the rules is ordered. The gentleman from Massachusetts [Mr. WEEKS] has one hour, and the gentleman from Kansas [Mr. SCOTT] one hour.

Mr. WEEKS. Mr. Speaker, this bill, as reported from the Agricultural Committee by a vote of 11 to 7, is an amendment of Senate bill 4825, entitled "An act for acquiring national forests in the Southern Appalachian Mountains and White Mountains," the title of the act being changed to conform to the report made by the Judiciary Committee in May, 1908, so that it reads:

An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers.

All of the Senate bill after the enacting clause has been struck out and the House bill substituted as an amendment.

Section 1 of this bill will enable any number of the several States of the Union to enter into an agreement among themselves for the purpose of conserving forests and water supply in connection therewith.

Mr. OLMSTED. Will it interrupt the gentleman right there, before he passes to another subject, to ask him a question.

Mr. WEEKS. I shall be glad to yield to the gentleman, although I have very little time.

Mr. OLMSTED. I see there is a provision in this bill, that one State may join with another for the purpose of conservation of forestry and water flow. Does that mean that if the gentleman from Massachusetts holds a private forest in his State, and in Pennsylvania I own a private forest, those States may agree touching our private forests?

Mr. WEEKS. The intention of that section is that States located as are the New England States may form an association to protect the forests and the stream flow in those States. For instance, all of the lands that could, under any circumstances, be purchased under the provisions of this bill in the New England States are located in the State of New Hampshire. The rivers which are navigable in New England rise in the White Mountains, in the State of New Hampshire, but the water power on those rivers and their navigability are beneficial to the five New England States.

Mr. OLMSTED. Does the gentleman understand that this bill would authorize the States to agree touching the management of forests in private ownership, not purchased by the States or by the Government?

Mr. WEEKS. I think the gentleman will see in another section an application which will answer his question, if he has not already read the bill. Provision is made, as I will explain a little further, for that purpose.

Mr. BARTLETT of Georgia. Will the gentleman yield for a question?

Mr. WEEKS. I am perfectly willing to answer questions; but the time is so limited that I must ask that the questions be definite, so I need not devote much time to them.

Mr. BARTLETT of Georgia. I only wish to ask the gentleman a question with reference to this bill. Section 14 provides for the distribution of money arising from revenue from the national forest reserve that you have got here. That is distributed now for certain purposes—for schools and public roads.

Mr. WEEKS. No; it is not. That money now goes into the Treasury.

Mr. BARTLETT of Georgia. I say under this bill.

Mr. WEEKS. I say under this bill 75 per cent of the receipts will go for that purpose and 25 per cent will go to the States where the lands are located.

Mr. BARTLETT of Georgia. It does not go to the State; it only goes to the counties of the State wherein the mountains are situated, for public roads and for school purposes.

Mr. WEEKS. The purpose in making that reservation is that the immediate sections where these lands are located may receive this benefit in lieu of taxes, which otherwise they would receive from the lands which are set aside.

Mr. BARTLETT of Georgia. Are not the citizens of the counties where the lands are situated to be benefited by the purchase of those lands by the Government at a somewhat increased price?

Mr. WEEKS. I will say frankly that I think they are. That reservation was made to conform to the method followed in all national reserves as they now exist. That is the law which applies to the national reserves.

Mr. OLMSTED. I want to ask the gentleman one direct question in the line of the former one. Will this bill authorize any two States to enter into an agreement which will prevent the private owner of forest lands from removing his timber as he sees fit?

Mr. WEEKS. I do not understand so.

Section 2 provides an appropriation of $100,000 to assist in fire protection. It is the purpose in this section that none of this money shall be spent in any State which has not provided itself with an efficient fire-protection law, presumably a law to be approved by the Agricultural Department; and, in addition, that none of it shall be spent in a State which does not make an equivalent appropriation for the same purpose, the intention being to create an interest among the States themselves in protecting public and private forests, preventing the enormous destruction from forest fires which occurs every year. Many States have already taken the initiative in this matter and have not only provided fire-protection service, with an appropriation to carry it out, but, in addition, have provided by law that railroads, which are among the principal offenders in setting fires, shall be held responsible for the fires which can be traced to sparks from locomotives. Other States have limited the right of hunters and others to visit unprotected tracts of timber land during unusually dry times and in other ways are, as far as possible within their own resources, assisting in carrying out the purposes of this section.

Mr. VREELAND. Will the gentleman explain what is the nature of the compact that may be entered into between the States?

Mr. WEEKS. That is a matter to be determined by the Secretary of Agriculture.

Mr. VREELAND. Does that contemplate the expenditure of money by the States in acquiring land, or is the money to be furnished by the Government?

Mr. WEEKS. That would depend upon the arrangement made by the Secretary of Agriculture.

Section 3 provides the method by which the Secretary of Agriculture may take over and administer tracts of private lands, providing a scheme for their development, methods of cutting, and so forth, enabling thereby the owner to get the benefit of the experience of the Agricultural Department and at the same time insuring a systematic protection to these tracts of land which will be beneficial to the neighborhood where they lie. The United States, however, is not to be held liable for any damage resulting from fire, or from any other cause, in cases where such arrangements are undertaken.

Section 4 provides a fund, to be taken from forestry receipts, to purchase lands located on or near the headwaters of navigable streams for the protection of the navigation of those streams, this fund to be $1,000,000 for the first year and two millions each succeeding year for the following nine years, this particular section to expire by limitation in the year 1919. The receipts from the Forestry Service since the transfer of this service to the Department of Agriculture, February 1, 1905, have been as follows:

For the fiscal year ending June 30, 1905	$60,142.62
For the fiscal year ending June 30, 1906	767,219.96
For the fiscal year ending June 30, 1907	1,571,059.44
For the fiscal year ending June 30, 1908	1,788,921.85

It will be noted that 1905 was but for five months.

And it is estimated that the receipts for the current year will reach something over $2,000,000. These receipts are obtained principally from two sources; from the sales of timber and from grazing privileges. Of these, the sales of timber are something over one million annually, and the receipts from grazing will amount to about $800,000 this year. It is pretty definitely determined that the grazing privileges do not bring more than about one-third the amount obtained by private owners for similar grazing lands in the same neighborhood, so that the grazing receipts should easily amount to two millions annually, and probably more, if the rate were raised to correspond to the going rates in the particular neighborhood where the lands are located. The receipts from the sales of timber are somewhat less, probably 20 per cent less, than those obtained from private owners; but, without taking account of this condition, it is estimated that less than one-half of 1 per cent of the available timber on government reservations is removed each year and that at least five times that amount could be taken off annually if there were suitable roads and methods of so doing, without in any way injuring the value of the forests. Therefore it is safe to assume that when suitable roads are completed and the forests are developed to obtain the best obtainable results, the receipts from timber land would be about five millions, or a net return of at least seven millions annually. As the expenditures for this bureau have not yet reached four millions, it can be seen that this would insure a handsome net revenue at once; and even following the methods which are now in vogue and developing the service as the present appropriations will enable the bureau to do, it is probable that in five years' time the net receipts from the bureau will be sufficient to provide this fund.

It has been urged that using the receipts from the Forestry Service is practically equivalent to using a direct appropriation for the same purpose. This is true to this extent. The receipts are now turned into the Treasury for general purposes, but using these receipts prevents the criticism which might be urged against the purchase of land by using moneys raised by direct taxation. Furthermore, it seems to me businesslike that the Government should use the receipts from this service to develop the service and add to it wherever the development will insure aid to so many valuable governmental purposes.

Mr. VREELAND. Will the gentleman yield?

Mr. WEEKS. I will yield to the gentleman from New York.

Mr. VREELAND. Suppose the hopes of the gentleman do not materialize; is this appropriation limited to the receipts from the service, or would the deficit, if any, have to come out of the Public Treasury?

Mr. WEEKS. It is limited to the receipts from the service—the gross receipts, but not the net receipts.

Mr. HUMPHREY of Washington. Will the gentleman yield to me for a question?

Mr. WEEKS. Certainly.

Mr. HUMPHREY of Washington. The gentleman from Massachusetts speaks of the cost being limited to these receipts. He refers simply to the money that shall be used for the purchase of the land?

Mr. WEEKS. Yes.

Mr. HUMPHREY of Washington. In the administration of it, in the administration of the forest reserves generally with the State, and in the administration of private forests by the Government, you are not limited to the receipts that come from the forest reserves, but may take them out of the National Treasury.

Mr. WEEKS. Mr. Speaker, the gentleman from Washington is right to this extent: It is proposed that the money for the purchase of the land shall be taken from the gross receipts from the Forestry Service.

Section 5 provides a commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, a Member of the Senate, and a Member of the House, to act as a commission to determine the method of carrying out the purposes of this act; where land shall be purchased, if at all; the prices paid; and all other incidents to the exploitation of forests obtained as proposed in this act; and an appropriation of $25,000 is provided for the expenses of the commission.

Mr. OLLIE M. JAMES. Will the gentleman yield?

Mr. WEEKS. Certainly.

Mr. OLLIE M. JAMES. How are the Members which the gentleman speaks of as appointed by the President of the Senate and the Speaker of the House to be divided—politically, or are they not to be divided?

Mr. WEEKS. There is no provision in the bill, but I should hope that they would be divided between the two parties.

Mr. OLLIE M. JAMES. How can you divide them if there is only one to be appointed?

Mr. WEEKS. The one from the House might be of one party and the one from the Senate the other.

Mr. MONDELL. Will the gentleman yield for a question?

Mr. WEEKS. Certainly.

Mr. MONDELL. How does the gentleman expect to secure anything from the proceeds of the Forestry Service at a time when the Forestry Service is spending several millions more than the receipts from the service?

Mr. WEEKS. Mr. Speaker, if the gentleman from Wyoming [Mr. MONDELL] had listened to what I said, he would have known that I am not anticipating any net receipts at once, but I do believe that in the course of three or four or five years there will be net receipts sufficient to provide for this fund.

Mr. GRAFF. How are these lands to be purchased by the commission, by private sale or condemnation, or both?

Mr. WEEKS. Either way.

Mr. GRAFF. They have the power to condemn?

Mr. WEEKS. Yes.

Section 7 of the bill provides that the Secretary of Agriculture shall examine, locate, and recommend for purchase lands which may regulate the flow of navigable streams, and report the result of these examinations to the National Forest Reservation Commission, provided that before lands are recommended for purchase they shall be examined by the Geological Survey and a report made to the Secretary of Agriculture, showing in what way the control of these lands will promote or protect the navigation of streams.

This is an important proviso, because it limits purchases to the constitutional requirements, as enunciated by the Judiciary Committee of the House in its report of May, 1908. But the question has been raised whether the Geological Survey is the proper bureau to give advice relative to the effect of forests on stream flow, the suggestion having been made that the Engineer Corps of the Army might properly be intrusted with this duty. I am confident that the Geological Survey is the proper organization for this work. The hydrographic branch of this survey was organized twenty-one years ago, since which time definite appropriations have been made annually to carry out its work. It has recorded, during the last fifteen years, the maximum, minimum, and mean discharges of all the more important rivers, and for shorter periods the same facts concerning all the lesser tributaries of the many hundreds of streams in the United States. These results have been assembled and studied, and the flow of streams has been compared with the precipitation, as shown by the records of the Weather Bureau, and a vast amount of valuable data connected with forestation, etc., has been compiled. To make these reports does not involve any knowledge of inland water navigation or engineering questions relating thereto, as heretofore defined by law and interpreted by the Corps of Engineers.

The Government has invested forty-two millions in irrigation systems in the arid West, the whole integrity of which is based on the studies made by the Geological Survey, and the survey itself has on hand at the present time a large portion of the information which will be made necessary by the requirements of section 7. Its organization is complete, its men are specialists in this line, and it would therefore be a waste of material

and poor business policy to attempt to develop this work through some other channel or some other bureau of the Government.

Under the law the relative duties of the Geological Survey and the Engineer Corps, respectively, are very definitely defined. In the sundry civil appropriation bill of 1897–98 the following proviso was made for the Geological Survey:

For the survey of the public lands that have been, or may hereafter be, designated as forest reserves by executive proclamation * * * the surveys herein provided for shall be under the supervision of the Director of the Geological Survey.

While the provision for the Engineer Corps' connection with surveys and examinations of rivers was provided in the act approved July 27, 1868, as follows:

Be it resolved, etc., That the Secretary of War shall cause to be prepared and submit to Congress in connection with the reports of examinations and surveys of rivers and harbors hereafter made by order of Congress full statements of all existing facts tending to show to what extent the general commerce of the country will be promoted by the several works of improvement contemplated by such examinations and surveys, to the end that the public moneys shall not be applied except where such improvements shall tend to subserve to the general commercial and navigation interests of the United States.

It must be apparent to anyone that the surveys to be performed by the Engineer Corps under this statute are limited to those sections of rivers and harbors which are navigable, and that any other examinations made, for any purpose, of rivers and streams must be under the direction of the Geological Survey; and it should be noticed that the proviso in section 7 will prevent the purchase of any land by the commission unless the Geological Survey shows the connection between forestry and stream flow, so that the constitutional objection which was raised to the original Senate bill has been amply provided for.

Mr. COX of Indiana. Will the gentleman yield for a question?

Mr. WEEKS. Yes.

Mr. COX of Indiana. Can the gentleman inform the House or give us some idea as to the approximate cost it will be on the part of the Government to maintain these reserves?

Mr. WEEKS. I can not give any estimate of that because I do not know how many parcels of land will be purchased.

Mr. COX of Indiana. If the purpose of this bill be carried out, and nineteen or twenty million dollars be invested?

Mr. WEEKS. It would be all guesswork.

Mr. COX of Indiana. Would not the gentleman say it would be enormous?

Mr. WEEKS. Oh, no.

Mr. VREELAND. I would like to ask the gentleman a little more about the appropriation part of this bill. The appropriation for the general Forestry Service is now carried in the appropriation bill.

Mr. WEEKS. Yes.

Mr. VREELAND. The expenditure is now a considerable amount more than the income.

Mr. WEEKS. It is about $4,000,000.

Mr. VREELAND. The balance comes out of the Treasury of the United States?

Mr. WEEKS. Yes.

Mr. VREELAND. I would ask the gentleman, then, this being a special bill, under the ruling of the comptroller, would not this take precedence as a claim upon this fund; and would not this have to be paid out first, thus necessitating a still larger appropriation for whatever the amount taken under this law is, which would have to be added to the appropriation bill for the next year?

Mr. WEEKS. Not a larger appropriation, Mr. Speaker. The appropriation for the Forestry Service this year is about four million. The receipts, after taking out 25 per cent, which goes to the localities, would be about a million and a half, so that the net appropriation this year is two and one-half millions. Of course, if a million of that is taken for this purpose, it would leave only a half million to offset the four millions appropriated for the Forestry Service.

Mr. VREELAND. Would not that mean a half million more appropriation from the Treasury?

Mr. WEEKS. It would not mean any larger appropriation than is now made.

Mr. REEDER. Would it decrease the amount available to take care of the forests as they are?

Mr. WEEKS. No.

Mr. REEDER. I do not understand, if there are two millions and a half appropriated now and a million is received and we make an arrangement to appropriate two million more, how we can make that sum less or the appropriation greater.

Mr. WEEKS. The appropriation would not be any greater, but the net appropriation would necessarily be greater. The gross would not.

Mr. REEDER. The amount to be used in the forests as they are would be left—the two million?

Mr. WEEKS. Not at all.

Mr. REEDER. Then I do not understand.

Mr. WEEKS. The appropriation is now four millions of dollars, in round figures. The receipts are one and a half millions. Those receipts go into the Treasury, and it thus leaves a net appropriation of two and a half millions, which comes out of the Treasury this year. If a million of that were taken, it would require three and a half million to come out of the Treasury, but the gross appropriation would not be any larger. It would simply mean that the amount which would come from the Treasury other than receipts from the Forestry Service would be a million dollars greater.

Mr. REEDER. The receipts from the Forestry Service would be a million dollars less, surely. You can not have the money and spend it, too.

Mr. WEEKS. Mr. Speaker, if I have not explained it, I can not.

Section 8 provides for the method of purchase, and stipulates that lands shall not be taken over and paid for until the legislature of the State in which they are located has provided legislation consenting to the acquisition of such lands by the United States for the purpose of preserving the navigability of navigable streams.

Section 9 provides that lands shall not be taken over until the title to the lands has been approved by the Attorney-General of the United States.

Section 10. In many cases there are large tracts of heavily timbered lands, the purchase of which would entail such a large expenditure of money that the appropriation would cover comparatively little territory. In order to obviate the necessity of the purchase of this timber, section 10 provides a method by which the United States can take over the title to the land, excepting the minerals and merchantable timber, which may be reserved by the owner and removed by him under restrictions and stipulations provided by the department. This will apparently answer the purpose of purchase and at the same time enable the spreading over a much larger area of the appropriations made.

As it is not the purpose of this act to purchase lands which may be valuable for agricultural purposes, but only those lands which are unfit for any other purpose than forestry, except in unusual cases, section 11 provides a method of disposing of agricultural lands which may be acquired either by inadvertence or through necessity in purchasing a large area.

As it is not intended to change the jurisdiction, either civil or criminal, over persons upon the lands acquired under this act, other than offenders against the United States, section 13 provides that this jurisdiction shall not be affected or changed, the purpose of this section being that the State in which the land is situated shall continue its jurisdiction, and that the inhabitants shall retain all their rights and privileges as citizens, and not be absolved from their duty as citizens of the State.

Section 14 carries out the present application of moneys obtained as receipts from the Forestry Service; that is, it divides the receipts into four parts, three-fourths of which shall go into the Treasury of the United States as a general fund and one-fourth shall be paid to the State in which the lands are situated, the purpose being that the revenues of the State and locality where these lands are situated shall not be decreased on account of their taking over by the General Government.

DEMAND FOR FORESTRY LEGISLATION.

The demand for the protection of forests, and the connection which they have with river flow, has been expressed in so many different ways, at so many different times, and by so many different interests that it is impossible to even give a list of them; but it is worth while to call attention to an important hearing before the Agricultural Committee of the House of Representatives in the winter of 1908, at which hearing there appeared representatives of the National Board of Trade; of the Massachusetts Institute of Technology; of the National Association of Cotton Manufacturers; of the American Institute of Electrical Engineers; of many power development companies; of the Arkwright Club, which represents a majority of the cotton manufacturers of New England; of the American Society of Electrical Engineers; the governor of Georgia; the governor of New Hampshire; and representatives of a large number of business associations of a somewhat less, but great local, importance. Representatives from 20 States appeared at this hearing. Among the resolutions which have been presented to Congress at different times, requesting the immediate establishment of reservations, especially in the White and Appalachian Mountains, are those from the National Board of Trade, the Convention for the Extension of Foreign commerce, the National Wholesale Lumber Dealers' Association, the American Paper and Pulp Association, the National Slack Cooperage Manufacturers' Association, the American Forest Congress, the American

Institute of Electrical Engineers, the American Society of Civil Engineers, the National Association of Carriage Builders and Furniture Manufacturers, the American Forestry Association, the National Federation of Women's Clubs, the American Civic Association, the Appalachian National Park Association, the American Association for the Advancement of Science, the National Association of Cotton Manufacturers, resolutions from many state legislatures, and an endless number from State and city boards of trade, fruit and produce exchanges, agricultural societies, power companies, universities, and municipal and local bodies.

RECOMMENDATIONS BY GOVERNMENT OFFICIALS AND COMMISSIONS.

January 3, 1901, in a report to the President, the Secretary of Agriculture recommended the purchase of lands in the Appalachian Range, this report being based on investigations made by the Geological Survey and the Forestry Bureau, and, in the language of the Secretary, the recommendation of purchase was made for the following reasons:

The rapid consumption of our timber supplies, the extensive destruction of our forests by fire, and the resulting increase in the irregularity of the flow of water in important streams have served to develop among the people of this country an interest in forest problems which is one of the marked features of the close of the century. In response to this growing interest, the Government has set aside in the western forest reserves an area of more than 70,000 square miles. There is not a single government forest reserve in the East.

In President Roosevelt's first message to Congress, in 1901, he referred to this question in the following language:

The wise administration of the forest reserves will be not less helpful to the interests which depend on water than to those which depend on wood and grass. The water supply itself depends upon the forest. In the arid region it is water, not land, which measures production. The western half of the United States would sustain a population greater than that of our whole country to-day if the waters that now run to waste were saved and used for irrigation. The forest and water problems are perhaps the most vital internal questions of the United States.

The forests are natural reservoirs. By restraining the streams in flood and replenishing them in drought they make possible the use of waters otherwise wasted. They prevent the soil from washing, and so protect the storage reservoirs from filling up with silt. Forest conservation is, therefore, an essential condition of water conservation.

The storing of the floods in reservoirs at the headwaters of our rivers is but an enlargement of our present policy of river control, under which levees are built on the lower reaches of the same streams.

The Government should construct and maintain these reservoirs as it does other public works. Where their purpose is to regulate the flow of streams, the water should be turned freely into the channel in the dry season, to take the same course under the same laws as the natural flow.

In his annual message to Congress December 2, 1902, the President once more refers to this subject, as follows:

Few subjects of more importance have been taken up by the Congress in recent years than the inauguration of the system of nationally aided irrigation for the arid regions of the Far West. A good beginning therein has been made. Now that this policy of national irrigation has been adopted, the need of thorough and scientific forest protection will grow more rapidly than ever throughout the public-land States.

In his annual message to Congress December 7, 1903, President Roosevelt uses this language:

The study of the opportunities of reclamation of the vast extent of arid land shows that whether this reclamation is done by individuals, corporations, or the State, the sources of water supply must be effectively protected and the reservoirs guarded by the preservation of the forests at the headwaters of the streams. The engineers making the preliminary examinations continually emphasize this need, and urge that the remaining public lands at the headwaters of the important streams of the West be reserved to insure permanency of water supply for irrigation. Much progress in forestry has been made during the past year. The necessity for perpetuating our forest resources, whether in public or private hands, is recognized now as never before. The demand for forest reserves has become insistent in the West, because the West must use the water, wood, and summer range which only such reserves can supply. Progressive lumbermen are striving, through forestry, to give their business permanence. Other great business interests are awakening to the need of forest preservation as a business matter. The Government's forest work should receive from the Congress hearty support, and especially support adequate for the protection of the forest reserves against fire. The forest-reserve policy of the Government has passed beyond the experimental stage and has reached a condition where scientific methods are essential to its successful prosecution.

In his annual message to Congress December 6, 1904, President Roosevelt refers to this subject in the following words:

They are of special importance because they preserve the water supply and the supply of timber for domestic purposes, and so promote settlement under the reclamation act. Indeed, they are essential to the welfare of every one of the great interests of the West.

Forest reserves are created for two principal purposes. The first is to preserve the water supply.

The second reason for which forest reserves are created is to preserve the timber supply for various classes of wood users.

In his annual message to Congress December 3, 1906, the President uses the following language:

Much is now being done for the States of the Rocky Mountains and Great Plains through the development of the national policy of irrigation and forest preservation; no government policy for the betterment of our internal conditions has been more fruitful of good than this. The forests of the White Mountains and Southern Appalachian regions should also be preserved; and they can not be unless the people of the States in which they lie, through their representatives in the Congress, secure vigorous action by the National Government.

December 3, 1907, the President again referred to this subject, using the following language:

The government dams should be used to produce hundreds of thousands of horsepower as an incident to improving navigation, for the annual value of the usused water power of the United States perhaps exceeds the annual value of the products of all our mines. As an incident to creating the deep waterway down the Mississippi, the Government should build along its whole lower length levees which, taken together with the control of the headwaters, will at once and forever put a complete stop to all threat of floods in the immensely fertile delta region.

But there are certain other forms of waste which could be entirely stopped—the waste of soil by washing, for instance, which is among the most dangerous of all wastes now in progress in the United States, is easily preventable, so that this present enormous loss of fertility is entirely unnecessary. The preservation or replacement of the forests is one of the most important means of preventing this loss. We have made a beginning in forest preservation, but it is only a beginning. At present lumbering is the fourth greatest industry in the United States; and yet, so rapid has been the rate of exhaustion of timber in the United States in the past, and so rapidly is the remainder being exhausted, that the country is unquestionably on the verge of a timber famine which will be felt in every household in the land.

The only trouble with the movement for the preservation of our forests is that it has not gone nearly far enough and was not begun soon enough. It is a most fortunate thing, however, that we began it when we did. We should acquire in the Appalachian and White Mountain regions all the forest lands that it is possible to acquire for the use of the Nation. These lands, because they form a national asset, are as emphatically national as the rivers which they feed, and which flow through so many States before they reach the ocean.

December 8, 1908, the President refers to the subject in the following language:

If there is any one duty which more than another we owe it to our children and our children's children to perform at once, it is to save the forests of this country, for they constitute the first and most important element in the conservation of the natural resources of the country.

There are small sections of our own country, in the East and in the West, in the Adirondacks, the White Mountains, and the Appalachians, and in the Rocky Mountains, where we can already see for ourselves the damage in the shape of permanent injury to the soil and the river systems which comes from reckless deforestation.

In May, 1908, a conference was called by the President of governors of States and Territories, to consider conservation of our natural resources, and, in addition to the governors, there were present at this conference members of the Cabinet, justices of the courts, and other officials, as well as many distinguished men in other walks of life. This conference, therefore, represented every State and Territory, and, as the governors were accompanied in almost every instance by specialists in natural productions, it may be said that it emphasized to an unusual degree the prevailing belief that practical methods of conservation should be adopted. In the declaration adopted at this conference, in referring to the natural resources this language was used:

We declare our firm conviction that this conservation of our natural resources is a subject of transcendent importance, which should engage unremittingly the attention of the Nation, the States, and the people in earnest cooperation. These natural resources include the land on which we live and which yields our food; the living waters which fertilize the soil, supply power, and form great avenues of commerce; the forests which yield the materials for our homes, prevent erosion of the soil, and conserve the navigation and other uses of the streams; and the minerals which form the basis of our industrial life, and supply us with heat, light, and power.

We agree that the land should be so used that erosion and soil wash shall cease; and that there should be reclamation of arid and semiarid regions by means of irrigation, and of swamp and overflowed regions by means of drainage; that the waters should be so conserved and used as to promote navigation, to enable the arid regions to be reclaimed by irrigation, and to develop power in the interests of the people; that the forests which regulate our rivers, support our industries, and promote the fertility and productiveness of the soil should be preserved and perpetuated; that the minerals found so abundantly beneath the surface should be so used as to prolong their utility; that the beauty, healthfulness, and habitability of our country should be preserved and increased; that sources of national wealth exist for the benefit of the people, and that monopoly thereof should not be tolerated.

We declare the conviction that in the use of the national resources our independent States are interdependent and bound together by ties of mutual benefits, responsibilities, and duties.

We urge the continuation and extension of forest policies adapted to secure the husbanding and renewal of our diminishing timber supply, the prevention of soil erosion, the protection of headwaters, and the maintenance of the purity and navigability of our streams. We recognize that the private ownership of forest lands entails responsibilities in the interests of all the people, and we favor the enactment of laws looking to the protection and replacement of privately owned forests.

We recognize in our waters a most valuable asset of the people of the United States, and we recommend the enactment of laws looking to the conservation of water resources for irrigation, water supply, power, and navigation, to the end that navigable and source streams may be brought under complete control and fully utilized for every purpose. We especially urge on the Federal Congress the immediate adoption of a wise, active, and thorough waterway policy, providing for the prompt improvement of our streams and the conservation of their watersheds required for the uses of commerce and the protection of the interests of our people.

January 22, 1909, the President sent to Congress a message, transmitting a report of the National Conservation Commission, in which the following language was used:

We know now that our rivers can and should be made to serve our people effectively in transportation, but that the vast expenditures for our waterways have not resulted in maintaining, much less in promot-

ing, inland navigation. Therefore, let us take immediate steps to ascertain the reasons and to prepare and adopt a comprehensive plan for inland-waterway navigation that will result in giving the people the benefits for which they have paid but which they have not yet received. We know now that our forests are fast disappearing, that less than one-fifth of them are being conserved, and that no good purpose can be met by failing to provide the relatively small sums needed for the protection, use, and improvement of all forests still owned by the Government, and to enact laws to check the wasteful destruction of the forests in private hands. There are differences of opinion as to many public questions; but the American people stand nearly as a unit for waterway development and for forest protection.

I especially commend to the Congress the facts presented by the commission as to the relation between forests and stream flow in its bearing upon the importance of the forest lands in national ownership. Without an understanding of this intimate relation the conservation of both these natural resources must largely fail.

From the report of the National Conservation Commission itself, forwarded in this message, the following references to waters and forests are found:

The first requisite for waterway improvement is the control of the waters in such manner as to reduce floods and regulate the regimen of the navigable rivers. The second requisite is development of terminals and connections in such manner as to regulate commerce.

Forests in private ownership can not be conserved unless they are protected from fire. We need good fire laws, well enforced. Fire control is impossible without an adequate force of men whose sole duty is fire patrol during the dangerous season.

The conservation of our mountain forests, as in the Appalachian system, is a national necessity. These forests are required to aid in the regulation of streams used for navigation and other purposes. The conservation of these forests is impracticable through private enterprise alone, by any State alone, or by the Federal Government alone. Effective and immediate cooperation between these three agencies is essential. Federal ownership of limited protective areas upon important watersheds, effective state fire patrol, and the cooperation of private forest owners are all required.

There are in continental United States 282 streams navigated for an aggregate of 26,115 miles, and as much more navigable if improved. There are also 45 canals, aggregating 2,189 miles, besides numerous abandoned canals. Except through forestry in recent years, together with a few reservoirs and canal locks and movable dams, there has been little effort to control headwaters or catchment areas in the interests of navigation, and none of our rivers are navigated to more than a small fraction even of their effective low-water capacity.

The practical utility of streams for both navigation and power is measured by the effective low-water stage. The volume carried when the streams rise above this stage is largely wasted and often does serious damage. The direct yearly damage by floods since 1900 has increased steadily from $45,000,000 to over $238,000,000.

The freshets are attended by destructive soil erosion. The soil matter annually carried into lower rivers and harbors or into the sea is computed at 780,000,000 tons. Soil wash reduces by 10 or 20 per cent the productivity of upland farms and increases channel cutting and bar building in the rivers. The annual loss to the farms alone is fully $500,000,000, and large losses follow the fouling of the waters and the diminished navigability of the streams.

It is now recognized by statesmen and experts that navigation is interdependent with other uses of the streams; that each stream is essentially a unit from its source to the sea; and that the benefits of a comprehensive system of waterway improvement will extend to all the people in the several sections and States of the country.

The first requisite for waterway improvement is the control of the waters in such manner as to reduce floods and regulate the regimen of the navigable rivers. The second requisite is development of terminals and connections in such manner as to regulate commerce.

In forwarding to Congress, February 26, 1908, the Report of the Inland Waterways Commission, the President of the United States used the following language:

The report rests throughout on the fundamental conception that every waterway should be made to serve the people as largely and in as many different ways as possible. It is poor business to develop a river for navigation in such a way as to prevent its use for power, when by a little foresight it could be made to serve both purposes. We can not afford needlessly to sacrifice power to irrigation, or irrigation to domestic water supply, when by taking thought we may have all three. Every stream should be used to the utmost. No stream can be so used unless such use is planned for in advance. When such plans are made we shall find that, instead of interfering, one use can often be made to assist another. Each river system, from its headwaters in the forest to its mouth on the coast, is a single unit and should be treated as such. Navigation of the lower reaches of a stream can not be fully developed without the control of floods and low waters by storage and drainage. Navigable channels are directly concerned with the protection of source waters and with soil erosion, which takes the materials for bars and shoals from the richest portions of our farms. The uses of a stream for domestic and municipal water supply, for power, and in many cases for irrigation, must also be taken into full account.

Forest protection, without which river improvement can not be permanent, will at the same time help to postpone the threatened timber famine, and will secure us against a total dearth of timber by providing for the perpetuation of the remaining woodlands. Irrigation will create the means of livelihood for millions of people, and supplies of pure water will powerfully promote the public health. If the policy of waterway improvement here recommended is carried out, it will affect for good every citizen of the Republic. The National Government must play the leading part in securing the largest possible use of our waterways; other agencies can assist and should assist, but the work is essentially national in its scope.

In the report the following arguments in favor of forestry and conservation of water power are made:

Engineering works designed to improve navigation affect favorably the regimen of the streams, including floods and low waters. The annual floods of the United States occasion loss of property reaching many millions of dollars with considerable loss of life, while the low water of late summer involves large loss in diminished water supply, in reduced power, and in the fouling of streams, with consequent disease and death. It has been claimed that in specific cases the cost of works required both to control floods and meet the needs of commerce would be less than the amount of this loss. It is desirable that more detailed information be collected concerning the effects of floods and low waters and their prevention by engineering works and other devices.

The annual soil wash in mainland United States is estimated at about 1,000,000,000 tons, of which the greater part is the most valuable portion of the soil; it is carried into the rivers, where it pollutes the waters, necessitates frequent and costly dredging, and reduces the efficiency of works designed to facilitate navigation and afford protection from floods.

Both the regimen of streams and the purity and clarity of waters are affected by forests and other natural growth, and by farming, mining, and other industrial operations over the watersheds in which they gather. Millions of acres in mainland United States have been deforested unnecessarily, and the floods and low waters ascribed to this cause have in some localities occasioned losses commensurate with the value of the timber. Means should be devised and applied for coordinating forestry, farming, mining, and related industries with the uses of streams for commerce and for other purposes.

The effect of wide variations in the level of navigable streams is to render difficult the establishment of necessary terminals for the handling of traffic, and thus to interfere seriously with the utilization of our inland waterways. The prevention or mitigation of such variations would be most helpful to the revival of river traffic, and means to this end should be adopted in plans for waterway improvement, and in the acquisition of and the prevention of the needless destruction of forests, whose preservation is a public necessity for straem control, for timber supply, and for other purposes.

National platforms are, generally speaking, the crystallization of public sentiment as it exists at the time of the convention. Last summer both of the great national parties held conventions, and both referred to the question under consideration to-day. The Republican platform referred to this subject as follows:

We indorse the movement inaugurated by the administration for the conservation of natural resources, we approve all measures to prevent the waste of timber, we commend the work now going on for the reclamation of arid lands, and reaffirm the Republican policy of free distribution of the available areas of the public domain to the landless settler. No obligation of the future is more insistent, and none will result in greater blessings to posterity.

The Democratic platform, adopted July 10, 1908, referred to natural resources in the following phraseology:

We repeat the demand for internal development and for the conservation of our natural resources contained in previous platforms, the enforcement of which Mr. Roosevelt has vainly sought from a reluctant party; and to that end we insist upon the preservation, protection, and replacement of needed forests, the preservation of the public domain for home seekers, the protection of the natural resources in timber, coal, iron, and oil against monopolistic control, the development of our waterways for navigation and other useful purposes * * *.

WHAT OTHER NATIONS ARE DOING.

We are not in an advanced position in forestry; in fact, we have neglected this resource and have done very little compared with what is being accomplished by other nations. Practically every first-class country has already a well-developed forest policy. Some of them date back many years; in a few cases several centuries. Not only have the great nations of the earth forest reserves which they are protecting and making profitable—at least twelve countries obtaining at this time a net revenue from their forest holdings—but several countries have commenced to purchase lands, not only for the purpose of conserving water flow, but to prevent erosion and to get the benefit of the natural increment which their experience justifies them in expecting.

Austria, between 1885 and 1898, purchased 350,000 acres of forest lands. Up to 1902 Switzerland had expended $500,000 in purchasing forests. France has expended five millions in purchasing 400,000 acres of forest lands, and the French have arranged for expenditures which in the end will aggregate forty millions to complete their present scheme of purchase and reforestation. In their reforestation work, up to this time, one-third of the cost has been for land.

In the last thirty years Sweden has purchased 600,000 acres, at an average cost of $5.30 per acre. Most of this purchase has been waste land, and has been made for the purpose of reforestation. And it should be noted that Sweden is one of the greatest exporters of forest products among the nations of the world.

Since 1860 Norway has systematically purchased forest lands. Recently it has appropriated from fifteen to twenty thousand annually for this purpose. Most of these lands are cut-over lands, which are protected by the Government or reforested, as necessities may develop.

Great Britain, which has the smallest percentage of its territory in forests, as compared with other countries of the world, has recently had a special commission examining the desirability of developing for forestry areas of land not useful for agricultural purposes, the result of this being a report by this commission recommending the purchase and forestation of 9,000,000 acres. The commission develops a complete scheme for carrying out this work, proposing that 150,000 acres a year for sixty years shall be afforested, at an annual cost which will begin at $450,000 and increase to fifteen millions at the end of the period. The commission estimates that after the fortieth year the forests will be self-supporting, and when the project is completed that they will have a value of more than $500,000,000 in excess

of the cost of producing them and will yield a net annual revenue of nearly $10 per acre from land which is now producing less than 50 cents per acre.[a] There are other reasons, however, which influenced the commission to recommend this project, among them the fact that it will furnish employment for a large number of people and that it will not bring the country into competition with any private industry.

In order to show, in figures, what other nations are doing, I append to this address a statement showing the acreage of forests, the character of the ownership, the cost and results of cultivation, and so forth.

[a] This report has been received with every evidence of approval by all classes and has the nearly unanimous indorsement of the press, so that there is every reason to expect its adoption.

ITALY.

In almost every country where forestry has been exploited the forests are divided into two classes: Protective forests—that is, forests around the headwaters of streams and on steep mountain slopes; and available forests—that is, forests which are developed for the financial results obtained. This is the case in Italy, where a general forestry law was passed in 1877. This law rigidly protects certain portions of the forests on the higher parts of the mountains, but where it is debatable whether the land should be forested or devoted to agriculture the law is very liberal, the purpose being to protect the steeper mountains from landslides, to protect the headwaters of streams, and to use that area which is not valuable for other purposes in developing forests. This law, however, has not been sufficient to prevent destruction of certain forests on lands which were not useful for agriculture, therefore producing, by the removal of the woods, an area of unproductive land. A recent commission appointed in Italy recommends that at least 500,000 acres should be replanted at once, at a cost of not less than twelve millions, to prevent destructive torrents brought on by destroying timber on the hillsides. Complaint had been made in Italy that it was too expensive to enforce her forest laws, but the result has been that it has been determined that it is more expensive to leave them unenforced.

RUSSIA.

The devastation of the forest and its evil consequences on water flow and soil conditions has been especially felt in the southern districts adjoining the steppes, and these experiences were the immediate cause of the enactment of the forest law which governs all European Russia. This law establishes as protective forests, to be managed under special plans prescribed by the forest department, those which protect the slopes of mountains, where they serve to prevent erosion, landslides, and avalanches.

M. Lokhtine, in discussing forest and water conditions in central Russia at the International Congress of Navigation, held at Milan in 1905, said:

The cases of the suppression of water mills are frequent and sudden in Russia, where they form an important industry. Having myself a mill of this sort on my own property, and being interested in the industry, I gathered data in our neighborhood, situated in the Kazan Government, celebrated formerly for its forests of oaks and lindens. I counted on the tributaries of the Sviyaga as many as 70 mills which used to be there in the past and constantly at work. Less than half now remain, and even they run with only half the stones and lie idle for a certain time during the summer for lack of water. These little rivers become converted into impetuous torrents in the spring and break the dams with such violence that many millers gave up wrestling with this element let loose, which brought them only loss. They abandoned their mills entirely, the ruins of which, still standing, may serve as the answer in fact to the question of the consequences of the destruction of forests on rivers.

FRANCE.

France has not quite 18 per cent of forest—three-fifths of an acre per capita. This is enough to produce only one-third of the home demand. The country imports annually $30,000,000 worth of wood, and pays $6,000,000 duty and $10,000,000 freight for it. Of the 23,500,000 acres of French forests, the state owns 2,707,000 and the departments and communes 3,472,000. Since 1827, when the forest code was passed, the state and communal forests have been under management. The state forests yield a clear profit of $4,737,250 a year, or $1.75 per acre; 95 cents is spent for the management of each acre every year.

The great achievement of France in forestry has been the establishment of protective forests where much destruction had been caused by floods and winds. From various causes large areas were cleared of forests toward the close of the eighteenth century, and only when it was too late was it realized that these lands were not fit for agriculture and should have been left in forest. To repair the mistake, a movement to reforest began in the nineteenth century. It was an exceedingly expensive mistake. Down to the present time, encouraged by wise laws, the state, the communes, and private landowners have restored to forest over 2,500,000 acres, and so saved them from ruin. In addition, the resulting forests return an excellent revenue.

Two-thirds of the torrents of Europe are in France. In the Alps, the Cevennes, and the Pyrenees mountains there are 1,462 brooks and mountain streams which are considered dangerous. Nearly 1,000,000 acres of mountain slopes are exposed to erosion by these streams, to say nothing of the flat land below.

As far back as the sixteenth century there were local restrictions against clearing mountain sides, enforced by fines, confiscation, and corporal punishment. In the main these prevented ruinous stripping of hillsides, but with the French Revolution these restrictions were swept aside and the mountains were cleared at such a rate that disastrous effects were felt within ten years. By 1803 the people had become aroused to the folly of this cutting. Where useful brooks had been there now rushed torrents which flooded the fertile fields and covered them with sterile soil washed down from the mountains. The clearing

continued unchecked until some 800,000 acres of farm land had been ruined or seriously injured and the population of 18 Departments had been reduced to poverty and forced to emigrate. By 1860 the State took up the problem, but in such a way that the burden of expense for reforestation was thrown upon the mountaineers, who, moreover, were deprived of much pasturage. Complaints naturally arose. An attempt was made to check torrents by sodding instead of by forest planting. This, however, proved a failure, and recourse was again had to planting, by the law of 1882, which provides that the State shall bear the costs. Since then the excellent results of planting have completely changed public sentiment. The mountaineers are most eager to have the work go on and are ready to offer their land for nothing to the forest department. In addition to lands secured by gift, the State acquires 25,000 or 30,000 acres a year. Over 500,000 acres have been acquired, and more than one-half of this area has been planted. Already 163 of the torrents have been entirely controlled and 654 are beginning to show the controlling effects of the forest on their watersheds. Thirty-one of the torrents now entirely controlled were considered hopelessly bad half a century ago.

In France, then, forestry has decreased the danger from floods, which threatened to destroy vast areas of fertile farms, and in doing so has added many millions of dollars to the national wealth in new forests. It has removed the danger from sand dunes, and in their place has created a property worth many millions of dollars. Applied to the state forests, which are small in comparison with the national forests of this country, it causes them to yield each year a net revenue of more than $4,700,000, though the sum spent on each acre for management is over 100 times greater than that spent on the forests of the United States.

France, as well as Austria, in the organization of her forestry department has officially recognized the relation of rivers to forests by the creation of a bureau of rivers and forests, at the head of which is Mr. H. N. Lafosse, who has amply defended the beneficial action of forests to stream flow, in a paper presented at the Tenth International Navigation Congress, held at Milan in 1905.

SWITZERLAND.

In Switzerland, which has 2,000,000 acres, or 20.6 per cent of its area, in forest, the communal forests are the largest, and make up 67 per cent of the total; the Cantons own 4.5 per cent and private persons own 28.6 per cent. The communal holdings are constantly growing by the purchase of private lands. From $6,000,000 to $8,000,000 worth of wood (300,000 tons) and wooden ware are annually imported.

The expenditures in forest management vary greatly among the cantons, ranging from $1.50 to $7 per acre. The net annual returns range from $3 per acre in the forests where least is expended, to $8 or $9 per acre in the city forests, where most is expended.

Forest regulations came very early in Switzerland. The first forest ordinance of Berne was issued six hundred years ago. The city forest of Zürich, famous as the Sihlwald, has been managed under a working plan since 1680, and is to-day one of the most perfectly managed and most profitable forests in the world. It yields, on the average, a clear annual profit of $12 an acre.

All the Swiss forests comprised in the Bund are now classified as protection and nonprotection forests. Whether public or private, they are all controlled by the Government. In protection forests all cuttings must be such as to preserve the protective value of the forest cover intact, and for this reason clean cutting is usually forbidden. In such forests stumpage sales are forbidden, and all wood must be felled and measured under the direction of a forest officer. Otherwise privately owned protection forests are supervised in the main as are those publicly owned. Nonprotection forests are also subject to a number of regulations. When they are in private hands clearings may be made only with consent of the Canton, logged areas must be reforested within three years, and existing forest pastures must be maintained.

Where protection forests can be created by planting, this may be ordered, and where forests are converted to farming land or pasture an equal area may be ordered reforested. Where barren ground is required to be forested for protective purposes the Bund assists by paying from 30 to 50 per cent of the cost. Between 1876 and 1902 16,000 acres were reforested at a cost of $1,000,000, in round numbers, the Bund having paid one-half.

The protection forests are those which are located at headwaters or furnish protection against snowslides, landslides, and rock falls, floods, and climatic damage. It was not until the coming of serious floods in 1830 that the value of forest as a protective cover was fully realized. These floods made it clear that the Government must be clothed with authority over the mountain forests. Since this time effective measures have been introduced, clearing has been prohibited, and cutting must conform to the objects of the forest.

AUSTRIA AND HUNGARY.

AUSTRIA.

In Austria, which has been independent of the German Federation only since 1866, forestry has, in the main, followed German lines. Austria-Hungary is one of the largest exporters of wood, and the yearly exportations reach 3,670,000 tons. Thirty-two per cent of the land area of Austria is under forest.

The total net revenue from the Austrian state forests is over $5,000,000. The net yearly revenue per acre of 21 cents is comparatively low, due mainly to the facts that only 56 cents per acre is expended upon the forest and that most of the area is located in the rugged Alps and Carpathians, where administration and logging are costly. The state forests lie chiefly above 2,000 feet elevation.

The present forest department was started in 1872 in response to a popular outcry against the policy of selling state lands. The administration was reorganized in 1904, and now has three departments—administration proper, reforestation and the correction of torrents, and forest protection.

Forestry is successfully practiced on 60 per cent of all the Austrian forests and on 82 per cent of the private forests, and excellent results have been secured by cooperaton between the State and private persons in forest management, particularly under the law of 1883. The most conspicuous fruit of Austrian forestry, however, is the reforesting of the "Karst." The Karst was a stretch of barren lands in the hilly country of Istria, Trieste, Dalmatia, Montenegro, and neighboring territory along the shores of the Adriatic Sea. It comprised some 600,000 acres. For centuries it had furnished the ship timbers and other wood supplies of Venice, but excessive cutting, together with burning and pasturing, the evil results of clearing, and the natural condition of the land, had left it a waste almost beyond recovery. Many laws had been passed from time to time to stop the forest havoc, but without real effect till 1865. In that year the Government, persuaded by the forestry association, began to offer help to landowners who would undertake forest planting. Taxes were remitted for periods of years, technical advice was given, and plant material, as well as money, was supplied. Further laws were found necessary in 1882 and 1887 to meet the objections of stockmen. At the present time over 400,000 acres, or two-thirds of the Karst, have been brought under forest, in part by planting, at a cost of from $8 to $10 an acre, in part by protection and the natural recuperation so made possible.

This work has been carried on under the direction of the "forest protective service," which was first created for Tyrol in 1856 as a result of floods in the Tyrolese Alps in 1851, and was later (1871–1874) extended to the rest of the Empire. This service, which is distinct from the state forest administration, has also been especially helpful in encouraging private forestry. Though at first regarded with hostility, it is now held in high regard on the strength of the work it has done and is doing.

Harmony of interest between the State and private forest owners, which the whole Austrian forest policy favors, is notably secured by the encouragement of the wood export trade through such provisions as reduced freight rates, the absence of export duties, and moderate forest taxation.

A "reboisement" or reforestation law, based on that of France, was passed in 1884, to control torrents. This law carries an annual appropriation of $100,000, and the planting work, like that on the lands of the Karst, is carried on under the direction of the "protective service." For the regulation of the lower rivers $1,350,000 was appropriated at the same time, and of this sum $400,000 has been successfully expended on reforestation.

HUNGARY.

Hungary has 23,000,000 acres of forest (28 per cent of the total land area), of which the State owns 16 per cent; corporations, 20 per cent; churches, cloisters, and other institutions, 7.5 per cent; and private persons the remainder. From $10,000,000 to $12,000,000 worth of wood is annually exported.

About half of all the Hungarian forests are under working plans, by which the cut is regulated so as to provide for a sustained yield, and the present annual cut of 1,000,000,000 cubic feet is believed to be considerably less than the wood actually produced. The State forests yield $600,000 net annual revenue.

The management of all corporation and protection forests has been supervised by the Government since 1879, and all so-

called "absolute forest land," in other words, land unfit for farming, must be reforested within six years after it is cleared. Three-fourths of all the forest land of Hungary, including private as well as public forests, falls under the classification of absolute forest land. Moreover, all mountain forests are required to be managed under state working plans. Two-thirds of all the Hungarian forests are brought under this sort of state supervision. Forest planting is encouraged by state nurseries, at which 10,000,000 seedlings are raised every year for free distribution, and by bounties paid for forest plantation established on private waste lands.

Mountain forests, which are classed as protection forests, must be managed according to working plans approved by the forest department.

GERMANY.

The German Empire has nearly 35,000,000 acres of forest, of which 31.9 per cent belongs to the State, 1.8 per cent to the Crown, 16.1 per cent to communities, 46.5 per cent to private persons, 1.6 per cent to corporations, and the remainder to institutions and associations. There is a little over three-fifths of an acre of forest for each citizen, and though 53 cubic feet of wood to the acre is produced in a year, wood imports have increasingly exceeded wood exports for over forty years, and 300,000,000 cubic feet, valued at $80,000,000, or over one-sixth of the home consumption is now imported each year.

Like other advanced European countries, Germany felt the pinch of wood shortage a hundred and fifty years ago, and though this shortage was relieved by the coming of the railroads, which opened up new forests, and by the use of coal, which substituted a new fuel for wood, the warning was heeded, and systematic state forestry was begun. After all, the scare was not a false one, for even to-day Germany is not independent as regards wood, since she has to import one-sixth of all she uses.

In addition to the wood-supply question, Germany was forced to undertake forestry by the need of protecting agriculture and stream flow. The troubles which France was having with her mountain torrents opened the eyes of the Germans to the dangers from floods in their own land. As a result the maintenance of protective forests was provided for by Bavaria in 1852, by Prussia in 1875, and by Württemberg in 1879.

The Prussian forests, covering nearly 7,000,000 acres, had been injured by mismanagement, much as our forests have been, and the Prussian foresters had to solve the problem of improving the run-down forests out of the returns from those which were still in good condition. They solved it with striking success. Immense improvement has already taken place and is steadily going on.

In 1830 the yield was 20 cubic feet per acre; in 1865, 24 cubic feet; in 1890, 52 cubic feet, and 1904, 65 cubic feet. In other words, Prussian forest management has multiplied the rate of production threefold in seventy-five years. And the quality of the product has improved with the quantity. Between 1830 and 1904 the percentage of saw timber rose from 19 per cent to 54 per cent.

It is a striking fact in this connection that in the United States at the present time we are using about three times as much timber as our forests grow. If we were everywhere practicing forestry with a resulting improvement equal to that made in Prussia, our forests would be growing as much as we use.

The financial returns in Prussia make an even better showing. Net returns per acre in 1850 were 28 cents. In 1865 they were 72 cents; in 1900, $1.58, and in 1904, $2.50. They are now nearly ten times what they were sixty years ago, and they are increasing more rapidly than ever.

In Saxony, which has about 430,000 acres of state forests, the increase of cut under forest management, which always means also a corresponding increase in wood produced, has been nearly as marked as in Prussia. The yield rose 55 per cent between 1820 and 1904, and is now 93 cubic feet per acre—greater than that of the Prussian forests. Since the chief wood is spruce, which yields more saw timber than the average of trees making up the Prussian forests, the increase in the percentage of saw timber in Saxony naturally exceeds the increase in Prussia. It increased from 26 per cent in 1830 to 66 per cent in 1904. The net yearly revenue is $5.30 per acre. The yearly expense is $3 per acre.

Bavaria has 33 per cent of its area covered by forest, of which 2,150,000 acres are state forests and under careful management.

Other German States, smaller, and with better kinds of timber and better market facilities, secure even higher returns. The forests of Wurttemberg yield a net annual revenue of nearly $6 per acre, and those of several smaller administrations do even better.

A number of the private forests of Germany are managed with great success. As a result of a canvass of 15,600,000 acres of state, municipal, and private forests, it was found that the average net revenue per acre from good, bad, and indifferent land was $2.40 a year.

What, then, has forestry done in Germany? Starting with forests which were in as bad shape as many of our own which have been recklessly cut over, it raised the average yield of wood per acre from 20 cubic feet in 1830 to 65 cubic feet in 1904. During the same period of time it trebled the proportion of saw timber got from the average cut, which means, in other words, that through the practice of forestry the timber lands of Germany are of three times better quality to-day than when no system was used. And in fifty-four years it increased the money returns from an average acre of forest sevenfold.

Yet to-day the forests are in better condition than ever before, and under the present system of management it is possible for the German foresters to say with absolute certainty that the high yield and large returns which the forests now give will be continued indefinitely into the future.

NORWAY, SWEDEN, AND DENMARK.

NORWAY.

Only 21 per cent, or 20,000,000 acres, of Norway is in forest. The State owns less than 2,000,000 acres of this. Of the forest region one-half has to import timber, one-fourth has sufficient for its needs, and one-fourth is able to export over 1,000,000 tons, valued at $18,000,000 a year. The total annual cut, one-fifth of which is exported, is about 500,000,000 cubic feet. It exceeds by 1,500,000 cubic feet the amount of wood grown by all the forests in the same time. In other words, the cut is far too heavy to last, so that a reduction of wood exports is inevitable.

While measures were being passed to conserve the forests, the communal forests and town forests were actually being sold. It was not till the law of 1903, which went into effect in January, 1905, that a satisfactory policy was secured. In general, this requires the practice of forestry. As in Russia, provincial forest-protection committees have to approve the local felling plans. A diameter limit is set, below which trees may not be cut. Clearings are forbidden, and cleared land, unless used for other purposes, must be reforested. Pasturing is restricted where it would do harm.

In the past thirty-five years the State has increased its forest holdings by 45 per cent through the purchase and reforesting of wastes and sand dunes and by the settlement of disputed titles. The purchases amount to over 600,000 acres, for which an average price of $5.30 an acre was paid.

The communal forests are supervised by the Government and are usually managed by the foresters with a view simply to supplying local needs. Sales outside the parishes are permitted only where there is more than enough for these needs.

SWEDEN.

Sweden has nearly 50,000,000 acres of forest, covering nearly 50 per cent of the total land area. Since the English import duties were abolished in 1866 the wood exports from Sweden have steadily increased, till now Sweden stands next to Russia, the world leader, in wood exports, with $54,000,000 worth a year, representing nearly 4,500,000 tons.

The State owns about 13,500,000 acres, or 33.2 per cent, and controls 4,000,000 acres more. The state lands are, in the main, of lesser commercial value, and this fact, together with the existence of logging rights granted in the past, keeps the net income for the present down to 12 cents an acre. Nevertheless, since 1880 the net revenue from the state forests has risen from $300,000 to nearly $2,000,000 a year.

Up to five hundred years ago Sweden was overburdened by forests, but by that time cutting and wasting had gone so far that the willful setting of forest fires was forbidden. In 1638 overseers of communal forests were appointed in order to conserve supplies of wood for charcoal used in the iron industry. A general law followed in 1647, and a director of forests in the two southern districts was appointed in 1720. All through the eighteenth century restrictions upon forest use were in force. Toward the close of the century there was, indeed, a premature scare over a possible timber famine. Yet, despite this legislation and much legislation which followed, waste continued to go on. While measures were being passed to conserve the forests, the communal forests and town forests were actually being sold. It was not till the law of 1903, which went into effect in January, 1905, that a satisfactory policy was secured. In general, this requires the practice of forestry. As in Russia, provincial forest protection committees have to approve the local felling plans. A diameter limit is set, below which trees may not be cut. Clearings are forbidden, and cleared land, unless

used for other purposes, must be reforested. Pasturing is restricted where it would do harm.

Forest fires continue to do great damage, especially in the northern part of the country. A forest patrol is doing effective work, however, in checking the spread of fires.

DENMARK.

Denmark has about 600,000 acres under forest, of which the State owns over 23 per cent, or 142,000 acres. About 75,000 acres of wastes are in process of reforestation.

The need of wiser forest use was felt in the eighteenth century, and by 1781 the state forests were placed under administration. But the clearing of the forest continued at such a rate that in 1805 it was provided that the still existing forests of beech and oak should be maintained forever.

Since 1820 the forest area has been increasing. At present reforesting is adding to it very considerably. Nearly 200,000 acres of heath have been planted in the last forty years. To this work of reclamation the State contributes $40,000 a year.

SYRIA AND ASIA MINOR.

No better example can be given of the influence of deforestation and its folly than that which applies to Syria and Asia Minor; and I quote the following from papers delivered by Mr. J. Riedel, at the Tenth International Navigation Congress, Milan, 1905, and contributed by Mr. Ernest L. Harris, American consul-general to Smyrna, in a series of articles to recent numbers of the National Geographic Magazine.

Mr. J. Riedel, in beginning his paper on "Influence of deforestation" at the Tenth International Navigation Congress, Milan, 1905, says:

That the destruction of the forests is reasonable and economically justifiable only up to a certain point, beyond which it becomes irrational and generally baneful, is perhaps most clearly apparent in the effects of the action of the old civilized peoples, who, by means of an ill-considered destruction of the forests, gradually transformed districts that once exuberated in grace and fruitfulness into deserts and wilderness.

We need not go to Syria, to the land of Palestine, that once flowed with milk and honey, nor to the country between the Euphrates and the Tigris, in order to see how these districts have, as the result of deforestation become stony, waterless, and barren; Europe presents numerous sad pictures of the destruction of vegetation which has taken place in the early centuries. Not only in Greece have the wooded heights disappeared, but also in the other maritime states of the Mediterranean the forests have everywhere been devastated.

Mr. Ernest L. Harris, American consul-general to Smyrna, has contributed a series of articles to recent numbers of the National Geographic Magazine on the ruined cities of Asia Minor.

In closing this article, Mr. Harris says:

The hills, however, for the most part, are barren of forestry. The ruthless devastation of the timber resources of this country for centuries has done its work, and I very much doubt if even a rational system of forestry will ever bring back to those hilltops again the magnificent pines which once adorned them. Nature has been too badly treated. The soil which slumbered upon those slopes at creation's dawn has sifted to the valleys and the floods have carried it away to the sea. Nothing now remains but sterile rocks, which bake in the glaring rays of the torrid sun.

The husbanding of the resources of a country is a task which is fraught with the deepest consequences to the welfare of the people who inhabit it. Unless our people wish to see the mountains of Pennsylvania, Maine, North Carolina, Arkansas, and Oregon as barren and as sterile of production as are the bluffs which skirt the coast of Asia Minor, then it is high time that something radical be done.

JAPAN.

Japan is one of the countries which has taken systematic action relative to its forests. The forests of Japan are divided into the following classes: State forests, which contain 68 per cent; crown forests, which contain 9 per cent; municipal forests, which contain 8 per cent; shrine and monastery forests, which contain slightly less than 1 per cent; private forests, which contain about 25 per cent; a total of 58,000,000 acres. Notwithstanding the fact that Japan is one of the most thickly settled countries in the world, it produces more wood, etc., than is necessary for home consumption, making each year a considerable export, and it is noticeable that, notwithstanding the congested population, the forest area increases from year to year, and that the estimated stumpage is also increasing, so that it is probable that Japan will, not only during the immediate future, but for all time, be able to supply its own needs. The average exports, net, for the ten years ending in 1902 amounted to about $2,250,000 annually. The Japanese divide their state forests into two classes—reserve and available. The reserve forests consist of 1,800,000 acres, and they are kept permanently wooded to prevent impoverishing the fertility of the surrounding district.

One of the best examples in Japan of forest culture is found in the Yashimo forests in the province of Yamato. Ninety-three per cent of this section is forested and 85 per cent of the population obtains its living from the forests. These forests are 400 years old. One-half of the growth is the result of planting, and the most systematic methods have been used for centuries in removing surplus growth. Thirty-eight per cent of the entire area is planted to cryptomania, which is a most valuable wood, used largely for local consumption in connection with barrel staves, and so forth. Japan, under the law of 1897, is divided into 10 major forest districts. These in turn are divided into 270 minor forest districts, which latter are divided into 1,323 protective ranges, as they are termed, and, under the laws referred to, rules for working the available forests and restrictions in reserve forests are carefully laid down. The Japanese commenced to develop their state forests systematically in 1880, and the net results are most encouraging.

Year.	Gross receipts.	Expense.	Net receipts.
	Yen.	*Yen.*	*Yen.*
1883	223,000	181,000	41,000
1887	663,000	334,000	299,000
1892	811,000	522,000	288,000
1897	1,330,000	746,000	583,000
1902	2,588,000	1,116,000	1,472,000

In other words, since this system was inaugurated the net profit has increased about 16 per cent annually. The Japanese are replanting forests which have been removed, and also waste lands. In the twenty-four years preceding 1901, 247,215 acres were replanted. Many hillsides are being treated to prevent the sliding of the earth. They dig trenches for this purpose and plant coniferous trees in the trenches, either sodding the sides or not, as conditions require.

To enable Members of the House to compare the amount of service which is given Japanese and American forests, I present these figures. The number of square miles in state forests is about 50,632. To care for these forests there is employed a staff of 186 officials under the central government, and 1,821 under the local government. In the United States there are over 155,000,000 acres of forest reserves, to care for which there are employed 109 supervisors, 42 deputy supervisors, and 1,442 rangers and guards. The average net profit per acre per year from the state forests is now about $1.50.

ANSWER TO CRITICISM.

I now wish to take up in some detail the objections raised in the minority report, signed by five members of the Agricultural Committee. Among these objections great stress is placed on the views of Lieut. Col. H. M. Chittenden, U. S. Army, an engineer officer on the retired list, whose views are said to be somewhat in accord with those of others in the Engineer Corps of the Army. Colonel Chittenden discusses this question with great clearness and thoroughness, and comes to the general conclusion that there is no appreciable connection between forestry and stream flow. His final conclusion is not definite on that subject, and he himself, as I shall show later, does not claim that there is no connection whatever.

The minority report also calls as witness several European authorities, and especially the views of E. Lauda, Director of the Central Imperial and Royal Hydrographic Office at Vienna, and quotes views expressed by Mr. Lauda in the year 1900. Whatever may have been his views at that time, contrary views were expressed by him at the Tenth International Congress of Navigation, held in Milan in 1905. At that congress eight papers were presented by engineers from Austria, France, Russia, and Italy, all agreeing in general terms that there is a connection between forestry and stream flow, and I shall print in considerable detail a résumé of their views.

Mr. Lauda took for his illustration two streams. These two streams were taken because all natural conditions, save forest cover, were practically identical. I use his own language in describing his method of procedure:

The difference which appears from this table [which he has been describing] in the matter of precipitation in the two basins is unimportant. The rains in the Bistritzka Valley are heavier during the summer than are those of its neighbor, while in the latter the winter rains are the heavier. Taking the year through, the result is the same in the two basins. As to vegetation, it may be said that cultivation of the open fields is carried on in the same way in both basins, with the same density of population and the same economic conditions. Meadows and pasture land are more extensive in both cases than the arable land of the mountains, where the product is small. The soil is generally fertile, but the area of wooded land is much greater in the Bistritzka Valley than it is in the Seniza—48 per cent of the hydrographic surface of the former and only 27 per cent of the hydrographic surface of the latter.

Having stated the conditions in both cases, Mr. Lauda enters into an elaborate statement of the precipitation and discharge in both streams, and, after careful analysis, he comes to the following conclusions:

1. Precipitation, retention, and discharge are connected by certain laws.
2. The forest exerts an influence, in any case, on the flow of water.
3. The retention of the water precipitated is, in a certain measure, greater in the more than in the less wooded basin.

Mr. Lauda then adds:

A final judgment on the subject of the influence of forests on the regimen of streams can not yet be uttered, the experimental data possessed so far covering only a relatively short space of time.

But he adds:

If it be unfavorable to the forest to this extent, that there are denied to it certain of the properties attributed to it generally, it does not follow from this that it is necessary to oppose the rewooding of arid surfaces, the replanting of the basins of streams, or the maintenance of plantations of trees. The general utility of the forest is so well settled, the extraordinary appreciation in which it is held, as a means of protecting the soil against landslides, is so firmly established, its great advantageousness, especially for the spring district, in holding back earth thrusts, and reducing the amount of sediment carried by rivers so important, that these reasons alone justify fully the greatest possible promotion of forest culture.

At the same conference Mr. H. N. R. Lafosse, inspector of forests and waters of France, discusses the influence, in a number of directions, which he believes the forest to have upon water circulation. Among the conclusions which he comes to are these:

1. It is settled that evaporation is less intense within the forest than it is outside.
2. It is admitted that infiltration is facilitated by forest vegetation.
3. It is certain that the loss in a forest by the run-off is very nearly nothing.

He adds to the above:

Wooded masses help not only to increase the volume of springs, and hence the discharge of streams, but they are also, like lakes and glaciers, powerful moderators. Holding the rain water, preventing it from running quickly into depressions, they help to reduce the danger of floods, and are a great aid in assuring the steadiness of the regimen of rivers.

Forests are therefore, as has been very justly said, condensers and regulators at the same time; and these words sum up completely the action of wooded masses from a hydrologic point of view.

If the destruction of forests is to be deplored, it is most of all on the mountains that the cutting away of timber is to be feared. It is not alone the supply of the springs and the discharge of the streams which are in danger; it is the very existence of the rivers themselves. The stream which can be utilized disappears to give place to the devastating torrent.

At the same conference Mr. H. Keller, privy councilor of the public works, department of Austria, discusses the relation between streams and forests, claiming that the condition of forest growth is vital to both stream flow and to the retention of the soil. He says:

Deforestation may locally injuriously affect the nature of the soil and the conditions of the flow and drainage of the waters, when no surface vegetation grows again on the forest site, or where there is a falling off in cultivation.

Mr. Joseph Wolfshutz, of the agricultural council of Austria, said:

For economic reasons reafforestations will have to be confined to the steeper mountain slopes, which are of little use for other cultivation. Such forests retard the melting of the snows in spring, and lessen the violence of spring high water. It is thus advisable, in the interests of navigation, to spare and to attend to the forest. In this respect forests have incontestably had a beneficial influence upon the floods of the large rivers.

When we sum up these discussions, we come to the conclusion that the existence of forests and swamps will, on the whole, have a favorable influence upon the water régime.

Mr. J. Riedel, technical councilor of Vienna, made this statement:

In the valleys denuded of trees the more rapid swelling of floods than formerly may be noted. Since the island of St. Helena has been rewooded the rainfall has become twice as great as in the time of Napoleon I. Lower Egypt, which in the eighteenth century could boast of only ten to twelve days' rain in the year, and in consequence constantly suffered from drought, after 20,000,000 trees had been planted has as many as thirty to forty days of rainfall, yielding a sufficient supply of water.

Mr. Ponti, chief civil engineer for the Government of Italy, states in his paper on the same subject that—

Forests are always effective for holding steep slopes. They are powerful auxiliaries for any kind of works carried on with the object of reducing the volume of material which the water may carry off, and their effectiveness is greater if the subsoil be impermeable.

Mr. C. Cipoletti, an eminent Italian engineer, says:

But with regard to the régime of high-water flow and ordinary floods, there is no material difference of opinion. In such localities the waters running off the surface unite with the springs in providing the supply of water for a river. Thus, all the writers agree that forests exert a moderating influence on the run-off of surface waters, owing to a large proportion of the water being retained by the leaves and other parts of the plants.

Mr. Cipoletti then reviews all the papers which have been read, and sums up their conclusions as follows:

Opinions being unanimous upon the points that forests exert a beneficial influence—

1. Upon the consolidation of sloping grounds, by preventing the disastrous washing off of materials to the bottom of the valley.
2. Upon the formation and permanency of springs, at least in impermeable ground and on slopes.
3. On the better régime of rivers, at least at the periods of their low water and ordinary flows.

Colonel Chittenden's paper may be summarized as an expression of an opinion which is directly antagonistic to four generally accepted theories with relation to forests and the effects of forests on stream flow as follows:

1. By storing the waters from rains and melting snow in the bed of humus that develops under forest cover, preventing their rapid rush to the streams, and paying them out gradually afterwards, thus acting as true reservoirs and equalizing the run-off.
2. By retarding the snow melting in the spring and prolonging the run-off from that source.
3. By increasing precipitation.
4. By preventing erosion of the soil on steep slopes, and thereby protecting water courses, canals, reservoirs, and similar works from accumulation of silt.

In speaking on the first proposition, Mr. Gifford Pinchot says:

In his paper, Colonel Chittenden repeats an illustration used by the writer before a committee of Congress. A photograph of a barren hillside was taken. Water was poured upon the glazed paper and was observed to run off instantly. Then a piece of blotting paper was laid upon it, water was poured over the blotting paper, and, of course, it was absorbed and remained for a time.

That is a fair description of an essential function of the forest floor. It affords a physical obstruction to the rapid escape of water over the surface, and thus provides, to some extent, a storage reservoir. Colonel Chittenden admits this influence for average conditions. Indeed, it is a matter of such common observation as to be indisputable. The practical value of this influence may be little or much, depending upon the character and amount of precipitation and the thickness of the undergrowth, decaying litter, and humus on the ground.

There is another function of the forest floor which in practical value far surpasses this one.

The forest floor reacts upon the soil itself to wonderfully increase its absorptive capacity. The humus which by natural action is being constantly mixed with the upper layers of mineral soil adds to its receptive and retentive power, while the deep penetrating roots open passages through which water readily passes to underground drainage.

That Colonel Chittenden has failed to consider this function is evident throughout his discussion. On page 926 he says, in giving an illustration:

"Consider an inclined plane surface practically impervious to water."

When it is understood that under the forest the surface is very far from impervious; that, on the contrary, it is absorbent in the highest degree, the argument is seen to be fallacious.

Failing to note this function of the forest floor, Colonel Chittenden misses entirely the greatest influence which the forest exerts on fallen moisture—that of changing surface to underground drainage and of replenishing the great underground reservoir from which the springs and streams are fed.

What is the importance of ground storage, which is so lightly passed over? Professor King, of the University of Wisconsin, has found that ordinary soils have a capacity of 4 to 5 or even more inches of water per foot of depth. Ground water extends to a great depth. Considering the earth masses which lie above the stream levels in mountainous regions, one can get an idea, though a somewhat inadequate one, of what ground storage means to the permanency of stream flow. The ground water is constantly in motion, is replenished entirely from the surface, and is easily disturbed by any change in surface conditions.

Dr. Bailey Willis, of the Geological Survey, in replying to the Chittenden paper, says:

The writer has before him the results of three years' investigations by Prof. L. C. Glenn, of Nashville, Tenn., in the southern Appalachians, the most critical region of the United States, and he has gathered from Professor Glenn's manuscript report to the Forest Service the following summation of details which bear on this question:

Forty-six creeks and small rivers, whose watersheds may be described as timbered rather than cleared, are known, according to observation and local repute, in times of flood to rise gradually, to continue high for several days, and to subside slowly. They carry but little sediment, and they maintain a good volume of water during dry seasons.

Thirty-eight creeks and small rivers in the same watershed, whose slopes may be described as cleared rather than timbered, are known, according to observation and local repute in time of flood, to rise rapidly to extreme flood height, to carry excessive quantities of mud, sand, and gravel, and to fall quickly. In dry seasons they are very low, and the range from lowest to highest stages has increased and inflicted much damage in very recent years.

Two other classes of conditions may be recognized in Professor Glenn's description: The one of valleys still timbered but which are being damaged by the beginning of logging, and particularly by the logging of chutes; the other of watersheds that are largely cleared and grassed, and which the grass protects from erosion, though not in the same degree from rapid run-off. Such evidence as this, collected by the qualified and impartial observer with reference to individual watersheds, establishes for the region in question, comprising the mountains of North Carolina, Tennessee, and Georgia, the fact "that forests do exert a beneficial influence on stream flow by storing the waters from rain, preventing their rapid rush to the streams, and paying them out gradually afterwards, thus acting as true reservoirs."

Mr. M. O. Leighton, of the Geological Survey, in a very exhaustive reply to the Chittenden paper, says:

Colonel Chittenden's paper on the subject of forests, reservoirs, and stream flow is so admirable a literary composition and so persuasive in its presentation that one is well-nigh beguiled into acceptance of its precepts. It is only upon critical review and application of fundamental principles that one is prepared to appreciate how erroneous are its terms, how mistaken its deductions. It may be summarized as follows:

1. A large number of the premises and observations upon which his conclusions are based are in error.
2. Nearly all the author's difficulties with reference to the relation of forests and stream run-off could be solved if he had not misconceived certain fundamental principles.
3. In the progress of his argument, the author presents contradictory facts.
4. The author rejects many generally accepted ideas, professedly because little or no evidence has been brought forward in their support, and then substitutes concepts of his own without any demonstration.

At the very outset of the discussion there is revealed a fundamental misconception which largely explains many of the adverse deductions in relation to forest control of run-off, viz: "By storing the waters from rain and melted snow in the bed of humus that develops under

forest cover, preventing their rapid rush, etc." If this means strictly what it says the author believes that the bed of humus is the agent of storage. The impression here conveyed is intensified by the practical illustration given on page 926, under the caption "Effect of Forests on the run-off from Rainfall," in which an inclined plane surface is used practically impervious to water, with a layer of sand covering some small portions of it. The author has forgotten our greatest reservoir, namely, the ground.

Prof. George F. Swain, professor of civil engineering in the Massachusetts Institute of Technology, has, at the request of ex-Governor Curtis Guild, jr., of Massachusetts, prepared a reply to the Chittenden paper, in which he says:

With reference to the first of these points, the author states that it is "strictly true for average conditions." He believes, however, that this beneficial effect is not exerted under extreme conditions—that is, great floods and excessive low waters—and he states that these extreme conditions "determine the character and cost of river control."

Even if it be admitted that the presence of forests does not affect extreme conditions, this is no argument against the value of forests, for it is certainly not true that only extreme conditions affect the navigability of streams or determine the character and cost of river control. Extreme conditions determine certain elements, such, for instance, as the height of levees. Colonel Chittenden certainly can not mean to state that ordinary everyday floods do not carve away banks and cause shoaling of channels, rendering dredging necessary for navigation. A few high, but not extreme, floods may do much more damage than one extreme flood and may necessitate more expenditure for dredging and other purposes. Extreme conditions are in the nature of freaks. They occur only at intervals of many years. It would seem to be more nearly correct to state that the interests of navigation are governed more by the usual conditions, and that it is possible for extreme conditions, at rare intervals, to interrupt traffic for a short time without causing much loss. It may as well be argued that it is not wise to attempt improvements on railroads because an earthquake or a tornado or an extreme flood in a river may destroy a portion of the track and interrupt traffic for a while. It matters little in the navigability of a stream if at intervals of twenty, thirty, or fifty years an extreme drought occurs for a few days or weeks, making the depth of the channel insufficient for the largest vessels.

If it be true, therefore, that extreme conditions do not govern the question, Colonel Chittenden has admitted all that the advocates of forests desire. Let us consider, however, the arguments with reference to such extreme conditions:

The argument with reference to extreme floods appears to be that floods are always the result of combinations from various tributaries, the highest flood from one stream coming at the same time as the highest flood from other streams, occurring after periods of long-continued and widespread precipitation. In such cases the forest bed becomes completely saturated, its storage capacity exhausted, and when this point is reached the forest has no more power to restrain floods than the open country itself.

It is, of course, evident that the rainfall may be so great and long continued that the forest has become saturated and that the water flows over the surface, but it does not seem correct to say that in this case the forest has no more power to restrain floods than the open country itself. The discharge will be hindered in the forest by the physical conditions, and because the soil will not be washed away and the water will not be gathered into torrents flowing down through eroded channels. Moreover, it seems a strange argument to maintain that because the retentive power of the forest is not unlimited it is not, therefore, useful.

With reference to Colonel Chittenden's second proposition, in which he disputes the influence of forests in retarding the melting of snow, Professor Swain says:

This argument contains a number of errors and inconsistencies. In the first place, the snow does drift in the forest, although not to the same extent as in the open. Colonel Chittenden admits that the snow blanket lasts longer in the forests than in the open, except for the drifts. It is the present writer's experience, however, that the snow in the forests lasts considerably longer than even the drifts in the open, although this may not be true in the case of very high altitudes. The snow in the drifts on or near the summit of Mount Blanc, of course, lasts longer than the snow in the forests below, because the top is in a region of perpetual snow. Obviously this is not the condition to be considered in the present instance; but Colonel Chittenden ignores the fact that under the snow the ground in the forest is warmer than the ground in the open and that the snow blanket melts at the bottom rather than at the top. Frequently the ground in the forest does not freeze at all, and therefore it is in a better condition to absorb the melted snow than the ground in the open. But even if the snow blanket in the woods absorbs, as he thinks, the water from its own melting under the sun's rays, preventing it from percolating into the ground, why do not the large drifts in the open, which he says form the main reservoirs of the streams, also absorb their own water and prevent it from running off?

The fallacy of Colonel Chittenden's arguments in this respect is obvious. It is, of course, true that if a warm rain comes upon the snow blanket in the woods, carrying it off in a short time, the resulting flood may be greater than if the forest had not been there to retain the snow. But it is quite clear that in the latter case the earlier spring floods would have been increased. If a given amount of snow is to be carried off into the streams, it is obvious that the flow of the streams will be more regular if the period of melting is extended, and this is the effect of the forests.

Mr. Leighton says:

The statement that forests prevent the formation of drifts and distribute the snow in an even blanket over the ground is, of course, erroneous. Every country boy has floundered through drifts in the forest, and Dr. George Otis Smith, Director of the Geological Survey, in his discussion on this paper, testifies that in the very region concerning which Colonel Chittenden appears to be most familiar, and in the same year in which the latter made some of his observations, his (Doctor Smith's) horse became stalled in a snowdrift in a dense forest on or about the 1st of July.

On the tops of peaks and in extremely high altitudes, consequently subject to great winds, this may at times be true. It is certainly untrue for the greater part of the country, the quantity of snow in the trees being but an exceedingly small part of the total accumulation. Even in high altitudes the heavy and uniform blanket of snow is common, as can be shown by notes or photographs on file in the Geological Survey.

Mr. Pinchot says:

It is true that because the sun is excluded in a dense forest melting begins later than in the open, and Colonel Chittenden correctly states a universally known fact when he says that "even after the ground in the open is entirely bare, except under the drifts, the forest areas may still be covered with an unbroken layer of snow." Why? Simply because it is colder in the forest. It is colder when the process begins; it is colder day by day until the snow is gone in the open. The forest consequently acts in exactly the same way as the gulch on the north mountain exposure. It catches the average amount, or more than the average amount, of snow and holds it until the melting time in the open is past. If, in either case, the melting went on as fast as in the open the discharge of water would be greater, considering the whole watershed, and floods thereby intensified.

With reference to the third proposition of Colonel Chittenden, with regard to the effect of forests in increasing precipitation, Dr. Bailey Willis says:

Precipitation over mountains is always less regular than over plains, for the irregularities of the mountain slopes cause the air currents to rise and expand and cool very unequally. And when we exaggerate these conditions by removing the regulating effect of the tree surface and substituting the aggravating effect of the bare surface we produce conditions that result in more violent floods and more excessive drought than existed before man did his irrevocable work.

Mr. Pinchot says:

Large numbers of observations, some favorable, some unfavorable, some neutral to this theory, have been taken all over the world, but the prevailing opinion of the men who have studied the matter most carefully is that there is an effect of the forest, and that it increases rapidly with the altitude to which the forest grows. However, the influence of the forest in causing rain, whatever it may be, is a matter of comparatively small importance compared with its influence upon the distribution of water after it reaches the surface.

Mr. Leighton says:

Let the author, Colonel Chittenden, examine the precipitation records over the basins of the Tennessee, the Cumberland, the Kentucky, the Pemmegewasset, and Catawba rivers, and he will convince himself that his generalization in these important instances at least is quite the reverse of the truth.

With reference to preventing erosion of the soil on steep slopes, and thereby protecting water courses, canals, reservoirs, and similar works from accumulations of silt, Doctor Willis says:

It is difficult for the writer to understand how any observer can say that there is a deficiency of evidence to support this view, as Colonel Chittenden does on page 949. As a geologist, my attention has been constantly drawn to the evidences of erosion under the varied conditions of relief and climate in nearly all parts of the United States and also throughout Europe and a not small part of China. There is, according to my observation, a definite relation between the different valley deposits and forest-covered hills on the one hand or denuded hills on the other. I can not recall an exception to the fact that streams flowing from hills which have been denuded of forests have filled their lower valleys with broad flats of sand and gravel through which the waters meander in shifting, uncertain channels. Equally closely related are forested mountains and clear streams, which flow through valleys with well-established channels and more or less extensively developed flood plains that are covered with appropriate vegetation.

Mr. Leighton says with reference to the assertion that our rivers are not shoaling by reason of erosion:

It may be remarked that if the author will review the reports of the Chief of Engineers of the United States Army he will find ample evidence to the contrary. Of course, erosion does not mean uniform shoaling throughout the entire course of a river. It means rather additional bar formation. The schedule of dredging on the Ohio shows a fairly constant increase since 1875, and it is significant that in the recent report on the 9-foot canalization of this river the Board of Engineers for Rivers and Harbors recommended that $1,000,000 per year be provided for dredging. While it is recognized that the need for this great sum arises from the cessation of bar cutting that would be occasioned by the erection of locks and dams, it indicates, nevertheless, that the United States engineers have recognized that the débris problem is of far more consequence than Colonel Chittenden would have us infer.

Mr. Robert McMath, of St. Louis, an engineer well known for his connection with the improvement of the Missouri and Mississippi rivers, and formerly a member of the United States Engineer Corps, has the following to say in discussing the Chittenden article:

We know that floods destroy, but we do not fully know and appreciate the fact that the work done at low stages is largely reparative. Reparative work is the readjusting and removing high stage or flood deposits so as to restore the efficiency of the river bed, which is always impaired by flood waves. Assuming that such reparation is the fact, the practical solution of the improvement problem is to subtract from the flood and add to the low stage energies.

Mr. Pinchot says concerning Colonel Chittenden's position with reference to erosion:

The mistake is a fundamental one, which can be checked up by anyone who will take the trouble to compare the quality of the forest floor in the two kinds of forest.

Where Colonel Chittenden got the idea that in any cultivated forest under the sun it is the habit of the foresters to rake up the débris I am utterly unable to say, but it shows—and this I regret to say—it shows so complete and thorough a misunderstanding of the elementary foundations of forestry as to invalidate it at once in the mind of any man acquainted with the forest, or, if not invalidate, to at least throw into cloud his observations on all matters relating to forestry.

It is unnecessary to dwell upon his statement that it is not forest destruction, but forest culture, which has the effect of causing soil ero-

sion, because it resembles in all details the ancient question of which came first, the hen or the egg. Whether you destroy the forest to cultivate the soil, or cultivate the soil after the forest is destroyed, makes no difference. At any rate, the forest is gone, and its cover has been removed.

The suggestion is made in the paper under discussion that we cease devoting the mountain slopes to forests, and take up their cultivation on the lowlands. The failure to conceive the elementary principle in all forestry, and in all use of the land, that each part of the soil must be put to the use in which it will contribute most to national welfare, makes this phase of the question peculiarly difficult to discuss.

As well might it be said that it would be an excellent thing to devote the west side of Fifth avenue to the growth of Lima beans, because their transportation from that place to the consumer in New York would be so much more convenient and so much cheaper than if they were grown on Long Island. There can be no question about that. But the west side of Fifth avenue has a greater value for another purpose. And the soil upon which Colonel Chittenden recommends that we shall grow trees has a vastly greater value for agriculture than it could ever have for forestry.

In summing up the entire paper, Mr. Pinchot says:

If the points in this paper have been made plain, Colonel Chittenden's fundamental conception as to the forest floor and its influence is wrong. His idea that records in the United States do not show an increase in the frequency of floods and of low waters is wrong. His idea that the critical point for us to examine into in this matter is flood height and not flood frequency is wrong. And his conception of forestry, of the functions of the forest, outside of water supply, is so fundamentally wrong that it might be discussed in a paper of far greater length and still leave untouched some of the points upon which he is mistaken.

It has been contended that the Government has no constitutional right to purchase land except for certain specific purposes, such as for public buildings, for navy-yards and naval stations, arsenals, and so forth. Not being a lawyer, I can not claim to be able to expound the Constitution, but if it permits the expenditure of large sums of money for all kinds of enterprises, it seems to me ridiculous that its terms will prevent the development of a great project, which at least has some connection with interstate commerce and which certainly promotes the general welfare. This is not a proposition to use revenues obtained by means of taxation for the purchase of lands; on the contrary, it is taking the receipts from the Forestry Service and using those receipts for the development and extension of that service. If a business man owned areas of forests from which he received a revenue which he did not need for general expenses, he would be justified in investing, and, in fact, would be quite likely to invest, these receipts in the same kind of property; and he would be led to do this because his knowledge of that kind of business would incline him to continue it rather than to go into some untried field. The same application may be made to the Government in this case. There is no doubt that congressional action has been such in the past that it has assumed the right to dispose of public lands or their receipts in any manner it saw fit; and I believe it is generally acknowledged that the power of Congress over the public domain is plenary, and that the public lands and proceeds thereof have never been considered a source of public revenue, but a trust, to be used for the settlement and development of the country and for the benefit of all the people.

How, then, can the receipts from public lands be devoted to any more suitable purpose than in creating additional public lands, which indirectly will promote navigation, conserve water powers, prevent floods, and protect the watersheds of navigable rivers?

During the last fifty years public lands have been disposed of for the following purposes: Under the homestead act; granted to railroads in aiding construction and in aiding the construction of wagon roads; granted to States for canal purposes and river improvement; granted to States for educational and other eleemosynary purposes. Furthermore, Congress has been liberal and general in disposing of the proceeds of the sales of public lands, it having given large amounts of money to the support of colleges of agriculture; to agricultural experiment stations, to schools, and to the swamp fund. It has been devoting the proceeds of sales of the public land to the Reclamation Service, which was instituted seven years ago, and which has been continued without scandal and greatly to the advantage of the western section of the country, developing large areas of the best farming lands in the United States. In a speech on the Reclamation Service, on June 12, 1902, the gentleman from Wyoming, who is now a Member of this House, expressed his views on the right of Congress to act as was proposed in that project in the following language:

If the Congress has the right, which has never been denied, to give away public lands, with or without stipulation as to their use and final disposition, and to appropriate the proceeds for a wide range of purposes, for which it is somewhat doubtful if the funds derived from taxation of the people could be used, it is clear that Congress has the authority, as we propose, to provide for the creation of a trust fund from the proceeds of the sales of public lands, and to direct the use of this fund for the purpose of making other public lands salable and useful, with a view of transforming deserts into habitable regions and making possible the great increase in the general wealth, power, and prosperity of the country which must follow such development.

I fully approve of this expression of opinion, and it is as applicable to the proposed Forest Service as it was to the Reclamation Service, the only difference being that in one case the proceeds of land sales were taken for the development, and in the other the receipts from the exploitation of public lands are to be taken for the development. In the one case the Government gets its money back by sales of lands, and in the other the Government will be easily able to get its money back, if it desires, by the sales of a class of property which is constantly increasing in value.

Twenty-nine of the 55 Members of this House who voted against the reclamation bill are Members of this Congress, and I think they will universally agree that the Reclamation Service has been devoid of scandal, has been beneficial to the western section of the country, has developed large areas of valuable lands, and that their vote in opposition to that measure was not justified. They may be disposed to urge the same arguments against this measure, so similar in its general character. If such should be the case, I wish to call to the attention of the House how faulty may be the reasons against initiating a great public measure, made by even as sound a reasoner as the gentleman from Wisconsin, Judge JENKINS, who, in joining the minority report against the reclamation bill, added this comment:

I concur in the opinion that there is a total want of authority in Congress to pass the bill in question or, in fact, any bill providing for national irrigation. But if Congress had the power, and it was generally conceded that the subject of national irrigation was one worthy of the attention of Congress, it would, in my judgment, be impossible to enter upon the proposed plan, because it embraces more than one State, and the Federal Government would have to enter each State upon the same terms as a private individual or corporation, entirely divested of its sovereignty, and would have no power to purchase or condemn property needed for the enterprise held by persons other than the Federal Government; would be subject to the varying laws of the different States; would have no right to interfere with water courses to the detriment of private ownership or the rights of the States in the same. My judgment is not based on the narrow doctrine of the rights of the States as against the Federal Government, but upon the broad proposition that the proposed plan is entirely outside of the powers of Congress and impossible of execution.

The makers of the Constitution might be presumed to have a pretty definite idea of what the Constitution meant and what it was intended to do, and yet they found methods of doing necessary acts which the strict constructionist objects to to-day. I find one instance, more than one hundred years ago, in which Congress authorized a purchase of lands. These lands were supposed to be producing what was necessary for a public use. On January 11, 1797, the Secretary of War, in addressing a Member of Congress, Mr. Parker, used this language:

The probability is that an article so important to the maritime nations as live oak will be sought after with much avidity, and the land which is clothed with it may pass into hands that may make its attainment hereafter more expensive, if not impracticable; but whether it is right that the United States should be the purchaser of such land is a question which no doubt you have examined.

And on the 25th day of the same month the Mr. Parker referred to, he being chairman of the committee to inquire into the state of naval equipment, and so forth, reported as follows:

Your committee further report as their opinion that it would be expedient for the United States to secure some of the lands in South Carolina and Georgia well clothed with live-oak and red-cedar timber, for the purpose of building ships of war.

And recommends an appropriation to carry out this suggestion.

February 25, 1799, Congress appropriated $200,000—

To be laid out in the purchase of growing or other timber, or of lands on which timber is growing, and to cause the proper measure to be taken to have the same preserved for the future use of the navy.

If it were desirable to conserve live oak for shipbuilding, even for building men-of-war, it seems to me a stretch of the imagination that it is not equally desirable and constitutional to preserve the forests which conserve stream flow, which aids in navigation, a project in which the Government is spending and will spend large amounts of money. If it is not a constitutional right, I venture to say that a very large percentage of the appropriations made for various purposes under the Government, and especially appropriations made for the Department of Agriculture, are equally unconstitutional, but they are, as far as I know, without exception, made for the general welfare, and will stand the test of good business sense, even if there is a technical objection to them.

OTHER REASONS FOR THIS ACT.

WATER POWER.

I do not wish to depend on the relation between forestry and navigation as the only reason for urging this legislation. Indeed, that is in itself a minor consideration, but in order to overcome the constitutional objections of members of the Judiciary Committee this bill has been drawn to cover that objection. It must be apparent, however, to anyone that there are

other reasons of even more pressing importance why this policy should be undertaken, which will be among the advantages obtained if it is undertaken, as, for example, the value of water powers. This is one of the most important questions in our national life. Theoretically, the streams of the United States furnish 230,000,000 horsepower, while there is in use to-day only 5,250,000 horsepower. It is estimated that more than seven times the amount now in use is available at a cost comparable with the cost of steam installation, and that, in addition to that, from forty to one hundred and ten millions of horsepower may be made available at a reasonable cost. But even if the amount which could be installed on a basis of the installation of steam power were made available it would be equivalent to the entire mechanical power now in use in the United States to operate every mill, drive every spindle, propel every train and boat, and light every city and village in this country.

To show the importance of the conservation of power in relation to our industrial life, it would seem to be only necessary to instance that in New England alone, on the four navigable rivers which would receive some protection if this act becomes a law, there is invested in manufacturing industries $400,000,000; that the output of the factories is over three hundred and thirty millions; that they employ more than 150,000 persons, and pay between fifty and sixty millions of dollars in wages. These rivers are a source of power and are useful only to the extent of the power developed during the period of lowest water flow. Therefore great variation in water flow is detrimental, and if floods obtain they become a serious danger. The Merrimac River, on which are located the mills of Lawrence, Lowell, and Manchester, as well as many other places, illustrates the increased variation in river flow. This has become so great that manufacturing plants have been obliged to install steam power plants as auxiliaries, even when their output has not been increased. The agent of the Amoskeag Manufacturing Company, the largest cotton manufacturing plant in America, testified before the Agricultural Committee that his company had suffered a loss of $500,000 from two floods on the Merrimac River recently, and that the flow of the river had become so variable that it had been found necessary to install a 10,000-horsepower steam plant, and supplement the power obtained from the river at periods of low water.

NECESSITY FOR WOOD AND LUMBER.

It is estimated that our industries subsisting mainly on wood pay the wages of more than one and one-half million men and women and that the forests of this country, not counting growth in the meantime, will be entirely dissipated in about thirty years. Our forests now cover about 650,000,000 acres, or, relatively, one-fourth of the United States. Of this amount, 169,000,000 acres belong to forest reserves, or practically one-fourth of the total amount. These national forests contain, it is estimated, about one-fifth of all the timber standing. Forestry as an industry is practiced on 70 per cent of the public forests and only on about 1 per cent of the private forests, or on only about 18 per cent of the total area, though it should be said that much greater care is being used by all lumbermen than was the case a few years ago. Whether this is due to a desire to preserve the forest itself or to get the benefit of all the value there is in the log, owing to the increased prices of timber, is not important, but the statement of fact is well known. One of the largest lumbermen in the country, whose operations are carried on in a snow country, has recently stated that fifteen years ago his force averaged to produce 1,000 feet for each man employed, while now each man produces only a little over 300 feet, and he stated that this difference was almost entirely due to the difference in methods of cutting.

The yearly growth of wood in our forests amounts to about 7,000,000,000 cubic feet, and we are removing it at the rate of about 23,000,000,000 cubic feet. We use each year 100,000,000 cords of firewood, 40,000,000,000 feet of lumber, besides the product used in posts, fences, rails, cross-ties, and so forth. Since 1870 it is estimated that we have lost on an average of $50,000,000 worth of timber yearly from forest fires. Therefore it will be seen that we are taking from our forests about three and one-half times their yearly growth; and while our lumber cut has not increased over 2 per cent a year, the average price of lumber is increasing at the rate of about 7 per cent a year, and it should be added that owing to the condition of the supply of lumber, there being but five or six countries which have an excess to export, we are dependent upon ourselves. The purchase and organization of national forests in the eastern section of the country will be an object lesson of great value to the private owner. The basis for this statement has been clearly demonstrated in reclamation work in the West. Before the Government undertook that work more or less reclamation work had been done, but in such an ill-advised way that unless the conditions were most satisfactory the results were in most cases failures. The methods instituted by the Government have been followed by private individuals to such an extent that the results obtained from private enterprises have been even more important than those under Governmental supervision, and in the same way we may reason that the methods of conducting a forest reserve will naturally be imitated and followed by private individuals, so that we may expect much greater efficiency in the results obtained from private forests.

FLOODS.

It is stated that the direct yearly damage by floods since 1900 has increased from forty-five to two hundred and thirty-eight millions. Whether these figures are accurate or not it is difficult to determine, but there is no question about the fact that floods are increased by the removal of forests. That does not necessarily mean that extreme floods may not and will not exist, even though the country is thoroughly forested—and I propose to touch that question later—but the number of floods is greatly increased by the removal of forests. Freshets are attended by destructive soil erosion, the soil matter annually carried into lower rivers and harbors, or into the sea, from the two hundred and eighty-odd rivers in the United States reaching an amount estimated at 800,000,000 tons. This is a serious reduction of the value of upland farms, because it removes the best part of the soil from those farms. It increases the difficulties in navigating rivers, and, incidentally, the necessity for increasing appropriations for river and harbor development. It has been estimated that the annual loss to farms alone, on account of this soil erosion, is $500,000,000.

One of the important questions in connection with this subject is the relationship between forestry and floods. Floods are dependent on so many elements that it is difficult to obtain data which will cover every case, and this data must necessarily be spread over a long period of years. They depend on the amount of precipitation, the configuration of the watershed, the amount of surface forested, and many other minor elements which I am not going into at this time. It must, however, appeal to the common sense of anyone that a forest would hold and retain a much larger percentage of moisture than an open, cleared space, though the character of the surface in the cleared space would naturally be a considerable element in the amount of moisture which it would hold. If it were level land and tilled land, it would hold a large amount of precipitation, while if it were hilly and turfed, the precipitation would flow off easily, without sinking into the soil. But in the forest not only do the leaves and shrubs hold moisture, but the humus retains a large amount, and it almost invariably happens that the soil under the humus is porous and retains a greater percentage of moisture than most soils in the open. It may be true that when this soil and humus and all the other elements which go to make up the forest are thoroughly saturated, water will flow from a forest surface as from a cleared surface, but it will not do so at any other time.

The most careful investigations on this subject have been made by Prof. M. O. Leighton of the Geological Survey, and I quote his conclusions in part, and the result of his investigations on the Tennessee River, where observations have been made for twenty-four years:

It will be well to consider at the outset just what index may be used to determine the trend of flood tendencies. It is common in inquiries of this character to select and compare the highest stages attained in the several years of record, and because, perchance, higher floods may be shown in early years, many really competent persons have believed themselves forced into the conclusion that there is no change in flood tendency. The actual height attained by the maximum flood each year is, however, a matter of small consequence in such consideration. A little reflection will show how this must be true. The precipitation, which is the ultimate cause of floods, takes three courses, only two of which are really important in the present discussion, namely, the course along the surface of the ground directly into water courses; and that into the ground by percolation, with subsequent discharge into the rivers by seepage. In general terms, it may be stated that the water which causes floods is that proportion of the precipitation which the earth does not absorb and which therefore must flow along the earth's surface.

Now, it is apparent that when precipitation becomes so intense and long continued that it practically saturates the ground the rain that falls thereafter must take the direct route and floods must necessarily arise. Therefore the height of great floods is fixed, primarily, by the intensity of precipitation, and as the amount of rain varies from year to year, now bountiful and again scanty in what seem to be fairly uniform cycles of years, the observation of an especially high flood during an early year compared with that of a much lower one during a recent year can give no index to flood tendency in any river. The real index is of more fundamental origin than the mere occurrence of high floods.

When the question is asked, "Are floods increasing?" the considerations involved are not those of height, but those of duration and frequency. In other words, the question means "Are floods of more frequent occurrence and are there more days of flood than formerly?"

Speaking of the Tennessee observations, Professor Leighton refers to them in the following language:

A better comparison would apply between the number and depth of flood-producing rains and the number of flood days. Such a comparison

has been made on the Tennessee basin above Chattanooga. No other basins are here dealt with in this way because of the enormous amount of labor involved.

In addition to proving beyond controversy the increase in floods due to deforestation, the record is of interest because it shows how futile and misleading is the attempt to derive conclusions from flood records without taking into account records of precipitation. Inspection of the Chattanooga flood record shows a decided decrease in the number and duration of floods during the period of record. If this were taken alone it would controvert the forest-control idea. A comparison of the precipitation records on the drainage area, however, assures us that the rainfall has decreased, even to a greater relative extent than the floods. The final result is that the flood tendencies have increased.

The results for the Tennessee Basin cover twenty-four years, from 1884 to 1907, inclusive. Although the records of gauge height extend further back than the earlier date, the number of rainfall stations maintained on the basin previous thereto is not sufficient to render safe any conclusions with reference to precipitation. It is appreciated that a given depth of rainfall precipitated during the winter months will generally produce a greater run-off than the same depth would produce in August or September. Therefore an effort has been made to eliminate this source of error. Summing up the flood-producing rains for the 24-year period it is found that the total is 335, of which 313 occurred from December to May, inclusive, and the remaining 22 during the other portion of the year.

It is apparent that the number of such rains from June to November is not sufficient to afford a basis of comparison. Therefore only the December to May floods will be considered. In making this comparison, the ideal condition would be to compare the rainfalls and floods during identical conditions of climate, but such a refinement is impossible. On the other hand, the multiplication of data afforded by the large number of flood-producing storms in the December to May period warrants the conclusion that the varying climatic conditions in this period are compensated, and the final conclusions drawn from the result must be worthy of confidence. Dividing the periods covered by these 313 floods equally, two consecutive twelve-year periods are afforded, which give a basis of comparison. The floods in the later period, resulting from a given depth of storm precipitation, are clearly shown to be more severe than in the earlier period. The method of presentation further makes it possible to compute the increase in flood tendency due to deforestation in the Tennessee.

The relation between storms and floods in the Tennessee Basin during the periods December-May, inclusive, 1884–1895 and 1896–1907.

Period.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.	Storms.	Days of flood.
1884–1895	7	5	12	6	6	15	5	9	5	13	6	30	1	6	2	17	2	18	....	....	2	28	....	....		
1896–1907	8	3	11	10	9	23	11	30	4	13	1	6	1	8	3	20	....	....	1	11	....	....	1	17		
Precipitation, in inches	1–1.5		1.5–2		2–2.5		2.5–3		3–3.5		3.5–4		4–4.5		4.5–5		5–5.5		6–6.5		7–7.5		8–8.5			

If now we divide the number of flood days by the number of storms, the result will be the number of days per storm. Applying this to each of the series in the above table, the following result is reached:

Days of flood per storm, 1884–1895 and 1896–1907.

Period.	Storms, in inches precipitated.							
	1–1.5	1.5–2	2–2.5	2.5–3	3–3.5	3.5–4	4–4.5	4.5–5
1884–1895	0.7	0.5	2.5	1.8	2.6	5	6	8.1
1896–1907	.4	.9	2.6	2.7	3.2	6	8	6.7
Percentage increase	−43	80	4	50	22	20	33	−17

The algebraic sum of the above percentages is 149 and the average is 18.75, which sums up the effect of deforestation on run-off from 1884 to 1907, inclusive.

It would not be difficult to bring a much larger volume of evidence to show the value of forests and the necessity for their preservation, but sufficient has been said by me to indicate the following:

1. That this bill practically covers the contentions which have been made by forestry experts for the past twenty years.

2. That it has not only been recommended by the President and government officials who have had connection with this work but by the Conservation Commission, the meeting of governors, and by a larger number of business associations and other organizations than any legislation which has come to Congress for many years.

3. That in instituting this policy we are simply following the example of older nations, whose experience has proven not only its desirability but its necessity.

4. That the criticisms which have been made against this policy arise from two sources, those who hesitate about instituting a project which must necessarily involve large amounts of money eventually, and those who have a superficial knowledge of the subject and have concluded that there is no connection between forestry and stream flow. There is no necessity to answer the first class of criticisms; that is a matter of opinion. The answer to the second, however, has been conclusively made by Professor Swain, Mr. Pinchot, Mr. Bailey Willis, and Professor Leighton.

5. The constitutionality of this project has been passed upon by the Judiciary Committee of the House of Representatives; but I have shown that its value is not in any way limited to the constitutional provision which is admissible in this case, but extends to many other industries, and industries to be developed, so that its effect will be more widespread than any legislation which has recently been acted on by Congress.

6. This legislation has been repeatedly proposed in various forms during the past twenty-five years, and bills similar to this have passed the Senate twice by unanimous, or practically unanimous, votes.

7. It has been shown that it is a part of the conservation policy which is advocated and believed in by almost everyone who has given any thought or study to the subject. It will furnish a basis for a general governmental conservation policy. All political parties have advocated it. The way to commence conservation is to conserve something. The method of doing it is by adopting this act. The time to do it is now.

Now, Mr. Speaker, I would like to have the gentleman from Kansas use some of his time. [Applause.]

Mr. SMITH of California. Mr. Speaker, may I have the attention of the House for a starter? I will take my chance of holding its attention if I can get an even start with the others. Mr. Speaker, in my opinion this bill presents the most important and far-reaching piece of new legislation that has been presented to this Congress. It not only looks to appropriations that are absolutely appalling in their magnitude, but if I am not mistaken it changes the policy of the Government in a very important particular. The subject divides itself into two parts: First, the conservation of water or the regulation of the stream flow; and second, the production of timber commercially. I shall not dignify the first proposition with any extended discussion. It is so palpably a subterfuge, and has been brought into this question within the last year or so because the honorable committees of the House and the Senate, the Judiciary Committees, asserted that it was not within our constitutional power to embark upon this great scheme for the purpose of producing timber and selling it in the market, but that we must in some way tie the subject up with that of navigation. And as the gentleman from Massachusetts [Mr. WEEKS] has very properly said, they have now modified "the title of the act" so as to give it some color of reference to the subject of navigation. On the subject, however, of the regulation of stream flow there are two matters to be considered: First, the prevention of floods due to excessive rainfall and run-off; and second, the increase of the minimum flow of the stream for the benefit of power companies already established on the lower courses of the rivers.

I think no one has asserted that it is within the constitutional power of Congress to appropriate vast sums of money to increase the water power of private corporations, and yet if you will consider the hearings and follow the discussion of the enthusiasts upon this question you will find them referring to the low stage of the river nine times to where they refer to the high stage once. I conclude, therefore, that there is another subterfuge in that side of the case, and that what is really desired is to improve the low stage of the rivers and to increase the amount of hydro-electric power enjoyed by the companies on the lower course of the rivers.

But, I say, that phase of the question is so palpably a subterfuge that I refuse to discuss it at this time, further than to remark that there is the greatest difference of opinion between men who have given the subject full consideration, between the forest treatment and the meadow treatment on the mountain side for the purpose of regulating the flow, and, in my opinion, the better arguments and the safer conclusion are in favor of the latter side of the case. I appeal to gentlemen here to apply their everyday knowledge to see if it is not true that a hillside covered with grass erodes less and holds back the rainfall more than any timber-covered hill on the face of the earth.

Let it be borne in mind that those who advocate the forest treatment do not rely upon the tree growth to hold back the water in times of storm or to release the water from day to day

in times of drought. They rest on the cover of detritus that falls from the trees—the layer of leaves, branches, and so forth—the very things which superinduce devastating fires. In the western forests the strictest rules apply to the collection and burning of this débris that fires may be averted. Is it wise, then, for the Government to buy land and raise trees to produce litter on the ground where that very accumulation may spread a fire that will in a few hours wipe out the efforts of years?

It is stated in one of the reports made to Congress on this subject that the rains in the Appalachian Mountains are largely torrential, a precipitation of 3 to 8 inches in a day being common. Does anyone suppose that a forest cover or any other agency can hold back and regulate the run-off following such storms? Yet those are the storms which work the havoc and carry destruction before them in the valleys below. The ordinary rainstorm, such as might be absorbed by the forest cover, does no damage and fills up no river beds.

The second phase of the question brings up the question of cost. Congress has ordered two investigations of this subject. The first report, brought in some five or six years ago, asserted that to carry out the plan in these two localities, New England and the Southern States, it would be necessary to acquire by purchase 75,000,000 acres of land. The price was stated at from $10 per acre down. I guess we all know what happens when "Uncle Sam" goes into the market to buy land, either by condemnation or by private arrangement. But taking it at $10 an acre, you have $750,000,000 as the outlay for the acquisition of the plant to begin with.

It has always seemed to me that the friends of this proposition, when that report came in, felt a little like the man who inadvertently sent up his petition for "a barrel of pepper;" that they had overdone a good thing. Thereupon Congress was appealed to, and in a subsequent act two years ago it authorized the Secretary of Agriculture to again investigate this matter, and his report stated that we would have to purchase 23,000,000 acres of land, at prices which, he said, were substantially the same as the first ones. But there is not one line in this second report which undertakes to dispute or contradict the first one as to the acreage desired.

Of this amount, it is asserted that 5,000,000 acres are needed at once, so we have a present demand for the purchase of 5,000,000 acres, a present need for 23,000,000 acres, and an ultimate necessity for 75,000,000 acres. It may be remarked at this point, parenthetically, that our receipts this year will fall below our expenditures by $125,000,000.

Nor is this all. The bill before us does not confine its operations to the White and Appalachian Mountains. It is of general application, and under it forests may be laid out and lands purchased in any part of the country, and it is significant that a Member from Texas [Mr. STEPHENS] appeared before the committee and presented the claims of his State to have 100,000 acres bought on the headwaters of a certain stream in that State. Other States, I predict, will be heard from later.

It is proper to take some note of the character of the land that is to be purchased. It is universally described as lying on the higher mountain slopes, in some instances above the natural timber line. The soil is described as rocky and barren, and it is always admitted that the land is so unproductive that no individual will undertake its reafforestation for profit. It is distinctly and admittedly a proposition to sell to the Government worn-out lands which no one wants to cultivate or devote to any productive purpose. All this evidently on the theory that forests planted by the Government do not need any fertility of soil.

On such lands as these, remote from transportation, even from common highways, the Government is asked to go into the business of raising timber for future generations. Why, let me ask, should the Government go into the business of raising timber at all? It is said that our lumber supply is falling behind the demand. Well, what of it? Exactly the same thing is said of our meat and our bread supplies. Reference was recently made on this floor to a very interesting and instructive address delivered last fall in a western town, by Mr. James J. Hill, on the country's wheat supply. He proved as conclusively as statistics can that the time was in sight when we would be heavy importers of wheat if some change be not made. Did he argue from this that the Government should begin to buy land—and the very poorest land to be found—and go into wheat raising? By no means. He held true to the course which has made us a great people, and urged a renewal of individual enterprise under more enlightened methods. "Millions for education of the individual, but not one cent for paternalistic ventures," might well be the paraphrase at this time of a well-known saying. Jefferson taught that "the sole function of government is to govern the people," leaving productive and other enterprises to individual effort. That is the rock on which we have builded. It has proven a safe and sure corner stone. Shall we abandon it in this particular? There is not a single argument in favor of the government planting of forests that does not prove by the same degree that it should begin to raise cattle and wheat to meet the needs of the future. The whole doctrine is false and pernicious.

As a matter of truth, the country is worse alarmed than hurt over the lumber situation. It has been asserted publicly many times that in twenty or twenty-five years our lumber will all be gone. But that is a wild prediction in the face of the figures given by the same authority that our forest areas amount to 2 acres per capita, and the transition from wood to other materials for structural and fuel purposes was never so rapid as at the present time. Brick, concrete, metal, paper, and glass compose our buildings, bridges, and fences; while gases, oils, and electricity are fast supplanting wood in the production of heat, especially for domestic purposes. The people will not go houseless nor cold if not a single tree be planted.

But the people will prove themselves equal to this emergency, if one is at hand, just as they have met other important situations. They are already doing so. In California hard woods are scarce, but the people are not wringing their hands and waiting for the Government to come and plant such forests for them. By no means. They are doing just that thing for themselves. Let me read a paragraph from a recent issue of the San Diego Union:

From present indications the growing of eucalyptus trees promises to become an extensive and prosperous industry in San Diego County in the near future. At present the prospect is that many thousands of acres will be devoted within the next year or two to the growing of these trees. Already a very substantial beginning has been made. As was noted in these columns yesterday, in the Escondido country 1,500 acres will be planted this year. A San Francisco concern has 500 acres of a 4,000-acre tract there ready for planting, and a Los Angeles company has 700 acres ready for planting. Near Encinitas the Santa Fe has planted 800 acres on its 8,000-acre tract. The company has its own nurseries, and grows its trees from the seed. At present it has 25 men engaged in transplanting, and the force will be increased to 35 during the present week. The work of planting the entire tract of 8,000 acres, however, will take many months, as much of the land is covered with brush, which must be cleared. In various other parts of the county, notably in El Cajon valley, there is much interest in eucalyptus, and the planting is so extensive that the nurseries are hardly able to keep up with the demand.

What is being done in San Diego County is being duplicated in every county in my district as well as in other parts of California. And these plantings are not on sterile and inaccessible lands either, but on rich bottom land near railroads, and even down to tide water, where markets may be reached. I read, too, that in Eastern States the maple, birch, catalpa, and other good lumber woods are being planted privately. The American people can be depended upon to supply their daily needs in woods as well as in foods.

What is the matter with the Appalachians and the White Mountains? Nothing. Nor is there anything the matter with people living therein. They are abundantly able, and I think entirely willing, to solve their own problems.

The idea of afforesting these mountain sides should be largely abandoned and the meadow treatment substituted. Good grasses will grow wherever the soil will sustain enough tree life to affect the run-off of rains and snows. The meadows will give more immediate returns to the husbandmen, restore the soil more quickly, defeat erosion more effectually, and benefit the rivers below more surely. The ideal conditions are found where some trees are scattered through the meadows or where the wood lot is well sodded down.

In the Middle West this combination is common where the prairies break onto the river bottoms. What were rough, eroded clay hills, unproductive and uninviting a quarter of a century ago, are now valuable grazing and timber lands; and the Government did not buy nor plant a single acre. What the people of Iowa and Missouri have done, and are doing, the people of the Carolinas and New England can do.

It is unquestionably true that the subject of forestry has been a great "fad" of late years. In voluminous writings on it there has been little or no reasoning; only romancing. But we are near the end of that sort of thing now, and before the country is committed to this scheme of fabulous expenditures and disputed theories, let us have a more thorough examination of the business side of the question. Following paternalistic schemes is like running before the wind. There is but one safe rock on which this Government can stand—individualism, now and forever.

Section 4 of the bill is particularly objectionable to Representatives from national-forest States. Its provisions are as follows:

SEC. 4. That from the receipts accruing from the sale or disposal of any products or the use of lands or resources from public lands, now or hereafter to be set aside as national forests, that have been or may

hereafter be turned into the Treasury of the United States and which are not otherwise appropriated, there is hereby appropriated for the fiscal year ending June 30, 1909, the sum of $1,000,000, and for each fiscal year thereafter a sum not to exceed $2,000,000 for use in the examination, survey, and acquirement of lands located on the headwaters of navigable streams or those which are being or which may be developed for navigable purposes: *Provided*, That the provisions of this section shall expire by limitation on the 30th day of June, 1919.

In other words, $1,000,000 this year and two millions each year thereafter for nine years; in all, $19,000,000 are to be taken from the people of the West and used to buy back lands in Eastern States for which the owners have no further use, or think they have none.

I have heretofore raised my voice in this Chamber and elsewhere against the system of taxation which the National Forest Bureau is fastening on western industries, and I propose to continue to protest against it as long as I can find an opportunity to do so. This system is contrary to all precedent as well as to the theory of our institutions. From the beginning of our Government down to a few years ago it was the unvarying policy of this Government to give to the people the natural resources for their enjoyment, the increment inuring to the benefit of the individual. The lands in the great Mississippi Valley States, the mineral wealth of the East and the West, and the use of rivers and harbors were a free-will offering to those who would enter in and make profitable use of them. All of the products, too, were bestowed with the same idea of letting the citizens enjoy the bounties of nature. The pioneers in every State had free rails for their fencing, free logs for their houses, free range for their stock, and free hay for winter's use. Not one penny was collected for the benefit of the Public Treasury till the crest of the Rockies was crossed. Now all this is to be changed. The announced policy of the Forest Service is to "take all the traffic will bear" for every product of the West and collect every cent possible for the enjoyment of any of the uses of the forests. Few people in the East have any conception of the extent to which this matter of levying tribute is being carried. I do not charge any sectional feeling in this matter. The thing has grown up without direct sanction of law, but this section of the bill under consideration will tend to clinch it down and make it permanent.

I again assert what I stated on this floor a few weeks ago, that every avenue of taxation is sought out, and new ones are constantly being looked for. I then referred to a tax that is laid on apiarists in national forests, and I want to submit a receipt which came in my mail this morning. It reads as follows:

Form 627.

UNITED STATES DEPARTMENT OF AGRICULTURE,
FOREST SERVICE,
Washington, D. C., July 23, 1907.

(This certificate confers no rights, but is a mere acknowledgment that the remittance described on its face has been received.)

There has been deposited with me by John Hanretty, of Acton, Cal., a postal money order for $5 on account of apiary, June 10, 1907, Santa Barbara National Forest.

$5. GEO. E. KING, *Fiscal Agent.*

Acton is on the edge of the Mojave Desert in Los Angeles County, Cal., where no forests abound, but only sagebrush, cactus, and the yucca are seen. Mr. Hanretty, I am informed, is a veteran of the civil war, has an aged wife to support, and rolls in the luxury of a $12 a month pension. A system of taxation that reaches the very meager income of such people must be considered almost complete. And this tax is laid for what? Ostensibly for the value of the nectar which the bees sip from the bloom of the sage and the cactus.

I have heretofore spoken of the burdens laid on the mining industry—charges of so much per year for a "permit" to operate a neighborhood quartz mill, and so forth—and the open and avowed policy of charging miners and stockmen as high rates as possible for timber for the mines and range for live stock. If now a new demand of two millions a year is laid on the western forests, we may be sure that new schemes of taxation will be devised and applied more relentlessly than at present. Against this system, or anything approaching it, I enter a most positive protest. It is unfair, inequitable, and unjust.

Not only are these burdens being laid upon industries which must bear their full share of the expense of the state and county governments, but the State's field of taxation is being invaded in a very important particular. Hydro-electric power plants located upon or whose wires cross any part of the national forests are being called upon to pay into the Federal Treasury large sums annually, though they are located upon nonnavigable streams which have their source in and traverse only one Commonwealth. They are in no particular interstate, and the right to gather revenue from them belongs and should be accorded to the States exclusively. In this particular I am not making an appeal to have these natural monopolies exempted from taxation. On the contrary, they should pay well for the special privilege which they enjoy. But the privilege—the use of state waters—comes from the State, not from the Nation, and the State alone should enjoy the revenue.

I have somewhat unintentionally wandered from the main question before the House, but these matters of taxation and charges are so bound up in this bill that I could not lose the opportunity to raise my voice in protest against the evils which are being fastened upon the people and the States of the West.

Just one word more, Mr. Speaker. There has been some suggestion that because we have national forests in the West we should not oppose the same things in the East. That does not touch the point at issue. In the West the Government has simply taken charge of land which it already owns, and is engaged in preventing the destruction by fire and wasteful methods of lumbering of the forests which nature has bestowed upon us. It has never been the intention of Congress to "create an industry" out of the western forests, but only to husband what we have. Between that and buying old worn-out farms for the purpose of engaging in a productive industry there is a very wide difference, indeed.

Mr. WEEKS. Mr. Speaker, I ask unanimous consent that all who speak on this question be given permission to extend their remarks in the RECORD for two days.

The SPEAKER. Is there objection?

There was no objection.

Mr. WEEKS. Mr. Speaker, I yield one-half minute to the gentleman from Tennessee [Mr. GAINES].

Mr. GAINES of Tennessee. Mr. Speaker, I shall vote for this bill, but I can not now give the reasons. I will discuss another important matter, to wit: The creation of a new Cabinet place, to be known as the "department of national highways and good roads."

On Saturday last I introduced a resolution on the subject which I here insert:

House resolution 602.

Whereas the Supreme Court of the United States has finally decided and settled that Congress has the power to build highways and roads between the several States, whereby the general welfare can be greatly appreciated: Therefore

Resolved, That the Committee on the Judiciary be, and it is hereby, directed to report to this House a proper bill for creating an additional member of the Cabinet, or department of government which shall be known as the "department of national highways and good roads," and report the same as soon as practicable.

The Supreme Court of the United States on January 7, 1907, in a unanimous opinion in the case of Wilson against Shaw, reported in Two hundred and fourth United States Reports, pages 3 to 35, for all time settled that Congress has the constitutional power to build "interstate" highways and other national roads. The question can be no longer mooted. State and interstate roads are greatly needed. Let this great national project start. Work it out with the limits of the constitutional powers of Congress, protecting at all times the rights of the States.

I extend my remarks by inserting pertinent extracts from the Supreme Court next alluded to:

SUPREME COURT OPINION.

Again plaintiff contends that the Government has no power to engage anywhere in the work of constructing a railroad or canal. The decisions of this court are adverse to this contention. In California *v.* Pacific Railroad Company (127 U. S., 1, 39) it was said:

"It can not at the present day be doubted that Congress, under the power to regulate commerce among the several States, as well as to provide for postal accommodations and military exigencies, had authority to pass these laws.

"The power to construct, or to authorize individuals or corporations to construct, national highways and bridges from State to State is essential to the complete control and regulation of interstate commerce.

"Without authority in Congress to establish and maintain such highways and bridges, it would be without authority to regulate one of the most important adjuncts of commerce.

"This power in former times was exerted to a very limited extent, the Cumberland, or National, road being the most notable instance. Its exertion was but little called for, as commerce was then mostly conducted by water, and many of our statesmen entertained doubts as to the existence of the power to establish ways of communication by land; but since, in consequence of the expansion of the country, the multiplication of its products, and the invention of railroads and locomotion by steam, land transportation has so vastly increased, a sounder consideration of the subject has prevailed and led to the conclusion that Congress has plenary power over the whole subject.

"Of course, the authority of Congress over the Territories of the United States, and its power to grant franchises exercisable therein, are and ever have been undoubted.

"But the wider power was very freely exercised, and much to the general satisfaction, in the creation of the vast system of railroads connecting the East with the Pacific, traversing States as well as Territories, and employing the agency of state as well as federal corporations." (See Pacific Railroad removal cases, 115 U. S., 1, 14; 8.)

In Luxton *v.* North River Bridge Company (153 U. S., 525, 529), Mr. Justice Gray, speaking for the court, said:

"Congress, therefore, may create corporations as appropriate means of executing the powers of government, as, for instance, a bank for the purpose of carrying on the fiscal operations of the United States, or a railroad corporation for the purpose of promoting commerce among the States. (McCulloch *v.* Maryland, 4 Wheat., 316, 411, 422; Osborn *v.* Bank of United States, 9 Wheat., 728, 861, 873; Pacific Railroad

removal cases, 115 U. S., 1, 18; California *v.* Pacific Railroad, 127 U. S., 1, 39.) Congress has likewise the power, exercised early in this century by successive acts in the Cumberland or National road, from the Potomac across the Alleghenies to the Ohio, to authorize the construction of a public highway connecting several States." (See Indiana *v.* United States, 148 U. S., 148. See also Monongahela Navigation Company *v.* United States, 148 U. S., 312.)

These authorities recognize the power of Congress to construct interstate highways. A fortiori, Congress would have like power within the Territories and outside of state lines, for there the legislative power of Congress is limited only by the provisions of the Constitution, and can not conflict with the reserved power of the States. Plaintiff, recognizing the force of these decisions, seeks to obviate it by saying that the expressions were obiter dicta; but plainly they were not. They announce distinctly the opinion of this court on the questions presented, and would have to be overruled if a different doctrine were now announced. Congress has acted in reliance upon these decisions in many ways, and any change would disturb a vast volume of rights supposed to be fixed; but we see no reason to doubt the conclusions expressed in those opinions, and adhere to them. The court of appeals was right, and its decision is affirmed. (See GAINES's speech, 1st sess. 60th Cong., p. 4292; refers to this case, and historical data on National road and acts of Congress as to it.)

You will find in the first session of the Sixtieth Congress, page 4292, that I referred to this Wilson-Shaw case and other valuable historical data on the subject of good roads, giving in full the opinion of the Court of Claims in the case, which opinion was affirmed in the Supreme Court and is found in 148 United States, page 148 (cited supra). The opinion in this Indiana case contains a very valuable historical tracing of the national road and the several acts of Congress as to it. I had this opinion inserted in the RECORD for educational purposes on this subject. There are many calls on me for copies of this Supreme Court decision and the opinion in the Indiana case, and I take this way of citing the Members and the public to the RECORD where these authorities can be found.

Mr. WEEKS. Mr. Speaker, I yield two minutes to the gentleman from New York [Mr. COCKS].

Mr. COCKS of New York. Mr. Speaker, I doubt very much if anything I can say will change any votes in this House. I am very much in favor of this bill, although I come from a district that will not be affected and can not possibly derive directly any benefit from this provision. This bill has been under consideration in our committee for a long time. We have had numerous hearings on it. The subjects embraced here are of vast importance to this country. It is the beginning of a policy that may be a departure from anything heretofore started by this Government with regard to our forest reserves, but I know not that that is any reason why we should not begin. The conservation of our forests and our stream flow is as important as anything with which we have here to deal, and which is of such great advantage to the country generally. We believe that this bill has been so drawn as to safeguard in every way the acquisition of these lands, that they shall only be acquired after due and careful consideration by a commission, which it is fair to assume will be composed of men of as good judgment as any we could possibly select, representing both branches of this Government, and we fully believe that a very large number, perhaps a large majority, of the people of this country are in favor of it.

The SPEAKER. The time of the gentleman has expired.

Mr. SCOTT. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. Mr. Speaker, I think this is one of the most vicious measures ever presented to this House. It provides for the expenditure certainly of $19,000,000, and probably for $750,000,000. It provides for the expenditure of this money for a purpose not needed at a time when the Public Treasury is bankrupt. To-day we have a deficiency of $86,000,000 in the Public Treasury, and at the end of this fiscal year that deficit will amount to $150,000,000.

I fail to understand where the Appalachian and the White Mountain ranges connect, except, perhaps, in the combination which has evidently been made to get votes for this measure.

Mr. GARRETT. They will connect at the Treasury Department if this measure passes.

Mr. MADDEN. That is where they will connect. I have been wondering whether, if this bill becomes a law, the campaigns of the candidates for Congress in the districts embraced in this forest reserve will be made upon the question of the tariff or whether the campaigns will be fought out on the question of how many farms the candidates can sell to the Government of the United States at a high price.

It is not fair to the American people to pass a law like this, authorizing a commission without any experience to buy lands at an unknown price, in indefinite quantities, without a knowledge of what is to be accomplished by the purchase of the lands. Here we are embarking on a scheme that involves the expenditure of a million dollars the first year, $2,000,000 a year thereafter for nine years, and authorizes the purchase of 75,000,000 acres of land anywhere on the continent of the United States at any price that the commission appointed in the bill may see fit to pay.

We are considering this measure, which is of such vast importance, under suspension of the rules, and under suspension of the rules no Member of this House has any right whatever to offer an amendment to the bill, so that no matter how anxious any person here may be to propose an amendment that would perfect the bill in some way and make it more acceptable to the general public, no such opportunity is afforded; and because no such opportunity is afforded, and because I believe the bill to be vicious, and because I believe that, if it is enacted into public law, sooner or later it will create public scandal, I propose to vote against the bill.

The SPEAKER. The time of the gentleman has expired.

Mr. OLLIE M. JAMES. Will the gentleman yield for a question?

Mr. MADDEN. My time has expired.

Mr. SCOTT. Mr. Speaker, I yield five minutes to the gentleman from Missouri [Mr. RUCKER].

Mr. RUCKER. Mr. Speaker, five minutes is not time enough to discuss the provisions of this bill. The measure before the House for consideration to-day does not betray the real purposes of those back of this scheme. I do not mean to impugn the motives of gentlemen who are urging the passage of this bill, but I do say, and wish I could impress upon the minds of gentlemen here, the fact that it does not disclose the real purpose of those who are advocating the passage of the so-called "Appalachian forest bill."

Let me say to the Members of this House, if we pass this measure to-day, which takes from the Federal Treasury $1,000,000 this year and $2,000,000 for the next eight or nine years to come, that when that money shall have been spent we will have embarked upon a scheme the completion of which will take from the Federal Treasury $900,000,000 or $1,000,000,000 for which the people of the United States will receive practically no benefit. [Applause.]

Gentlemen talk about preserving the average flow of streams. I want to say to you that scientific men who have studied this question and have expressed their opinion upon it tell us that the streams in the region affected by this bill are not prejudicially damaged by reason of the denudation of the forests, but justify the conclusion that the damage more likely results from the farming of the lowlands adjacent to the streams. When we begin, Mr. Speaker, the buying of mountain ranges throughout the country from untold numbers of people, regardless of cost; when we commit the United States Government to the stupendous task of regulating and controlling when and how much timber every man shall cut for his firewood or for lumbering purposes, it will not be long before we will be called upon, in the interest of the preservation of stream flow, to regulate how the people living in the mountain regions shall cultivate the lowlands.

If we pass this bill to-day we will soon be called upon to authorize the Secretary of Agriculture, without limitation or restriction, to go into the open markets and buy mountain lands at such prices as the owners may place upon them. The purpose which brings this measure before the House to-day will not be accomplished until the Federal Government shall have purchased land aggregating something like from 75,000,000 to 100,000,000 acres of worthless lands, all in the interests of preserving the average flow of water in the spring branches and small rivers which flow from the Appalachian Mountains. I say it would be better and, in my opinion, less expensive to take money from the Federal Treasury and buy at the market price all the commerce which will pass over any of these streams for the next fifty years.

This scheme will cost the people of the United States far more than that great project to which we all give support, the construction of the Panama Canal, without any corresponding benefit and privileges to the American people.

Mr. Speaker, I would like, if I had the opportunity, to discuss the provisions of this bill; but in the five minutes allotted me I can not do that. Therefore I have contented myself with defining my position on this question and announcing to the House that I intend, in obedience to the oath I have taken, as a matter of fidelity and integrity to those I represent, to cast my vote against this scheme, which I believe to be fraught with more harm and more danger to the American people than any measure which has yet been before this Congress. I yield back whatever time I have remaining. [Loud applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. WEEKS. I now yield to my colleague from Massachusetts [Mr. LAWRENCE].

Mr. LAWRENCE. There is an increasing demand throughout the country for a broader and more liberal policy in the de-

velopment of the Nation's waterways. That demand has been voiced in speeches by the President, by Mr. Taft, and Mr. Bryan at conventions of both the great political parties, by resolutions adopted by the Rivers and Harbors Congress, by chambers of commerce, and other representative bodies. It is undoubtedly true, as stated in the report of the Inland Waterways Commission, that while our waterways are better adapted to the needs of the people than those of any other country, yet the rivers of no other civilized country are so poorly developed, so little used, or play so small a part in the industrial life of the Nation. It has been stated by a recognized authority that one of the causes, if not the chief cause, for Germany's industrial success has been reduced cost of transportation made possible through comprehensive development of her waterways.

There is little doubt that in response to the demand of which I speak Congress will make more liberal appropriations in the future than it has in the past toward the solution of the problems of water transportation. This will involve consideration of questions relating to the development of navigation and of water power in connection therewith, the construction of reservoirs at the headwaters of our streams, and the treatment of every river system as a unit. It is folly for the Government to expend great sums of money in the development of our navigable streams and at the same time pay absolutely no attention to the preservation of the forests at their headwaters.

I am one of those who believe that the people receive as great returns from the investment made in river and harbor work as from any other investment made by the Government, and I am also convinced that the benefits to be derived from the expenditure proposed in this bill can hardly be overestimated. The fact can not be disputed, I think, that mountain forests are of the greatest benefit in preventing floods, in maintaining navigable depths, and in retaining the soil upon the mountains. Large sums of money now expended for dredging will be saved if we can prevent gravel, sand, and silt from being washed into our streams, thereby filling up the channels and forming obstructions.

Every friend of waterway development should vote for this bill. It is not only an important but a necessary step in the accomplishment of that which they so much desire. The report of the committee presenting this bill calls attention to the comprehensive schemes of protecting forests at the headwaters of mountain streams now being worked out in other countries. No one can estimate how much would have been saved had these countries acted more promptly. The United States should heed the lesson, and there should be no further delay. [Applause.]

Mr. WEEKS. I yield three minutes to the gentleman from North Carolina [Mr. THOMAS].

Mr. THOMAS of North Carolina. Mr. Speaker, I regard the passage of this bill as a matter of absolute necessity for the protection and preservation of the water powers and the agricultural lands of North Carolina and the whole South, as well as New England. I think gentlemen are unnecessarily alarmed about this bill. The gentleman from Illinois [Mr. MADDEN] argued that the bill would take a large amount of money from the Federal Treasury. It is true that the bill does provide for the expenditure of $19,000,000, but the funds to be used under the provisions of the bill are derived from the amount of moneys which come into the Treasury from the sale of the products or the use of the resources of the national forests, so far as they are not now appropriated. The law at present provides that 25 per cent of the money so received shall be paid to the States or Territories in which such forests are located for schools and road purposes. It is to be particularly noted that this bill does not change that plan, but rather extends it to the States or Territories in which the national forests may be acquired.

Section 4 of the bill provides:

That from the receipts from the sale, or the disposal of any products, or the use of lands or resources from the public lands now or hereafter to be set aside as national forests that have been or may hereafter be turned into the Treasury of the United States and which are not otherwise appropriated, there shall be available $1,000,000 for the fiscal year ending June 30, 1909, and not to exceed $2,000,000 for each fiscal year thereafter, to be used in the examination, survey, and acquirement of lands located on the headwaters of navigable streams, or those which are being or which may be developed for navigable purposes.

And further provides that the provisions of this section shall expire by limitation on June 30, 1919. The expenditure of the money is to be gradual and judicious. The sections of the country to be particularly benefited are parts of the States of Tennessee, Virginia, Alabama, Georgia, Kentucky, North Carolina, West Virginia, South Carolina, and Maryland, in which are located the Southern Appalachian Mountains, and the States of New Hampshire and Maine, in which are located the White Mountains. Forest reserves have already been established in the Western States of the United States.

I am unwilling to expend any money either from the Federal Treasury or from the receipts from the public lands set aside as national forests unless I believe that the expenditure of the money is necessary and for the benefit of the people. But the cry of "economy," used as an argument against this bill, comes with poor grace from some of the Representatives upon the floor of the House, who are willing to vote $3,500,000 per year for ship subsidy and large sums of money for other objects and purposes.

The expenditure of this money under this bill, safeguarded as it is and not a direct charge upon the Federal Treasury, is absolutely necessary, in my opinion, for the interest of my State and of the South. The bill has been carefully considered, and, as amended by the House substitute for the Senate bill, it is within constitutional limitations.

Mr. Speaker, the passage of the measure is necessary, in the first place, for the preservation of our inland waterways and navigable streams. The relation of forests to the use of the inland waterways is shown by the following quotations from the reports of the Inland Waterways Commission and the National Conservation Commission:

RELATION OF FORESTS TO THE USE OF INLAND WATERWAYS.

Our river systems are better adapted to the needs of the people than those of any other country. In extent, distribution, navigability, and ease of use they stand first. Yet the rivers of no other civilized country are so poorly developed, so little used, or play so small a part in the industrial life of the Nation.

The first requisite for waterway improvement is the control of the waters in such manner as to reduce floods and regulate the regimen of the navigable streams.

Every stream should be used to the utmost; every river system, from its headwaters in the forest to its mouth on the coast, is a single unit and should be treated as such.

A mountain watershed denuded of its forest, with its surface hardened and baked by exposure, will discharge its fallen rain into the streams so quickly that overwhelming floods will descend in wet seasons. In discharging in this torrential way the water carries along great portions of the land itself. Deep gullies are washed in the fields, and the soil, sand, gravel, and stone are carried down the streams to points where the current slackens. Since the extensive removal of the forest on the upper watersheds there has been a vast accumulation of silt, sand, and gravel in the upper-stream courses. Examples of reservoirs completely filled are already to be seen on almost every stream. In the degree that the forests are damaged on the high watersheds, then inevitable damage results to water power and navigation through increased extremes of high and low water and through vast deposits of gravel, sand, and silt in the stream channels and in any reservoir which may have been constructed.

The chief obstacles to navigation, then, are lack of water during portions of the year and detritus which is washed into the streams and gradually fills the channels or forms obstructions at the mouth. Were the flow uniform the amount of water carried by a river during the year would be sufficient to provide a good depth at all times. But the flow is uneven; there is too much water at one time and not enough at another. The floods of the spring waste the water which should be available to maintain a navigable depth during the summer and fall. To lessen this inequality of flow should therefore be the aim of all measures for the development of our waterways. If the rivers could be kept always in gentle flood, a relatively small expenditure for reservoirs, locks, and dams would be required. In the same way, if means could be found to prevent silt and sand from being washed into the streams the enormous cost of dredging would be largely done away with. The function of the forest and of the humus beneath as a storage reservoir is of high importance, yet in relation to navigation and the storage of storm waters the influence which the forest has in checking erosion is of equal, if not greater, value.

In the Southern Appalachians the fullest use of water resources can be secured only by carefully guarding the natural conditions which control them. The valuable water resources of this region depend absolutely upon the maintenance of a protective forest cover. Without this forest cover the water power of the region can never be developed to the full, and in the same way the navigable streams can not be kept from silting up if the forest cover about their headwaters is removed. The protection of these areas is a large undertaking, but it is necessarily the first undertaking, since it is fundamental to the development and utilization of the water resources. If the forest is not first protected, damage to water resources will be far-reaching. If the forest is preserved, the benefits from the standpoint of water utilization will be widely diffused, even far beyond the borders of the Appalachian region.

The opinions here quoted represent the almost unanimous views of all who have investigated the relation between mountain forests and navigable rivers.

The bill which the Committee on Agriculture has reported is in line with the policy of conservation as recommended by the President and the National Conservation Commission. It provides for especially an adequate programme of protection to the mountain forests by giving the Federal Government the right to cooperate with the States or with private individuals, and by the acquisition of lands where such are necessary. Further, it provides the most natural arrangement for defraying the cost of such acquisition, that of using the funds which come to the Treasury from the national forests already established, and the bill necessitates the appropriation of no additional sums of money in carrying out this project. It has been the policy of the Government to improve its navigable streams by the expenditure of large sums of money, in some cases at their headwaters. If the National Government has the power to dredge the rivers, harbors, and navigable streams

of the country, it also has the power, in the opinion of the Judiciary Committee, to conserve and protect the stream flow of the navigable streams from the source or headwaters to the mouth of such navigable streams.

The passage of this measure is also, in my opinion, necessary for the preservation of the water powers of New England and the South. According to the Baltimore Manufacturers' Record, in a very clear and comprehensive article upon the "South and its resources," the South to-day has about 5,000,000 horsepower, estimated, of water power within its borders. Hardly 500,000 horsepower of the water power in the southern streams has yet been made available for economic purposes. North Carolina especially is rich in water power, and cotton mills are scattered throughout the length and breadth of the State, most of them operated by water power as well as steam.

The following statement shows the increase in the manufacturing interests of North Carolina as far as cotton mills are concerned:

Cotton mills.	1880.	1900.	1908.
Spindles	92,385	1,134,909	2,878,148
Looms	1,790	25,469	53,446
Cotton used—pounds	11,832,641	190,138,759	298,192,851

The extent of water power in the South which would be directly or indirectly benefited by the establishment of forest reserves is fully stated in the article to which I have referred from the Manufacturers' Record, and which is inserted as a part of my remarks, as follows:

SOUTHERN WATER POWER.

One resource in southern production has just begun to be really developed—the water powers in Maryland, Virginia, West Virginia, the Carolinas, Georgia, Alabama, Tennessee, Arkansas, and Texas. Most of them are in streams that flow from the Appalachians. Their potentialities are indicated in the following table, showing the estimated minimum horsepower in certain rivers:

Stream.	Estimated minimum horsepower.	
	For the year.	For six high-water months.
Potomac	131,800	349,556
James	155,000	236,474
Roanoke	131,000	215,709
Pedee	167,800	256,945
Santee	319,590	472,000
Savannah	209,000	314,600
Chattahoochee	145,000	228,800
Coosa	104,580	177,880
Monongahela	58,900	235,715
Great Kanawha	335,000	853,420
Tennessee	973,600	1,589,474
Total	2,731,270	4,929,474

This estimate does not deal fully with such streams as the Big Sandy, Cumberland, Kentucky, Tallassee, Catawba, Shenandoah, Congaree, Etowah, Cheat, Hiawassee, Clinch, White, Ohio, Red, Brazos, Trinity, and the Rio Grande; nor does it include potentialities of streams with less than 500 horsepower. It is, in effect, merely suggestive of the power that will belong to the South when all such water resources have been properly made available under a system that will provide for protection of the headsprings of the streams and for the conservation, as far as possible, by means of storage reservoirs or otherwise, of the regularity of their flow. Hardly 500,000 of the water power in southern streams has yet been made available for economic purposes.

So that, Mr. Speaker, this bill, I believe, is in line with the progress and development of the section of the country from which I come. I want to do everything which will aid and help the development of that great section of our country—the Southland—and I do not want to do anything that will retard its growth and progress. For the past twenty years capital has realized the richness of the South and has come into that section of the country prepared to cooperate with our people in its development. The energy of our southern people, combined with the South's great resources and the influx of capital, has caused the South to go forward within the last two decades and to make most marvelous progress. As has been well said by an eminent writer—

The South blooms with wonderful groves and orchards; her map is a maze of railroads; the throb of machinery, the clang of manufactories, the whir of her mills, the glisten of her golden grain fields, the wondrous white of her cotton patches, the uncovering of the myriad veins of mineral wealth that mesh her confines—these and many values more present the picture of now.

The South must go forward and not backward, and this bill will help to protect and develop her wonderful resources in water power.

Mr. Speaker, the protection of the navigable streams, the preservation of the water power of this country, and especially of my State and the South, I honestly believe to be involved in this bill, and I think its passage to be absolutely essential. The amount of money is small in comparison with the benefits which will be reaped. It has been suggested that a good part of this money is not to be used in the South, but would go to New England. Under the provisions of this bill as framed I am satisfied that the South will have a square deal, and the Southern Appalachian region will get its fair proportion of this money, as well as the mountains of New England, the White Mountains. This is a national as well as a state matter. In fact, it is neither state nor sectional, but national.

The passage of this bill is also necessary, Mr. Speaker, for the prevention of floods and flood damage. Flood damage in the United States has increased from $45,000,000 in 1900 to $118,000,000 in 1907. All of the rivers on whose watersheds the forests have been heavily cut show flood increases. In eastern Tennessee and western North Carolina, in the region in which the forests have been heavily cut, great floods of water sweep down the mountains, denuding the agricultural lands and sweeping away millions of dollars' worth of property.

The passage of the bill is also necessary, Mr. Speaker, for the prevention of soil wash. The annual soil wash in the United States is estimated by the Inland Waterways Commission at about 1,000,000,000 tons, of which the greater part is the most valuable portion of the soil. It is carried into the rivers, where it pollutes the water, necessitating frequent and costly dredging, and reduces the efficiency of the work designed to facilitate navigation and prevent floods. Soil, when once lost, is replaced with great difficulty, if at all. Consequently the protection of the forest on the slopes, which are too steep otherwise to be utilized, means actually an immense gain in soil. The forests, when protected and preserved, act like a sponge. They absorb the water, thereby preventing floods and freshets, and they also give out the water, thereby irrigating the agricultural lands.

The Committee on Agriculture, in the report signed by every Democrat upon it except two and by every Republican except three members, shows further that the experience of other countries proves that the protection of the forests at the headwaters of important streams is imperative.

The committee says:

The relation of the mountain forests to the navigability of inland water is the same the world over. Every country that has maintained an even and sufficient flow of streams for the purposes of commerce has had to maintain and in some cases establish upon the headwaters of the streams forests to hold the soil in place and to prevent overwhelming floods.

Germany stands in the forefront of nations in inland waterway development, and she has all of her high mountains protected by forests. These forests have been under government management for a hundred years and they are the most productive and profitable in the world, yielding an average net return of $2.40 per acre.

The stripping of the forests from the mountains of France was unchecked until 1860, by which time 800,000 acres of farm land had been ruined or seriously damaged and the waterways practically destroyed. The population of 18 departments had been reduced to poverty and forced to emigrate. A futile attempt was then made to check the torrents by sodding. It was only by the acquisition by the Government of the bare lands, the building of stone walls for the gathering of silt and the planting of trees on the soil held in check by those walls that satisfactory results were accomplished. The cost of this method has often been as much as $50 per acre. By 1900 $15,000,000 had been spent and the French Government has continued the work by acquiring each year 25,000 to 30,000 acres of land. The present programme calls for the expenditure of $50,000,000 on this work. About one-fourth of the mountain streams have been brought under control and the balance are beginning to show indications of improvement.

Italy has suffered extremely from the ruin which follows the removal of protective forests. One-third of all the land is unproductive, and though some of this area may be made to support forest growth, one-fourth of it is beyond reclamation, mainly as the result of cleared hillsides and the pasturing of goats. The rivers are dry in summer; in spring they are wild torrents, and the floods, brown with the soil of the hillsides, bury the fertile lowland fields. The hills are scored where the rains have loosened the soil, and landslides have left exposed the sterile rocks, on which no vegetation finds a foothold. Such floods as that of 1897, near Bologna, which did over $1,000,000 damage, destroy property and life.

The dearth of wood and especially the great need of protecting forests to control stream flow have brought some excellent forest laws. In spite of the first general forest law (1877), which regulated cutting and forbade clearing on mountain slopes, large areas have persistently been cleared, and though provision has been made for thorough reforesting work, very little of the needed planting has been done. The classification of the lands to which restriction shall and shall not apply is a constant matter of dispute. An effort has been made to show that the forest planting contemplated by law is largely unnecessary. The last point, however, has been safely settled by recommendations of a recent commission, which declare that at least 500,000 acres will have to be planted, at a cost of not less than $12,000,000, before the destructive torrents, brought on by stripping and overgrazing the hillsides, can be controlled.

Spain has suffered greatly from destructive floods caused by insufficient forests on the mountains. She has enacted an elaborate system of laws to prevent overcutting, but the indebtedness of the country has prevented the efficient carrying out of these laws.

Other countries which are working out comprehensive schemes of protecting forests at the headwaters of mountain streams are Eng-

land in India, Switzerland, Austria-Hungary, Norway, Sweden, Denmark, Russia, Roumania, and Japan.

China holds a unique position as the only great country which has persistently destroyed its forests. What has been done in other countries stands out in bold relief against the background of China, whose mountains and hills have been stripped nearly clean of trees, and whose soil is in many districts completely at the mercy of floods. Trees have been left only where they could not be reached. Streams which formerly were narrow and deep, with an even flow of water throughout the year, are now broad, shallow beds choked with gravel, sand, and rocks from the mountains. During most of the year many of them are entirely dry, but when it rains the muddy torrents come pouring down, bringing destruction to life and all forms of property. In a word, the Chinese, by forest waste, have brought upon themselves two costly calamities—floods and water famine. The forest school just opened at Mukden is the first step in the direction of repairing this waste so far as it now may be repaired.

The results of deforestation in China are particularly discussed and graphically illustrated in the President's annual message to the second session of the Sixtieth Congress.

CONCLUSIONS.

The great increase in floods in our rivers, together with the increasing property loss and annual loss of soils, shows that in some sections of the country we are rapidly approaching the situation in which China now finds herself. It is not now too late for nature to restore the forests on the mountains, but the time is rapidly coming when it will be. The question of protecting the forests at the headwaters of the streams is a national as well as a state problem. It is not right to expect the State to deal entirely with areas requiring protection when those areas affect chiefly other States. It is impossible for States which suffer from conditions outside their own territory to remedy them by their own action. The mountains of the West are already largely under government protection. So far as they are not protected this bill is applicable to them. It is applicable to all other sections of the United States in which the source streams of the navigable rivers lie in nonagricultural, mountainous regions, and it is believed that it will accomplish the necessary protection to the Southern Appalachians and White Mountains.

If the action which this bill proposes is taken by Congress, it will work out to the great benefit of both agriculture and the manufacturing industries, while to the permanent development of our inland waterways the benefits will be fundamental.

Under the provision of the agricultural appropriation bill approved March 4, 1907, which directed the Secretary of Agriculture to make an investigation of the area and location of lands needing protection by the establishment of forest reserves, the Secretary of Agriculture specifically designated the Southern Appalachian and White Mountains of New England as areas in need of protection. He specifies the lands of the Blue Ridge Mountains of North Carolina and other States, the Allegheny Mountains of Virginia and other States, the Cumberland Mountains of Kentucky and other States, and the White Mountains of New England. He declares that forest reserves must be established in these regions "before the watersheds and important streams are adequately safeguarded."

Now, Mr. Speaker, having discussed the bill as fully as possible in view of my limited time, I have only to add that I believe this measure is consistent with wise public policy and broad statesmanship and that it is for the best interests of the development of my own State, the South, and the whole country. [Applause.]

Mr. SCOTT. Mr. Speaker, I yield four minutes to the gentleman from Washington [Mr. HUMPHREY].

Mr. HUMPHREY of Washington. Mr. Speaker, this bill comes as a fitting climax to the talk of economy we have been hearing on each side of the House. I have been one man from the Far West who has not opposed the Forestry Service. I am in sympathy with the general plan of national preservation of our forests, but in this bill we are asked to enter upon an expenditure of money the amount of which no man has stated, and no man will even attempt to guess. Such bills as this must eventually lead to the discredit of the Forestry Service, unless they cease advocating them. In the first place, we appropriate $25,000 annually for salaries, $100,000 for fire protection, $2,000,000 annually for the purchase of forests, and how much it will cost to join with the States and protect state lands or how much it will cost to join with private individuals and protect their lands no one has attempted to tell you. It will amount to many millions annually. Yet all this vast expenditure is placed within the hands of one man—the Secretary of Agriculture—and we have nothing whatever to do with the selection of the lands to be bought or of the expenditure of the money. If we pass one or two bills of this character, we might just as well adjourn and go home and leave the departments to run this Government. By this bill we place our duties upon one man.

This bill rests upon a false foundation. The very most that can possibly be claimed for this bill is that all these expenditures are based upon a disputed state of facts. An attempt has been made to evade the Constitution by placing this bill upon the ground that forests protect stream flow; that forests prevent flood and extreme low water, and erosion, and the filling of streams with silt. I hold here in my hand a discussion of these very subjects by 23 of the leading engineers of this country, and, so far as I have found after a hurried examination, not more than 4 out of the 23 contend that forests have such effect upon stream flow. The vast majority of the engineers of this country and in Europe, the men who should know, contend that forests do not have any such effect. Yet this House is asked, after a debate of an hour on a side, to permit the Secretary of Agriculture to spend countless millions of dollars upon a theory that is disputed by the very men who are the most competent to know. We can not afford, in this hurried way, to give the Secretary of Agriculture such vast power. Certainly we should know the facts. Certainly no man can desire to conceal the truth. The weight of the evidence is that the buying of these lands would not bring the results sought by the bill. If this is true, certainly no man will ask for the expenditure of all these millions under false pretenses. Let us wait until we get the truth.

We are spending enough money where it is necessary without embarking on expenditures of millions simply because somebody advances the theory that if we buy a lot of worthless hills at an exorbitant price and reforest them it will help navigation. There is a strong motive for this contention. Unless this is true, the Constitution stands in the way of the scheme.

Those who favor it should come here not with the preponderance of the material evidence against them, but with clear and convincing proof that they are right. This they have not done.

Public sentiment in this country has been influenced for this legislation by the great power companies who will profit by it. This legislation is for their interest and they have spent millions to bring about its enactment. If this work is necessary, if it should be done, it should be done by the States that are benefited.

[Mr. COLE addressed the House. See appendix.]

Mr. WEEKS. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has thirty minutes remaining.

Mr. SCOTT. I do not like to question the accuracy of the timekeeper, but my recollection is that the gentleman from Massachusetts himself used thirty minutes, or very nearly that.

The SPEAKER. The timekeeper says that the gentleman from Massachusetts used nineteen minutes. The gentleman from Massachusetts has thirty minutes remaining and the gentleman from Kansas forty-two minutes.

Mr. SCOTT. I will yield three minutes to the gentleman from Tennessee [Mr. GARRETT.]

Mr. GARRETT. Mr. Speaker, my objection to this bill is not based on any sectional proposition. I have never in this House uttered a sectional word, but my objection to the bill is based upon its fundamental features. It is a bill which, in my judgment, is predicated upon mingled selfishness and doubt. It is a bill concerning the scientific phases of which there is great disputation.

Gentlemen, eminent engineers have studied the question for years minutely, and among those gentlemen we find grave questions of difference as to the efficiency and efficacy of the remedy here proposed to be applied.

But, aside from that, the extreme extent to which the legal proposition goes would cause me to oppose the bill. If I understand correctly, this bill lays down the principle that the Government can go to a spring that runs into a branch, that runs into a creek, that goes into another creek, that runs into a little river, that runs into a larger river, and reserve and improve that spring for the benefit of navigation. [Laughter.] If that is true and sound as a legal proposition, then the next thing will be for Congress to dig artesian wells at the head of every branch, in order to increase the flow into the creek, that goes into a larger creek, that goes into a river, that flows into a navigable stream, and if, perchance, you can not get the artesian wells, then put down a well and hire men under the civil service to run a pump to fill the stream. [Applause and laughter.] Mr. Speaker, I yield back the remainder of my time.

Mr. SCOTT. Mr. Speaker, I yield three minutes to the gentleman from Indiana [Mr. COX].

Mr. COX of Indiana. Mr. Speaker, as was well said by the gentleman from Tennessee [Mr. GARRETT], this is not a question of State aiding State or the Government of the United States aiding any particular States of the Union, and my opposition to the bill does not arise from any sectional feeling whatever; but I bottom my objection I have against the bill to the policy of the Government of the United States entering into a business of this kind. I recall when the agricultural appropriation bill passed this House it carried with it an appropriation, in round numbers, of $4,600,000 for the purpose of paying the army of inspectors now at work in the Forest Reservation Service of the United States, and should the Government enter upon this policy and buy the 75,000,000 acres of

land, which can be bought, according to the minority report of this committee, what a mighty army of men that will put in the employ of the Government of the United States.

I may also add what an enormous cost it will be to the great mass of the taxpayers of this Government. When the revenues of the United States in round numbers are eighty-five or eighty-six million of dollars below its receipts, is it time for us to enter upon this policy of buying all the waste land in the White and Appalachian ranges for the sole purpose of conserving the forests of the United States or for the purpose of aiding navigation, when that is a very mooted and disputed question as to whether or not it will aid it in the least? For the reason, therefore, that it is going to add untold millions of dollars to the deficit of the Treasury of the United States and add to the pay rolls of this Government a vast army of men for its support and maintenance, and, in my opinion, it is undemocratic, I oppose the bill.

If this bill becomes a law I can see countless thousands of men in the employ of the Government as timber superintendents, timber inspectors, clerks, and a host of others, and the great mass of the people paying the bills for this additional army of government employees. It is objectionable for the reason that it permits the Government to enter into the States and buy up lands belonging to the States or to citizens of States. It is the worst case of an attempt of federal usurpation I ever saw in my life. There is too much of government usurpation already. Let the States do these things, and not forever look to the Government for the doing of the same things which the States ought to do themselves. I am opposed to the bill and hope it will be defeated.

Mr. WEEKS. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. PETERS].

Mr. PETERS. Mr. Speaker, after persistent agitation extending over many years a definite forward step has been taken in the matter of forest conservation and protection of the sources of water supply by the report submitted to the House from the Committee on Agriculture to accompany the bill S. 4825. These recommendations, while falling far short of the hopes of the friends of this movement, show an appreciation of the stupendous importance of action in the direction of putting a stop to the criminal waste and destruction of the watershed forest growth.

INTERESTS OF NEW ENGLAND.

Perhaps no section of the country is more vitally interested in this matter than New England. It is not too much to say that the future welfare and prosperity of the eastern part of the United States, and especially of New England, depend upon the adoption of the policy recommended by the committee. We have seen the powerful streams which furnish the power for our great mills shrink from torrential flows to dwindling, feeble rivulets. Millions in capital are invested along these streams, and hundreds of thousands of workers are dependent upon the regular flow of the streams. The ruthless cutting of the forest covers on the mountain sides threatens the destruction of the great manufacturing industries of our section by making it impossible to secure regularity of power. When measures of this nature were first proposed by farsighted men, it was the custom to sneer at what was regarded as an effort to launch the Government in a policy of scenery purchasing.

Since then, however, there has been a gradual awakening of the public mind to the imminence of the danger to our country from further neglect to conserve these great resources. From every mill owner and agent on the eastern slope of the continent, from every hydrographic engineer and representative of water-power interests, from trades and commercial bodies, chambers of commerce and representative associations of our citizens everywhere has come the warning and the demand. The President has recently sent to the Congress an appeal for this or similar legislation. We all remember the graphic photographs which it contained illustrating the barren wastes of mountain and valley in China, the terrible results of the erosion of the mountain slopes and the destruction of all life where once there had been great forests and fertile valleys. The Chief Forester, a diligent student of the subject, has repeatedly urged this legislation. The Secretary of Agriculture has recommended it in all his reports.

PRACTICAL NEED OF THE MEASURE.

The æsthetic and sentimental side are of great importance, but they might hardly warrant a step of such magnitude as is contemplated. In this matter, however, their importance is secondary to the considerations of a practical nature. The Government will not take this step as an investment in scenery or parks, admirable as I believe such investment to be, but because the forests have other uses than to supply inspiration as things of beauty. We have learned that they shelter the orchards and the fields from the rush of freezing and drying winds; that they keep mountains and hills and slopes from being washed down into the valleys, where they would choke the streams, cover the fertile lands with rocks and gravel, and carry away the soil on which the farmer depends for his livelihood. With the forest living and growing, the mountain slopes are great natural reservoirs, seeping up the rainfall in the spongelike soil and regulating its flow to the streams and rivers as nature intended. With the mountains denuded of their forest growth, the rainfall rushes unchecked into the valleys, carrying rocks and gravel and soil, and the rivers become raging torrents for short periods, and then dry up or run sluggishly until the next rainfall.

Aside from these considerations is that of the enormous losses caused by forest fires, due almost wholly to reckless methods of lumbering, which would be impossible under national forest supervision. For weeks every autumn the air in great sections of our country is thick with the smoke of burning woods and mountain slopes, millions of dollars' worth of property is consumed annually, and the growth which required generations is destroyed in days. Such conditions would be impossible under the provisions of this bill, and adequate fire patrol would be furnished, lumbering operations would be carried on in a scientific way, reforestation would restore the barren hillsides, and dead and waste lumber, always a menace in fires, would be removed.

THE SUBJECT ONE FOR NATIONAL ACTION.

This is a subject of national importance and for national action. States can not be expected to expend large sums for the protection of the sources of a water power which they can not themselves utilize, nor can the States which use the water power reach the sources thereof to protect them. Forest conservation must be regarded as an essential of national prosperity. Its inevitable tendency will be, not to withdraw from use the remaining forests of these mountains, but to insure a never-failing source of lumber and other forest products for future generations, as well as the perpetuation of water power of incalculable value.

Few measures have come before this body this year which have been the subject of so much general understanding or which have met with more general interest and enthusiasm throughout the country than the measure we have before us to-day. Both of the political parties in their last conventions put in their platforms words which specifically approve the plan of forest conservation, a forward step in which this bill endeavors to take.

Mr. SCOTT. I wish the gentleman would quote the language.

Mr. PETERS. I will be very glad, indeed, to do so. I will now read from the Republican platform:

> We indorse the movement inaugurated by the administration for the conservation of the natural resources. We approve the measures to prevent the waste of timber. We commend the work now going on for the reclamation of arid lands, and reaffirm the Republican policy of the free distribution of the available areas of the public domain to the landless settler. No obligation for the future is more insistent, and none will result in greater blessings to posterity. In the line of this splendid undertaking is the future duty equally imperative to enter upon a systematic improvement upon a large and comprehensive plan, just to all persons of the country, of the waterways, harbors, and Great Lakes, whose natural adaptability to the increasing traffic of the land is one of the greatest gifts of benign providence.

That, Mr. Speaker, answers specifically the question the gentleman from Kansas asked me and removes the doubt he attempted to cast on my statement. The Democratic platform says:

> We repeat the demand for internal development and for the conservation of our natural resources contained in previous platforms, the enforcement of which Mr. Roosevelt has vainly sought from a reluctant party; and to that end we insist upon the preservation, protection, and replacement of needed forests, the preservation of the public domain to home seekers, the protection of the natural resources in timber, coal, iron, and oil against monopolistic control, the development of our waterways for navigation and every other useful purpose, including the irrigation of arid lands, the reclamation of swamp lands, etc.

TREMENDOUS INTERESTS DEPENDENT UPON WATER POWER.

Some appreciation of the tremendous interests dependent upon the water power for their existence may be had from a perusal of the figures in the last census, so far as they relate to the States on the eastern slope of the country which would be affected by the pending bill.

In 1900 the aggregate motive power in these States was 11,300,081. Of this total, water power (water wheels only) supplied 1,727,258, or 15.3 per cent, as follows:

Massachusetts	187,848
Vermont	87,615
New Hampshire	112,755
Maine	167,264
Connecticut	71,414
Rhode Island	29,035
New York	368,456
New Jersey	24,958
Delaware	6,326

Maryland	13,778
District of Columbia	369
Pennsylvania	86,223
North Carolina	57,027
South Carolina	35,019
Georgia	40,387

This amount represents only the water power used in manufacturing establishments, and the figures would be swelled greatly by including all the water power actually in use at the present time. It must be borne in mind also that these figures do not cover a large proportion of electric motors driven by current developed by water power. For example, almost all the power developed by the great hydraulic installation at Niagara Falls is electrically transmitted, and consequently is reported as electric power by the manufacturing establishments in which it is used. Many textile plants are operated by electric current from distant generators driven by water power.

In this way a large portion of the water power actually used in manufacturing operations does not appear in the census returns, because it is electrically transmitted and is accounted for in the motors that are reported. It is obvious, therefore, that the use of water power in 1900 was considerably larger than indicated by the amount reported.

The use of water as a primary source of power has undergone a complete transformation in the past decade, both in the methods of its utilization and in the manner of transmitting and applying the power. The practical possibility of transmitting power thus developed over long distances has removed the necessity for building mills immediately adjacent to water powers, often so located as to present serious physical obstacles to economical arrangement and construction of manufacturing plants. This has rendered available many water powers which otherwise could not have been used to advantage, and thus has largely increased the industrial possibilities of many localities where a limited or expensive fuel supply has made the use of steam power impracticable.

In addition to the great textile industry, the wood-pulp and paper manufacturing industries are dependent upon water power.

THE MERRIMAC RIVER.

The Merrimac River, flowing in New Hampshire and Massachusetts, itself illustrates the enormous interests which center about our waterways, and particularly supports the need of action by the Central Government to conserve them, as but one-fourth of the power and resources of that river are within New Hampshire, the State in which it has its source. In the State of New Hampshire there is invested in manufactories along the borders of this river the sum of $38,801,365; there is paid each year in wages to 29,866 operatives the sum of $11,771,103; and the value of the annual product is $44,711,573. In Massachusetts there is invested in manufactories on the borders of the Merrimac the sum of $103,293,793; there is paid in wages to the 63,335 operatives $25,829,825 each year; and the value of the annual product is $114,414,876. A population of 350,000 people along its borders has deposited in savings banks the sum of $143,220,126, and their cities have a real estate valuation of $240,000,000.

The Connecticut River as well, which also has its source in the White Mountains, has located on its borders manufactories employing 28,808 operatives, to whom is paid yearly the sum of $15,120,476 in wages.

THE FOREST RESERVES SHOULD BE NATIONAL.

This bill is demanded for the preservation of the resources of the East and the South. The system of national forest reserves exists already in the West, and I urge upon the Representatives from that section of the country that the system should not be a local one, but that by supporting this bill they should aid in making it a national system. On the preservation of our streams depends the wealth and happiness of no small proportion of the people of the United States. We, in support of this bill, call on the Members to regard the measure not from a sectional view, but from the true, broad view of the best interests of our country, and resting our claim on the merits of the measure, we ask that you give to these people dependent upon the streams for their welfare the benefit of the provisions of this legislation.

[Mr. BEALL of Texas addressed the House. See Appendix.]

Mr. WEEKS. Mr. Speaker, I now yield five minutes to the gentleman from South Carolina [Mr. LEVER].

Mr. LEVER. Mr. Speaker, the gentleman from Texas [Mr. BEALL] expresses some surprise at the fact that South Carolina and Massachusetts have joined hands in this "raid" upon the Treasury, as he calls it. I want to say to the gentleman from Texas that he may search the history of this great Nation from Bunker Hill and Kings Mountain up to the present time and he will find Massachusetts and South Carolina joined hand in hand always in every great progressive movement for the benefit of the whole people. [Applause.] We have had our quarrels, we have had our differences, and we have fought them out like men; and when we have submitted them to the arbitrament of the sword and that has spoken, we have reconciled our differences, turned our backs upon the past, and with our faces to the future have marched on along the line of progress, industry, and material development. [Applause.]

We have no apologies for the alliance; we are proud of it. My friend from Missouri [Mr. RUCKER] makes the prediction that this undertaking in the end will mean an expenditure of $900,000,000. I want to call the attention of the House to some predictions made when the Reclamation Service was before the House for consideration. If I had the record here I might read from the statements of the so-called "leaders of the House," where the prediction is made that the Reclamation Service would entail an expenditure of $750,000,000 upon the Treasury of the United States. The fact is, gentlemen, they were bad prophets. The Reclamation Service cost the Government only $45,000,000, and has opened up millions of homes to the American people. My experience here is this: The so-called "leaders of the House," those gentlemen who carry around on their shoulders and in their imagination the destinies of 90,000,000 people, become so oppressed with the weight of their great burden that they cease to move forward any more and spend their energies marking time. [Applause.]

This is a great progressive movement we are undertaking. It is a movement looking to the future. It is a movement that looks beyond our noses, and the so-called "leaders," I presume, continuing their policy of the past, will be found lined up against it. I want to call the attention of the House to the fact that this is the age of young men, this is the age of progress, this is the age of going forward, and this is the first great step in a great conservation movement that has seized upon the good sense, the good judgment, and the wisdom of the wisest and most farseeing men in this country, and the young men of the American people are going to carry this great movement to a successful conclusion, and you might as well bet your last dollar on that proposition. [Loud applause.]

Mr. THOMAS of North Carolina. And, if the gentleman will allow me to say it, it is a movement that will materially benefit the South, as well as other sections of the country.

Mr. LEVER. Under the general leave to print, I wish to submit the following as my views in extenso upon this most important piece of legislation:

The proposed legislation undertakes to bring under federal control and regulation, either by purchase outright or cooperation with the States or individuals, such forested areas of the country as are "located on the headwaters of navigable streams or those which are being or which may be developed for navigable purposes," when it is shown that the control of such areas will aid, protect, and conserve the navigability of navigable streams. This bill is before us in response to an almost universal demand from every interest—industrial, agricultural, manufacturing—in every State along the Atlantic seaboard from Florida to Maine. Perhaps no proposition in recent years has met with such a unanimity of indorsement as the idea of the establishment of national forest reserves in States east of the Mississippi River. For many years this effort was confined to the establishment of such reserves in limited areas in the White Mountain and Appalachian ranges, but, as the effect of deforestation has become more and more recognized, as the most important, if not the controlling, factor in the uniformity of stream flow, this bill it will be noticed, is general in its terms, and applies to forest areas wherever located, the protection and control of which will have an appreciable effect in promoting or maintaining the navigability of the navigable streams.

I venture to assert that since the close of the civil war there has not been brought into this Congress any proposition which was of more vital and wide importance than is the one before us to-day for determination. Upon the preservation of the forested mountain lands in the Appalachian Range depends the very industrial life of the South, and this fact is so well recognized by thoughtful and farseeing men, the necessity is so great, the calamity threatened so fearful, and the States and individuals so impotent to deal with it that the Federal Government is called upon to handle the situation in a broad national way. It is a proposition so enormous in its scope, so vital to the well-being of the entire Nation as to make it primarily and necessarily a national rather than a state matter. A great federal duty—the improvement and preservation of our inland waterways and harbors—confronts us, and the Nation is called upon to act.

As a Nation we have had bestowed upon us natural resources in such profligate abundance that their very abundance has made us a profligate Nation. Our boasted prosperity may be measured with reasonable accuracy by the gross wastefulness with which we have used our natural blessings. To put it a little more strongly, it may be said with some degree of truth that our prosperity is but an incident to our wastefulness; that the one has been built upon the other.

We have talked of the past and gloried in it; we live and think of to-day; it has never occurred to us that there is a to-morrow. That nation, as with the individual, that is content with the abundance of the present must in the end be dashed to pieces upon the rock of its thoughtlessness of the future. This bill not only proposes to take care of the present, but undertakes to handle a situation which must become more and more critical in the future. It is the first step in the great conservation movement which has seized upon the judgment of our wisest men and which must grow stronger as it is more fully understood. Every thoughtful man agrees that the time has come when the Nation must take stock, make an inventory of its resources, and live and work to-day with some little thought of the morrow.

Two great political parties have recognized the wisdom of this idea. The Denver platform contains this plank:

We repeat the demand for internal improvement and the conservation of our natural resources, contained in our previous platforms, the enforcement of which Mr. Roosevelt has vainly sought from a reluctant party.

The platform specifically mentions the protection of the national resources in timber, coal, iron, and oil, and the development of our waterways, the irrigation of arid lands, the reclamation of swamp lands, and insists upon the preservation, protection, and replacement of our forests. This broad declaration of party principles should satisfy any Democrat who may believe in the wisdom of this great movement to safeguard our navigable streams by protecting the forest lands at their headwaters, but who, at the same time, may feel some doubt as to whether such legislation squares with the doctrine of his party.

The party has spoken; its voice is emphatic. The Republican platform is equally as emphatic in the matter of the preservation of the natural resources of this country:

We indorse the movement inaugurated by the administration for the conservation of the natural resources. We approve of measures to prevent the waste of timber.

INLAND WATERWAYS GREATEST NATIONAL ASSET.

The greatest asset of this Nation are its rivers and harbors. Since 1802, when an appropriation of $30,000 was authorized by Congress for the improvement of the Delaware River, up to the present time the development of our inland waterways and harbors has been regarded as a national duty, and the appropriations for such purposes have increased from year to year, as commerce has grown and additional transportation facilities have become more necessary. The last river and harbor bill carried an appropriation of approximately $80,000,000, to be used in the improvement, maintenance, and development of nature's transportation lines.

Work of this character was entered upon timidly at first and with great doubt as to the constitutional power of Congress to enter upon it at all. The founders and greatest apostles of Democracy, up to and including the administration of Andrew Jackson, regarded the whole scheme of internal improvements as of doubtful constitutional warrant, although admitting the necessity. How changed are conditions at the present. I presume if the roll of Democracy were called to-day there would not be found one who would question the power of Congress to appropriate for such purposes.

The policy of conservation, improvement, and development of the country's natural resources is the policy of all parties. It has become a great business federal undertaking and appeals as strongly to the business sense of the country as any single problem with which we have to deal. There are strong advocates of the policy of expending upon the improvement of our rivers and harbors the enormous sum of $50,000,000 annually. The support of this idea is so strong that in the near future I expect to see it become a national policy.

Already the Federal Government has made navigable more than 300 rivers, aggregating more than 26,000 miles, thus largely augmenting transportation facilities. Harbors on every coast have been made accessible to commerce, and the sum of $500,000,000 has been used for these purposes.

Forty-one million four hundred and twelve thousand dollars have been expended in making navigable the streams which have their headwaters in the Southern Appalachians, and projects are under way with respect to these same rivers aggregating approximately $70,000,000. This great sum has been expended in dredging and deepening these rivers and harbors. The work up to this time has had to do with the lower stretches of the rivers, cleaning out the silt, straightening banks, building locks and dams, and deepening them, with a view of getting a sufficient depth to carry the commerce of the country. Nothing has been done in the way of conserving the water which feeds these streams.

Until recently the question dealing with the supply streams of navigable waters did not seem a matter of vital concern, and therefore did not appeal to engineers. During the last twenty years, however, deforestation at the heads of navigable streams has made such rapid strides as to press this phase of river improvement upon the attention of those who are interested in the protection and preservation of inland waterways.

It is the almost universal opinion of those who have given the subject consideration that in recent years flood and low-water periods in our streams have rapidly increased, that streams have become more and more silted, making heavy dredging more and more necessary, and it is likewise the opinion of these same experts that these phenomena, these high floods and extreme low waters are the direct results of the rapid deforestation going on at the headwaters of these streams. This bill is predicated upon the idea that there is a most intimate and direct relationship between forests and stream flow. If it can not stand upon this basis, it can not stand at all. That such a relationship does exist appeals so strongly to common sense as to need but little of expert proof to sustain it. That a sponge absorbs and holds water every one knows. The forests provide for the earth a deep humus—sponge—which absorbs and holds the water and uniformly gives it off. From this great sponge and the soft ground beneath it the springs, streamlets, creeks, and the rivers of navigable waters are fed.

Here is nature's great reservoir. This is the common-sense layman idea. If expert testimony is needed, I can fill volumes with such testimony and opinions of the greatest experts in the world in support of the proposition that the uniformity of stream flow bears a direct ratio to the forested areas in which the streams have their origin. I shall not burden the RECORD with these expert opinions, for they will be brought out in the course of the debate. I am content to rest the case upon the common-sense view of the matter—what I see with my own eyes, what I know to be a fact. It is common knowledge that floods have increased in rivers which have their rise in the Appalachians and that low-water periods have gradually increased since the advent of lumbering, tanneries, and pulp mills in this region. The farmer has contributed his part in the denudation which threatens these streams, but the principal danger lies in the operations of the lumbermen, who create a condition most favorable to destructive forest fires. The situation in the southern Appalachians—and I confine myself to this particular region as an illustration of the general idea—is not as yet, let me say in all frankness, critical, but those who see beyond their noses, those who feel some obligation to the future, those who would protect themselves against the calamity which is certain to come unless the processes making for it are arrested, wish to take time by the forelock, to deal with this matter before it reaches a dangerous condition, to preserve the forests which they have now rather than to permit themselves to have to face the problem of a great and expensive system of reforestation when all of these great mountain ranges have been swept clean by the agencies of destruction now attacking them.

SCIENTIFIC INVESTIGATIONS.

Mr. Speaker, without entering into a lengthy discussion of this phase of the subject—the connection between forests and stream flow—I wish to call attention to a few of the conclusions reached through the investigations of the scientific bureaus of our own Government. A careful investigation of the records of the Weather Bureau has been made recently to ascertain whether there is any connection between forests and the uniformity of stream flow, as is claimed by those who favor this measure. The results show that in streams having their headwaters in the Appalachian ranges there has been a remarkable increase in the number of floods during the last twenty years, and there has been a like increase in the number and duration of low-water periods. It is also found that such increases have been in direct ratio to the rate at which the forests have been denuded. Those rivers, the Ohio, Cumberland, Wateree, and Santee, whose watersheds have been the most deforested, show the greatest increase in flood and low-water periods, while those streams whose watersheds have been least changed show the greatest uniformity of stream flow and the least prevalence of floods and low-water periods. Both the Geological Survey and the Forestry Service have given careful consideration to this

relationship during the past year and both have reached the same conclusion, that floods and stream flow have rapidly increased in most of the rivers of the United States, and especially those rivers that are in the eastern mountains, where deforestation has gone on unchecked and is becoming most extensive.

Ten rivers have been selected for such investigations—Potomac, Monongahela, Ohio, Cumberland, Wateree, Savannah, Tennessee, Allegheny, Wabash, and the Red. It has been found that eight of these ten rivers show a greater increase of floods in the last half than in the first half of a period of twenty years. Each of these eight rivers showing increased flood conditions has its headwaters in the Appalachian Mountains, where deforestation has made its most rapid inroads during the same period. For instance, the Potomac River, measured for eighteen years, shows during the first half of the period 19 floods and for the second half 26, while the duration of the floods for the first half was thirty-three and in the second half fifty-seven days. For the Wateree River the measurements cover a period of sixteen years, in the first half of which the number of floods was 46 and in the second 70, and the number of days of flood in the first period was 147 and in the last half 187. About the same ratio prevails for the Savannah, while the Monongahela shows, for a period of twenty years, for the first half 30 floods and for the second 52, and the number of days of flood during the first half was 55 and during the second half 100. A careful analysis of these data is absolutely convincing of the fact that there is a direct and most intimate relationship between forests and stream flow, which every layman understands and about which there can be no doubt except in the minds of experts.

The most elaborate study of any river ever made in the United States has just been completed by Mr. M. O. Leighton, Chief Hydrographer of the United States Geological Survey.

His conclusion is that floods have been increasing, the percentage of increase being 18.75 in the last seventeen years as compared with the seventeen years previous. It is the conclusion of every one of these experts that the reason for the increase in the number of floods and low-water periods and general lack of uniformity in stream flow is due directly to the deforestation of the mountain sheds in which they have their origins. They maintain that the forests act as a sponge to hold the water, and when the sponge is removed the waters rush down in torrents, to be followed immediately by low-water periods.

They have taken the case of the Red River and proven the same theory by reasoning from opposite conditions. On this stream the records have been kept for sixteen years. The number of floods for the first half of the period was nineteen, and for the second half sixteen, while the number of days of flood in the first half was eighty-seven and in the second half sixty. The low-water periods of this river in the first half were forty-nine, and in the second half eight, while the duration of the low-water period was eight hundred and thirty-six days in the first half and two hundred and eight in the second. To make the conclusion irrefutable, examination of the record also shows the diminution of rainfall for this river basin of 1.94 inches per year for the second half, as compared with the first half. What is the cause? There has been no change in either the geology or the topography of the drainage basin, only a change of the soil conditions has taken place.

When these measurements commenced, the drainage basin was, in the most part, large ranches, there being hardly any forests, and the prairie sod had not been broken up. As late as 1900 no more than 14 per cent of the watersheds of the Red River had been improved, but about this time the Indian reservation was thrown open, and settlement and agriculture were begun, the prairie sod was broken up and changed into cultivated fields, thereby increasing the sponge-like character of the soil. The result has been a more uniformity of stream flow following, less floods, and less low-water periods, the very result to be expected in the changed condition of the river basin. What is true of this river is true of every other, namely, that if you increase the storage capacity of any reservoir you decrease in exact ratio the flood and low-water periods, and as you decrease the storage capacity of these natural reservoirs you likewise find an increase in the number of floods and low-water periods. These are conclusions that can not be gotten away from, and they prove our right to ask the Federal Government to preserve the forests, which have a direct influence upon the conservation of the waters that feed our navigable streams.

FOREIGN COUNTRIES.

The principle we are contending for is recognized and acted upon by almost every great government of the world. England in India, Switzerland, Austria-Hungary, Norway, Sweden, Denmark, Russia, Roumania, and Japan are all working out comprehensive plans for protecting forests at the headwaters of their mountain streams. Spain has suffered from destructive floods caused by denudation of forests on her mountain sides, and has in force a system of laws to prevent overcutting. Italy has paid the penalty of her unwisdom in permitting the deforestation of her mountains, while France is paying most heavily for her experience in allowing her forests to be stripped from her mountain sides.

It is said that 800,000 acres of her farm lands have been ruined and her waterways practically destroyed by the torrents which have rushed down from her barren mountains. She is to spend $50,000,000 in a plan of reforestation, $15,000,000 having been expended already upon the plan. The French ambassador evidently had in mind the experiences of his own Republic when in a recent address he put the whole case tersely: "No forests; no waterways." He spoke as a man with first-hand experience, and his words should be a warning to us who are about to permit the same disaster to overtake us. Germany stands first among the nations of the world in inland waterway improvements and development, and it is a significant fact that she also stands first in the preservation and protection of her forests. For more than a hundred years the German Government has regulated her forests, which now furnish a large revenue. In striking contrast to the wise and far-seeing policy of the German Government in this respect is the stupidity of China, whose mountains and hills have been bared of their forests with the result that streams which formerly carried an even flow of water are now either entirely dried up or when not dry, great torrents rushing down upon the lowlands, carrying destruction to life and property. The Chinese policy of taking care of the present with no thought for the future, her policy of wastefulness, has brought about two inevitable results—great floods and great water famines.

History is of little value to mankind unless it is made to guard us against unwise policies and point us to the pathway of wise legislation. In the eastern half of this country we are pursuing without thought the pathway of China, France, Spain, and Italy in leaving our great forest areas to the mercy of those who think only of their own selfish interests.

WESTERN FORESTS.

It must be understood that we are not entering upon a new policy. The Government is already irrevocably committed to the idea of forest preservation. Approximately 170,000,000 acres of lands in the West are under federal control. This represents a national asset of more than one and a half billion dollars. We are appropriating annually from two to three million dollars for the improvement and proper control of this great domain, and let it be understood that the whole forest policy of the Government up to this time is predicated upon the idea that the forests will conserve the water supply of the navigable rivers, aid the irrigation and reclamation work, and preserve at the same time the timber supply. It is therefore not a new policy, either the preservation of the forests or the idea that the forests have an appreciable bearing upon the stream flow. It is written in the statutes of the country; it is a part of the well-defined plan of conserving the natural resources of the Nation.

PRECEDENTS.

It is argued that these lands were public lands and that the Government did not have to buy in order to preserve them. It is claimed that there are no precedents for the policy of buying lands for special purposes except, of course, in a few well-known cases. I wish to call the attention of the House to the fact that we are to expend, according to the estimates, the sum of $45,580,000 for the reclamation of the arid and semi-arid lands of the West. We are to-day expending at the rate of almost $1,000,000 per month in this work, in the digging of canals and the construction of reservoirs.

The argument that the reclamation work is done on lands belonging to the Government, while the lands to be acquired under the terms of this bill must be bought, does not hold, for it is a matter well known to everyone that the Government has found it necessary in many cases to buy additional land in 12 of the 16 States and Territories included in the reclamation project. Already the sum of $554,000 has been paid for such lands. If the Government can buy land for irrigation purposes, why the objection when we of the East, to preserve the navigability of our navigable streams, ask that an appropriation be made for the buying of forests as a means to this end? Not only has the Government bought lands in the West, but by two acts, 1905 and 1906, the operation of the reclamation act was extended to the State of Texas, where there is no government land. The Government has even gone to the extent, in the pursuance of a high sense of justice, to furnish water for irrigating 25,000 acres of

land in Mexico, at an estimated expense of $1,000,000, and a treaty has been signed between the two countries to that effect. The reason for this action upon the part of our Government is because the citizens of Colorado use some of the water which flows on down to Mexico, with the result that the Mexican supply has run short. If in carrying out our sense of duty to a foreign nation, we can expend a million dollars, is it too much for us to ask that some appropriation be given by the Government in the discharge of its duty to its own people?

OTHER CASES.

I wish to call the attention of the committee to other cases analogous to the one under consideration. It is not an entirely new thing for the Government to improve the headwaters of navigable streams with a view of improving their navigability in their lower stretches. As far back as 1880 a project was put on foot for building reservoirs and dams at the headwaters of the Mississippi River, and in pursuance of that plan $1,885,000 have been expended.

The truth is that the time has come when army engineers must recognize that it is cheaper and better to control the mouths of rivers by controlling first their headwaters than it is to go on with the present endless-chain system of dredging. What sense is there in a policy of digging out a river when it is well known that the very next flood which comes down from the mountain sides barren of forests will bring down its load of silt and débris? Is it not wiser and more economical in the end to prevent the river from filling up by carefully guarding its headwaters than it is to go on and on indefinitely dredging and cleaning it out?

INCIDENTAL BENEFITS.

I have discussed the effect that deforestation must have upon navigable streams, and have shown how the preservation of the navigability of our streams having their origin in the mountains must depend for the future upon a policy which looks to the preservation of these forested areas. I have tried to show the benefit which must accrue from the preservation of the forests to the improvement and maintenance of our navigable streams. I feel that the appropriation asked for in this bill is justified by such benefits.

But it is fortunate that in the accomplishment of the main purpose of this bill there will follow certain collateral advantages quite as important as the main purpose.

FLOOD DAMAGES.

It is a fact worth our attention in this connection that flood damages in the United States have increased during the last seven years from $45,000,000 to $118,000,000. Such damages have been greatest on rivers whose watersheds show the greatest deforestation. For example, in the Congaree River, which runs through the district which I represent, the floods during the last fifteen years have increased 94 per cent in number and 113 per cent in duration, while in the Savannah River during the last thirty years the increase in number of floods has been 94 per cent and in duration 266 per cent. During the past year the greatest floods in the history of my State occurred. Millions of dollars of property consisting in bridges, railroad trestles, dams, farm products, and the like were lost. Great cotton mills and manufacturing industries dependent for power upon these streams were closed for weeks for repairs. Thousands of their employees were left for months without work. The tenant farmers in the lower parts of the State, who lost everything they had in this great flood, were driven almost to the point of starvation and became entirely dependent for months upon charity. The damage of this one flood to this one little State can not be estimated. It must be borne in mind in this connection, too, that these streams rise in the largely deforested areas of the Southern Appalachians.

Of course it is not contended that this flood would not have happened if the watersheds in these great areas had been covered with virgin growth, but I do contend that such a condition would have decreased the damage. Floods will happen as long as excessive rains fall, and all we contend for is that the forests have such an important and direct regulative influence as to be worthy of our attention in dealing with a great scheme such as is the improvement and preservation of our inland waterways.

WATER POWERS.

The South is vastly rich in her magnificent and unequaled water powers. Her future industrial development is largely dependent upon them, and her possibilities in this direction are almost unlimited. It is in this section that the greatest development of water power in the whole country is taking place, and as fuel grows more and more costly and coal becomes more and more exhausted, water power will become more and more in demand. The present rental for water power is $20 per horsepower per year, and this is a low average. Its value, however, can not be estimated, but will depend upon the price of fuel power, which will constantly increase, and therefore give a greater demand and a higher value for water power.

The United States Geological Survey estimates a minimum of 2,800,000 of horsepower development for rivers having their headwaters in the Southern Appalachians, and the same authorities estimate that at least 50 per cent of this estimated power is available for development. These figures indicate a minimum horsepower; but if auxiliary power were provided, it is estimated that it would be possible to develop up to two and one-half times this amount. Taking 50 per cent of the minimum indicated horsepower developed by these rivers at a rental of $20 per horsepower, the yearly return or value would amount to $28,000,000. The development of this power has just begun. About ten years ago the transmission of electrical energy over long distances became an accomplished fact, and since that time water powers have come to be in great demand. The largest cotton mill in the world—the Great Olympia, located at Columbia, S. C.—uses the Congaree River for its power through this new plan of electrical transmission. I expect to see the day when the water powers of the South will be used to operate every mill, light every city, town, and village, drive every train and boat, and operate every industry. The power exists; it is only for us to develop and use it. In connection with water powers, it must be borne in mind that the uniformity of stream flow is the greatest consideration, as it is also the most important consideration in navigation. Here I desire to quote from a most eminent authority:

> The valuable water resources of this region depend absolutely upon the maintenance of a protective forest cover. Without this forest cover, the water power of the region can never be developed to the full, and in the same way the navigable streams can not be kept from silting up if the forest cover about their headwaters is removed. The protection of these forests is a great undertaking, but it is necessarily a first undertaking since it is fundamental to the development and utilization of the water resources.

If there were no other purpose in this bill than the preservation of the forests in the Southern Appalachians for the preservation of the water powers of this section, the appropriation contained in it would be amply justified.

MANUFACTURING.

Mr. Speaker, in the three States of Georgia, North Carolina, and South Carolina there are 178 cotton mills dependent for their power upon the streams rising in the Southern Appalachians. These mills represent a total capital of $41,000,000, with a yearly product of over $70,000,000 and a consumption of 900,000 bales of cotton and the employment of 60,000 people. It is the duty of the Government to protect these great industries so vital to the entire Nation.

HARD-WOOD SUPPLY.

The statement is made in the report of the Secretary of Agriculture on the "Southern Appalachian and White Mountain watersheds" that—

> The valuable hard-wood supply hinges upon the control of the Appalachian Mountains.

It is also said in this report that at the present rate of cutting that hard-wood supply of the country will be exhausted in the next sixteen years.

The four hard-wood centers of the United States have been the Ohio Valley, the Lake States, the lower Mississippi States, and the Appalachian States. In 1899 the States of Ohio, Indiana, and Illinois produced 25 per cent of the hard wood of the country, but in 1906 they produced only 14 per cent, and Ohio and Indiana show a falling off of 50 per cent. What little hard wood remains in this once great center of this industry will be used up within a few years by the hard-wood establishments, which are now pressed to the limit for supplies. In the three Lake States there was less hard wood produced in 1906 than in 1899, showing that their maximum production had been reached, and that for the future there must be a rapid decline. The same situation is true of the Mississippi Valley. The only hard-wood region left to the country, upon which it must depend for the future hard-wood supply, is the Appalachian region. In 1906 this region produced 48 per cent of the hard-wood supply of this country, and the hard-wood-using industries look to this region for their future supplies. It is estimated that, including the mountains of Pennsylvania, New York, and the New England States, there are 75,000,000 acres of land adapted to hard-wood growing, and yet only from 12 to 15 per cent of this area is covered with virgin timber. It is therefore evident that we are face to face with a hard-wood famine unless legislation is enacted to prevent the indiscriminate destruction of the supply.

This is a matter of vital concern to the whole Nation. Great sums of capital are invested in industries dependent entirely upon the hard-wood supply. Hundreds of thousands of people

NORTHWEST MISSOURI STATE
UNIVERSITY LIBRARY
MARYVILLE, MISSOURI 64468

are employed in this industry, and yet we have taken no thought of the morrow. We have permitted self-interest to drive us to a point where we must act or face a famine.

CONCLUSION.

In conclusion, therefore, this bill undertakes to protect the hard-wood supply of the country; to prevent the enormous flood damages and preserve the water powers and the industries and people dependent upon them; to protect the agricultural lands from overflow; and to preserve the navigability of the navigable streams of the country, which are so necessary to its future growth and development. As stated in the beginning of my remarks, I believe that no proposition of greater importance has engaged the attention of this body since the civil war.

Mr. MONDELL. Mr. Speaker, in the very brief time allotted to me it is impossible to point out the many objections I have to this bill. I think it is one of the most vicious measures that has been presented to this House since I have been a Member of it, namely, a proposition to improve privately owned water powers by the expenditure of federal cash; to purchase millions of acres of worn-out and cut-over timber lands with the people's money; to establish federal landlordism over great areas.

The gentleman from South Carolina [Mr. LEVER] compares this to the reclamation policy. I would remind him that there is no analogy between the two policies.

Under the reclamation law no expenditure is made that is not reimbursable; no private property is improved except as an incident of the improvement of public property; and all of the expenditures must be repaid and are being repaid by those who are benefited.

The reclamation law makes homes on lands now worthless; this bill proposes to return to the wilderness lands now occupied. The reclamation law seeks to reduce the area of the land over which the Government is landlord; this bill seeks to increase the area of government landlordism. The reclamation law seeks to improve government property so as to make it usable by the people, and provides for its transfer to the people; this bill proposes the acquisition of private property, to be perpetually held and administered by the Government. The reclamation law at the expense of individuals conserves and regulates water supplies in a manner beneficial to the public at large; this bill proposes, at the expense of the Government, to attempt to conserve, regulate, and control waters for the benefit of private individuals.

In the general discussion of the measure here and elsewhere much is said of the necessity, importance, and propriety of the Federal Government embarking upon a scheme of this kind in the interest of navigation, but it will be noted that the land which it is proposed to first acquire is at the headwaters of streams used principally not for navigation, but for water power, and that many of the alleged facts and figures or arguments in behalf of the proposition relate to the alleged benefits by the proposed expenditure of the people's money to private owners of water power.

In the twelve years of my service in the House I have known of no measure that was backed by such a powerful, persistent, and effective lobby of private interests as this. No doubt the sensibilities of some gentlemen will be shocked by this statement, and I hasten to assure all such that it has been a most eminently respectable lobby, a lobby that has influenced a vast number of well-meaning, high-minded people; which has had the support of influential, high-class magazines and newspapers; for, like most lobbies that are really effective, the arguments of this lobby as addressed to the public at large have been ingeniously devised to appeal to the disinterested and public-spirited citizen, who can always be depended upon to approve projects asserted to be for the public good, and who generally has not the time or opportunity to learn of the private interests to be served.

If the owners of water power in New England desire to have their power improved, they should, through their States or locally or individually, pay for that improvement and not attempt to unload the burden on the Government, and the same statement applies to the owners of water power along the southern Atlantic coast.

I presume it is scarcely worth while to remind the brethren who are clamoring for this legislation that it is unconstitutional, for why regard the Constitution when the consideration of the declarations of that document would prevent the expenditure of public money for private benefit?

Much as I am surprised that the gentlemen on this side of the aisle should propose this scheme of federal landlordism and bureaucracy—this proposition to establish federal control over great districts within States—I should be even more surprised at the gentlemen on the other side who favor this legislation, and who claim to be special champions of local self-government and states rights, if my experience had not enlightened me to the fact that those who shout loudest and most frequently in defense of the principle of local self-government are the first to abandon it when an appropriation is in sight.

Of course nobody is fooled by the claim that the expenditure authorized by this bill is all that is contemplated for the purchase of private lands for forest reserves. Even the millions the expenditure of which is herein contemplated would not buy sufficient territory to affect the navigation of any navigable stream to any appreciable degree, even on the basis of the most extravagant claims that have ever been made as to the effect of timber preservation on water conservation.

The amount of land that could be purchased by the appropriation contemplated by this bill would not even cover any considerable portion of the watershed of any one of the streams the mill owners on which are endeavoring to secure the aid of the Government in the improvement of their water power.

This is but the opening wedge; and these expenditures once inaugurated, the pressure from owners of worn-out and cut-over timber lands to unload them upon the Government and the demand of the owners of water power to have them improved at government expense would be so tremendous as to lead to unending expenditures of enormous magnitude.

Appalling as the prospects of future raids upon the Federal Treasury are, if this policy of buying lands and creating forest reserves is once inaugurated, that feature of the situation is, after all, the least alarming and dangerous. The fact that the system is in direct conflict with the theory of our Government and genius of our institutions should give us even more alarm than the danger of wasteful, improper expenditures, for if the policy contemplated should be established on any scale that would be of appreciable benefit in the regulation of streams furnishing water power, it would create a system of federal landlordism and of interference with local control and local jurisdiction that would utterly change the form of our Government within the regions affected.

I purposely refrain from an inquiry as to what would happen if the attempt were made to extend this system sufficiently to have any effect upon navigation, for two reasons: First, because of the fact that the ownership of all of the mountainous watersheds of the country by the Government would probably have no effect worth mentioning on navigation; and, second, because the claim that this policy is in the interest of navigation is so plainly a subterfuge that it fools no one who has given the matter any serious consideration.

The fact is that the presence or absence of timber upon the watersheds of streams has comparatively little to do with their volume or the regularity of their flow or with the amount of silt which they carry, though of course it is a fact that the cultivation of lands has an effect upon the silting of streams, and it is no doubt true that if the Federal Government owned all of the land at the headwaters of the Connecticut and the Merrimac and at the headwaters of the rivers of the Carolinas and could afford to and did prevent cultivation on any lands at the headwaters of these streams or along their course, there would be a trifle less silting, and therefore the dams which furnish water power would not be troubled with silt as much as when the land is cultivated to a considerable extent. But I assume that no one will claim that the Federal Government ought to attempt anything of the sort, though that is exactly the policy which this bill proposes to inaugurate; and not only that, but in the hearings before the committees and in discussions on the matter it is made very apparent that after the Government has reserved the watersheds the owners of water powers expect the Government to build storage reservoirs, all of which would be very lovely from the standpoint of the owners of water power, but a trifle hard on the other people of the country. The fact is that private interests are using, on behalf of this legislation, every healthy sentiment in favor of conservation to pour water upon their particular and individual mill wheels.

It is natural, right, and proper that we should look to resonable preservation of our forests and to reasonable protection of our watersheds. In the main it should be done by the States, and there would be no difficulty in the various States accomplishing it if they were willing to pay the price.

It is very doubtful whether there is any authority under the Constitution for the Federal Government to even aid and assist, by general investigation, research, and so forth, in the preservation of woodlands, but this doubt has already been resolved in favor of that being done to a reasonable extent, and no one has any objection to that character of work being carried on.

It has of recent years become quite a habit to unload upon the Federal Government projects that ought to be borne by the people locally and by the States. The claim that the

Federal Government must establish forest reserves in the White Mountains and eastern Appalachians because the problem is an interstate one is simply another way of saying that as the people of New Hampshire will not spend their money to protect the water power of Massachusetts, the people of all the States ought to do it; that because the people of certain of the South Atlantic States do not desire to expend their money for purposes which will be helpful to the people of another State, as well as themselves in the improvement of water power, that therefore the people of all the Nation should pay for such improvement.

No more brazen demand for the use of public money for private benefit has ever been made in the history of the world. There is nothing in the way of the people of two or more States entering into an arrangement whereby projects beneficial to their people may be carried on jointly, and certainly there is no reason why the mill owners along the lower course of certain streams should not unite to build storage reservoirs along the headwaters of such streams to regulate stream flow, except their natural disinclination to spend their own money in protecting their property so long as there is any hope of having the public money spent for that purpose.

The fact is that the indefensible system of using public money for a considerable class of so-called "river and harbor works" has so accustomed certain of our people to government expenditures in aid of private interests that they take quite naturally to this additional step in the direction of laying burdens upon all of the people for the benefit of the favored few.

The fact that it violates the Constitution, threatens the establishment of federal control in a manner that would have been repulsive and shocking to the last degree to the founders of the Republic, appears to give no pause whatever to the lobby which, under the guise of a disinterested desire to serve the public interest by conservation, seeks a monumental raid on the Treasury in the aid of a few private interests.

Mr. ENGLEBRIGHT. Mr. Speaker, this bill is based upon a proposition that for the purpose of controlling flood waters and improving the navigability of streams it will be good business policy to expend a large amount of money to purchase lands for forestry purposes. On a proposition of expending $19,000,000 for such a purpose it should be considered what the actual effect, if any, will be had on the streams tributary to the lands to be purchased, and how far this will be a wise expenditure of government funds. The advocates of this measure so far have failed to show in the slightest degree what will be the effect favorable to the control of flood waters or the navigable streams as to any probable actual results.

In the brief time at my disposal I desire to call your attention to a single point, that if this money is spent for the construction of reservoirs in proper places, that for the amount of money to be expended, water can be stored and used to the improvement of the low stage of water of the streams to a definite purpose and known possible result. And if you make careful calculations and estimates, you will find that reservoirs can be constructed and water stored that would cover all the lands proposed to be purchased to a depth of from 6 to 9 inches, water that would be available for all purposes proposed to be covered in this bill. There is not a Member who has spoken in favor of this bill who has been able to show by any authority that this measure would accomplish even a small percentage of such a result, so that the expenditure of money on the theories proposed is of a purely sentimental nature, and not warranted as a business proposition.

Mr. SCOTT. Mr. Speaker, I yield three minutes to the gentleman from Iowa [Mr. HAUGEN.]

Mr. HAUGEN. Mr. Speaker, it seems that before embarking upon a gigantic scheme like the one proposed in this bill we ought to have some information in order that the matter might be considered carefully, honestly, and intelligently. Up to the present time we have no official information except that furnished by the Secretary of Agriculture. It recommends the purchase of 6,000,000 acres. It further states that it will be necessary to protect 75,000,000 acres, and I conclude, from reading this report, that it will be necessary to purchase all of the 75,000,000 acres.

The gentleman from South Carolina [Mr. LEVER] has estimated the cost at $900,000,000. But, in my judgment, his estimate is low. If 75,000,000 acres of land is to be purchased, if the price is $10 an acre, it will amount to $750,000,000. But the report states that much of this land is worth from $75 to $125 an acre.

Besides, there are large plants involving an expenditure of hundreds of thousands of dollars, and the cost of these plants must be taken into consideration in the purchase of these lands. Nobody seems to know what it is going to cost in the end. It is stated in this report that these lands are owned in large tracts, and the owners of them are unwilling to sell the lands except for high prices. So I repeat that before we engage upon a gigantic proposition like this we should first have information; we ought to investigate, that we might know in advance the probable cost. It seems to me that it is the part of wisdom, the part of good judgment, and the part of common sense and business foresight that we should have detailed and accurate information, some data and reliable estimates, in order that we might know whether it is going to cost $100,000,000 or $1,000,000,000. I fear before we get through that it will cost more than $1,000,000,000.

Mr. Speaker, time will not permit my going into the merits or demerits of this bill, hence I will content myself by having inserted in the RECORD my views as set forth in the minority report.

VIEWS OF MR. HAUGEN.

Before entering upon such a gigantic scheme as is contemplated in the proposed bill, one which in the end, in all probabilities, will involve the expenditure of not millions but billions of dollars, Congress should have detailed and accurate information in order that the matter might be carefully, fully, and intelligently considered. It should at least have data or reliable estimates as to the probable cost, the number of acres that should be purchased for the preservation of the forests within the watersheds of the navigable rivers not only in the White Mountains and the Southern Appalachian Mountains, but over the whole country. The only official information available at the present time is that obtained under the act of Congress of March 4, 1907, which "requires the Secretary of Agriculture to investigate the watersheds of the Southern Appalachian and White mountains and to report to Congress the area and natural conditions of said watersheds, the price at which the same can be purchased by the Government, and the advisability of the Government purchasing and setting apart the same as national forest reserves for the purpose of conserving and regulating the water supply and flow of said streams in the interest of agriculture, water power, and navigation."

In this report the Secretary recommends that the Government acquire an area of about 6,000,000 acres at once, and states that an area of about 75,000,000 acres will have to be given protection. The Secretary has this to say (p. 32):

"It is an enormous undertaking to bring this immense area of 75,000,000 acres under proper conditions of protection and use. If the Government owned the land, the problem would be a comparatively simple one under our present forest policy."

I conclude from this that it is necessary to purchase the 75,000,000 acres to begin with. As to the method of acquirement and cost of lands the Secretary has this to say:

"WHITE MOUNTAINS.

"The timber lands of the White Mountains are in the main held by a few large companies, nearly all of whom are cutting extensively on the spruce stands for pulp or lumber manufacture. The plants of some of these companies represent an investment of several hundred thousand dollars. Manifestly, in negotiating for these lands, in so far as they bear uncut timber, the value of the plant must enter into the consideration. In addition, the stumpage value of spruce ranges from $4.50 to $6 or $7 per thousand. This would give the best stands a value of $75 to $125 or more per acre.

* * * * * * *

"The hard woods of the White Mountains, of which there is a large area, have not the value of spruce, nor are they as yet being extensively cut. Their stumpage value is from $2.50 to $4 per thousand, depending upon location, stand, and quality.

"The cut-over lands have a value ranging from $1 to $6 or $8 per acre, depending upon the condition of the timber growth upon them.

"The question of the acquirement of timber lands by the Government has been considered with the principal owners of the region. While unwilling to dispose of their virgin timber lands, except at very high prices, they are willing to consider the sale of their cut-over lands, the lands lying too high for lumbering, and the mountain tops.

"A careful study of the situation leads to the conclusion that most of the lands of these classes can be bought at an average price of $6 per acre.

"SOUTHERN APPALACHIAN MOUNTAINS.

"In the Southern Appalachians the timber lands are owned by large companies to a less extent than in the White Mountains, but even here as much as 50 per cent of many localities is under such ownership.

"Timber-land owners in the Southern Appalachians are generally inclined to sell their lands to the Government at a reasonable price, regardless of whether the lands contain virgin timber or are cut over. Furthermore, many of them are favorable to the transfer of their lands, themselves retaining the right to cut and remove certain kinds of timber above specified sizes.

"In considering the practicability of the Government's purchasing land for national forests in the Southern Appalachians conference has been freely had with timber-land owners, lumbermen, real-estate dealers, and title examiners. Moreover, attention has been paid to the sales which have been made during the past two years and the prices which have been paid.

"The price of virgin hard-wood land varies from $5 to $12 per acre, depending on accessibility and kind and quality of timber. Cut-over lands are worth from $2 to $5 per acre, their value likewise depending upon their location and the condition of the timber growth upon them."

From this report, or any other information available, who can figure out of the probable outlay of money? No data are furnished as to the number of acres of the $75 and $125 per acre land. There are no data as to the number of plants. All that is known is that some of these lands are valued at from $75 to $125 per acre, and that there are plants there representing an investment of several hundred thousand dollars, and that the value of the plants must enter into the consideration. No data are given as to the number of acres of hard wood, except that there is a large area. No data are given as to the number of acres of cut-over land, valued at from $1 to $8 per acre, except that it is believed that most of the land of these classes can be bought at an average price of $6 per acre.

Suppose the average price of all the 75,000,000 acres to be purchased in this region is $20 per acre, it would mean an investment of one and one-half billion dollars, an amount more than six times the cost of the building of the Panama Canal, or nearly twice the amount of our present interest-bearing debt, or four times the value of the total annual products of the Iowa farms.

The Secretary reports that these timber lands are in the main held by a few large companies. This means large prices. Besides, the Government generally pays more for what it buys and will have to pay larger prices than would have to be paid by individuals in purchasing the same lands.

The Secretary reports that the principal owners of lands are unwilling to dispose of their virgin timber lands, except at a very high price; that the cut-over lands, lands lying too high for lumbering, and the mountain tops—or, in other words, only such lands as are not needed or desired for this or any other purpose—are offered for sale.

Considering the Secretary's report and the fact that the purchase of the 75,000,000 acres, involving an expenditure of probably over a billion dollars, is probably only a small part of the land necessary to be acquired, as undoubtedly enterprising and patriotic real-estate owners in other parts of the country would be willing to unload their lands onto the Government, especially when the price is to be very high, and will insist that there be an equitable distribution of these billions of dollars; and considering also the enormity of the whole proposition, is it not the part of wisdom, common sense, and sound business judgment first to obtain detailed, accurate, and reliable information in order that a comprehensive, well-devised, and practical policy may be worked out and followed?

Considering also that the proposed bill is an entering wedge to such a gigantic proposition, I feel constrained to dissent from the views of the majority, and believe that for the present H. R. 21986, passed the first session of this Congress, is the proper legislation. Its provisions are clearly set forth in Report No. 1700, a copy of which is appended.

GILBERT N. HAUGEN.

[House Report No. 1700, Sixtieth Congress, first session.]

The Committee on Agriculture, to which was referred House bill 21986, has had the same under consideration and reports as follows:

At the beginning of the present session a number of bills were introduced and referred to the Committee on Agriculture having for their general purpose the purchase of certain tracts of land in the White Mountains and in the Southern Appalachian Mountains with a view to preserving the forests on said lands and conserving the flow in the rivers having their sources therein. The committee considered its most pressing duty to be, first, to prepare the appropriation bill for the Department of Agriculture. Before the consideration of this bill had been completed a resolution was introduced by Representative BARTLETT, of Georgia, providing that the bills above mentioned, commonly known as the "White Mountain" and "Appalachian Park forest-reserve" bills, be referred to the Committee on the Judiciary, with the request that that committee render an opinion as to the constitutionality of the proposed measures. This resolution was adopted by the House, and the bills were referred accordingly. Pending the report of the Committee on the Judiciary the Committee on Agriculture was of the opinion that it could not properly give consideration to these measures.

On April 20, 1908, the Committee on the Judiciary rendered an opinion to the effect that the United States would have no right to purchase lands for the purpose of creating a forest reserve, but that Congress might appropriate for the purchase of lands having a direct and substantial connection with the navigability of navigable rivers. As a result of this decision, Representatives who had introduced the bills which had been referred to the Committee on the Judiciary modified and reintroduced them, and they were again referred to the Committee on Agriculture, which took up the consideration of them at the earliest possible date. After hearing testimony and considering the bills for several days it became evident that the committee, with the information then before it, was unwilling to favorably recommend any measure committing the United States to the policy of purchasing forest lands. The whole matter was therefore referred to a subcommittee, with instructions to recommend to the full committee such action as it was deemed proper to take. As a result of the deliberations of this subcommittee, the bill H. R. 21986 was reported to the full committee, and by its action is herewith reported to the House.

It is a matter of common knowledge that the forests in the White Mountains and in the Southern Appalachian Mountains are being rapidly destroyed, and the desirability of preserving what remains of them, or at least of introducing methods of lumbering which will prevent the destruction of immature timber and will protect the forests from fire, is universally conceded, not only for the perpetuation of the timber supply, but also for the conservation of the flow of water in the streams having their source within these forests. The problem as to how this desired end should be reached has been widely discussed and has awakened profound interest throughout the entire country. As a result of this discussion, four distinct methods have been suggested.

First. It has been held by many that the problem was one belonging exclusively to the States concerned. Those holding this view have argued that the Federal Government has no constitutional authority to purchase lands for the purpose of conserving the forests upon them, even though such preservation may conserve the supply of water in navigable streams. They hold that the matter is one over which the States have exclusive jurisdiction, and that if the right exists it is the duty of the State to assume the responsibility of meeting it.

Second. Another view is that while it is neither the right nor the duty of the Federal Government to purchase the forests it may properly cooperate with the States or with private owners in their preservation by furnishing expert advice and assistance in their proper utilization and administration.

Third. Still another view is that when it is shown that the forests of a given watershed have a direct and substantial connection with the navigability of the navigable rivers flowing from that watershed the Federal Government has the right to exercise jurisdiction over the forests therein, although they remain in private ownership, and prescribe the method which shall be followed in utilizing the forests within such watershed.

Fourth. The last, and doubtless the most generally advocated plan, proposes that the Federal Government shall buy all the land that may be necessary to protect the watersheds of navigable rivers and exercise over the forests growing upon them all the rights and privileges of absolute ownership.

The bill now before the House was drawn with a view to meeting, in a measure at least, each of these four proposed plans. The first section proposes to give the consent of Congress to each of the several States of the Union which may wish to do so to enter into such agreement or compact, not in conflict with any law of the United States, as it may deem desirable or necessary, with any other State or States for the purpose of conserving the forests and the water supply of the States entering into such agreement or compact. It has been often urged, by those who insist that the Federal Government should purchase the forests under consideration, that the problem is interstate, and in view of the constitutional inhibition against a State entering into any agreement or compact with another the proper treatment of the problem is made impossible to the States alone. If section 1 of this bill becomes a law, this obstacle to cooperation between and among the States will be removed.

Section 2 of the bill appropriates the sum of $100,000 to enable the Secretary of Agriculture to cooperate with any State or group of States, when requested to do so, by supplying expert advice on forest preservation, utilization, and administration, and upon reforestation of denuded areas. It also authorizes the Secretary of Agriculture to enter into agreement with the owners of any private forest lands situated upon the watershed of a navigable river to administer and protect such forest land upon such terms as the Secretary of Agriculture may prescribe. It is believed that under the authority given in this section many thousands of acres of forest lands will be brought as effectually within the jurisdiction of the United States for all the purposes of scientific forestry as if these lands were actually owned by the Government.

Section 3 of the bill provides for the appointment of a commission to be composed of five Members of the Senate, to be appointed by the presiding officer thereof, and five Members of the House of Representatives, to be appointed by the Speaker.

Section 4 makes it the duty of this commission to investigate all questions tending to show the direct and substantial connection, if any, between the preservation of the forests within the watersheds of the navigable rivers having their sources in the White Mountains and Southern Appalachian Mountains, and the navigability of said rivers. And in case the commission shall determine that such direct and substantial connection exists, it shall then be its duty to ascertain to what extent, if at all, it may be necessary for the Government of the United States to acquire land within the watersheds referred to, the number of acres of such land, and the probable cost, or whether it may be desirable, if within the power of the United States to exercise, without purchase, such supervision over such watersheds as may be necessary to conserve the navigability of the rivers proceeding therefrom.

Under the provisions of this section all the questions arising out of the proposal that the Federal Government purchase the forests or that it exercise jurisdiction over them without purchase may be carefully studied and fully considered. It is true that by an act of the last Congress the Secretary of Agriculture was authorized to report and did report upon the watersheds of the Southern Appalachian and White mountains, the purpose of the report being to present to Congress "the area and natural conditions of said watersheds, the price at which the same can be purchased by the Federal Government, and the advisability of the Government purchasing and setting aside the same as national forest reserves for the purpose of conserving and regulating the water supply and the flow of said streams in the interest of agriculture, water power, and navigation."

Without intending any reflection upon those who prepared this report, it may be fairly said that it does not present such detailed and accurate information as any careful business man would insist upon having before entering upon a policy which was to involve the expenditure of many millions of dollars. It does not indicate the extent of the navigable portions of the rivers whose navigability it is desired to protect nor the value of the forests upon them. It presents no data showing to what extent, if at all, the volume or the steadiness of stream flow has been influenced by the destruction of the forests. It shows in only the most general way the location, area, and probable cost of the lands it is proposed to purchase.

While it recommends (p. 37) that the Government acquire an area of 600,000 acres in the White Mountains and 5 000,000 acres in the Southern Appalachian Mountains, it states also (p. 32) that an area of 75,000,000 acres will have to be given protection "before the watersheds and important streams are adequately safeguarded," suggesting the thought that while less than 7,000,000 acres are to be purchased at once, 75,000,000 acres must ultimately be acquired if the watersheds of the important streams are to be "adequately safeguarded." Your committee is of the opinion that if a commission of 10 members of the legislative body, responsible to their constituents and to the country for whatever report they may make, is directed to investigate the subject, the information presented in its report will be sufficiently comprehensive and exact to enable Congress to intelligently legislate upon the subject. The commission is given authority to employ experts and such clerical assistants as may be needed, and is required to report to the President not later than January 1, 1909.

Believing that this bill, by opening the way for the States to cooperate with one another, puts it within their power to contribute much to the solution of this important problem; that the provision it makes for cooperation between the United States, the States, and private owners of forest lands must contribute greatly to the rapid extension of scientific forestry; and that by means of the commission for which it provides the most careful study of the whole problem with a view to future legislation is made possible; and that for these reasons the proposed legislation will be of great public advantage, your committee respectfully reports the bill back to the House with the recommendation that it do pass.

Mr. REEDER. Mr. Speaker, I think it very desirable that we enter into the conservation of our resources as speedily as possible. And the resources to be preserved by this bill are among the small number that can be augmented with care.

The theory advanced by some of the speakers and credited to scientific persons, that forest cover will not retard the flow of rains from the hillsides, is known to be untrue by any observing person. The main purpose of government ownership and control of lands too rough for cultivation is to keep the fires from burning the ground over, and thus destroying not only the tree growth, but also from destroying the leaf and other forest covering of the soil, which forms the sponge that absorbs the rainfall, and thus detracts from the floods and augments the lower stages of the rivers, scientific men to the contrary notwithstand-

ing. Purchasing rough land and preventing fires from burning the forests and forest cover off is money vastly better spent toward navigation and flood control than money spent for dikes to control floods which are constantly raising the bed of rivers and closing the outlets to these rivers.

A question propounded by the opposition to forest conservation is, What will be the expense of caring for these forest lands after they are secured?

This query is answered by stating that the Republic of Switzerland gets a net profit of $5 per acre for caring for her forests. Our soil and climate is better calculated to grow trees than Switzerland's. So we may safely assume that when we give our forests as good care we will get as good or better results.

This bill provides for an expense of $19,000,000 during ten years. And our friends who are opposed scare themselves with the billion or more some future Congress will appropriate on account of the wisdom that will at that time show for our present outlay.

Future Members of Congress will have no other reason for an appropriation for a like purpose, as every acre bought will be paid for and will need no further expense except to keep the fires out.

I am sorry to see the $1,000,000 appropriated at this time, owing to the condition of the Treasury. But this is a broad, beneficent policy that we should adopt soon, as a great damage is annually occurring by means of fires and soil erosions. That can scarcely be remedied. France is spending millions because her statesmen of an earlier generation were so shortsighted as to believe, with our scientific men quoted here to-day by the opponents of this measure, that burned-over hillsides will retain as much rainfall without washing as a good deep leaf and leaf-mold sponge will. In France they are cementing portions of land to prevent the soil being washed into their rivers.

We should retain the navigability of our streams. We should not preserve private water powers at public expense, but we should prevent the destruction of private property in water powers by our shortsightedness as legislators sent here to do those things which can only be done by the Government, and which if not done will entail great permanent loss to many people.

No people so far in history have prevented forest destruction, however disastrous, until their government has given the matter its attention.

We should prevent as early as practicable the great loss of property in the way of farm lands destroyed and other property in city and country.

But we should not vote for any bonds or expend large amounts from the Treasury for river improvement until we have given the matter of how we will use these funds toward flood control sufficient thought to get us out of the class of the old woman who would keep back the ocean with her broom.

Such is the plan thus far used in expending our money on dikes and levees. A flood can only be permanently and cheaply controlled at its source.

The floods of the Missouri, the stream of which I know most, do a great amount of damage annually. By reservoirs and forests these floods can be so far controlled as to almost entirely prevent these losses, and for an expenditure of less money than the damage of the floods for any twenty-year period, or for a tax of 1 mill or less on the dollar on the property benefited for a term of twenty years at most. I will add, though a little foreign to the subject in hand, that by means of the national irrigation law passed in 1902 enough water is already held back of the Missouri River floods to cover 2,500,000 acres of land 1 foot deep, and it will not be many years until the amount will be doubled, then trebled.

This bill, like the irrigation law, is a right move toward making this a much greater nation than it now is. I hope all who wish to see our country developed will cast a vote for its passage.

The SPEAKER. The time of the gentleman from Kansas has expired.

Mr. WEEKS. Mr. Speaker, I yield one minute to the gentleman from West Virginia [Mr. STURGIS].

Mr. STURGISS. Senate bill No. 4825 proposes the beginning of the creation of national forest reserves in such States as contain no Federal lands, by the cooperation of the respective States and private owners of lands with the National Government.

The primary purpose is to conserve the forests that are situate upon the watersheds of navigable streams, and to reforest such watersheds as have been denuded of the original forests, and to protect them from fires and excessive or wasteful cutting. It is alleged by the strict constructionist that this can only be undertaken by Congress under some well-defined grant of power to be found in the Constitution of the United States, and this is generally conceded to be found in the "right to regulate commerce among the several States," which has been accepted without dissent, as authorizing the improvement and protection of all navigable streams or rivers that carry interstate commerce, and by virtue of which many millions of dollars for many years have been annually expended in deepening and widening the channels of such rivers, constructing locks and dams, erecting walls, jetties, and piers, regulating the quantity, direction, and flow of the waters, the height and span of bridges permitted to be built over such streams, and the putting up and maintaining lights and other aids to safe navigation. In the judgment of many, the right to do all these things might be placed upon more impregnable ground under the clause that confers powers "to provide for the general welfare."

Any government worthy of the name, and that has any hope of permanence, must have this inherent right, but, because the National Government is one of enumerated and delegated powers, the fathers wisely included this essential power in a specific grant; and while it has been sparingly invoked in the past, it is becoming recognized as the express grant of a power that will be more and more exercised, where, by the limited territorial jurisdiction of the several States, they are powerless to apply the appropriate remedy for patent evils that affect the citizens of each State.

If the water supply of any navigable stream carrying interstate commerce, or the depth of its channel, or any other thing that diminishes its value as an instrument of commerce between the States, is impaired, and the States refuse, neglect, or are powerless to correct the evil, then Congress must have power under the interstate-commerce clause to apply the appropriate remedy.

If destruction of the forests on the watersheds of navigable streams diminishes the rainfall and the aggregate water supply for the rivers fed by these watersheds, or causes the accumulated waters from rain and snow to be more quickly discharged in great floods, that imperil navigation and endanger life and property engaged in that occupation, and diminishes the quantity of water at intervening periods so as to suspend, in whole or in part, navigation for months at a time, or if this denudation causes such erosion of the soil upon these watersheds as to carry the silt and detritus into these streams in quantities sufficient to obstruct and fill locks and dams and channels that have been constructed and dredged at great cost, for navigation purposes, then no one can question the power and right of the National Government, under the grant relating to commerce, to apply the appropriate remedy. But the opponents of the power or right to reforest the hills, mountains, and valleys that feed our navigable rivers and to protect and preserve those forests now in danger of destruction content themselves with denying that there is any proved relationship of cause and effect between the forests and the water supply, between denudation and injury to navigability, but practically concede that if such relationship were established, then the federal power might be properly invoked to prevent or remove the cause.

But the evils arising and directly traceable to the destruction of our forests do not affect navigation and consequently interstate commerce alone, or chiefly or most disastrously. The floods arising from the bared watersheds of one State are precipitated upon the lands, lots, cities, furnaces, factories, and homes of another State, inflicting enormous losses of property, of wages, and disease and death upon the innocent citizens of the States that have no jurisdiction and can not possibly control conditions at the source of all this disaster.

Again, streams that are nonnavigable, because of their great fall, have been improved by dams, reservoirs, and canals, so as to furnish enormous sources of power, upon which great industries employing millions of capital and thousands of operatives have been founded, and these streams, having their watersheds and sources of supply in other States than those in which the power plants are located, are beyond the control of the States in which are situate the parts of the streams which are so valuable for water power. Must they be denied all relief merely because their streams are nonnavigable and incapable of bearing commerce between the States, although vastly more valuable than many small navigable streams?

Over $50,000,000 worth of timber has been destroyed by fire each year for the last twenty years, and last year, the most disastrous in this respect in the history of the country, over $100,000,000 worth was consumed, and an average loss of 50 lives annually for the twenty years or more was caused by forest fires. The humus desiccated by a long, hot, and dry summer burned like peat, and the ashes were washed away by the heavy later rains and carried into the navigable waters

below. If any State neglects to preserve the forests growing therein, and thereby wastes the heritage of her own people, and endangers that of the adjoining States by providing no system of fire patrol, is there no power anywhere to guard the general welfare of each State, both the innocent-suffering one and the wanton wasteful one? Must all suffer for the acts of omission or commission of one guilty one, over whom the others have no control, jurisdiction, or authority? A government that is powerless to provide for the common welfare is a pitiable spectacle and was never contemplated by the founders of the great Republic. A government that has the power and will not exercise it beneficently for the good of the people who created it has failed to achieve that ideal which we boast is the chief excellence of our Government.

It has been charged in the debate on this bill that purely selfish considerations control those who advocate the enactment of this measure. Those who urge that objection forget that patriotism has been well defined as enlightened selfishness; that selfishness that considers the welfare of every part of our common country. Others have asserted that the bill is a subterfuge, and that the proposed purchase of lands is not limited to the purpose of promoting navigability of streams. They have either not read the bill or have read it carelessly. Section 7 provides that the Secretary of Agriculture shall examine and recommend for purchase only such lands as in his judgment may be necessary to the regulation of the flow of navigable streams, and such lands shall be examined by the Geological Survey and a report made showing that the control of such lands will promote or protect the navigation of streams on whose watershed they lie.

If the policy of this bill can be justified only and yet fully upon the constitutional ground that thereby navigation is a direct instrument of commerce between the States, certainly it can in no wise adversely affect that policy if all the benefits and advantages just enumerated will follow as incident to that course of action, even if these incidental advantages far exceed those that relate to commerce.

If the general welfare be promoted as a necessary consequence of creating and preserving forest reserves in aid of navigation, it is in accord with the general purpose of the Constitution, and at least gives no reason for opposing the proposed legislation.

FOREST RESERVES IN AID OF NAVIGATION.

"The meaning of the Constitution does not alter. Its language as a grant of power to the United States is general, and, as changes come in social and political life, it embraces all new conditions within the scope of the powers conferred." (South Carolina *v.* United States, 199 U. S., 437.)

"The United States is a government, and consequently a body politic and corporate, capable of attaining the objects for which it was created, by the means which are necessary for their attainment." (Van Brocklen *v.* Anderson, 117 U. S., 151.)

"The United States, at the discretion of Congress, may acquire real estate in any State when needed for the use of the Government in the execution of any of its powers." (Van Brocklen *v.* Anderson, 117 U. S., 115.)

"That which is implied is as much a part of the Constitution as that which is expressed." (South Carolina *v.* United States, 199 U. S., 438.)

Those who oppose the general policy contemplated by the bill under consideration, namely, the creation and preservation of forests, assume that the right and power to do so can only be invoked if it can be clearly shown that deforesting diminishes the annual precipitation of moisture, occasions irregularity of water flow by increasing the number and magnitude of dangerous floods at one period of the year, or by reducing the water supply at other seasons to such an extent as to impair or temporarily suspend navigation, or by increasing the silt, sediment, and detritus that is carried by the tributaries into the navigable streams and deposited in the channels, locks, and dams or harbors, to the detriment or impairment of navigability. And thereupon these opponents declare and attempt to prove that none of the evil effects upon navigation just enumerated can be traced to any of the asserted causes, or directly or indirectly to the destruction of the forests.

The chief exponent of these views, and one upon whom all others rely, is Lieut. Col. H. M. Chittenden, Corps of Engineers, U. S. Army, and his paper, "Forests and reservoirs, in their relation to stream flow, with particular reference to navigable rivers," presented November 4, 1908, before the American Society of Civil Engineers, was published in the transactions of that society in volume 24, beginning at page 924, and has already been printed in the speech of Mr. HUMPHREY, the Member from Washington, on the 9th day of February of the present session.

After stating generally that the commonly accepted opinion is that forests have a beneficial influence on stream flow, he states four propositions (p. 925) not fully nor fairly setting out the contentions of those who believe that forests do have a beneficial effect on stream flow. These views, he says, were given general currency nearly forty years ago by Sir Gustav Wex, chief engineer on the improvement of the Danube, whose writings were transmitted into English by the late General Weitzel, of the United States Corps of Engineers, and by that translation became known to the profession and the general public, and are now, as he admits, accepted practically without question in the public mind, and he might have added truthfully, by many if not most engineers of reputation and experience.

He admits precise demonstration of the falsity of these propositions is scarcely possible, and then with cheerful alacrity undertakes this admittedly impossible task, extending his argument over fifty pages, with many graphic illustrations whose pertinence is not apparent after a careful study of his paper. It is made up largely of unproved assertions and illogical conclusions drawn from unproved allegations. In concluding his paper he says that the arguments presented are his individual opinions only, and does not assert them as held by any of his fellow-officers or associates nor give the names of any who agree with him. His statements have been so completely refuted in a paper just prepared, but perhaps not yet given to the public, under the direction of the Bureau of Forest Service, by Mr. Gifford Pinchot, that I submit it herewith:

CHITTENDEN ARTICLE.

The article assumes from beginning to end that the forest influence on run-off is nothing more than the influence of a layer of leaves over an "inclined-plane surface, practically impervious to water" (p. 926). Ground storage is ignored entirely, and consequently no weight is given to those conditions at the surface of a forest soil which tend to divert waters to underground flow. It refers frequently to the action of the "forest bed" merely in holding water, but emphatically says (p. 927) when "the forest bed becomes completely saturated, its storage capacity is exhausted, and it has no more power to restrain floods than the open country itself" (p. 928).

What is the importance of ground storage which is so lightly passed over? Professor King has found that ordinary soils have an absorption capacity of 4 to 5, or even more, inches of water per foot of depth.[a] Ground water extends to great depth. Considering the earth masses which lie above the stream levels in mountainous regions, one can get an idea, though a somewhat inadequate one, of what ground storage means to the permanency of stream flow. The ground water is constantly in motion, is replenished entirely from the surface, and is easily disturbed by any change of surface conditions.

By far the most important action of the forest is in providing conditions favorable for rapid and regular absorption by the surface soil of water from rainfall or from melted snow. Ignoring this most evident and important influence of the forest, the author expresses surprise at "the cheerful confidence with which the popular thought accepts" the theory of forest influences upon run off. This is the real weakness of the article. It denies—and denies without proof—that which any man can go out into the woods with his eyes open and see for himself.

It is admitted that for average conditions the forest bed has a degree of retentive action (pp. 926 and 927), but the author hastens to say emphatically that "it is not true for extreme conditions—great floods and excessively low water" (p. 926). The article further says: "When a period of heavy storm occurs, spreading over a great area, continually increasing in intensity, the forests, by retaining some portions of the earlier showers and paying them out afterwards, do produce a general high condition of the river, which may greatly aggravate a sudden flood arising later from some portion of the water shed" (p. 928). The author will surely admit the fallacy of this statement upon more careful consideration.

Whatever retentive action the forest has under normal conditions it certainly retains under extreme conditions. If a forest-covered soil has the capacity to store and gradually distribute the water from a 2-inch rain, it likewise has the capacity to store 2 inches from a 6-inch precipitation, and even more should the latter be distributed over several days. Any other assumption would lead to the conclusion that the immediate result of a heavy rain is to leave the forest dry, which conclusion clearly indicates that the reasoning must be wrong.

A further mistake is made in assuming that the summer rains absorbed by the forest soil are lost through evaporation (p. 929). Except in light rains, this is not the case. The summer rains are often heavy, and the major part of a usual summer downpour passes into the soil to replenish the streams.

The author says (p. 944), "The constantly reiterated statement that floods are increasing in frequency and intensity as compared with former times has nothing to support it."

It is true we have not long records of stream flow in this country. His statement, however, shows that Colonel Chittenden is unacquainted with, or else ignoring, the records which we have.

Figures from fifteen to thirty-four years for those streams whose watersheds lie in the Appalachian Mountains and which have been heavily cut over within the period of measurement refute absolutely the claims made in this article. In the report of the hearing on House resolution 208 before the Committee on the Judiciary it is shown that the Ohio, Cumberland, Wateree, Congaree, Savannah, and Alabama rivers disclose a marked increase of floods and flood duration. A more recent examination of the records of flow for the Allegheny, Monongahela, Muskingum, and Potomac show precisely the same trend. These streams do not show general increases in the extreme height of floods. Rather, they show a marked tendency of the waters to rush away in many sudden, violent floods of short duration, which is to be expected in the case of barren slopes. Most streams of which we have records show a longer low-water period now than formerly, though the tendency is not so marked as the tendency toward increased floods. Where such a tendency is not in evidence, it may possibly be due to the geological formation of the watershed or to the filling of the stream channels, so that the general water level is raised.

In contradistinction to these streams which have mountainous or hilly watersheds, the Red River, whose upper basin is entirely in the

[a] F. H. King: Nineteenth Annual Report, U. S. Geol. Survey, Part II.

plains and in a region which has largely been brought under the plow in the last fifteen years, shows both diminished floods and greatly improved low-water conditions during the past sixteen years. This proves the case over again, only from another point of view. Surface conditions over a watershed clearly have great influence on the flow of the streams which drain it.

Colonel Chittenden has made an unfortunate choice in comparing, as he does on page 936, the floods of March 17 and 26, 1907, on Puta Creek and the American River, tributaries of the Sacramento at Secramento, Cal. His figures of precipitation for the American watersheds are approximately a correct average of the various gauging stations of the watershed. His figures for the precipitation on the watershed of Puta Creek, however, are absolutely misleading, as is shown by the accompanying map. In order to get an average precipitation of 22.7 inches he has taken apparently only two stations on the watershed, and these on the exterme summit of the Coast Range. As the chart shows, all the greater part of the watershed, some of which shows less than 20 per cent of the figure which he uses, has been disregarded. If figures from all parts of the watershed were used, as they should have been, the average precipitation of this watershed would have come much below the average of the watershed of the American River. Using the right figures, this illustration proves exactly the contrary of what Colonel Chittenden uses it to prove. It proves that a larger precipitation on the American watershed, which is wooded, produces a relatively lower flood stage.

Fundamental errors underlie the author's discussion of influence of forest upon snow melting. The first is that the ground does not take up the water from the first melting of snow. The article says (p. 931): "The water from the first melting of the snow blanket does not sink into the ground, but into itself. * * * The author has seen an 8-foot covering of snow dwindle to 2 feet with the ground beneath it still comparatively dry." This is a very singular observation. In my experience, whenever snow begins rapidly to settle on account of the warmth, free water appears and is to be seen in every stream. In a forest, especially in a mountain forest, the snow usually falls on unfrozen ground, and the natural warmth of the ground hastens the melting of the snow at the bottom. Whatever free water appears soaks at once into the ground.

It is true that because the sun is excluded in a dense forest melting begins later than in the open, and Colonel Chittenden correctly states a universally known fact when he says that "even after the ground in the open is entirely bare, except under the drifts, the forest areas may still be covered with an unbroken layer of snow." Why? Simply because it is colder in the forest. It is colder when the process begins; it is colder day by day until the snow is gone in the open. The forest consequently acts in exactly the same way as the gulch on the north mountain exposure. It catches the average amount, or more than the average amount, of snow, and holds it till the melting time in the open is past. If, in either case, the melting went on as fast as in the open, the discharge of water would be greater, considering the whole watershed, and floods thereby intensified.

The only condition under which the melting is anything like as fast as in the open is during a warm rain, such as often accompanies the chinook winds in the western part of the United States. When this happens, the effect is the same on the snowdrift in the gulch and on the snow blanket in the forest. It melts at the most rapid rate. Once melted there is this difference: Water from the snowdrift is at once in the channel ready to swell the flood; water from the snow blanket is caught up in the layer of leaves and humus overlaying a porous soil and at every moment retarded in its downhill course. A portion seeps down through the humus to the streams and escapes within a few hours or a few days; a larger portion goes into the soil and does not reappear for weeks or perhaps months. The little channels through the débris (p. 957), which Colonel Chittenden has observed so effectually to lead the water away through a forest soil, have escaped my own notice.

Colonel Chittenden's graphic illustration of snow melting in forests and open country (fig. 1) neither shows the fact nor agrees with his own statement. The diagram shows the run-off in forest to cease before the run-off in the open, while, as already noted, he says (p. 931) "even after the ground in the open is entirely bare, except under the drifts, the forest areas may still be covered with an unbroken layer of snow." Who is so blind as not to know that the statement is true and the diagram misleading? Here, again, the main point is not delaying for a few weeks the melting of the snowdrifts. The main point is the facilitating of ground storage, and this the forest does far better than any other means.

The author's avowal that his theory is true for the Adirondacks and the White Mountains as well as the West is contrary to the testimony of those who know real conditions in these regions. One well qualified to know how the flow of the Connecticut River has been affected by timber cutting in the White Mountains is Mr. C. C. Goodrich, of Hartford, Conn., general manager of the New York and Hartford Transportation Company. Mr. Goodrich made the following statement before the House Committee on Agriculture January 30, 1908:

"For thirty years I have been manager of some 35 United States vessels engaged in coastwise trade between the various ports upon the Connecticut River, and in this term I have had ample opportunity to realize the effect upon our rivers of the denuding of the forests in the White Mountains, especially of late years, since the cutting has extended to the minor timber—the spruce of 6 or 8 and even 5 inches, which was formerly left to grow. From the beginning of my experience our floods have commenced about from the 1st to the 10th of April, and they came for the next two months pretty steadily, and for two months longer there was still a steady feed from those mountains. In the last twenty years the freshet has come fully one month earlier, the continuation has been more than one month longer, and the total supply of water has been reduced at least 50 per cent, coming rapidly in the spring, when it was of no use to the mill man or the man engaged in navigation, and escaping and going by without being made valuable in any way, and has been followed at the present time by an almost total lack of flow, beginning with about the 10th of May and extending through until the fall rains come again, nearly to the 1st of October."

It is difficult to see the author's object in discussing with vehemence and at length the effect of forests in increasing precipitation, when he finally arrives at the point frankly asserted by practically all observers that we do not know. Belief in the accepted theory of rainfall and knowledge of the influence of the forest conduce to the idea that forest may increase percipitation, and that in considerable degree. But no careful, comprehensive study has ever been made of the rainfall measurements of the United States to determine this question, and until this is done, little is to be gained by discussion.

Colonel Chittenden's statements regarding erosion are so contradictory as to be self-destructive. On page 949 he says: "In his observation, embracing pretty nearly all varieties of timber land in the northern two-thirds of the United States, he has still to see a single example where the mere cutting off of forest trees leads to an extensive erosion of the soil." Yet out of this same remarkable experience he doubtless speaks a few lines below when he says: "A forest soil unprotected by forest débris is almost as erosible as a field under culture."

Again, he says (p. 950): "Roads and trails are one of the great sources of erosion in hilly countries, but plowing and tilling are the principal causes." Further on in the discussion in speaking of the silt carried by the rivers, which he estimates at from 50 to 100 per cent higher than anyone hitherto, he asks, "Where does this enormous volume of soil come from? Is it * * * from cultivated fields, an annual toll laid upon the precious fertility of our agricultural lands? Not at all. Only a very small proportion comes from this source."

Still, again, speaking of the sediments carried by the rivers and its great value in enriching the lowlands (p. 953), part of which he everywhere admits to come from cultivated lands, and some portions of which, indeed, must come from the "forest under culture" (p. 949), which he so much fears, he yet finds it possible to say: "The oft-repeated assertion that owing to the cutting off of forests our rivers are shoaling up more than formerly may be challenged absolutely."

In this bewildering array of contrary assertions, which would the author have us accept?

In a translucent way he senses the fact that there is an erosion problem, that somehow and from some place where it does no particular harm an enormous amount of sediment gets into the streams, that it is carried down and deposited by beneficent floods, not in the channels, but to the great benefit of the lowlands. One gets the idea from his statement that on the whole the process is beneficial and to be encouraged.

Side by side with this befogged conception let us set down the statement of a man who has fully grasped the situation. At the White House conference last May, Mr. J. J. Hill, speaking on this very point, said: "To-day as you ride through the South you see everywhere land gullied by torrential rains, red and yellow clay banks exposed where once were fertile fields, and agriculture reduced because its main support has been washed away. Millions of acres, in places to the extent of one-tenth of the entire arable area, have been so injured that no industry and no care can restore them."

Despite the failure of Colonel Chittenden to comprehend the situation, erosion is going on so rapidly as to form one of the heaviest taxes upon the Nation's resources. It is going on in burnt-over mountain forests; it is going on far more rapidly on agricultural lands; it is going on most rapidly of all on steep mountain lands which have been cleared and tilled when they should have been kept in forest.

The silt and sand thus derived have gone straight into the streams, are going there now faster than ever before, and are there in greater quantity than at any time in the past.

Even though they are contrary to Colonel Chittenden's claims, there are two fundamental propositions which must be accepted:

The first is that the condition of the surface of a watershed does influence the flow of water in the stream which drains it.

The second is that the streams are filling faster than ever before with silt from denuded mountain lands and poorly tilled farm lands.

With these two propositions before us, how can we escape the conclusion that the improvement and maintenance of our waterways and the protection of our watersheds are one and the same problem?

As supplementing in some degree the statements contained in Mr. Pinchot's paper, I submit some facts drawn from my own State, some of which have come within my own observation and in my personal experience.

I have resided in the valley of the Monongahela River for more than forty years, and have traversed the greater part of Monongalia County many times within that period. A very large part of the heavy timber has been cut off within the last fifty years, much land cleared and put into cultivation. In that time the half dozen or more bridges on Dunkard Creek have been carried away by floods three different times, although when rebuilt they were placed at a greater elevation each time, thus showing the increasing height of the floods as the timber had been cut off. This stream is tortuous, flows for its greater part through a hilly but not mountainous country, joining the river on its western bank, and is about 45 miles long.

A similar condition as to floods and their effects upon the bridges is found to exist in Deckers Creek, which is about 30 miles long, arising in a mountain valley, with a fall of about 900 feet in the last 12 miles of its course, joining the river at Morgantown, on the eastern bank. Probably four-fifths of the original heavy forested area has been cut over within fifty years.

The slopes for the greater part are steep and the surface rocky for the mountain section. High floods and very low water alternate with each other nearly every year, the contrast apparently greater year by year, till a dozen grain and saw mills and a paper factory have been abandoned for want of water and power originally ample, and for the first time in the history of the development of this valley deep wells were drilled during the past summer to secure adequate water for industrial plants that theretofore had drawn their diminishing supplies from Deckers Creek, not for water power, but for steam and mechanical and washing purposes.

About ten years ago the harbor in the mouth of this creek was dredged out under my supervision to a depth sufficient to load barges with lumber and like supplies, and was so used for three or four years, to supply the markets on the lower river. This harbor has been completely filled with sand and silt brought down the stream by the floods, and the small flow of water during the summer and fall would not for a part of the time float a shingle, and has formed an extensive bar projecting into the river and contracting the navigable channel. It is

my conviction that the total annual stream flow has been greatly reduced within the forty years that I have been familiar with this stream, and this has been coincident with and reduced with the removal of the forests.

Flood records as follows have been kept on certain rivers, and show the increase in frequency of floods, in percentages:

River.	Place of record.	Period of record.	Years.	Number of floods in first half.	Number of floods in second half.	Percentage increase.
Ohio	Wheeling, W. Va.	1882-1907	26	46	59	28
Monongahela.	Greensboro, Pa.	1886-1907	22	30	52	73
Potomac	Harpers Ferry, W. Va.	1890-1907	18	19	26	37
Kanawha	Charleston, W. Va.	1888-1907	20			83

As showing the magnitude of the commerce borne by West Virginia rivers and those that derive the greater part of their water supply from the west and northwest watersheds of the State and the enormous amount of money expended by the National Government for improving the navigation of these streams I submit the following table, taken from data furnished by the Department of Commerce and Labor:

Streams.	Miles of navigable channel.	Government has spent for improvements since 1790.	Tonnage in 1906.
Monongahela in West Virginia [a]	33	$6,794,827.40	11,447,444
Ohio in West Virginia [a]	285	24,485,261.26	13,163,656
Kanawha	90	4,730,108.02	1,613,889
Little Kanawha	120	488,844.38	106,510
Guyandotte	50	22,500.00	
Big Sandy, partly in Kentucky	170½	1,445,425.32	148,623
New River		112,000.00	
Gauley		15,000.00	
Elk		35,000.00	
Total	748½		26,480,122

[a] Whole length.

The tonnage borne by the rivers named, viz, 26,480,122 tons, constitutes one-fifth of the whole river commerce of the United States.

For the purpose of showing the commercial value of the rainfall utilized in various ways and the large percentage that is absolutely wasted or lost, I call attention to the following statistics from the report of the Inland Waterways Commission of the National Conservation Congress, gathered under the direction of Hon. THEODORE E. BURTON, chairman of the Inland Waterways Commission:

The sole source of our fresh water is rainfall (including snow). From this source our running, standing, and ground waters are derived. The habitability of the country depends on these waters. The quantity of rainfall, including the rainfall on water areas, is 215,000,000,000,000 cubic feet. Of the total rainfall, over half is evaporated; about a third flows into the sea; the remaining sixth is either consumed or absorbed.

WHAT WE USE AND WASTE.

Of the 70,000,000,000,000 cubic feet annually flowing into the sea, less than 1 per cent is restrained and utilized for municipal and community supply and related purposes; less than 2 per cent (or some 10 per cent of that in the arid and semiarid regions) is used for irrigation; perhaps 5 per cent is currently used for navigation; and less than 5 per cent is utilized for power. It is estimated that 85 per cent to 95 per cent of the volume is wasted in freshets or destructive floods.

There are in mainland United States 282 streams, navigated for an aggregate of 26,115 miles, and as much more navigable by improvement; there are also 45 canals, with a mileage of 2,189.05, besides numerous abandoned canals. On lake and sound routes there is large traffic, but the navigation of rivers and canals is too small for definite record. The cost of water carriage averaging about one-fourth that of rail carriage, and our railway freightage during 1906 reaching 217,000,000,000 ton-miles at an average rate of 0.77 cent, the shipping of one-fifth of our freight by water would have saved over $250,000,000 to our producers and consumers.

The theoretical power of the streams is over 230,000,000 horsepower; the amount now in use is 5,250,000 horsepower. The amount available at a cost comparable with that of steam installation is estimated at 37,000,000 horsepower, and the amount available at reasonable cost at 75,000,000 to 150,000,000 horsepower. The 37,000,000 horsepower exceeds our entire mechanical power now in use, and would operate every mill, drive every spindle, propel every train and boat, and light every city, town, and village in the country.

The direct yearly damage by floods since 1900 has increased steadily from $45,000,000 to $238,000,000; the indirect loss through depreciation of property is probably greater; while the largest loss is that arising in the impediment of navigation and terminal transfers.

The freshets are attended by destructive soil erosion. The soil matter annually carried into lower rivers and harbors or into the sea reaches 783,000,000 tons. Its removal seriously reduces the productivity of upland farms and increases channel cutting and bar building in the rivers. It is estimated that soil erosion reduces farm production 10 per cent to 20 per cent, and that the annual loss to the farms alone is $500,000,000, and that large losses follow the pollution of the waters and the diminution of navigability in the streams.

Through imperfect control of the running waters lowlands are temporarily or permanently flooded. It is estimated that there are in mainland United States 75,000,000 to 80,000,000 acres of overflow and swamp lands requiring drainage; that by systematic operations these can be drained at moderate expense; and that they would then be worth two or three times the present value and cost of drainage, and would furnish homes for 10,000,000 people.

WHAT WE NEED TO DO.

In considering the uses and benefits to be derived from the 215,000,000,000,000 cubic feet of water annually received, the paramount use should be that of water supply; next should follow navigation in humid regions and irrigation in arid regions. The development of power on the navigable and source streams should be kept subordinate to the primary and secondary uses of the waters; though other things being equal, the development of power should be encouraged, not only to reduce the drain on other resources, but because properly designed reservoirs and power plants retard the run-off and so aid in the control of the streams for navigation and other uses.

The broad plan already framed by statesmen and experts and approved by the Executive should be enacted into law. It provides for a system of waterway improvement extending to all of the uses of the waters and benefits to be derived from their control, including the clarification of the water and the abatement of floods for the benefit of navigation, the extension of irrigation, the development and application of power, the prevention of soil wash, the purification of streams for water supply, and the drainage and utilization of the waters from swamp and overflow lands.

It has been roughly estimated that the inland waterways of the country could be improved in ten years at a cost of $50,000,000 annually in such manner as to promote interstate commerce and at the same time greatly reduce the waste and extend the use of the waters. If done at the cost of the people, the burden would be $0.62½ per capita per year, or $6.25 in all.

It is roughly estimated that the direct benefits would comprise an annual saving in transportation of $250,000,000; an annual saving in flood damage of $150,000,000; an average annual saving in forest fires of at least $25,000,000; an annual benefit through cheapened power of fully $75,000,000; and an annual saving in soil erosion (or corresponding benefit through increased farm production) of $500,000,000—a total of $1,000,000,000, or $12.50 per capita annually; i. e., twenty times the cost. In addition, large benefits would result from extended irrigation, from the drainage and settlement of swamp and overflow lands, and from purified and cheapened water supply, with consequent diminution of disease and saving of human life.

A conference of the governors of the several States and Territories was called by President Roosevelt to meet at the White House, May 13, 14, and 15, 1908, to consider our natural resources and how best to conserve them. At the request of the President, each governor brought with him three citizens from his State or Territory to act as assistants or advisors. The members of the Cabinet, justices of the Supreme Court, Members of both Houses of Congress, representatives of great transportation and other business interests were also present and participated in the deliberations and discussions. After full consideration, this body of able and representative men unanimously adopted certain declarations, among which were the following:

We urge the continuation and extension of forest policies adapted to secure the husbanding and renewal of our diminishing timber supply, the prevention of soil erosion, the protection of headwaters, and the maintenance of the purity and navigability of our streams. We recognize that the private ownership of forest lands entails responsibilities in the interests of all the people, and we favor the enactment of laws looking to the protection and replacement of privately owned forests.

We recognize in our waters a most valuable asset of the people of the United States, and we recommend the enactment of laws looking to the conservation of water resources for irrigation, water supply, power, and navigation, to the end that navigable and source streams may be brought under complete control and fully utilized for every purpose. We especially urge on the Federal Congress the immediate adoption of a wise, active, and thorough waterway policy, providing for the prompt improvement of our streams and the conservation of their watersheds required for the uses of commerce and the protection of the interests of our people.

The provisions of the bill under consideration are as follows:

A bill (H. R. 26923) to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers.

That the consent of the Congress of the United States is hereby given to each of the several States of the Union to enter into any agreement or compact, not in conflict with any law of the United States, with any other State or States, for the purpose of conserving the forests and the water supply of the States entering into such agreement or compact.

SEC. 2. That the sum of $100,000 is hereby appropriated and made available until expended, out of any moneys in the National Treasury not otherwise appropriated, to enable the Secretary of Agriculture to cooperate with any State or group of States, when requested to do so, in the protection from fire of the forested watersheds of navigable streams, and the Secretary of Agriculture is hereby authorized, and on such conditions as he deems wise, to stipulate and agree with any State or group of States to cooperate in the organization and maintenance of a system of fire protection on any private or state forest lands within such State or States and situated upon the watershed of a navigable river: *Provided*, That no such stipulation or agreement shall be made with any State which has not provided by law for a system of forest-fire protection: *Provided further*, That in no case shall the amount expended in any State exceed in any fiscal year the amount appropriated by that State for the same purpose during the same fiscal year.

SEC. 3. That the Secretary of Agriculture, for the further protection of the watersheds of said navigable streams, may, in his discretion, and he is hereby authorized, on such conditions as he deems wise, to stipulate and agree to administer and protect for a definite term of years

any private forest lands situated upon any such watershed whereon lands may be permanently reserved, held, and administered as national forest lands; but such stipulation or agreement shall provide that the owner of such private lands shall cut and remove the timber thereon only under such rules and regulations, to be expressed in the stipulation or agreement, as will provide for the protection of the forest in the aid of navigation: *Provided*, That in no case shall the United States be liable for any damage resulting from fire or any other cause.

SEC. 4. That from the receipts accruing from the sale or disposal of any products or the use of lands or resources from public lands, now or hereafter to be set aside as national forests, that have been or may hereafter be turned into the Treasury of the United States and which are not otherwise appropriated, there is hereby appropriated for the fiscal year ending June 30, 1909, the sum of $1,000,000, and for each fiscal year thereafter a sum not to exceed $2,000,000, for use in the examination, survey, and acquirement of lands located on the headwaters of navigable streams or those which are being or which may be developed for navigable purposes: *Provided*, That the provisions of this section shall expire by limitation on the 30th day of June, 1919.

SEC. 5. That a commission, to be known as the National Forest Reservation Commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, and one Member of the Senate, to be selected by the President of the Senate, and one Member of the House of Representatives, to be selected by the Speaker, is hereby created and authorized to consider and pass upon such lands as may be recommended for purchase as provided in section 6 of this act, and to fix the price or prices at which such lands may be purchased, and no purchases shall be made of any lands until such lands have been duly approved for purchase by said commission: *Provided*, That the members of the commission herein created shall serve as such only during their incumbency in their respective official positions; and any vacancy on the commission shall be filled in the manner as the original appointment.

SEC. 6. That the commission hereby appointed shall, through its president, annually report to Congress, not later than the first Monday in December, the operations and expenditures of the commission, in detail, during the preceding fiscal year.

SEC. 7. That the Secretary of Agriculture is hereby authorized and directed to examine, locate, and recommend for purchase such lands as in his judgment may be necessary to the regulation of the flow of navigable streams, and to report to the National Forest Reservation Commission the results of such examinations: *Provided*, That before any lands are purchased by the National Forest Reservation Commission said lands shall be examined by the Geological Survey and a report made to the Secretary of Agriculture, showing that the control of such lands will promote or protect the navigation of streams on whose watersheds they lie.

SEC. 8. That the Secretary of Agriculture is hereby authorized to purchase, in the name of the United States, such lands as have been approved for purchase by the National Forest Reservation Commission at the price or prices fixed by said commission: *Provided*, That no deed or other instrument of conveyance shall be accepted or approved by the Secretary of Agriculture under this act until the legislature of the State in which the land lies shall have consented to the acquisition of such land by the United States for the purpose of preserving the navigability of navigable streams.

SEC. 9. That the Secretary of Agriculture may do all things necessary to secure the safe title in the United States to the lands to be acquired under this act; but no payment shall be made for any such lands until the title shall be satisfactory to the Attorney-General and shall be vested in the United States.

SEC. 10. That such acquisition may in any case be conditioned upon the exception and reservation to the owner, from whom title passes to the United States, of the minerals and of the merchantable timber, or either or any part of them, within or upon such lands at the date of the conveyance; but in every case such exception and reservation, and the time within which such timber shall be removed, and the rules and regulations under which the cutting and removal of such timber and the mining and removal of such minerals shall be done shall be expressed in the written instrument of conveyance, and thereafter the mining, cutting, and removal of the minerals and timber so excepted and reserved shall be done only under and in obedience to the rules and regulations so expressed.

SEC. 11. That whereas small areas of land chiefly valuable for agriculture may of necessity or by inadvertence be included in tracts acquired under this act, the Secretary of Agriculture may, in his discretion, and he is hereby authorized, upon application or otherwise, to examine and ascertain the location and extent of such areas as in his opinion may be occupied for agricultural purposes without injury to the forests or to stream flow and which are not needed for public purposes, and may list and describe the same by metes and bounds, or otherwise, and offer them for sale as homesteads at their true value, to be fixed by him, to actual settlers, in tracts not exceeding 80 acres in area, under such joint rules and regulations as the Secretary of Agriculture and the Secretary of the Interior may prescribe; and in case of such sale the jurisdiction over the lands sold shall, ipso facto, revert to the State in which the lands sold lie. And no right, title, interest, or claim in or to any lands acquired under this act, or the waters thereon, or the products, resources, or use thereof after such lands shall have been so acquired, shall be initiated or perfected, except as in this section provided.

SEC. 12. That, subject to the provisions of the last preceding section, the lands acquired under this act shall be permanently reserved, held, and administered as national forest lands under the provisions of section 24 of the act approved March 3, 1891 (26 Stats. L., 1103), and acts supplemental to and amendatory thereof. And the Secretary of Agriculture may from time to time divide the lands acquired under this act into such specific national forests and so designate the same as he may deem best for administrative purposes.

SEC. 13. That the jurisdiction, both civil and criminal, over persons upon the lands acquired under this act shall not be affected or changed by their permanent reservation and administration as national forest lands, except so far as the punishment of offenses against the United States is concerned, the intent and meaning of this section being that the State wherein such land is situated shall not, by reason of such reservation and administration, lose its jurisdiction nor the inhabitants thereof their rights and privileges as citizens or be absolved from their duties as citizens of the State.

SEC. 14. That 25 per cent of all moneys received during any fiscal year from each national forest into which the lands acquired under this act may from time to time be divided shall be paid, at the end of such year, by the Secretary of the Treasury to the State in which such national forest is situated, to be expended as the state legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which such national forest is situated: *Provided*, That when any national forest is in more than one State or county the distributive share to each from the proceeds of such forest shall be proportional to its area therein: *Provided further*, That there shall not be paid to any State for any county an amount equal to more than 40 per cent of the total income of such county from all other sources.

SEC. 15. That a sum sufficient to pay the necessary expenses of the commission and its members, not to exceed an annual expenditure of $25,000, is hereby appropriated, out of any money in the Treasury not otherwise appropriated. Said appropriation shall be immediately available, and shall be paid out on the audit and order of the president of the said commission, which audit and order shall be conclusive and binding upon all departments as to the correctness of the accounts of said commission.

These provisions may be briefly summarized as follows: Cooperation by the States, private owners of forest lands, and the National Government for the purpose of protecting the existing forests and to reforest suitable lands. Nothing is compulsory on the part of the States or individuals.

An appropriation of $100,000 is provided to enable the Secretary of Agriculture to cooperate with the States, when requested to do so, in the protection from fire of the forested watersheds of navigable streams, but requires as a condition precedent that before such cooperation shall be begun or entered into the State shall provide by law a system of forest-fire protection and that the State shall contribute an equal amount for the purpose of such fire protection.

The Secretary may protect and administer private forest lands in the same way upon contracts made by him with such owner.

All moneys derived from the sale or disposal of any products or the use of public lands or the resources of same are set apart as a special fund in the Treasury, to be known as "the national forest reservation fund," to be used in the examination, survey, and acquirement of lands located on the headwaters of navigable streams.

A commission is created consisting of five persons, including the Secretaries of the Interior, of War, and of Agriculture, and a Senator to be appointed by the Vice-President, and a Member of the House to be appointed by the Speaker, to be known as the "National Forest Reservation Commission," with authority to approve the purchase of such lands as may be recommended by the Secretary of Agriculture, and after an examination by the Geological Survey. The assent of the State in which such lands are situate must first be given. Titles must be approved by the Attorney-General before purchase money shall be paid over. Minerals and merchantable timber on or underneath the lands may be reserved by the owners before transferring the land. The lands acquired under the bill shall be permanently reserved, held, and administered as national-forest land under the act of March 3, 1891.

It is provided that 25 per cent of all moneys received during any fiscal year from the national forests acquired under this act shall be paid over by the Secretary of the Treasury to the State in which such forests are situate, to be expended as the legislature may prescribe, for the benefit of the public schools and the public roads of the county or counties in which such forests are situate, in proportion to the area situate in the respective counties.

It will be seen that the only objection to this bill is the fact that it is too narrow and restricted in its operation.

Neither State nor individual is required to part with his land, Each is free to accept or reject the plan proposed, but it is believed that self-interest will induce in most cases, both States and private owners, to willingly go into this limited partnership with the United States in order to secure uniformity and permanence in protecting the forests and reforesting the cut-over areas that can be profitably included in the plan provided for by the bill.

Protection and preservation of the forests, and of navigability of streams, are the primary purposes of the bill. Cooperation of the States and individuals with the National Government is the method by which they are to be accomplished.

If all this can be done, without hardship to any citizen, what endless and enormous good will flow from the doing. What loss and irreparable damage will follow if we fail!

The forest question is the greatest problem in the conservation of our natural resources. It enters more than any other element into more departments of business activities, and the practical destruction of our timber and other forest products will more quickly be felt in the increased cost of living than the destruction of any other one of our natural resources. The quantity of lumber used per capita in the United States each year is about five or six times greater than in England or Europe and is about three times as great as the annual growth, and with the accelerated cutting as population increases the forests will be exhausted in thirty-five to forty years. The bank depositor who checks out three times as much money as he deposits will soon come to the end of his credit and to bankruptcy, no matter how large may have been his original deposit.

Mr. Pinchot draws this graphic picture of the resulting injury and loss in every branch of industry and increased cost of living:

What will happen when the forests fail? In the first place, the business of lumbering will disappear. It is now the fourth greatest industry in the United States. All forms of building industries will suffer with it, and the occupants of houses, offices, and stores must pay the added cost. Mining will become vastly more expensive; and with the rise in the cost of mining there must follow a corresponding rise in the price of coal, iron, and other minerals. The railways, which have as yet failed entirely to develop a satisfactory substitute for the wooden tie (and must, in the opinion of their best engineers, continue to fail), will be profoundly affected, and the cost of transportation will suffer a corresponding increase. Water power for lighting, manufacturing, and transportation, and the movement of freight and passengers by inland waterways, will be affected still more directly than the steam railways. The cultivation of the soil, with or without irrigation, will be hampered by the increased cost of agricultural tools, fencing, and the wood needed for other purposes about a farm. Irrigated agriculture will suffer most of all, for the destruction of the forests means the loss of the waters as surely as night follows day. With the rise in the cost of producing food, the cost of food itself will rise. Commerce in general will necessarily be affected by the difficulties of the primary industries upon which it depends. In a word, when the forests fail, the daily life of the average citizen will inevitably feel the pinch on every side. And the forests have already begun to fail, as the direct result of the suicidal policy of forest destruction which the people of the United States have allowed themselves to pursue.

It is admitted this bill, if enacted, will yield the greatest benefits to the White Mountain and Appalachian regions and those States traversed by the rivers that have their sources in the elevated valleys, plateaus, and mountains of those regions, and which carry the commerce of many States upon their broad bosoms.

Great schemes of forest reserves have been created west of the Mississippi River by withdrawing the public lands from private entry. The great West has been highly benefited by appropriations of millions of dollars for irrigation and reclamation of the arid lands of that region. For all those improvements the East has cheerfully voted millions of money in the interest of our common country. We now ask reciprocity of aid in support of the bill under consideration, because of the community of interest which the Middle West and West have in the general welfare of the whole country, though the chief beneficiaries will be the New England States, New York and Pennsylvania, West Virginia and Virginia, the South Atlantic and Gulf States, Kentucky and Tennessee, and all the States bordering on the Ohio and the Mississippi rivers and their navigable tributaries.

Water power vaster in the aggregate than all the steam machinery within these States will be preserved; direct losses by floods, annually amounting to over $150,000,000, will be prevented; diseases and deaths by impure water will be greatly reduced; the cream of the soil now washed away, estimated at a billion tons a year, will be preserved to agriculture, adding millions of dollars to the value of the crops of the farmer and saving many other millions of the cost of maintaining channels, locks, dams, and harbors clear from the earth, sand, and débris brought down by the constantly increasing floods induced by deforesting these slopes, hills, and mountains. True economy requires liberal appropriations for the purposes of this bill, by reason of the savings just enumerated. How long will the Congress perpetuate the shortsighted, penny-wise and pound-foolish policy that has characterized its treatment of our forests in the past?

Mr. WEEKS. I yield to the gentleman from North Carolina [Mr. SMALL].

[Mr. SMALL addressed the House. See Appendix.]

Mr. WEEKS. I yield four minutes to the gentleman from Virginia [Mr. LAMB].

Mr. LAMB. Mr. Speaker, this bill is born of patient and well-directed effort. There is no politics in it. Members of the minority and members of the majority of the Committee on Agriculture equally oppose and advocate this measure. I deny that there is any partisanship or politics in this bill whatever; and I challenge the statement of my friend from Illinois, who undertook, whiteheaded as he is [laughter], to lecture young men like myself this morning because we advocate its passage. Is it "vicious" because it has a majority of the intelligent youthful men on the Committee on Agriculture bringing it out? [Laughter.] Is this bill vicious, my colleagues, because the patriotic citizenship of 27 States of this mighty Union ask for its passage? Is this bill vicious because in order to carry it out three Cabinet members are chosen on that commission and one Member of the House and one of the Senate? I should be willing to change the latter to two of each party, so as to preserve the balance of power, and I think this will be done. It has been charged that enthusiasts are advocating this measure. Then it is the most intelligent, patriotic association of 27 States and the best men and women in those States who are enthusiasts. Let me remind you that no good cause has ever been carried to a successful conclusion, no battles won, no victors crowned, no reform wrung from deep-rooted prejudice and unyielding conservatism, save at the hands of well-directed and earnest enthusiasts.

South Carolina and Massachusetts join hands, it has been said to-day. I want to say that Virginia and Massachusetts join hands and lock shields now as they did on the plains of Yorktown, and to which army Massachusetts and Virginia, each one, furnished about the same number of soldiers, and but for Massachusetts and Virginia in that war we would have no United States to-day. The Virginia spirit to-day is the spirit of Yorktown; and while she is not deeply interested in this matter, yet for the benefit of her sister States in this great Union she is as enthusiastic as any of those who will be the beneficiaries of this scheme. [Loud applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. LAMB. In order that the citizens of my State, and particularly of my district, may have the information so easily obtained by those of us who have served on the Agricultural Committee and listened to the hearings before that committee, I avail myself of the permission to print and submit some facts and statistics, gathered from time to time, that I trust will be interesting to those whom I have the honor to represent in Congress.

The importance of the conservation of our forests, prevention of erosion of our lands, of the filling of our navigable streams, and a constant and steady flow of our rivers for power plants, commerce, and factories can not be overestimated.

To-day 3 feet of lumber is being cut for 1 foot grown. One and one-half times as much is being exported as imported. Forest fires, waste, neglect, and destruction are rapidly producing an alarming condition in our lumber business. Evidence and object lessons both in America and Europe are not wanting to impress this fact upon us. There is no Representative here from any State who does not know that the methods of individual and corporate owners have been extravagant and destructive, and to-day each one of us must admit that in his section coming generations have been robbed and despoiled of the timber that should have been their inheritance had proper methods and economical use of the bountiful supply with which this country was blessed been used. No man can compute what waste, neglect, and indifference has cost the present generation or the loss and injury it must entail upon the coming generations.

Must wisdom be bought by us at the price paid by France, when, by the stripping of her forests from her hills and mountains prior to 1860, 800,000 acres of farm lands had been ruined or seriously damaged, and the waterways practically destroyed; the population of 18 departments reduced to poverty and forced to emigrate? Can nothing be learned from the floods and water famines of China caused by the almost total destruction of her forests? Shall coming generations in our country pay such a fearful price when these and other object lessons confront us, and wisdom and patriotism are presumed to be our guides?

Rather should we follow the example of Germany, foremost in inland-waterway development and forest conservation. She has all of her mountains protected by forests and has managed them for a hundred years, and these forests yield her a net revenue of $2.40 per acre per annum.

No country of Europe but has learned from flood and water famine and diminished navigation of her rivers that to strip the hills and mountains of their trees is to destroy their country. France, Spain, Germany, Switzerland, Austria-Hungary, Norway, Sweden, Denmark, Russia, and Roumania all have already recognized the necessity of this conservation work and are working out comprehensive laws preserving their forests at the headwaters of their streams, guarding against forest fires and overcutting. England is doing the same for India, and Japan is well advanced in the work.

But to guard the country and the coming generations against irreparable damage may not be enough to goad some of us into more wise and liberal action in this important matter. It may be well to show what we have done, and what benefits have already come to us. Our national forest reserves contain over 400,000,000,000 feet of timber. There is being sold and cut therefrom about 500,000,000 feet per year. At this rate it would take eight hundred years to exhaust the timber now standing. On private forest lands, containing four-fifths of our standing timber, the rate of cutting will exhaust them in thirty-five years. Our Forestry Service is preserving and our individual owners destroying. Should not adequate legislation and means be afforded to encourage the one and check the other?

The fire damages in 1902 to our national forests averaged 5 acres burned to each 1,000. In 1907 the average was less than 1 acre to the 1,000. Had fire damage last year in national forests been in proportion to such damage on private forests, it would have aggregated over $5,000,000, and yet the cost of

the fire patrol of the national forest is estimated at one-third of a cent per acre. The average salary of the forest ranger is $1,200, and he must provide his own horses and protect an average of 125,000 acres of rough mountain country from fire, handle timber sales, see to grazing permits, and perform many other duties. The work is too important and the objects too pressingly necessary for Congress to be otherwise than liberal in indorsement and appropriation.

Much may be said on the matter of erosion; the filling of our navigable streams with silt and soil by sudden floods, necessitating constant dredging and river improvement; of water famines affecting navigation and factories, aggravated and intensified by stripping the headwaters of our streams of their forests; but these are familiar facts to us all. Common sense, practical experience, and reason convince us that water runs faster and carries with it more dirt on a bare hillside than on a wooded one; that it makes a bigger and quicker flood, and leaves more gullies and barren washed land in its wake.

Experts are known to differ. The Chittenden theory that cleared mountains and hills are better for flood protection and less menacing to navigation than if forest covered is at direct variance with the accepted theories of the majority of engineers of this and foreign countries.

Prof. G. F. Swain, of Massachusetts Institute of Technology, in his statement before the Committee on Agriculture, among other things said:

The forest bed or floor absorbs the water as it comes down and gives it out gradually. * * *

Where the ground is steep there the action of the forest is most important, and there its action is twofold. As I said, it retards the delivery into the stream of the water which ultimately reaches those streams; it holds the water and delivers it gradually to the ground beneath. It is also a great factor during the winter and spring in retarding snow. The snow which falls in the forests stays there much longer than the snow which falls in the open, and it is melted gradually and therefore is delivered gradually to the streams and fills them up more gradually than if it went off all at once. * * * The flow from the forest then is delivered gradually to the streams. It feeds the springs, keeps up the slow-water flow, prevents the water from going off suddenly into the streams, and furthermore prevents the erosion, because the soil is not carried away by the flowing water. Therefore the relation between the forests and the floods is a perfect and necessary one, and the opinions of engineers, scientists, and geologists all over the world are overwhelmingly in favor of that influence. * * *

I think the birthplace of the floods is in the high mountain slopes, and the control there will have a great deal more efficacy than the control anywhere else.

Fifty years ago a French engineer published a work in which he attempted to show that cutting down the forests diminished the floods. That had no effect on the French Government, and evidently was not shared by the government engineers, because the French Government immediately began thereafter to adopt a forest policy and expend large sums in reforestation of the mountains. Recently, within a few months, an American engineer, a member of the Corps of Engineers of the Army, has published a paper, which the chairman has referred to, in which he almost gives the identical arguments which were given fifty years ago by the French engineer. I hope they will be followed by the same action which was followed in France. * * * When asked if he knew of any engineer of good standing who agrees with Colonel Chittenden in his conclusions, he replied:

"I have not met with any, sir; and I hope that the chairman of the committee will read the discussion on Colonel Chittenden's paper, which will appear in the proceedings of the American Society in connection with the paper itself."

I append a statement showing what other nations have done for forest conservation and renovation:

Country.	Ownership of forests.												Cost and product.			Regulation of private forests.

FLOODS.

Our navigable rivers and our harbors are among our richest assets. Since 1802 the duty of the National Government to develop and improve them has been fully recognized. Each year has witnessed an increased appropriation for these purposes. From $30,000 for Delaware River in 1802 the appropriation has grown until the last river and harbor bill carried the sum of $80,000,000. Within the year strong demand has been made that $500,000,000 be spent in development and improvement of our inland waterways in installments of $50,000,000 per year.

Upon no question confronting Congress to-day does public sentiment appear to be so unanimous nor demanded by a greater number of States. Conservation of forests, development of waterways, appeals to all States, all sections, and all industries. History warns us against neglect or delay. The living are urging us to action, and posterity appeals to us. Knowledge is before you, warning has been served upon you, and failure to apply your knowledge will surely entail untold loss and disaster in the future.

By the stripping of forests since 1900 flood damage has increased from $45,000,000 to $238,000,000. Soil carried into our two hundred and eighty-odd rivers and into our harbors is estimated at 800,000,000 tons. Who can estimate this damage to our farm lands, to our commerce, to our factories and our waterpowers?

Protection of forests and its connection with river flow has been so clearly and so often shown that we need not longer dwell upon it. It has been urged by so many individuals, institutions, bodies, and interests that only a partial list could be given. Before the Agricultural Committee of the House in 1908 appeared representatives of the National Board of Trade, of the Massachusetts Institute of Technology, of the National Association of Cotton Manufacturers, of the American Institute of Electrical Engineers, numerous power-development companies, of the American Society of Electrical Engineers, the governors of Georgia and of New Hampshire, representatives of many business associations, and representatives of 20 States. The list of resolutions filed is enormous. The President, Secretary of Agriculture, and forestry officials have urged and recommended it. Mr. Pinchot has forcibly presented it to the committee, and his statement shows what a vast amount of thought, knowledge, and labor he has devoted to the subject.

As early as January 3, 1901, the Secretary of Agriculture, in a report to the President, said:

The rapid consumption of our timber supplies, the extensive destruction of our forests by fire, and the resulting increase in the irregularity of the flow of water in important streams have served to develop among

the people of this country an interest in forest problems which is one of the marked features of the close of the century. In response to this growing interest the Government has set aside in the western forest reserves an area of more than 70,000 square miles. There is not a single government forest reserve in the East.

The conference of governors of States and Territories in May, 1908, in the declaration adopted, said:

We declare our firm conviction that this conservation of our natural resources is a subject of transcendent importance, which should engage unremittingly the attention of the Nation, the States, and the people in earnest cooperation. These natural resources include the land on which we live and which yields our food; the living waters which fertilize the soil, supply power, and form great avenues of commerce; the forests which yield the materials for our homes, prevent erosion of the soil, and conserve the navigation and other uses of the streams; and the minerals which form the basis of our industrial life and supply us with heat, light, and power.

We agree that the land should be so used that erosion and soil wash shall cease; and that there should be reclamation of arid and semiarid regions by means of irrigation, and of swamp and overflowed regions by means of drainage; that the waters should be so conserved and used as to promote navigation, to enable the arid regions to be reclaimed by irrigation, and to develop power in the interests of the people; that the forests which regulate our rivers, support our industries, and promote the fertility and productiveness of the soil should be preserved and perpetuated; that the minerals found so abundantly beneath the surface should be so used as to prolong their utility; that the beauty, healthfulness, and habitability of our country should be preserved and increased; that sources of national wealth exist for the benefit of the people, and that monopoly thereof should not be tolerated.

We declare the conviction that in the use of the national resources our independent States are interdependent and bound together by ties of mutual benefits, responsibilities, and duties.

We urge the continuation and extension of forest policies adapted to secure the husbanding and renewal of our diminishing timber supply, the prevention of soil erosion, the protection of headwaters, and the maintenance of the purity and navigability of our streams. We recognize that the private ownership of forest lands entails responsibilities in the interests of all the people, and we favor the enactment of laws looking to the protection and replacement of privately owned forests.

We recognize in our waters a most valuable asset of the people of the United States, and we recommend the enactment of laws looking to the conservation of water resources for irrigation, water supply, power, and navigation, to the end that navigable and source streams may be brought under complete control and fully utilized for every purpose. We especially urge on the Federal Congress the immediate adoption of a wise, active, and thorough waterway policy, providing for the prompt improvement of our streams and the conservation of their watersheds required for the uses of commerce and the protection of the interests of our people.

From the report of the National Conservation Commission itself, the following references to waters and forests are found:

"The first requisite for waterway improvement is the control of the waters in such manner as to reduce floods and regulate the regimen of the navigable rivers. The second requisite is development of terminals and connections in such manner as to regulate commerce.

"Forests in private ownership can not be conserved unless they are protected from fire. We need good fire laws, well enforced. Fire control is impossible without an adequate force of men whose sole duty is fire patrol during the dangerous season.

"The conservation of our mountain forests, as in the Appalachian system, is a national necessity. These forests are required to aid in the regulation of streams used for navigation and other purposes. The conservation of these forests is impracticable through private enterprise alone, by any State alone, or by the Federal Government alone. Effective and immediate cooperation between these three agencies is essential. Federal ownership of limited protective areas upon important watersheds, effective state fire patrol, and the cooperation of private forest owners are all required.

"There are in continental United States 282 streams navigable for an aggregate of 26,115 miles, and as much more navigable if improved. There are also 45 canals, aggregating 2,189 miles, besides numerous abandoned canals. Except through forestry in recent years, together with a few reservoirs and canal locks and movable dams, there has been little effort to control headwaters or catchment areas in the interests of navigation, and none of our rivers are navigated to more than a small fraction even of their effective low-water capacity.

"The practical utility of streams for both navigation and power is measured by the effective low-water stage. The volume carried when the streams rise above this stage is largely wasted and often does serious damage. The direct yearly damage by floods since 1900 has increased steadily from $45,000,000 to over $238,000,000.

"The freshets are attended by destructive soil erosion. The soil matter annually carried into lower rivers and harbors or into the sea is computed at 780,000,000 tons. Soil wash reduces by 10 or 20 per cent the productivity of upland farms and increases channel cutting and bar building in the rivers. The annual loss to the farms alone is fully $500,000,000, and large losses follow the fouling of the waters and the diminished navigability of the streams.

"It is now recognized by statesmen and experts that navigation is interdependent with other uses of the streams; that each stream is essentially a unit from its source to the sea; and that the benefits of a comprehensive system of waterway improvement will extend to all the people in the several sections and States of the country.

"The first requisite for waterway improvement is the control of the waters in such manner as to reduce floods and regulate the regimen of the navigable rivers. The second requisite is development of terminals and connections in such manner as to regulate commerce."

This is not an ideal bill from the view point of the original advocates of the measure. It is, in fact, a compromise bill and made to conform to the views of the Judiciary Committee of the House, which was instructed to inquire into the constitutional authority for any such act, and made its report to the last session of Congress.

If the administration of this important and far-reaching measure by the commission appointed proves unsatisfactory, future Congresses can correct the mistake and enact proper legislation.

No more important matter has come before this Congress. It affects the welfare of coming generations. The Members of this House who have for years, in season and out of season, voted for this legislation look forward with hope and pleasure to the time when their labors shall be rewarded, and they shall receive from their country and their constituents the plaudit of "Well done, good and faithful servants."

Mr. WEEKS. Mr. Speaker, I now yield ten minutes to the gentleman from New York [Mr. SULZER].

The SPEAKER. The gentleman from New York is recognized for ten minutes.

Mr. SULZER. Mr. Speaker, this is a most important bill. There are some features in it, however, I do not like, but under the rule I can not move an amendment, and must vote for or against the bill just as it is presented. Its general purpose is designed to permit the Federal Government to acquire lands in any part of the country in order to protect the great watersheds and promote the navigability of our large streams. Every safeguard to insure economy of administration has been invoked and, in my opinion, every constitutional objection has been carefully eliminated. Take it all in all, I believe it to be a good bill, in the interest of all the people, and I shall cast my vote for it, believing in the end it will accomplish much good and result in lasting benefits to the country.

The chief purpose of the bill, it appears to me, is to protect our navigable streams. Incidentally, of course, there will be great benefits to the whole country in other directions. Water power, like navigation, depends on the regular flow of the streams. The amount of water power capable of development in the United States is sufficient to operate every mill, drive every spindle, propel every train and boat, and light every city, town, and village in the country. The continued successful development of many of our industries in the future depends in large part upon the present protection of our inland waterways. We are using three times more timber every year than the forests produce, not that we have an insufficient area of forest land, but because our forests are not protected from fire nor properly safeguarded and economically utilized.

The damage caused annually by the decimation of our forests is beyond calculation. The figures are appalling. According to the most accurate tables at present obtainable flood damage alone in the United States amounts to over $200,000,000 a year, and increasing more and more as the axman's blows resound and the seasons come and go.

It can be said without fear of successful contradiction that all rivers whose watersheds have been denuded show flood increases. They are the greatest in such streams as the Ohio, Cumberland, and Santee, where the greatest quantity of timber has been removed, and least in those streams on whose watersheds forest conditions have been least disturbed. Except in the change thus unfortunately wrought by man there have been no factors that could have intensified flood conditions. In the Ohio River in seventy years the number of floods at Wheeling has increased 62 per cent and their aggregate duration 116 per cent.

Then, again, it is estimated that the annual soil wash in the United States is about 1,000,000,000 tons, of which the greater part is the most valuable portions of the land. It is carried into the rivers, where it pollutes the waters, necessitates frequent and costly dredging, and reduces the efficiency of work designed to facilitate navigation and prevent floods. Soil when once lost is replaced with great difficulty. Consequently the protection of the forests on the slopes which are too steep otherwise to be utilized means actually immense gain in soil conservation.

If we want to preserve our soil and promote our navigable streams, we must protect our watersheds and prevent the further decimation of our forests. To those who have intelligently studied this subject these propositions are elemental. The relation of the mountain forests to the navigability of inland water is the same the world over. Every country that has maintained an even and sufficient flow of streams for the purposes of commerce has had to maintain, and in some cases establish, upon the headwaters of the streams forests to hold the soil in place and prevent overwhelming floods. Germany stands in the forefront of nations in inland-waterway development, and she has all of her high mountains protected by forests. These forests have been under government management for a hundred years, and they are the most productive and profitable in the world, yielding an average net return of $2.40 per acre. The stripping of the forests from the mountains of France was unchecked until 1860, by which time 800,000 acres of farm land had been ruined or seriously damaged and the waterways practically destroyed. The population of 18 departments had been reduced to poverty and forced to emigrate. A futile attempt was then made to check the torrents by sodding. It was only by the acquisition of the bare lands, the building of stone walls for the gathering of silt, and the planting of trees

on the soil held in check by those walls that the French Government was able finally to accomplish satisfactory results.

The Chinese Empire presents in the most forcible way the calamitous results of deforestation. China is the only great country which has persistently destroyed her forests. What has been done in other countries stands out in bold relief against the background of China, whose mountains and hills have been nearly denuded of trees and whose soil in many districts is completely at the mercy of torrential floods. Trees have been left only where they could not be reached. Streams which formerly were narrow and deep, with an even flow of water throughout the year, are now broad, shallow beds choked with gravel, sand, and rocks from the mountains. During most of the year many of them are entirely dry, but when it rains the muddy torrents come pouring down, bringing destruction to life and all forms of property. In a word, the Chinese, by forest waste, have brought upon themselves two costly calamities—floods and deserts.

The great increase of floods in our rivers, with the resultant damage to property and annual loss of soils, shows that in some sections of the country we are rapidly approaching the situation in China. We must act promptly in this matter. It is yet time for nature to restore the forests on our mountains, but the day is rapidly coming when it will be too late.

The question of protecting the forests at the headwaters of the streams is a national as well as a state problem. It is not right to expect the State to deal entirely with areas requiring protection when those areas affect chiefly other States. It is impossible for States which suffer from conditions outside of their own territory to remedy them by their own action. The mountains of the West are already largely under Government protection. So far as they are not protected this bill is applicable to them. It is applicable to all other sections of the United States in which the source streams of the navigable rivers lie in nonagricultural, mountainous regions, and it is believed that this bill will go far to accomplish the necessary protection to the Southern Appalachians and White Mountains. For these reasons I shall vote for this legislation, indulging the hope that any defects in this measure can be speedily remedied by future enactments.

The conservation of our natural resources is a great economical question. It is of momentous importance to all the people; and I want to say that I am now, and always have been, in favor of preserving our forests by intelligent forestry legislation. I am in favor of protecting our watersheds, and utilizing to the utmost our numerous rivers as they flow from the mountains to the seas; and I believe that now is as good a time to begin as some time in the future. We must preserve our forests; we must protect our watersheds; we must promote the utilities of our rivers. This is the plain duty of the hour, and if we fail to do it, we invite the deluge and create the desert. Hence I am for any plan along constitutional lines that means an intelligent beginning.

The systematic protection of our wonderful natural resources means much to our glorious country now and much more in lasting benefits to future generations. The willful waste of these natural resources—the devastation of our forests, the destruction of our watersheds, the elimination of our rivers—means decay and death and desert wastes, means in the centuries yet to come the conditions we now witness in northern Africa, in western Asia, in Italy, and in Spain. The world is learning by experience. We must learn in the same school. We can not violate natural laws with impunity; we can not neglect fundamental principles and escape the consequences; we can not decimate our forests and have our rivers, too, and without them our fertile fields will ere long be barren wastes. Shall the sad story of the ancients be repeated in America? Shall we never take heed? In the history of the past let us realize the duty of the present, and by intelligently responding to the essential demands of the hour we will be true to our trust, and future generations appreciating our work will rise up and call us blessed. [Applause.]

The SPEAKER. The time of the gentleman from New York has expired.

Mr. SCOTT. I yield five minutes to the gentleman from North Carolina [Mr. HACKETT].

[Mr. HACKETT addressed the House. See Appendix.]

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments joint resolution of the following title, in which the concurrence of the House of Representatives was requested:

H. J. Res. 265. Joint resolution to rearrange and reconstruct the Hall of the House of Representatives, and for other purposes.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, had still further insisted upon its amendments disagreed to by the House of Representatives, had asked a still further conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. WARREN, Mr. HEMENWAY, and Mr. TELLER as the conferees on the part of the Senate.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 8200. An act for the relief of C. M. Cox; and

S. 9405. An act to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River in the State of Indiana.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 28046. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 5728. An act for the relief of James H. De Coster; and

H. R. 28285. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 9242) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to the widows and dependent and helpless relatives of such soldiers and sailors.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26915) making appropriation for the support of the army for the fiscal year ending June 30, 1910.

The message also announced that the Senate had disagreed to the amendments of the House of Representatives to the bill (S. 9421) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors, had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. BURNHAM, Mr. CURTIS, and Mr. TALIAFERRO as the conferees on the part of the Senate.

The message also announced that the Senate had disagreed to the amendments of the House of Representatives to the bill (S. 9278) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors, had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. BURNHAM, Mr. CURTIS, and Mr. TALIAFERRO as the conferees on the part of the Senate.

HALL OF THE HOUSE.

Mr. McCALL. Mr. Speaker, as the Senate amendment to House joint resolution 265 is merely to correct a clerical error, I move to concur in the amendment.

Mr. UNDERWOOD. What is the purpose of this proposition?

Mr. McCALL. It is merely clerical. We referred in the House resolution to a resolution passed at the last session as No. 419. It should have been 429.

The question being taken, the Senate amendment was concurred in.

APPALACHIAN AND WHITE MOUNTAIN FOREST RESERVE.

Mr. WEEKS. I now yield to the gentleman from Tennessee [Mr. BROWNLOW].

Mr. BROWNLOW. Mr. Speaker, the tact, grit, and ambition of the American people are not the only factors which have achieved their wealth, ease, high prestige, contentment with their conditions and environments, and their great estimate of their own powers and capabilities. Generosity and elevated taste are forces as potential as these in the formation of the national character. They are a practical people, know the value of a dollar, and are always ready and willing to earn it. This high appreciation of the value and dignity of labor and the beneficent results that follow it with the precision that marks all moral certainties insures a glorious compensation for all the energies of body and mind expended to reach the highest of a free, robust, and stable Republic. This sentiment, born of enlightened aspirations for the best, noblest, and grandest in life, and imbued with the genius of courage, liberty, and adventure, has energized and vitalized this Government from its very inception.

Every true American feels it tingling in his veins and throbbing in his heart. It quickens his brain and pulse, stirs his soul with sublimest inspirations and throws the golden light of hope over all his future. It is thus he becomes a pioneer, an originator, a toiler, a projector, and a builder.

Commercialism is an intuition, and he cultivates it for all there is of help and value in it. The stirring impulse of commercialism has led him into every field of industrial enterprise. Possessing the land, it was his God-diverted mission to subdue it and utilize all its amazing capabilities for the uses of mankind.

The wilderness receded from him and fruitful gardens appeared in its place. He has made bleak and barren New England resonant with the thud of loom and the whirl of spindle, building mills and factories along the majestic Merrimac as thick as castles on the Rhine. In this region where nature is unkind in soil and climate and he had so many formidable obstacles to encounter and overcome, his commanding intelligence, skill, and energy has wrought princely fortunes and created magnificent industrial enterprises whose products have found their way into all civilized lands.

In New England a weaver manufacturing clothing for the millions. In Pennsylvania the true American is an ironmaster. He is delving into her coal and ore treasures, building mills, foundries, and workshops in the recesses of her rugged mountains and lining her magnificent streams with smoking Pittsburgs. His achievements are so great in the Keystone State that her finished products lead the iron and steel markets of the world.

The true American is a flock master and a farmer on the ocean prairies of the West, that boundless empire of exhaustless fertility of which he is the uncrowned and untitled king. His fleeces keep the American woolen mills in operation and his granaries and stock yards supply wheat, corn, beef, mutton, and pork for millions at home and abroad.

The true American is the magician of renovation. He touched the dead body of the South and it sprang to its feet with the bounding vigor and lusty life of a giant. The vine flowered on the crumbling battlements of war and the harvest grew from the hoof prints of charging cavalry. He stretched out a hand of welcome, help, and rescue to the South, a-weeping for her slain amid abject poverty and the general wreck of all her cherished idols and ideals, and turned her despair into hope and her burning tears into a fountain of glad waters. It is no longer the torn, bleeding, and wasted South, but the "Old South," if the term be more pleasing, disenthralled, and rejuvenated by new systems of industry and enterprise, liberalized by new ideas and ideals born of the genius and spirit of modern progress, and, in place of blind partisanism, a soul to appreciate and a clarified vision to see a destiny of incalculable glory and grandeur in the resistless trend of the new century.

The true American is a diplomat, controlling the parliament of the world, not by the cruel craft of greed or the enchantments of speculation, but by a quicker intelligence, a clear insight into the designs of Providence, and a wiser and nobler conception of the duties of men and nations.

The true American is a soldier and a philanthropist, fighting the world's battles, as well as his own, for human rights and liberties. He laid his puissant hand on the hoary despotism that enslaved and despoiled the fairest isles of all the oceans and it crumbled into dust, and now, still their defense, he is helping their freed peoples to solve the problem of self-government by the processes of education and the precepts of civilization and Christianity.

Along with his keen and tireless pursuit of business and wealth, his discoveries in science, and the marvelous creations of his inventive genius, which has given to the world the sewing machine, the cotton gin, harvester, telegraph, telephone, and a thousand most useful devices, along with his ever-enlarging scope of statesmanship, triumphs of diplomacy, and the constantly repeating victories of peace far greater and more beneficent than his victories in war, the true American has assiduously cultivated his æsthetic tastes.

Admiration for the beautiful and grand is with him a fond devotion. He is consecrated to art. This exalted sentiment of his character finds expression in painting, sculpture, elegant homes, triumphal arches, towering monuments, and splendid temples. There is oratory and song and stately measures in his architecture that surpass all the beautiful symmetries and imposing elegancies of the mingled Ionic, Doric, and Corinthian.

The true American, who has made this country the lady of the nations, constitutes the great mass of American citizenry. The Greeks built the Parthenon to show forth in deathless expression their love of art and beauty, and the American people consider no task nor expenditure in evincing the same glorious instinct of civilization in creations of majesty and splendor.

The primitive impulse may be a blend of Roman, Grecian, and Egyptian ideas conceived and matured in the bright eras of the history of the ancients, but if this be so, these ideas have been enlarged by the energies of a superior intelligence and aspiration and spiritualized by a deeper consecration to the divine ideals of freedom.

The American people surpass all others in tactful combination of the useful and practical with the beautiful and majestic. They gaze with awe upon Niagara, yet all the time are devising plans to harness its idle boundless power to machinery for their enjoyment, convenience, and profit. They create nothing merely to look at and admire. Its significance must be suggestive at least, as well as impressive. They revolt at the idea of mere show and decoration for their sake only, yet their æsthetic character, ever broadening and enlarging and keeping pace with the march of their industrial triumphs, is free from the debasing taint of commercial lust. Their marvelous prosperity teaches them to appreciate their opportunities and to value their natural wealth, and in their earnest and persistent pursuit of solid comfort for themselves they do not overlook the obligation to husband their God-given heritage for future generations.

They are beginning to understand why the Creator in spreading out the prairies adorned them with timber belts and in piling up the hills and mountains covered them with magnificent forests. Its forests are the chief glory and beauty of the American Continent. They are storm resisters, conservatories of health, and unfailing reservoirs of fertility.

It is a fact established by experience that forests control climatic conditions. They mollify the vigor of winter and the fervor of summer, in this way contributing to the comfort of the people. Diseases of the worst type and disastrous droughts and floods follow their destruction as surely as distressing punishment follows the violation of nature's laws. The system of natural drainage is destroyed by constant washing; the land impoverished and the low-lying places become cesspools of fetid decay, whose poisonous exhalations laden the air with deadly germs.

Hygienic principles proclaim against vandal waste of the forest, and every drought and flood is an appeal for forest preservation. Forest preservation has become a question of national interest and one of the greatest importance. It is a question on which the serpent of politics can not leave the slime of its trail. It is not only a question of æsthetics, but of health and economy as well; and the American people are demanding of Congress the protection of the virgin forest against the encroachments of that insatiate greed which would spread utter desolation where nature has stored the plant food for bountiful harvests and millions can build elegant and comfortable homes.

In response to this demand, Congress has segregated the following sections as forest reserves:

Number.	State.	Name.	Acres.
1	Wyoming	Yellowstone Park	1,239,040
2	Colorado	White River Plateau	1,198,080
3	New Mexico	Pecos River	430,880
4	Colorado	Pikes Peak	184,320
5	Oregon	Bull Run	142,080
6	Colorado	Plum Creek	179,200
7	do	South Platte	683,520
8	California	San Gabriel	555,520
9	Colorado	Battlement Mesa	856,960
10	Alaska	Afognak	403,640
11	California	Sierra	4,096,000
12	Washington	Mount Ranier	2,027,520
13	Arizona	Grand Canyon	1,851,520
14	California	San Bernardino	737,280
15	do	Trabuco	109,920
16	Oregon	Cascade Range	4,577,120
17	do	Ashland	18,560
18	California	Stanislaus	691,200
19	do	San Jacinto	737,280
20	Idaho and Montana	Bitter Root	4,147,200
21	Idaho and Washington	Priest River	640,120
22	South Dakota and Washington	Black Hills	1,211,680
23	Utah	Uintah	875,520
24	Washington	Washington	3,426,400
25	do	Olympic	1,466,880
26	Wyoming	Big Horn	1,147,840
27	do	Teton	829,440
28	Montana	Flathead	1,382,400
29	do	Lewis and Clark	2,926,080
30	California	Pine Mountain and Zaca	1,644,594
31	Arizona	Prescott Lake	423,680
32	do	San Francisco Mountains	975,360
33	do	Black	1,658,880
34	Utah	Fish Lake	67,840
35	Montana	Gallatin	40,320
36	New Mexico	Gila River	2,327,040
37	California	Lake Tahoe	136,335
38	do	Santa Inez	145,000
39	Wyoming	Crow Creek	56,320
40	Oklahoma	Wichita	57,120
41	Utah	Payson	84,400

These reserves, embracing nearly fifty millions of acres in the aggregate, are all located in the West. The object of their segregation is to preserve the timber from the devastation of the lumber vandals and to maintain reservoirs for the irrigation of arid lands and resorts for pleasure and health seekers.

The great Appalachian chain, stretching from Vermont to Georgia and embracing millions and millions of acres, has been entirely overlooked by the Government. In the eastern section it has been almost entirely denuded, to furnish lumber for the city markets, and to this fact is owing largely the large and increasing number of homes abandoned in the territory contiguous to the mountains, where the owners could not make tongue and buckle meet on account of the alternations of excessive droughts and rainfalls.

It is a physical fact, clearly demonstrated on a small scale year after year, that the destruction of the Appalachian forests would soon depopulate and utterly impoverish one-half of the American Continent, and that part of it the richest in natural wealth and which produces the most varied and useful harvests. The Appalachian Range is the nursery of the country, its training school and academic hall. It has furnished the heroes, statesmen, and educators that have subdued the savagery of the West and built the proud and prosperous Commonwealths that now adorn it. It still furnishes the capital and skill that projects and sustains its vast enterprises. It should be preserved from the all-devouring rapacity of the woodman's greed.

The area of the southern Appalachian within the Virginias, the Carolinas, Georgia, Alabama, and Tennessee which the bill under discussion proposes to convert to a national park and forest reserve is the most picturesque and romantic section in all the Southland. Its scenic grandeurs of towering altitudes, dashing waterfalls, rocky ramparts, "deep, silent recesses of everlasting shade," acclivities aflame with flowers that no botanist yet has named, and valleys soothed to the bliss of peace by minstrelsy of singing streams. That portion of this section embracing the southern part of upper east Tennessee and the northern part of western North Carolina is peculiarly rich in history and tradition; on the Tennessee side was the Watauga settlement, the germ of its statehood.

Its lofty peaks look down on lesser altitudes, and these look down upon Watauga, the river of beauty, on whose banks gathered the pioneers who, under the lead of Sevier and Shelby, armed with the primitive implements of war and the sword of Gideon and the Lord at their sides, marched through the Appalachian solitudes, threaded their tortuous defiles, scaled their rugged heights, and threw themselves, an avalanche of dismay, terror, and death, against the Hessian hosts of Ferguson and closed the gory annals of a seven years' struggle with the decisive battle of the Revolution. Were this the only reason it would be enough to preserve the chief natural glory and beauty of this particular region.

The reasons why this bill should become a law are manifold, and I shall attempt a few only:

First. It is a matter of economy.

Second. The South and East have no national park and forest reserve, whilst the North and West have many, amounting in all to 46,000,000 acres.

Third. To show that the Government has a deep concern for the welfare of the people of all sections.

Fourth. To put in glorious and everlasting expression the æsthetic taste of every intelligent and cultured American.

Fifth. That the region covered by this has the only hardwood forests remaining in the country.

Sixth. That greed with ax and saw is rapidly devastating these magnificent forests, and if unrestrained will in course of a few years make the establishment of a national forest reserve in this part of the country an impossibility.

Seventh. That the section contemplated forms the watershed for the Southeastern States, and to retain the water supply of these States it is absolutely necessary to preserve the timber of the mountains.

Eighth. The region under contemplation has railway connections with every part of the country and is within a few hours' distance of the National Capital.

Ninth. That this region has every essential in climate, scenery, and timber for a national park and forest reserve.

Tenth. That this region is most peculiarly adapted for the raising of game and fish culture.

Eleventh. That it is the paramount duty of this generation to preserve intact such a picturesque and romantic section that their posterity may see a part of the country in its primeval condition.

The builders of the Nation built wiser than they knew; they built exceedingly well. But had they been as wise a century ago as they are now they would have had a ceaseless and vigilant care for their timber wealth which, in its primeval condition, was the chief glory and grandeur of this highly favored country. Its vast forest reservations and national parks would not be located west of the hundredth meridian in the far distance toward the Pacific, where the people of the East and South can not visit them on account of the time and money required. These reservations would now be found all over the vast territory which was owned by the Government a hundred years ago. The landscape of the eastern part of the Mississippi would still retain the romance and fascination with which the Great Architect and Artist overspread them, and the forest acreage of the southern Appalachian would have been preserved against the inroads of the spoiler.

No richer legacy could have been bequeathed to the present and future generations, and these reservations would be justly esteemed as being no inconsiderable part of our national treasures and blessings. If the principle of reservation, now definitely adopted in the West, is not now applied to the southern Appalachians, in a few brief years, if the process of denudation goes on at the same ratio as it has in the past few years, the country will be stripped of every requisite for a forest preserve.

There will be nothing worthy of preservation. In the process of time it will be a bleak and dreary solitude of tempest-riven peaks, the dry channels of perished streams and naked and sunscorched declivities, unless nature reverses her law of punishment for timber destruction. Now is the time, the set time, to begin the work of preservation. The opportunity is already receding from us.

In the section of the southern Appalachians under contemplation in this bill there are still large areas of original growth that retain their primeval splendor. It is peculiarly fortunate that the most of this original growth forms forests that are self-renewing and in the areas where the growth has not been actually exterminated, if protected from the ax and fire, it will regain in a few years, compared with the lifetime of the Nation, all the grand and beautiful features of a primitive forest domain.

A conclusive argument for the passage of the bill from an economic and æsthetic standpoint is that the district covered by it is the only one possessing the requisite for a great national reservation in the eastern section of the United States. It has an average range of elevation of about 5,000 feet and embraces Mount Mitchell, the Roane, and hundreds of other peaks higher than Mount Washington. On these high elevations grow the most majestic of the broad-leafed forests of the eastern part of the United States; they afford the climatic conditions required by this valuable species of forest growth.

Regarding the purposes of this bill, an eminent authority, who is a profound student of national science and has made the physical features of the American continent and their attendant climatic conditions a close and careful study, says:

> Although a national reservation in the southern upland will, perhaps, most commend itself to the people from their interests in the noble forests, which it will permanently preserve, there are economic considerations that would of themselves warrant the undertaking. The effect of such a forested area on the streams which have their headquarters in this mountainous district would be considerable and most advantageous. Properly located, this park would include the tributaries of rivers that flow into the Ohio, as well as streams that course to the Atlantic.
>
> It is evident that in the future these water courses, like all others in settled countries, are to be utilized as sources of electric power. Owing to the form of the country, it will not be possible, as in New England, to hold back the stream water in reservoirs for use in the dry season of the year; the only economical method will be to have the water stored in the spongy mat which naturally forms in an unbroken forest, and which to a great extent prevents the water courses from becoming beds of torrents in the rainy seasons and in other times dry channels. In proportion to its area and rainfall, in relation to the whole of the drainage of the rivers flowing from it, such a forest reservation would serve to diminish the floods which year by year become more destructive to the tilled grounds and towns along the lower reaches of our great waterways, and more injurious to their value for navigation. This evil, already great, is constantly becoming a more serious menace as the steep sides of the mountains are further stripped of their woods.
>
> It is, indeed, likely that before the end of the century it will be a matter of national concern. So far as the proposed reservation of forests in the southern highlands will tend to remedy this (that it will in some measure do so is certain), it will help when help is much needed.

In May, 1901, the people living in the Second West Virginia Congressional District, the first Tennessee, and the eighth and ninth North Carolina districts, some contiguous to and parts of them embraced in the proposed reserve, had a severe and memorable object lesson in the terrible results of forest denudation. There was an unusually large rainfall, and the torrents, sweeping down with unresisted volume and force from the

regions where the spoiler had been and uniting their energies of frightful fury in the rivers and streams, swept away mills, barns, houses, bridges, fencing, and the fertile soil off the bottom lands, leaving an unbroken desert of irreclaimable deposit of sand. Thousands of people lost their all, and had the crest of the flood come in the night thousands would have lost their lives.

The loss in dollars to the people of the First Congressional District in Tennessee and the North Carolina district just opposite on the other side of the mountains would be a most reasonable compensation for the 4,000,000 of acres asked for in this bill, and the actual loss in the four congressional districts mentioned will exceed the desired appropriation by $5,000,000.

Immediately following this terrible flood was the most disastrous drought in the history of this region. The earth baked into dust, wheat and oats partially escaped, but gardens and cornfields were almost an entire failure. But few farmers raised a sufficient amount to carry them over to the next crop, and the great majority can only get through by the stint of a half-starvation economy, having no money to make up the deficit. And this, too, in a region of industry and simple tastes and requirements, where want for man and beast has been practically unknown.

The constituency I have the honor to represent, living in one of the most fruitful and enchanting valleys of the southern Appalachian, as well as the people in the other portions of this flood-ravaged and drought-stricken region, look most anxiously and hopefully to the passage of this bill as a permanent security against the perils and disasters of flood and drought. Without such an arrangement of protection the agricultural and industrial development of this interesting and promising region may become a matter of serious uncertainty.

For the cost of two battle ships we can have this reservation of 4,000,000 acres. We need armaments of war to sustain a masterful independence among the nations and confront the land hunger of those greedy and rapacious powers that rely upon conquest for their enlargement, and these we must have. We also need the armaments of peace that secure the happiness, health, and prosperity of the people against the possibility of injurious and destructive forces.

The reservation proposed by this bill will be an imperial gift enriching beyond measure or calculation the whole eastern part of the United States. In no respect will it be inferior to the National Park of Wyoming, and in many noble features it will surpass it. Besides preserving in their "main cradle place and stronghold" the finest hard woods in the United States and the noblest broad-leaved trees of the Northern Hemisphere, charging the air with the boon of health from balsam and fir and holding a water supply in the spongy mat of its forests, it will be the paradise of the scientist, the geologist, the botanist, the artist, and excursionist. The invalid will come for the breath of its pines and the restoratives of its crystal waters. The sportsman will come with gun and angle to find his heart's desire in its secluded fastnesses and glassy streams, and the rich will come to find in its sweet and peaceful solitudes and amid its singing fountains surcease from the enervations of burdening wealth. It will be the Yellowstone of the Appalachians, the sanitarium and pleasure ground of more than half of the people of the United States.

The intelligence of the country appreciates all these facts and pleads for the passage of this bill.

Mr. WEEKS. I now yield to the gentleman from Alabama [Mr. HEFLIN].

Mr. HEFLIN. Mr. Speaker, this bill is not all that I would have it, but I think that we should pass it.

The time has come for us to do something to protect the forests of the United States, and if this law does not work as well as we think it should, we can amend it.

I congratulate the gentleman from Massachusetts [Mr. WEEKS] upon his success in getting this bill by the Speaker and on the Calendar for consideration by the House.

I had expected to hear the Speaker say to this bill, as he has said to thousands this session:

Since others are sleeping,
Go sleep thou with them.

Upon the request of many of my Democratic colleagues I shall include in my remarks a fancied picture of mine of the Speaker's room in the closing hours of this session.

On the 3d of March, in the wild noon of night,
The Speaker's room was a ghostly sight.
Busbee sat in the big armchair,
And bills galore around him were there.

This clerk was alone in the Speaker's room,
But voices he heard in the midst of the gloom;
Groans from the basket by the Speaker's chair
Floated sadly along on the smoky air.

"I had hoped," said the voice of a dying bill,
"To pass at this session; am hoping still.
Is there no spot in the Speaker's heart
That responds to this righteous call on my part?

"Oh, save me, Busbee, I implore,
I've been introduced many times before;
And the voice of Justice cries out to you,
Entreat the Speaker to put me through.

"Do this and the people will say 'amen,'
The down-trodden masses take hope again;
So plead with the Speaker—plead with him now,
For the time is short, I earnestly vow."

"What," says Busbee, "Justice and right!
It's power we love—the power of might;
And we've wielded this power, the Speaker and I,
Your doom is sealed, you'll surely die."

Then the Speaker entered, with a smile on his face,
And said: "Busbee, we've led 'em a terrible chase;
They may talk about Reed and a Russian czar,
They ain't in it at all as you and I are."

Then the Speaker threw down an armful of bills,
Said: "These are their cures for legislative ills,
But PAYNE and DALZELL both well know
How I gave to them all the final blow."

"I do the 'act,' Busbee; you sit behind the screen
And write clever pieces for the monthly magazine.
So betwixt and between us—PAYNE and DALZELL—
We give their good measures a dose of merry—well."

"Rah! rah!" said Busbee, in a high state of glee;
"What would we do if the Members were free
To call up bills and legislate
For the good of the people, the small and great?"

"Well," said the Speaker, solemn and slow,
"We'd be in a ——— of a fix, you know;
The Democrats would get control,
And CHAMP CLARK, their speaker, a great, big soul,
Would restore the House to her former fame,
And good laws the Members would wisely frame."

"Mr. Speaker," said Busbee, in an undertone,
"While you and I are all alone,
I observe the country smells a mouse,
And clamors for a change in the rules of the House."

"Yes," said the Speaker, "that may be true,
But what in the —— can the country do,
When I'm in the chair and PAYNE and DALZELL
Are both on on the floor 'er givin' 'em—well, well."

The wails of dying bills shook the Capitol,
The ghosts of dead measures perched above the Speaker's door,
Perched and sat and nothing more.

Mr. WEEKS. I now yield four minutes to the gentleman from North Carolina [Mr. WEBB].

[Mr. WEBB addressed the House. See Appendix.]

Mr. SCOTT. I now yield to the gentleman from New York [Mr. PAYNE].

Mr. PAYNE. Mr. Speaker, we hear a good deal said about the conservation of the natural resources, but we do not hear much said about the conservation of the Treasury of the United States. [Laughter.] We have a deficit, or will have at the close of this year, of about $130,000,000. No human ingenuity can frame a revenue measure that will equal the expenditures of the first fiscal year under that measure. We face a bond issue in time of peace for the ordinary expenditures of the Government. But here comes this measure with an appropriation of $2,000,000 annually to be taken out of the Treasury of the United States for a period of ten years. They talk about taking it out of the forestry fund, which amounts to about a million and a half a year now paid into the Treasury, and the charges against which are more than $4,000,000 a year for expenditures.

Come out into the open, gentlemen, and say that you are reaching into the Treasury for $20,000,000 at the outset of this proposition to reclaim 6,000,000 acres, where the Secretary of Agriculture says you need seventy-five million. Multiply 20 by 15 and you have $300,000,000 for this property alone, to say nothing of those that may arise from other States. Why do not you gentlemen, who are patriotic and anxious to help the country—for you claim that to be one of the first objects of the bill—go to your States and have them form the agreement that the Constitution allows them to form and take the money out of your taxpayers and pay for these enormous properties? We are doing that thing in the State of New York. We are not coming to the Federal Treasury to preserve our forests, but we use our own money. Gentlemen, have enough State pride, have enough honor about it when you want to benefit your own citizens, to build up the mills on your rivers and make more taxable property, to go ahead and tax your people to pay for it.

This bill creates a commission, Mr. Speaker. Hitherto we have lived up to the rule of the three separate powers in this Government—executive, judicial, and legislative. This proposes a commission, to be composed of three members from the executive branch of the Government, one Member of the Senate, and

one Member of the House, to execute the powers under this bill, and when their actions come to be reviewed they come to the Congress of the United States, the lawmaking power; above all things we should not have the lawmaking powers mixed up with this executive commission. It is a vicious principle, it is an assault upon the principle in the Constitution of the United States to keep the three powers separate forever. Mr. Speaker, in the brief time allotted me it is impossible to even enumerate the objections to this sort of legislation. If you enter upon it, enter upon it with your eyes open and look to the issue of bonds year after year in the future to carry out this extravagant proposition, and that against the opinion of a majority of the scientists of the world, that when you will have done this thing you will not accomplish the object of improving a single navigable stream affected by the area drained under this proposition. [Applause.]

Mr. LINDBERGH. Mr. Speaker, in the limited time at my disposal, I can state only in a general way that I am opposed to the bill before the House, for the reason that it opens up and creates an exceedingly important policy without sufficient limitations. No one can be more enthusiastic for the preservation of our natural resources than I, but we can hardly afford to go into this great question without careful and deliberative study; a study such as we can not give to it in the closing days of our session. The question should not have been brought up now, when we can not as much as offer an amendment. We are compelled to accept or reject the bill as it is before us, and there are some things in the bill I can not vote for, and therefore I am compelled to reject the bill as a whole.

I have before stated my views on this subject on this floor, and I here quote some of my remarks at that time:

"Mr. Speaker, in a general way I doubt the early effectiveness of acquiring forest reserves and placing them under the absolute, exclusive supervision of the Government to the exclusion of everything and everybody. I believe the policy should be materially changed, so as to look forward to a broad policy of general supervision of all forests, public and private, by a regulation of the cutting of the timber and the prevention of destruction by fires, something along the lines established in the Scandinavian, German, and in some of the other progressive countries."

I know the question will be raised as to the right of the General Government to interfere with the individual ownership of private property. It is everywhere conceded that the preservation of the forests is material to the general good, not only for a uniform and permanent supply of timber, but also to attract moisture, and thereby in a measure regulate the waterfall. If that is admitted, and it seems that it must be, it follows that the preservation of the timber is of such general imporance that the regulation of its cutting is within the constitutional control of the Government.

If the private ownership has divested the Government of the immediate right to directly interfere in the regulation of the removal of timber from the forests, it still has the right of eminent domain to accomplish that which is universally required. The Government has the power to do anything essential to the general public. If it can not now fix rules and regulations for the cutting and general care of timber on private lands, it may acquire that right through condemnation proceedings, and as it would not be the policy to appropriate the ownership, but merely to regulate the manner of its use, and that for the purpose of conserving the timber, the measure of damages for such control would not be so great as to seriously threaten the Government Treasury. On the contrary, such a system would be far less expensive than that which is now in contemplation.

The Government can not in the present condition of things take the exclusive ownership of sufficient forests to serve the needs of the country with such effectiveness as may be done by regulating the removal of timber from all forests.

It is one thing to conserve timber already growing in the diversity of stages from the first germination of the seed through to the matured tree and quite another to plant and cultivate forests or preserve an ample supply by acquiring the exclusive ownership of special forests. Under the latter system there must be carved out selected districts to the determent of adjacent communities, and these districts of necessity are far removed from the people in general, while under the former system the forests will continue interspersed as nature originally contributed to us.

I do not consider that we are justified in levying a tax upon the general public to conserve forests in ordinary places for park purposes, to cater to the enjoyment of a comparative few who can afford to make long trips to visit these reserves. I do not, of course, complain of but prefer to approve the maintenance by the Nation of the great, natural, beautiful scenery spots of our country, like the Yellowstone, Yosemite, and several other places, some of much lesser note and magnificence. But I do not believe in creating at general expense park systems except under exceptional conditions where they are not practically available to the general public.

Mr. GILHAMS. Mr. Speaker, the question of national forest reservation has been interesting the public mind for a considerable number of years. It is not a question that has suddenly come before the committee, but one that has been brought before them for careful consideration at their hands from every part of our country time after time, and this committee reported this bill, believing that if it were adopted it would be of lasting benefit to the present and future generations. The powerful imaginative dynamos that are sending forth the remarkable searchlight visions at this time, in which is seen the enormous expenditure of $750,000,000 in the near future for the securing of national reservations, is truly amusing, when the bill, if enacted, shuts off the further expenditure of more than $19,000,000 at the expiration of ten year, being somewhat automatic in its nature.

The preservation of our forest domain has been and will be one of the great sources of our national wealth. It is through the preservation of these forests that our watersheds may be maintained, and, in a sense, become reservoirs to perpetuate and continue the regular flow of water into our navigable streams. It will be through the perpetuation of this water supply that the greatest economical development of our country will be accomplished through water transportation. It will be water transportation that will enable us to cheapen our domestic commercial intercourse and to put our manufactured products, as well as farm products, at the cheapest possible cost into the hands of foreign consumers.

Without this class of transportation and its most perfect development throughout this whole country of ours we can not hope to compete with our foreign competitors, who already have acquired unusual facilities, through water transportation, in the markets of the world. The baldness of our country from lack of preservation of our forests will rob us of one of our greatest sources for economic wealth and prosperity. We can have no ship canals or inland waterways without their preservation and most careful protection, and at this point I desire to call the attention of this House to the fact that a House concurrent resolution (H. C. Res. 18), drawn by myself and filed in the beginning of this Congress, asking for a preliminary survey to determine the feasibility and the probable cost of the construction of a ship canal from Toledo by way of Fort Wayne to Lake Michigan, this canal to be known as the "Michigan and Erie Canal," is still pending. It has received a favorable report from the Committee on Railways and Canals, and is now on the House Calendar, and should have been permitted, in my judgment, to have been taken up on the floor of the House for final passage.

The reasons put forth by those who had control of matters coming before the House for suppressing its passage seemed to me very inadequate and unjust.

It is my belief, my conviction, and hope that the future will demonstrate the correctness and the wisdom of our claim. A ship canal from Lake Michigan to Lake Erie, over the line suggested in our bill, would prove of inestimable value, if constructed, to the whole Nation in the cheapening of the cost of transportation and the enormous saving of fuel over what is now used for transportation purposes. The construction of a canal over this line would be the foundation or trunk line for a network of waterways through Indiana, Ohio, and Illinois.

It would mean the holding within our own borders of the enormous shipping of the products of the West and Northwest to the East and keep them from being diverted through Canada and out to the Atlantic Ocean by way of the Georgian Bay Canal, when completed, which is now in process of construction. It would shorten the distance from Chicago to New York, in round trip, 800 miles, a distance equal to that from Chicago to Baltimore. It would make the distance by water from Chicago to New York City the same as that by rail to-day. It has been demonstrated in our own country and in Europe that the cheapest of all water transportation is by barge fleets. The cost of transportation on the Ohio River in barges is about one-third of a mill per ton-mile, and many times the transportation has been for less money. There is no doubt in my mind that transportation by barge fleets on the Michigan and Erie Canal and the deepened Erie Canal, if constructed, would be cheaper than any water transportation ever before known.

It is through this line of water transportation that we will be enabled to hold the grain trade within our own borders of the mighty West. One of the reasons that contributes to the economy of transportation by barges is the economy in the cost of construction per ton capacity, which averages from $9 to $15

per ton, while the cost of the mighty ocean-going vessels and lake-going vessels is from $50 to $80 per ton, or more than five times the cost in construction.

In the summer of 1908 50 great ocean steamers were idle because there was no grain to transport from the city of New York, and the grain from our western wheat fields was passing through the Canadian waters to Montreal for transportation to Europe. The steamship companies took up the question with the Produce Exchange of New York, and the produce exchange in turn took up the question with the trunk-line railroads. The trunk-line railroads answered that they could not meet the rates of water transportation without inviting bankruptcy to their roads.

Mr. Randall, of Fort Wayne, Ind., in discussing this question with an officer of the Chicago Board of Trade recently, was told that "while Chicago was very anxious for a barge waterway connecting it with New York, and that they must have it for the protection of their grain trade, they were not in any way in such a bad shape as the Produce Exchange of New York. The price of seats on the produce exchange was at a very great discount last summer, but if the Canadians built the Georgian Bay Canal and we did not get this shortened waterway from Chicago to New York, they would be worth nothing; that they might, at least for seven months of the year, abandon the produce exchange entirely."

The New York Journal of Commerce, in a two-column editorial, in discussing the grain situation of New York, said:

> There is no way of maintaining the importance of New York as the greatest ocean port on the continent except by deepening the Erie Canal to 24 feet and by connecting the headwaters of Lake Erie with the headwaters of Lake Michigan by a canal equally big.

An Ottawa (Canada) paper recently said, in discussing the deepening of the Erie Canal and the making of the Michigan and Erie Canal:

> The United States is contemplating these great improvements in their waterways. The only way to keep this from being done is for the Canadian government to get busy and build the Georgian Bay Canal. If she does this, the United States may abandon her contemplated improvements. If the United States does go ahead with her contemplated improvements, they will very greatly impair the value of our canal.
>
> The only way to keep the United States from making her improvement is to get busy and do ours first.

If the Georgian Bay Canal should be completed, Chicago will be 800 miles nearer to Liverpool by the way of Montreal than by the way of New York. With such a shortening of the distance, it is easy to see that the shipments to foreign ports for a long portion of the year from the Far West will be through Canadian waters. There will be none of the products of the western prairies passing through Lakes Huron and Erie, and they will be barren of foreign shipments and any considerable water transportation. The English and Canadian newspapers are highly pleased over the aggressions of the Canadian government in improving her waterways, and predict that Montreal and Port Arthur will be the busiest ports on the North American Continent. Patriotism ought to stir us to some action to see how we can best meet this threat of Canada to take away from us what is really our own.

We should not permit for an instant our neighbor on the north to do more in the construction of waterways than we are doing. We should not hesitate in making a careful examination at the earliest possible moment of such feasible routes as may present themselves to the country. The very knowledge of the feasibility of a waterway is that much added wealth to our Nation. The transportation of our country has been, and will be for many years to come, from east to west and from the west to the east. It should be the imperative duty of our legislative bodies to seek every feasible route for water transportation in accordance with this law of transportation, and not promiscuously place a little canal here and another there, until these great transportation lines have been developed and perfected.

Railroads are already feeling their inability to devise means for the transportation of our enormously increasing domestic and foreign trade. Terminals can be secured for railroad purposes at the large centers of commercial industry only at such prices that make railroad construction almost prohibitive. James J. Hill is calling the attention of the country to the fact that it is absolutely necessary that waterways should come to the relief of the railroads in order to extend the terminals farther from the congested cities. It has been estimated that it would cost fifteen billions of dollars to duplicate the railway terminals in six of the largest cities of the United States. Think of this—to duplicate the terminals of these six large cities means to nearly double the cost of all the railroad property to-day.

That would mean added cost for better terminal facilities without materially increasing the lines of transportation. And so we see to-day evidences upon every hand, among the foremost railroad men of our country, an earnest appeal for the early development and completion of water transportation over such lines as will materially assist in carrying the bulky commodities and leaving for them the lighter and more profitable transportation commodities, and at the same time enhancing their profits. These waterways, while relieving the congestion in railway transportation, by the carrying of the bulky and unwieldy products, will be profitable to transport companies because of the ease and cheapness of water transportation.

I desire now to call your attention to the lines proposed for this survey of waterways between Lake Erie and Lake Michigan. The line pointed out in the bill introduced by Mr. ANSBERRY, of Ohio, after coming up the Maumee River to Defiance, Ohio, thence westward toward Fort Wayne, or to Fort Wayne, thence northwest at or near Churubusco, Ind., entering into a chain of lakes, thence to Elkhart and South Bend, and into the St. Joseph River, and thence into Lake Michigan is a line somewhat shorter than the one proposed in House concurrent resolution No. 18, introduced by myself, but proposing to follow a line, if found feasible, coming up the Maumee River from Toledo to Fort Wayne, thence in a southwestern direction to Huntington and Wabash, thence to Lake Michigan, following a course mapped out and carefully analyzed in a pamphlet prepared by Mr. Frank B. Taylor for the Toledo, Fort Wayne and Chicago Deep Waterway Association, of Fort Wayne, Ind., which I desire to submit and make a part of the record in the cause for a deep waterway from Lake Michigan to Lake Erie, in accordance with the above-named resolution.

THE MICHIGAN AND ERIE CANAL, OR TOLEDO, FORT WAYNE AND CHICAGO DEEP WATERWAY—THE NEED OF INLAND WATERWAYS.

A few years ago it required the vision of a prophet to see that railroad transportation in the United States was nearing the time when it would become inadequate for the needs of commerce and that a great system of inland waterways must soon be built. Now, every intelligent man who will take the trouble to inform himself by a study of the statistics of commerce and of railroad and waterway transportation must see not merely the possible benefits of inland waterways, but that they are greatly needed at the present time and will become absolutely indispensable in the near future. It is this conviction in the minds of many wise and farseeing men which has at last taken hold of the people and which is now moving the entire country to the advocacy of inland waterways.

It is not the object in this article to dwell at length upon the conditions of trade and transportation which show the need of inland waterways; that has been done by others. The great deep waterways conventions and congresses of recent years in the Mississippi Valley and the recent National Rivers and Harbors Congress in Washington are unmistakable expressions of the people's convictions and desires on this subject. The earnestness and enthusiasm of the people who attend these great conventions is beyond belief to anyone who has not attended one of them. President Roosevelt's recent speeches at Memphis and Vicksburg and his recent messages to the National Congress show the highest official appreciation of the country's needs along this line and give assurance of his earnest support for wisely planned measures of relief. But lest some who read this may not realize the weighty reasons which are moving the people to demand inland waterways, a brief summary of general reasons is here given. If anyone doubts the wisdom of the present agitation, if he doubts the beneficial results which a general system of waterways will bring to all the people, let him consider the following facts:

1. That water transportation, even in relatively small craft, is much cheaper than transportation by rail, and that the cost grows less with increase in the size of the vessel—the larger the barge or ship the lower the cost. Transportation by water can be done with a profit at a cost only one-fifteenth to one-fourth, averaging about one-eighth, as much as by rail, the rate depending chiefly on the size of the boat. This applies especially to all bulky, low-value commodities, such as grain, coal, iron and steel, ice, ore, stone, brick, slate, sand, gravel, earth, cement, lime, lumber—in fact, to nearly all raw materials.

Col. John L. Vance, president of the Ohio River Improvement Association, has said: "The heavier freight—coal, iron, steel, locomotives—are to-day carried on the Ohio and lower Mississippi for one-third of a mill per ton per mile—a less figure than on any other waterway in the world. This figure includes the return of empties, and leaves a handsome profit to the transportation lines." At this rate a ton is carried 30 miles for 1 cent or 3,000 miles for $1. "As an example of cheap transportation on the Ohio and Mississippi, the steamer *Sprague* may be cited. She has handled safely in one tow 70,000 tons of freight in barges. With the most approved railway appliances in use at the present time this would require 2,333 cars, making a train 15 miles long, not including the locomotives required to move these cars." These river rates are probably somewhat lower than can be expected generally on canals.

But even if they were several times more than here stated they would still be much lower than rates by rail. "A bale of cotton weighing 500 pounds goes by rail from Dallas, Tex., to Galveston, 300 miles, for $3, and from Lake Providence, La., to New Orleans by boat, the same distance, for 50 cents." "Coal from a certain mine is shipped to Pittsburg by boat on the Monongahela from 3½ to 4 cents per ton; by rail, when navigation fails, for 44 cents per ton. It is estimated that on the new Erie Canal a dollar will carry a ton 1,900 miles." "In the carriage of freight between Chicago and New York—by water to Buffalo and thence by rail to New York—the boats receive one-third and the cars two-thirds of the through rate, the boat mileage being double that of the car. In round numbers, the railroad ton-mileage is about one-fourth that of the entire lake system, while the freight charge is more than double, showing a ratio of over eight to one for general traffic in favor of water transportation."

"The average rate on all the railroads of the United States is 7.5 mills per ton mile, while on the Lakes the latest estimates put it as low as 0.85 mills per ton per mile. On the Ohio and lower Mississippi the rate is as low as 0.3, or sometimes 0.1, of a mill per ton per mile."

For several years coal has been carried from Buffalo to Duluth, nearly 1,000 miles, for 30 cents per ton, or at the rate of about 0.3 of a mill per ton per mile. Facts of this kind could be multiplied indefinitely.

2. That the countries of Europe—especially Holland, Belgium, France, and Germany—have splendid inland waterways affording water transportation for every city and to every seaport. The prices of their raw material to themselves and of their manufactured products to the rest of the world are cheapened by low cost of transportation, and this is a factor of prime importance in the difficulties we encounter when we meet them in the world's markets.

Nearly all of the prosperous cities of our own country have more or less water transportation, and all of those which have not would be greatly benefited if they had. But in general our water transportation is poorly developed. The remedy is inland waterways, with one or two deep channels to the sea, the system which the people are now demanding.

3. That the building of waterways, if properly carried out, will afford opportunities for great development of water power. Canals will generally be constructed with reference to this factor as a secondary, but sometimes as a primary consideration. The running expenses and repairs of free canals can thus be paid and additional income secured from the water power.

4. That the canals and waterways being built and controlled either by the State or by the National Government, or by these jointly, are made free to all and are not reserved for or controlled or managed by or in the interest of any trust or corporation or individual, and that they will therefore tend to furnish a natural remedy for the regulation of railroad rates.

5. That the waterways will not work an injury to the railroads, but will, in fact, aid them and greatly increase their earnings by operating to relieve them of the heavier, bulkier freights, leaving for the railroads chiefly the high-class, faster freights and the express, mail, and passenger business, all of which are willing to pay a higher rate for quicker transportation. Waterways stimulate manufactures by supplying cheaper fuel and raw materials, and this brings increase of population and increase in manufactured products which go by rail, and in express, mail, and passenger business. Transportation facilities create traffic.

6. And finally, just as the true character of the individual man may be measured by his unselfish acts rather than by his acts of self-interest, so the state of civilization to which our country has attained may be measured by its acts of altruism, whether with reference to our near neighbors or to more distant peoples, or to our own unborn generations, rather than by our conquest of other peoples or a part or class of our own people for our immediate personal profit and advantage—in short, by our acts of foresight in providing for the welfare of all of our future citizens rather than by the present mad and reckless scramble for millions for ourselves. We ought to begin now to conserve our natural resources. We have had solemn warnings of their failure if the present wasteful methods of use continue. It is certain that within a century or two our natural fuel supplies will be nearing exhaustion. The locomotive engine is the largest and most wasteful of all consumers of coal. Waterways for carrying heavy and bulky freights would work an immense saving of fuel and postpone the evil day.

For these reasons and for many others that might be mentioned it is evident that the time has come to begin the building of inland waterways. But the building of them is at best a slow task, and even if begun to-day, by the time they are ready for use the need of them will be much greater than it is now.

THE LONG HAUL AND THE TWO MAIN WATER ROUTES.

The compelling fact underlying the whole of the present agitation for deep waterways to the sea and for systems of tributary inland waterways is the inevitable "long haul." The long haul is a necessity growing out of geographical position, and can not be evaded. But it is now performed mainly in railroad cars, and costs on the average about eight times as much as it would in boats on deep waterways.

The North Central division of the United States, or, in popular phrase, the Central or Middle West, comprises the 12 States of Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, North Dakota, South Dakota, Iowa, Nebraska, Kansas, and Missouri. Their combined area is 753,550 square miles, and they had in 1900 a population of over 26,000,000. They make one-fourth of the area of the United States and contain one-third of its population. Although endowed by nature with a soil of great fertility and with a moist, temperate climate highly favorable to agriculture, having been peopled by a mixture of the best nationalities of the earth, and having built up States and cities and a wonderful prosperity in agriculture, mining, and manufactures, yet these States now find themselves fettered and enslaved in commerce, chiefly in consequence of their geographic position.

They are practically debarred from foreign trade because of the great cost and inadequacy of the only available means of transportation to and from the seaboard, and they are hampered almost as much and for the same reasons in their trade with our own seaboard population. For both of these markets they must pay the tax of the long haul mainly by rail. The commerce of the Middle West has grown by leaps and bounds and has far outstripped the coincident growth of railroad capacity. But even if the railroads had kept pace with commerce, they could not have relieved the present situation, to say nothing of the future, for the imperative need is for cheaper transportation than the railroads can possibly give. From the different parts of the Middle West it is 500 to 2,000 miles to the seaboard, and the railroads, even at their best, can not make this long haul at rates which can compete with water rates and enable this region to be an effective competitor in foreign and seaboard markets. The only remedy is water transportation in large bulk, which is the cheapest transportation in the world. But to realize the advantages of this requires deep waterways, at least for the main trunk lines, to the seaboard. There are only two possible trunk-line routes to the sea within the boundaries of the United States—one south down the Mississippi River, and the other east through the Great Lakes, the Erie Canal, and the Hudson River. The only salvation of the Middle West industrially and commercially is in making both of these into deep waterways, or, if possible, into ship canals.

These two trunk lines are of the first importance—should be considered first and built first. They are both used to-day for commerce, but in only a very limited and ineffective way, and are wholly inadequate to the needs of the country. In their present condition neither of them is capable of carrying barges or ships of such size as are indispensable for the long haul at the cheapest possible rates.

It is true that we have already that most magnificent of waterways, the Great Lakes system, with its tonnage greater than that of any other waterway in the world, the broad ocean alone excepted. But the lakes are not now adequately connected with the seaboard—not by a ship canal or really deep waterway; nor are they connected with the Mississippi River, and the Mississippi itself, although capable of a great commerce as it is, is nevertheless not now fitted to carry the commerce that it ought and can surely be made to carry.

The State of New York is now at work enlarging the Erie Canal between the Hudson River near Troy and the Great Lakes at Buffalo, but when completed this canal will be only a moderately deep waterway. According to the design the new canal is intended to be a barge canal rather than a ship canal, its depth being only 12 feet. This limitation of depth for the new canal seems very unfortunate, for there ought to be at the earliest possible day at least one real ship canal within the boundaries of the United States connecting the Great Lakes eastward with the ocean. The Canadians are giving their new St. Lawrence-to-Ontario ship canals a depth of 21 feet and purpose 24 feet for their Ottawa Canal. It seems certain that the Erie Canal will have to be again deepened in the near future. Indeed, a strong movement has lately been set on foot in New York to have it made 21 feet deep now.

The prospects for the early completion of the Lakes-to-the-Gulf great waterway seems particularly bright at the present time. Indeed, if Congress recognizes the needs of commerce and the earnest desire of the people this work will be in progress within a year. The whole route has already been surveyed, and even now, as a result of experimental dredging by the Mississippi River Commission during the low water of the fall of 1907, it is practically certain that a 14-foot channel can be maintained at all times of the year from Cairo to the Gulf. This depth was maintained experimentally during the recent low water on three bars without serious difficulty. The route of the connecting canal up the Illinois and Des Plaines rivers to join the Chicago drainage canal and Lake Michigan has already been surveyed and ought soon to be under construction.

THE PROPOSED MICHIGAN AND ERIE CANAL AN INDISPENSABLE PART OF THE GREAT EAST AND WEST MAIN WATER ROUTE.

The great east and west trunk line or long-haul waterway from Chicago to the sea may be said to be composed of four divisions: (1) The Hudson River, (2) the Erie or Erie and Hudson Canal, (3) Lake Erie, and (4) either the lake route through Mackinac Straits now in use or else the proposed Michigan and Erie Canal, which would cut off the long northward detour and would run from Lake Erie to Chicago by a nearly direct route. This canal would shorten the distance about 400 miles and would make the long haul, all-water route from Chicago to the seaboard of substantially the same length as the present all-rail route. To have a deep waterway or ship canal from Chicago to New York as short as the direct all-rail route is the best result that can be reached. No better solution of the Middle East to seaboard transportation problem is attainable. It represents the maximum possible efficiency of water transportation—the cheapest possible water rates for the unavoidable long haul. Water and rail transportation would then be set up against each other in flat competition, with no advantage of distance to either one. The only advantages either would have over the other would be such as are inherent in the instrument. Cars would be beter for some things, boats for others; and equality of distances would tend to make the adaptation of trade to them more perfect and thus give the best possible service to the public.

When the Erie Canal in New York has been completed as a ship canal the great east-and-west deep-water route, as it has been thought of up to the present time, will be finished and ready for use. But it will be far from perfect even then, for it will still be about 400 miles longer than the all-rail route, and water rates for transportation will therefore fail to touch the bottom values which ought to be reached.

This extra 400 miles is 43 miles farther than from Chicago to Cleveland by rail, nearly as far as from Baltimore to Boston, and lacks only 42 miles of being as far as from New York to Buffalo by the New York Central Railroad. This much distance would be saved every trip. Not until a shorter route is made available will east-and-west long-haul rates come down to bed-rock value, which they ought to reach and which the people are entitled to have. Too much stress can not be laid upon the fact that even after the Erie Canal is completed every ship and barge that sails from Chicago to New York by way of the Straits of Mackinac will have to travel about 400 miles farther than it would if a deep waterway were built from Chicago to Toledo across northern Indiana and Ohio. And, further, in going back to Chicago every returning ship will have to repeat the same 400 miles' detour through the northern straits.

In short, every boat plying between Chicago or any point west of Chicago and Toledo or any point east of Toledo will have to travel 800 miles farther than necessary in every round trip until the proposed Michigan and Erie canal is built. This is 37 miles farther than from Fort Wayne to New York by the Pennsylvania Railroad, or exactly as far as from Chicago to Baltimore. This distance of 800 miles would be saved on every round trip. Indeed, every ship that travels the northern route to-day has to make this long detour, and every ship in the past has had to do it. The value of the coal alone that has been consumed in traveling this extra 400 miles is probably more than enough to build the canal, to say nothing of the insurance premiums and losses paid and the value of the lives and property lost in wrecks that would have been avoided.

Between Chicago and New York the saving of distance by the proposed canal amounts to two-sevenths, or a little more than one-quarter of the whole distance; between Chicago and Buffalo it is nearly one-half; between Chicago and Cleveland or Detroit more than one-half; and between Chicago and Toledo nearly two-thirds. Can there be any doubt of the value of this canal, if its construction is feasible and within bearable limits of expense?

The accompanying sketch map, figure 1, shows the place of the proposed canal as a link in the great east-and-west water route. Its advantages as a cut-off or short route from Chicago to Lake Erie will be easily noted, and also the fact that it makes a nearly straight line from Chicago to Troy, N. Y., and thus gives an all-water route to New York City which is practically of the same length as the all-rail route—roughly, 1,000 miles—instead of 1,400 miles, as the all-water route is now.

This canal is really an indispensable part of the east-and-west main water route to the sea, and will surely be built sooner or later. Indeed, after the Erie Canal has been made into a ship canal it can not be long deferred. Its service to commerce will be like that of the Baltic Canal in Germany; like that of the proposed Sandwich Canal, which will cut off Cape Cod; and like the proposed Florida Canal. It will cut off the southern peninsula of Michigan, save the long northward detour, and give a route which will be closed by ice only half as long.

THE PHYSICAL FEATURES OF THE COUNTRY TRAVERSED BY THE PROPOSED CANAL.

In northern Indiana, northwestern Ohio, and southern Michigan the whole country is covered with a heavy deposit of glacial drift. Solid rock lies beneath, but is nearly everywhere buried to a depth of from

100 to 300 feet. The bed rock is exposed to view in only a few places and in very small areas. A glacial moraine, or broad ridge of clay, sand, and stones known as the "Erie-Saginaw moraine" runs from a point about 10 miles northwest of Logansport, Ind., toward the northeast, passing out at the northeast corner of the State, and thence in the same direction to Lapeer County, in Michigan, 50 miles north of Detroit. Its top is 10 to 20 miles wide and its surface is hilly and uneven. Its hollows hold hundreds of small lakes and ponds which vary in extent from 7 to 8 square miles, with occasional depths of 80 to 100 feet, down to little ponds a few square rods in area and dry in times of drought.

Besides the lakes, there are many stream valleys, marshes, and prairies, which are extremely favorable for the formation of reservoirs. The great ridge has an altitude of 1,000 to 1,200 feet above sea level in southern Michigan and 900 to more than 1,000 feet in northeastern Indiana. It forms the watershed between Lake Erie on the east and Lake Michigan and drainage to the Mississippi on the west. During the ice age the basin of Lake Erie, including the Maumee Valley, was occupied by a great lake which had its outlet in Fort Wayne, Ind., through a river a mile or more wide, which flowed southwest to the Wabash at Huntington and thence to the Mississippi. The divide on which the waters now part, going east to Lake Erie and west to the Mississippi, is in the channel of this old outlet just west of the city of Fort Wayne and has an altitude of 760 feet above the sea.

At Fort Wayne another moraine or ridge of glacial clay runs southeast along the north side of the St. Marys River, curving gradually to the east after entering Ohio. From about 800 feet altitude in the south part of the city of Fort Wayne, it rises gradually to over 900 feet in western Ohio, and to still greater altitudes farther east. Thus the lowest gap in the rim of the basin of Lake Erie on its west and south sides is at Fort Wayne. The lowest one in Ohio is about 910 feet, and in Indiana, northwest of Fort Wayne, there is one at about 860 feet, but none lower. Northeastward into Michigan there are none below about 950 feet. West of the great moraine in Indiana there is a gently sloping, sandy plain descending northwesterly to the broad, swampy Kankakee Valley. Then another moraine or belt of clay 7 or 8 miles wide separates the Kankakee Valley from Lake Michigan. This is called the "Valparaiso moraine." Its crest is rather narrow in the northwestern counties of Indiana, and it has an altitude of less than 800 feet in the part west of Valparaiso.

REASONS FOR SELECTING THE FORT WAYNE AND ROCHESTER ROUTE BETWEEN TOLEDO AND CHICAGO.

Lake Erie is 573 feet and Lake Michigan 581 feet above sea level. The lowest passage over the drift ridge between them is through the old outlet channel at Fort Wayne at 760 feet. Indians used this route before the coming of the white man, and the engineers of 1826 used it for the old Wabash and Erie Canal. But that canal was designed to connect Lake Erie with the Ohio and Missisippi rivers. It was never built to Lake Michigan or to Chicago, although a line going northward from Delphi was surveyed in 1831. Many years ago a canal was talked of to connect Toledo and Michigan City by a nearly direct route. This was in 1880 or 1881—about the same time the Wabash and Erie Canal was resurveyed by the late William S. Goshorn from Toledo to Lafayette for a projected enlargement which was never carried out.

About 1895 Dr. William T. Harris, then of Defiance, Ohio, now of Chicago, began promoting the Toledo-Michigan City project. The route suggested by him was up the Maumee to the state line east of Fort Wayne, and thence west to Cherubusco through the valley of Cedar Creek, or else up to Fort Wayne and northwest from Fort Wayne to the same point, and thence past Goshen, Elkhart, and South Bend to Michigan City. As an alternative to this, and affording a shorter route, a line was suggested leaving the Maumee at Defiance and going northwest over the high moraine to Pigeon Creek and down this to Elkhart, South Bend, and Michigan City. The summit level on the Cherubisco route could hardly be less than 850 feet above sea level, or 100 feet higher than the summit level available at Fort Wayne. On the Pigeon Creek route it would have to be 50 to 100 feet higher than on the Cherubusco line. Either of these routes is feasible for a small canal of the old type, but, as will be pointed out below, they are both impossible for a deep waterway or a ship canal.

At a meeting of citizens in the city of Fort Wayne November 16, 1907, called to start a movement for a canal from Toledo to Fort Wayne, a plan was suggested for a deep waterway or ship canal from Toledo to Chicago, passing through Fort Wayne and Rochester, Ind. The route proposed is as follows: From Toledo up the Maumee River to Fort Wayne; thence through the old outlet channel to Huntington, and along the higher ground on the north side of the Wabash River to the city of Wabash; thence northwestward in a nearly direct line, crossing Eel River a little below Roann, and continuing in the same line past Rochester and down the Tippecanoe River to a point south of Lake Maxinkuckee; thence on the same line across the Kankakee River at the lower end of English Lake, passing north of Kouts Station; thence from a point about 6 miles northwest of Kouts northward to a point 2 miles east of Sedley; and thence, as may seem best, either directly north to Lake Michigan at a point 8 miles northeast of Hobart, or continuing northwest from Sedley to Wolf Lake and South Chicago. On this route it is designed that the summit level shall run from Fort Wayne, or some point a few miles east of Fort Wayne, to a point on the Tippecanoe River south of Lake Maxinkuckee and that the canal in this interval shall be level and without locks. This would give a summit level about 100 miles long at an altitude somewhere near 750 feet above the sea, or 177 feet above Lake Erie. With locks of 20 feet lift, 16 or 18 locks would serve the whole canal.

The selection of this route is based on the following principles, which seem to be essential elements in the building of a deep waterway or ship canal under the conditions which exist in the region between Lake Erie and Lake Michigan.

1. The canal must have the largest possible supply of water at its summit level—at least enough to operate one of its locks 100 times a day, and as much more as is possible. This is the first and indispensable requisite.

2. The canal should have the lowest possible summit level in order (a) that the building of locks, which is very expensive, shall be reduced to a minimum in the original cost of construction, and (b) that the number of locks shall be the fewest possible, because boats lose time in passing through them and because locks add materially to the cost of both operation and maintenance.

3. The canal should follow the shortest line on which its construction is feasible and on which it can have at the same time the fewest locks and obtain the greatest possible water supply for its summit level.

A comparison of the Fort Wayne-Rochester route with any other that has been suggested, or that can be suggested, shows that this route would have a lower, longer summit level and hence fewer locks, and would secure a very much larger water supply for its summit than can be obtained on any other route. All the routes suggested appear to be feasible from the point of view of engineering. But in the matter of water supply at summit level, which, after feasibility of construction, is the all-important thing for a deep waterway or ship canal, the several routes are widely different. The Pigeon Creek and Cherubusco routes would have their summits on the top of the high drift ridge, where the possible water supply is necessarily limited. The summit level would have to be short—certainly not more than 15 or 20 miles long—on both of these lines, and the area of country which could by the utmost effort be made tributary to the summit level would be relatively small. On either of these routes the area could hardly exceed 700 or 800 square miles. There would be no rivers to draw upon and only a few very small creeks. Almost the entire reliance would have to be upon the existing lakes, of which there are a considerable number, and upon reservoirs artificially constructed. But these lakes and reservoirs would be not merely a supplementary supply to use in the dry months to augment temporarily a regular supply from other sources, as would be their use on the Fort Wayne-Rochester route; they would be the sole reliance and would have to be drawn upon throughout the whole season of canal navigation.

The drainage areas available for the different summit levels are shown in the second map, figure 2. These routes are both excellent lines for canals of small size, say, of 6 or 7 feet depth, and one or both of them will no doubt be utilized some time in this way. But they are manifestly not available for a great deep waterway or ship canal.

If a deep waterway between Like Erie and Lake Michigan is to serve the purpose for which it is intended, it must have water enough to operate its locks a great many times each day, for if it were in any sense a success, it would be a very busy canal. When this canal is planned officially, it ought to be with a distinct view to future possible needs; that is, it ought to be laid out on that route which will command or make available the maximum possible water supply for its summit level. It seems improbable that a 14-foot canal could have water enough at its summit level on either the Cherubusco or Pigeon Creek routes; but granting for the moment that it would, the developments of the near future will surely show the folly of such a choice.

When the Erie Canal in New York is made into a ship canal, 21 or perhaps 24 feet deep, as it surely will be in the near future (the Chicago Drainage Canal is now a splendid ship canal, 24 feet deep and 162 feet wide in its rock sections), it will at once become desirable, if not imperative, not merely to have the proposed canal, but to have it of the same capacity as those east and west of it. In that event it would simply be impossible to get water enough for a 21 or 24 foot canal on the Cherubusco or the Pigeon Creek routes.

Finally, when a canal has been brought from Toledo up to the summit at Fort Wayne, what is the use of running it up over a hill 100 feet higher than Fort Wayne, building ten or twelve more locks than necessary, and causing every boat to lose the time required to operate them forever after? Why go over a hill, when a way is open to go around it on a level line and with immense advantages for the summit-level water supply?

Two other routes have been suggested in times past. One is over the hill in southern Michigan, going up either the Raisin or the Huron River to Jackson and then down either the Kalamazoo or Grand rivers to Lake Michigan. These are feasible for small canals, but are open to the same objections as the Pigeon Creek and Cherubusco routes—too high and not enough water supply. The Huron River is larger than the rivers on the other high-level routes, and the accessible lakes are larger and more numerous, but the summit level would have to be up to nearly 1,000 feet above the sea.

The other way is along the line of the old Wabash and Erie Canal from Fort Wayne down the Wabash River to Delphi and thence north to Lake Michigan. But on this route the canal would descend to the Wabash River at Huntington, and the summit level at Fort Wayne would be short and would be fed only by the St. Joseph and St. Marys rivers at Fort Wayne, with possibly the Wabash and Salamonie rivers added at some point above Huntington. Of these streams the St. Joseph is the best, but is not large. The others are not so good as the St. Joseph. It is doubtful whether a 14-foot canal could be operated successfully from these streams in a dry autumn. But, again, having brought the canal up to the Fort Wayne divide, what is the use of dropping it down into the Wabash Valley and losing the advantage of the large summit level water supply, if it is possible to run the canal along on a level and secure this supply? These different routes are shown on the second map, figure 2.

FEASIBILITY OF CONSTRUCTION ON THE PROPOSED ROUTE.

This is not the place to describe at length the details of the topography and geology of the country along the proposed route, but it may be said briefly that the features are known in considerable detail and that the construction of a deep waterway or ship canal on this route is entirely feasible. Indeed, the whole route, with the exception of two or three comparatively short intervals, is very favorable, and the difficulties encountered in these intervals can be avoided, if necessary, without sacrificing the special advantages which this route offers. For the very valuable detailed information available along this route the writer is indebted to Mr. Frank Leverett, of Ann Arbor, Mich., before whom the project was laid soon after the meeting in Fort Wayne, and who, as a geologist of the United States Geological Survey, has studied the topography and drift of northern Indiana and Ohio in detail, having examined every township of the region on foot and collected records of all the deeper wells, showing the depth and character of the drift. Mr. Leverett expressed himself as confident not only of the feasibility of the route for the construction of the proposed canal, but expressed equal confidence in the availability of a sufficient water supply for the summit level to make it entirely adequate to meet the needs of commerce.

Mr. Leverett recently laid the project of this canal before Mr. Lyman E. Cooley, the well-known engineer of the Chicago Drainage and Ship Canal and member of the United States Deep Waterways Commission. Mr. Cooley expressed himself as much pleased with the project. In his letter to Mr. Leverett, he says:

"I think your solution of the route from Toledo to Lake Michigan by Fort Wayne is the most important yet presented. The water supply is the important consideration, and your proposition gives better command of this than any heretofore suggested.

The writer afterwards had an interview with Mr. Cooley in his office in Chicago and is indebted to him for a number of valuable suggestions.

Mr. Cooley strongly advises canalizing the Maumee River up to Fort Wayne rather than the construction of an independent canal. He says it will be cheaper and better in every way. Fifteen or 20 miles of the Tippecanoe River can also be canalized below Rochester. Mr.

Cooley said he was particularly impressed by the lowness of the proposed summit level, by its great length, and by the great water supply which it makes available.

The physical features of the route may be briefly summarized as follows: Rock cutting would be necessary in slight measure in two and possibly three stretches of the canal, but there would be no deep cutting. For about 15 miles above Maumee, Ohio, the river has rapids over limestone ledges. Rock cutting here would be confined almost wholly to shallow cutting in the bed of the canal, an ascent of about 63 feet being made in this interval. Rock would be encountered again at Huntington, Ind., and more or less of it from there to Wabash. But here again little, if any, of the cutting would be deeper than the bed of the canal. There is also a possibility of encountering a little rock cutting near Kouts, in the northwestern part of the State, but this would be short and shallow and might possibly be avoided altogether. None of these rock cuts are formidable from the point of view of canal construction, and it is doubtful whether all of them together will supply as much stone as will be needed for bank protection.

The only sections of the canal that present anything difficult in construction are two localities in which the most desirable route for the canal would require rather deep cutting. Both of these, however, would be entirely in clay drift, with no rock cutting whatever, and the work is simply a straightaway problem for steam shovels. The most formidable cut would be through the big drift ridge between Roann and Rochester. Here, for a distance of 5 or 6 miles, the ridge has an altitude of about 850 feet, requiring a cut of about 100 feet deep through this part. For 6 or 8 miles more the cutting would be 50 feet or less in depth, about two-thirds of it less than 25 feet.

This is what would be required if the canal is built on the shortest possible route from Fort Wayne to Chicago. But it can be conducted around this hill, if desired, by a longer route so as to reduce the depth and length of the deep cut, or even to avoid deep cutting entirely. This could be accomplished by turning west on the north side of Eel River. Near Denver, 6 miles west, the canal could be turned north so as to pass down the valley of Mud Creek to the Tippecanoe River. On this line the 100-foot cut would be reduced to a mile or two, and most of the remainder would be under 50 feet. Or, going a little farther west, the canal could be turned northwest at Hoover to a point about 3 miles east of Lucerne and thence north. By this route there would be very little cutting more than 50 feet, and most of it 25 feet or less. If this route proved too formidable, the canal could be carried still farther west, to a point about 8 miles northwest of Logansport, where it could turn northward to the Tippecanoe without any deep cut whatever, the level of the land being nearly the same as that of the canal. As is often done in great works of this kind, the making of the direct-line deep cut might be deferred in the first construction, to be completed at a later time. These alternative routes makes the summit level somewhat longer, but do not sacrifice the large water supply.

Next to this the most important cutting would be through the clay hill between Kouts and Sedley. This would be 7 or 8 miles long, but would be more than 50 feet deep only for a mile or two with a maximum of about 80 feet. Here again, however, if deemed necessary, the cutting can be entirely avoided by turning the canal west just north of Kouts to Hebron and thence north past Leroy and down Deep River. (Shown by broken line d on map, fig. 2.) The divide in the valley which cuts the ridge at Leroy has an altitude of 686 feet and the projected level of the canal through this section is 680 feet.

There would also be cutting in the drift 30 or 40 feet deep for perhaps 5 or 6 miles between Wabash and Roann and occasional short cuttings between Huntington and Wabash, but not of formidable depth.

The deep cuts required if the canal were built as projected on the shortest possible line would not be justified in the construction of a small canal, but they are entirely within the measure of surmountable difficulties and bearable and justifiable expense for a deep waterway or ship canal constructed by the National Government, or by the National Government and the local States combined—a canal serviceable chiefly as a highway of national commerce rather than for local purposes, and presenting possibilities of incalculable advantage for military purposes in times of war.

It seems certain that the difficulties of construction along the projected line, including the deep cuts, are not such as would lead the National Government to deviate from the direct course laid out. Even if, as might seem best, the canal be given a depth of only 14 feet at first, its course ought to be laid out with a view to possible future enlargement to a ship canal 21 or 24 feet deep, or equal to the deepest canal elsewhere connected with the Great Lakes. Its permanent works, its locks and terminal facilities in particular, ought to be built in the first place for a ship canal, and should therefore be of large size and so arranged as to be easily made double in the future at each locality. The prism of the canal (its depth and width) between the locks could readily be enlarged at a later time, if found necessary. But the rebuilding and enlargement of locks would be troublesome and very expensive.

THE LONG SUMMIT LEVEL AND THE LARGE WATER SUPPLY MADE AVAILABLE BY IT.

There are many advantages in the very long summit level proposed for this canal. Its length of 100 miles or more makes it possible to bring in more streams and a greater quantity of water at the summit than could possibly be obtained on any other summit level in the region traversed. The long summit level would touch or cross the St. Marys and St. Joseph rivers at Fort Wayne, the Eel River below Roann, and the Tippecanoe River below Rochester. It would also pass within comparatively easy reach of the Yellow River near Lake Maxinkuckee and the Wabash and Salamonie rivers near Huntington. At Mr. Leverett's request of Mr. M. O. Leighton, Chief of the Hydrographic Division of the United States Geological Survey, furnished the following official data on the quantity of water available for the summit level of the proposed canal from the first five rivers named.

MICHIGAN AND ERIE CANAL (VIA FORT WAYNE AND ROCHESTER).

Water supply required for 50 complete lockages (100 single lockages) per day for summit level, elevation 750 feet above sea level, length about 100 miles. (Depth of canal supposed to be 14 feet, or deeper.)

Locks 348 by 69 by 16 feet, water contents, 384,192 cubic feet; 100 lockages per day, in round numbers, 38,400,000 cubic feet; add 10 per cent for leakage, in round numbers, 3,800,000 cubic feet; total, 42,200,000 cubic feet; equivalent to 490 second-feet (cubic feet per second).

Drainage areas tributary to summit level: Upper Eel River, above Laketon, 480 square miles; Tippecanoe River, above Fulton-Pulaski county line, 760 square miles; Yellow River, above Marshall-Stark county line, 260 square miles; total, 1,500 square miles.

These are the figures furnished by Mr. Leighton. But by placing the dam on Eel River at Roann a further area of about 100 square miles may be added to this figure for Eel River. This would make the total 1,600 square miles. Mr. Leighton states further that the mean flow for the lowest months in each year for four years at Delphi, Knox, and Logansport is 0.29 second-feet per square mile. This multiplied by 1,600 gives 464 second-feet. The mean flow for the lowest month of the St. Marys River at Fort Wayne is 40 second-feet. The mean flow for the lowest month of St. Joseph River at Fort Wayne is 150 second-feet. This gives a total available low-water flow of 654 second-feet. Subtracting 490 second-feet, which is needed for 50 complete lockages per day, plus 10 per cent for leakage, there remains an excess of 164 second-feet without resorting to storage.

Such a showing as this from only the convenient streams and without any resort to storage or the bringing in of water from more distant rivers gives sure ground for faith in the future of this canal as a deep waterway, especially when it is realized how much and how easily this can be increased. Later Mr. Leighton furnished additional data on the amount of water that could be obtained through a feeder from the St. Joseph and Elkhart rivers at Elkhart by the way of South Bend to the summit level near Lake Maxinkuckee.

The drainage area of Elkhart River above Elkhart is 700 square miles; that of the St. Joseph River above Elkhart is 2,160 square miles, making a total of 2,860 square miles. The lowest month at Elkhart between 1901 and 1906 was September, 1906, at which time the flow was 1,565 second-feet. This is 2⅓ times as much as the amount obtained from the combined five streams mentioned above. Adding this to the 654 second-feet from the other streams, the total is 2,219 second-feet. This is enough for 50 complete lockages per day with locks twice as long, twice as wide, and twice as deep as those given by Mr. Leighton, and still leave 259 second-feet in excess. Such a lock would be 696 feet long, 138 feet wide, and 32 feet deep. It would use 4 times as much water at each operation as the one described by Mr. Leighton, or 247,400 cubic feet more water than the Poe lock at Sault Ste. Marie.

But this is both wider and deeper than would be needed for a ship canal of the most liberal capacity, according to present ideas. The locks of the Panama Canal are designed to be only 110 feet wide. By cutting off some of the width and depth of the enlarged lock described above and adding an equivalent volume to its length, the lock could be made equal to the largest locks now in use, or considerably larger if need be. It could easily be made of the same dimensions as the Poe lock, the largest of the locks at Sault Ste. Marie, which is 800 feet long, 100 feet wide, and 21 feet deep on the miter sill. The large, new Canadian lock is 900 feet long, 60 feet wide, and 21 feet deep. The United States engineers are said to be now planning to build a new lock at Sault Ste. Marie 1,300 feet long, 80 feet wide, and 24 feet deep.

There are a few other streams that can be brought into the summit level without much difficulty. The Wabash River could be received at a point above Huntington, and the Salamonie could be conducted over to the Wabash quite easily and brought in with the latter stream. The Mississinawa could also be made to contribute, but not so easily. At the time of this writing no official figures are at hand to show the amount of water which these streams would yield. But on a conservative estimate by comparison of the drainage areas with that of the St. Marys River it seems safe to say that the Wabash River near Markle would yield about 40 second-feet; the Salamonie near Warren, 30 second-feet; and the Mississinawa below Marion, 45 second-feet, making a total for the three streams of 115 second-feet. This, added to the previous amount, would make 2,334 second-feet.

Something more could also be added to the water supply from rivers by diverting the headwaters of certain streams in southern Michigan into one or the other of the two St. Joseph rivers. At a point about 15 miles southeast of Hillsdale, Mich., where the eastern St. Joseph turns from southeast to southwest, there is an old abandoned river bed coming from the Tiffin River, about 3 miles northeast. It would be a very easy thing to divert the upper part of the Tiffin to the St. Joseph through this old channel, and by carrying a feeder canal northeast along the side of the eastern slope for 20 to 25 miles farther, several of the upper branches of the Raisin River could also be captured. The drainage area thus divertible to Fort Wayne would be about 300 square miles. In the same way some of the upper branches of the Kalamazoo River could be diverted to the western St. Joseph, so as to enter the feeder at South Bend. This would amount to about 200 square miles. The 500 square miles of these two areas would yield about 145 second-feet, making the total from rivers 2,479 second-feet. Besides these it is possible that one or two of the head branches of Grand River, near Jackson, could be brought in. Something would also be received from several smaller streams, like the tributaries of Little River, east of Huntington, and others to the west. If a summit-level feeder were built to South Bend, it would capture a number of small streams. These put together would certainly bring the possible grand total from streams up to 2,500 second-feet. All this is from streams alone and represents approximately the amount possible to derive from the available rivers at low stage.

WATER RESOURCES AVAILABLE BY STORAGE.

The possible resources for water supply from storage in lakes and reservoirs are not included in the above estimates. Ordinary maps on a large scale show 50 to 100 lakes in northeastern Indiana. Prof. Charles R. Dryer, who surveyed six counties in the northeastern corner of the State for the state geologist in 1886, says that, counting large and small, there are probably a thousand lakes, and there are probably half or two-thirds as many more in southern Michigan which could be drawn upon through the rivers mentioned above. The water that might be stored in these lakes if developed to a maximum can not be stated, but would certainly be very large—surely enough to double or more than double the supply available from the streams alone. When to this is added the further possibility of making almost as many artificial reservoirs in this area as there are existing lakes, there can be no longer any doubt whatever that there is available, if fully called into use, water enough for any magniture of ship canal that can now be foreseen as a possibility and for any degree of activity which seems likely. The region of the small lakes is a hilly, moraine country with many valleys and ravines, and is very favorable to the making of artificial lakes. For storage purposes the existing lakes would probably not be drained off below their present levels, but would be raised a few feet by dams and then drained down only to their present levels. According to Mr. Cooley, 3 to 4 per cent of a given area made into lakes or reservoirs will equalize the flow of the streams from that area.

The foregoing is simply a picture of what is possible in the way of a maximum water supply for the long summit level of the proposed canal. The facts stated ought to dispel forever all doubts as to the

sufficiency of the available supply. Of course, in practice nothing like all this possible supply is likely to be drawn upon at once. Much of it may be better employed for other purposes, at least for the present. The amount diverted to the canal at any given time would probably not be very greatly in excess of that which would be needed to operate the canal, though some considerable excess is highly desirable for the sake of the water power that can be developed from it. If the canal is built at first with a depth of 14 feet, the water for it would probably be drawn from the first five rivers named, with the Wabash and Salamonie added, and these would probably be supplemented by a moderate development of storage as a reserve resource against any possible shortage from the rivers. The long summit level would itself have an enormous reservoir effect. It would be like a large lake. If feeders from South Bend and Elkhart and from the Wabash and Salamonia rivers were run at summit level, the total length of the whole level would be close to 200 miles, with corresponding extension of reservoir capacity. This is one of the most desirable of all things for any great canal.

WATER POWER.

One of the most important benefits to be derived from a canal like that proposed is the development of water power. In Illinois, where the supply of water is practically unlimited and the canal of large capacity, it is designed to develop a great amount of water power under the control of the State and to devote the proceeds to the cost of running and repairs and also to contribute much toward paying the original cost of construction. It is estimated that the water power there will be worth about $3,000,000 per year. The proposed Michigan and Erie Canal would afford splendid facilities for developing water power at many places—particularly at Huntington, Wabash, South Bend, Elkhart, near Lake Michigan, and at Maumee—and the revenues thus derived should be applied to the expense of running and repairing the canal. The water powers already developed on the St. Joseph River, near South Bend, are not nearly so advantageously located as they would be if the water were drawn from this canal at South Bend at an altitude of 750 feet (30 feet above the city). But while water power is a very important consideration in connection with canal building, it is not the most important. Measured by the rule of the greatest good to the greatest number, it is certainly true that the water of the rivers and lakes confers a much greater benefit upon the people as a whole when used in aid of commerce in canals and canalized rivers than when used for the development of power by cities, corporations, or individuals.

A great saving in the amount of water required to operate locks can be made by any one of several methods; by hydraulic elevator or lift locks, like those on the Trent Canal at Kirkfield and Peterborough, Ontario; by pneumatic-lift locks, or by side-chamber locks. Where the water supply is small, such locks make operation possible with only a small fraction of the water needed for the old method. When the water supply is adequate or large, the use of such locks would enable a much larger portion of the water to be used for the development of power.

CONNECTING CANALS.

When the Michigan and Erie Canal is built it will be joined by several important connecting lines. Chief among these is the Miami and Erie Canal, which connects Cincinnati with Lake Erie at Toledo by way of Defiance. This canal is still in use and needs only moderate enlargement to do excellent service as a barge route to and from the middle section of the Ohio River. It would be particularly serviceable for bringing coal from West Virginia and Kentucky and southern Ohio to the North and Northwest, especially if the proposed ship canal gave it direct connection from Defiance to Chicago.

Another important connection would be the Wabash and Michigan Canal connecting with the Wabash Valley. It seems certain that the Wabash River will be canalized up to Lafayette or Wabash, and then it would be an easy matter to carry a connecting line up the lower Tippecanoe and the Monon to join the Michigan and Erie Canal. At Wabash the ship canal could easily be joined again from the Wabash River, so as to bring about in effect a restoration of the old Wabash and Erie Canal, but with much greater capacity and utility. By canalizing White River and the Mississinawa, Indianapolis and other cities of central and southern Indiana can be brought into connection with the ship canal and receive the benefits of connection with lake navigation. These smaller branch canals, chiefly for local commerce, are proper objects for contruction by the State rather than by the National Government.

Another important branch line would be one extending north from near Lake Maxinkuckee to South Bend and Elkhart. This could be made at summit level throughout and without locks, thus adding largely to the reservoir capacity of the summit level. This branch, even if built primarily as a feeder, might as well be made navigable to serve the commerce of the cities mentioned, and also to give them the most effective development of water power.

The Wabash and Michigan Canal is certain to be built in the near future, even if the main ship canal is not. When it is completed, the advantages of having a connecting line between it and the Miami and Erie Canal at Defiance, substantially on the line here projected, will become so great that the people will soon regard it as a positive necessity. But instead of allowing construction to take this course and building the middle link afterwards, making the canal one of relatively small capacity, as would certainly be the case if constructed in this way, it would seem the part of wisdom and economy to build the main ship canal as here projected first. After that is finished, or decided upon, a system of inland waterways for Indiana can be planned to better advantage in relation to the ship canal.

FOR MILITARY STRATEGY.

The dominant thought in the minds of the people in urging the construction of this canal is to serve the purposes of trade. But there is another reason for building this canal, which is of the highest importance from a national point of view. A glance at figure 1 will show that when the Canadians have made their St. Lawrence-Ontario canals 21 feet deep and perhaps, also, their Trent Valley Canal, and still more when they have made their Ottawa Ship Canal 24 feet deep, which they can easily do, and ought to do, and for which there is an abundant water supply at summit level, then Canada or any other power controlling her territory would have a tremendous advantage in naval operations on the Great Lakes. Even when the Erie Canal in New York is made into a ship canal, the problem of defense in the Great Lakes will only be partially solved, for it will be still necessary for war ships wishing to go from Lake Erie to Lake Huron or from Lake Huron to Lake Superior to pass through the connecting rivers which form the international boundary. An alert enemy could easily make such movements impossible.

If the Michigan and Erie Canal here proposed were made into a ship canal, war vessels could easily pass from Lake Erie to Lake Michigan and from this into Lake Huron in our own territory, and without coming in contact with the foreign border. There is also an easy route for a canal from the north end of Green Bay to Lake Superior at Au Train. This canal would need to be only 38 miles long, and would be of great service to commerce as well as for military purposes. It would save 250 miles or more on every trip between Duluth or the iron or copper country and Chicago. If it were made into a ship canal it would give safe access for war ships to Lake Superior also, and the Canadians could not match it by an independent canal on their side. While there is no present reason to build canals for military purposes, yet the Canadians are building canals which will give them or anyone controlling their territory naval access to the Great Lakes and leave us absolutely helpless, unless we build ship canals on our side. This canal ought ultimately to be made into a ship canal for this reason, if for no other, and having been so made it would be much more efficient for canal barges, especially for large ones, as well as providing a channel for lake and ocean going steamers.

THE VALUE OF THIS CANAL IN "THE GRAND STRATEGY OF TRADE."

The full value of this canal to commerce is not easy to realize at the present time, because we are not familiar with the type of carrier which will almost certainly be used when our great canals are built. It is impossible to believe that when the canals are ready American inventive genius will long delay the evolution of a carrier which will give the utmost efficiency and cheapness of transportation and be perfectly adapted to the waterways. It seems certain that the cheapest possible transportation, where waterways are suited to their use, is the large canal barge without motive power—a barge carrying 3,000 to 5,000 tons or possibly even more, to be used in small fleets and towed either by a small tug or by another barge with power, or else propelled by electric power drawn from a wire on the canal bank. It is not economical to carry the bulky freights in single steamships that make fast time. Speed is costly, and the more of it used the greater the cost. Such freights are now carried to some extent in this way on the Great Lakes, because under present conditions there is no cheaper way available; there are no great canals with barge fleets specially adapted to them. If canal barges are to be made fit for towing across the open lakes, where they would be exposed to storms, they must be made a little heavier and stronger than for canal traffic alone. This would have to be done for barges that must be towed the length of Lake Erie, and would, of course, add a little to the cost and weight of the barge. But the effect of this on rates of transportation would be so small that it would not detract seriously from the advantages of the canal barge traffic.

Nevertheless the need of a continuous large-barge route without open-lake travel between the East and West may ultimately lead to the building of a barge canal along the south side of Lake Erie. From Toledo to Lorain such a canal would be easy to make at lake level near the shore. From Lorain to Buffalo it would be more difficult, but will no doubt be undertaken at some time in the future.

While barges for routes without open water would not need such strengthening, there is one important circumstance of our future commerce which will require many barges to have this strength. The coastwise coal trade is now carried on largely in motorless barges towed by tugs, and much other trade might be done in the same way. If the Erie Canal and the canal here proposed were now in use as deep waterways a large traffic in barges without transfer or breaking bulk would surely be carried on between the lake region of the interior and the cities of the Atlantic coast.

Such barges would need sufficient strength for marine towing, and those fitted for this trade would likewise be fit for open lake traffic. When the Atlantic and Gulf coast canals are built this traffic will become a great thing, and the barges in this trade will need the same strength for towing on Chesapeake Bay, Long Island Sound, etc., as on Lake Erie. When the main deep waterways now planned are completed, it seems certain that the great bulk of our domestic trade in fuel and raw materials will be carried on in this way, for it would make available the cheapest possible water rates. The building of the Michigan and Erie Canal, especially as a deep waterway or ship canal, will hasten that time, and when that time comes this canal will be indispensable. Single lake or ocean steamers could not compete with this traffic, unless they were going abroad or on some course where the towed barges would not be safe or satisfactory.

Single steamers with speed of 12 to 15 miles per hour would hardly find any advantage in using the canal so long as the Straits of Mackinac were open. But on the average the canal would be closed by ice only fifty to fifty-five days, or about half as long as the northern straits. Unless steamers could go about 7 miles per hour in the canal, they would gain no time in the canal as compared with the northern route. Such speed would require the canal to be a real ship canal with revetted banks. Seven miles an hour is the speed now used in the Suez Canal. At 5 or 6 miles per hour, which ought to be possible in the proposed canal, a steamer would lose but little time and would save considerable fuel and all risk of storms on the Lakes. With the canal open and the northern straits closed, the canal would be of the greatest service to single steamers, but at other times the advantage for them would be slight either way.

But it must not be forgotten that the lowest possible water rates for the east-and-west long haul can not be attained until the Toledo, Fort Wayne and Chicago canal is built and given the depth and capacity of a ship canal. Rates on the east-and-west route can not equal or even approach those on the Mississippi until this is done. And further, the lowest rates can not be attained in single steamers, but only in canal-barge fleets. The savings which this canal will bring by the use of barge fleets and steamers with consorts will be so great that the canal will become indispensable.

According to the latest estimates, the average cost of carrying freight on the Great Lakes is 0.85 of a mill per ton per mile. At this rate it would cost 34 cents to carry 1 ton 400 miles. That is to say, this represents the possible average saving on every ton of freight between Chicago and Lake Erie ports if the proposed canal were available. For a ship carrying 2,000 tons this means a saving of $680; for one carrying 5,000 tons, $1,700; for one carrying 10,000 tons, $3,400; for one carrying 12,000 tons, $4,080. There are now about twenty-five 10,000-ton ships on the Lakes and 8 or more of 12,000 tons, employed chiefly in carrying iron ore, coal, and grain. The ships now being built are chiefly 6,000 tons or over.

These are the savings that would be accomplished in single steamers if they could go through the proposed canal at full speed. But the speed of barge fleets and of steamers towing consorts in the open lake is about the same as that of a barge or a barge fleet in a large, deep canal. Hence, with these means of traffic the saving of time by going through the canal instead of the northern straits would be equal to the

difference of distance on the two routes. In barges and consorts, therefore, the above figures represent the saving which would actually take place by the canal route. But the real saving would be still greater, because the rate would surely be less than 0.85 of a mill per ton-mile, for there would be smaller crews, less supplies, less fuel, and less risk from storms. The rate might be expected to fall at least 0.5 of a mill per ton-mile.

Coal is hauled from Cleveland to Chicago in the summer in boats of all sizes for from 40 to 50 cents a ton—sometimes for less. The distance by the present water route is a little more than 750 miles. The proposed canal would save 400 miles of this distance, or slightly more than half, and coal would then be hauled for half or somewhat less than half what it is now, if carried in large canal barges. In the fall, when the grain trade is on and boats are scarce, it sometimes costs from $1 to $1.10 a ton to carry coal to Chicago.

Some idea of the value of this canal to Chicago trade may be gathered from the following figures. In 1905 the total lake tonnage entering and leaving Chicago amounted to nearly 15,000,000 tons. It is probable that three-fourths of this was bound to or from Lake Erie ports. But to avoid any overestimate we may assume that only two-thirds of it was so bound. At the average rate per ton quoted above and with open lake transportation it would cost $3,400,000 to carry 10,000,000 tons 400 miles. Of course the saving in the case of lake and of ocean steamers would be slight, if anything, because of the reduced speed which such vessels would have to take in going through the canal. But more than this will be saved when the traffic is done in barges.

When the Lakes-to-the-Gulf deep waterway is built and a network of inland waterways is constructed in the West, when the Atlantic Coast Canal is ready, and the Erie Canal is made a deep waterway to the sea, the traffic at Chicago will be many times the figures here given. And it would certainly not be long before the saving accomplished by the Michigan and Erie Canal would amount to ten or twenty millions of dollars a year, and this will much more than reimburse the people for building the proposed canal and making it large and deep.

It would be a grave mistake, however, to look upon the saving in freight charges made possible by this canal as being the sole or principal benefit which it would bring and to regard this benefit as measured by so many dollars in the pocket of each particular shipper. The benefits of the canal reach far beyond this. It would benefit all of the people. The savings arising from its use would be distributed through all the trade and business of the Middle West. It would affect directly the prosperity and welfare of all the agriculture, mining, and manufactures throughout the whole region. Raw material could be brought in more cheaply and manufactures carried out more cheaply, both processes enabling the Middle West to enter seaboard and foreign markets which are now inaccessible. It is simply impossible to calculate the effects which such a stimulus would have upon life and business in the Middle West. It is not so much in the dollars and cents which can be definitely measured that the great benefit of this canal will come as in the general and widely distributed stimulus of trade and industry that will affect all prices and give everybody a better chance at the world's markets, and therefore a better hold upon prosperity.

The States comprising the Middle West are no doubt capable of sustaining 100,000,000 people, or, say four times their present population. They can not attain to their normal growth and prosperity under present conditions of transportation, and the completion of the Lakes-to-the-Gulf deep waterway, while doing much to open the gates of foreign trade to the Middle West, will not afford the relief which an effective eastward outlet will furnish. But to be effective, this outlet must be deep and as short as the best all-rail route. The normal route of transportation for European trade and for eastern seaboard trade with the Middle West is on east-and-west lines.

A CANAL FOR NATIONAL RATHER THAN LOCAL COMMERCE.

While this canal would be of incalculable benefit to Chicago, Toledo, Fort Wayne, and other cities along the line, and to Cincinnati, South Bend, Terre Haute, and other cities on connecting lines, it would be a profound mistake to urge its construction on the ground of benefits to any particular place. By far the greatest value the canal could ever have would be its service to national commerce, and especially in affording the cheapest possible transportation between the Middle West and the eastern seaboard.

When they have examined this project carefully and weighed all its benefits and advantages against the cost of its construction, all the cities along the line and its branches and, in fact, all the people of the Middle West will unite in demanding its construction. But because this canal will perform so great a service to national commerce does not by any means prevent it from being of the greatest service locally. And while these local benefits are not the first thing to consider, they are nevertheless of great importance. No doubt there are special interests that will fancy themselves injured by such a canal, but such injuries are mainly fanciful, will be only temporary, and the very same interests will in the end be greatly benefited. It has been said that certain interests in Chicago are opposed to such a canal having its terminus at South Chicago, and there are some that strongly oppose the construction of a canal westward from South Chicago to the Drainage Canal at the Sag, on the ground that it would divert business from Chicago. It is a pity that such narrow ideas should have any lodgment in the minds of a people so justly renowned for broad, liberal, and progressive views as the business men of Chicago. For no matter where the terminus of the canal is located in the Chicago district, that city will control as much of the trade as she desires, and will get far greater local advantages from the canal than will any other one place.

Even with Chicago's lake commerce as it is to-day the people are grumbling continually in the press about the "bridge nuisance." What will they do about that when the river traffic becomes several times what it is now? It is absolutely certain that Chicago will be as glad then to have a canal from the Sag to South Chicago that will relieve the congestion of boats in the Chicago River as they are to-day to have the Belt Line Railroad around the outside of the city to relieve the city railroad yards of the great traffic that is passing through without stopping. But whatever Chicago wishes in this regard can be done when the canal is first built, leaving the ultimate connections and adaptations to be developed later.

The idea of this canal was in the minds of some of the business men of Chicago two or three years ago, as is shown by the following quotations from the report of the deep waterway committee of the Chicago Commercial Association, 1906:

"Should a ship canal be constructed from Lake Michigan to Lake Erie, as your committee believes it will be in the near future, it would give an all-water route between the West and the seaboard practically the same in length as that by rail. The cost of this work would not exceed $200,000,000, but it would enhance by billions of dollars the actual value of the real estate, commercial and manufacturing interests of the great Middle West.

"There does not seem to be any valid reason why a government as rich and resourceful as our own should not expend the required amount for the benefit of the people and the internal commerce of this section of the country. It would give the Middle West an eastern waterway open for two months longer each year and remove a restriction upon it for that period during which the Straits of Mackinaw are icebound and be of advantage to both East and West."

It seems certain that a canal 14 feet deep on the proposed route would cost little more than half of this; but of course cost increases rapidly with depth.

The most important carrier of the future between the West and the seaboard will not be lake or ocean ships, but canal barges of large tonnage; for they are much cheaper to build, require smaller crews, and consume much less coal per unit of tonnage than ships. This has been proven in Germany. The cheapest carriers are barges without motive power, to be towed by tugs or other power barges. The true solution of the transportation problem is in making the main waterways suited to large barges. But waterways large enough for barges of 5,000 tons or more would accommodate ships also if they chose to enter. As has been the case with both railroads and ships, the improvements of the last thirty or forty years have reduced freight rates to one-third and one-fifth of what they were, respectively, so great canal barges, like those named, have not yet been used anywhere, and we may expect cheapening improvements in them as well as in railroads and ships. Improved facilities for loading and unloading will also go far to reduce and minimize the cost and delay of transfer.

NEW YORK AND THE CANADIAN CANALS.

The benefits of this canal, however, are not confined to the Middle West. New York and other seaboard cities would also be greatly benefited. If the people of New York City have any doubt of the value of this canal to them, let them study figure 1 of this pamphlet and consider the following facts: The Canadians possess the natural, the best, and by far the easiest and shortest lines of connection between the Great Lakes and the sea—the St. Lawrence canals from Montreal up to Lake Ontario and the Welland Canal from the latter to Lake Erie; the Trent Valley Canal, affording a remarkably short route from Chicago and Duluth through Georgian Bay and the Trent Valley to the east end of Lake Ontario and the head of the St. Lawrence canals.

And last and best, the Ottawa River route from Georgian Bay through French River, Lake Nipissing and the Ottawa River to Montreal. This last is in truth the best of all ship-canal routes from the upper lakes to the sea. This route has been surveyed and will require only about 29 miles of actual canal construction to be ready for use—so large a part of it is now in its natural state ready for navigation without improvement. Its summit level can be made at least 75 miles long, including Lake Nipissing, and there is an abundance of water supply for any capacity of ship canal that may be desired—even of 30 or 40 feet depth, if need be. Of these two northern Canadian routes the writer is speaking partly from personal observation, having been over a large part of both, including their summit-level reaches. The distance is 300 miles shorter from Mackinac Straits to Troy, N. Y., through the Trent Canal than through Lake Erie. While this canal, with its present depth of only 7 feet, is not an important factor, it might be if it were deepened. But a ship that is bound from Chicago to Europe, having reached Mackinac, would hardly come down to Lake Erie and New York City; it would take the much shorter Ottawa route directly to Montreal and the Gulf of St. Lawrence.

By this route it is only 20 miles farther from Chicago to Montreal than from Chicago to Buffalo. Does New York wish western trade to take this route? Does Chicago wish it? The plain truth is that even if the Erie Canal be enlarged to a ship canal, it will still be only partially potent to pull western traffic to New York. It can not do this until the Michigan and Erie Canal is built and made of equal capacity to the Erie Canal in New York State, so as to dispense with the long detour through the northern straits. Thus the proposed canal is in effect a westward extension of the Erie Canal itself, and is indispensable to its complete utility. If New York City has any earnest desire to have western commerce pass through its gates rather than through the gates of Montreal, it must have the Michigan and Erie Canal with capacity equal to that of the Erie Canal, and there is an ample water supply available to make it so.

The Erie Canal ought to be made a ship canal, not for ships and military purposes alone, but for the much more efficient service it would then give to traffic in canal barges and barge fleets.

Some have said that New York does not want the Erie Canal made into a ship canal, because trade would go directly to Chicago without stopping in New York. But this is a narrow, unworthy view of the matter. The prosperity of New York, so far as it is dependent on the Middle West, does not rest on New York's ability and opportunity to stop and levy tribute upon all the commerce to and from that section. New York will derive far greater benefits from the general growth and prosperity of the Middle West and the resulting increase in its wealth and activity in trade than it will from any system of tribute.

The following facts should also be of some interest to New York people: From Chicago to New Orleans by the route of the proposed deep waterway (canal from Chicago to St. Louis, and also from St. Louis to Cairo; Mississippi River, by its winding course to New Orleans) is a distance of a little more than 1,500 miles. It is 96 miles farther to the Gulf at the jetties, but New Orleans is the port. By the present water route from Chicago to New York City it is a little more than 1,400 miles. The proposed canal will cut 400 miles off the last figure and make the distance from New York to Chicago about 1,000 miles. Will New York throw away this advantage? Does not the Middle West need this canal for that part of its great east-and-west trade which can not be profitably diverted to the Mississippi and the Gulf? In truth New York ought to be as enthusiastic for the construction of the Michigan and Erie Canal as the Middle West is for the enlargement of the Erie Canal in New York State. Any device that will bring the Middle West 400 miles nearer to New York City and Europe is surely a thing worthy of consideration.

The people of Fort Wayne who originated and are strongly pushing the project for this canal are not basing all of their enthusiasm on the benefits that would accrue to Fort Wayne. They believe the canal to be a necessity for national commerce, and after the Mississippi River and the Erie Canal in New York State, they believe it to be the most important canal yet suggested for national trade. As to choice of the route they believe that the best and only feasible route for a great, deep waterway or ship canal passes through their city, but they will not insist upon that. They are willing to abide by the decision of competent engineers after a careful survey. If it is found that a better

route for the canal would pass over the hill 10 or 20 or 40 miles north of Fort Wayne, they are willing to abide by the decision. In that event Fort Wayne can easily establish connection with the canal by a branch line. What the people along the proposed canal route are asking for now is a careful survey of the line by the National Government.

This pamphlet is published by the Toledo, Fort Wayne and Chicago Deep Waterway Association, of Fort Wayne, Ind. Its officers are Hon. Perry A. Randall, president; Hon. T. J. Logan, secretary; with a committee of 500 and an active membership of more than a thousand. This organization is not for a day, but is permanent, and intends to use every honorable available resource to promote the interests of the proposed canal. The general subject of inland waterways and deep channels to the seaboard is one of incalculable importance to the American people, but could not be given space for adequate treatment here. It is admirably discussed in addresses by Mr. S. A. Thompson, field secretary of the National Rivers and Harbors Congress, to whom the writer is indebted for much valuable information.

Anyone wishing a copy of this pamphlet can obtain the same by applying to T. J. Logan, secretary of the Toledo, Fort Wayne and Chicago Deep Waterway Association, Fort Wayne, Ind.

I further desire to call your attention to some of the causes or reasons why this route has been selected in preference to other lines that have been suggested or proposed in bills presented to the Sixtieth Congress. The first essential thing in the construction of a canal is plenty of water, and in order to have plenty of water to permit of large lockage of vessels, it will be necessary to secure the longest possible summit level, which gives the largest area by which to secure the water supply. The route proposed by the Fort Wayne Deep Waterway Association, above mentioned, will permit of a summit level of about 110 miles in length without a lock, making an unusually large area by which water can be furnished for lockage purposes.

This summit level is nearly a hundred feet lower than the summit level on the line proposed in the bill drawn by Mr. ANSBERRY, of Ohio, and nearly three times as long, the summit level in the Ansberry bill being about 38 miles in length and nearly a hundred feet, as above said, higher, which shortens the length by which water can get into the canal and materially lessens (because of its altitude) the area of square miles over which the water can be drawn. The route selected in the bill by Mr. ANSBERRY would be able to obtain water from about 700 to 800 square miles in area, and at the same time require nearly twice as many locks in construction, which would necessarily mean a great delay and loss of time through lockages and wonderfully enhance the cost of construction. On the other hand, the route proposed by the Fort Wayne Deep Waterway Association under the above-named resolution, because of its being nearly a hundred feet lower in summit level, would very materially increase the area for securing water supply.

This summit level would secure water from an area, without any particular outlay and by natural drainage, of over 3,000 square miles, and if needed could be greatly enhanced as the usage of the canal would increase the demand for water for lockage purposes; and the fact that it is a lower level makes it much cheaper to build and maintain. This is the line that we believe is the feasible one and will prove adequate for the needs of future development in transportation. There is no doubt that a small barge canal could be built over the line proposed in the Ansberry bill, but we should construct the line not only for to-day, but that it shall be adequate also for the necessities of the future.

For this reason the Fort Wayne Deep Waterways Association have selected the plans and the line for the waterway that will prove the most feasible and adequate for the needs of the present and the necessities of the future.

There are other reasons that might be brought forward and presented to the attention of this body to prove the logic of the economical construction over this line, but I feel it is not necessary, as the presentation of the facts already mentioned concerning the altitude, the length of the summit level, the large increased area of water supply, the ability to secure it at the summit level, and the economy of construction and of maintenance are so fundamental and primarily essential and so economically attained, that they appeal so conclusively to the engineer, that it needs no further argument.

In conclusion, I wish to reiterate the fact that the great railway men of our country see the need of early construction of essential waterways, and are raising their voices in strong appeals to the men of our Nation to take up and press forward this much-needed auxiliary for transportation. This means economy and the saving of wealth to both the producer and the consumer. We all know, if we pause to think, that the producer and the consumer pay the bills, for, in the last analysis, they pay all.

They pay the iron bill, the real-estate bill, the coal bill, and as long as we will permit it we will pay the water in the stock. Is it business economy to continue to pay much more for transportation privileges than proper business care can prevent? Is it wise to continue an enormous building of railways for transportation purposes when they can only last for a comparatively few years, until they must be renewed at enormously increased expense and vast waste or cost of natural resources, or to pay much less for a more effective and permanent method which is open for general competition? The construction of this canal will greatly increase our wealth by economy in outlay and the natural conservation of the nation's unmined wealth. May this body be able to see with a clear vision the immediate need and the early necessity for the construction of this canal, which will prove of everlasting benefit and strength to this great Nation.

[Mr. DRISCOLL addressed the House. See Appendix.]

Mr. SCOTT. Mr. Speaker, I yield two minutes to the gentleman from Alabama [Mr. UNDERWOOD].

Mr. UNDERWOOD. Mr. Speaker, I have always heretofore been in favor of what is known as the "Southern Appalachian Mountain Reserve," but I am opposed to this bill because it carries a fraud on its face. It says it is a bill for acquiring forests in Southern Appalachian and White Mountains, and, as a matter of fact, it creates a roving commission known as a "forest reserve commission" and gives them an unchecked authority to expend $19,000,000 anywhere they want in the United States, without restraint of Congress or anybody else. For that reason I am opposed to this bill. The whole sum and substance of it is this: Congress attempted to establish two national forest reserves, one in the Southern Appalachian chain and the other in the White Mountains. We have attempted it for years. There is a sentiment in the country behind it, but instead of that they come here and propose to create another roving commission——

The SPEAKER. The time of the gentleman has expired.

Mr. MOORE of Pennsylvania. Mr. Speaker, I propose to vote against this bill, not because I do not favor the conservation of our natural resources, which I do, but because I am not sure that the Federal Government should relieve the several States of their responsibility of protecting their own forests. The wanton destruction of trees in many of the States has been a state as well as a national disgrace. Such destruction has been notorious and lamentable. The States that have permitted it to be done are reprehensible; but many of the States have not permitted it to be done, and these should not be held chargeable for the negligence or prodigality of the others. I gravely question whether the relationship between forestry and inland waterways is sufficient to induce us at this time to enter upon the scheme of state paternalism, an oversight which this bill proposes.

The development of inland waterways is a direct aid to commerce and in the nature of an investment as between the States in which the benefits are mutual and equally proportioned. Waterways are avenues of commerce, freed to the people of all the States. The purchase and control of forests erects an establishment of an entirely different character.

We should also remember that government-owned forests in small European countries mean government-controlled sawmills and government-controlled stores and warehouses. I doubt the propriety of our going into the lumber business as a national proposition. The United States is too large a country for that.

Mr. WEEKS. Mr. Speaker, I yield five minutes and forty-five seconds to the gentleman from New Hampshire [Mr. CURRIER].

Mr. CURRIER. Mr. Speaker, the gentleman from New York [Mr. PAYNE] asks why we do not do this and why we do not do that. I would like to ask him why he does not discuss the bill before the House instead of some creature of his imagination. The gentleman must know that the utmost that can be appropriated under this bill is $19,000,000, and that distributed over a period of ten years. Yet the gentleman talks about it costing hundreds of millions of dollars.

Mr. HUMPHREY of Washington. Will the gentleman yield for a question?

Mr. CURRIER. "The gentleman" will not yield. The House has heard that talk before from the gentleman from New York when he stated that the Reclamation Service would cost this Government more than $700,000,000. The gentleman from California [Mr. SMITH] is appalled at the amount carried in this bill. Nineteen million dollars distributed over ten years for reserves in all of the great country east of the Mississippi River; and in the country west of the Mississippi River there are to-day federal forest reserves worth fifteen hundred millions of dollars. [Applause.]

Every federal forest reserve in this country, except the one at the headwaters of the Mississippi, is located west of that river. Every argument in favor of reserves in the West applies with at least equal force—I think with greater force—to the reserves in

the East. Whatever criticisms, caused by the peculiar conditions, there may be in the West of the policy of creating forest reserves, conditions in the East, where we desire such reserves, are such that none of those criticisms will apply. Nothing but good as the result of such a policy will come to any single person in the East. In the East their establishment will meet with universal approval.

If we are to have forest reserves anywhere in this country, I submit that one including the White Mountains is as pressing, is as important, and will be as beneficial in its results as any that have or can be established. Of course, it is true that the existing forest reserves were not purchased by a direct appropriation from the Treasury. What difference does it make, however, to the taxpayers of this country whether money is taken from the Treasury or government property, easily convertible into money, and which, if sold, would inure to the benefit of all the people of the country, is taken? In many cases it would have been better economy for the Government to have purchased such lands by direct appropriation from the Treasury than to have obtained them of private owners for forest reserves by allowing such owners to exchange their lands for other lands of like character owned by the Government. I doubt if there were ever many trades of this kind in which the Government was not cheated.

The country, I take it, is definitely committed to the policy of establishing forest reserves. It can not be that this policy is to be a sectional one; that only in the West is this wise policy to be carried out, and that the South and East are to have no share in its manifold blessings. The people of the East and South, in a spirit truly national, are glad to aid the movement for the reclamation of arid lands in the far West at the direct or indirect expense of the General Government, and for the establishment of forest reserves, but we believe that the forest-reserve policy should be national in its scope. Nowhere in this broad land of ours is there more pressing need of forest reserves than in the Southern Appalachian Mountains and the White Mountains of New Hampshire.

You in the far West have a reclamation fund of many millions, which would have all been in the Federal Treasury for the benefit of all the States but for the policy which turns over all this for the direct and peculiar benefit of the people of a few Western States. It is a good policy; we all approve it. When you aid one section of the country, you, to some extent, aid all sections; but it is not gracious, to say the least, for Members from such States to oppose every proposition looking to the conservation of the national resources of the East.

In the United States it is estimated that there are 700,000,000 acres of wooded area. Of this amount, 170,000,000, or more than one-fifth, are in national forest reserves. These reserves, as I have said, are worth at least $1,500,000,000, and, with the single exception of a small reserve in Minnesota, are west of the Mississippi River. We are asking for an appropriation which, during the ten years to which it is limited, calls in all for a little more than 1 per cent of this amount for reserves east of the Mississippi River, where we feel the imperative need of forest reserves far more than you in the West. Nearly or quite one-half of all the standing timber of this country is on the Pacific slope. It was stated in an editorial in the New York Evening Post about three years ago that the rivers flowing into the Pacific have their headwaters protected by vast tracts of forests preserved from indiscriminate lumbertng, but those flowing into the Atlantic, though their present commercial use is tenfold greater, rise in regions where the commercial lumberman generally has full sway.

It is very likely true that Congress has no constitutional power to appropriate money from the Treasury to acquire lands for forest reserves except as such lands aid in maintaining the navigability of streams, and no lands will be acquired which do not serve such purpose; but if, as a necessary incident of such constitutional expenditure, great advantage accrues to the people of many States on account of the preservation of water power upon which millions of our citizens depend for their livelihood, and the forests are conserved, saved from speedy destruction, and so managed that the supply of timber may be made permanent and adequate for the wants of the people of the whole eastern part of the country for all time to come, surely no one would suggest that these enormous incidental advantages constituted an argument against the proposition.

Millions of dollars could be dispensed with in every river and harbor bill but for the fact that rivers and harbors, year by year, are filled up with silt brought down by freshets from the deforested slopes of mountain ranges. The most economical way in the world to preserve the navigability of your rivers is to preserve your mountain forests. How can any reasonable man insist that it is a constitutional, proper, and wise expenditure of money from the Federal Treasury to continually dredge the rivers and harbors located in the various States to remove the silt carried down by the floods caused largely by the destruction of the forests, and unconstitutional, improper, and unwise to appropriate money from the Federal Treasury to keep the silt from going into the rivers by establishing forest reserves which will, to a great extent, prevent these floods? Proper to dredge out a channel, but improper to prevent its filling up again! The mere statement of such a proposition refutes it.

Will the eastern forest reserves pay? Will it be a wise investment, regarded purely as a business proposition? Unquestionably. The German state forests return a net revenue of $2.40 per acre a year and the Swiss forests $8 per acre. No expenditure from the Federal Treasury at the present time will produce so certain and ample a revenue in the end as investments for the establishment of forest reserves.

The time is not far distant when the forest reserves should be in condition to return a very large net income. A royal commission in Great Britain has recently made a report on the question of creating national forest reserves. It is proposed to create by complete reforestation reserves embracing 15,000,000 acres. The work is to go on at the rate of 150,000 acres each year for sixty years, and it is estimated that at the end of eighty years the forests would return a net annual revenue of $9.73 per acre—somewhat, but not much, more than the actual return to-day of the forests of Saxony. Great Britain must create these forest reserves from seedlings, and hence the time is long before there will be much revenue. In this country we have our forests, and good management of them and a comparatively small amount of tree planting will give us a large net revenue in a comparatively short time.

Why does New Hampshire ask for federal aid? Why does not she establish the White Mountain Forest Reserve and pay the bills? New Hampshire is a small and comparatively poor State, and the undertaking is too large. Do you ask other States where rivers are being improved or forest reserves are being created or arid lands are being reclaimed to pay the bills? There is no earthly reason why New Hampshire should undertake a work at her own expense which will benefit the people of other States far more than it will benefit her own people. This is an interstate, a national, proposition if ever there was one.

Practically all the principal rivers of New England have their source, or the source of their important tributaries, in the White Mountain region, and their value for all purposes depends to a great extent upon the preservation of the forests in which they rise. This is so strictly an interstate, a national, matter that the Federal Government alone has the right and the power to take action. The interests and the welfare of Maine, Massachusetts, Connecticut, and Vermont are being most injuriously affected by the diminution of the water in their great rivers caused by the cutting of timber in the White Mountain region.

The gentleman from Washington [Mr. HUMPHREY] and the gentleman from Tennessee [Mr. GARRETT] indulged in theorizing and speculation regarding the effect of forests upon stream flow. So far as the White Mountain section is concerned, this is no longer a matter of theory or speculation. For more than twenty years the Geological Survey have been carrying on the work of stream measurement at Plymouth, on the Pemigewassett River, the main branch of the Merrimac. This river rises on the southern slopes of the White Mountains, and Plymouth is located 30 or 40 miles below the sources of the river. These measurements demonstrate that in the twenty-year period from 1886 to 1906 the low-water period increased forty days in a year.

The cuttings on the southern slopes began about the time the stream measurements commenced and have been steadily continued since. The Geological Survey have also taken the rainfall, and their report shows that that, during all the twenty years, varied very little from year to year. Nothing but the destruction of the forests can account for this marked increase in the low-water period, for above Plymouth are no swamps which have been drained and there is less land under cultivation to-day than when the stream measuremnets were begun. A witness before the Committee on Agriculture also testified that during this period, at Haverhill, Mass., on the lower Merrimac, the most destructive floods that the city had ever known occurred.

The Connecticut River rises in northern New Hampshire and the removal of the forests about this river and its tributaries has greatly affected the regularity of the flow of that river and seriously impaired its use for navigable purposes. Bars form in Long Island Sound at the mouth of this river and the Government is put to the expense of constant dredging. A bar or shoal now extends a mile and a half from the shore into the

sound, and Mr. Goodrich, manager of a line of steamships doing business between New York and Hartford, testified before the Committee on Agriculture that this bar was made up of sand with no alluvial mud in it. There is little sand in the banks of the lower part of the Connecticut River and little on the Vermont or New Hampshire shores until the upper part of the river is reached. This sand can come from nowhere else than from the deforested mountain slopes of New Hampshire.

Mr. CUSHMAN. Mr. Speaker, will the gentleman yield for a question?

Mr. CURRIER. I yield for just a question.

Mr. CUSHMAN. I was going to say we will be very glad to get rid of a large portion of the forest reserves we have.

Mr. CURRIER. And we will be very glad to take it. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. SCOTT. Mr. Speaker, I would like to inquire how much time I have remaining?

The SPEAKER. Thirteen minutes.

Mr. SCOTT. I yield five minutes to the gentleman from Minnesota [Mr. TAWNEY].

Mr. TAWNEY. Mr. Speaker, I hope that the membership of this House realizes the importance of the policy which we are asked to initiate in the adoption of this bill. The men in favor of this proposition have tried to convince the House that it is limited only to the eastern and to the southern sections of our country. Those who are influenced by considerations of locality are making a mistake. This policy is nation wide. The public sentiment that has been created all over the United States in favor of this proposition will in the future be exerted to induce Congress to appropriate the money necessary not alone to buy the cut-over lands in the Appalachian and White Mountain ranges, but to continue and extend this policy until it includes all the now worthless lands in private and public ownership from the Atlantic to the Pacific Ocean, regardless of the cost to the people of the United States.

This is but the entering wedge of a policy which means ultimately the most gigantic expenditure of any peaceful policy the Federal Government has ever embarked upon. There are cut-over lands in Minnesota, there are cut-over lands in Wisconsin, there are cut-over lands in Michigan, and later on there will be cut-over lands in every State in the United States, where the States, the woman's clubs, and private owners will all demand their purchase by the Federal Government, to be paid for from the Federal Treasury. No man, here or elsewhere, can now estimate the ultimate cost to the Government of the United States of inaugurating the policy we are by this bill asked to inaugurate. Adopt this bill and you create an immediate demand on a bankrupt Treasury of $4,000,000. But, Mr. Speaker, there is a more serious objection to this bill than the magnitude of the policy we are asked to initiate by the adoption of this bill. Never before has Congress been asked, or has Congress attempted, to amalgamate by legislation the powers of the States and the Federal Government. This bill authorizes a copartnership between the Federal Government and the States, both in the acquisition of the land and in the administration of this policy, and authorizes the Federal Government to pay into the treasury of the state governments affected by this measure, or by this policy, 25 per cent of the proceeds received from the sale of timber or the administration of this law, and then this bill attempts to limit and restrict the right of the legislature as to how that money shall be appropriated by the States and the purposes for which it may be appropriated. But, Mr. Speaker, not alone does this bill attempt to amalgamate the federal power with the state power or state authority, but it also proposes to destroy that balance between the coordinate branches of the Federal Government that is absolutely essential to its existence and the perpetuity of our institutions.

We propose by this bill to create a commission consisting of three officers of the executive branch of the Government and two Members of the legislative department of the Government. This commission is clothed with the administration of a law enacted by Congress, something that has never before been proposed, something that Congress has never before been asked to consider or act upon in the previous history of the Government. Here is a proposition that may involve the legislative branch in a controversy with its own Members in respect to administration and administrative affairs—a situation unheard of and not contemplated by those who founded the Government. I may say, that to maintain the proper balance of power between the States and the Federal Government and also the balance of power between the coordinate branches of the Federal Government, we should continue the exercise of our respective powers along the line and within the rules laid down by the men who framed and adopted the Constitution of the United States, and not consolidate the exercise of these independent powers, as proposed by this bill. [Applause.]

Mr. DAVIS. Mr. Speaker, there seems to be a misconception on the part of many who have participated in this debate that the sole object and purpose of this bill is to acquire national forests in the Southern Appalachian Mountains and White Mountains. No doubt this erroneous view emanates from the fact that on the first page of the bill the title appears to be "An act for acquiring national forests in the Southern Appalachian Mountains and White Mountains." However, this bill, as it is now being considered, has been amended by striking out all after the enacting clause as it was previously introduced in the Senate and inserting the present bill, wholly different in most of its essentials from the legislation originally proposed. And it will be observed that the concluding sentence of the present bill amends the title thereof so as to read:

An act to enable any State to cooperate with any other State or States or with the United States for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers.

Thus it will be observed that not only the title of the bill as amended, but that the body of the bill does not limit its provisions to any particular locality or section of the United States, but is applicable to all and is intended to cover all with its wise and beneficent provisions in conserving the navigability of all navigable rivers and for the protection of the watersheds of all such navigable streams.

While the act provides that the various States may cooperate among themselves and also in conjunction with the United States, which idea of cooperation is apparently repugnant to the minds of some, and thus expressed during this debate, yet in my judgment this cooperation is wise and legal, and I am heartily in accord with the principles that thus permit of such cooperation whenever and wherever the object sought to be accomplished is of general benefit to all the people of this Republic.

Matters in which the individual States are unable to cope successfully and which in their nature are interstate, as particularly set forth in this proposed legislation, are of the highest importance and of the greatest benefit to the Nation as a whole.

The gentleman from New York [Mr. PAYNE], who has just preceded me, and who as a rule illuminates most subjects that he touches, I think in this instance did not make a happy illustration wherein he stated in substance that all seemed to clamor for the conservation of our natural resources in every form, yet few, if any, ever expressed a desire of conserving the Treasury of the United States. Mr. Speaker, I fully agree with the gentleman from New York that it is commendable, and even necessary, to conserve the Treasury, and I for one have by my vote endeavored to do so. But to conserve the Treasury alone at the risk of wasting our great natural resources, such as our forests, streams, minerals, and the products of the soil, is often unwise, for the better we conserve our natural resources, thus increasing our natural production of the things which go to make up our Nation's wealth and bettering and increasing our transportation facilities, the more sure we are of providing the means to keep a full Treasury.

Again, Mr. Speaker, the United States for many years has firmly established the principle of cooperating with the several States. I shall not attempt to enumerate the instances in the past or present wherein this cooperation prevails, and not only wherein the Congress approves, but the people of this Nation as well. However, some notable instances are: Our public schools, established under federal initiative by grants from the public domain; our universities were, and still are, similarly endowed; and, finally, the crowning act of all was the endowment of our agricultural colleges and experiment stations in every State in the Union. While the amount of money thus contributed by the General Government to cooperate with the States along these educational lines is insignificant compared with the vast sums expended for these purposes by the States, yet the impetus given by the Federal Government in thus initiating and establishing these institutions has spurred on the States to greater effort. I know of no instance wherein the General Government has thus initiated a movement by cooperation with the States wherein the results have not been most beneficial and redounded to the inestimable benefit, prosperity, and happiness of all our people, socially, morally, intellectually, industrially, and commercially. The measure under consideration is along this line, for it certainly seeks to and will conserve some of our natural resources, which would not only lie dormant, but would be wasted entirely to this Nation for all time, were this conservation left entirely to individual effort sporadically attempted by the several States. The educational

cooperation which I have mentioned, and especially along industrial lines, has tended more than anything else to the conservation and strengthening of our young men and women in all ways, and especially in increasing their productive capacity, thus conserving our greatest national assets, for it is to their intelligent uplift that prosperity, commercially, socially, morally, and patriotically depends.

Therefore, Mr. Speaker, I am heartily in accord with the principles involved in this bill, and while some of its provisions might be improved, if opportunity were given for amendment, yet the principles should not be sacrificed because of some defective detail. [Applause.]

Mr. SCOTT. Mr. Speaker, if the House will pardon a personal reference, I should like to begin by saying that for the past eight years I have been giving a great deal of attention to this question. I have read thousands of pages of official reports and other literature upon the subject. I have heard it discussed a day at a time on several different occasions by very able men. I have traveled hundred of miles over the country to be affected by it, in order to get information at first hand, and I can say without hesitation that there has never been a question before this body concerning which I am more clear in my own conclusions than I am in the conviction that this bill should be defeated.

I realize that there is a very strong public sentiment in favor of it; but, Mr. Speaker, there are two kinds, at least, of public sentiment. One is that sentiment which is based upon complete and accurate information, the conclusions of which are reached after carefully considering all the arguments on all sides of the question, and for that public opinion I have a profound respect. But there is another public sentiment, which is founded upon lack of information or positive misinformation, which has been reached after hearing only one side of the argument, which has been manufactured by an industrious and interested propaganda, and for that public sentiment I have no respect whatever.

"The forests are being rapidly and completely destroyed."

"This destruction will ruin the streams, destroy the farms, and make the country a desert."

"The only way these appalling calamities can be averted is through the Government ownership of watersheds."

That is the way the argument has run, and, believing those things to be true, the people, or great numbers of them, have reached the conclusion, as every patriotic citizen would, "In Heaven's name, let the Government buy and own these watersheds." The trouble with that argument is that not one of the statements upon which it is based is true. It is not true that the forests are being rapidly and completely destroyed. I am not qualified to speak from personal observation of the White Mountains, although touching them I have heard it said that they are more completely forested now than they were forty years ago. But I know that in the Southern Appalachians there is not as much cleared land now as there was twenty-five years ago, and I know that, in the very nature of things, that country never can be wholly denuded of its forests, because it lies in the zone of a warm climate, with plenty of moisture, and when the land is cleared off, if the floods do come and wash away the soil so that it is no longer fit for farming purposes and must be abandoned, then by the force of the climatic condition the forest comes back, at least the cover—the jungle comes back, serving the purpose of a forest cover. So the land never can become a desert, as has been depicted.

Furthermore, as has been shown by the gentleman from Washington [Mr. HUMPHREY], the great majority of the engineers, not the foresters, but the engineers who have studied this question, are of the opinion that the forests do not guard navigable streams against great floods or against an extreme low stage of water.

Neither is it true that the only way the appalling calamities which have been predicted can be averted is through the government ownership of the watersheds. It is clearly demonstrable that the greatest damage now is coming from the portions of the watersheds that are cleared for farming purposes; but it is equally demonstrable that if the land is properly tilled it will hold just as much water when used for farming as it held when covered with a forest, and if properly tilled the soil will not wash. It is clearly possible, therefore, for all that is sought to be gained by the passage of this bill to be reached through the education of the people in the direction of proper methods of crop rotation and of the cultivation of the soil.

And what would be the advantage of that? Why, the soil is worth more for farming purposes, if it can be held in place, than it is for raising timber. It is worth vastly more to the State to keep it on the local tax roll than it is to have it owned by the Government of the United States; and I think these objects can be attained by proper cooperation between the States and the Government without the purchase of the land.

Mr. Speaker, I am in cordial sympathy with the policy of conserving our natural national resources, but I believe that the revenues of this Government are a national resource, and that they, too, deserve to be conserved. We are certainly not conserving them when we propose to spend millions of dollars for an object which can be accomplished without such an expenditure, and for an object which in all likelihood would never be reached by such expenditure.

It is argued by the gentlemen supporting this measure that the money is taken from the receipts of the Forestry Service, and it is thought to make us believe on that account that it is not to cost the country anything.

Why, the receipts from the Forest Service are not a new source of revenue brought into being by this bill. They are a source of revenue that already exists, and when we propose to appropriate these receipts under this bill we are simply attempting to do by indirection that which we do not dare to do directly. Certainly every Member must recognize, whether the money comes from the sale of the forest resources or whether it comes from customs revenues, or any other source, it must be taken out of the National Treasury; so it does not make any difference, so far as that is concerned.

Mr. Speaker, I hope this bill will be defeated, because it is a step in the wrong direction, because it would not bring the results which the proponents hope, and because it would involve an expenditure from the Treasury of the United States of an amount which can not now be measured. [Loud applause.]

I append as a part of my remarks the views of the minority:

VIEWS OF THE MINORITY.

In the first session of the Sixtieth Congress, reporting upon a resolution offered by Mr. BARTLETT of Georgia, the Committee on the Judiciary of the House of Representatives declared it to be their opinion that—

"The Federal Government has no power to acquire lands within a State solely for forest reserves, but under its constitutional power over navigation the Federal Government may appropriate for the purchase of lands and forest reserves in a State, provided it is made clearly to appear that such lands and forest reserves have a direct and substantial connection with the conservation and improvement of the navigability of a river actually navigable in whole or in part."

Bearing that opinion in mind (and it has met with universal acquiescence), it becomes of the very first importance, in considering a bill for the purchase of forest reserves, to determine whether such reserves "have a direct and substantial connection with the conservation and improvement of the navigability of a river actually navigable in whole or in part." The statement that such connection does exist has been so confidently assumed and so often repeated that those who have given but a casual or superficial study to the subject have come to regard it as an established and admitted fact.

The truth is that it is neither established nor admitted. On the contrary, the proposition is very earnestly disputed by men whose opinions are entitled to great weight. It is perhaps not overstating it to say that a majority of the riparian engineers who have given the subject careful study are of the opinion that forests do not exercise any effective control in either extremes of high water or of low water. Lieut. Col. H. M. Chittenden, of the United States Army Engineer Corps, who has been studying the control of floods in rivers for many years, is perhaps the most conspicuous exponent of this view in our own country, having recently read a paper before the American Society of Engineers in which is presented a powerful and to many minds a convincing argument in support of his contention. In Europe the same opinion is entertained by M. Ernst Lauda, chief of the hydrographic bureau of the Austrian Government, who has recently made an exhaustive report upon the great floods of the Danube, in the course of which he says:

"It is universally believed that forests have an influence in moderating and preventing floods and deforestation upon their origin and more frequent occurrence, yet this belief is not better established from a hydrographic standpoint than the entirely unfounded belief that the floods of the past few years in Austria are due to deforestation. Against the popular belief in the favorable influence of forests upon floods resulting from excessive rains may be adduced the interesting fact that lands richest in forests are frequently visited by the severest floods."

In support of this opinion he traces the history of the Danube River for eight hundred years, drawing the conclusion that floods were formerly just as frequent and just as high in that river as they have been in recent times. He cites the records of the river Seine also, showing even greater flood height in the sixteenth century than any that occurred in the nineteenth. As deforestation in the watersheds in both the Danube and the Seine is vastly greater now than it was eight centuries or three centuries ago, the testimony of the actual records presented by M. Lauda can not be lightly set aside. Nor can it be said that M. Lauda stands alone in his opinion, for at the Tenth International Congress of Navigation, held at Milan in 1905, papers upon this subject were presented by representatives from France, Germany, Italy, Austria, and Russia; and while all the writers favored forest culture, the opinion was practically unanimous that forests exert no appreciable influence upon the stream flow of rivers.

Indeed, Colonel Chittenden, who has perhaps studied foreign reports upon this subject more carefully than any other American, declares that he is unable to find among the river engineers of Europe any that advocate forests as a corrective for the extremes of flow in our rivers. He cites an exceedingly elaborate investigation instituted by Napoleon III, as a result of which the French engineers, after an exhaustive study of the subject, united in the opinion that whatever value forests might have locally in preventing the erosion of steep slopes they could not be relied upon in any degree to diminish the great floods from which France had been suffering, and that any measures which might be taken in the line of reforestation would have no appreciable effect.

The report of these engineers quoted a very elaborate and exhaustive work upon the floods of French rivers, going back over six hundred years, in which it was conclusively shown that former floods were larger than those of the present time. As a result of this report it is declared that no French project of river improvement, either for flood prevention or as an insurance against low water in navigable rivers, has embraced reforestation as an essential part, or even any part at all.

In our own country, where river records have been kept but a comparatively short time, the data are, of course, insufficient to warrant any very sweeping generalizations. We believe it is admitted, however, that the records of the Ohio River, which extend over a period of forty years, show greater extremes of both high water and low water during the first twenty years of that period than during the last twenty years, thus bearing out in a degree at least the conclusions reached through a study of the extended periods of observation of European rivers. While it can not be regarded, therefore, as fully established, we submit that the weight of expert testimony and the preponderance of evidence as deduced from actual observation is very largely in favor of the proposition that forests do not exercise an appreciable influence upon the navigability of navigable rivers.

But the argument against the proposition in the bill under consideration by no means rests alone upon the contention that there is no vital connection between the forests and the maintenance of navigability in navigable streams. It is a conceded fact that at the present time, in the Southern Appalachians at least, the menace to the streams comes from the operations of the farmer and not from those of the lumberman. It is the tracts on the lower slopes of the mountains which have been cleared for farming from which the silt is washed into the streams, and not from the upper slopes, which are covered with trees. Now, it is not denied that if these lower slopes are properly farmed the soil will not wash appreciably, and the streams therefore will receive no damage. It is not denied, either, that if the steeper slopes, which never can be farmed, are protected from fire, they will always be forested, or at least covered with a growth that will prevent erosion.

Remembering these two undenied facts, can it be argued that it is necessary for the Government to purchase either the upper or the lower slopes of the mountains in order to protect the streams? The lower slopes are more valuable for farming than for timber raising if they can be prevented from erosion. Since they can be so prevented by proper methods of tillage, would it not be better national economy for the Federal Government to help teach the farmers of that region how to till their soil in such a way as to prevent erosion and maintain its fertility than it would be to buy out those farmers and return the land to the wilderness? And since the upper slopes will always have a forest cover, if protected from fire, would it not be better national economy for the Federal Government to lend its aid to such protection at a comparatively trifling cost (it is estimated by the Forest Service that the cost of an effective fire patrol would not exceed 2 cents per acre per annum) than to buy the land at a very great initial expenditure, with the cost of fire protection to be added as a fixed and continuing charge? Would it not be better for the States concerned to have the lands remain in private ownership, supporting a larger population than could possibly be maintained if the policy of the pending bill is pursued, and retaining the value of the property on the tax rolls?

The very best that can be said in support of the proposition for the federal purchase of these lands is that as a result of such purchase the impairment of navigable streams may possibly be diminished or retarded. But will this vague general possibility, or probability, of a distant and shadowy good offset the immediate and certain evil of driving large numbers of people away from homes which in many instances have been occupied for generations, of reducing the productivity of large areas, and of taking large amounts of property from local tax rolls?

It is cited as a special merit in the pending bill that the money to carry it into effect is taken, not from the General Treasury, but from the receipts of the existing Forest Service, the agreeable inference therefrom being that the proposed new forests can be bought without any real draft upon the Treasury. We are unable to see the force of this argument. The receipts from the present national forests are not a new source of income conjured into existence by the pending bill. On the contrary, these receipts are a part of the national revenues which are paid into the Federal Treasury, just as are the revenues from customs dues or internal taxation. To regard the income from the forests as a special fund which can be diverted without any real effect upon the Treasury balances is a palpable fiction, which if adopted would expose the Congress to the charge of doing by indirection what it was not willing to do directly. If we are going to enter upon this policy, let us do it openly and boldly with a full understanding of what it will cost and where the money is to come from.

In its terms, the life of the measure being limited to ten years and the expenditures under it restricted in the aggregate to $19,000,000, this bill is extremely conservative compared with others that have been introduced upon the same subject. It is to be noted, however, that it is applicable to every section of the country, and that the foremost advocates of the policy which it initiates maintain that the policy can only be carried to a successful issue through the purchase of many million acres of land. The last official report upon the subject recommended the purchase of 5,000,000 acres in the Southern Appalachians and 600,000 acres in the White Mountains, the average estimated cost being $3.50 an acre. But it states also (on page 32) that there are 75,000,000 acres in these mountains which "will have to be given protection before the hard-wood supply is on a safe footing and before the watersheds of the important streams are adequately safeguarded." While no one now advocates the purchase of this enormous area, yet with the policy once entered upon and backed by the tremendous political and industrial influences that can be brought to its support, who can give assurance that such purchases may not be made in the future, and the cost of this policy be thereby extended from tens of millions to hundreds of millions?

Notwithstanding the enormous expenditure which will almost inevitably result from the entrance upon this policy, it might still be warranted if it were a demonstrated fact that the maintenance of the forested watersheds is the only way by which the filling up of navigable streams and the destructive erosion of large sections of our country can be prevented, and that the only means by which forested watersheds can be maintained is through federal ownership of such watersheds. Believing, however, that this destructive erosion and consequent silting of rivers can be prevented by the introduction of proper methods of farming and by adequate fire protection, both of which can be accomplished through the cooperation of state and federal agencies at comparatively little expense, we are unwilling to consent to a measure which commits the Government to a policy which we believe to be both unwise and unnecessary.

Mr. WEEKS. How much time have I remaining, Mr. Speaker?

The SPEAKER. The gentleman has three minutes remaining.

Mr. WEEKS. Mr. Speaker, in three minutes, of course, there is not time to answer many of the statements which have been made; but it is apparent to anyone who has studied this question that most of the statements in opposition to this bill are entirely without foundation. The genleman from New York [Mr. PAYNE] made nearly the same speech to-day that he made against the reclamation act, and for which nearly every man who spoke against that bill has apologized, though I have not heard the gentleman from New York apologize for his vote and action in that matter; and those gentleman who do not now understand this bill will come to its support in time.

The gentleman from Minnesota has set up a man of straw about States and the Government cooperating. Why, the Government is now cooperating with the States; the Government is even cooperating with cities, for within a week we have passed a bill in which the Government cooperates with the city of New York in dredging operations.

If gentlemen on this side of the Chamber want to stand by their national platform they will vote for the passage of this bill. If gentlemen on the other side of the Chamber want to stand by their national platform, which in definite terms approves this legislation, they will vote for this bill. The President of the United States has recommended it in seven annual messages. A majority of the governors of all the States of the Union have met in convention in Washington and have indorsed legislation of this character. We talk about conserving natural resources. How are we going to conserve resources unless we begin to conserve somewhere? We can probably talk for all time, and find fault and criticise particular bills. Anybody can do that. The difficulty is in maturing a measure which we believe will protect the interests of the Government, which will give the Government an opportunity for getting back a reasonable return for what it has spent. Gentlemen talk about these enormous expenditures, $19,000,000 proposed in the next ten years, as if the Government was not going to get anything in return. As a matter of fact, if the money is spent wisely, as I believe it will be by this commission, it will not only get back the value of the property in time, but in ten years the property will be vastly more valuable than when purchased. We will be simply following the example of every European country, and of every other country in the adoption of a policy of this kind. There is not a single first-class country on the face of the globe that is not either purchasing land or conserving the timber on forest reservations, and some of these lands are paying as much as $9 an acre, net, annually.

The Government of Japan alone has a forest reservation which has been in systematic operation for four hundred years, and in one province 85 per cent of the male inhabitants are engaged in forestry pursuits.

This is no new matter. It is a project that ought to have had the attention of this country long ago, and if we do not take action there will, in my judgment, be disapproval and regret on all sides. [Applause.]

The SPEAKER. The question is on the motion of the gentleman from Massachusetts [Mr. WEEKS] to suspend the rules and pass the bill.

The question being taken,

Mr. WEEKS. In order to save time, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 157, nays 147, answered "present" 10, not voting 72, as follows:

YEAS—157.

So the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

For the session:

Mr. SHERMAN with Mr. RIORDAN.

Mr. BOUTELL with Mr. GRIGGS.

Mr. WANGER with Mr. ADAMSON.

Until further notice:

Mr. ADDISON D. JAMES with Mr. LAMAR of Florida.

Mr. WOODYARD with Mr. TAYLOR of Alabama.

Mr. WEEMS with Mr. ROTHERMEL.

Mr. WATSON with Mr. WILLIAMS.

Mr. STERLING with Mr. RHINOCK.

Mr. SMITH of Michigan with Mr. REID.

Mr. RODENBERG with Mr. PRATT.

Mr. MOON of Pennsylvania with Mr. LASSITER.

Mr. MCKINLEY of Illinois with Mr. LAMAR of Missouri.

Mr. SMITH of Iowa with Mr. RANDELL of Texas.

Mr. PRAY with Mr. PATTERSON.

Mr. PEARRE with Mr. MCDERMOTT.

Mr. OLCOTT with Mr. MCLAIN.

Mr. NORRIS with Mr. LEAKE.

Mr. LAFEAN with Mr. KIPP.

Mr. KNAPP with Mr. HAMILL.

Mr. KAHN with Mr. CRAVENS.

Mr. HUGHES of West Virginia with Mr. FLOYD.

Mr. GAINES of West Virginia with Mr. CLARK of Florida.

Mr. FOCHT with Mr. CARLIN.

Mr. CALDERHEAD with Mr. CALDWELL.

Mr. BURKE with Mr. BYRD.

Mr. BIRDSALL with Mr. BROUSSARD.

Mr. ANTHONY with Mr. BURLESON.

Mr. BANNON with Mr. BARTLETT of Nevada.

Mr. OLMSTED with Mr. OLLIE M. JAMES.

Mr. MARSHALL with Mr. FULTON.

Mr. BURTON of Ohio with Mr. CLAYTON.

Mr. ALEXANDER of New York with Mr. SPARKMAN.

Mr. MCMILLAN with Mr. ANSBERRY.

Mr. ELLIS of Missouri with Mr. SMITH of Missouri.

Mr. CORY with Mr. WEISSE.

Mr. GRAHAM with Mr. LEGARE.

Mr. JACKSON with Mr. WOLF.

Mr. AMES with Mr. LINDSAY.

On this vote:

Mr. GOULDEN with Mr. BRADLEY.

The SPEAKER. The Clerk will call my name.

The Clerk called the name of the Speaker, and he voted "no," as above recorded.

The result of the vote was then announced as above recorded.

AMENDMENT OF THE RULES.

Mr. DALZELL. Mr. Speaker, I am authorized by the Committee on Rules to move to suspend the rules and pass the following resolution:

The SPEAKER. The gentleman from Pennsylvania, by direction of the Committee on Rules, moves to suspend the rules and pass the following resolution, which the Clerk will report.

The Clerk read as follows:

House resolution 607.

Resolved, That the rules of the House be, and hereby are, amended as follows:

(1) By adding to Rule XXVI, as a new paragraph to be numbered 4, the following:

"On Wednesday of each week no business shall be in order, except as provided by paragraph 4 of Rule XXIV, unless the House by majority vote on a motion to dispense therewith shall otherwise determine. On such motion there may be debate not to exceed five minutes for and against.

"On a call of committees under this rule bills may be called up from either the House or Union Calendar, excepting bills which are privileged under the rules; but bills called up from the Union Calendar shall be considered in Committee of the Whole House on the state of the Union.

"This rule shall not apply during the last two weeks of the session."

The SPEAKER. Is a second demanded?

Mr. WILLIAMS. I demand a second.

Mr. DALZELL. I would like to ask the gentleman from Mississippi whether he is opposed to the resolution?

Mr. WILLIAMS. Does the gentleman mean whether I am going to vote against this resolution? Yes.

The SPEAKER. A second is demanded by the gentleman from Mississippi, and, under the rule, a second is ordered. The gentleman from Pennsylvania has twenty minutes and the gentleman from Mississippi twenty minutes.

Mr. DALZELL. Mr. Speaker, paragraph 4 of Rule XXIV of the House rules reads as follows:

4. After the unfinished business has been disposed of, the Speaker shall call each standing committee in regular order, and then select committees, and each committee when named may call up for consideration any bill reported by it on a previous day and on the House Calendar, and if the Speaker shall not complete the call of the committees before the House passes to other business, he shall resume the next call where he left off, giving preference to the last bill under consideration: *Provided*, That whenever any committee shall have occupied the morning hour on two days, it shall not be in order to call up any other bill until the other committees have been called in their turn.

Complaint has been made, Mr. Speaker, of the uncertainty as to the call of committees and as to the infrequency of that call.

The resolution that I have sent to the Clerk's desk amends paragraph 4 of Rule XXIV, answers that complaint, and seeks to do three things:

First, to make it certain that there shall be once a week every week during the session, except during the last two weeks, a call of committees.

Second, to provide that that call can not be dispensed with except upon a direct motion to dispense with it. In other words, this calendar Wednesday can not be dispensed with by calling up appropriation bills, or by calling up any other privileged bill, so as to put on the Members the burden of voting down the privileged bill so as to preserve the call of committees. To repeat, to dispense with this call, as provided for by this rule, there must be a vote upon a direct motion to dispense with it. These two things then are provided for—an automatic call of committees once a week and the impossibility of dispensing with that call unless the House, by a majority vote on a direct motion to dispense with it, shall so determine.

The third thing sought to be effected by this amendment of rules is that instead of being confined to bills reported and on the House Calendar, the committee upon which rests the call shall be at liberty to call up bills upon either the House or the Union Calendar, provided, however, that those bills are not privileged bills. That is to say, the purpose of this call can not be destroyed by the calling up of general appropriation bills or general revenue bills or by a bill which is privileged under Rule XI, paragraph 6.

Now, it seems to me that the operation of this rule must very much facilitate the business of the House. From the Speaker's standpoint it will relieve him largely from requests for unanimous consent; and from the Member's standpoint it will relieve him largely of the necessity of going to the Speaker and asking for unanimous consent. A Member having a bill on the House or Union Calendar will say to himself there is no use in my troubling the Speaker about this matter, I will have an opportunity to have the bill discussed and considered next Wednesday or the following Wednesday or at some time during the session. So that it seems to me the amendment I propose ought to appeal to every Member who is desirous of facilitating the business of the House.

I reserve the balance of my time.

Mr. WILLIAMS. Mr. Speaker, I will ask the Chair to call my attention to it when I have occupied three minutes.

Mr. Speaker, we fear the Greeks bringing gifts, especially when they bring them late and under a considerable degree of coercion. As far as the amendment to the rules itself is concerned, it unshackles the minority to some extent, and had we pursued the usual course of an ordinary report from the Committee on Rules, we should have voted down, or tried to vote down, the previous question so as to give ourselves an opportunity to amend, and if we had been unsuccessful in that and the previous question had been voted up, then we might, and probably would, have voted for the resolution in itself. But instead of that the gentlemen have changed base. They now move to suspend the rules and pass this resolution all in one motion.

Everybody, therefore, who votes for that motion voluntarily cuts himself off from all opportunity for offering amendment. You can not even get the power to amend by voting down the previous question. Now, I had intended to offer the following amendment, had we been able to vote down the previous question—in case the matter had been considered in the ordinary manner of considering a resolution from the Committee on Rules—not in lieu of but in addition to the resolution before the House, and not only would I have had this opportunity, but others would have had the opportunity to offer amendments—

Rule 46. On Tuesday of each week no business shall be in order except an alphabetical call of the membership of the House. Upon the call of each Member's name he shall be permitted to offer for the consideration of the House one public bill, to be selected from either the House or the Union Calendar. The bills called up from the Union Calendar shall be considered in Committee of the Whole House on the state of the Union; and there shall be given to general debate twenty minutes to the side, and to the consideration of the bill under the five-minute rule, for amendment, such time as shall be agreed upon or such time as shall, upon motion without debate, be voted by the House.

Rule 47. Whenever the majority of the membership of the House shall, in writing, petition the Speaker that a day shall be given for the consideration of a public measure, when the said measure shall have been reported by a committee, or whenever a majority of the membership of the House shall, by petition in writing, request him to give a day for the consideration of a motion to discharge any standing committee from further consideration of a designated bill, and that the House shall proceed to the consideration of it, it shall be the duty of the Speaker, not later than the next legislative day, to designate a day and to announce to the House the day designated, which designated day shall be within a reasonable time, not more remote than five days after the day of the Speaker's announcement.

I have not even the time to explain or debate it.

Mr. WILLIAMS. Mr. Speaker, I now yield five minutes to the gentleman from Iowa [Mr. HEPBURN].

Mr. HEPBURN. Mr. Speaker, I want to congratulate the gentleman from Pennsylvania [Mr. DALZELL] and his two Republican associates upon the Committee on Rules. The gentleman sees light breaking. The gentleman sees, if not light, probably a storm breaking [laughter], and the gentleman is breaking for cover. How many times in this House has the gentleman declaimed in favor of the complete excellence of the body of rules that we now have? How often has he made the assertion that the majority of this House at all times and under all circumstances could control the business of the House? Now the gentleman seems to think something more is necessary. Why is it? It is because there have been mutterings all along the line. It is because he has been compelled in his judgment in the magazines of the country to defend his action with regard to the rules. It is because the honored Speaker has been compelled to break his rule of silence and discuss in the magazines of the country the rules of this House and attempt to give currency and credence and decency to them. [Applause on the Democratic side.]

Mr. Speaker, this proposition means nothing. It is a mere pretense. It is simply for the purpose of stifling inquiry and enabling certain gentlemen to say: "Why, we have complied with the demand for a modification of the rules." How does this rule change those that we have? Does it make the call of committees more compulsory? Let me read. Rule XXIV says:

The daily order of business shall be as follows.

The daily order. Let gentlemen remember that that is the language of the rule. Each day, the rule says, the Speaker shall indulge in the following order of business. The sixth among the order of business is as follows:

The morning hour for the consideration of bills called up by committees.

The fourth section of that rule reads:

After the unfinished business has been disposed of, the Speaker shall call each standing committee in regular order.

Do you propose to make this rule more emphatic by the language that you have used? What word of command have you in the rule now submitted that is more potential than the word "shall?" That is the language of the present rule. The duty is imposed upon the Speaker of this House—"shall be"—to pursue an order of business. He shall. That is the language, and pursuing that he shall call the committees in their order. Have you got any other word more potential? Mr. Speaker, this rule means nothing. Why is it brought in at this time, in the last days of the session?

The SPEAKER. The time of the gentleman has expired.

Mr. WILLIAMS. Mr. Speaker, I yield four minutes to the gentleman from Missouri [Mr. DE ARMOND], my colleague on the Committee on Rules.

Mr. DE ARMOND. Mr. Speaker, it is of comparatively little importance what the action of the House may be upon the pending proposition to amend the rules, for but three days of the life of the present Congress remain, and it is expressly provided in this amendment that it shall not be operative during the last two weeks of any session of Congress. Then, be the amendment good, bad or indifferent, why amend at all at this time? No good reason can be given for such action.

This House can not impose rules upon the next House. This Congress will expire in three days, and with it will die the rules of this House, amended or unamended. Then why consume valuable time in considering or voting upon this amendment? And who are they who are urging this particular amendment to the rules? Generally speaking, they are the gentlemen who have steadily and for years opposed and defeated all attempts at amendment. And why are they so solicitous about amending the rules just now? The purpose is not frankly disclosed, but it can not be concealed.

Congress after Congress, on the first day of the session, without debate or with but a few minutes grudgingly given to discussion, the old, obnoxious code of rules has been rushed to adoption in bulk, without opportunity for amendment or consideration. Now, the rules by which a deliberative body shall be governed may be good, tending to preserve order, insure equality of opportunity among the members whose rights are equal, and promote the consideration and disposition of important business, or they may rob the members of rights, deprive them of essential privileges, foster oppression by the presiding officer, and take from the legislators the power to legislate.

Then, what excuse can there be for the adoption of rules through dictation rather than upon due consideration? And what graver offense can there be against representative government than the imposition of boss rule in a lawmaking body of a republic?

Much dissatisfaction has existed—and some of it has been voiced—against the machine method of making and enforcing rules in the National House of Representatives. Recently evidences of the growth and assertiveness of this dissatisfaction have been multiplying. Finally it is deemed expedient to appear to give heed to the demand for a revision of the House rules, and to-day in this House we have the first offering of reform from the antireform element. But it is not even a faint promise of real reform by aid of those who have augmented power in the Speaker's hands. Instead of reform, or the promise of reform, it is a cunningly contrived attempt to defeat reform and perpetuate existing abuses. I have already said that this amendment, if adopted, can not be operative in this Congress, for the last two weeks of the session are by its own terms freed from it; and not even two weeks, but only three days of this session remain.

Then, what is the purpose in offering and urging this amendment at this late day?

Its promoters are preparing for a repetition in the House—the new House of the new Congress—on the 15th day of this month, when the Sixty-first Congress is to convene in extraordinary session, of the bad practice of cajoling and coercing the House into adopting rules in bulk, blindly, without consideration or the opportunity for understanding how grave the result of such hasty action must be. It is believed that the hitherto light task of inducing a majority of the Members to shut their eyes and fold their hands for quick, easy, and secure tying will be made easier if something but not much of amendment be now put into the old, odious, condemned code. That is why we have this amendment before us now.

I will not go into a specification of the changes which I believe should be made in the rules. Indeed, I will now mention but few of them and without regard to orderly arrangement.

The Speaker should not be a member of the Committee on Rules or of any committee. This Committee on Rules as now constituted really is not a committee. Nominally, it consists of the Speaker and two of his party associates, of his own selection, and two minority Representatives. These two party associates of the Speaker never vote against him, while almost always the two minority members vote against them, and the tie is broken and the question is decided by the Speaker casting his vote with his chosen ones. This so-called committee has no regular meeting days, or weeks, or months—it convenes upon call of the Speaker. It does not deliberate or in fact determine anything. When the Speaker has determined to do something, with this committee as the instrument to be employed, the Rules Committee is called to meet in the Speaker's room, and his decision, by his casting vote, is put forth as the decision of the committee. Then, there is presented in the House by one of the Speaker's Rules Committee automatons "a privileged report from the Committee on Rules," and the Speaker's party friends are called upon to enforce by vote of the House the Speaker's decree. It would be precisely the same thing in effect, though less artful, if the Speaker personally, officially, and directly were to make his own report of his own action and submit to vote of the House the question of making his action the action of the House.

There should be a real Rules Committee of about fifteen members, which should hold regular meetings, like other committees, to consider and report upon bills and resolutions referred to it; and it would be better if this committee, and committees in general, were made up by some other agency than the Speaker.

When the Speaker appoints the committees, the members well placed are under obligation to him and liable to be unduly influenced by him. And it is easy to understand how the Speaker can "set up" committees, so as to secure desired action, as well as to smother measures not favored by him.

I might remark in passing that there is neither justification nor decent excuse for the unfair distribution of committee places as between majority and minority. For instance, on large and important committees there are, actually or approximately, twice as many members of the Speaker's party as there are of the opposition, a division grossly out of proportion to the relative strength of the parties in the House. Thus the Speaker wantonly deprives the minority of fair committee representation. Does he use what he takes from the minority to win needed support for arbitrary rules arbitrarily enforced?

There should be some rule to secure the recognition of Members as a right. Now recognition goes by favor.

It is often said that the Speaker is the creature of the House, which can overrule or even displace him. This is true theoretically, but practically the truism is barren of substantial relief. It is one thing to clothe the Speaker with dictatorial powers, with a reasoned-out power in the House to reverse his decrees and to remove him from his high office, and it is quite another thing to strip the Speaker of the power which does not belong to his office—strip him, not theoretically or occasionally, but practically and permanently. There is no ground for fear that the Speaker will be deprived of any authority which he should possess. Every occupant of the Speaker's chair will surely have enough of power under any code of rules. The danger lies in the other direction.

Whatever this House now does, or fails or refuses to do, concerning the rules, the next House must adopt rules for itself. How should it proceed in order to get a good code of rules?

The indications are that the extraordinary session of Congress which is to begin March 15 will be devoted to a revision of the tariff, to the exclusion of almost everything else. A Committee on Ways and Means will be needed at once. For the sake of saving time, there will be no opposition, we may safely assume, to the appointment of that committee by the Speaker immediately after the House is organized. With equal confidence the like statement may be made as to the appointment of the Committee on Accounts and the Committee on Mileage, if the prompt appointment of these committees be necessary or desirable.

The House will be busy with the tariff bill until that measure goes to the Senate. Then the House will have an abundance of time in which to discuss, consider, and dispose of the important rules question. Why not let the question rest until then?

Arbitrary rules bear upon majority as well as minority. Indeed, upon the question of a fair, considerate revision of the rules there can be no parties except upon opposite sides of the line of cleavage between right and wrong, between intelligent, responsible free government, and boss rule.

With ample time at our disposal for fullest discussion of the rules, what can be said for arbitrary dictation or for meek submission? What reason can there be against fullest investigation and deliberate, intelligent action? Who will consent on March 15 to swallow at a gulp whatever dish of rules the Speaker's friends, doing his bidding, may offer? And who shall have the manliness to stand for freedom of action and fair play? In a very short time we shall know, and the country shall know.

Let the next House take care of itself by making its own rules. Doubtless it can do better than this House has done. [Applause.]

Mr. WILLIAMS. Will the gentleman from Pennsylvania yield some of his time?

Mr. DALZELL. I yield five minutes to the gentleman from Kansas [Mr. SCOTT].

Mr. SCOTT. Mr. Speaker, I am not disturbed, as my friend the distinguished gentleman from Iowa seems to be, about what reason has influenced the Committee on Rules in bringing in this rule at this time. The important thing, it seems to me, is that the rule is here, and it is for the House to adopt or reject it.

Neither do I agree with the gentleman from Iowa that the adoption of this rule would not leave the House in any different status than that which now exists. It is true, as he said, that we now have in the daily order of business a call of committees; but the gentleman knows, as every man familiar with the rules knows, that that order can be displaced by a preferential motion, and that in order to reach it we might have to vote down the whole Union Calendar.

But under the rule that is now pending we must have a direct vote before the proposition to do away with the call of committees can be adopted. We vote directly on the proposition as to whether or not we shall proceed to the call of committees, uncomplicated by any other question. It places the question of the call of committees on precisely the same footing with suspension day, with pension day, and District day—a certain day in the week—and gentlemen know perfectly well that we have no difficulty in reaching business under those special orders on the day that it is provided under the rule they shall be called.

Mr. FITZGERALD. Will the gentleman yield——

Mr. HULL of Iowa. Will the gentleman yield for a question? Does not this also extend the power of committees, so that they can take up bills on the Union Calendar, where we are now confined to bills on the House Calendar?

Mr. SCOTT. That is another marked change in the pending rule from that which now exists.

Mr. FITZGERALD. Mr. Speaker, will the gentleman——

Mr. SCOTT. I trust the gentleman will let me proceed.

I have never felt the humiliation, Mr. Speaker, that some gentlemen claim to have felt in being required to go to the Speaker and ask his consent to ask for unanimous consent to bring a bill before this House. Possibly because my mind is not subtle enough to note the distinction between going to the Speaker's private office to proffer the request and proffering the request upon the floor of the House. In one case, if I am turned down, a reason is given, and there is nobody present to witness my mortification. In the other case, if I am turned down, no reason is given, and the whole membership of the House may see my embarrassment.

But I recognize that there is great force in the complaint that the present practice places in the hands of the Speaker the power to say whether or not certain measures shall come before the House, and it is for that reason that I am in favor of this resolution, because if it is adopted the House will be able to reach the business on the Union and on the House calendars without asking the consent of the Speaker. It will relieve him of a tremendous burden of responsibility, and it will place that

responsibility where it belongs, namely, on the membership of the House.

I believe, also, that it will have a tendency to make committees more careful in their consideration of bills. We will not hear any more, I fancy, the statement so often heard in committee, "Oh, well; it is not exactly right, but we will recommend it anyway, and the Speaker will hold it up."

I believe that the committees under this rule will be put upon their responsibility, and that our calendars will not be cumbered with measures which members of the committees themselves do not favor. I trust, therefore, that this resolution will be adopted.

I yield back to the gentleman from Pennsylvania any time that I may have remaining.

The SPEAKER. The gentleman has a minute remaining.

Mr. WILLIAMS. Mr. Speaker, I now yield two minutes to the gentleman from Nebraska [Mr. NORRIS].

Mr. NORRIS. Mr. Speaker, I believe that this proposed rule is the most useless, perhaps harmless, and worse than worthless proposition that has ever emanated, especially coming at this particular late day, from the Committee on Rules. It is, in my judgment, the most comical parliamentary joke that ever came down the legislative pike. In its application it is a homeopathic dose of nothingness.

Next Wednesday night at midnight this Congress goes out of existence. We can pass no rule that can live beyond the life of the Congress in which it is adopted. In three days all the rules, including this one, will expire by limitation. This particular rule provides that it shall not be in effect during the last two weeks of a Congress, and there are only three days remaining. We are therefore in the foolish and ridiculous position of adopting a rule that by its own terms and by its own stipulation can never have any legal effect, in life or in vitality.

Are we expected by the wise men to swallow this monstrosity without understanding it, without it even being printed; or is it intended as a sop to the people of the country to deceive them in their demand that this House shall modify its rules so that it shall be really a representative body instead of a one-man machine? [Applause.] Are we men or is this a kindergarten? Can it be possible that it is intended as a congressional hook upon which to hang the political fortunes of men who would be with the people at home and stand in with the machine in Washington? [Applause.] To me it illustrates only one point, and that is that the Committee on Rules has, like the prophet of old, had a revelation to the effect that, after all, the rules of the House are not of divine origin and are not altogether inspired. [Applause on the Democratic side.]

[Here the hammer fell.]

Mr. DALZELL. Mr. Speaker, I yield one minute to the gentleman from Pennsylvania [Mr. OLMSTED].

Mr. OLMSTED. Mr. Speaker, just in the line of practical suggestion, I call attention to the proposed amendment of the gentleman from Mississippi [Mr. WILLIAMS] that the roll should be called in alphabetical order on each Tuesday, each Member to call up one bill, with twenty minutes of discussion on either side, or forty minutes in all.

There are 391 Members. At that rate 12 Members could be reached on each Tuesday, allowing eight hours for a day's work, and making no allowance for time consumed in roll calls or reading of bills. It would take 32 Tuesdays to reach them all. In this session there are only about 12 Tuesdays. That plan would take beyond the life of any ordinary Congress to enable the gentleman from Mississippi [Mr. WILLIAMS], whose name is so far down on the alphabetical list, to get any bill through at all. In this session he never would have been reached. We would have been able to get only about halfway through the alphabetical list of Members. [Applause on the Republican side.]

Mr. WILLIAMS. Mr. Speaker, I now yield two minutes to the gentleman from Massachusetts [Mr. GARDNER].

Mr. GARDNER of Massachusetts. Mr. Speaker, the way to adopt rules for the House of Representatives is to adopt them in the way the Reed rules were adopted, namely, paragraph by paragraph, open to amendment in every way, with an opportunity for every man to have a say and point out the effect of the rules. That is the way to do it, and if we who believe in a change of rules can have our way that is the way that the rules of the Sixty-first Congress will be adopted. [Applause.]

But, Mr. Speaker, this rule is rushed in here without being printed. During its hurried reading only with the greatest difficulty could Members follow its wording. Even if it is pushed through at this late day, it can have no effect except to change the situation at the beginning of the next Congress.

Why, so far as I can tell in listening to its reading, this rule is drawn so carelessly and so hastily that I venture to say the gentleman from Pennsylvania [Mr. DALZELL] has managed to make out of order the reading and approval of the Journal and the prayer by the Chaplain on each calendar Wednesday.

Mr. DALZELL. I yield two minutes to the gentleman from New York [Mr. PAYNE].

Mr. PAYNE. Mr. Speaker, if I have correctly read the RECORD of proceedings of this Congress, the gentleman who has just taken his seat [Mr. GARDNER of Massachusetts] about two weeks ago introduced two proposed amendments to the rules. One was an amendment to this very rule, and this proposition seems to be built upon the proposition of the gentleman from Massachusetts. I suppose when he introduced it it was not a trick or a subterfuge or anything of the kind, but was done in earnest. When it is brought in here by a member of the Committee on Rules, then it is simply regarded as a sop.

Then, Mr. Speaker, in addition to that, seven or eight gentlemen—I believe a number of them signed each proposition—introduced an amendment to the rule, and that amendment was the same in character as this amendment brought in by the Committee on Rules; but although they signed their names to that proposition, they come in here and say that this rule means nothing.

Mr. GARDNER of Massachusetts. Mr. Speaker——

The SPEAKER. Does the gentleman yield?

Mr. PAYNE. I can not yield. I have not time. I should be very glad to discuss this with the gentleman if I had time.

The SPEAKER. The gentleman from New York declines to yield.

Mr. PAYNE. Mr. Speaker, this proposition sets by one day in the week for the call of committees, and that must proceed unless the House by an affirmative vote turns it aside. The present rule requires a prayer by the Chaplain, the reading of the Journal, the disposal of business on the Speaker's table, and then the call of committees is in order; but it is also in order to offer any privileged motion that will set that aside; and motion after motion can be offered, until the House, by a majority vote, shall set aside that order of business. This rule requires but one vote. The other may lead to delay; but in either case it requires a vote by a majority of the House to set aside the rule and stop business under this order. [Applause.]

Mr. DALZELL. How much time have I remaining, Mr. Speaker?

The SPEAKER. Eight minutes.

Mr. DALZELL. Will the gentleman from Mississippi consume some of his time?

Mr. WILLIAMS. Does the gentleman intend to conclude all in one speech?

Mr. DALZELL. I do not know whether I shall or not.

Mr. NICHOLLS. Mr. Speaker, I make the point of order that this resolution is out of order, for the reason that it can have no possible effect on this Congress or any of its actions.

The SPEAKER. Does the gentleman desire a ruling on his point of order? The gentleman is entombed in the RECORD. [Laughter.]

Mr. WILLIAMS. Mr. Speaker, I now yield two minutes to the gentleman from Kansas [Mr. MURDOCK].

Mr. MURDOCK. Mr. Speaker, the real danger of the adoption of this proposed amendment to the rules is that it may defeat for a long time real reform in the rules. [Applause.] This is a Trojan horse. It is the Greek bearing gifts; and in the paunch of that horse there is visible the Committee on Rules—always courageous, often cunning—and sticking out of the paunch of that horse I think I see several notable cold feet. [Laughter.] The little band of Members here who have stood for a reform in the rules have not been numerous, but they have behind them a public sentiment that is mighty with the instinct of righteous protest. The people of this country know what the issue in this House is. It is: Too much power in the Speaker. You can not restore power to the individual here unless you take it away from the Chair. [Applause.] He is the sole repository. This takes no power away from the Chair. Oh, how tight the control of the committees is to-day! Just let this rule be adopted, let the House have a little latitude, and how much tighter will the control of the committees be! This is a halfway measure. Let no man here vote for this if he really believes in true reform of the House of Representatives, if he really believes in giving it back its truly representative character under the Constitution. [Applause.]

Mr. WILLIAMS. Mr. Speaker, I am going to yield all the balance of my time to one man, so if the gentleman from Pennsylvania desires to yield to more than one Member on his side, this is his opportunity to do so.

Mr. DALZELL. I yield two minutes to the gentleman from Kansas [Mr. CAMPBELL].

Mr. CAMPBELL. Mr. Speaker, the purpose a number of Members of this House have had in getting together was to so amend the rules of the House as to give Members the privilege of calling up business upon the calendar without consulting the Speaker. We think the rule brought in here by the Committee on Rules at this time accomplishes that purpose, and inaugurates a new era in the management of business in the House of Representatives. We simply want to put the business of the House within the control of the House, and the call of committees will enable any Member with business upon either the Union or the House Calendar to call up any business that he has upon either calendar. What else do gentlemen want? What else could they use if they had it? That gives virility to the membership of the House of Representatives.

It takes from the Speaker of the House the power of saying, "I will not recognize you for that purpose"—to call up a certain bill on the calendar, as is now the practice. It gives the power to the Member to call up, when the committee is reached, any bill that he has on the calendar. The rule provides that on Wednesday of each week no other business shall be in order except a call of the calendar. On every Wednesday, therefore, Members may, when the call is made, call up for consideration by the House any matter they have on the calendar. This removes from the Speaker both the power and the responsibility of controlling legislation. It has been the practice in this House for many years for Members to see the Speaker in his office and ask for recognition to call up a particular bill or resolution on the calendar for the purpose of asking unanimous consent on the floor for its passage or adoption. If the Speaker did not approve of the measure, he refused to recognize the Member. If the Speaker approved the measure, he recognized the Member. This was at once too much power and too great a responsibility in the Speaker. This amendment to the rules relieves the Member from the necessity of asking the Speaker for recognition and takes from the Speaker the power to refuse it.

That is a substantial reformation in the conduct of the business of the House, and gives the control of business to the Members, and that is what the men have sought to accomplish who want to do something that would enable Members to transact business without the control or the consent of the Speaker. [Applause.]

Mr. DALZELL. Will the gentleman from Mississippi use some of his time, as I shall use the balance of mine in one speech?

Mr. WILLIAMS. Mr. Speaker, I yield the balance of my time to the gentleman from Missouri [Mr. CLARK].

Mr. CLARK of Missouri. Mr. Speaker, how much time is there remaining?

The SPEAKER. Two minutes.

Mr. CLARK of Missouri. Mr. Speaker, I am as much in favor of reforming these rules as any other man in this House, but I am dead against this proposition. I am against it simply because it is a bait with which to catch gudgeons, and I refuse to swallow the bait. [Laughter and applause.] It is pleasant to have it come in here—on the principle that even hypocrisy is a tribute to virtue. The trouble with the reigning powers is that there is revolution in the air; the spirit of revolt is pervading the household troops; the janizaries are in the sulks, and even the Swiss guards can not be depended on any longer.

I have said that I am in favor of reforming the rules, but the reform must be general and genuine. I am most decidedly in favor of restoring the liberty and initiative of the individual Member to the fullest extent consistent with the power of the House to transact business when it so desires, such business as it desires to transact, not merely such business as the Committee on Rules desires to transact. The House should have full opportunity to debate and amend the rules. It might make many changes or few, but whatever changes it makes should be done after ample discussion and deliberation, and should represent the aggregate wisdom of at least a majority of the Members.

The proposition now presented not only comes too late, but is of too little consequence to be regarded even for one moment as an adequate reform. It is a tub to the whale—merely a toy tub. If the whale is fooled by it, he desires to be fooled. That much is clear. It is brought in here within three days of the end of this Congress, when it can do this Congress no possible good as a feeble and specious attempt to head off real reform. It does not deserve respectful consideration and will deceive nobody. I cordially invite all friends of reform to vote against it.

To accept this tiny reform as satisfactory would be another case of "much cry and little wool." The gentleman from Mississippi [Mr. WILLIAMS]; the gentleman from Iowa, Colonel HEPBURN; my colleague from Missouri, Judge DE ARMOND; the gentleman from Massachusetts [Mr. GARDNER]; the gentleman from Nebraska, Judge NORRIS; and the gentleman from Kansas [Mr. MURDOCK] have all made valuable suggestions. Had the Committee on Rules thrown their proposition open to amendment we might come to an agreement as to the amendments desired and been through with it; but even in this make-believe reform the tyranny complained of with justice is put in evidence by the refusal to permit amendment. All that we are permitted is the poor privilege of twenty minutes' debate on each side, and we stoutly refuse that as a sufficient remedy. If we did accept it, the word would go out even unto the ends of the earth that the Committee on Rules had reformed the rules, which would be inconsistent with the facts.

Talleyrand said that Louis the Sixteenth could have saved his head and his throne by any one of twenty different reforms which he granted had he granted them in time, but he postponed every one till too late, and the ruling elders in this House have postponed reform until it is too late. We will reform the rules, but it will be done on the 15th day of March. [Laughter and applause.]

Mr. DALZELL. The gentleman from Missouri is as good a prophet as he was prior to the last election. [Laughter.] I yield the balance of my time to the gentleman from Michigan.

Mr. TOWNSEND. Mr. Speaker, the question before the House is the adoption of the pending resolution. Practically every man in here believes that the resolution, or the amendment proposed, is in the interest of the business of Congress. It is what gentlemen have been demanding. Bills on the House and Union Calendars will come up automatically and permission of the Speaker will not be necessary. But for some reason or other gentlemen who were once favorable to the plan are now opposing it, and give as an excuse for their conduct that it is not all they want. They may excuse their actions to themselves, but they will hardly satisfy their constituents.

I have been in this House long enough to have seen a great many measures which were good in themselves condemned because gentlemen said they did not go far enough. Now, I submit, Mr. Speaker, that what the people require of Congress is to transact the business which they think ought to be transacted. The country is not so much interested in our little piques, in our little disappointments, as it is in the conduct of the business of the Congress, and we will not be excused if we vote down a measure which in itself is right simply because it does not include all that we could hope for. This measure in principle has had the indorsement of every Member who has favored a revision of the rules. Why this change?

The House should revise the rules for the better, if at all. What would be the result if the gentleman from Mississippi could induce the House to adopt his code of rules, for instance? What if other gentlemen who have proposed changes could have their way? Does any man imagine that we would have a better condition than we have now? I for one, Mr. Speaker, have felt that the rules ought to be amended. I have had a sincere desire to amend them, and have worked consistently to that end, but I trust that I have not been made wild over the matter. I do not care to advocate any rule that would not work better than the existing rules. I submit that there has been no other proposition submitted which, in my judgment, is workable here.

Now, Mr. Speaker, this rule does what we have been clamoring for. It sets apart one day in the week in which consideration of bills on the calendar takes precedence of all other matters. You can not take this order off the floor by voting down or up some other measure, but the vote to suspend the order for the day must be directly on a motion to suspend it.

One of the arguments which I have heard expressed in the lobby, but which no man has uttered on the floor, is that there is danger that some measure on the calendar of which gentlemen are afraid will be called up and a vote compelled.

I want to see the calendars cleared and all matters worthy of a great committee's favorable report disposed of. Now, the gentlemen who have spoken in opposition here are of too high character for me to attribute any unworthy motive to them; but it has been alleged that this rule might bring up matters which a Member might wish to dodge, as he would rather go home and say that he had had no opportunity to vote upon it, and in that case the Speaker becomes an ever-useful scapegoat. This rule can put all the matters of Congress which are on the House and Union Calendars before it, and I submit that we, as honest, courageous Members of Congress, have no right to evade the responsibility of meeting these measures as they shall come up.

Now, it is true that there were a few gentlemen who signed this resolution, or one like it, who, I take it, have been charged with having "cold feet," because they never consented to advocate an inefficient and untried scheme, but pushed to adoption a measure which all gentlemen agree will be highly beneficial.

I submit, Mr. Speaker, that the insinuation of unstability comes with ill grace from the gentlemen who make it. There are none of the eight or nine men who signed this resolution who do not now support it. They presented it because they believed that it could be adopted now, and would thus be easier of adoption next session, and that it would work a revolution in the business of the House. Mr. Speaker this membership asks no more than to be given an opportunity to meet and dispose of the business which gets on to the calendars of the House. This rule will give us that opportunity, and so it occurs to me that we can not do less than to adopt it at this time. It does not prevent the gentlemen who are so anxious to bring about other reforms from pressing other measures at other times and in such a way as they may determine, but it is now with them to say whether they will vote to adopt the greatest reform since the Reed rules, or whether for some unexplained and unexplainable reasons they will oppose it. Mr. Speaker, I trust that this resolution will be adopted. It is a worthy one.

It did not come as early as I would like, but it is here, and being here it will have my approval, and I trust it will receive the vote of every man in this House who wishes to transact the business before us in an orderly, careful manner, and the adoption of it will not make it necessary for us either to embarrass the Speaker or to deceive our constituents. [Applause.]

The SPEAKER. The question is on the adoption of the resolution.

Mr. DALZELL. Mr. Speaker, on that I demand the yeas and nays.

Mr. WILLIAMS. Mr. Speaker, in order to save the time of the House, I ask the yeas and nays.

Mr. DALZELL. I have already asked them.

Mr. CLARK of Missouri. Then we will be sure to have them.

The yeas and nays were ordered.

The question was taken; and there were—yeas 168, nays 163, answering "present" 2, not voting 53, as follows:

YEAS—168.

Ferris	Legare	Pratt	

The SPEAKER directed that his name be called, and when his name was called he answered "aye."

The Clerk announced the following additional pairs:

On this vote:

Mr. BRADLEY in favor with Mr. GOULDEN against.

Further notice:

Mr. TAYLOR of Ohio with Mr. SMITH of Texas.

Mr. BEALE of Pennsylvania with Mr. ANSBERRY.

Mr. BIRDSALL with Mr. BELL of Georgia.

Mr. DRISCOLL with Mr. BURLESON.

Mr. HALL with Mr. LEGARE.

Mr. KAHN with Mr. FERRIS.

Mr. KÜSTERMANN with Mr. HACKETT.

Mr. MCGAVIN with Mr. LASSITER.

Mr. MCKINLAY of California with Mr. LEAKE.

Mr. MCLACHLAN of California with Mr. MAYNARD.

Mr. MONDELL with Mr. PATTERSON.

Mr. LORIMER with Mr. WEISSE.

Mr. LOWDEN with Mr. POU.

Mr. MOUSER with Mr. PRATT.

Mr. OLCOTT with Mr. RHINOCK.

Mr. PEARRE with Mr. REID.

Mr. WATSON with Mr. SMITH of Missouri.

The SPEAKER. Upon this vote the ayes are 168, the noes are 163, present 2. The ayes have it, and the resolution is agreed to.

Mr. HEPBURN. Mr. Speaker, I move a recapitulation——

Mr. CLARK of Missouri. Mr. Speaker, I call for a recapitulation of the vote.

The SPEAKER. There is no necessity for a recapitulation.

Mr. CLARK of Missouri. Inasmuch as the vote was close, I ask for a recapitulation of the vote.

The SPEAKER. The gentleman has no right to demand a recapitulation of the vote.

Mr. CLARK of Missouri. I thought that was the right of every Member of the House.

The SPEAKER. It is not the right.

Mr. CLARK of Missouri. Mr. Speaker, with due respect, I appeal from the decision of the Chair.

The SPEAKER. The Chair declines to entertain the appeal. [Cries of "Regular order!"]

The SPEAKER. But, if the gentleman from Missouri has reason to believe that a recapitulation of the roll may show a different result that would change the vote, the Chair will take that statement into consideration, it being discretionary with the Chair, as is shown by all the precedents.

Mr. CLARK of Missouri. There is only a difference of six votes and——

Mr. HEPBURN. Is it not the usage of the House to grant this request?

The SPEAKER. It is not the usage of the House.

Mr. HEPBURN. I never in twenty-two years heard it denied once.

The SPEAKER. There are many things that the gentleman from Iowa has not heard either affirmed or denied, but the

Chair, in the discretion of the Chair, will order a recapitulation of the vote, although if it should appear to-morrow that there was an error that would change the result all the proceeding would fall.

Mr. CLARK of Missouri. Well, there is a very large vote, and I ask the privilege of a recapitulation.

The SPEAKER. The Chair will read—

A Member may not, as a right, demand the recapitulation of a yea-and-nay vote, but if the vote be close the Speaker usually orders it.

[Applause.]

The usage as to a recapitulation of a yea-and-nay vote does not permit it to be done after the announcement of the result except by unanimous consent. There is no rule or practice requiring a recapitulation of the names of those who appeared on a call of the House after their names have been called.

There is the matter in a nutshell, and now the Chair, sooner than have a shadow cast upon the use of the discretion that is lodged in the Chair under the rules of the House and the uniform practices of the House, will direct the Clerk to recapitulate the vote. [Applause.]

The vote was recapitulated.

Mr. GORDON. Mr. Speaker, I did not hear my name called.

The SPEAKER. The gentleman is recorded in the negative.

Mr. GORDON. That is right.

Mr. EDWARDS of Georgia. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. EDWARDS of Georgia. I wish to find out how Mr. AMES is recorded as voting.

The SPEAKER. He did not vote.

Mr. EDWARDS of Georgia. Thank you.

The SPEAKER. There being no change the vote will stand as announced by the Chair. [Loud applause.]

FORTIFICATIONS APPROPRIATION BILL.

Mr. SMITH of Iowa. Mr. Speaker, I call up the conference report on the fortifications appropriation bill (H. R. 27054).

The SPEAKER. The gentleman from Iowa calls up the conference report on the fortifications appropriation bill. Is this a complete report?

Mr. SMITH of Iowa. The report is very brief. There is no statement, so let the report be read.

The SPEAKER. The Clerk will read the report.

The conference report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 27054) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment.

WALTER I. SMITH,
JOSEPH V. GRAFF,
SWAGAR SHERLEY,
Managers on the part of the House.

GEORGE C. PERKINS,
F. E. WARREN,
B. R. TILLMAN,
Managers on the part of the Senate.

Mr. SMITH of Iowa. Mr. Speaker, the Senate made one amendment to this bill. The conference report shows that the Senate has receded from that one amendment and has agreed to the conference report on the bill as it passed the House. I move the adoption of the conference report.

The question was taken, and the conference report was agreed to.

NAVAL APPROPRIATION BILL.

Mr. FOSS. Mr. Speaker, I submit the final conference report on the naval appropriation bill (H. R. 26394), and ask unanimous consent that the statement may be read in lieu of the report.

There was no objection.

The conference report and statement are as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 58 and 59.

GEORGE EDMUND FOSS,
H. C. LOUDENSLAGER,
L. P. PADGETT,
Managers on the part of the House.

EUGENE HALE,
GEO. C. PERKINS,
B. R. TILLMAN,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the third and final conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes, submit the following written statement in explanation of the effect of the action agreed upon and submitted in the accompanying conference report on the amendments of the Senate, namely:

The Senate in receding from its amendment No. 58 restores to the bill the proviso "that no part of the above appropriation shall be used for the payment of the construction of any collier the total cost of which shall exceed $900,000."

The Senate in receding from amendment No. 59 strikes from the bill the following:

"That there shall be kept, in the discretion of the President, as far as practicable, one-half of the navy of the United States on the Pacific at all times."

GEORGE EDMUND FOSS,
H. C. LOUDENSLAGER,
L. P. PADGETT,
Managers on the part of the House.

Mr. FOSS. Mr. Speaker, I wish to state that the bill as agreed upon carries $136,935,199.05. I move the adoption of the report.

The question was taken, and the conference report was agreed to.

ADDITIONAL JUDGES, HAWAII.

Mr. CLAYTON. Mr. Speaker, I ask for the present consideration of the resolution which I send to the Clerk's desk.

The Clerk read as follows:

House concurrent resolution 75.

Resolved by the House of Representatives (the Senate concurring), That the President be requested to return to the House of Representatives H. R. 21896, Sixtieth Congress, an act to amend section 86 of an act to provide a government for the Territory of Hawaii, and to provide for additional judges, and for other judicial judges.

Mr. CLAYTON. Just one word in explanation, Mr. Speaker. By inadvertence the figure "8" was used in the bill instead of the figure "9." That would make a judge down in Hawaii under this bill draw a salary for 1908 that he is not entitled to draw. He would be entitled to draw it in 1909. It is merely to correct that error in the bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on agreeing to the resolution.

The question was taken, and the resolution was agreed to.

ARMY APPROPRIATION BILL.

Mr. HULL of Iowa. Mr. Speaker, I submit the conference report on the bill (H. R. 26915), making appropriation for the support of the army for the fiscal year ending June 30, 1910, and I ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. Is there objection?

There was no objection.

The conference report and statement are as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26915) making appropriation for the support of the army for the fiscal year ending June 30, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 5, 6, 7, 11, 12, 13, 15, 18, 19, 24, 30, 51, 52, 58, 59, and 60.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 4, 8, 9, 14, 16, 17, 20, 21, 22,

23, 25, 26, 27, 28, 29, 31, 33, 34, 34½, 36, 37, 38, 39, 42, 43, 44, 45, 46, 47, 48, 49, 50, 53, 54, 55, 56, and 62, and agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows: Insert at the beginning of said amendment the words "*Provided further*," so that the amendment will read: "*Provided further*, That the act approved May eleventh, nineteen hundred and eight, for the support of the army for the fiscal year ending June thirtieth, nineteen hundred and nine, in so far as it relates to the payment of six months' pay to the widow of an officer or enlisted man, etc., be amended as follows: Strike out the words 'contracted in the line of duty,' and insert in lieu thereof the words, 'not the result of his own misconduct;'" and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "three million five hundred thousand;" and the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "one hundred thousand;" and the Senate agree to the same.

Amendment numbered 40: That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert: "seventy-seven thousand one hundred;" and the Senate agree to the same.

Amendment numbered 41: That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: In line 14 of said amendment, strike out the colon and the words "And provided," and strike out all of lines 15, 16, 17, and to the period in line 18, so that the amendment will read: " : *Provided further*, That of the foregoing total amount eighteen thousand dollars, or so much thereof as may be necessary, shall be immediately available for the purchase of one thousand four hundred acres of land, more or less, adjoining the military reservation of Fort D. A. Russell, Wyo., as an addition to the rifle range: *And provided further*, That three thousand six hundred dollars of the foregoing total amount, or so much thereof as may be necessary, shall be immediately available for the purchase of the southeast quarter of the northwest quarter and the east half of section two, in township one south, range one east of the Salt Lake meridian, as an addition to the target range of Fort Douglas Military Reservation, in the State of Utah;" and the Senate agree to the same.

Amendment numbered 57: That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment as follows: In line 8 of said amendment strike out the words "upon consideration of all the circumstances," and the commas preceding and following the same, so that the amendment will read: "The Secretary of War is hereby authorized to convey to the owners of premises which encroach upon the military reservation of Fort Marion, in the city of St. Augustine, Fla., all the right, title, and interest of the United States in and to the portions of the reservation which have been occupied by them, under license or claim of title, upon the payment by said owners of such sums of money as the Secretary of War shall determine proper to be paid for the said lands;" and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In line 12 of said amendment strike out the word "provided" and insert the words "appropriated, to be expended from the amount appropriated in this act for water and sewers at military posts;" so that the amendment will read: "For the acquiring of water rights and necessary lands therewith connected for a permanent water supply for Fort William Henry Harrison, in Montana, the amount of twenty thousand dollars appropriated therefor by the act approved May eleventh, nineteen hundred and eight, entitled 'An act making appropriation for the support of the army for the fiscal year ending June thirtieth, nineteen hundred and nine,' is hereby reappropriated and made available, and forty thousand dollars additional, or so much thereof as may be necessary for said purposes, including the acquiring of water rights and lands for intakes and right of way for pipe lines from such intakes to said fort, is hereby appropriated, to be expended from the amount appropriated in this act for water and sewers at military posts; and the Secretary of War is hereby authorized to acquire such rights and lands by purchase or by condemnation proceedings;" and the Senate agree to the same.

J. A. T. HULL,
JAMES HAY,
Managers on the part of the House.
F. E. WARREN,
J. B. FORAKER,
JAS. P. TALIAFERRO,
Managers on the part of the Senate.

STATEMENT.

Statement on the part of the House conferees on the act making appropriation for the support of the army for the fiscal year ending June 30, 1910:

Amendment No. 1 authorizes the organization of school detachments at each of the service schools without increasing the number of enlisted men in the army; and the House recedes.

Amendment No. 2 provides for contingent expenses at military posts; and the Senate recedes.

Amendment No. 3 changes the word "defense" to "artillery;" and the House recedes.

Amendment No. 4 provides for a buzzer system at Fort D. A. Russell; and the House recedes.

Amendment No. 5 increases the appropriation for officers of the line; and the Senate recedes.

Amendment No. 6 relates to payments to officers for exercising higher command; and the Senate recedes.

Amendment No. 7 increases the pay for length of service; and the Senate recedes.

Amendment No. 8 increases the appropriation for pay of enlisted men; and the House recedes.

Amendment No. 9 increases the pay for length of service of enlisted men; and the House recedes.

Amendment No. 10 relates to six months' pay to families of deceased officers and enlisted men; and the House recedes and agrees to the same with an amendment.

Amendment No. 11 provides for a private secretary to the Chief of Staff; and the Senate recedes.

Amendment No. 12 is a total; and the Senate recedes.

Amendment No. 13 increases the appropriation for the Medical Department; and the Senate recedes.

Amendment No. 14 provides for a second examination after one year for officers of the Medical Corps of the grade of major who failed in their examination. The House recedes from its disagreement.

Amendment No. 15 provided for equalization of promotion and granted certain files on the retired list to officers who had suffered loss by regimental promotion; and the Senate recedes.

Amendments Nos. 16 and 17 provide for extra pay for retired officers when on active service; and the House recedes from both amendments.

Amendment No. 18 provided that service as a contract surgeon in the civil war should have the same effect on promotion as service in the line or staff; and the Senate recedes.

Amendment No. 19 is in relation to pay of enlisted men on the retired list; and the Senate recedes.

Amendment No. 20 relates to mileage to officers and contract surgeons; and the House recedes.

Amendments Nos. 21 and 27, relating to officers of the national guard attending service and garrison schools, is simply the elimination of the provision inserted by the House from one section of the bill and insertion of the same in another section of the bill; and the House recedes from both amendments.

Amendments Nos. 22 and 23 simply rearrange the language as adopted by the House; and the House recedes from both amendments.

Amendment No. 24 relates to encampments and maneuvers of the organized militia; and the Senate recedes.

Amendment No. 25 authorizes the appointment of noncommissioned officers at general recruiting depots; and the House recedes.

Amendment No. 26 provides for West Point cadets attending the inaugural ceremonies; and the House recedes.

Amendment No. 28 is verbal; and the House recedes.

Amendment No. 29 is the insertion of a comma; and the House recedes.

Amendment No. 30 relates to the purchase of horses for the army; and the Senate recedes.

Amendment No. 31 relates to removal of suspension of accounts for certain fiscal years, and as the department reports all accounts adjudicated, the House recedes from its disagreement.

Amendment No. 32 is the amount appropriated for barracks and quarters; and the House recedes and agrees to the same with an amendment fixing the amount at $3,500,000.

Amendment No. 33 provides for the erection of a chapel at Fort Des Moines and for the completion of the stable at engineer post, Washington Barracks; and the House recedes.

Amendment No. 34 is an increase in the amount of the appropriation for transportation of the army and its supplies; and the House recedes.

Amendment No. 34½ inserts the words "and repair" in the provision for roads, walks, etc.; and the House recedes.

Amendment No. 35 increases the appropriation for roads, walks, etc.; and the House recedes from its disagreement and agrees to the same with an amendment making the increase $100,000.

Amendment No. 36 relates to the completion of military and post roads, etc., in Alaska; and the House recedes.

Amendment No. 37 relates to barracks and quarters in the Philippine Islands. The Senate reduced the amount appropriated by the House one-half, and the House recedes from its disagreement and agrees to the amendment of the Senate.

Amendment No. 38 increases the appropriation for the construction and repair of hospitals; and amendment No. 39 appropriates the amount increased by the Senate for the construction of a hospital at Fort Yellowstone; and the House recedes from its disagreement to both amendments.

Amendments Nos. 40 and 41 relate to shooting galleries and ranges. The Senate increased the amount appropriated by $82,100; $5,000 of the increase was to be used at the United States rifle range and wharf at Pensacola, Fla. By an agreement of the conferees the provision for Pensacola, Fla., was stricken out and the amount of the increased appropriation reduced to $77,100. The House recedes from both amendments and agrees to the same with the amendments above indicated.

Amendment No. 42 provides for storehouses on Corregidor Island; and the House recedes.

Amendment No. 43 relates to disbursements in the Quartermaster's Department and allows the use of the total available balance, under certain conditions, for payments; and the House recedes.

Amendment No. 44 makes all persons admitted to treatment in the Army and Naval Hospital at Hot Springs, Ark., subject to the rules and articles of the Army of the United States; and the House recedes.

Amendment No. 45 is an increase of expense at engineer depots; and the House recedes.

Amendment No. 46 relates to ammunition, targets, and target materials at educational institutions and state soldiers and sailors' orphans homes; and the House recedes.

Amendment No. 47 increases the appropriation $30,000; and the House recedes.

Amendment No. 48 is an increase of the amount for national trophy and medals for rifle contests; and the House recedes.

Amendment No. 49 is simply a reappropriation for the unexpended balance for range finders and other instruments for fire control; and the House recedes.

Amendment No. 50 extends the appropriation for automatic rifles to June 30, 1911; and the House recedes.

Amendment No. 51 relates to ordnance contracts; and the Senate recedes.

Amendment No. 52 relates to sales of ordnance stores; and the Senate recedes.

Amendment No. 53 authorizes the Ordnance Department to use the funds in their hands, under certain restriction, and to apply to the Ordnance Department practically the same rule as provided under amendment No. 43 relating to the Quartermaster's Department; and the House recedes.

Amendment No. 54 simply provides as to the rank detailed officers shall take in the Ordnance Department; and the House recedes.

Amendments Nos. 55 and 62 relate to sales of ordnance stores to officers of the Navy and Marine Corps, and is same as passed by House. The Senate changed the section in the bill only; and the House recedes.

Amendment No. 56 is to authorize the acceptance by the Secretary of War of a strip of land at the Salisbury National Cemetery for sidewalk purposes. On account of the Government being compelled to make a new entrance to the cemetery to escape danger of passing trains, this seems necessary to complete the work heretofore authorized; and the House recedes.

Amendment No. 57 authorizes the Secretary of War to convey certain rights to an unused portion of the military reservation at the city of St. Augustine, Fla., on such terms as may be fixed by the Secretary of War; and the House recedes and agrees to same with an amendment.

Amendment No. 58 provides for the construction of a public road from a point near the southern end of the new Highway Bridge through the Arlington Reservation; and the Senate recedes.

Amendment No. 59 provides for the construction of a national road or highway in St. Louis County, Mo., from the national cemetery to Jefferson Barracks; and the Senate recedes.

Amendment No. 60 authorizes the acceptance of certain lands in Oklahoma for the Fort Sill Military Reservation; and the Senate recedes.

Amendment No. 61 relates to acquiring water rights and necessary land for a proper water supply for Fort William Henry Harrison, in Montana, and reappropriating the sum of $20,000, with an amendment appropriating $40,000 additional. The House recedes from its disagreement, and agrees to the same with an amendment providing that the $40,000 herein appropriated shall be paid out of the amount appropriated by this act for water and sewers at military posts.

J. A. T. HULL,
JAMES HAY,
Conferees on the part of the House.

Mr. HULL of Iowa. Mr. Speaker, I want to call the attention of the House to the items that the Senate receded from in conference. They are as follows:

Contingent expenses at military posts	$2,500.00
Pay of officers of the line	108,800.00
Longevity pay of officers of the line	32,780.00
Private secretary to Chief of Staff	2,400.00
Pay of officers in Medical Department	151,100.00
Pay of retired enlisted men	200,000.00
Encampment and maneuvers, organized militia	175,000.00
Barracks and quarters	500,000.00
Roads, walks, wharves, and drainage	50,000.00
Shooting galleries and ranges	5,000.00
Road from Highway Bridge to Arlington	44,000.00
National road from St. Louis to Jefferson Barracks	127,000.00
Water rights for Fort William Henry Harrison (specific appropriation dropped, but expenditure authorized from total appropriation for water and sewers at military posts)	40,000.00
Total	1,438,580.00
Amount of bill as reported by conferees	101,197,470.34

Mr. LIVINGSTON. You did well.

Mr. HULL of Iowa. I think we did. We eliminated almost entirely all general legislation. The gentleman from New Jersey [Mr. PARKER], Mr. Speaker, did not sign the report on account of a disagreement, in his judgment, with one amendment that we agreed to, and I now yield ten minutes to the gentleman.

Mr. PARKER. Mr. Speaker, I recognize the responsibility of refusing to sign a conference report which in its main features is one of the best that was ever brought to this House. I find myself unable, as a matter of principle, to accede to the amendment of the Senate, No. 14, which creates in the Medical Department a new form of retired list, which is not based upon length of service, is not based upon age, and is not based upon physical disability. The amendment orders that majors in the Medical Corps who have twice failed in their medical examination shall be placed upon the retired list. Those who have failed are five in all. They are probably older than any majors will be hereafter, with the greater chances of promotion provided by the bill passed last year. One has five and one-half years still to serve; another has nine and a half years; another has ten; and the other two have thirteen years to serve before they are eligible for retirement; but if they shall fail to pass the new examination which is provided for them, they will have the right to go immediately upon the retired list. I thought it due to the House, as well as to myself, to bring this matter before them, believing that the House, no matter at what cost in holding up the bill at this stage, will refuse to create that sort of retired list.

I think I have time enough left to explain a little. The medical bill of last year created a system of examinations. It provided that lieutenants on their being promoted to captains—that is, after three years' service—should have an examination, and if they were turned down for mental failure, they were discharged with one year's pay, like all other officers of the army who apply for a promotion. The same was done with the captains. The majors are usually younger than in the line, and were likewise ordered to be examined; but in consideration of their longer service, and it being supposed they might be a little stale at examination, it was enacted that if they failed they should "mark time," so to speak, and remain majors and be debarred from promotion. It was found that some of these majors had been examined as to administration and regulations, rather than medical matters, so as to see if they were quali-

fied for command. They failed on these and asked another examination. I think they ought to have it. It is right they should have a chance, after long service, to be promoted if they pass their examination, and they should have a second chance. But, Mr. Speaker, we now have the proposition that if they should fail the second time they shall then be eligible to retirement that they have not earned by length of service, by age, or by physical disability incurred in service.

Now, the amendment as it appears as number 14 would be easily corrected. It says that they shall be retired without promotion. The House committee reported on the bill in this form that they ought to be discharged with a year's pay. Or we might have left the result just as it was, so that after the second examination they should continue to serve out their time as majors without promotion. I myself thought that would be agreed to. Or we might have arranged that if retired they should be retired on a percentage of their pay, based on length of service; for example, if twenty-five years, at a 2 per cent rate the officer would receive 50 per cent instead of 75 per cent of his last pay. But I can see no reason why we should put a premium upon unwillingness to study or on a desire to get out of the service which will allow an officer to demand retirement at 75 per cent of his pay simply because he shall have refused or failed to pass a second examination. I think it is due to this House to bring this matter before them and to object to the adoption of the conference report. [Applause.]

Mr. HULL of Iowa. I will yield eight minutes to the gentleman from Missouri [Mr. BARTHOLDT]. I think he can give us all the information on the boulevard in eight minutes' time.

Mr. BARTHOLDT. Mr. Speaker, when this bill came back from the Senate it carried a provision for a highway connection between the city of St. Louis and our great national cemetery. That item was stricken out in conference. It had been adopted, after a full and free discussion, by the Senate, and the present is the only opportunity to take the judgment of the House upon it. It can only be reinserted by voting down the conference report, and I trust such action will be taken after the House has listened to my statement.

At an expense of hundreds of thousands of dollars the city of St. Louis is extending its principal boulevard in the direction of Jefferson Barracks and to within a short distance of the very gate of that military reservation; but unless Congress provides for the construction of an additional 3 miles of road, leading up to and through the government reservation to the national cemetery, both the barracks and the cemetery will remain as they are now, practically inaccessible except by rail. From every viewpoint, strategy as well as national obligation, a better and immediate connection between St. Louis and those government reservations is extremely necessary, and now that the municipality is meeting this great necessity to the very limit of its territorial jurisdiction, it would be an unpardonable sin of omission if the Government refused to contribute what is legitimately its share of the needed improvement.

The distinguished chairman of the Committee on Military Affairs will no doubt claim that this item has been cut out in pursuance of a policy. But what kind of a policy is it, Mr. Speaker, that will compel soldiers in marching from the city limits to their reservation or in the opposite direction to use the rail-covered roadway of a private corporation? If this is a policy, it is a bad policy, and one unworthy of our great Government. And let me ask, further, what kind of a newfangled doctrine is it which will make it impossible for the living to pay reverence to the Nation's heroic dead by the Government refusing, on its own territory, to make accessible their last resting place? Let the House answer as, after an extended discussion, the Senate has done, and then the Military Committee will have a policy more in harmony both with the dignity and honor of the Government and the true sentiment of the American people.

From time immemorial it has been the policy of the Government to build roadways leading to national cemeteries. From the immediate vicinity of St. Louis alone I can cite three precedents. The Government built a roadway 4¾ miles in length and at a cost of $125,000 from Mound City, Ill., to the national cemetery; a national road 3 miles long was built from Springfield, Mo., to the national cemetery, at a cost of about $100,000; and the Government, at an expense of $60,000, built a national road, of 1½ miles in length, from Fort Scott, Kans., to the national cemetery. By authority of Congress this policy has never been changed, and on behalf of my constituents I protest against its arbitrary change now.

There are many similar cases, I am told, demanding the attention of Congress, and that was the reason assigned to me why the bill I had introduced for this roadway was not accorded consideration by the Committee on Military Affairs. I know little or nothing of the merits of the other cases, but I venture to say there is none more meritorious than this proposition to provide access of the people of a large city like St. Louis to both a military reservation and a national cemetery at the same time.

The topographical location of Jefferson Barracks and its national cemetery is one of the most ideal of the western country. From their elevation on the bluffs of the Mississippi you look down into the waters of that mighty river washing the rocks which form the indestructible foundation of these government grounds, and as your vision extends farther east, and beyond the river, you can see far into the fertile plains of Illinois, while south and west are stretched the fields and fruit gardens of the thrifty farmers of St. Louis and Jefferson counties. And looking north you behold the great metropolis of Mississippi Valley at your feet stretching out its steadily growing arms toward these reservations. You can almost discern with bare eyes the historic spots where, on the 10th of May, 1861, those great events occurred which saved Missouri to the Union. Three or four regiments, mostly composed of Germans, marched to Camp Jackson, on the outskirts of the city, captured the camp, made all the garrison prisoners, and afterwards took the United States arsenal. It was then the fate of the Nation was hanging in the balance; but on the day after, when the news of these historical events reached the White House, the sad face of Abraham Lincoln was brightened by a ray of hope, and millions of loyal Americans heaved a sigh of relief with him. To-day we know that the valiant moves I have just described have actually contributed very largely toward turning the scales in favor of an undivided country.

The Nation has never expressly recognized the unwavering loyalty and patriotism of those sturdy citizens until to-day we have a fit opportunity to do so. Many of the 12,000 soldiers who have found their last resting place in the national cemetery at Jefferson Barracks were actual participants in the early engagements which saved Missouri to the Union, and while they are beyond the reach of our gratitude, let us at least do honor to the heroic dead by enabling the living generation to pay tribute to their memory on the spot where they sleep their last sleep. True, they wore the blue; but to-day the blue and the gray join hands in asking this consideration from the National Government, and in advocating the action I do I am voicing an appeal of all the living on behalf of those who laid down their lives that the Union might live.

Mr. HULL of Iowa. This bill and amendment simply provides that at the expiration of a year they may take a second examination if they fail, and that instead of being held up marking time they shall be placed on the retired list.

Now, on the road proposition we have before the Committee on Military Affairs roads to the national cemeteries and grounds aggregating in amount over $750,000. For the last eighteen years the policy of that committee has been against building roads outside of the reservation. It is true some roads were built through the Committee on Appropriations putting it on bills without a point of order being made against it. Now it is asked that the Government of the United States assume liabilities of $750,000, which does not include the $147,000 asked for by St. Louis.

I want to call the attention of the House to a telegram I received from the business men of St. Louis on this proposition. It is dated February 25, 1909:

Hon. J. A. T. HULL,
House of Representatives, Washington, D. C.:

The Business Men's League of St. Louis, which represents the merchants, manufacturers, and financial concerns of the city, have worked for two years to secure the congressional approval of Jefferson Barracks road plan. It is part of proposed boulevard system essential to city's improvement. St. Louis itself is to spend large sum of money on the plan. Sincerely hope you will assent to amendment proposed by Senators WARNER and STONE and urged by Mr. BARTHOLDT. We shall be grateful.

JAS. E. SMITH,
President Business Men's League.

There is not a word in the dispatch that claims it is for the best interest of the Federal Government, but that it is a part of the city's plan for the boulevard improvement. This is signed by Gen. James E. Smith, president of the Business Men's League.

Now, if we were to yield to all the propositions connected with national cemeteries in the cities of the United States there is no telling where we would stop. It is not a fair proposition when a great institution is located next to a city to come to Congress and ask us to build a road for people to travel over as a part of any system.

Mr. BARTHOLDT. Will the gentleman yield?

Mr. HULL of Iowa. I will yield for a question.

Mr. BARTHOLDT. The gentleman has read a telegram from the Business Men's League. If he has paid attention to what I said I would like to ask him whether he would believe me or the Business Men's League?

Mr. HULL of Iowa. The gentleman from St. Louis is always honest, is always eloquent, and always earnest when St. Louis is involved. [Laughter.]

Mr. BARTHOLDT. Mr. Speaker, I merely want to call the attention of the House to the fact that we ask a road through the military reservation to the national cemetery.

Mr. HULL of Iowa. Let me call the gentleman's attention to the fact that under the present law we make a large appropriation for roads on our own ground, and if we owned the land to the point that the gentleman wants the road the Quartermaster-General has the power under the law to build it.

Mr. BARTHOLDT. Why does he not build it?

Mr. HULL of Iowa. He says that we do not need it. You have to come to Congress to get a road built outside of the military reservation.

Mr. SLAYDEN. Mr. Speaker, I would like to ask the chairman of the committee with reference to this amendment touching the medical corps made by the Senate. Is it true that if that amendment is adopted and these gentlemen who have served far short of the thirty years or forty years that usually precede retirement should be found deficient on the second examination that then they will be retired and for the balance of their lives, no matter how brief their services may be, they will receive three-quarters pay?

Mr. HULL of Iowa. They would without doubt, but when the gentleman says "far short of thirty years" he is in error. There are only four or five men involved, and one will pass the thirty years' service in the next year.

Mr. SLAYDEN. May there not be more coming?

Mr. HULL of Iowa. Of course, but no man will come up for a lieutenant colonelcy until he has been twenty-five years in the service. A man at thirty years has a right to be put on the retired list. When it was suggested cutting down the amount of the retired list, we were assured that if that was adopted no board would retire a man.

Mr. SLAYDEN. I strongly favored the amendment for the Medical Corps, for it is in the interest of the people and the service. It was a rigid law. It required examinations to develop the skill, the capacity, the fitness of the surgeons of the army. It did what we expected it would do. It developed on the first examinations held after the law was enacted that some gentlemen doing service as medical officers could not meet the requirements. Immediately, as seems to be the case in the operation of all military laws, after these gentlemen had fallen through on the examination and had been found deficient under the requirements of the law, the personal equation came into play, and their friends took steps to have the law repealed. I think that is an unwise thing to do, but I question whether at this hour we can now afford to vote down a conference report, which brings us to an agreement on a bill that on the whole is an excellent one. I strongly disapprove of the Senate amendment in respect to the Medical Corps. Nevertheless, I feel that under the circumstances I should vote for the adoption of the conference report.

Mr. HULL of Iowa. Mr. Speaker, I move the previous question on the adoption of the conference report.

The previous question was ordered.

The SPEAKER. The question now is on the adoption of the conference report.

The question was taken; and on a division, demanded by Mr. BARTHOLDT, there were—ayes 150, noes 32.

So the conference report was agreed to.

BUILDING ASSOCIATIONS IN DISTRICT.

The SPEAKER laid before the House the bill (S. 6055) to amend section 691 of subchapter 7, building associations, of the Code of Law of the District of Columbia.

Mr. SMITH of Michigan. Mr. Speaker, I move that the House insist on its amendments and agree to the conference asked by the Senate.

Mr. SIMS. Mr. Speaker, to what part of the bill does the Senate disagree?

Mr. SMITH of Michigan. As I understand, to the last amendment, to the third amendment.

Mr. SIMS. That is 691?

Mr. SMITH of Michigan. Yes; 691A.

Mr. SIMS. Requiring building associations to make a deposit?

Mr. SMITH of Michigan. Yes.

Mr. SIMS. That was a matter of contention or semicontention in the House.

The SPEAKER. The question is on the motion of the gentleman from Michigan, that the House insist on its amendment and agree to the conference.

The question was taken, and the motion was agreed to.

The SPEAKER announced the following conferees on the part of the House:

Mr. SMITH of Michigan, Mr. MOORE of Pennsylvania, and Mr. BRODHEAD.

PENSIONS.

The SPEAKER laid before the House the bill (H. R. 27049) granting pensions and increase of pensions, with Senate amendments thereto.

The Senate amendments were read.

Mr. SULLOWAY. I move that the House concur in the Senate amendments.

The motion was agreed to.

The SPEAKER also laid before the House the bill (H. R. 27249) granting pensions and increase of pensions, with Senate amendments.

The Senate amendments were read.

Mr. SULLOWAY. Mr. Speaker, I move that the House concur in the Senate amendments.

The motion was agreed to.

The SPEAKER also laid before the House the bill (H. R. 27469) granting pensions and increase of pensions, etc., with Senate amendments.

The Senate amendments were read.

Mr. SULLOWAY. Mr. Speaker, I move that the House concur in the Senate amendments.

The motion was agreed to.

The SPEAKER also laid before the House the bill (H. R. 27974) granting pensions and increase of pensions, with Senate amendments.

The Senate amendments were read.

Mr. SULLOWAY. Mr. Speaker, I move that the House concur in the Senate amendments.

The motion was agreed to.

CONFERENCE REPORT.

Mr. LOUDENSLAGER. Mr. Speaker, I present a conference report upon the bill S. 8899, an act granting pensions and increase of pensions to soldiers and sailors of wars other than the civil war and to certain widows and dependent relatives of such soldiers and sailors, and ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. Is there objection?

There was no objection.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 8899) granting pensions and increase of pensions to soldiers and sailors of wars other than the civil war and to certain widows and dependent relatives of such soldiers and sailors, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same.

H. C. LOUDENSLAGER,
WM. H. DRAPER,
WILLIAM RICHARDSON,
Managers on the part of the House.

P. J. MCCUMBER,
N. B. SCOTT,
JAS. P. TALIAFERRO,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

Statement to accompany report of committee of conference on disagreeing vote of the two Houses on S. 8899, an act granting pensions and increase of pensions to soldiers and sailors of wars other than the civil war, and to certain widows and dependent relatives of such soldiers and sailors.

This bill as it originally passed the Senate contained a provision granting an increase of pension to Caloway G. Tucker, but said bill was amended in the House by striking out said provision, and the Senate disagreed to said amendment.

After full conference the Senate recedes from its disagreement to the amendment of the House, and agrees to the same.

H. C. LOUDENSLAGER,
WM. H. DRAPER,
WILLIAM RICHARDSON,
Managers on the part of the House.

Mr. LOUDENSLAGER. Mr. Speaker, I move the adoption of the conference report.

The motion was agreed to.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments bills of the following titles, in which the concurrence of the House of Representatives was requested:

H. R. 28047. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors;

H. R. 27974. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27469. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27249. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors;

H. R. 27049. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors; and

H. R. 28167. An act to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public-building acts, and for other purposes.

LEGISLATIVE, EXECUTIVE, AND JUDICIAL APPROPRIATION BILL.

Mr. BINGHAM. Mr. Speaker, I submit the conference report on the legislative, executive, and judicial appropriation bill.

The SPEAKER. The Clerk will read the report.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have been unable to agree.

HENRY H. BINGHAM,
F. H. GILLETT,
L. F. LIVINGSTON,
Managers on the part of the House.
F. E. WARREN,
J. A. HEMENWAY,
H. M. TELLER,
Managers on the part of the Senate.

Mr. BINGHAM. Mr. Speaker, in order that the House may be fully informed, the Senate has insisted upon every one of their amendments. Your House conferees carried out in perfect faith the instructions of the House. We have disagreed, and the bill comes back to you just as it left the House with your instructions to the conferees. For the better information of the House, without reference to either the report or pages of the bill, I shall move, should there be such a necessity for a detailed number of the amendments, that the House further insist on its disagreement to the amendment numbered 46, increasing the salary of the Speaker of the House; to further insist on its amendments to the amendments of the Senate numbered 60 and 61, fixing the salary of the President at $75,000 instead of $100,000 as proposed by the Senate; that the House further insist on its disagreement to the amendments of the Senate numbered 62 and 63, increasing the salary of the Vice-President; that the House further insist on its disagreement to the amendment of the Senate numbered 64, providing for an Undersecretary of State, at $10,000; that the House further insist on its disagreement to all of the remaining amendments of the Senate which relate to certain additional employees in the State Department and increasing the salaries of the United States judges. I can only say to the House that your conferees are willing, desirous, that the House do act upon every one of those amendments, and in the debate I would suggest a direction in reference to the amendment that the gentleman desires to submit here, and an acceptance of our disagreement.

The statement is made in the report of your conferees that the House has disagreed and that the Senate refuses to accept any proposition from the House.

Mr. LIVINGSTON. Will the gentleman allow me a moment or two?

Mr. BINGHAM. Mr. Speaker, I make this motion: On the first amendment, that the House further insist on its disagreement to amendment No. 46, increasing the salary of the Speaker.

Mr. MANN. Mr. Speaker, will the gentleman yield for a minute?

Mr. BINGHAM. With pleasure.

Mr. MANN. Why is it not a simpler matter for the House to adhere to its disagreement?

Mr. BINGHAM. I would be glad if the House would.

Mr. GILLETT. Will the gentleman allow me?

Mr. MANN. Certainly.

Mr. GILLETT. Mr. Speaker, it seems to me to adhere might delay matters. My impression of the present status is this: I believe it is not proper to reveal anything that transpires in conference, but I have a suspicion that the Senate felt that the House, with a chance to vote again to-day on some of these propositions, might change its mind, and that for that reason the Senate was not willing to yield.

I think if the House now takes one or two votes showing that it is of the same opinion still and then lets the bill go back to conference, I am inclined to think that an agreement will speedily be reached and a complete agreement, and it seems to me it would be wise to adopt that course.

Mr. LIVINGSTON. Will the gentleman yield for a moment?

Mr. BINGHAM. Certainly.

Mr. LIVINGSTON. Mr. Speaker, we have voted on one or two of these amendments and the House has clearly indicated its will. My opinion is that if we let this conference report lie until about Wednesday we will get a settlement that will satisfy perhaps this side of the Capitol.

Mr. HENRY of Texas. Suppose we refuse a conference now, will it not have the effect indicated by the gentleman from Massachusetts?

Mr. LIVINGSTON. I would not ask for a conference again.

Mr. HENRY of Texas. Why not move to refuse?

Mr. HULL of Iowa. If the House votes to adhere, that is notice to the Senate, apparently, that the House will not yield.

Mr. LIVINGSTON. Mr. Speaker, I move as a substitute to the motion of the gentleman from Pennsylvania [Mr. BINGHAM] that the House adhere to its disagreement to all of the amendments.

The SPEAKER. What is the amendment of the gentleman?

Mr. BINGHAM. That the House further insist on its disagreement to amendment No. 46, increasing the salary of the Speaker.

Mr. LIVINGSTON. My substitute is, Mr. Speaker, that the House adhere to its disagreement.

The SPEAKER. The vote would have to be taken, first, on the motion to insist, and, second, on the motion to adhere, if the former motion is voted down.

The question is on the motion of the gentleman from Pennsylvania [Mr. BINGHAM].

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. MANN. I ask for a division, Mr. Speaker.

The House divided; and there were—ayes 150, noes 8.

So the motion was agreed to.

Mr. LIVINGSTON. A parliamentary inquiry, Mr. Speaker. Does that send it back to the conference without any further legislation here?

The SPEAKER. This is a motion to further insist on the disagreement to the amendment indicated. Several motions remain to be disposed of.

Mr. SULZER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SULZER. What is the amendment, Mr. Speaker?

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 11, line 11, after "dollars," insert "provided that the salary of the Speaker of the House of Representatives after March 3, 1909, shall be $15,000."

Mr. SULZER. Mr. Speaker, I am in favor of that, and I desire to be recorded as in favor of it.

The SPEAKER. That will make the vote in the affirmative 151.

Mr. BINGHAM. Mr. Speaker, I move that the House insist on its amendment to the amendments of the Senate Nos. 60 and 61, fixing the salary of the President at $75,000 a year instead of $100,000 as proposed by the Senate. I ask for a vote.

The SPEAKER. The gentleman from Pennsylvania moves that the House do further insist on its disagreement to the Senate amendments Nos. 60 and 61. The Clerk will report the two amendments.

The Clerk read as follows:

Amendment numbered sixty: Page 37, line 14, strike out "fifty" and insert "seventy-five."

Amendment numbered sixty-one: Page 37, line 14, after "dollars," insert:

"This sum to include all transportation expenses now otherwise provided for by law, and after the 3d of March, 1909, the compensation of the President of the United States shall be $75,000 per annum."

The SPEAKER. As the Chair understands it, that is a concurrence in the Senate amendment with an amendment?

Mr. MANN. A parliamentary inquiry.

Mr. BINGHAM. The motion is to further insist.

Mr. KEIFER. I think there is some misunderstanding.

Mr. MANN. The Senate has disagreed to the amendment of the House to the Senate amendment, and this is a motion——

The SPEAKER. And the motion is, then, that the House do further insist?

Mr. MANN. Upon its amendment to the Senate amendment.

Mr. BINGHAM. To further insist, taking the instruction of the House.

The SPEAKER. The question is on the motion that the House further insist upon its amendment to the Senate amendments, which House amendment provides that the salary of the President shall be $75,000.

The question was taken, and the motion was agreed to.

Mr. BINGHAM. Mr. Speaker, I move that the House do further insist on its disagreement to the amendments of the Senate Nos. 62 and 63, increasing the salary of the Vice-President. I call for a vote.

The SPEAKER. The Clerk will report the amendments.

The Clerk read as follows:

Amendment No. 62: Page 37, line 16, strike out "twelve" and insert "fifteen."

Amendment No. 63: Page 37, line 16, after "dollars," insert "to take effect on March 4, 1909."

The SPEAKER. The question is on the motion of the gentleman from Pennsylvania [Mr. BINGHAM].

The question was taken and the motion was agreed to.

Mr. BINGHAM. Mr. Speaker, I have read them to the House, and I made the motion that the House insist upon all the remaining amendments.

The SPEAKER. The gentleman from Pennsylvania moves that the House do insist upon its disagreement to the remaining Senate amendments not already disposed of.

Mr. BINGHAM. And I wish to add to that, Mr. Speaker, also to agree to a conference.

Mr. MANN. Let this motion be by itself. I ask for a division.

The SPEAKER. The question is on the motion of the gentleman from Pennsylvania that the House do insist on its disagreement to the remaining Senate amendments not disposed of.

The question was taken, and the motion was agreed to.

Mr. MANN. Mr. Speaker, I ask for a division.

The House divided, and there were—ayes 160, noes none.

So the motion was agreed to.

Mr. BINGHAM. Mr. Speaker, I now ask for a further conference.

The SPEAKER. The gentleman from Pennsylvania moves that the House do assent to a further conference with the Senate.

Mr. FITZGERALD. I suggest to the gentleman what is the necessity for a conference?

Mr. GILLETT. I think it would be wise, Mr. Speaker, to have a conference. I think a final agreement will be made after the decisive vote that has been given by the House.

Mr. FITZGERALD. Has the gentleman in mind a compromise on some of these amendments?

Mr. GILLETT. That remains to be seen.

Mr. FITZGERALD. I wish to know if the gentleman can indicate what it is?

Mr. GILLETT. I do not know.

Mr. FITZGERALD. But I think the House ought to know something about it. Has the gentleman a compromise in his mind to make on some of these amendments?

Mr. GILLETT. I have a compromise in my own mind that I should like to see effected.

Mr. FITZGERALD. Does it include those new officers for the Secretary of State?

Mr. GILLETT. I do not think I am called upon to give my opinion as to what can be accomplished.

Mr. FITZGERALD. I am trying to ascertain the views of the conferees. I want to know if it is the purpose to get the Senate to recede on some conditions.

Mr. LIVINGSTON. I want to say to the gentleman from New York that, so far as I am concerned, there is no compromise proposed nor no compromise understood to be acceptable.

Mr. FITZGERALD. I did not understand that the gentleman from Georgia would be taken into the confidence of the managers.

Mr. GILLETT. I think after this pronounced vote, unanimous almost on all the items, that the Senate conferees ought to be prepared to concede a great deal. Now, the gentleman means, I take it, that there is a scheme by the conferees to secure some compromise, but I think if the House will allow it to go into conference this way we can get a final agreement. I do not think we can go there successfully with the blunt assertion that the Senate must back down on practically all the items and that there is no possibility of our yielding anything, but it is our purpose to have a real conference and try to further agree.

Mr. FITZGERALD. As to these three items of the House, I am emphatic, and I wish the position of the House to be maintained. This is the third time that the bill has been in conference.

Mr. BINGHAM. The gentleman should not include the first conference. There we met with what was alleged to be a constitutional disability. There is no disposition, so far as the House conferees are concerned, to yield. We are asking the instruction of the House. In our discussion with the Senate we suppose that we may have to make some concession. I recognize one as to the President.

Mr. FITZGERALD. I wish to be perfectly frank. I am opposed utterly to the creation of the additional places in the office of the Secretary of State at this time, and if it is proposed to have the Senate yield on everything else and to practically purchase their agreement by conceding something to those places, I shall oppose that to the uttermost.

Mr. BINGHAM. The conferees feel that there is no necessity of instruction, after the almost unanimous vote, and we will make an effort to adjust the matter with the Senate.

Mr. FITZGERALD. There seems to be some doubt as to what is in the minds of the conferees.

Mr. PAYNE. I would suggest to my colleague the House already has practically unanimously insisted on disagreement. If he should make the motion to adhere, many Members of the House would vote against that motion, and it seems to me that it would weaken the House's position. Of course, when it comes in again a motion to adhere could be made. It would be better to leave it as it is with the unanimous vote that has been taken by the House.

Mr. MANN. Mr. Speaker, it seems to me the necessity for agreeing to the conference is the fact that the amendment as to the salary of the President is properly in conference. The Senate may accede to the amendment. But we are in a position where the Senate has disagreed and asked for a conference. We can not with due courtesy to the Senate refuse a conference on that item. We might have adhered to the other items, but I take it that the vote here, 160 to 0, disagreeing to all of the amendments relating to the salaries of judges and the additional places of the office of the Secretary of State, that the gentlemen who represent the House will represent the sentiment of the House and under no condition yield on those items. [Cries of "Vote!"]

The question was taken, and the motion was agreed to.

The SPEAKER. The Chair announces the following conferees: Mr. BINGHAM, Mr. GILLETT, and Mr. LIVINGSTON.

PENSIONS OTHER THAN CIVIL WAR.

The SPEAKER laid before the House the bill (S. 9421) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors, with House amendment disagreed to by the Senate.

Mr. LOUDENSLAGER. Mr. Speaker, I move that the House insist on its amendment and agree to the conference requested by the Senate.

The motion was agreed to.

The SPEAKER. The Chair announces the appointment as conferees on the part of the House Mr. LOUDENSLAGER, Mr. DRAPER, and Mr. RICHARDSON.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed without amendment bills of the following titles:

H. R. 28305. An act to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State and to detach it from the Fort Worth division of said court;

H. R. 28175. An act to amend section 4434 of the Revised Statutes of the United States, and for other purposes;

H. R. 24995. An act for the relief of Nathaniel Huntley;
H. R. 24327. An act to make Corry, Pa., a port of delivery in the district of Erie, Pa., and extending to it the privileges of section 7 of the act of June 10, 1880;
H. R. 21571. An act for the relief of John T. Freeman;
H. R. 21492. An act to authorize the sale of certain public lands;
H. R. 19655. An act providing for an additional judge for the southern district of New York, and for other purposes;
H. R. 15755. An act for the relief of J. C. Haggard, of White County, Tenn.;
H. R. 13928. An act for the relief of P. H. McDonough, of Bardstown, Ky.;
H. R. 9755. An act for the relief of Charles Lennig & Co.;
H. R. 8947. An act for the relief of the Herman Andrae Electrical Company, of Milwaukee, Wis.;
H. R. 8558. An act for the relief of R. J. B. Newcombe;
H. R. 8545. An act for the relief of Jackson Pryor;
H. R. 7048. An act for the relief of Henry A. Tolbert;
H. R. 4521. An act to reorganize and enlist the members of the United States Naval Academy Band; and
H. R. 2911. An act for the relief of F. S. Jette & Son, of Savannah, Chatham County, Ga., for damage done to their wharf by U. S. dredge *Cumberland*.

The message also announced that the Senate had passed the following resolution, in which the concurrence of the House of Representatives was requested:

Senate concurrent resolution 96.

Resolved by the Senate (the House of Representatives concurring), That, for a better understanding of the requirements of Alaska in these respects, and to the end that a more systematic plan may be adopted, if found necessary, for the development of its resources, the Secretary of War be, and he is hereby, authorized to cause an examination to be made of the need for further road improvement in Alaska, in connection with the military and post roads, bridges, and trails, now being constructed under War Department supervision, and to report thereupon, with recommendations, at the earliest practicable date.

The message also announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 28059. An act making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes.

SENATE BILLS AND RESOLUTION REFERRED.

Under clause 2 of Rule XXIV, Senate bills and concurrent resolution of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 9405. An act to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River in the State of Indiana—to the Committee on Interstate and Foreign Commerce.

S. 8200. An act for the relief of C. M. Cox—to the Committee on Claims.

Senate concurrent resolution 96.

Resolved by the Senate (the House of Representatives concurring), That for a better understanding of the requirements of Alaska in these respects, and to the end that a more systematic plan may be adopted, if found necessary, for the development of its resources, the Secretary of War be, and he is hereby, authorized to cause an examination to be made of the need for further road improvement in Alaska, in connection with the military and post roads, bridges, and trails, now being constructed under War Department supervision, and to report thereupon, with recommendations, at the earliest practicable date—

to the Committee on the Territories.

ENROLLED BILLS SIGNED.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolution of the following titles, when the Speaker signed the same:

H. R. 28193. An act to authorize the city of Shreveport to construct a bridge across Red River;
H. R. 16743. An act for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes;
H. R. 27523. An act making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1910;
H. R. 23717. An act to extend the time for construction and beginning construction of the Alaska Short Line Railroad in Alaska;
H. R. 5728. An act for the relief of James H. De Coster;
H. R. 27061. An act to provide for the appointment of one additional district judge in and for the western district of Washington and one additional district judge in and for the district of Oregon;
H. R. 28046. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors; and
H. J. Res. 265. Joint resolution to rearrange and reconstruct the Hall of the House of Representatives, and for other purposes.

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 8654. An act for the relief of certain occupants of unsurveyed public lands in Craighead County, Ark.;
S. 5729. An act to correct the records and authorize the reenlistment of certain noncommissioned officers and enlisted men belonging to Companies B, C, and D of the Twenty-fifth U. S. Infantry, who were discharged without honor under Special Orders, No. 266, War Department, November 9, 1906, and the restoration to them of all rights of which they have been deprived on account thereof;
S. 8554. An act authorizing the Secretary of the Interior to sell part or all of the surplus lands of members of the Kaw or Kansas and Osage tribes of Indians in Oklahoma, and for other purposes; and
S. 9242. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to the widows and dependent and helpless relatives of such soldiers and sailors.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 27523. An act making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1910;
H. R. 16743. An act for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes;
H. R. 4286. An act for the relief of John Shull; and
H. R. 15681. An act for the relief of the Compañía de los Ferrocarriles de Puerto Rico.

PENSIONS.

The SPEAKER laid before the House the bill (H. R. 27469) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors, with Senate amendments thereto.

Mr. SULLOWAY. I move that the House concur in the Senate amendments.

The motion was agreed to.

The SPEAKER also laid before the House the bill (S. 9278) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war, and to certain dependent relatives of such soldiers and sailors, with House amendments disagreed to by the Senate.

Mr. LOUDENSLAGER. I move that the House further insist on its amendments, and agree to the conference requested by the Senate.

The motion was agreed to; and the Speaker appointed as conferees on the part of the House Mr. LOUDENSLAGER, Mr. DRAPER, and Mr. RICHARDSON.

The SPEAKER also laid before the House the bill (H. R. 28047) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the civil war and to widows and dependent relatives of such soldiers and sailors, with Senate amendments thereto.

Mr. LOUDENSLAGER. I move that the House concur in the Senate amendments.

The motion was agreed to.

MILITARY ACADEMY APPROPRIATION BILL.

The SPEAKER also laid before the House the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes, with Senate amendments thereto.

Mr. HULL of Iowa. I move that the House disagree to the Senate amendments and ask for a conference.

The motion was agreed to, and the Speaker announced as conferees on the part of the House Mr. HULL of Iowa, Mr. CAPRON, and Mr. SULZER.

PUBLIC BUILDINGS.

The SPEAKER also laid before the House the bill (H. R. 28167) to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public-building acts, and for other purposes, with Senate amendments thereto.

Mr. BARTHOLDT. I move to nonconcur in the Senate amendments and ask for a conference.

The motion was agreed to, and the Speaker appointed as conferees on the part of the House Mr. BARTHOLDT, Mr. BURLEIGH, and Mr. BRANTLEY.

SENATE BILLS ON THE PRIVATE CALENDAR.

Mr. MANN. Mr. Speaker, this morning the House adopted an order making Senate bills on the Private Calendar in order to-day where objection was not made by two Members. I ask unanimous consent that that order extend over to-morrow, the calendar day of Tuesday.

Mr. SHACKLEFORD. Mr. Speaker, I object.

The SPEAKER. The gentleman from Missouri objects. Does the gentleman from Illinois desire to call the calendar now?

Mr. SHACKLEFORD. Mr. Speaker, I withdraw the objection.

The SPEAKER. The gentleman from Missouri withdraws his objection. Is there objection?

There was no objection.

LEAVE TO WITHDRAW PAPERS.

By unanimous consent, at the request of Mr. BANNON, leave was granted to withdraw from the files of the House, without leaving copies, the papers in the case of William Stokely (H. R. 27159), Sixtieth Congress, no adverse report having been made thereon.

LEAVE TO EXTEND REMARKS.

By unanimous consent, leave was granted to Mr. DE ARMOND and to Mr. CLARK of Missouri to extend in the RECORD their remarks of this day.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. PATTERSON, indefinitely, on account of illness.

RECESS.

Mr. PAYNE. Mr. Speaker, I move that the House do now take a recess until 11 o'clock to-morrow morning.

The motion was agreed to.

Accordingly (at 5 o'clock and 54 minutes p. m.) the House took a recess until Tuesday, March 2, 1909, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the Secretary of Commerce and Labor, transmitting a response to the inquiry of the House as to admission of aliens into the United States (H. Doc. 1494), was taken from the Speaker's table, referred to the Committee on Immigration and Naturalization, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. WILSON of Illinois, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill of the House (H. R. 27371) to establish a fish-cultural station in the State of Pennsylvania, reported the same without amendment, accompanied by a report (No. 2290), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BURTON of Delaware, from the Committee on Railways and Canals, to which was referred the bill of the House (H. R. 20775) to provide for the acquisition and improvement of the Chesapeake and Delaware Canal, reported the same with amendments, accompanied by a report (No. 2291), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. WANGER, from the Committee on Expenditures in the Post-Office Department, under authority granted by the House, submitted a report (No. 2294) upon its investigations of the expenditures in the Post-Office Department, which report was ordered printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. OVERSTREET: A bill (H. R. 28406) to codify, revise, and amend the postal laws of the United States—to the Committee on the Post-Office and Post-Roads.

By Mr. FLOOD: A bill (H. R. 28407) to create a commission to prepare a code of laws for the regulation and control of insurance companies doing business within the District of Columbia—to the Committee on the District of Columbia.

By Mr. McGUIRE: A bill (H. R. 28408) conferring jurisdiction on the Court of Claims to hear, determine, and render judgment in claims of the Pawnee tribe of Indians against the United States—to the Committee on Indian Affairs.

By Mr. LANGLEY: A bill (H. R. 28409) to provide for the erection of a monument on the Middle Creek battle ground, Floyd County, Ky., in memory of the late Gen. James A. Garfield—to the Committee on the Library.

Also, a bill (H. R. 28410) to provide for the erection of a monument over the grave of Willie C. Dills—to the Committee on the Library.

By Mr. COLE: A bill (H. R. 28411) to grant two cannons to Ohio Northern University, at Ada, Ohio—to the Committee on Military Affairs.

By Mr. HUMPHREY of Washington: Resolution (H. Res. 606) directing the Secretary of War to cause to be made an examination of the need of further road improvement in Alaska—to the Committee on the Territories.

By Mr. ELLIS of Oregon: Memorial of the legislature of Oregon, in favor of the United States acquiring title to deforested areas—to the Committee on Agriculture.

Also, memorial of the legislature of Oregon, asking for the removal of duty on burlap cloth used in the manufacture of grain, hop, and wool bags—to the Committee on Ways and Means.

Also, memorial of the legislature of Oregon, in favor of legislation against shipping intoxicating liquors into territory where its sale is prohibited by local option or prohibition laws—to the Committee on Interstate and Foreign Commerce.

Also, memorial of the legislature of Oregon, in favor of instruction in forestry in agricultural and mechanical colleges—to the Committee on Agriculture.

Also, memorial of the legislature of Oregon, in favor of liberal appropriations in behalf of conservation commission—to the Committee on Appropriations.

By Mr. ESCH: Memorial of the legislature of Wisconsin, asking the Congress of the United States to enact into law H. R. 39—to the Committee on Military Affairs.

By Mr. CARY: Memorial of the legislature of Wisconsin, asking the Congress of the United States to enact into law H. R. 39—to the Committee on Military Affairs.

By Mr. FRENCH: Memorial of the legislature of Idaho, asking federal aid in improvement of navigation at Albany Falls and Pend Oreille River—to the Committee on Rivers and Harbors.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. BENNET of New York: A bill (H. R. 28412) granting a pension to Edward Wilson—to the Committee on Invalid Pensions.

By Mr. HOBSON: A bill (H. R. 28413) for relief of heirs or estate of Jacob Holbrook, sr., deceased—to the Committee on War Claims.

Also, a bill (H. R. 28414) for the relief of heirs or estate of Jessie R. Northington—to the Committee on War Claims.

Also, a bill (H. R. 28415) for relief of heirs or estate of Dr. R. O. Perrin, deceased—to the Committee on War Claims.

Also, a bill (H. R. 28416) for the relief of heirs or estate of Jessie L. Taylor, deceased—to the Committee on War Claims.

By Mr. HULL of Tennessee: A bill (H. R. 28417) granting an increase of pension to John Reed—to the Committee on Invalid Pensions.

By Mr. ADDISON D. JAMES: A bill (H. R. 28418) for the relief of George H. Galloway, administrator of the estate of Logan M. Dishman, deceased—to the Committee on War Claims.

By Mr. LANGLEY: A bill (H. R. 28419) granting an increase of pension to James A. Stamper—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28420) granting an increase of pension to Thomas F. Clutts—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28421) for the relief of Merida Risner—to the Committee on War Claims.

Also, a bill (H. R. 28422) to correct the military record of Clark Williams—to the Committee on Military Affairs.

By Mr. RAUCH: A bill (H. R. 28423) granting an increase of pension to John Vetor—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28424) granting an increase of pension to Christopher U. Rumpp—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28425) granting a pension to Clarinda H. Armstrong—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28426) granting a pension to Annie Snyder—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ANSBERRY: Petition of Harley & Whittaker, of Defiance, Ohio, favoring removal of duty on oilcloth and linoleum—to the Committee on Ways and Means.

By Mr. BELL of Georgia: Petition of E. W. Vance, favoring removal of the duty on hides—to the Committee on Ways and Means.

Also, petition of Jackson A. Watkins and others, favoring an effective Asiatic exclusion law against all Asiatics excepting merchants, students, and travelers—to the Committee on Foreign Affairs.

By Mr. BENNET of New York: Paper to accompany bill for relief of Edward Wilson—to the Committee on Invalid Pensions.

By Mr. BURLEIGH: Petition of citizens of Maine, favoring parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

By Mr. BURTON of Delaware: Petition of the Yellow Pine Manufacturers' Association, of Minneapolis, against repeal of tariff on lumber—to the Committee on Ways and Means.

Also, petition of Federation of Jewish Organizations, for an office of Jewish chaplain in the army and navy—to the Committee on Naval Affairs.

By Mr. CANDLER: Paper to accompany bill for relief of R. I. McCalla, heir of J. M. McCalla—to the Committee on War Claims.

By Mr. CHAPMAN: Petition of the Cairo Commercial Club and the Board of Trade of Cairo, Ill., favoring appropriation of not less than $50,000,000 per annum for internal waterway improvement—to the Committee on Rivers and Harbors.

By Mr. DALZELL: Petition of citizens of Swissvale, Pa., favoring parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. DAWSON: Petition of S. E. Day and other citizens of Iowa, against a duty on tea and coffee—to the Committee on Ways and Means.

By Mr. DOUGLAS: Petition of Amesville (Ohio) Grange, No. 798, favoring a national highways commission—to the Committee on Agriculture.

By Mr. DUREY: Petition of residents of Fort Hunter, N. Y., for legislation against shipment of alcoholic beverages into prohibition territory—to the Committee on Interstate and Foreign Commerce.

By Mr. ELLIS of Missouri: Paper to accompany bill for relief of estate of Joseph M. Wade (H. R. 19907)—to the Committee on War Claims.

By Mr. ELLIS of Oregon: Petition of P. Jensen and 204 other employees of the Clark & Wilson Lumber Company, of Linnton, Oreg., against removal of the duty on lumber—to the Committee on Ways and Means.

By Mr. ESCH: Petition of the Providence (R. I.) Public Library, against increase of duty on books—to the Committee on Ways and Means.

Also, petition of La Crosse (Wis.) Lodge, No. 300, Benevolent and Protective Order of Elks, for an American elk reservation in Wyoming—to the Committee on the Public Lands.

By Mr. FULLER: Petition of the National Shoe Wholesale Association, against a duty on hides—to the Committee on Ways and Means.

Also, petition of Manufacturers' Association of Indianapolis, favoring the ocean mail bill—to the Committee on the Post-Office and Post-Roads.

Also, petition of F. B. Bodt & Co., of Chicago, Ill., favoring increase of duty on electric-light carbons—to the Committee on Ways and Means.

Also, petition of Local Union No. 169, International Brotherhood of Stationary Firemen, of Rockford, Ill., favoring H. R. 16880, to license firemen and water tenders in the District of Columbia—to the Committee on the District of Columbia.

Also, petition of First National Bank of Ottawa, Ill., opposing parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

Also, petition of H. B. Fuller, in behalf of the Brotherhood of Locomotive Engineers, Firemen, and Trainmen, in opposition to the Watson bill (H. R. 26725), concerning safety appliances on locomotives—to the Committee on Interstate and Foreign Commerce.

Also, petition of the Chamber of Commerce of Pittsburg, Pa., favoring an appropriation of not less than $50,000,000 for inland waterway improvement—to the Committee on Rivers and Harbors.

Also, memorial of the legislature of the State of Wyoming, favoring the Mondell bill, providing for 320-acre homestead—to the Committee on the Public Lands.

Also, petition of the American Lumberman, of Chicago, Ill.; Frederick J. Wright, of St. Joseph, Mo.; the Vredenburgh Saw Mill Company, of Pine Hill, Ala.; and the Yellow Pine Manufacturers' Association, of St. Louis, Mo., against removal of the duty on lumber—to the Committee on Ways and Means.

Also, petition of Engineers' Society of Western Pennsylvania, favoring an appropriation to establish a bureau of mines—to the Committee on Mines and Mining.

Also, petition of the Louisiana Purchase Exposition department of press and publicity, favoring proposition before the Committee on Appropriations for a monument to Thomas Jefferson—to the Committee on Appropriations.

Also, petition of the National Lime Manufacturers' Association, for an appropriation to enable the Geological Survey to investigate lime manufacture—to the Committee on Appropriations.

Also, petitions of La Salle Lodge, No. 584, and Ottawa Lodge, No. 588, Benevolent and Protective Order of Elks, for an American elk reservation in Wyoming—to the Committee on the Public Lands.

By Mr. FULTON: Papers to accompany bills for relief of Priscilla McCarty (H. R. 27097), William Hardenbrook (H. R. 25621), Henry H. Brunsteter (H. R. 24383), and William E. Woodward (H. R. 19908)—to the Committee on Invalid Pensions.

Also, paper to accompany bill H. R. 20516—to the Committee on Public Buildings and Grounds.

By Mr. GAINES of Tennessee: Paper to accompany bill for relief of Miss J. A. Elliott, heir of Thomas A. Elliott and Adaline Elliott—to the Committee on War Claims.

By Mr. GARDNER of New Jersey: Petitions of citizens of Risley, N. J.; Medford Grange, No. 36; and Vineland Grange, No. 11, favoring a national highways commission and appropriation for federal aid in construction and improvement of highways (H. R. 15837)—to the Committee on Agriculture.

Also, petition of the Vineland (N. J.) Grape Juice Company, favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

Also, petitions of Atlantic City (N. J.) Lodge, No. 276; Bridgeton (N. J.) Lodge, No. 733; Millville (N. J.) Lodge, No. 580; Burlington (N. J.) Lodge, No. 996; and Mount Holly (N. J.) Lodge, No. 848, Benevolent and Protective Order of Elks, for an American elk reservation in Wyoming—to the Committee on the Public Lands.

By Mr. GILHAMS: Petition of citizens of Tremont, Ind., favoring legislation to give $1 per day pension to all Union soldiers of the civil war and Mexican war—to the Committee on Invalid Pensions.

Also, petition of G. W. Hirst Council, No. 132, Junior Order United American Mechanics, favoring an exclusion law against Asiatics, save merchants, students, and travelers—to the Committee on Foreign Affairs.

SENATE.

TUESDAY, *March 2, 1909.*

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Edward E. Hale.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. KEAN, and by unanimous consent, the further reading was dispensed with.

The VICE-PRESIDENT. The Journal stands approved.

SALARIES OF DISTRICT JUDGES.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a letter from the Attorney-General submitting an estimate of appropriation for the salaries of additional district judges for the western district of Pennsylvania, the western district of Washington, and the district of Oregon (S. Doc. No. 750), which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

THE POSTAL SERVICE.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting estimates of deficiency in appropriations for postal services payable from the postal revenues, as allowed and submitted by the Auditor for the Post-Office Department, $123,189,20 (S. Doc. No. 749), which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

C. F. SUGG.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting an estimate of appropriations to enable the Secretary of the Treasury to pay to C. F. Sugg, of Hales Point, Lauderdale County, Tenn., $79.95 for damages inflicted upon gasoline steamer *Clyde* by light-house tender *Oleander*, etc. (S. Doc. No. 751), which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

INDIAN DEPREDATION CLAIMS.

The VICE-PRESIDENT laid before the Senate a communication from the Attorney-General, transmitting, in response to a resolution of the 25th ultimo, a list of judgments rendered by the Court of Claims in favor of claimants in Indian depredation cases not heretofore reported (S. Doc. No. 747), which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

LIST OF JUDGMENTS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 1st instant, a list of judgments rendered by the Court of Claims, amounting to $56,866, which have not been heretofore presented to Congress (S. Doc. No. 745), which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

LIST OF CLAIMS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 1st instant, a schedule of claims allowed by the accounting officers of the Treasury under appropriations of balances which have been exhausted or carried to the surplus under the provisions of section 5 of the act of June 30, 1874, $96,573.34 (S. Doc. No. 746), which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

ESTIMATES OF APPROPRIATIONS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a letter from the Attorney-General submitting additional estimates of appropriations for salaries, etc., for court, Territory of Hawaii; salaries governor, etc., Territory of Alaska; salaries governor, etc., Territory of New Mexico, etc. (S. Doc. No. 748), which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the amendments of the Senate to the following bills:

H. R. 27049. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27249. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the civil war and to widows and dependent relatives of such soldiers and sailors;

H. R. 27469. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27974. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors; and

H. R. 28047. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the civil war and to widows and dependent relatives of such soldiers and sailors.

The message also announced that the House insists upon its amendments to the bill (S. 9421) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain widows and dependent and helpless relatives of such soldiers and sailors, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. LOUDENSLAGER, Mr. DRAPER, and Mr. RICHARDSON managers at the conference on the part of the House.

The message further announced that the House insists upon its amendments to the bill (S. 9278) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war and to certain dependent relatives of such soldiers and sailors, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. LOUDENSLAGER, Mr. DRAPER, and Mr. RICHARDSON managers at the conference on the part of the House.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 8899) granting pensions and increase of pensions to soldiers and sailors of wars other than the civil war and to certain widows and dependent relatives of such soldiers and sailors.

The message further announced that the House insists upon its amendments to the bill (S. 6055) to amend section 691 of subchapter 7, building associations, of the Code of Law for the District of Columbia, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SMITH of Michigan, Mr. MOORE of Pennsylvania, and Mr. BRODHEAD managers at the conference on the part of the House.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 28167) to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public-building acts, and for other purposes, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. BARTHOLDT, Mr. BURLEIGH, and Mr. BRANTLEY managers at the conference on the part of the House.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. HULL of Iowa, Mr. CAPRON, and Mr. SULZER managers at the conference on the part of the House.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, still further insists upon its disagreement to the amendments of the Senate upon which the committee of conference have been unable to agree, agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. BINGHAM, Mr. GILLETT, and Mr. LIVINGSTON managers at the conference on the part of the Senate.

RICHMOND LIGHT INFANTRY BLUES.

Mr. MARTIN. I ask unanimous consent for the present consideration of the bill (H. R. 8661) for the relief of Richmond Light Infantry Blues, of Virginia.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to pay to the Richmond Light Infantry Blues, of the State of Virginia, $1,788.48, in full settlement for their claim for clothing and other quartermaster supplies which were taken by the members thereof into the service of the United States in 1898 during the war with Spain, and worn-out or lost or destroyed therein through no fault of their own.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a memorial of New York Division, Sons of Veterans, of Mount Vernon, N. Y., remonstrating against any appropriation being made for the erection of monuments to the memory of men who were connected with the confederate army, which was referred to the Committee on Military Affairs.

He also presented a memorial of Shingle Weavers' Union, No. 61, American Federation of Labor, of Raymond, Wash., remonstrating against the decision of the supreme court of the District of Columbia in imposing a jail sentence on Gompers, Mitchell, and Morrison, which was referred to the Committee on the Judiciary.

He also presented a memorial of the Allied Printing Trades Council, of Sacramento, Cal., remonstrating against the printing in connection with the Census Office being given to private concerns, which was referred to the Committee on the Census.

Mr. BRANDEGEE presented a petition of Local Lodge No. 1010, Benevolent and Protective Order of Elks, of Bristol, Conn., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which was referred to the Committee on Forest Reservations and the Protection of Game.

Mr. BULKELEY presented a petition of Local Lodge No. 899, Benevolent and Protective Order of Elks, of Stamford, Conn., and a petition of Local Lodge No. 1010, Benevolent and Protective Order of Elks, of Bristol, Conn., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

Mr. GALLINGER presented a petition of Local Lodge No. 184, Benevolent and Protective Order of Elks, of Dover, N. H., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a petition of the Christian Endeavor Union, of Washington, D. C., praying for the enactment of legislation to regulate the sale of intoxicating liquors in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of the New Hampshire Federation of Women's Clubs, of Plymouth, N. H., praying for the passage of the so-called "children's bureau" bill, which was ordered to lie on the table.

Mr. HANSBROUGH presented a concurrent resolution of the legislature of North Dakota, which was referred to the

Committee on Education and Labor and ordered to be printed in the RECORD, as follows:

Concurrent resolution.

Whereas the employment of children in shops and factories and for long hours is detrimental to the general health and welfare; and

Whereas the most progressive and enlightened nations have enacted child-labor laws preventing and prohibiting such employment; and

Whereas the United States of America has taken a stand in the vanguard of reform legislation and progress: Therefore be it

Resolved by the senate (the house of representatives concurring), That the Congress of the United States be memorialized and earnestly urged to pass the most progressive and advanced laws upon this subject, and that our Representatives in Congress be requested and instructed to work for and support such national legislation on this subject as will best protect the interests of the children and the home; and be it further

Resolved, That a duly certified copy of this memorial be by the secretary of the senate forwarded to each member of the North Dakota delegation in Congress.

I hereby certify that the above resolution originated in the senate and was concurred in by the house of representatives of the eleventh legislative assembly of the State of North Dakota.

JAMES W. FOLEY, *Secretary*.

Mr. HANSBROUGH presented a concurrent resolution of the legislature of North Dakota, which was referred to the Committee on Commerce and ordered to the printed in the RECORD, as follows:

Concurrent resolution.

A concurrent resolution memorializing the Congress of the United States to provide by law for the improvement of the rivers, harbors, and waterways, and the issuance of bonds therefor.

Whereas the United States Government should immediately take into hand the improvement of the rivers, harbors, and waterways of the country, and that a large sum of money should be appropriated for that purpose; and

Whereas it seems fair and right that future generations who will reap the great benefits should share a portion of the expense; and

Whereas the 2 per cent bonds of the Government sell readily at a premium and at the same time afford an attractive investment to certain classes of people who would otherwise hoard their money and keep it out of circulation; and

Whereas the National Rivers and Harbors Congress, which convened at Washington in December, 1908, composed of more than 3,000 representatives from all sections of the country, indorsed and recommended the expenditure of $500,000,000 by the General Government for these purposes and the issuance of 2 per cent bonds therefor, and similar action has been taken by other representative bodies: Therefore be it

Resolved by the senate (the house of representatives concurring), That the Congress of the United States be memorialized and earnestly urged to provide by law for the issuance by the Government of its 2 per cent bonds to the extent of $500,000,000 or more to carry forward the work which has already been approved by the engineers of the army and the Committee on Rivers and Harbors of the House of Representatives in the matter of the improvement of the rivers, harbors, and waterways of the country, and to carry forward such other new work as may be approved by the engineering department and Congress; be it further

Resolved, That a duly certified copy of this memorial be by the secretary of the senate forwarded to each Member of the North Dakota delegation in Congress.

I hereby certify that the above resolution originated in the senate and was concurred in by the house of the eleventh legislative assembly of the State of North Dakota.

JAMES W. FOLEY, *Secretary*.

Mr. PLATT presented a memorial of the Graphic Arts Company, of Buffalo, N. Y., remonstrating against the adoption of certain proposed amendments to the copyright law relating to lithographic and photo-engraving processes, which was referred to the Committee on Patents.

He also presented a petition of Local Lodge No. 474, Benevolent and Protective Order of Elks, of Auburn, N. Y., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented petitions of Edwin H. Davis, of Robert R. Reed, and Henry C. Wright, all of New York City; of F. Bissell, of Barnard College, New York, and of the American Civic Association of Harrisburg, Pa., praying for the enactment of legislation extending the operation of an act for the control and regulation of the waters of Niagara River and the preservation of Niagara Falls, which were ordered to lie on the table.

Mr. KNOX presented petitions of Local Union No. 825, of Ginter; Local Union No. 2246, of Moss Creek; Local Union No. 2297, of Brockwayville; Local Union No. 89, Shank Town; Local Union No. 1736, Rossiter; Local Union No. 2552, Pardus; Local Union No. 1848, Greenwich; Local Union No. 2003, Carrolltown; Local Union No. 2010, of Cymbria; Local Union No. 570, Portage; Local Union No. 1280, of Smokerun; Local Union No. 1139, of Grampian; Local Union No. 95, of Defiance; Local Union No. 1792, of Osceola Mills; Local Union No. 144, of Spangler; Local Union No. 2085, of Langdondale; Local Union No. 480, of Chambersville; Local Union No. 2306, of Masgrove; Local Union No. 865, of Arnot; Local Union No. 1784, of Dubois; Local Union No. 2484, Jefferson Line; Local Union No. 1798, of Ramsaytown; Local Union No. 2303, Monterey; Local Union No. 2310, of Shawmut; Local Union No. 145, of Hopewell; Local Union No. 908, of Lilly; Local Union No. 140, of Arcadia; Local Union No. 1186, of Fredell; Local Union No. 2722, of Dubois; Local Union No. 801, Munson Station; Local Union No. 1515, of Dixonville; Local Union No. 1269, of Elmora; Local Union No. 1859, of Sarah-Furnace; Local Union No. 2739, of Gipsy; Local Union No. 1445, of Broadtop City; Local Union No. 1633, of Ehrenfield; Local Union No. 472, of South Fork; Local Union No. 1370, of Morris Run; Local Union No. 837, of Fairmount City; Local Union No. 2034, of Osceola Mills; Local Union No. 150, of Portage; Local Union No. 2699, of Drain; Local Union No. 378, Glen Richey; Local Union No. 1489, of Clymer; Local Union No. 616, of Hastings; all of the United Mine Workers of America, in the State of Pennsylvania, praying for the enactment of legislation to create a bureau of mines and mining, which were ordered to lie on the table.

Mr. DOLLIVER presented petitions of Local Lodges Nos. 297, 106, 1122, 84, and 605, of Dubuque, Keokuk, Shenandoah, Burlington, and Creston, all of the Benevolent and Protective Order of Elks, in the State of Iowa, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a petition of the First Parish of Hingham, Mass., praying for the passage of the so-called "children's bureau bill," which was ordered to lie on the table.

He also presented a memorial of the Retail Hardware Association of Des Moines, Iowa, and a memorial of sundry business firms of Kellerton, Iowa, remonstrating against the passage of the so-called "rural parcels-post bill," which were referred to the Committee on Post-Offices and Post-Roads.

He also presented petitions of sundry citizens of Iowa, praying for the enactment of legislation providing for the continuation of the powers of the Bureau of Chemistry, Department of Agriculture, which were referred to the Committee on Agriculture and Forestry.

Mr. BRIGGS presented a memorial of the Cumberland Manufacturing Company, of Bridgeton, N. J., remonstrating against any further legislation inimical to the present pure-food law, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of the National Consumers' League of the Food Committee of the United States, praying for a continuation of the authority vested in the Bureau of Chemistry, relative to the present pure-food law, which was referred to the Committee on Agriculture and Forestry.

He also presented memorials of the Currie Company, of Atlantic City; of the Hammonton Trust Company, of Hammonton; of the board of directors of the First National Bank, of Seabright; and of the board of directors of the Fifth Ward Savings Bank, of Jersey City, all in the State of New Jersey, remonstrating against the passage of the so-called "postal savings banks bill," which were ordered to lie on the table.

He also presented a petition of Haddon Grange, No. 88, Patrons of Husbandry, of Haddonfield, N. J., praying for the passage of the so-called "postal savings banks bill," which was ordered to lie on the table.

He also presented a petition of the state board of agriculture, of Trenton, N. J., and a petition of the State Horticultural Society, of Trenton, N. J., praying for the enactment of legislation to prohibit the manufacture and sale of adulterated fungicides and insecticides, which were ordered to lie on the table.

He also presented a petition of the Essex County Teachers' Guild, of Newark, N. J., praying for the enactment of legislation to conserve the Hetch Hetchy Valley, in the State of California, which was referred to the Committee on Public Lands.

He also presented a petition of the Manufacturing Jewelers' Association of Newark, N. J., praying for the appointment of a permanent tariff commission, which was referred to the Committee on Finance.

He also presented memorials of the United Trades and Labor Council of Paterson; of Typographical Union No. 94, of Bayonne; of Local Lodge No. 248, American Federation of Mechanics, of Paterson; and of Typographical Union No. 103, of Newark, all in the State of New Jersey, remonstrating against authorizing the printing in connection with the Census Office being given to private concerns, which were referred to the Committee on the Census.

He also presented petitions of sundry citizens of New Jersey, praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors, which were referred to the Committee on the Judiciary.

He also presented petitions of the Men's Club of Hightstown; of Rev. F. B. Pullan, of East Orange; of H. C. Higbie, of Elizabeth; and of the congregation of the First Presbyterian Church

of Oceanic, all in the State of New Jersey, praying for the passage of the so-called "Burkett-Foelker antigambling race bill," which were referred to the Committee on the Judiciary.

He also presented memorials of the Elizabeth Nursery Company, of Elizabeth; of H. T. Jones, of Elizabeth; and of Bobbink & Atkins, of Rutherford, all in the State of New Jersey, remonstrating against the enactment of legislation providing for the inspection of nursery stock at the port of entry, which were referred to the Committee on Agriculture and Forestry.

He also presented a memorial of the West India Steamship Company, of New York City, N. Y., remonstrating against the enactment of legislation imposing a tax on vessels of foreign registry transporting merchandise between the ports of the United States and its insular possessions, which was referred to the Committee on Commerce.

He also presented the petition of W. N. Baron, of Jersey City, N. J., praying for the enactment of legislation providing for radio apparatus, instead of a radio-telegraph apparatus, to be used on vessels, which was ordered to lie on the table.

He also presented a petition of the New Jersey Editorial Association, of Newton, N. J., praying that an appropriation be made for the completion of the Garfield Monument at Long Branch, in that State, which was referred to the Committee on the Library.

Mr. CURTIS presented a concurrent resolution of the legislature of Kansas, which was ordered to lie on the table and be printed in the RECORD, as follows:

House concurrent resolution 21.

Whereas the National House of Representatives have declined to make any appropriation for the maintenance of the several pension agencies of the United States, and by this action on their part are making a strong effort to consolidate the eighteen agencies into one, to be located in the city of Washington; and

Whereas there are many pensioners on the rolls of the Topeka agency that are almost wholly dependent upon their pensions for their support and maintenance, and by such consolidation it would cause a delay of ten to fifteen days longer than it does now in receiving their pension checks from Washington, thereby, in a measure, working a hardship upon them; and

Whereas the Topeka (Kans.) agency is more nearly the center of the veteran population of the United States, and in consequence thereof the largest agency, and that the records will show transacts the business of the office at a less ratio of expense than other agencies, with less employees; and

Whereas a number of the clerks at said agency are veterans of the civil war, a large percentage of whom own their homes, and a removal of said agency to Washington would work a pecuniary loss to them should they be assigned to accompany the agency; and if not, work an injustice upon men well qualified and fitted by reason of their experience to perform any of the clerical labor assigned them, by reason of throwing them in competition with younger applicants for clerical positions in business life; and

Whereas should such contemplated consolidation take place and some or all of the veteran employees be thrown out of employment, it would work a hardship upon them in this, that owing to their advancing in age it would be impossible for them to embark or engage in any business for themselves or to obtain employment in any other capacity: Therefore be it

Resolved by the house of representatives of the State of Kansas (the Senate concurring therein), That we hereby earnestly protest against the consolidation of all the agencies into one, and that we urge and request our delegation in Congress to use all honorable means to defeat such a measure.

Resolved, That a copy of this resolution be transmitted to each of our Members of Congress and Senators, the President of the Senate, the Speaker of the House, and to the Senate and House Committees on Appropriations.

I hereby certify that the above concurrent resolution originated in the house, and passed that body February 4, 1909.

J. N. DOLLEY,
Speaker of the House.

W. T. BECK,
Chief Clerk of the House.

Passed the senate February 17, 1909.

W. J. FITZGERALD,
President of the Senate.

Z. E. WYANT,
Secretary of the Senate.

Approved February 23, 1909.

W. R. STUBBS,
Governor.

STATE OF KANSAS,
OFFICE OF THE SECRETARY OF STATE.

I, C. E. Denton, secretary of state of the State of Kansas, do hereby certify that the above and foregoing is a correct copy of the original enrolled bill now on file in my office.

In testimony whereof I have hereunto subscribed my name and affixed my official seal this 24th day of February, 1909.

C. E. DENTON,
Secretary of State.

Mr. DEPEW presented a petition of the Men's Club of the St. John's Methodist Episcopal Church of New Rochelle, N. Y., praying for the passage of the so-called "Burkett-Foelker antigambling race bill," which was referred to the Committee on the Judiciary.

He also presented a memorial of Long Island Division, No. 266, Brotherhood of Locomotive Engineers, of Long Island City, N. Y., remonstrating against the appointment of a permanent tariff commission, which was referred to the Committee on Finance.

He also presented a petition of the J. Hungerford Smith Company, of Rochester, N. Y., praying for a reduction of the duty on raw and refined sugar, which was referred to the Committee on Finance.

He also presented a petition of the Consumers' League, of New York City, N. Y., praying for the passage of the so-called "Children's bureau bill," which was ordered to lie on the table.

Mr. NIXON. I present a concurrent resolution of the legislaure of Nevada, of a telegram, relative to the payments of the annual installments by persons for water rights under the provisions of the reclamation act of June 17, 1902. I ask that the concurrent resolution be printed in the RECORD and referred to the Committee on Irrigation.

There being no objection, the concurrent resolution was referred to the Committee on Irrigation and ordered to be printed in the RECORD, as follows:

[Telegram.]

CARSON, NEV., *March 1, 1909.*

Hon. GEO. S. NIXON, *Washington, D. C.:*

Joint and concurrent resolution relative to a proposed act of Congress affording relief to settlers upon arid lands approved February 26, 1909.

Whereas the reclamation of the arid regions of the West by the Federal Government is bringing to the attention of the people of the United States the possibility of agricultural development under the irrigation system; and

Whereas conditions of which the settlers upon these lands have had no previous experience are constantly arising; and

Whereas many of these settlers are persons of limited means, and in many instances all their available resources have been expended in the erection of suitable buildings and in the purchase of teams, farming implements, and supplies; and

Whereas it is a well-known fact that more time, expense, and attention is required in the fitting of land for crops under a system of irrigation than under the natural conditions of rainfall; and

Whereas the Hon. GEORGE S. NIXON has introduced in the Senate of the United States a bill authorizing the Secretary of the Interior to grant extension of time for payments of the annual installments to any person who has made application for water rights under the provisions of the reclamation act of June 17, 1902, and to provide for graduated payments of such annual installments: Therefore be it

Resolved by the assembly (the senate concurring), That we urge upon our Representatives in Congress the importance and necessity of using all honorable means to secure the passage of this act; and be it further

Resolved, That copies of this resolution be wired by the secretary of state to Senators NEWLAND and NIXON and Representative BARTLETT.

W. G. DOUGLASS, *Secretary of State.*

Mr. LA FOLLETTE presented a joint resolution of the legislature of Wisconsin, which was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

Joint resolution asking Congress of the United States to enact into law H. R. 39.

Whereas it has come to the knowledge of the legislature of the State of Wisconsin that a measure is pending before the Congress of the United States (H. R. 39) intending to extend the limits of the Shiloh National Military Park for the purpose of showing, by appropriate markers, the movements of the confederate army in its approach to Shiloh and the movements of the Union Army, under General Halleck, in its advance from Shiloh to Corinth, and for making the said park accessible at all times to those who desire to visit it; and

Whereas this State, as well as the Government of the United States, the States of Illinois, Indiana, Iowa, Minnesota, Pennsylvania, Ohio, Alabama, and Tennessee, have expended large sums of money by erecting monuments therein and otherwise beautifying the same: It is therefore

Resolved, That the legislature of the State of Wisconsin respectfully asks and urges the Congress of the United States to enact at the earliest moment practicable said bill (H. R. 39) into law, so as to enable as many people as possible to visit this beautiful park, made historic by one of the most sanguinary battles fought during the civil war.

Resolved, That a copy of these resolutions be transmitted by the secretary of state to the Senate of the United States and to the House of Representatives of the United States and to each of the Senators and Representatives from this State.

JOHN STRANGE,
President of the Senate.

F. E. ANDREWS,
Chief Clerk of the Senate.

L. H. BANCROFT,
Speaker of the Assembly.

C. E. SHAFFER,
Chief Clerk of the Assembly.

JOSEPHINE DRAPER.

Mr. KEAN, from the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred Senate resolution 239, submitted by Mr. TELLER on the 4th ultimo, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate be, and he is hereby, authorized and directed to pay to Josephine Draper, widow of Charles S. Draper, late a messenger of the United States Senate, a sum equal to six months' salary at the rate he was receiving by law at the time of his demise, said sum to be considered as including funeral expenses and all other allowances.

TENNESSEE COAL AND IRON COMPANY.

Mr. CLARK of Wyoming. The Committee on the Judiciary was directed by the Senate (S. Res. 243) to report "whether, in the opinion of the committee, the President was authorized to permit the absorption of the Tennessee Coal and Iron Company by the United States Steel Corporation, as is shown by the message of the President (S. Doc. No. 762) in response to Senate resolution No. 240, this session."

I am instructed by that committee to say that they have been unable to agree upon any particular form of a report. The resolution is therefore reported back to the Senate without recommendation. I am further directed to ask that the individual members of that committee be allowed to submit their individual views later to the Senate, either individually or jointly with others.

The VICE-PRESIDENT. Does the Senator desire to have the resolution read or shall it go at once to the calendar?

Mr. CLARK of Wyoming. I do not think it is necessary to read it. I ask that permission be granted to individual members of the committee to present their views.

The VICE-PRESIDENT. Without objection, permission is granted. The resolution will be placed on the calendar.

Mr. CULBERSON subsequently said: From the Committee on the Judiciary, I submit the individual views of seven members of the committee on Senate resolution No. 243 reported this morning from the Committee on the Judiciary by the Senator from Wyoming [Mr. CLARK]. I ask that the views may be printed in the RECORD. Later on, when the other members of the committee have filed their views on the subject, I shall ask that the whole may be printed as a Senate document, but for the present I only ask that it be printed in the RECORD.

The VICE-PRESIDENT. In the absence of objection, that order will be made.

The views referred to are as follows:

UNITED STATES SENATE,
Washington, D. C., March 2, 1909.

The undersigned members of the Committee on the Judiciary submit the following as their views, in answer to Senate resolution No. 243, Sixtieth Congress, second session, which is as follows:

Resolved, That the Committee on the Judiciary be, and it is hereby, directed to report to the Senate, as early as may be practicable, whether, in the opinion of the committee, the President was authorized to permit the absorption of the Tennessee Coal and Iron Company by the United States Steel Corporation, as is shown by the message of the President in response to Senate resolution No. 240, this session.

The message of the President which is referred to in the resolution under consideration is as follows:

To the Senate:

In connection with the following resolution of the Senate, passed January 4, 1909—

"*Resolved*, That the Attorney-General be, and he is hereby, directed to inform the Senate—

"1. Whether legal proceedings under the act of July 2, 1890, have been instituted by him or by his authority against the United States Steel Corporation on account of the absorption by it, in the year 1907, of the Tennessee Coal and Iron Company, and if no such proceedings have been instituted, state the reason for such nonaction.

"2. Whether an opinion was rendered by him or under his authority as to the legality of such absorption; and if so, attach a copy if in writing, and if verbal state the substance of it"—

I transmit herewith the following letter from the Attorney-General:

OFFICE OF THE ATTORNEY-GENERAL,
Washington, January 6, 1909.

SIR: In accordance with your instructions, I have the honor to inclose you a certified copy of the resolution adopted by the Senate, wherein I am directed to inform the Senate whether legal proceedings under the act of July 2, 1890, have been instituted by me or by my authority against the United States Steel Corporation on account of the absorption by it, in the year 1907, of the Tennessee Coal and Iron Company. As you are aware, no such proceedings have been instituted.

I remain,
Yours, most respectfully and truly,
CHARLES J. BONAPARTE,
Attorney-General.

THE PRESIDENT,
The White House.

As to the transaction in question, I was personally cognizant of and responsible for its every detail. For the information of the Senate I transmit a copy of a letter sent by me to the Attorney-General on November 4, 1907, as follows:

THE WHITE HOUSE,
Washington, November 4, 1907.

MY DEAR MR. ATTORNEY-GENERAL: Judge E. H. Gary and Mr. H. C. Frick, on behalf of the Steel Corporation, have just called upon me. They state that there is a certain business firm (the name of which I have not been told, but which is of real importance in New York business circles) which will undoubtedly fail this week if help is not given. Among its assets are a majority of the securities of the Tennessee Coal Company. Application has been urgently made to the Steel Corporation to purchase this stock as the only means of avoiding a failure. Judge Gary and Mr. Frick inform me that as a mere business transaction they do not care to purchase the stock; that under ordinary circumstances they would not consider purchasing the stock, because but little benefit will come to the Steel Corporation from the purchase; that they are aware that the purchase will be used as a handle for attack upon them on the ground that they are striving to secure a monopoly of the business and prevent competition—not that this would represent what could honestly be said, but what might recklessly and untruthfully be said.

They further inform me that as a matter of fact the policy of the company has been to decline to acquire more than 60 per cent of the steel properties, and that this purpose has been persevered in for several years past, with the object of preventing these accusations, and as a matter of fact their proportion of steel properties has slightly decreased, so that it is below this 60 per cent, and the acquisition of the property in question will not raise it above 60 per cent. But they feel that it is immensely to their interest, as to the interest of every responsible business man, to try to prevent a panic and general industrial smash-up at this time, and that they are willing to go into this transaction, which they would not otherwise go into, because it seems the opinion of those best fitted to express judgment in New York that it will be an important factor in preventing a break that might be ruinous; and that this has been urged upon them by the combination of the most responsible bankers in New York who are now thus engaged in endeavoring to save the situation. But they asserted they did not wish to do this if I stated that it ought not to be done. I answered that while of course I could not advise them to take the action proposed, I felt it no public duty of mine to interpose any objection.

Sincerely, yours,
THEODORE ROOSEVELT.

Hon. CHARLES J. BONAPARTE,
Attorney-General.

After sending this letter I was advised orally by the Attorney-General that, in his opinion, no sufficient ground existed for legal proceedings against the Steel Corporation, and that the situation had been in no way changed by its acquisition of the Tennessee Coal and Iron Company.

I have thus given to the Senate all the information in the possession of the executive department which appears to me to be material or relevant on the subject of the resolution. I feel bound, however, to add that I have instructed the Attorney-General not to respond to that portion of the resolution which calls for a statement of his reasons for nonaction. I have done so because I do not conceive it to be within the authority of the Senate to give directions of this character to the head of an executive department or demand from him reasons for his action. Heads of the executive departments are subject to the Constitution, and to the laws passed by the Congress in pursuance of the Constitution, and to the directions of the President of the United States, but to no other direction whatever.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *January 6, 1909.*

Besides the message above set forth, the committee has had the benefit of certain annual reports of the United States Steel Corporation and of the Tennessee Coal, Iron and Railroad Company; well-considered articles in standard magazines; testimony taken before the Committee on Ways and Means of the House of Representatives in 1908; daily market quotations of stock of the Tennessee Coal, Iron and Railroad Company and of the bonds of the United States Steel Corporation for the year 1907; the Statistical Abstracts of the United States, particularly that for 1907; and the testimony of several witnesses taken by the subcommittee. From these sources we think the following facts are established:

1. That on or about November 5, 1907, the United States Steel Corporation purchased all of the stock of the Tennessee Coal, Iron and Railroad Company except $220,160, the amount of stock acquired being $30,375,825, and absorbed the latter company. 2. Both companies were at the time of the absorption engaged in manufacturing and in interstate commerce. The Steel Corporation paid for the stock of the Tennessee Company $632,655 in cash (the cash payment being made December 15, 1907) and $34,684,977.64 in bonds of the Steel Corporation, aggregating $35,317,632.62, or nearly $5,000,000 in excess of the par value of the Tennessee Company stock purchased. As between the Steel Corporation and Moore & Schley or their customers no cash whatever passed. At the time this stock was acquired it was quoted around 80 on the stock exchange, while steel bonds of the kind given in exchange were quoted at 85 and 86, so that the price paid for the Tennessee Company stock was about 20 per cent more than its market quotation.

3. In his message to the Senate January 6, 1909, on this subject, referring to the acquisition of the stock and the absorption of the Tennessee Company by the Steel Corporation, the President said: "As to the transaction in question I was personally cognizant of and responsible for its every detail." In his letter of November 4, 1907, to the Attorney-General, which is incorporated in the message, after reciting that representatives of the United States Steel Corporation had called upon him in Washington that day and stated that, for reasons set forth in his letter, it had been suggested that the Steel Corporation should purchase a majority of the securities of the Tennessee Company represented to have been then held by "a certain business firm" in New York City, but that they did not wish to do this if the President "stated it ought not to be done," the President said: "I answered that while of course I could not advise them to take the action proposed, I felt it no public duty of mine to interpose any objection." As the letter of the President was addressed to the Attorney-General, who is expressly and exclusively charged with the duty of enforcing the act of July 2, 1890, on behalf of the public, known as the "Sherman antitrust law," we think it was, in effect, a direction to the

Attorney-General not to interfere, but to permit the proposed purchase and absorption to be consummated if the parties interested desired to do so. Moreover, the letter to the Attorney-General shows that the legality of the merger was discussed and that the President gave the representatives of the Steel Corporation who visited him to understand that the action proposed could be taken if desired. It was not until this understanding was telephoned from Washington to New York City by one of the representatives of the Steel Corporation to another representative there that the purchase and absorption were made. In our opinion the President permitted and sanctioned the acquisition and merger.

4. In his letter to the Attorney-General of November 4, 1907, already referred to, the President said: "Judge E. H. Gary and Mr. H. C. Frick, on behalf of the Steel Corporation, have just called upon me. They state that there is a certain business firm (the name of which I have not been told, but which is of real importance in New York business circles) which will undoubtedly fail this week if help is not given. Among its assets are a majority of the securities of the Tennessee Coal Company. Application has been urgently made to the Steel Corporation to purchase this stock as the only means of avoiding a failure."

The firm referred to in this letter is that of Moore & Schley, stock brokers of New York City. This firm did not hold as assets, as represented to the President by officials of the Steel Corporation, any portion whatever of the stock of the Tennessee Company. This is shown positively by Grant B. Schley, a member of the firm, in his testimony before the subcommittee:

Senator CULBERSON. You have already stated that your firm did not hold as assets of the firm a single dollar of this stock?

Mr. SCHLEY. No; they were not subscribers and they did not buy any of the stock.

Senator CULBERSON. They did not, therefore, hold it as a part of their assets?

Mr. SCHLEY. They did not own it. It could not be their assets without they owned it. (Hearings, p. 71.)

It is also stated by this witness, without contradiction from any source, that this firm was not borrowing for its customers on a majority of the stock of the Tennessee Company:

Senator CULBERSON. In November, 1907, was the majority of this stock in hock anywhere?

Mr. SCHLEY. I can't tell that. I know what we were loaning, but other people had taken their stocks away.

Senator CULBERSON. Was the majority of the stock represented by the list you have furnished this committee, in November, 1907, in hock anywhere, so far as you know?

Mr. SCHLEY. I can't tell.

Senator CULBERSON. So far as you know?

Mr. SCHLEY. As far as I know, I can't tell. I know what we were borrowing. I can't tell what others were borrowing.

Senator CULBERSON. You were not borrowing on a majority of the stock?

Mr. SCHLEY. No. (Hearings, p. 80.)

5. While the firm of Moore & Schley did not own any of the stock of the Tennessee Company, and had not as brokers borrowed money for themselves or their customers on a majority of the stock of that company, it may be useful to state concisely the situation as to this stock in so far as it was developed before the subcommittee. In 1905 a number of persons, at the suggestion of Grant B. Schley, purchased a controlling interest in the Tennessee Coal, Iron and Railroad Company, the names and individual shares of stock being as follows:

[Original revised.]	Shares.
O. H. Payne	10,300
L. C. Hanna	10,300
G. B. Schley	10,300
J. B. Duke	10,300
E. J. Berwind	10,300
J. W. Gates	10,300
A. N. Brady	10,300
G. A. Kessler	10,300
O. Thorne	10,300
E. W. Oglebay	5,150
H. S. Black	5,150
F. D. Stout	5,150
J. W. Simpson	5,150
G. W. French	2,500
S. G. Cooper	1,500
J. A. Topping	1,000
Total	118,300

Each of these persons in 1905 was very strong financially, some of them being men of great wealth, and this financial status continued during their holding of this stock. In order to raise money to improve, enlarge, and develop the property, additional stock was issued until the total issue of stock amounted to $30,375,825. With the exception of small amounts to others, the syndicate or group of persons which bought the controlling interest in 1905 took the additional issue of stock. Each of that group paid for all his stock in full, some of them taking their stock to other places and some leaving it with Moore & Schley for safe-keeping. Grant B. Schley, a member of the firm of Moore & Schley, owned individually, in 1907, about 25,000 shares of the stock, of the par value of $2,500,000. Improvements amounting to about $6,500,000 were made in the property of the company after control was obtained by the group of persons named, out of the proceeds of the new issue of stock.

At the time of the panic, in the fall of 1907, the only outstanding loans, with the stock of the Tennessee Company as collateral, in banks and trust companies, so far as careful inquiry has disclosed, were $482,700 in the Trust Company of America, on stock at 60 as collateral and between $5,000,000 and $6,000,000 on 90,000 to 105,000 shares of the stock in several banks in New York, among them the First National Bank and the Chase National Bank. Moore & Schley had no connection with the loans in the Trust Company of America, but they negotiated the other loans for themselves or their customers. In the course of their brokerage business Moore & Schley made loans to some of the holders of the Tennessee Company stock, on their stock, and reimbursed themselves by borrowing from banks on the stock to the extent they could, but the amount they loaned has not been shown. The loans in the Trust Company of America were paid in November, 1907, and January, 1908, in due course of business, the merger of the Tennessee Company having no effect upon them. It was known, however, that Oakleigh Thorne, president of the Trust Company, was a member of the Tennessee Company syndicate, and his trust company, which was supposed to be interested in the Tennessee stock, was viciously attacked during the panic, through which it nevertheless safely passed. Besides the $5,000,000 or $6,000,000 Moore & Schley had borrowed, with the Tennessee stock as collateral, as hertofore pointed out, that firm had borrowed perhaps $27,000,000 on other securities. The formation and existence of the syndicate holding control of the Tennessee Company stock, organized by Grant B. Schley, was well known in Wall street. Banks in New York, some of them known as Morgan banks, carrying Moore & Schley loans with the Tennessee Company stock as collateral, pressed these loans vigorously. This firm continued to meet successfully all demands upon it, but finally, fearful of the result of persistent and terrific pounding, it sought and made terms with the Steel Corporation. The syndicate did not desire to sell the stock, but was forced to do so. When the Steel Corporation purchased the stock and absorbed the Tennessee Company the pressure ceased and general conditions decidedly improved on the stock exchange. Grant B. Schley thus describes the final squeeze and the surrender:

Senator OVERMAN. So you approached Mr. Ledyard, who was attorney for Morgan, was he not?

Mr. SCHLEY. I don't know that he was attorney for him; he was a friend.

Senator OVERMAN. I want to ask you whether or not you had any interest in the United States Steel Company yourself?

Mr. SCHLEY. Not a dollar.

Senator OVERMAN. Did any of these gentlemen named here?

Mr. SCHLEY. I don't think so. They may have.

Senator OVERMAN. Were they interested as stockholders or otherwise, do you know?

Mr. SCHLEY. I doubt it. I don't think so.

Senator CULBERSON. Mr. Schley, I understand you to say that although calls had been made upon your firm, you had always responded up to the 4th of November, 1907?

Mr. SCHLEY. Yes. When it developed, everyone I talked to in connection with his holdings was willing, under the pressure that was brought upon all, to sell that stock at par, and when I went to Mr. Ledyard and asked him to make these negotiations, it began. Then Mr. Frick and Mr. Gary came to me in the course of it, and it developed so that in the following days it was known to the public. I can't tell what would have happened to Moore & Schley or to anybody else in that street, because we were oppressed by rumors, some of them untrue, but Moore & Schley were the subject of attack, serious attack, and their credit, which is the life of the business, was being destroyed. It was a matter of serious import. It had to be disposed of if it could be. I don't mean for Moore & Schley, but for people about them, others interested, not those particular individuals of great wealth.

Senator DILLINGHAM. What was the effect of the purchase of the stock by the Steel Company upon the market?

Mr. SCHLEY. It relieved the situation most decidedly, not only with M. and S. but with everybody about. The rumors were flying tremendously about, and nobody can escape those, you know. They may be true or untrue, and they affect the credit of this institution or that. It was especially so with us at that time, after this negotiation started, and it took a week. Why, there was $7,000,000 of loans called on us in three days.

Senator CULBERSON. Was it generally known on the street, as you call it, that your firm, in the relationship that you have suggested, was dealing in the Tennessee Coal and Iron?

Mr. SCHLEY. Yes; for some time it had been talked that Moore & Schley were holding that stock—a wrongly based rumor, because these facts I tell you are absolutely true. But the pressure was there, and I don't know of any panic in a great many years when they have not been pounded a little, and other houses that have real basis behind them.

Senator CULBERSON. You say your relationship to this stock was generally known in the street?

Mr. SCHLEY. Yes.

Senator CULBERSON. And you say there was special pressure, as I remember your testimony, on your firm?

Mr. SCHLEY. Yes. (Hearings, pp. 77, 78.)

That the Tennessee Company stock was singled out appears, further, from the testimony of George W. Perkins, of the Steel Corporation:

Senator OVERMAN. Why were these special securities mentioned? That was only a drop in the bucket. There were a tremendous amount of securities up.

Mr. PERKINS. Yes, sir.

Senator OVERMAN. Why were those securities mentioned?
Mr. PERKINS. Why does a man call "fire" in a theater?
Senator OVERMAN. I do not know any special reason why these stocks were mentioned.
Mr. PERKINS. I have not the slightest idea. You never can tell why such things occur.
Senator OVERMAN. Were these specially mentioned more than any others?
Mr. PERKINS. At this period of the panic?
Senator OVERMAN. Yes; these particular stocks.
Mr. PERKINS. Yes; it became centered at that particular stage of the panic, which covered three weeks. (Hearings, p. 50.)

No bank or important banking concern or business house was saved by the transaction. It appears from the testimony of Grant B. Schley that if the $5,000,000 or $6,000,000 loans which Moore & Schley had with the several banks, with Tennessee Company stock as collateral, had been cared for it would have relieved that firm, but it seems nothing less than control of the Tennessee Company was considered by the Steel Corporation. (Hearings, pp. 72, 73.)

As said by a well-known writer, referring to the supposed unselfishness of the Steel Corporation in purchasing the stock of the Tennessee Company, "if they checked the panic by this transaction, they did it by taking a few dollars out of one pocket and putting millions into another."

6. In his letter of November 4, 1907, to the Attorney-General, the President further said: "Judge Gary and Mr. Frick inform me that * * * but little benefit will come to the Steel Corporation from the purchase." On the contrary the property purchased is very valuable and the transaction highly beneficial to the Steel Corporation. Some of the evidence and publications upon which this conclusion is based will be stated.

Grant B. Schley testified that the facts set forth in the forty-seventh annual report of the Tennessee Company for the year ending December 31, 1906, are true. The following statement from that report, except where credited to the sixth annual report of the Steel Corporation, made after the merger, is indicative of the income, sales, and earnings, improvements, output, and potential capacity of the company:

THE TENNESSEE COAL, IRON AND RAILROAD COMPANY.

Comparative statement of income (p. 20).

Gross profits—	
For 1904	$1, 862, 631. 21
For 1905	2, 484, 139. 26
For 1906	2, 753, 159. 85
For 1907 (p. 27, U. S. S. C. Rept.)	2, 749, 903. 73
Gross sales and earnings (p. 19)—	
For 1904	9, 607, 578. 74
For 1905	10, 951, 979. 02
For 1906	13, 265, 970. 66

New construction and development of land (pp. 24, 25).

For 1906	$1, 355, 632. 28
For 1907 (p. 27, U. S. S. C., 6th Ann. Rept.)	6, 589, 116. 99

In this connection, note that the total cost of the plants of the Tennessee Company, excluding land, was on the date of this report (p. 21) $11,211,872.30, and that of the $6,589,116.99 expended for new construction in 1907 only about $72,000 was expended for land, leaving the balance of over $6,500,000 expended for enlargement of its manufacturing capacity, or an increase of about 60 per cent.

Actual and proposed increase of output.

As compared with previous years, your earnings may be favorably regarded, with operating profits in excess of 20 per cent on your volume of business. This result, considering the almost unlimited tonnage of your mineral reserves and their great potential value, should suggest no delay in providing the necessary facilities to meet your income opportunity. Your executive committee, recognizing the inadequacy of your present facilities, has authorized substantial expenditures to increase your volume of business and income, but further expenditures could be advantageously made (p. 7).

But, as heretofore stated, the maximum possibilities with your present manufacturing and mining facilities are not sufficient for the most favorable results. The extensive improvements now under way, both in your mining and manufacturing departments, will greatly strengthen your operations, when completed and in running order (p. 18).

The physical condition of your mills during the past year (steel works and rolling mills) has been improved by liberal expenditures (p. 28).

While a general rehabilitation of old equipment has been taken care of by liberal maintenance, your executive committee have realized the necessity of increased steel and rail productive capacity, and have authorized the construction of a modern steel works and rail mill. These extensive improvements are expected to double your steel output and rail capacity and radically reduce your cost of production. The benefits expected from these additions to plant will not be operative until the last half of 1907 (p. 28).

The same policy as applied to your steel works and rolling mills, in respect to betterments and maintenance, has also been applied in building up your blast-furnace department (p. 29).

These extensions (iron mines and quarries) are all under way and substantially increased production will be realized during the year 1907 (p. 30).

UNFILLED ORDERS.

The unfilled orders now on your books represent the largest tonnage in the history of your company. The business is well distributed and indicates broadening markets for all products. This is particularly true of coal and coke. The prospects for the future, as suggested by business on hand, show no sign of business recession, and the outlook for the year 1907 is most encouraging (p. 37).

Memorandum of unfilled orders as of January 1, 1907.

	Tons.
Manufactured iron and steel products	467, 114
Coal	1, 200, 000
Coke	201, 000

(p. 37.)

COMPARATIVE PRODUCTION.

Rails, billets, steel bars, and plates (p. 28):	Tons.
For 1904	155, 266
For 1905	402, 318
For 1906	401, 882
For 1907 (p. 27, U. S. S. C., 6th Ann. Rept.)	477, 624
Pig iron (p. 29):	
For 1904	475, 314
For 1905	529, 036
For 1906	641, 887
For 1907 (p. 27, U. S. S. C., 6th Ann. Rept.)	602, 827
Iron ore (p. 30):	
For 1904	1, 208, 038
For 1905	1, 436, 282
For 1906	1, 483, 476
For 1907 (p. 27, U. S. S. C., 6th Ann. Rept.)	1, 576, 757

POTENTIAL CAPACITY (p. 32).

The knowledge that your executive committee has acquired as to the tonnage and character of the iron ore, coal, and limestone owned in fee simple by your company, satisfies them that, in wealth of raw materials required for the manufacture of iron and steel, your company ranks as second to only one in the world, and is far in advance of any other iron or steel producer in cost of assembling its raw materials for manufacture.

The mineral reserves of coal and iron contained in your lands, as computed by competent authorities, are estimated to be 700,000,000 tons of iron ore and 2,000,000,000 tons of coal. Approximately one-half of your coal supply is of a superior coking quality, and your iron ore is largely of a self-fluxing character, analyzing approximately 38 per cent metallic iron. This ore is well suited to the manufacture of high-grade foundry pig and to the production of basic pig iron for use in the manufacture of basic open-hearth steel (p. 32).

The financial statement shows your company to be in a sound financial condition, with current assets of $3,004,480.09 in excess of your current liabilities (p. 9).

Grant B. Schley also testified that the acquisition of the Tennessee Company "added materially to the value of the Steel (Corporation) securities" (Hearings, p. 73), and that in 1907 E. H. Harriman, or the Harriman railway lines, gave a large order to the Tennessee Company for steel rails on account of a preference for rails of the open-hearth process of that company over rails of the Bessemer process of the Steel Corporation. (Hearings, p. 68.)

Oakleigh Thorne testified that the Tennessee Company was paying a dividend of 4 per cent per annum. (Hearings, p. 38.)

George W. Perkins, a member of the finance committee of the Steel Corporation, testified that the Tennessee Company property "is a very valuable property. Nobody has ever questioned that, so far as I know." (Hearings, p. 56.)

John W. Gates, a member of the Tennessee Company syndicate, on November 7, 1907, gave out an interview to the daily papers in which he said: "As to the purchase of the Tennessee Coal, Iron and Railroad Company by the United States Steel Corporation, the steel men got the best property in the country and at a bargain price. I regard it as a sacrifice of stock worth a great deal more than the purchase price. I did not want to sell my stock, but had to follow the crowd. Had Tennessee stock been thrown on the market I would have been better off, as I could have increased my holdings at a low price. The iron ore and coal deposits of the Tennessee Company are worth many times more than the entire cost of the property to the Steel Corporation."

The New York Press, of November 7, 1907, said: "The Tennessee is one of the two steel companies in the United States which manufactures open-hearth rails, now so greatly in favor with the railroads. When Harriman bought 160,000 tons of rails of the Tennessee Company, a few months ago, it brought the steel company to a realization that it had a strong competitor in the steel-rail field."

The New York Sun, November 7, 1907, said: "The acquisition of the (Tennessee) company is particularly advantageous to the Steel Corporation, because of the iron ore and coal properties that go with it. With the Great Northern and Northern Pacific ore lands acquired last year, together with the previous holdings, the Steel Corporation now has iron-ore deposits estimated at approximately 2,400,000,000 tons, of which approximately 700,000,000 tons come with Tennessee Coal and Iron."

John Moody, in an article in Moody's Magazine for January, 1909, said:

But the most fortunate business stroke of the Steel Corporation, from the view point of its owners, since its organization in 1901, was the acquisition last year of the Tennessee Coal, Iron and Railroad property. The acquisition of this organization has added great potential value to the steel organization and has increased the tangible equity of its common-stock issue to a far greater extent than is commonly realized. The Tennessee Coal and Iron properties embrace, besides important manufacturing plants, nearly 450,000 acres of mineral lands in the Birmingham section of Alabama. As shown in the report of the Tennessee Company in 1904, when an appraisal was made by outside parties, these lands contain approximately 400,000,000 tons of

first-class low-grade ore, and more than 1,200,000,000 tons of coal, of which about one-half is coking coal. This estimate indicates that the deposits embraced are even in excess of those of the great Lake Superior properties controlled by the corporation, including the Great Northern ore bodies. This entire property was acquired, as is well known, on very favorable terms for the Steel Corporation, and of course puts it in a position where now it need have no concern regarding a possible future shortage of supply of either iron ore, coal, or coke. Added to this is the fact that the deposits are more favorably located than those of the Lake Superior district and will enable the company to carry on in the years to come a vast economic development of production and manufacture in this section of the country. The Tennessee ore is of a grade which is better for the making of ordinary pig iron than that of any other known deposits in this country.

The same writer, in The Public, October 16, 1908, said:

This Tennessee Coal and Iron property embraces not only about 450,000 acres of mineral lands, but includes 41 developed and active iron-ore and coal mines, 16 large blast furnaces, the ownership of several land companies holding extensive tracts of land adjoining the several developed properties of the company, and also the Birmingham Southern Railroad Company, a terminal property of great value connecting the various mines and plants in the Birmingham district with all the diverging trunk lines.

The capacity of the company's blast furnaces a year ago was about 850,000 tons per annum and that of the developed coal and ore mines about 20,000 tons per day. If we compare this capacity with that of the actual production of all the other properties owned by the Steel Corporation, outside of the Tennessee Coal and Iron Company, for the year 1907, we will get the following results: "Blast-furnace products, 10,819,968 tons; ore and coal mined and limestone quarried, 39,576,161 tons." In other words, the capacity of the new properties acquired, according to the figures above, is about 15 per cent of the total production of mining products of the entire corporation for last year, and about 8 per cent of the blast-furnace products.

Based on those figures alone, therefore, the purchase was an exceedingly advantageous one for the Steel Corporation, as the purchase price was only about 3 per cent of the entire present capitalization of the Steel Corporation; or, if we regard all the common stock of the Steel Corporation as water, it was but 4½ per cent of the balance of capitalization.

But that would be only a superficial comparison.

The possibilities of the Tennessee property and the value of its raw materials are so gigantic that even if it were producing nothing at the present time it would have been the best bargain at $45,000,000 that the Steel Corporation or any other concern or individual ever made in the purchase of a piece of property.

The Steel Corporation, fifteen months ago, entered into a lease with the Great Northern Railway interests whereby it has the right to mine at so much per ton the vast ore deposits of the Great Northern properties. The Steel Corporation agreed to pay to the Great Northern people $1.65 per ton for this ore, and transport a portion of the ore over the Great Northern tracks at a specified rate. The Great Northern ore bodies are estimated to contain about 500,000,000 tons of good ore, which, if all mined and taken by the Steel Corporation at $1.65 per ton, would make an ultimate cost to the Steel Corporation of about $850,000,000, without considering cost of transportation, etc. As stated in the Steel Corporation report for the year 1906, this contract was looked upon as a good one from the standpoint of the Steel Corporation.

The object in giving the foregoing details is to bring out a vivid comparison of this Great Northern deal with that made last winter in the acquisition of the Tennessee Coal and Iron Company. The Great Northern properties, containing probably 500,000,000 tons of ore, will ultimately cost the Steel Corporation about $850,000,000; but the Tennessee Coal and Iron properties, which are of far more value than the Great Northern properties probably ever can be, cost the Steel Corporation only $45,000,000.

To demonstrate the foregoing statements, let reference be had to the following from the annual report of the Tennessee Coal and Iron Company for the year ending December 31, 1904. In that report Mr. Bacon, the chairman of the board, said:

"Early in the summer of 1904 a committee of appraisers was appointed, representing the Sloss-Sheffield Steel and Iron Company, the Republic Iron and Steel Company, and this company, to estimate the amount and quality of the coal and iron ore owned by each company. An examination covering several months was conducted, as the result of which a report signed by every member of the committee was submitted, showing that this company owns in fee over 395,000,000 tons of red ore, of which 381,000,000 tons are graded as first class, 10,177,000 tons of brown ore, and over 1,623,000,000 tons of coal, of which 809,112,000 tons are coking coal. In the coking coal is included 300,000,000 tons of Cahaba coal, which is unexcelled in the South for steam and domestic purposes, and commands the highest market price of any grade of coal in the district. The men in charge of our iron mines estimate the holdings of iron ore of the company to be still larger, viz, of first-class red ore, over 450,000,000 tons; of second-class red ore, over 95,000,000 tons; and of brown ore, 16,900,000 tons."

From the above it will be seen, figuring the first-class ore at as low an amount as $1 per ton, that the valuation for that alone is $395,000,000. If we disregard the aggregate estimate of coal and simply take the estimate for coking coal at as low a figure as 50 cents per ton, we get a valuation of $400,000,000 more. A very conservative estimate of the values of the ore and coal deposits of the Tennessee Coal and Iron Company at the present time is hardly less, in all probability, than $1,000,000,000.

Now, as far back as 1901, Mr. Schwab made the statement that the coking coal deposits of the Steel Corporation were of vast value, because of the fact that coking coal of the kind needed for blast furnaces was rapidly growing scarce, and that in a few years there would probably be no more. He disregarded the Tennessee properties, undoubtedly, but by this great acquisition the Steel Corporation has been put in a position where it need have no concern for the future as far as coking coal is concerned. In fact, the acquisition of the Tennessee Coal and Iron Company, aside from being a business stroke of enormous direct profit, has had the effect of rounding out and completing the control by the corporation of the ore and coking-coal supplies of the country.

That acquisition is of more value to the steel trust, and will be in the future in many ways, than its holdings of Lake Superior ores, both because of location and because of general character and quality of the deposits.

It is well known that the Tennessee iron-ore deposits are the best in the world for making pig iron; and the cost of production and manufacture of iron products in that section is considerably less than is the case in the Great Northern ore bodies. Therefore, it can be easily demonstrated that the acquisition of this property for $45,000,000 added an almost unheard-of value to the equity back of the Steel Corporation stocks.

Many people have wondered and are still wondering why, in the face of temporarily poor earnings and in the face of tariff agitation, the Steel Corporation stocks, both common and preferred, have been steadily rising since last December, and are now almost at the highest figures of their history. The foregoing demonstration certainly accounts for it.

If it were not for the danger involved in tariff agitation, the Steel Corporation common stock would probably be selling to-day at nearly double its present value. In other words, instead of having a market price of $45 per share, a total market value of about $220,000,000, it would be selling in the neighborhood of $90 per share, with a total market value of $450,000,000. It could easily reach this point in spite of the fact that the corporation may not pay any larger dividends for several years to come.

The appraised value in 1904 of the Tennessee Company's properties, as quoted above, was that of a thoroughly impartial and unanimous board. This appraisal must have been known to Mr. Morgan and the rest of his party when the property was taken over by the steel trust at the absurdly low price they paid. If they checked the panic by this transaction, they did it by taking a few dollars out of one pocket and putting millions into another.

Frank A. Munsey, in an article in Munsey's Magazine for June, 1908, who stated that the inventory was compiled through the courtesy and with the assistance of the Steel Corporation, said:

The Tennessee Coal and Iron Company is entered as a separate item in this inventory. Its ore and coal and mills and furnaces and other properties are not included in the other classifications. This company is put in at an estimated value of $50,000,000, which is somewhat more than the Steel Corporation paid for it, but probably a much smaller sum than it is worth to the Steel Corporation. Its chief value lies in its coal and ore properties. Its ore is estimated at 700,000,000 tons. It is not as high-grade ore as the northern ore, but assuming that it is worth 15 cents per ton, it alone would amount to $105,000,000. Its coal is estimated at about a billion tons, which at 10 cents a ton would be $100,000,000. From the fact that the known supply of ore in the country is limited, it may be worth two or three times this price. There is no way of telling just what it is worth. But as a guide to the value of ores, we may take the price fixed upon for the Great Northern ores between James J. Hill and the Steel Corporation. The Great Northern Railroad and the Northern Pacific had vast holdings of iron ore in the Mesabi Range, and after many months of negotiation the Steel Corporation entered into a contract a year ago to take all this ore at a certain price per ton, the price to be advanced each year over the preceding year 3.4 cents. The first year's price, which covered the year 1907, was 85 cents a ton. This year it is 88.4 cents a ton. On this basis the price will soon be over a dollar a ton, and the average cost for the entire supply will be considerably in excess of that figure. And this ore is supposed to be of a lower grade, as a whole, than the ore owned by the United States Steel Corporation, which in this inventory has been conservatively—ultraconservatively—figured at 60 cents a ton. If the Hill ore is worth over a dollar a ton, the ore of the Steel Corporation is worth quite as much, and even more, as it is of a better grade. And these prices of this Northern Pacific ore have an important bearing on the ore properties of the Tennessee Coal and Iron Company. I should think that Mr. Charles M. Schwab is as good an authority as there is in the world on the value of iron ore. He said to me two or three days ago that the ore holdings of the Steel Corporation were easily worth a dollar a ton, and, in fact, might safely and conservatively be regarded as worth still more, for the reason that they can not be duplicated.

Judge E. H. Gary, of the Steel Corporation, in his testimony before the Ways and Means Committee of the House of Representatives in 1908, thus referred to this Munsey article:

This is the result of an independent examination by Mr. Munsey concerning the value of our properties. He gives the properties in detail, and his valuation, and if anything I would say that it is a little too high, but it is not very much too high, and certainly properties could not be reproduced for anything like that; in fact, it would be impossible to reproduce them at any price perhaps, some of them. (Tariff Hearings, p. 5496.)

But the Steel Corporation, in its corporate capacity, is on record as to this property. In the Sixth Annual Report of the United States Steel Corporation, for the year ending December 31, 1907, the holdings of the Tennessee Company which were acquired are given as follows (pp. 26, 27):

Surface and mineral rights acreage of iron ore, coal, and limestone property, owned in fee, 447,423, distributed as follows: In Alabama, 340,263 acres; in Tennessee, 105,740 acres; in Georgia, 1,420 acres. Upon this property there were in operation in the State of Alabama, near Birmingham, 13 active iron-ore mines, with 2 under construction; and at Greeley, 3 active iron-ore mines. In Georgia there were 2 active iron-ore mines in operation.

In Alabama there were in operation 22 active coal mines and 2,800 coke ovens; in Tennessee, 1 coal mine and 174 coke ovens.

There were 2 active quarries, 1 inactive, and 1 in course of development, all in Alabama.

There were 14 active blast furnaces in Alabama; 2 in Tennessee.

All mills, foundries, machine shops, etc., were located at Ensley and Bessemer, Ala., near Birmingham.

The Tennessee Company owned the capital stock of the Birmingham Southern Railway Company, a terminal railroad connecting the various mines and plants of the company in the Birmingham district, consisting of 31.16 miles of main and branch lines, 1 mile second track, 67.78 miles yard and siding tracks, 35 locomotives, and 725 cars of all descriptions.

The Tennessee Company owned the entire issued capital stock of the Tennessee Land Company, the Booker Land Company, and a controlling interest of the stock of the Ensley Land Company, these companies owning various tracts of land adjoining the several properties of the Tennessee Company.

The net profits of the Tennessee Company for the year 1907, after charging off $437,666.84 for depreciation and extraordinary replacements, and $885,552.31 for net interest charge on bonded and floating debt, were $1,426,684.58 (a little more than 4½ per cent on the capital stock).

The company spent, during 1907, for extensions, additions, and betterments, the sum of $6,589,116.99.

At page 29 of this report the following is found:

In November, 1907, the corporation acquired a majority of the common stock of the Tennessee Coal, Iron and Railroad Company, as is set forth in detail on page 25 of this report. The purchase was made during the financial panic of October, 1907. The parties owning or controlling a majority of the Tennessee Company's stock offered the same to the corporation on terms which were satisfactory, both as to price and manner of payment. The purchase of the property promises benefit to the corporation and also aided promptly and materially in relieving the financial stress at the time existing. The Tennessee property is very valuable. Its mineral resources are large. The location of the iron ore and coal deposits in the immediate proximity of the manufacturing plants enables the production of iron at reasonable cost. It is believed the lines of business of the Tennessee Company can be materially extended. During the last two years about $6,250,000 were expended in rehabilitating, modernizing, and enlarging the furnaces and steel plant. Additional expenditures of considerable magnitude in 1908 are contemplated to complete the plans for improvements which were under way when the corporation acquired the property. It is believed that when these improvements and extensions shall have been completed and the operating management perfected, the business of the company will be profitable.

In this connection it is appropriate to invite attention to the testimony of Mr. Charles M. Schwab, ex-president of the Steel Corporation, before the Ways and Means Committee of the House of Representatives in 1908. In substance, Mr. Schwab testified (Tariff Hearings, p. 4915) that in Germany pig iron could be produced at from $9.50 to $12 per ton as against $14 to $14.50 in the United States; that in England it could be produced a little cheaper than in Germany; and that he was positive the cost of pig iron in Birmingham was less than the cost in England; and that the cost of converting pig iron into steel rails was about the same in Germany, England, and Birmingham. If this be true, and Mr. Schwab's testimony is clear and emphatic, the Tennessee Company has a natural advantage of from $4.50 to $5 a ton in the production of steel rails over any other portion of the United States, since the proximity at Birmingham of all the elements for the production of pig iron justifies the inference that the average cost there is no more than the minimum cost in Germany or England, viz, $9.50 per ton.

Mr. Schwab, in the course of his examination before the House committee, said:

For example, I know that pig iron can be produced in different parts of Germany at from $9.50 to $12 a ton to-day, depending upon the location and character of the pig.

The CHAIRMAN. Against $14 here?

Mr. SCHWAB. About $14 to $14.50 here.

* * * * * * *

The CHAIRMAN. That is in Germany. How about England?

Mr. SCHWAB. England is probably a little cheaper, though it is not widely different.

The CHAIRMAN. What is the main reason for the additional cost of the pig iron here?

Mr. SCHWAB. Raw material and freights being higher.

The CHAIRMAN. Their iron is nearer the coal mines?

Mr. SCHWAB. Yes. They assemble it cheaper than we do.

The CHAIRMAN. I do not suppose they do it any cheaper than we can at Birmingham?

Mr. SCHWAB. No; we do it cheaper in Birmingham than they do in England.

The CHAIRMAN. You think the cost of pig iron in Birmingham would be less than the cost in England?

Mr. SCHWAB. I know it would be.

The CHAIRMAN. The cost of converting the steel is about the same?

Mr. SCHWAB. In Birmingham it is about the same.

At page 4899 of the hearings Mr. Schwab testified that iron ore in the ground was worth $1 per ton. He said:

I would call attention to the fact that since that time (1901 or 1902) ores have not only been sold at a loss at a dollar a ton, but the lowest grade we have.

Another important factor entering into the potential capacity of the Tennessee Company is the proximity of the iron ore, coal, and limestone holdings to each other and to the plants, and the consequent saving of transportation charges. The bulk of these holdings is in the State of Alabama (p. 26, 6th Ann. Rep. U. S. Steel Corp.) within a radius of 30 miles, and Judge Gary, in reference to this, testified before the Ways and Means Committee in 1908 (pp. 5471, 5472):

Mr. RANDELL. Is it not a fact that iron and coal are well situated with reference to each other in the United States in comparison to other countries?

Mr. GARY. So far as the Birmingham district is concerned, yes; but not so far as the other districts are concerned. They are remote one from another as compared with England and Germany.

* * * * * * *

Mr. RANDELL. You have your furnaces where there is neither coke, coal, nor iron ore?

Mr. GARY. That is right.

Mr. RANDELL. Everything has to be hauled to you?

Mr. GARY. I am not speaking of the Birmingham district.

The report of the National Conservation Commission, attached to the President's message of January 22, 1909 (Cong. Rec., 60th Cong., 2d sess., p. 1297), under the head of "Minerals," contains the following:

The known supply of high-grade iron ores in the United States approximates 3,840,000,000 tons, which at the present increasing rate of consumption can not be expected to last beyond the middle of the present century.

If, then, the United States Steel Corporation now owns and controls 2,400,000,000 tons of high-grade iron ore, as has been estimated, it has 62½ per cent of the total supply of the country. If this corporation acquired 700,000,000 tons of iron ore with the Tennessee Company, it added to its then estimated holdings of 44 per cent of the iron-ore supply 18½ per cent, giving it, as stated, control of 62½ per cent of the iron-ore supply of the United States.

The purchase of this 700,000,000 tons of iron ore from the Tennessee Company, increasing the Steel Corporation's holdings of ore more than 40 per cent, created that "future monopoly" in ore and "commanding position in trade" to which Judge Gary testified before the Ways and Means Committee.

The Steel Corporation, it is admitted, now practically controls the ultimate ore supply of the United States. In the tariff hearings before the Ways and Means Committee of the House in 1908, Judge Gary, of the Steel Corporation, testified:

Mr. COCKRAN. You practically do control the ore supply of the country?

Mr. GARY. No; not now; not for the immediate future.

Mr. COCKRAN. Well, the ultimate supply?

Mr. GARY. Yes; I think so; that is, pretty nearly. It is not absolute control. (Hearings, p. 5515.)

To sum the matter up briefly, we think the property is very valuable, worth probably several hundred million dollars, and that among the larger benefits which the Steel Corporation derives from the merger are the control of the open-hearth output of steel rails, the ultimate control of the iron-ore supply of the country, the practical monopoly of the iron and steel trade of the South, and the elimination of a strong and growing competitor.

The following conclusions of law are submitted:

1. Unless the merger under consideration contravened some federal law it is a private affair or a matter for the States in which the companies were chartered. Assuming, therefore, for the present purposes, that the absorption of the Tennessee Company by the United States Steel Corporation was in violation of the act of Congress approved July 2, 1890, commonly known as the "Sherman antitrust law," we are of the opinion that the President was not authorized to permit the absorption. The proposition is self-evident, needing neither argument nor judicial authority to support it, for manifestly the President is without authority to annul or suspend a law or to direct its nonenforcement either generally or in a particular case. The principle involved, in its broadest sense, is inherent in our form of government and is essential to the preservation of the rights and liberties of the people. This view is strengthened, if such were necessary, by the fact that the President is the one official who is by the Federal Constitution expressly enjoined to "take care that the laws be faithfully executed." Whatever may be the supposed emergency, no discretion is lodged in the President as to the enforcement of the law. This is a government of law and not of men, of law universal in its application, as to which none are immune. It is imperative that this principle be preserved in such a case as this, lest in time we revive the despotic prerogative of kings to create and license monopolies.

(See Senator Nelson's report, No. 848, on the antitrust law, 60th Cong., 2d sess., pp. 5, 9 et seq.)

No man is above the law and no man is below it; nor do we ask any man permission when we require him to obey it.

Obedience to the law is demanded as a right, not asked as a favor. (The President's message of December 7, 1903.)

In our judgment the President was equally unauthorized to direct the Attorney-General, as we believe he did in effect, not to interfere and not to enforce the law in this instance. Section 4 of the antitrust act of 1890 provides:

The several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act, and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the Attorney-General, to institute proceedings in equity to restrain and prevent such violations.

As construed by the Supreme Court of the United States, the entire authority to execute the antitrust statute in the interest of the public is vested in the Attorney-General. (Minnesota *v.* Northern Securities Co., 194 U. S., 71.)

The duty of that official in this respect is the creation of the statute, of the law, and the President can not subtract from it. When a case falls within the condemnation of the antitrust act, as is believed this case does, it is made the duty of the Attorney-

General to institute proceedings, and the President can not absolve him from its performance.

The general proposition was thus expressed by Attorney-General Crittenden in 1851:

As a general proposition, it appears to me most judicious for the President, as well as more consistent with the form and spirit of our institutions, to forbear from interference with the functions of subordinate public officers, and to leave them to the discharge of their proper duties under all their legal responsibilities, and subject also to removal from office for neglect or abuse of their official trust. (5 Ops. Atty. Gen., 587.)

Far more specific are other authorities. In 1854 Attorney-General Cushing said:

When the laws define what is to be done by a given head of department, and how he is to do it, there the President's discretion stops. (6 Ops. Atty. Gen., 341.)

In 1890 Attorney-General Miller stated the rule clearly and strongly:

In short, the statutes do not contain any such provision as would authorize or justify the President in making such an order as is asked. Nor does any such authority inhere in the executive office. The President has, under the Constitution and laws, certain duties to perform, among them being to take care that the laws be faithfully executed; that is, that the other executive and administrative officers of the Government faithfully perform their duties, and he has no more power to add to, or subtract from, the duties imposed upon subordinate executive and administrative officers by the law than those officers have to add to or subtract from his duties. (19 Ops. Atty. Gen., 686.)

Chief Justice Marshall, speaking for the Supreme Court of the United States in a celebrated case, announced the same doctrine:

He is to affix the seal of the United States to the commission and is to record it. This is not a proceeding which may be varied if the judgment of the Executive suggests one more eligible, but it is a precise course marked out by law and is to be strictly pursued. It is the duty of the Secretary of State to conform to the law, and in this he is an officer of the United States, bound to obey the laws. He acts in this respect, as has been very properly stated at the bar, under the authority of law and not by the instructions of the President. * * * But where he [the head of a department] is directed by law to do a certain act affecting the absolute rights of individuals, in the performance of which he is not placed under the particular direction of the President, and the performance of which the President can not lawfully forbid, * * * it is not perceived on what ground the courts of the country are further excused from the duty of giving judgment that right be done to an injured individual. (Marbury *v.* Madison, 1 Cranch, 158, 171.)

Kendall *v.* United States (12 Pets., 524) was an action for mandamus against the Postmaster-General to compel the payment of an award made under an act of Congress by the Solicitor of the Treasury to the petitioners, payment having been refused by the Postmaster-General. Before instituting the action for mandamus the petitioners presented a memorial to Congress regarding the nonpayment, which was investigated by the Judiciary Committee of the Senate, who found that the law compelling the payment was plain and recommended the adoption of the following resolution by the Senate: "That the Postmaster-General is fully warranted in paying, and ought to pay," etc., "the amount of the award of the Solicitor of the Treasury," which was unanimously adopted by the Senate. Upon a further refusal of payment by the Postmaster-General, this action was brought. Mr. Justice Thompson, for the court, in the course of the opinion, said (p. 610):

The executive power is vested in the President; and as far as his powers are derived from the Constitution, he is beyond the reach of any other department, except in the mode prescribed by the Constitution through the impeaching power. But it by no means follows that every officer in every branch of that department is under the exclusive direction of the President. * * * But it would be an alarming doctrine that Congress can not impose upon any executive officer any duty they may think proper which is not repugnant to any rights secured and protected by the Constitution; and in such cases the duty and responsibility grow out of and are subject to the control of the law and not to the direction of the President.

After citing the report of the Judiciary Committee of the Senate upon its investigation of the refusal to pay, and the passage of the resolution quoted above as evincing the plain intent of Congress in the passage of the act, the court say further (p. 612):

It is urged at the bar that the Postmaster-General was alone subject to the control and direction of the President, with respect to the execution of the duty imposed upon him by this law; and this right of the President is claimed as growing out of the obligation imposed upon him by the Constitution to take care that the laws be faithfully executed. This is a doctrine that can not receive the sanction of this court. It would be vesting in the President a dispensing power, which has no countenance for its support in any part of the Constitution, and is asserting a principle which, if carried out in its results to all cases falling within it, would be clothing the President with a power entirely to control the legislation of Congress and paralyze the administration of justice.

To contend that the obligation imposed on the President to see the laws faithfully executed implies a power to forbid their execution is a novel construction of the Constitution and entirely inadmissible.

Mr. Justice Miller, speaking for the Supreme Court, said:

We have no officers in this Government, from the President down to the most subordinate agent, who does not hold office under the law with prescribed duties and limited authority. (The Floyd's acceptances, 7 Wallace, 676.)

2. The absorption of the Tennessee Coal, Iron and Railroad Company by the United States Steel Corporation, in our opinion, was in violation of the act of Congress approved July 2, 1890, well known as the "Sherman antitrust law."

The United States Steel Corporation is the greatest combination of capital in the country. It was organized in 1901 by combining the following companies, with the respective amount of stock and bonds of each company:

The Carnegie Steel Company	$320,000,000
The Federal Steel Company	126,600,000
National Tube Company	80,000,000
American Bridge Company	61,000,000
Lake Superior Consolidated Mines	34,700,000
American Steel and Wire Company	95,700,000
National Steel Company	63,400,000
American Steel Hoop Company	33,000,000
American Tin Plate Company	46,300,000
American Sheet Steel Company	51,000,000
Total stock and bonds acquired	911,700,000

These figures are taken from circulars issued by J. P. Morgan & Co., the syndicate managers of the organization.

In exchange for these stocks and bonds there were issued stocks and bonds of the United States Steel Corporation as follows:

Preferred stock	$497,400,000
Common stock	495,800,000
Bonds	304,000,000
Or a total of	1,297,200,000
Leaving in the hands of the syndicate	106,800,000
Or a total capitalization of	1,404,000,000

In 1908 Judge Gary, in his testimony before the Ways and Means Committee, admits that there were issued $400,000,000 more of stocks and bonds than the selling price of the stocks and bonds acquired (Tariff Hearings, p. 5520).

At the time of the consolidation of the above properties in 1901 their total stocks and bonds were $954,000,00 and their total annual products 11,431,000 tons. The capital stock and bonds of their competitors aggregated about $454,500,000 and annual products about 9,663,000 tons. (Compiled from data in Iron Age of December 27, 1900.) Since that date it is known the Steel Corporation has absorbed of these competitors the Union-Sharon Steel Company, with capitalization of $45,000,000 (1st Ann. Rep., p. 19); the Shelby Steel Tube Company, with capitalization of $15,000,000; and the Tennessee Coal, Iron and Railroad Company, with capitalization of $30,000,000.

The total capitalization of the Steel Corporation and the fact of combination in the original organization are shown by the following:

Judge Gary testified before the Ways and Means Committee in 1908 (Tariff Hearings, p. 5500):

The capitalization would be $480,199,000 of bonds of all classes, $360,381,100 of preferred stock, and $508,302,500 of common stock. * * * And then the subsidiary companies have bonded indebtedness, $125,346.000 (total, $1,474,028,000).

Further (Tariff Hearings, p. 5509):

Mr. COCKRAN. That company (United States Steel Corporation) was a combination of several other companies?
Mr. GARY. That company acquired by purchase properties belonging to these other corporations at a certain price, namely, the amount of their stock and bonds.
Mr. COCKRAN. And those companies which it purchased were themselves consolidations of several other companies, were they not?
Mr. GARY. Some of them were at least.
Mr. COCKRAN. The Federal Steel Company was?
Mr. GARY. Yes.
Mr. COCKRAN. The American Bridge Company was?
Mr. GARY. Yes.

Pursuing this line of examination, Mr. COCKRAN drew admissions from the witness that besides the companies mentioned in the testimony quoted above the following companies were also absorbed: The Steel and Wire Company, The National Tube Company, The Tin Plate Company, The Illinois Steel Company, The Lorraine Steel Company, The Minnesota Iron Company.

Figures compiled from data given in the Iron Age, The Age of Steel, and other trade journals, as well as testimony before the Industrial Commission, indicate that the companies included in the new corporation produced of the total amount manufactured each year in the United States 52 per cent of iron ore, 54 per cent of coke, 49 per cent of pig iron, 60 per cent of steel, 67 per cent of steel rails, 60 per cent of finished iron and steel products, 63 per cent of wire rods, 94 per cent of wire, 95 per cent of wire nails, 94 per cent of tubes and pipes, 95 per cent

of tin plate, 85 per cent of bridges, all woven and barbed wire (because owners of patents), and 66 per cent of the copperas.

It appears that at the time of the merger of the Tennessee Company in 1907 this percentage of the total output of the Steel Corporation had been lessened by the growth and operation of independent companies, among them the Tennessee Company. George W. Perkins testified before the subcommittee:

The CHAIRMAN. Do you know what relative proportion of the total output going into the commerce of the country and in its lines was then being produced by the United States Steel Corporation?

Mr. PERKINS. You mean what percentage, say, of 100 per cent of the total output?

The CHAIRMAN. Yes.

Mr. PERKINS. No, sir; but my belief is that it was a smaller percentage of the total than the percentage that existed at the time the Steel Corporation was organized.

The CHAIRMAN. You think, then, relatively, the independent producers at that time had increased their output?

Mr. PERKINS. That is my impression. (Hearings, p. 43.)

This general fact is also stated in the letter of the President to the Attorney-General, November 4, 1907, and when considered in connection with the whole situation, particularly the wealth of raw materials of the Tennessee Company, its advantage over every other company in assembling them for manufacture and distribution, and the doubling of its steel-producing capacity, it assists in explaining the willingness of the Steel Corporation to pay 20 per cent more than the market quotation for the Tennessee Company stock. It was shown by testimony before the subcommittee that the improvements contemplated and authorized by the Tennessee Company would double its steel output and rail capacity; that in wealth of raw materials required in the manufacture of iron and steel the company was second only to the Steel Corporation; and that it was far in advance of any other iron or steel producer in cost of assembling its raw materials for manufacture.

The monopolistic powers of the Steel Corporation, which greatly enhanced by this merger, are indicated by the following testimony before the Ways and Means Committee in 1908:

Power of United States Steel Corporation to fix prices of steel and drive competitors out of the market.

Tariff Hearings, 1908, page 5470:

Mr. GARY. I think, with reductions in the tariff, the United States Steel Corporation would endeavor to take care of itself; but I think many, if not most, of our competitors would soon be out of business, and we would have the field.

Tariff Hearings, page 5491:

Mr. CLARK. If you want to; that is, if the United States Steel Corporation wants to fix the price of steel rails in this country at a given figure, have you not such a hold on these independent operators that not a single solitary one of them would dare to mark under your price?

Mr. GARY. I think, as applied to steel rails, that is probably true.

Tariff Hearings, page 5492:

Mr. CLARK. Have you not such a hold on the American market that you could immediately mark yours down to $20 or $25 long enough to put that fellow clear out of business, and then mark yours up again to where you wanted it?

Mr. GARY. Quite likely; that may be true. I will not say that is not true. I will not say that in the competition we could not drive a good many of our competitors out of business.

Tariff Hearings, page 5515:

Mr. GARY. We have competitors, you know, who are just as able to take care of themselves as we are, perhaps, particularly in some lines; but I do believe large numbers would be driven out of business if we were willing to drive them out, either because we thought it was right to do so or good policy to do so.

* * * * * * *

Mr. GARY. I think we have the commanding position in the trade, and I believe we recognize our responsibility to all on account of that position.

* * * * * * *

Mr. COCKRAN. You practically do control the ore supply of the country?

Mr. GARY. No; not now; not for the immediate future.

Mr. COCKRAN. Well, the ultimate supply?

Mr. GARY. Yes; I think so—that is, pretty nearly. It is not absolute control.

Capacity of United States Steel Corporation to manufacture iron and steel cheaper than any of its competitors.

Tariff Hearings, page 5452:

The CHAIRMAN. State whether you can produce it cheaper than your rivals in business.

Mr. GARY. Yes; I think we can. We certainly can at a large number of our furnaces. I think there is no doubt that we can produce iron and steel materially cheaper than most of our competitors.

The CHAIRMAN. Materially? How much? Take pig iron, for instance.

* * * * * * *

Mr. GARY. I think on the average. Of course anyone hesitates to speak about a competitor, but I would not hesitate to say, in my opinion, at least $1 a ton.

The CHAIRMAN. Cheaper than your competitors?

Mr. GARY. Yes, sir.

Further examined along this line, he said (Tariff Hearings, p. 5453):

The CHAIRMAN. Give us your best judgment, Judge. You say not less than a dollar?

Mr. GARY. I would rather not guess any further than that.

The CHAIRMAN. Would it be safe to say $2?

Mr. GARY. Not on the basis of manufacturing cost, I think. Of course, I am not speaking from the standpoint of the corporation, Mr. Chairman—from the standpoint of the corporation, which has a decided advantage in the quantity and quality of its ores and in owning its transportation companies to carry the ores to the Lakes, and its transportation facilities on the Lakes, and all that sort of thing. The advantage to the corporation is very much more; very much more than that.

The CHAIRMAN. Very much more than a dollar?

Mr. GARY. Oh, yes; very much more.

The CHAIRMAN. Is the entire difference more than $2?

Mr. GARY. Take an item of rails, for instance——

The CHAIRMAN. No; let us keep to pig iron.

Mr. GARY. All right. I think it is possibly more than $2, Mr. Chairman.

The CHAIRMAN. You think it is more than $2?

Mr. GARY. Yes; I think it is. I think there is no doubt it is more than that.

The CHAIRMAN. You think there is no doubt it is more than $2?

Mr. GARY. Yes.

Under the facts set out in this report, the absorption appears to have been contrary to the provisions of the antitrust law. Both companies, as we have said, were engaged in interstate commerce. They not only manufactured iron and steel, but sold, transported, and distributed their products among the several States of the United States. The transaction appears to be within the prohibition of the federal statute.

Addyston Pipe Company *v.* United States, 175 U. S., 211; Northern Securities Co. *v.* United States, 193 U. S., 197; Swift *v.* United States, 196 U. S., 375; Loewe *v.* Lawler, 208 U. S., 274; Pennsylvania Sugar Refining Co. *v.* American Sugar Refining Co., circuit court of appeals, second circuit (Dec. 15, 1908); United States *v.* American Tobacco Co. (S. Doc. 646, 60th Cong., 2d sess.): Continental Wall Paper Co. *v.* Voight (Sup. Ct. U. S., Feb. 1, 1909).

Among other things, the effect and purpose of the purchase and absorption of the Tennessee Company were to monopolize the iron-ore supply of the country for manufacture, sale, and distribution among the several States, and generally to eliminate the Tennessee Company as a competitor in the manufacture, sale, and distribution of iron and steel products among the several States. But complete monopoly of the iron and steel business is not necessary to bring the case within the condemnation of the statute. The general principle is thus stated by Chief Justice Fuller:

Again, all the authorities agree that, in order to vitiate a contract or combination, it is not essential that its result should be a complete monopoly. It is sufficient if it really tends to that end and to deprive the public of the advantages which flow from free competition. (United States *v.* Knight, 156 U. S., 1.)

In the case of the Waters-Pierce Oil Company *v.* The State of Texas, decided January 18, 1909, the Supreme Court of the United States, in an able opinion of Mr. Justice Day, reaffirmed this principle:

In United States *v.* Knight (156 U. S., 1) this court said: "Again, all the authorities agree that in order to vitiate a contract or combination it is not essential that its result be a complete monopoly. It is sufficient if it really tends to that end and to deprive the public of the advantages which flow from a free competition." This language was quoted with approval in the Addyston Pipe Company case (175 U. S., 237). And in the Northern Securities case (193 U. S., 197), while the the Sherman Act directly condemned conspiracies and combinations in restraint of trade or monopolizing or attempting to monopolize the same, this court said (p. 332):

"That to vitiate a combination such as the act of Congress condemns, it need not be shown that the combination in fact results, or will result in a total suppression of trade or in a complete monopoly, but it is only essential to show that by its necessary operation it tends to restrain interstate or international trade or commerce, or tends to create a monopoly in such trade or commerce, and to deprive the public of the advantages that flow from free competition."

Special attention is invited to the case of the United States *v.* The American Tobacco Company, supra. It involved the validity of the absorption of various independent companies by the American Tobacco Company and was tried before four circuit judges on the certificate of the Attorney-General under the act of February 11, 1903. The case was decided November 7, 1908, three of the judges, in separate opinions, declaring the absorption illegal. All of these opinions are interesting and able, but it will suffice to quote from that of Circuit Judge Lacombe:

Lacombe, C. J.: The act of July 2, 1890, in its first section declares to be illegal "every contract, combination in the form of trust, or otherwise, or conspiracy, in restraint of trade or commerce among the several States or with foreign nations." That declaration, ambiguous when enacted, is, as the writer conceives, no longer open to construction in the inferior federal courts. Disregarding various dicta and following the several propositions which have been approved by successive majorities of the Supreme Court, this language is to be construed as prohibiting any contract or combination whose direct effect is to prevent the free play of competition, and thus tend to deprive the country of the services of any number of independent dealers, however small. As thus construed the statute is revolutionary. By this it is not intended to

imply that the construction is incorrect. When we remember the circumstances under which the act was passed, the popular prejudice against large aggregations of capital, and the loud outcry against combinations which might in one way or another interfere to suppress or check the full, free, and wholly unrestrained competition which was assumed, rightly or wrongly, to be the very "life of trade," it would not be surprising to find that Congress had responded to what seemed to be the wishes of a large part, if not the majority, of the community, and that it intended to secure such competition against the operation of natural laws.

The act may be termed revolutionary because before its passage the courts had recognized a "restraint of trade," which was held not to be unfair, but permissible, although it operated in some measure to restrict competition. By insensible degrees, under the operation of many causes, business, manufacturing and trading alike, has more and more developed a tendency toward larger and larger aggregations of capital and more extensive combinations of individual enterprise. It is contended that under existing conditions, in that way only can production be increased and cheapened, new markets opened and developed, stability in reasonable prices secured, and industrial progress assured. But every aggregation of individuals or corporations, formerly independent, immediately upon its formation terminates an existing competition, whether or not some other competition may subsequently arise. The act, as above construed, prohibits every contract or combination in restraint of competition. Size is not made the test. Two individuals who have been driving rival express wagons between villages in two contiguous States, who enter into a combination to join forces and operate a single line, restrain an existing competition, and it would seem to make little difference whether they make such combination more effective by forming a partnership or not.

Accepting this construction of the statute, as it would seem this court must accept it, there can be little doubt that it has been violated in this case. The formation of the original American Tobacco Company, which antedated the Sherman Act, may be disregarded. But the present American Tobacco Company was formed by subsequent merger of the original company with the Continental Tobacco Company and the Consolidated Tobacco Company, and when that merger became complete two of its existing competitors in the tobacco business were eliminated.

What benefits may have come from this combination or from the others complained of it is not material to inquire, nor need subsequent business methods be considered nor the effects on production or prices. The record in this case does not indicate that there has been any increase in the price of tobacco products to the consumer. There is an absence of persuasive evidence that by unfair competition or improper practices independent dealers have been dragooned into giving up their individual enterprises and selling out to the principal defendant. In this connection interesting testimony is given by one of the Government's witnesses. The deponent was for many years an independent dealer and secretary of the Independent Tobacco Manufacturers' Association. He testified:

"My business was conducted by me alone; I had no partner, no corporation. It had got to be a large business, and if anything happened to me there was no one there to continue it. The value of the business was in a brand, and I became fearsome what would happen to it if I would be disabled in any way. It would not be much value to my estate unless some one had a knowledge of the business and knew how to manage it, and then I believed there was a maximum business beyond which you can not conduct it profitably personally. It will get so big that it requires an organization. And then, too, I was only identified as a scrap tobacco manufacturer, and going by precedent the consuming public of tobacco changes every ten, twelve, or fifteen years, and I have figured that might happen again, and it wouldn't use scrap tobacco and might use something else, and then I would not have much business, I thought. Whereas the American Tobacco Company had been in conference with me, I knew the officers, and I made up my mind when a proper proposition was made to me, such as was satisfactory to me, I would be very anxious to affiliate myself with a good, big tobacco organization, large enough and strong enough to take care of all conditions that might come up. I was not induced to sell out by a decrease of profits or by any unfair competition. I never had any fear they could drive me out of business."

During the existence of the American Tobacco Company new enterprises have been started—some with small capital—in competition with it and have thriven. The price of leaf tobacco—the raw material—except for one brief period of abnormal conditions, has steadily increased until it has nearly doubled, while at the same time 150,000 additional acres have been devoted to tobacco crops and the consumption of the leaf has greatly increased. Through the enterprise of defendant and at large expense new markets for American tobacco have been opened or developed in India, China, and elsewhere. But all this is immaterial; each one of these purchases of existing concerns, complained of in the petition, was a contract and combination in restraint of a competition existing when it was entered into, and that is sufficient to bring it within the ban of this drastic statute.

A large part of the record is taken up with testimony as to concealment of the relations existing between some of the defendants. It is difficult to see what bearing this has on the question in controversy. If an agreement by a corporation to acquire a majority of the stock of a competing corporation is obnoxious to the statute, its vice is certainly not eradicated by the promptest publicity. If, on the other hand, such an agreement is innocent, it does not become guilty merely because the parties to it keep their own counsel about their mutual transactions.

It is contended that the case at bar is not within the statute since the various combinations complained of deal primarily with manufacture, and United States *v.* Knight (156 U. S., 1) is cited in support of that proposition. It seems to the writer, however, that subsequent decisions of the Supreme Court have modified the opinion in that case, and that the one at bar is as much within the statute as was the combination condemned in Loewe *v.* Lawler (208 U. S., 274).

It follows from what has been said that we think the resolution should be answered that, in the judgment of the committee, the President was not authorized to permit the absorption of the Tennessee Company by the Steel Corporation.

A. B. KITTREDGE.
LEE S. OVERMAN.
ISIDOR RAYNER.
C. A. CULBERSON.

VIEWS OF MR. BACON.

Under the facts narrated and the authorities cited in the foregoing report, it is my opinion that the absorption of the Tennessee Coal and Iron Company by the United States Steel Corporation was in violation of the existing laws of the United States, and no officer of the United States has authority to countenance or to even negatively sanction such violation of law.

In view, however, of the fact that the Constitution devolves upon the Senate the duty of hearing and determining any charges alleged against the President, which may be preferred in the manner prescribed by the Constitution, it is my opinion that, while the Senate might commend or approve any act of the President, it would be improper for the Senate in the absence of charges thus preferred and a legal trial thereon to express by resolution or otherwise its judgment of condemnation relative to any alleged official misconduct on the part of the President.

For this reason my view is that the expression of the opinion of the commitee to the Senate should be limited to the above statement.

A. O. BACON.

VIEWS OF MR. NELSON.

In my opinion, the absorption of the Tennessee Coal and Iron Company by the United States Steel Corporation was clearly in violation of the antitrust law. I am further of the opinion that such absorption ought not to have been tolerated by the Government, but I believe the President was misled into taking the course he did take by the representations made to him, that the absorption was necessary in order to stay and allay the financial panic then prevailing, and that but for his belief in the truth of such representations he would not have acquiesced in the absorption.

KNUTE NELSON.

VIEWS OF MR. FORAKER.

I do not think it necessary for the committee to consider whether or not the transaction under investigation was a violation of the Sherman antitrust law.

On that point I express no opinion, except that, in my judgment, it more properly belongs to a court of competent jurisdiction in an appropriate proceeding, with all the parties before it, to determine that question than for this committee to pass upon it.

As I understand the resolution of the Senate directing this proceeding, it involves two assumptions:

1. That the merger was a violation of the Sherman antitrust law; and

2. That the letter of the President to the Attorney-General, dated November 4, 1907, was in effect an attempt to authorize the Attorney-General to take no steps to enforce the law that was being violated.

These same assumptions were also involved in the conference between Messrs. Gary and Frick and the President, and in the action of the President in writing his letter of November 4, 1907, to the Attorney-General. Unless the parties to that conference were of the impression that the transaction would be in violation of the statute, or at least that it might be so construed, there was no reason for such a conference, and all they did was without any intelligent purpose.

If they were correct in their impressions and assumptions, the only question remaining is that which the Senate directed this committee to answer, namely, whether or not the President had authority to permit the merger.

If the law did not apply to the transaction, there was no occasion for the President or any other official to be consulted or to give any expression on the subject, for manifestly he had no authority in the premises.

If, on the other hand, the law did apply, it is plain beyond the necessity of argument that the President had no power to suspend it or to authorize or even permit its nonenforcement, for it is his duty to execute the law. This has been well settled ever since the Marbury case (1 Cranch, 158).

Entertaining this view, I am of the opinion that the question directed to this committee by the Senate, "whether the President was authorized to permit the absorption of the Tennessee Coal and Iron Company by the United States Steel Corporation," should be answered in the negative.

J. B. FORAKER.

REVISION OF THE PENAL LAWS.

Mr. HEYBURN. I ask that the conference report on Senate bill 2982 be laid before the Senate pursuant to the agreement yesterday.

Mr. CLARKE or Arkansas. The report relates to a matter of some importance, and I think there should be a quorum of the

Senate present when it is being considered. I suggest the absence of a quorum.

The VICE-PRESIDENT. The Senator from Arkansas suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Beveridge	Cullom	Hemenway	Perkins
Borah	Daniel	Heyburn	Piles
Brandegee	Dick	Johnston	Scott
Briggs	Dillingham	Kean	Simmons
Brown	Dolliver	Kittredge	Smith, Md.
Burkett	Flint	La Follette	Smith, Mich.
Burnham	Foster	Lodge	Stone
Burrows	Fulton	McCumber	Sutherland
Carter	Gallinger	Martin	Teller
Clapp	Gamble	Money	Tillman
Clark, Wyo.	Gary	Overman	Warner
Clarke, Ark.	Gore	Owen	Warren
Clay	Guggenheim	Page	
Crane	Hale	Paynter	
Culberson	Hansbrough	Penrose	

Mr. CLAY. I desire to state that my colleague [Mr. BACON] has been detained at home since Saturday on account of sickness. He is unable to be in attendance on the Senate.

The VICE-PRESIDENT. Fifty-seven Senators have answered to their names. A quorum of the Senate is present.

Mr. CULLOM. Will the Senator from Idaho yield to me to have a little bill passed that I think will take no time?

Mr. HEYBURN. I ask first that the conference report be laid before the Senate.

The VICE-PRESIDENT. The Chair lays before the Senate the conference report on Senate bill 2982. The report will be read.

Mr. CLARKE of Arkansas. The report relates to a matter of difference between the two Houses and an agreement relating to what is known as the "criminal code."

Mr. HEYBURN. Has the report been laid before the Senate?

The VICE-PRESIDENT. It has been laid before the Senate.

Mr. HEYBURN. I want the RECORD to show that it was laid before the Senate.

The VICE-PRESIDENT. It has been laid before the Senate.

Mr. CULLOM. I believe the Senator from Idaho agrees to yield to me to have a little measure passed.

Mr. HEYBURN. I will yield to the Senator from Illinois, if I may do so under the rule.

SURFACE RIGHTS OF ENTRYMEN.

Mr. CLARK of Wyoming. When the absence of a quorum was suggested I was about to present a small conference report. I ask the indulgence of the Senator from Idaho for its present consideration.

Mr. HEYBURN. Very well.

Mr. CLARK of Wyoming submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24834) for the protection of the surface rights of entrymen, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 4.

That the House recede from its agreement to amendment numbered 1, striking out the word "heretofore," on line 3, page 1, and agree to the same.

That the House recede from its disagreement to the amendments of the Senate numbered 2 and 3, and agree to the same with an amendment as follows:

Strike out the semicolon at the end of line 12, page 2, and insert a period. Strike out all of lines 13, 14, 15, and 16, on page 2, and insert the following: "Such locator, selector, or entryman who has heretofore made or shall hereafter make final proof showing good faith and satisfactory compliance with the law under which his land is claimed shall be entitled to a patent without reservation unless at the time of such final proof and entry it shall be shown that the land is chiefly valuable for coal."

And that the Senate agree to the same.

C. D. CLARK,
JOS. M. DIXON,
J. H. BANKHEAD,
Managers on the part of the Senate.

F. W. MONDELL,
A. J. VOLSTEAD,
JOS. T. ROBINSON,
Managers on the part of the House.

The report was agreed to.

WATERS OF THE NIAGARA RIVER.

Mr. CULLOM. I am directed by the Committee on Foreign Relations, to whom was referred the joint resolution (H. J. Res. 262) extending the operation of an act for the control and regulation of the waters of the Niagara River, for the preservation of Niagara Falls, and for other purposes, to report it favorably without amendment, and I ask for its present consideration.

The Secretary read the joint resolution, and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

BILLS INTRODUCED.

Mr. MARTIN introduced a bill (S. 9530) for the relief of Grace Evangelical Lutheran Church, of Winchester, Va., which was read twice by its title and, with the accompanying paper, referred to the Committee on Claims.

Mr. OVERMAN introduced a bill (S. 9531) for the relief of Alfred Richardson and others, heirs of John Richardson, deceased, of Franklin County, N. C., which was read twice by its title and, with the accompanying paper, referred to the Committee on Claims.

Mr. PILES introduced a bill (S. 9532) granting an increase of pension to Hiram S. Stevens, which was read twice by its title and, with the accompanying papers, referred to the Committee on Pensions.

He also introduced a bill (S. 9533) granting an increase of pension to Charles Rogers, which was read twice by its title and, with the accompanying paper, referred to the Committee on Pensions.

Mr. TALIAFERRO introduced a bill (S. 9534) for the relief of the heirs of John Starke, deceased, which was read twice by its title and referred to the Committee on Claims.

Mr. MONEY introduced a bill (S. 9535) for the relief of the Presbyterian Church at Greenville, Miss., which was read twice by its title and referred to the Committee on Claims.

Mr. DANIEL introduced a bill (S. 9536) for the relief of Shelby Lodge, No. 162, Ancient Free and Accepted Masons, Bristol, Va., which was read twice by its title and referred to the Committee on Claims.

Mr. KNOX introduced a bill (S. 9537) for the relief of Joseph Roberts and certain other army officers and their heirs or legal representatives, which was read twice by its title and referred to the Committee on Claims.

RECLAMATION OF ARID LANDS.

Mr. CARTER submitted the following resolution (S. Res. 319), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Irrigation be, and it is hereby, authorized and directed, by subcommittee or otherwise, to visit, during the recess of the Senate, such reclamation works of the United States Reclamation Service as in the committee's judgment should be examined, in order to ascertain existing conditions therewith connected and secure information deemed useful in the consideration of future proposed legislation affecting the reclamation of arid lands. And the committee is further authorized to send for persons and papers, to administer oaths, to employ a stenographer, and to have such printing done as the committee may require; the expenses incurred to be paid out of the contingent fund of the Senate upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

YELLOWSTONE NATIONAL PARK.

Mr. CARTER. I present a paper, being notes, historical and descriptive, of the Yellowstone National Park, compiled and prepared by Mr. John H. Raftery, under the direction and supervision of Lieut. Gen. S. M. B. Young, U. S. Army, retired, superintendent. Later I shall present illustrations to accompany the paper. I move that it be printed as a document (S. Doc. No. 752).

The motion was agreed to.

Mr. HEYBURN. I ask that the conference report which was laid before the Senate shall be read.

The VICE-PRESIDENT. Before doing that, if the Senator will yield, the Chair will lay before the Senate messages from the House of Representatives.

PUBLIC BUILDINGS.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendment of the Senate to the bill (H. R. 28167) to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public-building acts, and for other purposes, and request-

ing a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. SCOTT. I move that the Senate adhere to its amendments and agree to the request of the House for a conference, and that the President of the Senate appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice-President appointed Mr. SCOTT, Mr. MCCUMBER, and Mr. CULBERSON conferees on the part of the Senate.

MILITARY ACADEMY APPROPRIATION BILL.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 28059) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1910, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. SCOTT. I move that the Senate insist on its amendments and agree to the conference asked by the House, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Vice-President appointed Mr. SCOTT, Mr. HEMENWAY, and Mr. FOSTER conferees on the part of the Senate.

PEACE OFFICERS IN ALASKA.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 8058) authorizing the Attorney-General to appoint as special peace officers such employees of the Alaska school service as may be named by the Secretary of the Interior.

The amendment of the House was to strike out all after the enacting clause of the bill, and to insert:

That the Attorney-General shall have power to appoint, in his discretion, any person employed in the Alaska school service who may be designated by the Secretary of the Interior as a special peace officer of the division of the district of Alaska in which such person resides; and such special peace officer shall have authority to arrest, upon warrant duly issued, any native of the district of Alaska charged with the violation of any of the provisions of the criminal code of Alaska (act Mar. 3, 1899, 2d Supp. Rev. Stat., 1003) or any amendment thereof, or any white man charged with the violation of any of said provisions to the detriment of any native of the district of Alaska; and such peace officer shall also have authority to make such arrests, without warrant, for a crime committed or attempted in his presence, or when the person arrested has committed a felony, although not in his presence, or when a felony has in fact been committed and he has reasonable cause for believing the person arrested to have committed it; and any person so arrested shall be taken, in accordance with such rules and regulations as may be prescribed by the Attorney-General, and without unnecessary delay, before a United States commissioner or other judicial officer for trial: *Provided, however,* That no person so appointed shall be entitled to any fees or emoluments of any character whatsoever for performing any of the services herein mentioned, but may be allowed, in the discretion of the Attorney-General, expenses actually and necessarily incurred in connection with such services.

Mr. BEVERIDGE. I move that the Senate agree to the House amendment.

The motion was agreed to.

ESTATE OF WILLIAM J. CUSSEN.

Mr. MARTIN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Virginia?

Mr. HEYBURN. I do. I desire to give notice that I do not wish to yield further.

Mr. MARTIN. I ask the Senate to proceed to the bill (H. R. 1622) for the relief of the estate of William J. Cussen.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It provides that a judgment recovered in favor of the United States against William J. Cussen and Nicholas A. Cullen in the circuit court for the eastern district of Virginia on the 31st day of January, 1870, for the sum of $1,968, and $40.40 costs, be, and the same is hereby, declared to be released and satisfied as to the estate of the said William J. Cussen, now deceased, and as to any estate, real or personal, acquired by the said Cussen subsequent to the date of the said judgment and aliened by him to others during his lifetime or owned by him at the time of his death; and the United States attorney for the eastern district of Virginia is hereby authorized and directed to mark on the order book of the court where the said judgment is recovered that the same has been satisfied.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REVISION OF THE PENAL LAWS.

Mr. HEYBURN. I ask that the report of the conference committee on Senate bill 2982 be read.

The Secretary proceeded to read the conference report, which is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 2982, being a bill to codify, revise, and amend the penal laws of the United States, having met, after full and free conference have agreed to recommend, and do recommend, to their respective Houses as follows:

That the Senate agree to the House amendment, with amendments to sections 7, 19, 20, 37, 51, 95, 125, 126, 140, 187, 200, 226, 227, 243, 253, 254, 255, 256, 257, 262, 263, 276, 295, 300, 321, 322, 323, and 349.

That the House agree to the amendments proposed by the Senate conferees, as follows:

Section 7. On page 4, in line 21, after the words "United States," insert the words "or in any place subject to the jurisdiction thereof."

Section 19. On page 12, line 13, substitute a semicolon for the period, and add the following: "and shall, moreover, be thereafter ineligible to any office or place of honor, profit, or trust created by the Constitution or laws of the United States."

Section 20. On page 12 strike out section 20.

Section 37. On page 22, in line 11, substitute a comma for the semicolon, strike out the remainder of the section, and in lieu thereof insert the following: "shall be fined not more than five thousand dollars or imprisoned not more than five years, or both. And whoever shall knowingly purchase or receive in pledge for any obligation or indebtedness from any soldier, officer, sailor, or other person called into or employed in the military or naval service, any arms, equipments, ammunition, clothes, military stores, or other public property, whether furnished to the soldier, sailor, officer, or person under a clothing allowance or otherwise, such soldier, sailor, officer, or other person not having the lawful right to pledge or sell the same, shall be fined not more than five hundred dollars and imprisoned not more than two years."

Section 51. On page 28, at the end of the section, add the following: "And nothing in this section shall interfere with or take away any right or privilege under any existing law of the United States to cut or remove timber from any public lands."

Section 95. On page 48, at the end of line 21, add the words "prima facie."

Section 105. On page 53, in line 1, after the word "or," strike out the word "be."

Section 125. On page 63, in lines 3 to 7, amend the proviso so as to read as follows: "*Provided*, That no person shall be deemed guilty of a violation of any such rule unless prior to such alleged violation he shall have had actual knowledge thereof."

Section 126. On page 63, in line 13, strike out the word "and" and insert in lieu thereof the word "or;" and in line 14 substitute a comma for the period at the end of the section and add the words "or both."

Section 140. On page 70 strike out section 140.

Section 142. On page 71, in line 1, strike out the word "now" before the word "provided."

Section 187. On page 98, in line 17, after the word "vessel," insert the words "to the current business of the carrier."

Section 194. On page 100, in line 18, strike out the word "or" before the word "embezzling."

Section 200. On page 104, in line 14, substitute a semicolon for the comma, strike out the remainder of the section, and in lieu thereof insert the following: "and if in effecting or attemping to effect such robbery he shall wound the person having custody of such mail, or put his life in jeopardy by the use of a dangerous weapon, or for a subsequent offense, shall be imprisoned twenty-five years."

Section 226. On page 123, in line 6, before the word "submit," insert the word "knowingly."

Section 227. On page 123, in line 22, before the word "misstate," insert the word "or;" and in line 23, before the word "conceal," insert "for the purpose aforesaid shall knowingly and willfully."

Sections 241, 242, 243. On pages 132 and 133, strike out the word "That" at the beginning of each section and begin the first word of each section with a capital letter.

Section 243. On page 133, in line 13, after the word "shall," insert the word "knowingly."

Section 248. On page 136, in line 19, substitute for the words "and every" the words "or any."

Section 253. On page 140, in lines 9 and 10, strike out the words "being a citizen or other person resident."

Section 254. On page 140, in line 17, strike out the word "American;" and in line 18 substitute for the words "jurisdictional limits" the word "jurisdiction."

Section 255. On page 141, in line 1, strike out the word "American."

Section 256. On page 141, strike out section 256.

Section 257. On page 141, in line 12, strike out the words "State, Territory, or District" and in lieu thereof insert the words "place subject to the jurisdiction."

In line 13 strike out the words "a foreign country, state, or" and in lieu thereof insert the words "any other."

In lines 14 and 15 strike out the words "State, Territory, or District" and in lieu thereof insert the words "place subject to the jurisdiction."

Section 262. On page 143, in lines 13 and 14, strike out the words "jurisdictional limits" and in lieu thereof insert the word "jurisdiction."

Section 263. On page 143, in line 21, before the word "directly," insert the words "or under the jurisdiction thereof."

Section 270. On page 146, in line 11, strike out the word "other" before the word "foreign."

Section 276. On page 150, in line 8, strike out all after the period, and also all of lines 9 and 10.

Section 279. On page 151, in line 20, strike out the word "be" before the word "fined."

Section 295. On page 158 transpose the language of line 10 so that it will read "United States, beats, wounds, or without justifiable cause, im-."

Section 300. On page 161, in line 3, strike out the word "and" at the end of the line and in lieu thereof insert the word "or."

Section 321. On page 169, in line 15, strike out the words "in any Territory."

Section 322. On page 169, in line 19, strike out the words "in any Territory."

Section 323. On page 169, in line 23, strike out the words "in any Territory."

Section 349. On page 198, in line 1, strike out the word "from" and in lieu thereof insert the word "on;" in line 2 strike out the word "July" and in lieu thereof insert the word "January;" also in line 2 strike out the word "nine" and in lieu thereof insert the word "ten."

W. B. HEYBURN,
GEO. SUTHERLAND,
Managers on the part of the Senate.

R. O. MOON,
HERBERT PARSONS,
SWAGAR SHERLEY,
Managers on the part of the House.

DEFICIENCY APPROPRIATION BILL.

During the reading of the conference report,

Mr. HALE. I wish to make a report from the Committee on Appropriations.

Mr. CLARKE of Arkansas. Is that report in order under the unanimous-consent agreement to proceed to the consideration of the conferenee report now before the Senate?

Mr. HALE. The reservation was made not to interfere with appropriation bills.

Mr. ALDRICH. Mr. President, I can not let the remark of the Senator from Arkansas go unchallenged. There was no agreement to proceed with the consideration of the conference report at all, except to take it up at this time.

Mr. CLARKE of Arkansas. Very well.

Mr. HALE. I report back from the Committee on Appropriations, with amendments, the bill (H. R. 28376) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1909, and for prior years, and for other purposes (S. Rept. No. 1109).

This is the last general appropriation bill, and I want to say to the Senate that I shall, with the concurrence of the Senate, take the same course that was taken yesterday on the sundry civil appropriation bill. The bill will go to the printer and will be there prepared in full for the Senate, so that all the provisions and all the amendments will be ready for examination by Senators. I shall then—and I have already attended to that—follow the course suggested by the Senator from Wisconsin [Mr. LA FOLLETTE] of having the bill sent at once to the Senate and placed on Senators' tables so that they can get such information as it is possible for any one to get by examination.

Then later I shall ask the Senate to take up the bill, as we took up the sundry civil appropriation bill yesterday, and I should hope, as this is a much smaller and shorter and less important bill, that we shall finish it in the afternoon, and thereby again save a night session. But I wish to say that if we do not finish it I shall ask the Senate to remain for a night session after a recess. However, the bill is not long. It is not important, compared with the other bill, and I hope that we can pass it and not have a night session, all the more because conferences on bills already passed will have to take place to-night and through to-morrow.

Mr. HEYBURN. I ask that pending the making of this report the conference report on Senate bill 2982 be temporarily laid aside, to be resumed after the report is made.

The VICE-PRESIDENT. The Senator from Idaho asks that the pending conference report be temporarily laid aside. Is there objection?

Mr. CLARKE of Arkansas. May I ask the Senator from Idaho for what length of time he desires to lay the report aside, if for any definite time in the day?

Mr. HEYBURN. Only until this report is received; probably for a minute.

The VICE-PRESIDENT. Without objection, it is so ordered. The bill will be placed on the calendar.

REVISION OF THE PENAL LAWS.

The Secretary resumed and concluded the reading of the report of the committee of conference on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

Mr. HEYBURN. Mr. President, I move the adoption of the conference report.

The VICE-PRESIDENT. The question is on agreeing to the conference report.

Mr. CLARKE of Arkansas. Mr. President, the report arises on this parliamentary condition: A joint committee was raised for the purpose of suggesting a codification of the criminal laws. The committee made a report to the respective Houses. The Senate passed the bill introduced here with sundry amendments. It went to the House. The House either amended the bill introduced in that branch or did not—I am not sufficiently advised as to what action was taken—but when the Senate bill was considered in the House the House bill was substituted in toto for the Senate bill.

The House bill has never been presented in the Senate. We do not know what the House has done, except so far as by reading we may have ascertained the facts. I ask that the House bill shall be read.

Mr. HEYBURN. Mr. President, in order that there may be no misunderstanding, I understand the Senator from Arkansas to state that the House struck out the Senate bill and inserted a new bill. If I am correct in that——

Mr. CLARKE of Arkansas. The House amended the same bill.

Mr. HEYBURN. In order that the RECORD may show the facts with perfect candor, I will state that instead of substituting a new bill they substituted a bill in exactly the same phraseology and language as that passed by the Senate, with the exception——

Mr. CLARKE of Arkansas. We will ask for the reading of the bill passed by the House of Representatives, and see just exactly what they did do.

Mr. HEYBURN. I am addressing myself to the request for the reading of the bill. Mr. President, I would have no objection to the reading of the bill, but it is obvious at this time that we are entering upon a filibuster on the part of the minority against the passage of this measure, and the reading of the substitute bill of the House can accomplish no good purpose itself.

There is no question on the part of anyone but what it is the same language and phraseology as the bill that was passed through the Senate, with the exception of 35 trifling amendments, very brief in form, all of which are numbered and set out in distinctive type in the bill which is on the desk of every Senator.

I merely protest against the taking of the time of the Senate to read this entire bill, it not being calculated to enlighten anyone desiring to consider it.

Mr. President, the question is on the adoption of the conference report. The conference is as to the controverted questions between the two bodies. They are set out in full, not only in the report, but upon the reprint of the bill which is before every Senator, with an explanation as to the meaning to be attached to the signals or marks printed in the bill.

Mr. CLARKE of Arkansas. Mr. President, the Senator is hardly authorized to make a statement that we are setting out upon a filibuster when a Member of the Senate asks that a proposed measure of legislation shall be presented at one time before the body. The Constitution contemplates the reading of a bill, that it shall be in writing or printing, and when we ask

that a measure upon which we are expected to vote, which it is proposed to enact into law, shall be read at the desk, the very words and phrases that are to constitute the law, we are well within the rights of any Member here.

The Senator from Idaho is not authorized to say that because we ask for that obvious and proper right in all cases we are engaged in some improper obstruction of legislative work.

Mr. SUTHERLAND. Will the Senator yield to me?

Mr. CLARKE of Arkansas. Certainly.

Mr. SUTHERLAND. The Senator from Arkansas is a member of this Joint Committee on the Revision of the Laws?

Mr. CLARKE of Arkansas. Yes, sir.

Mr. SUTHERLAND. Therefore he is entirely familiar with the history——

Mr. CLARKE of Arkansas. Therefore he is not entirely familiar, because he never attended a single session of the committee and knows nothing about the provisions of the law except as he has learned them in his capacity as a Member of the Senate, after the matter was presented to the Senate.

Mr. SUTHERLAND. The Senator has been paying a great deal of attention to it during the past few days, at any rate.

Mr. CLARKE of Arkansas. Yes, sir; to some features of it.

Mr. SUTHERLAND. The Senator has been furnished with a copy of the bill as it passed the House with the various suggested amendments, and he has had that information for two or three days.

Mr. CLARKE of Arkansas. That might be a very good reason for having some information on the subject, but it does not quite answer the objection that any Member of the Senate is entitled to know what he is voting on and having it made known to him from the desk.

Mr. SUTHERLAND. What I was saying to the Senator was preliminary to a question which I desire to ask him. I desire to ask the Senator if it is not true that the House amendment substituting a bill for the Senate bill is in the exact language, word for word, line for line, and letter for letter from end to end with the bill as passed by the Senate, with the exception of certain amendments, which are, in the main, mere changes in phraseology, which were put upon the bill by the other House?

I want to ask the Senator, further, if it is not true that every one of those amendments is clearly indicated upon the bill which Senators now have before them on their desks?

Mr. CLARKE of Arkansas. I can only say that I do not know. I am unable to answer the inquiry of the Senator from Utah. I assume that, if I were to ask him, he might tell me so, and it would doubtless be true; but we are not required to legislate upon any such basis as that. We are entitled to have presented to this Senate the particular matters that we are to pass upon in our investigation as Senators. It may be that this was a work of diligence, a commendable work of accommodation for the Senator from Utah to inform himself sufficiently to ask questions of that kind and to expect answers. I have not found time in which to do it. If I should say I knew that that was true, I should have no authority for making that statement, except the confidence I have in the statement made by the Senator from Utah.

I am entitled to have this bill proceeded with in an orderly way and in accordance with the precedents of parliamentary law, by which all legislation is enacted, and there is no reason why there should be an exception on this occasion. If the object of it is merely to delay, I can read the bill, but I think I am entitled to have it read at the desk, and I think every other Senator is entitled to have it read at the desk, because that pertains to the established method of legislation.

Mr. SUTHERLAND. Let me ask the Senator——

The VICE-PRESIDENT. Does the Senator from Arkansas yield to the Senator from Utah?

Mr. CLARKE of Arkansas. Yes; cheerfully.

Mr. SUTHERLAND. Does not the Senator from Arkansas understand that we are now simply considering a conference report and that we are not considering the original bill?

Mr. CLARKE of Arkansas. We are considering the propriety of adopting the House amendment in substitution of the Senate bill. That is what we are considering. Conferees have no power to legislate. They simply recommend; and we advise ourselves and adopt or reject their reports as in our judgment is necessary.

Mr. SUTHERLAND. Yes; but we are considering the report of the conference committee.

Mr. CLARKE of Arkansas. If the Senator is making that inquiry for the purpose of shutting out from the Senate a personal knowledge of the contents of this document and requiring us to accept his statement of what it contains, rather than our own judgment and our own knowledge of what it contains——

Mr. SUTHERLAND. The report shows for itself what it contains.

Mr. CLARKE of Arkansas. That is all right. We understand exactly all about the particular documents that go to make up the record in any given legislative proposal, but we are entitled to have the rules of the Senate observed, and we are entitled to have the knowledge, which the Constitution guarantees we shall have, as to the contents of every law that is proposed here for adoption.

I ask for the reading of the House amendment.

The VICE-PRESIDENT. The Secretary will read, as requested.

Mr. HEYBURN. Mr. President, I think we will raise an objection against the reading of this bill for the purpose for which it is proposed to read it—merely to take time.

The VICE-PRESIDENT. The Chair is of the opinion that the request of the Senator from Arkansas [Mr. CLARKE] is in order. The Secretary will read, as requested.

Mr. HEYBURN. If in order, is it subject to objection?

The VICE-PRESIDENT. It is not subject to objection. The Secretary will read.

The SECRETARY. In section 6, page 4, line 22, after the words "United States," it is proposed to strike out——

Mr. CLARKE of Arkansas. I ask that the whole amendment of the House be read, starting at the beginning. The whole thing is an amendment.

The VICE-PRESIDENT. The Secretary will read, as requested.

The SECRETARY. It is proposed to strike out the following words:

Or in any place subject to the jurisdiction thereof.

Mr. HEYBURN. Mr. President, I suppose we shall be obliged to submit to the reading of this bill for the destruction of time. I am going to take the liberty of being very candid in regard to this matter, so that it may go out with the record of the proceedings of this body to the country, with its true meaning apparent on the face of it.

I am advised—and I am subject to interruption right now if I am mistaken—that the objection to the adoption of this report is based upon a contention on the part of the minority that the Congress of the United States shall abandon all legislation dealing with offenses against the elective franchise—the civil rights of citizens. It is given to me by a member of our own joint committee in this body—speaking, as I am advised he does speak, for the minority of this body—that as a condition precedent to the consideration and adoption of the report of this committee of conference the Senate of the United States and the other House shall recede from all reconstruction legislation that was enacted for the purpose of making effective the fourteenth and fifteenth amendments to the Constitution of the United States; and that unless Congress does recede, and by omission from this codification and revision of the laws repeal the reconstruction legislation that was made for the purpose of making effective the fourteenth and fifteenth amendments to the Constitution, no legislation shall be had at this time. I have submitted that question to a Senator who speaks for the minority, and who is not only a member of the Joint Committee for the Revision of the Laws, but who is a member—well, he was not a member of the conference committee, but he was a member of the committee that considered this matter in preparing it for presentation to the Senate, and was present and participated in the Senate deliberations when the Senate passed the bill.

Now, I will not say under the pretense, but a reason is given for asking that this bill be read, that Senators are not familiar with it. It does not come with good grace from a Senator who is a member of a committee charged with the responsibility of reporting a measure to this House for its consideration, or a Senator who was present and voted upon this measure after the Senate had reached an agreement and sent the measure to the other House—it does not come with a very good grace to claim at this time such a lack of knowledge as to the contents of the bill as would require it to be read.

We might as well come to an understanding this morning in the beginning, because, of course, we know that at this period in the session this measure can be talked out of existence. I prefer that it be voted out of existence. I prefer that the vote of every Senator upon the question as to whether we are to obtain a repeal of the reconstruction acts passed after the close of the war of the rebellion or whether we are not to repeal them shall be determined, and that every man's vote and responsibility shall be behind it. It is upon that point that I intend to insist.

Mr. DANIEL. Mr. President, if the Senator from Idaho tries to push his bill in contempt of the laws of this body, I, at least,

will say that I never heard of the objection which he has announced; and I belong to the minority. I only wish to hear the bill read so that I may be informed of it. I was on the Committee on Revision, but the revision was put into other hands. Consequently I have had no opportunity to attend to this bill in these closing hours of this session.

Mr. HEYBURN. I can not hear the Senator from Virginia.

The VICE-PRESIDENT. The Senator from Virginia is not heard by the Senator from Idaho.

Mr. DANIEL. I wish to say that I had not heard of any such interpretation of this measure as the Senator from Idaho puts upon it, and I am one of the minority; and I object to it not on any grounds which the Senator alleges. I want to hear those grounds now that the Senator has pointed out.

Mr. HEYBURN. If the Senator will pardon me for an interruption——

Mr. DANIEL. Certainly.

Mr. HEYBURN. I am, of course, very glad to understand that the Senator from Virginia does not share in the views of other Senators on that side of the Chamber. I was speaking of a conversation with the Senator in charge of the opposition fresh in my mind, and I think he will not contend that I did not correctly state the position which he stated to me was that of the opposition.

Mr. DANIEL. The Senator from Idaho did not state to what Senator he referred, and I know of no such views of any of the opposition. I do not think that this is the place to relate private conversation between members of committees.

Mr. HEYBURN. Mr. President, I had consent to do it. I went to that Senator for information, and I stated to him, as I marked the bill, that I desired to make the statement.

Mr. DANIEL. On account of the Senate, as well as on account of the Senators, I make objection to any such irregular and inappropriate method of presenting a case in the Senate. Every Senator here has the same rights. If he wishes to exercise those rights, it is nobody else's business. He is entitled to do it upon his honor as a man and upon his status as a co-Senator, which is, at least, as high as that of anyone who urges this body to break its own laws.

In this connection, I desire to submit some references in relation to the matter referred to by the Senator from Idaho.

Statement relative to sections 5506 to 5532, inclusive, of Revised Statutes, and known as the "civil-rights sections."

Section 5506, repealed in 1894, and not in code bill.

Section 5507, unconstitutional, and not in code bill.

Section 5508 is carried into code bill without change. It is a general-conspiracy section; has been repeatedly held constitutional and relates to conspiracy against any right of a citizen, and has in recent years been invoked for many offenses having no relation to any race question. It is section 19 in the penal-code bill.

Section 5509 undertakes to make liable any person engaged in a conspiracy punishable in section 5508 for any offense committed in pursuance of such conspiracy, and makes such person liable to any punishment provided by a state law for a similar offense. This section is left out by the conference agreement.

Section 5510 is carried in the penal code bill with a change made by the insertion of the word "wilfully," thus making it less severe. The section punishes discriminations on account of race, etc. It is found as modified as section 21 of the penal code bill.

Sections 5511, 5512, 5513, 5514, 5515, 5520, 5521, 5522, and 5523 were repealed in 1894, and are not restored.

Section 5516 punishes any person who interferes with an officer serving a warrant, etc., or aids in the escape of a person under arrest. It is carried in substantial form in the penal code bill as section 140.

Section 5517 relates to a fine of a marshal for failure to serve papers and is not carried in this code, but will be in the revision of the civil laws, to be made subsequently.

Section 5518 relates to conspiracy against a person holding an office, etc., and is carried without change in the penal code bill as section 22.

Section 5519 is unconstitutional and not in penal code bill.

Sections 5524 and 5525 relate to slave trade and are carried without material change into penal code bill as part of sections relating to slave trade.

Sections 5526 and 5527 relate to peonage. Are carried without change as sections 263 and 264.

Sections 5528, 5529, 5530, 5531, and 5532 punish officers of the army and navy for interfering with an election, and are carried without change as sections 24, 25, 26, 27, and 28 in the penal code bill.

The VICE-PRESIDENT. The Secretary will resume the reading.

The Secretary resumed the reading of the amendment of the House of Representatives and read to the end of section 1.

Mr. TILLMAN. Mr. President, is the document, which is now being read, in print, so that Senators can get a copy of it and follow the reading?

Mr. SUTHERLAND. Mr. President, the bill is in print and the Senator from South Carolina can obtain a copy of it from the Secretary.

The VICE-PRESIDENT. The reading of the bill will be resumed.

The Secretary resumed the reading and read to the end of section 5.

Mr. MONEY. Mr. President, I do not think there is a quorum present, and I ask for a call of the Senate.

The VICE-PRESIDENT. The Senator from Mississippi suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich	Cullom	Gore	Owen
Bankhead	Cummins	Hansbrough	Page
Beveridge	Curtis	Heyburn	Perkins
Borah	Daniel	Hopkins	Piles
Brandegee	Depew	Johnston	Rayner
Brown	Dick	Kean	Richardson
Bulkeley	Dixon	Kittredge	Scott
Burkett	Dolliver	Knox	Simmons
Burnham	Elkins	La Follette	Smith, Mich.
Burrows	Flint	Long	Smoot
Carter	Foraker	McCumber	Stephenson
Clapp	Foster	McLaurin	Stone
Clark, Wyo.	Frazier	Martin	Sutherland
Clarke, Ark.	Frye	Money	Teller
Clay	Fulton	Nelson	Tillman
Crane	Gallinger	Nixon	Warner
Culberson	Gamble	Overman	Warren

The VICE-PRESIDENT. Sixty-eight Senators have answered to their names. A quorum of the Senate is present.

The Secretary resumed and continued the reading of the amendments of the House of Representatives to the end of section 9.

Mr. CLARKE of Arkansas. I ask what section the Secretary is now reading?

The VICE-PRESIDENT. The Secretary has just read section 9.

The Secretary resumed and continued the reading to the beginning of chapter 3, "Offenses against the elective franchise and civil rights of citizens."

Mr. CLARKE of Arkansas. I ask that the Secretary read the next chapter—chapter 3—slowly and distinctly.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary resumed and continued the reading of the House amendment to the end of section 19.

Mr. CLARKE of Arkansas. Let me inquire of the Senator from Utah as to the significance of the lines stricken out at the bottom of section 19, succeeding the figure "2." What does that indicate? The copy of the amendment I have, beginning in line 13, reads:

(2) and shall, moreover, be thereafter ineligible to any office, or place of honor, profit, or trust created by the Constitution or laws of the United States.

Mr. SUTHERLAND. The language to which the Senator calls attention is in existing law. It was left in by the Senate. The House struck it out. The Senate conferees restored it. So that the section now reads precisely as it does in the existing law.

Mr. CLARKE of Arkansas. That particular language indicated in the print from which the Senator reads by a line drawn across the face of the type indicates that it is to be restored?

Mr. SUTHERLAND. No; that does not indicate that it is to be restored. That indicates that it is a Senate provision to which the House disagreed. The House struck it out. That was one of the items in conference. The conferees agreed to restore it.

The reading of the amendment was resumed.

Mr. CLARKE of Arkansas. I think probably the Clerk did not read section 49 as it is printed in the copy of the bill I have. I ask him to read it as it is printed here.

The VICE-PRESIDENT. The Secretary read the section precisely as it is printed.

Mr. CLARKE of Arkansas. In the print we have section 50 reads this way:

Whoever shall cut, or cause or procure to be cut, or who shall wantonly destroy.

The numbering of the sections is not exactly as the Clerk is announcing it at the desk.

The VICE-PRESIDENT. The Secretary is reading from the House print.

Mr. HEYBURN. The Senator from Arkansas will observe that the numbers of the sections in the print of the Senate bill and in the House print vary one or two sometimes because of amendments, but anyone accustomed to it can follow it.

Mr. CLARKE of Arkansas. Is there a print of the bill that corresponds exactly with the print the Clerk is reading?

Mr. HEYBURN. The Clerk is reading from the bill itself, and the Senator has access to that bill, as others have. The print that was made showing the amendments, with appropriate numbers, was made for the convenience of Senators, and there is no difficulty in identifying the sections with the official print. We could not follow the official print, inasmuch as the sections of the bill as it passed the Senate and the House, because of amendments, were shifted backward and forward.

Mr. CLARKE of Arkansas. The earnestness of the Senator does not supply the information I sought. I ask if there has been printed an exact copy of the bill the Clerk is now reading?

Mr. HEYBURN. I understand the Senator called for the reading of the bill, and the bill is being read.

Mr. CLARKE of Arkansas. I am not objecting to that. That is entirely proper. I ask the question whether or not there is a print of the exact matter the Clerk is now reading?

The VICE-PRESIDENT. The Chair has no information upon the subject. The Secretary will read the official bill he has in his hand.

Mr. SUTHERLAND. I will say for the information of the Senator from Arkansas that there is no exact reprint of this bill. There is a reprint of the bill as it passed the House, with the amendments added. So the Senator has before him the bill as it passed the House with the amendments indicated.

Mr. CLARKE of Arkansas. But there is not any print by which we can identify with absolute certainty the particular legislation that we will enact if we vote for this bill.

Mr. SUTHERLAND. The Senator is mistaken; there is.

Mr. CLARKE of Arkansas. Where will I find one?

Mr. SUTHERLAND. The Senator has it before him.

Mr. CLARKE of Arkansas. I have before me a print which gives as section 50 an entirely different section from the one the Clerk is now reading.

Mr. SUTHERLAND. There is some confusion in numbering.

Mr. CLARKE of Arkansas. I know that, of course, now that the Senator from Utah has explained it, but I might have assumed that it was an error in the print. There is no way by which we can identify the matter as read by the Clerk except to assume that the official print from the House will be the one we will vote upon.

Mr. SUTHERLAND. The only way is to follow the sections consecutively.

Mr. CLARKE of Arkansas. I have been undertaking to do that, and I found that I could not do so.

The VICE-PRESIDENT. The Secretary will resume the reading of the bill.

The reading of the amendment was resumed.

Mr. CLARKE of Arkansas. Mr. President, in view of the fact that there is a discrepancy between the printed bill and the bill being read at the desk, I think Senators should be present while it is being read, as it furnishes the only information as to what we will be called upon to vote on. I therefore suggest the absence of a quorum.

The VICE-PRESIDENT. The Senator from Arkansas suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich	Crane	Gamble	Paynter
Bailey	Culberson	Gary	Penrose
Bankhead	Cummins	Gore	Perkins
Beveridge	Curtis	Guggenheim	Piles
Borah	Daniel	Heyburn	Platt
Bourne	Depew	Johnston	Richardson
Brandegee	Dick	Kean	Simmons
Briggs	Dixon	Kittredge	Smoot
Brown	Dolliver	Knox	Stephenson
Bulkeley	du Pont	Lodge	Stone
Burkett	Elkins	McLaurin	Sutherland
Burnham	Flint	Milton	Taylor
Burrows	Foraker	Money	Teller
Carter	Foster	Nelson	Warner
Clapp	Frazier	Nixon	Warren
Clark, Wyo.	Frye	Overman	Wetmore
Clarke, Ark.	Fulton	Owen	
Clay	Gallinger	Page	

The VICE-PRESIDENT. Seventy Senators have answered to their names. A quorum of the Senate is present. The Secretary will resume the reading of the bill.

The Secretary resumed the reading of the amendment.

AGRICULTURAL APPROPRIATION BILL.

Mr. WARREN. I ask the Senator from Idaho if he will suspend a moment until I submit a conference report?

Mr. HEYBURN. Very well.

The VICE-PRESIDENT. The Senator from Wyoming submits a conference report on the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910.

Mr. WARREN. As this is a full agreement, except one item in regard to which we shall have to go into conference again, I ask that the report may be adopted.

Mr. CLARKE of Arkansas. I have no objection to the adoption of the report, but I should like to know what we are going to adopt when we do adopt it. Let the report be read.

Mr. HEYBURN. Mr. President, I yielded for the purpose of allowing the report to be made and conferees appointed, but to interject another element of delay in this matter I will not agree.

Mr. BAILEY. I am under the impression that a conference report is always in order.

Mr. HEYBURN. No; nothing is in order as against the measure now under consideration.

Mr. BAILEY. My impression is that a conference report is always in order.

The VICE-PRESIDENT. The presentation of a conference report is always in order. Its consideration is for the determination of the Senate. The Senate now has under consideration a conference report.

Mr. ALDRICH. That may be true, but the presentation of a conference report is in order at any time, under any circumstances.

The VICE-PRESIDENT. That is correct; that is what the Chair stated.

Mr. HEYBURN. The report has been presented.

Mr. LODGE. The presentation is in order, but I think no action is in order.

Mr. BAILEY. The conference report is presented and is read. It can not be disposed of probably until afterwards, but it is not presented until it has been read.

The VICE-PRESIDENT. The presentation includes its reading.

Mr. ALDRICH. Undoubtedly.

The VICE-PRESIDENT. But the consideration of the report is a matter for the subsequent determination of the Senate. The Secretary will read the conference report.

The Secretary proceeded to read the report.

Mr. CLARKE of Arkansas. Let the report be intelligibly read so that we may know what the Senate conferees receded from and what amendments were concurred in.

The VICE-PRESIDENT. The Secretary is reading the report precisely as it is made.

The Secretary resumed and concluded the reading of the report, which is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 18, 20, 31, 40, 41.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 9, 10, 12, 14, 15, 16, 17, 21, 22, 23, 24, 27, 32, 33, 34, 35, 36, 37, 38, 39, 42, 43, 46, 47, 48, 49, 50, 51, 52, 53, 54, 56, 57, 59, 60, 61; and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment, insert "six hundred and twenty-five thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment, insert "one million two hundred and sixty-three thousand seven hundred and sixty;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "one million four hundred and twenty-seven thousand eight hundred and sixty;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: Strike out the word "carry," in line 25, page 15, and insert in lieu thereof the words "for carrying;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment as follows: In lieu of the sum inserted by the

amendment insert "two hundred and twenty-five thousand;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: In lieu of the sum inserted by the amendment insert "one million one hundred and eighty thousand seven hundred and ninety-six;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "two hundred and sixty-two thousand three hundred and twenty;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "ten thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: In lieu of the sum inserted by the amendment insert "one million seven hundred and nine thousand two hundred and sixty-six;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment as follows: In lieu of sum inserted by said amendment insert "one hundred and seventy-three thousand four hundred and fifty;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment as follows: In lieu of sum inserted by said amendment insert "two hundred and six thousand four hundred and fifty;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment as follows: In lieu of the sum inserted by said amendment insert "twelve million nine hundred and eighty-five thousand and thirty-six;" and the Senate agree to the same.

The committee of conference have been unable to agree on the amendment of the Senate numbered 58.

F. E. WARREN,
J. P. DOLLIVER,
H. D. MONEY,
Managers on the part of the Senate.

CHARLES F. SCOTT,
JOHN LAMB,
GILBERT N. HAUGEN,
Managers on the part of the House.

The report was agreed to.

Mr. WARREN. I move the adoption of the report.

The report was agreed to.

Mr. WARREN. In view of the disagreement and the acceptance of the report I move that the Senate further insist upon its amendment numbered 58, that we invite the House to a further conference, and that the Vice-President appoint the managers on the part of the Senate, using the same names that were on the conference before.

The motion was agreed to; and the Vice-President appointed Mr. WARREN, Mr. DOLLIVER, and Mr. MONEY conferees on the part of the Senate at the further conference.

REVISION OF THE PENAL LAWS.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States, and read to section 127.

Mr. CLARKE of Arkansas. The hour of 12 o'clock having arrived, I move that the pending bill be temporarily laid aside for the consideration of morning business.

Mr. HEYBURN. I object.

Mr. CLARKE of Arkansas. I make the motion that that be done.

The VICE-PRESIDENT. The Senator from Arkansas moves that the consideration of the pending conference report be temporarily laid aside for the consideration of morning business.

Mr. HEYBURN. Is the motion debatable?

The VICE-PRESIDENT. The Senator from Idaho.

Mr. HEYBURN. Mr. President, I sincerely hope the motion of the Senator from Arkansas will not prevail. I object to laying the bill aside, temporarily or otherwise, and I will let the motion be put.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Arkansas. [Putting the question.] By the sound, the noes have it.

Mr. CLARKE of Arkansas. I ask for the yeas and nays.

The yeas and nays were ordered and taken.

Mr. CLAY. I desire to announce that my colleague [Mr. BACON] is detained at home on account of sickness.

The result was announced—yeas 18, nays 60, as follows:

YEAS—18.

Bailey	Foster	Milton	Simmons
Bankhead	Gore	Money	Stone
Clarke, Ark.	Johnston	Overman	Taliaferro
Culberson	McLaurin	Paynter	
Daniel	Martin	Rayner	

NAYS—60.

Beveridge	Cullom	Gallinger	Nelson
Borah	Cummins	Gamble	Page
Bourne	Curtis	Gary	Penrose
Brandegee	Depew	Guggenheim	Perkins
Briggs	Dick	Hansbrough	Piles
Brown	Dillingham	Hemenway	Richardson
Bulkeley	Dixon	Heyburn	Scott
Burkett	Dolliver	Hopkins	Smith, Mich.
Burnham	du Pont	Kean	Stephenson
Burrows	Elkins	Kittredge	Sutherland
Carter	Flint	Knox	Taylor
Clapp	Foraker	La Follette	Teller
Clark, Wyo.	Frazier	Lodge	Warner
Clay	Frye	Long	Warren
Crane	Fulton	McCumber	Wetmore

NOT VOTING—14.

Aldrich	Hale	Nixon	Smoot
Ankeny	McCreary	Owen	Tillman
Bacon	McEnery	Platt	
Davis	Newlands	Smith, Md.	

So the Senate refused to lay aside the conference report.

Mr. CULBERSON. Mr. President, I rise to a parliamentary inquiry.

The VICE-PRESIDENT. The Senator from Texas will state his parliamentary inquiry.

Mr. CULBERSON. It has been stated several times recently by the Senator from Rhode Island [Mr. ALDRICH] that the present measure is before the Senate by unanimous consent. I call the attention of the Chair to Rule VII, which provides:

After the Journal is read the presiding officer shall lay before the Senate messages from the President.

* * * * * * *

The presiding officer shall then call for, in the following order—

Certain matters that are to be presented.

In subdivision 3 of Rule VII it is provided:

3. Until the morning business shall have been concluded, and so announced from the Chair, or until the hour of 1 o'clock has arrived, no motion to proceed to the consideration of any bill, resolution, report of a committee, or other subject upon the calendar shall be entertained by the presiding officer, unless by unanimous consent; and if such consent be given the motion shall not be subject to amendment, and shall be decided without debate upon the merits of the subject proposed to be taken up.

I read that for the benefit of the Chair, and then ask what is the present status of the business of the Senate?

The VICE-PRESIDENT. The pending conference report is before the Senate under the following order of the Senate made last evening:

The VICE-PRESIDENT. The Senator from Idaho asks unanimous consent that the further consideration of the conference report on what is known as the "penal-code bill" shall now cease, and that the consideration of it be resumed at 10 o'clock to-morrow morning. Is there objection? The Chair hears none, and it is so ordered.

Mr. CULBERSON. Does the Chair construe what he has read to be unanimous consent?

The VICE-PRESIDENT. The Chair so construes it.

Mr. CLARKE of Arkansas. Before we pass by that particular question I desire to recall to the Senator a colloquy that took place between the senior Senator from Rhode Island [Mr. ALDRICH] and myself, in which the Senator from Rhode Island said: "I can not permit the suggestion of the Senator that this bill is before the Senate by unanimous consent to pass unchallenged. It is here by an affirmative vote of the Senate and can be displaced at any time if the rules and regulations and votes of the Senate shall see proper to displace it."

It was not the intention, so announced, to give it any privilege beyond that which was conferred upon it by the vote. Of course, the further consideration of it was dispensed with at the particular hour when the entry was made which the Chair has just read; but there was nothing said, and nothing manifested by not being said, which indicated that the standing rules of the Senate were to be modified, suspended, or repealed in favor of this bill. It had all the rights of any other bill, as a bill, to be considered at times that had not been definitely set apart for the consideration of other matters. When the Senator from Idaho asked unanimous consent that the further consideration of it might be suspended, of course, we all understood that

to be taken in connection with and interpreted by what had transpired when the Senator from Rhode Island had the floor.

I do not believe it was the intention of the Senate to give this bill a privilege that would displace every other order that the Senate prescribed by its rules. I think the Senator from Rhode Island would agree with me now, if he were present. I know he stated that opinion distinctly. That is his opinion now, and he made the statement this morning that the bill was before the Senate as the result of a vote, and not as the result of unanimous consent.

The VICE-PRESIDENT. The Chair is governed in his interpretation not by the understanding of any Senator, but by his own interpretation of the order made by the Senate itself.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. NELSON. Mr. President, I ask leave to make a conference report on the river and harbor bill (H. R. 28243), and ask for its immediate consideration.

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Minnesota?

Mr. HEYBURN. I yield for that purpose, but not for the discussion of any report.

Mr. NELSON. I do not think it will lead to any debate.

Mr. CULBERSON. I do not understand that the Senator from Idaho can limit the rights of a conference report. He says now that he yields "for that purpose, but not for discussion." If the conference report is before the Senate, it is here for all purposes, as I understand.

Mr. HEYBURN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Texas yield to the Senator from Idaho?

Mr. CULBERSON. I do.

Mr. HEYBURN. If that were to be held, then I would be constrained not to yield for any report; and I have yielded already this morning to two or more conference reports, about which there was no controversy, always with the understanding, which amounts to unanimous consent in the absence of objection. If there is any controversy about it, then I will yield no further.

Mr. NELSON. I think there will be no controversy about the report I submit.

Mr. CULBERSON. I am not advised as to whether there is any controversy over this report or not, but I protest against the Senator from Idaho limiting the purpose for which he yields to the presentation of this report.

Mr. HEYBURN. I think that that is entirely within my rights. I am not obliged to yield at all. I may yield for the presentation of a conference report, reserving the right to have it laid over, this being business of the same character. We are considering another conference report, and I am not obliged to yield the floor on the consideration of this report.

Mr. CULBERSON. I insist that if the conference report presented by the Senator from Minnesota [Mr. NELSON] is presented it is presented for all purposes. That is my only object in rising.

Mr. HEYBURN. Then, I shall object to the report being presented.

The VICE-PRESIDENT. Objection is made to the presentation of the report. The Secretary will resume the reading.

Mr. NELSON. I think the conference report is in order, Mr. President.

The VICE-PRESIDENT. The presentation of the conference report is in order, but its consideration may not be proceeded with except by order of the Senate.

Mr. NELSON. Then, I shall move for its consideration.

The VICE-PRESIDENT. This is the first presentation of the report. The Chair is of opinion that the presentation is in order, but its consideration is a matter for the further determination of the Senate.

Mr. CULBERSON. I ask that the report be read, then.

The VICE-PRESIDENT. The Secretary will read the conference report.

The Secretary read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, 6, 7, 12, 13, 14, 15, 16, 19, 21, 25, 26, 45, 52, 58, 69, 73, 82, 83, and 84.

That the House recede from its disagreement to the amendments of the Senate numbered 8, 9, 18, 20, 23, 24, 29, 30, 33, 36, 37, 38, 39, 41, 42, 44, 46, 47, 48, 51, 53, 54, 57, 63, 66, 70, 71, 74, 75, 76, 77, 78, and 79; and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Hingham Harbor, Massachusetts: The balance remaining from appropriations heretofore made for this improvement may be diverted and made available for redredging and improving the channel;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: At the end of the language proposed to be inserted strike out the period and insert the following: "now or heretofore improved by the United States;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: Restore the language proposed to be stricken out and at the end thereof strike out the period and insert a colon and the following words: "*Provided*, That such survey shall in no way delay or interfere with the plans for construction already under way;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the language proposed to be inserted, insert, at the end of section 10, the following: "The Secretary of War is also authorized, in his discretion, to permit any corporation or association of persons in King County, Wash., at their own expense and without cost to the United States Government, to widen, deepen, and straighten the Duwamish River in said King County: *Provided*, That the work so done shall be in accordance with plans approved by the Chief of Engineers of the War Department;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: Restore the number of the section as in the House bill, and in lieu of the language of the section in the House bill insert the following:

"SEC. 12. That part of the act entitled 'An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes,' approved June thirteenth, nineteen hundred and two, in section one, relating to the Michigan-Lake Superior Power Company, is hereby amended by adding the following:

"The right to the flow of water, and riparian, water power, and other rights, now or hereafter owned by the United States in the St. Marys River, in Michigan, shall be forever conserved for the benefit of the Government of the United States, primarily for the purposes of navigation and incidentally for the purpose of having the water power developed, either for the direct use of the United States, or by lease or other agreement, through the Secretary of War, who is hereby authorized to make such leases or agreements: *Provided*, That a just and reasonable compensation shall be paid for the use of all waters or water power now or hereafter owned in said St. Marys River by the United States, whether utilized in said river or in any lateral canal, said compensation to be fixed by the Secretary of War: *Provided further*, That under no circumstances shall any rights be granted in said river which will interfere with the needs and uses of navigation or which will limit the absolute control of said land and waters when desired for purposes of navigation by the United States, or for a longer period than thirty years, and the Secretary of War, in his discretion, may provide for readjustment of compensation at periods of ten years, nor shall any such rights be granted without just and adequate compensation. It is intended that any excess of water in the St. Marys River at Sault Ste. Marie over and above the amount now or hereafter required for the uses of navigation shall be leased for power purposes by the Secretary of War upon such terms and conditions as shall be best calculated, in his judgment, to insure the development thereof. The Secretary of War may, as often as necessary, make such regulations as in his judgment are reasonable and just and best calculated to carry out the purposes of this section."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of the word "eight" insert the word "seven;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Arkansas River, between Little Rock and Ozark,

with a view to improving the navigation by locks and dams or otherwise;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: In the language proposed to be inserted strike out the words "to protect government property" and the semicolon; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of the language proposed, insert the following: "Mosquito Inlet to New Smyrna;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment as follows: In the language proposed strike out "nine" and insert "six;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: At the end of the language proposed, strike out the period and insert the following: "from the mouth to Burnt Fort;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the language proposed, insert the following: "Clearwater River, from its mouth to Kamiah, with a view to a maximum depth of six feet;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the language proposed, insert the following: "Missouri River, at the city of Atchison, with a view to retaining said river in its proper channel;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: In addition to striking out the language as proposed, strike out also the following language immediately preceding it: "with a view to its improvement for navigation;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "White Lake Harbor, with a view to providing an entrance channel with a depth of twenty feet and a turning basin;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Yellowstone River, from its mouth to Billings, with a view to a four-foot stage of water and the building of a lock at the United States government dam;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "with a view to dredging the channel and providing a harbor on the east side;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment as follows: In lieu of the word "Stantonburg" insert the word "Stantonsburg;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Neuse River from Pamlico Sound to Newbern; Trent River up to Quaker Bridge; Pasquotank River up to Elizabeth City, with a view to providing channels to conform with the depth of the authorized waterway to connect the waters of Pamlico Sound with the ocean at Beaufort;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: Strike out the words "on said Swift Creek;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment as follows: Strike out the words "on said Smiths Creek;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "North and South Dakota, Montana, and Missouri.—The Missouri River, from Sioux City, Iowa, to Fort Benton, Mont.; also at or near Lake Contrary, Missouri, with a view to preventing a diversion of the channel;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment as follows: After the word "Twenty-nine" inserted by the amendment, insert the words "including the last-named lock;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 64, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "The North Canadian River, with a view to the diversion of a portion of its waters into the Cimarron River for improving the navigation of the latter river;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment as follows: Strike out from the text of the bill the words "to mouth of the Grand River" immediately preceding the language proposed to be inserted, and in lieu of the language proposed insert the following: "to Tulsa;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Newport Harbor, with a view to the modification and enlargement of the existing projects as indicated in plans 'B' and 'C,' contained in House Document Numbered Four hundred and thirty-eight, Fifty-ninth Congress, second session;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment as follows: In the language proposed, after the word "Pond," insert the words "and the entrance thereto;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In the language proposed to be inserted strike out the words "forming the Tennessee River;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "including a waterway from the protected waters of Narragansett Bay through the ponds and lagoons lying along the southern coast of Rhode Island to Watch Hill and Fishers Island;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 81, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Survey for the construction of a continuous inland waterway in the State of California, between suitable points on Humboldt Bay and Eel River, with a view to obtaining a channel of suitable width and a maximum depth of nine feet, or such lesser depths along any section or sections of said waterway as may be found desirable. Such survey shall include an examination of all practicable routes;" and the Senate agree to the same.

KNUTE NELSON,
J. H. GALLINGER,
THOMAS S. MARTIN,
Managers on the part of the Senate.
THEODORE E. BURTON,
D. S. ALEXANDER,
S. M. SPARKMAN,
Managers on the part of the House.

REVISION OF THE PENAL LAWS.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

The VICE-PRESIDENT. The Secretary will resume the reading of the amendment.

The Secretary read section 128.

Mr. OVERMAN. I think if the Senator from Idaho [Mr. HEYBURN] would consent to a re-reference of this matter to the committee of conference probably we could agree. I ask if he will not agree to a re-reference, and bring in the matter again this evening or this afternoon. I believe we can agree.

Mr. HEYBURN. Mr. President——

The VICE-PRESIDENT. Does the Senator from North Carolina yield to the Senator from Idaho?

Mr. OVERMAN. Certainly.

Mr. HEYBURN. I could not consent to a re-reference without a very definite understanding that would be equivalent to a disposition of the whole question.

Mr. OVERMAN. It is not my purpose to have any delay except to gain time. That is my purpose. I repeat that I believe we can gain time by the course I suggest. I do not know all the differences between other Senators and the Senator from Idaho, but there are two or three words here in one section that I think——

Mr. HEYBURN. Mr. President——

Mr. OVERMAN. I have no authority to speak for anybody but myself, but I believe an agreement can be reached——

Mr. HEYBURN. No; I can not consent to that.

Mr. OVERMAN. An arrangement satisfactory to all parties.

Mr. HEYBURN. It must come by authority and with the terms of objection and agreement stated. Otherwise I can not agree to a rereference. It would have to be very definite.

The VICE-PRESIDENT. The Secretary will resume the reading of the amendment.

The Secretary resumed the reading of the amendment and read section 129.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. NELSON. I inquire what became of the conference report I presented?

The VICE-PRESIDENT. The conference report has been presented and its consideration has been objected to.

Mr. NELSON. I move the adoption of the report. For that purpose I ask that the pending matter be temporarily laid aside while we can act on this conference report. That does not displace the pending conference report.

Mr. HEYBURN. I can not take any parliamentary chances on that.

Mr. NELSON. That does not displace the pending conference report. I ask unanimous consent that the criminal-code conference report be temporarily laid aside until we can act on the river and harbor conference report.

Mr. HEYBURN. I can not yield unanimous consent for that purpose.

Mr. NELSON. That does not affect the Senator's status in the least. It does not affect his conference report or displace it. I ask unanimous consent that conference report on the criminal-code bill be temporarily laid aside until we can act on the conference report on the river and harbor bill.

Mr. HEYBURN. I object to that.

Mr. NELSON. I will submit the question to the President of the Senate if such a motion would displace the pending conference report?

The VICE-PRESIDENT. The Senator from Minnesota asks unanimous consent that the consideration of the pending conference report be temporarily laid aside and that the Senate consider the report of the committee of conference on the river and harbor bill.

Mr. NELSON. Would that displace the criminal code conference report, Mr. President?

The VICE-PRESIDENT. It would not if that agreement were made.

Mr. HEYBURN. Mr. President, I know a request for unanimous consent is not debatable, but I will make this suggestion to the Senator, who is as interested as I am in the measure under consideration. It simply opens the door to a discussion of the river and harbor bill which might be prolonged.

Mr. NELSON. There will be no discussion of the report, I think.

Mr. HEYBURN. River and harbor bills have occasioned much discussion heretofore.

Mr. NELSON. I do not think in this case there will be any discussion.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Minnesota [Mr. NELSON]? The Chair hears none, and it is so ordered. The question is on agreeing to the conference report on the river and harbor bill.

Mr. CLARKE of Arkansas. Has the report been read, Mr. President?

The VICE-PRESIDENT. It has been read. The question is on agreeing to the conference report.

Mr. CLARKE of Arkansas. Before that question is put, have the items to which the House agreed or to which they disagreed been indicated? Have the particular features of the report been indicated to the Senate, naming the amendments of the Senate to which the House agreed, those to which the House disagreed, and those where it was necessary for the conferees to insert independent or new provisions?

Mr. NELSON. We have not inserted any new provision. Most of our amendments have been agreed upon. Some we have slightly modified, but there are no new provisions in the bill of any kind. We have modified some of the provisions of the bill; but, as I have said, not a new provision has been put in it.

Mr. MILTON. Mr. President, I should like to state to the Senator that I did not hear the report read. I have some amendments in which I am interested, and I should like to know what disposition has been made of them.

The VICE-PRESIDENT. The question is on agreeing to the report.

Mr. STONE. The Senator from Florida [Mr. MILTON] has asked to have the report read.

Mr. BEVERIDGE. It has been read.

The VICE-PRESIDENT. It has been read.

Mr. STONE. I ask that it be read again.

Mr. OVERMAN. I do not think the various items were read. The Senator from Florida says that there are some amendments in which he is interested. He does not know how they were disposed of, and he wants to hear. It seems he does not know whether they were agreed to or not.

The VICE-PRESIDENT. The Secretary will again read the report.

The Secretary proceeded to again read the conference report submitted by Mr. NELSON.

Mr. NELSON. Mr. President, the report has already been read. I want to say to the Senator from Florida that all the amendments relating to surveys in Florida were incorporated. Two of them were slightly modified, but otherwise all the provisions for surveys are in the bill.

Mr. MILTON. That is perfectly satisfactory, so far as I am concerned.

The VICE-PRESIDENT. The question is on agreeing to the report.

The report was agreed to.

REVISION OF PENAL LAWS.

The Senate resumed the consideration of the conference report on the disagreeing votes of the two Houses on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

The VICE-PRESIDENT. The Secretary will resume the reading of the amendment.

The Secretary resumed the reading of the amendment and read sections 130, 131, and 132.

SENATOR FROM WISCONSIN.

Mr. NELSON. I rise to a question of privilege. At the request of the junior Senator from Wisconsin [Mr. STEPHENSON], I present his credentials as a Senator from that State and ask that they may be read, printed, and lie on the table.

The VICE-PRESIDENT. The Senator from Minnesota presents the credentials of the junior Senator from Wisconsin, which will be read.

The credentials were read.

Mr. NELSON. I ask that the credentials be printed and lie on the table.

Mr. LA FOLLETTE. Mr. President——

Mr. HEYBURN. Is that debatable, Mr. President?

Mr. LA FOLLETTE. I believe it proper to say just a word here, with the consent of the Senate.

Mr. HEYBURN. It is not debatable. If it is debated, I will ask that it go over.

Mr. LA FOLLETTE. I desire to say that the statement I have to make will take but a moment of time. I trust that the Senator will not object.

Mr. HEYBURN. I will have to insist on the rule being observed.

The VICE-PRESIDENT. The Senator from Idaho objects.

Mr. LA FOLLETTE. Then I will make the statement at some convenient time later——

Mr. CLARKE of Arkansas. Mr. President, it seems to me the presentation of the credentials of a Senator is a matter of the very highest privilege. It seems to me the Senator from Wisconsin is entirely within his rights.

The VICE-PRESIDENT. The presentation of credentials is in order at any time under the rules of the Senate.

Mr. CLARKE of Arkansas. That is very true——

The VICE-PRESIDENT. The Senator from Wisconsin [Mr. LA FOLLETTE] asked to make a brief statement. The Chair is of the opinion that, the objection to the contrary, he has the right to make the statement.

Mr. HEYBURN. There was a motion made to lay the credentials on the table.

The VICE-PRESIDENT. The Chair did not so understand.

Mr. HEYBURN. That was stated.

Mr. LA FOLLETTE. It was a request that they lie upon the table.

The VICE-PRESIDENT. The Chair thinks the Senator from Wisconsin is within his rights.

The Senator from Wisconsin.

Mr. LA FOLLETTE. Mr. President, all that I desire to say in this connection is that I am informed that the purported certified copy of the proceedings in the Wisconsin legislature with relation to the election of a United States Senator to succeed the junior Senator from Wisconsin, which has just been presented by the Senator from Minnesota, does not contain all of the proceedings of the legislature with respect to that matter, and that in due course the full proceedings of the legislature of Wisconsin, and of each branch of the legislature, will be presented to this body for its consideration.

I deem it proper to add that it is claimed that no election has yet transpired to choose a United States Senator to succeed the junior Senator from Wisconsin.

Mr. President, I deem it pertinent to add that I offered to present the papers presented by the Senator from Minnesota [Mr. NELSON], but stated to my colleague [Mr. STEPHENSON] that, in presenting them, I should add this brief statement. It manifestly was not satisfactory that this statement should be made in connection with the presentation of the papers. I deem it just to both branches of the legislature of the State of Wisconsin that the statement which I have submitted should be made in this connection.

Mr. BURROWS. I hope the request of the Senator from Minnesota will be complied with and that the papers will be printed in the RECORD in extenso.

The VICE-PRESIDENT. Without objection, it is so ordered.

Mr. BAILEY. If it is possible that the additional statements or documents to which the senior Senator from Wisconsin refers will be presented to the Senate immediately, I should like all of them printed at the same time and in the same copy of the RECORD; and with a view of having them all before us at one time, I ask the Senator from Wisconsin if in his opinion those papers will reach here to-day?

Mr. LA FOLLETTE. I am not fully advised, Mr. President, with respect to that. A certified copy of the action of one branch of the legislature may reach here to-day, and if so I shall present it. However, it is proper to say, in full reply to the Senator from Texas, that the legislature is still meeting, as I understand, at 12 o'clock of each day and voting upon the election of a United States Senator; an investigation is in progress in that body upon specific charges made, and a full report of the proceedings can not be transmitted until the investigation is concluded and such action as the legislature may take upon it completed.

Mr. BAILEY. I suggest to the Senator from Wisconsin that what immediately concerns us now is the complete proceedings of the day on which this purported election took place, as represented by the credentials presented, and if we could have the supplement or additional documents bearing on that day it would be desirable to have it all printed in the RECORD of the same day, so that we may have it before us at once.

I merely rose to suggest to the Senator from Wisconsin that if it should reach him during the day, I hope he will present it, and then further to suggest to the stenographers that when it is presented the entire matter be printed in sequence.

Mr. LA FOLLETTE. Should such report reach me during the day I shall present it, and should it reach me at any other time during the present session I will present it.

Mr. CULBERSON. I understand that this certificate or paper is simply presented to the Senate and lies on the table, and that is the extent to which the Senate at this time sees proper to go.

The VICE-PRESIDENT. And it has been ordered to be printed.

Mr. NELSON. It is to be printed.

The VICE-PRESIDENT. It is to be printed and lie on the table. That is correct.

Mr. NELSON. That is all.

The VICE-PRESIDENT. The papers will be printed in the RECORD.

The papers referred to are as follows (S. Doc. No. 753):

Mr. NELSON presented the following certificate of the governor of Wisconsin, with certified copies of the proceedings of the senate and the house of representatives of said State of Wisconsin, relative to the election of ISAAC STEPHENSON as a Senator from that State in the Senate of the United States, commencing March 4, 1909.

I hereby certify that by the statute of the State of Wisconsin the regular session for the legislature thereof is fixed to commence at 12 o'clock m. on the second Wednesday of January, 1909; that the legislature of the State of Wisconsin met on said second Wednesday of January 1909, to wit: On January 13, 1909, at 12 o'clock m., and was organized pursuant to law; that F. E. Andrews was elected chief clerk of the senate branch of said legislature and C. E. Shaffer, chief clerk of the assembly branch thereof; that on the second Tuesday after the meeting and the organization of said legislature, to wit: On Tuesday, January 26, 1909, said legislature met for the purpose of electing a Senator in Congress of the United States from the State of Wisconsin; and that on said date the two houses of said legislature did separately vote for a Senator in Congress of the United States according to the transcripts of the journals of said houses hereto annexed, which transcripts of the journals are certified to by the chief clerk of the respective houses.

I do further certify that at 12 o'clock meridian of the day following, to wit, on January 27, 1909, the members of the two houses convened in joint assembly and proceedings were had according to the transcript of the senate journal annexed hereto, which is duly certified by F. E. Andrews, its chief clerk.

In witness whereof I have hereunto set my hand and caused the great seal of the State of Wisconsin to be affixed hereto this 25th day of February, A. D. 1909.

By the governor:

[SEAL.]

J. O. DAVIDSON,
Governor of the State of Wisconsin.

J. A. FREAR, *Secretary of State.*

STATE OF WISCONSIN, *Dane County, ss:*

I, F. E. Andrews, chief clerk of the senate branch of the legislature of the State of Wisconsin, the officer who, under the laws of the State of Wisconsin, is required to keep a journal of the proceedings of the state senate when in session and in whose custody the original journal of said senate is required to be kept, do hereby certify that the annexed copy of the journal of the senate branch of the legislature of Wisconsin for Tuesday, the 26th day of January, A. D. 1909, has been compared by me with the original journal of the proceedings of said senate on said Tuesday, January 26, 1909, filed in my office and now on file therein, and is a true copy thereof.

In witness whereof I have hereunto set my hand this 1st day of February, A. D. 1909.

F. E. ANDREWS,
Chief Clerk of the Senate Branch of the Legislature of the State of Wisconsin.

[State of Wisconsin. Senate Journal. Forty-ninth session.]

TUESDAY, JANUARY 26, 1909—9 O'CLOCK A. M.

The senate met.

The president in the chair.

Prayer was offered by Rev. E. A. Gilmore.

The roll was called and the following senators answered to their names:

Senators Barker, Bird, Bishop, Blaine, Bodenstab, Brazeau, Browne, Burke, Donald, Fairchild, Fridd, Gaylord, Hazelwood, Hudnall, Husting, James, Kleczka, Krumrey, Lehr, Lockney, Lyons, Marsh, Martin, Morris, Owen, Page, Pearson, Randolph, Sanborn, Stout, Thomas, Whitehead, and Wright—33.

The journal of Wednesday, January 20, was approved.

BILLS INTRODUCED.

Read first and second times and referred.

No. 12 (senate). By Senator Thomas. To committee on towns and counties.

RESOLUTIONS CONSIDERED.

Resolution 3 (senate) was adopted.

Joint resolution 3 (senate).

The motion by Senator Page, that the vote by which joint resolution 3 (senate) was refused adoption be reconsidered and that the motion lie over until January 26, 1909, was considered.

The question was: Shall the vote by which the resolution was refused adoption be reconsidered?

The ayes and noes being requested, it was decided in the affirmative—ayes 22, noes 11, absent or not voting 0.

The vote was as follows:

Ayes—Senators Barker, Bishop, Blaine, Brazeau, Browne, Burke, Donald, Fridd, Gaylord, Hazelwood, Husting, Kleczka, Krumrey, Lockney, Lyons, Marsh, Martin, Morris, Owen, Pearson, Randolph, and Sanborn—22.

Noes—Senators Bird, Bodenstab, Fairchild, Hudnall, James, Lehr, Page, Stout, Thomas, Whitehead, and Wright—11.

Absent or not voting—none.

RECESS.

Upon motion of Senator Burke,

The Senate took a recess until 3 o'clock p. m.

AFTERNOON SESSION.

3 O'CLOCK P. M.

The senate was called to order by the president.

RESOLUTIONS CONSIDERED.

Joint resolution 3 (senate).

The following substitute was introduced:

Substitute senate amendment No. 1 to senate joint resolution No. 3.

Providing for a legislative investigation of certain specific charges of the improper and illegal use of money and other violations of law at the last primary election.

Whereas specific charges have been made and herewith transmitted relating to the improper, unlawful, and illegal use of money by a candidate for the nomination to the office of United States Senator: Now, therefore, be it

Resolved by the senate (the assembly concurring), That a committee of three senators and three members of the assembly be appointed fully, fairly, thoroughly, and impartially to investigate such charges, and the manner, means, and method by which the last primary campaign and primary election were conducted so far as the same relates directly or indirectly to the nomination of candidates for the United States Senate, and members of the senate and assembly who would be called on to vote upon the election of such Senator. Be it further

Resolved, That the permanent presiding officer of the senate and assembly shall appoint the members of such committee from their respective bodies. Be it further

Resolved, That in the exercise of the power conferred upon them, the said committee, by subpœna issued over the signature of the chairman or acting chairman of the committee and served in the manner that a circuit court subpœna is served, the said committee may summon and compel the attendance of witnesses and the production of books, papers, documents, and records necessary or convenient to be examined or used by them as witnesses, and may do all things which may to them appear to be necessary or convenient to a full examination and investigation as directed herein.

The committee shall have power to employ stenographers, clerks, and assistants and such other persons as they may deem necessary to a full and complete examination and investigation as herein directed. The committee shall have power by any member thereof to administer to persons produced or appearing before them as witnesses all necessary oaths and also to punish for contempt as provided by law. Be it further

Resolved, That any person appearing and testifying under oath before such committee, such evidence so given shall not be used as evidence in any criminal prosecution against him in any court, except in a prosecution for perjury committed in giving such testimony. Be it further

Resolved, That such committee shall report to the senate and assembly in full upon such matters with the evidence and their recommendations thereon on or before the 1st day of April, 1909.

By Senator Blaine.

SPECIFIC CHARGES.

To the honorable senate and assembly of the State of Wisconsin:

I, John J. Blaine, an elector of the State of Wisconsin and a member of the state senate, upon information and belief, do hereby specifically charge and allege:

1. That ISAAC STEPHENSON, of Marinette, Wis., now United States Senator and a candidate for reelection, did, as such candidate for such reelection, give to one E. A. Edmonds, of the city of Appleton, Wis., an elector of the State of Wisconsin and said city of Appleton, a valuable thing, to wit, a sum of money in excess of $106,000, and approximating the sum of $250,000, as a consideration for some act to be done by said E. A. Edmonds in relation to the primary election held on the 1st day of September, 1908, which consideration was paid prior to said primary election; and that said ISAAC STEPHENSON was at the time of such payment a candidate for the Republican nomination for United States Senator at such primary, and did by such acts as above set forth violate section 4542b of the statutes.

2. That said ISAAC STEPHENSON did prior to said primary pay to said Edmonds above mentioned sums with the design that said Edmonds should pay to other electors of this State out of said sums above mentioned and other sums of money received by said Edmonds from said ISAAC STEPHENSON prior to said primary, sums ranging from $5 per day to $1,000, in bulk, as a consideration for some act to be done in relation to said primary by said electors for said ISAAC STEPHENSON as such candidate, in violation of said section.

3. That with full knowledge and with instructions from said ISAAC STEPHENSON as to how and for what purposes said sums were to be expended, said sums were so paid as above stated to said Edmonds by said ISAAC STEPHENSON, and that said sums were paid as above stated for the purposes above stated and also for the purpose of bribing and corrupting a sufficient number of the electors of the State of Wisconsin to encompass the nomination of said ISAAC STEPHENSON at said primary for the office of United States Senator.

4. That in pursuance of the purposes and design above stated, said ISAAC STEPHENSON did, by and through his agents, prior to said primary, pay to one U. C. Keller, of Sauk County, an elector of this State, the sum of $300 as a consideration for some act to be done by said Keller for said STEPHENSON preliminary to said primary, corruptly and unlawfully.

5. That in further pursuance of such purposes and design, said ISAAC STEPHENSON, by and through his agents, prior to said primary, paid to one Hambright, of Racine, Wis., large sums of money as a consideration for some act to be done by said Hambright for said STEPHENSON preliminary to said primary, said Hambright being then an elector of this State, corruptly and unlawfully.

6. That in further pursuance of the purposes and design above stated, said ISAAC STEPHENSON did, by and through his agents, prior to said primary, pay to one Roy Morse, of Fond du Lac, Wis., then an elector of this State, the sum of $1,000 as a consideration for some act to be done by said Morse for said ISAAC STEPHENSON preliminary to said primary, and corruptly and unlawfully.

7. That in further pursuance of such purposes and design, said ISAAC STEPHENSON, by and through his agents, prior to said primary, paid to divers persons, then electors of the county of Grant, Wis., ranging from $5 per day and upward, as a consideration for some act to be done by said several electors for said ISAAC STEPHENSON preliminary to said primary, corruptly and unlawfully.

8. That in further pursuance of such purposes and design, said ISAAC STEPHENSON, by and through his agents, prior to said primary, paid to divers persons who were at such time electors in this State a consideration for some act to be done for said ISAAC STEPHENSON by such electors preliminary to such primary, corruptly and unlawfully.

9. That in further pursuance of such purposes and designs, said ISAAC STEPHENSON, by and through his agents, prior to said primary, did pay to electors of this State, who were of a different political opinion and who held to other political principles than that of the Republican party, more particularly Democrats, sums of money as a consideration for some act to be done by such electors for said ISAAC STEPHENSON preliminary to said primary, corruptly and unlawfully.

10. That in further pursuance of such purposes and design, said ISAAC STEPHENSON, by and through his agents, prior to such primary, did offer to pay to Edward Pollock, of Lancaster, Wis., certain sums of money, as editor of the Teller, a newspaper published in said city of Lancaster, Wis., and to other editors of newspapers who were at such time electors of this State, for the purpose of purchasing the editorial support of such editors and as a consideration of something to be done relating to such primary, corruptly and unlawfully.

11. That said ISAAC STEPHENSON did, prior to such primary, by and through his agents, promise and agree to pay to one Lester Tilton, a then resident and elector of this State, and residing at the city of Neillsville, Wis., a sum in excess of $500 to procure or aid in procuring the nomination of said Lester Tilton to the assembly of this State from Clark County, and did offer to give to said Lester Tilton a sum in excess of $500 if said Lester Tilton would become a candidate for the assembly from said Clark County if said Lester Tilton would support said ISAAC STEPHENSON for the office of United States Senator, all of which is in violation of sections 4542b and 4543b of the statutes.

12. That said ISAAC STEPHENSON did, by and through his agents, give and promise and pay or agree to pay to other electors of this State sums of money to procure or aid in procuring the nomination of such electors to the senate and assembly of this State other than those electors residing in the district where said ISAAC STEPHENSON resides.

13. That E. M. Heyzer and Max Sells, prior to said primary, being at such time employees of the Chicago and Northwestern Railway Company, a corporation doing business in this State, did contribute and agree to contribute free services as such employees for the purpose to defeat the candidacy of former Assemblyman E. F. Nelson, from the district embracing Florence, Forest, and Langlade counties, for the nomination for assemblyman from said district, all of which was done with the knowledge and consent and under the direction of said ISAAC STEPHENSON, his agents, and employees, contrary to chapter 492, laws of 1905.

14. That in further pursuance of the purposes and design above set forth, said ISAAC STEPHENSON, by and through his agents, did, in addition to paying certain sums as above set forth, offer and agree to pay to electors of this State prior to said primary a premium or bonus to those who in his employ carried their respective precincts in such primary for said ISAAC STEPHENSON as such candidate.

15. That said ISAAC STEPHENSON, if claiming an election by virtue of receiving a plurality of votes at such primary, then said ISAAC STEPHENSON has violated chapter 562 of the laws of 1905, by failing and neglecting to file his expense account as provided by said chapter.

16. Charging generally, the primary nomination or election of said ISAAC STEPHENSON was obtained by the use of large sums of money corruptly and illegally, by the violation of sections 4542b, 4543b, and 4678 of the statutes relating to illegal voting, bribery, and corruption, and other laws above set forth relating to elections and primary elections.

Dated January 26, 1909.

Respectfully submitted.

JOHN J. BLAINE,
State Senator, Sixteenth District.

The following amendment to substitute amendment No. 1 (senate), to joint resolution 3 (senate), was offered:

Amendment No. 1 (senate), to substitute amendment No. 1 (senate) to joint resolution 3 (senate). By Senator Page.

That said investigation shall extend to the election of all United States Senators, and all state officers elected in the State of Wisconsin any time during the past ten years.

The question was, Shall amendment No. 1 (senate) to substitute amendment No. 1 (senate) to joint resolution 3 (senate) be adopted?

The ayes and noes being requested, it was decided in the negative—ayes 9, noes 24, absent or not voting none.

The vote was as follows:

Ayes—Senators Bird, Bodenstab, Burke, Hudnall, Lehr, Page, Stout, Whitehead, and Wright—9.

Noes—Senators Barker, Bishop, Blaine, Brazeau, Browne, Donald, Fairchild, Fridd, Gaylord, Hazelwood, Husting, James, Kleczka, Krumrey, Lockney, Lyons, Marsh, Martin, Morris, Owen, Pearson, Randolph, Sanborn, and Thomas—24.

Absent or not voting—none.

The question then was, Shall substitute amendment No. 1 (senate) to joint resolution 3 (senate) be adopted?

The ayes and noes being requested, it was decided in the affirmative—ayes 23, noes 10, absent or not voting none.

The vote was as follows:

Ayes—Senators Barker, Bishop, Blaine, Brazeau, Browne, Burke, Donald, Fairchild, Fridd, Gaylord, Hazelwood, Husting, Kleczka, Krumrey, Lockney, Lyons, Marsh, Martin, Morris, Owen, Pearson, Randolph, and Sanborn—23.

Noes—Senators Bird, Bodenstab, Hudnall, James, Lehr, Page, Stout, Thomas, Whitehead, and Wright—10.

Absent or not voting—none.

The question then was, Shall joint resolution 3 (senate), as amended, be adopted?

The ayes and noes being requested, it was decided in the affirmative—ayes 23, noes 10, absent or not voting none.

The vote was as follows:

Ayes—Senators Barker, Bishop, Blaine, Brazeau, Browne, Burke, Donald, Fairchild, Fridd, Gaylord, Hazelwood, Husting, Kleczka, Krumrey, Lockney, Lyons, Marsh, Martin, Morris, Owen, Pearson, Randolph, and Sanborn—23.

Noes—Senators Bird, Bodenstab, Hudnall, James, Lehr, Page, Stout, Thomas, Whitehead, and Wright—10.

Absent or not voting—none.

ELECTION OF UNITED STATES SENATOR.

Senator Burke moved that the senate proceed to the election of a United States Senator.

Motion prevailed.

Senator Martin moved that during the pendency of the investigation provided for by joint resolution 3 (senate) any senator who does not wish to vote for a candidate may vote by answering "present."

Motion prevailed unanimously.

The roll was called and the following senators voted for Hon. ISAAC STEPHENSON:

Senators Bird, Bodenstab, Burke, Fairchild, Hudnall, James, Lehr, Page, Stout, Thomas, Whitehead, and Wright—12.

The following senators voted for Hon. Neal Brown:

Senators Hazelwood, Husting, Pearson, and Randolph—4.

The following senator voted for Hon. Jacob Rummel:

Senator Gaylord—1.

The following senators voted "present:"

Senators Barker, Bishop, Blaine, Brazeau, Browne, Donald, Fridd, Kleczka, Krumrey, Lockney, Lyons, Marsh, Martin, Morris, Owen, and Sanborn—16.

BILLS INTRODUCED.

Read first and second times and referred:

S. 13. By Senator Lockney. To committee on judiciary.
S. 14. By Senator Blaine. To committee on education.
S. 15. By Senator Whitehead. To committee on manufactures and labor.
S. 16. By Senator Brazeau. To committee on state affairs.
S. 17. By Senator Fairchild. To committee on judiciary.
S. 18. By Senator Page. To committee on judiciary.
S. 19. By Senator Brazeau. To committee on state affairs.
S. 20. By Senator Brazeau. To committee on state affairs.

ADJOURNMENT.

Upon motion of Senator Burke,

The senate adjourned.

STATE OF WISCONSIN, *Dane County, ss:*

I, C. E. Shaffer, chief clerk of the assembly branch of the legislature of the State of Wisconsin, the officer who, under the laws of the State of Wisconsin, is required to keep a journal of the proceedings of the state assembly when in session, do hereby certify that the annexed copy of the daily journal of the assembly branch of the legislature of Wisconsin for Tuesday, the 26th day of January, A. D. 1909, has been compared by me with the original daily journal of the proceedings of said assembly on said Tuesday, January 26, 1909, now in my custody, and is a true copy thereof.

In witness whereof I have hereunto set my hand this 1st day of February, A. D. 1909.

C. E. SHAFFER,
Chief Clerk of the Assembly Branch of the Legislature of the State of Wisconsin.

[State of Wisconsin. Assembly journal. Forty-ninth regular session—thirteenth biennial session.]

TUESDAY, JANUARY 26, 1909—9 A. M.

The assembly met.
The speaker in the chair.
Prayer was offered by Rev. George E. Hunt.
The roll was called, and the following members answered to their names:

Messrs. Atwood, Ballard, Barnett, Berner, Bichler, Bradford, Bray, Brew, Brockhausen, Busacker, Buslett, Benjamin A. Cady, Virgil H. Cady, Chapple, Chinnock, Cleary, Comstock, Coolidge, Crowell, Culbertson, Curtiss, Daub, Disch, Domachowski, Dorner, Egan, Erickson, Estabrook, Farrell, Fenelon, Fisher, Georgi, Grosse, Haight, Hambrecht, Hammill, Harras, Hoyt, Hughes, Hull, Ingalls, Ingram, Irvine, Johnson, Jones, Kalaher, Kamper, Kay, Kempf, Keup, Keyes, Kimball, Kindlin, Kneen, Kubasta, Kull, Laycock, Ledvina, Lentz, LeRoy, Leuch, Mains, Marquardt, McConnell, Mortensen, Neitzel, Nelson, Onstad, Peterson, Philipps, Pickart, Ramsey, Reader, Reynolds, Roethe, Rollmann, Schmidt, Schwalbach, Scott, Shaw, Frank Smith, Simon Smith, Stack, Stevens, Stewart, Thomas, Towers, Towne, Twesme, Urquhart, Viebahn, Webre, Wehrwein, Wellensgard, Wells, Whitman, Whittet, Wittig, Zimmerman, and Mr. Speaker—100.

The journal of January 21 was approved.
The speaker announced the appointment of Mr. Hambrecht in place of Mr. Culbertson on the committee on elections, and of Mr. Ballard in place of Mr. Nelson on the committee on federal relations.

RESOLUTIONS INTRODUCED.

Joint resolution 12 (assembly). By Mr. Johnson. Read and referred to the committee on roads and bridges.

Resolution 6 (assembly). By Mr. Whittet. Requesting the superintendent of public property to supply the members and officers of the assembly with stationery.

Resolved, That the superintendent of public property be, and he is hereby, requested to furnish 500 sheets of letter-head paper (ruled or unruled, as requested by each member or officer) and 350 envelopes, with return card thereon, and with name, address, and district of member on the paper; to be furnished for each member, desk force, postmaster, and sergeant-at-arms, the speaker to be furnished 500 additional sheets of letter paper and 150 additional envelopes, and the chief clerk to be furnished 1,000 sheets of letter-head paper and 500 envelopes.

Privileged, by unanimous consent.
Read and adopted.

BILLS INTRODUCED.

Read first and second times and referred.

No. 28 (assembly). By Mr. Ingalls. To committee on education.
No. 29 (assembly). By Mr. Kamper. To committee on towns and counties.
No. 30 (assembly). By Mr. V. H. Cady. To committee on state affairs.
No. 31 (assembly). By Mr. Wells. To committee on towns and counties.
No. 32 (assembly). By Mr. Harras. To committee on transportation.
No. 33 (assembly). By Mr. Hull. To committee on roads and bridges.
No. 34 (assembly). By Mr. Erickson. To committee on towns and counties.
No. 35 (assembly). By Mr. Erickson. To committee on roads and bridges.
No. 36 (assembly). By Mr. Berner. To committee on manufactures and labor.
No. 37 (assembly). By Mr. Barnett. To committee on cities.
No. 38 (assembly). By Mr. Cleary.

Mr. Cleary moved that all rules interfering with immediate consideration of the bill be suspended, and that it be placed upon its passage at this time.

The motion prevailed, and the rules were suspended by unanimous consent.

The rules were suspended by unanimous consent, and the bill was ordered engrossed and read a third time.

The rules were suspended by unanimous consent, and No. 38 (assembly) was read a third time and passed.

Mr. Hughes moved that No. 2 (senate) be recalled from the committee on cities.

Motion prevailed.
So ordered.

On motion of Mr. Hughes, the rules were suspended, and the bill was ordered to a third reading.

The rules were suspended, and No. 2 (senate) was read a third time and concurred in.

RESOLUTIONS CONSIDERED.

Mr. Kindlin moved that joint resolution 4 (assembly) be recalled from the committee on elections.

The question was upon the motion of Mr. Kindlin to recall joint resolution 4 (assembly).

Joint resolution providing for a legislative investigation of the last primary election.

The ayes and noes being demanded, it was decided in the negative—ayes 29, noes 59, absent or not voting 12.

The vote was as follows:

Ayes—Messrs. Barnett, Bichler, Bradford, Brockhausen, Busacker, Cady Virgil, Curtiss, Daub, Estabrook, Farrell, Hull, Johnson, Kamper, Kindlin, Kneen, Lentz, Leuch, McConnell, Pickart, Ramsey, Roethe, Rollmann, Schmidt, Schwalbach, Smith Simon, Stewart, Towne, Viebahn, and Wells—29.

Noes—Messrs. Atwood, Ballard, Bray, Buslett, Cady Benjamin A., Chapple, Chinnock, Cleary, Comstock, Coolidge, Crowell, Culbertson, Disch, Egan, Erickson, Fenelon, Fisher, Grosse, Haight, Hambrecht, Hammill, Hoyt, Hughes, Ingalls, Ingram, Irvine, Jones, Kay, Keup, Keyes, Kimball, Kull, Laycock, Ledvina, Le Roy, Mains, Marquardt, Mortensen, Neitzel, Nelson, Onstad, Peterson, Philipps, Reader, Reynolds, Scott, Shaw, Stack, Stevens, Thomas, Towers, Twesme, Urquhart, Wellensgard, Whitman, Whittet, Wittig, Zimmerman, and Mr. Speaker—59.

Absent or not voting—Messrs. Berner, Brew, Domachowski, Dorner, Georgi, Harras, Kalaher, Kempf, Kubasta, Smith Frank, Weber, and Wehrwein—12.

Mr. Hambrecht moved the reconsideration of the motion to reconsider joint resolution 4 (assembly).

The ayes and noes being demanded, the question was decided in the negative—ayes 7, noes 81, absent or not voting 12.

The vote was as follows:

Ayes—Messrs. Barnett, Bradford, Cady Virgil, Curtiss, Estabrook, Hull, and McConnell—7.

Noes—Messrs. Atwood, Ballard, Bichler, Bray, Brockhausen, Busacker, Buslett, Cady Benjamin A., Chapple, Chinnock, Cleary, Comstock, Coolidge, Crowell, Culbertson, Daub, Disch, Egan, Erickson, Farrell, Fenelon, Fisher, Grosse, Haight, Hambrecht, Hammill, Hoyt, Hughes, Ingalls, Ingram, Irvine, Johnson, Jones, Kamper, Kay, Keup, Keyes, Kimball, Kindlin, Kneen, Kull, Laycock, Ledvina, Lentz, Le Roy, Leuch, Mains, Marquardt, Mortensen, Neitzel, Nelson, Onstad, Peterson, Philipps, Pickart, Ramsey, Reader, Reynolds, Roethe, Rollmann, Schmidt, Schwalbach, Scott, Shaw, Smith Simon, Stack, Stevens, Stewart, Thomas, Towers, Towne, Twesme, Urquhart, Viebahn, Wellensgard, Wells, Whitman, Whittet, Wittig, Zimmerman, and Mr. Speaker—81.

Absent or not voting—Messrs. Berner, Brew, Domachowski, Dorner, Georgi, Harras, Kalaher, Kempf, Kubasta, Smith Frank, Weber, and Wehrwein—12.

On motion of Mr. Ledvina,
The assembly took a recess until 11.55 a. m.

RECESS.

11.55 A. M.

The assembly was called to order by the speaker.

12 O'CLOCK M.

On motion of Mr. Ledvina, the assembly proceeded to—

VOTE FOR A UNITED STATES SENATOR.

Chief Clerk C. E. Shaffer called the roll, and the vote was as follows:

ISAAC STEPHENSON, 60.
Neal Brown, 16.
Jacob Rummel, 3.
S. A. Cook, 2.
H. A. COOPER, 1.
J. H. Stout, 1.
JOHN J. ESCH, 1.
Blank, 15.
Absent, 1.

The following voted for ISAAC STEPHENSON:

Messrs. Atwood, Ballard (under protest), Bray, Brew, Buslett, Benjamin A. Cady, Chapple, Chinnock, Cleary, Comstock, Crowell, Culbertson, Disch, Dorner, Egan, Erickson, Estabrook, Fenelon, Fisher, Georgi (under protest), Grosse, Haight, Hambrecht, Hammill, Harras, Hoyt, Hull, Ingalls, Irvine, Jones, Kempf, Kubasta, Kull, Laycock, Ledvina, Le Roy, Mains (under protest), Marquardt, McConnell, Mortensen, Nelson, Peterson, Philipps, Reader, Reynolds, Shaw, Frank Smith, Simon Smith, (under protest), Stack, Stevens, Thomas, Towers, Twesme, Urquhart, Wellensgard, Wells, Whitman, Whittet, Wittig, and Mr. Speaker—60.

The following voted for NEAL BROWN:

Messrs. Bichler, Virgil Cady, Domachowski, Farrell, Hughes, Kalaher, Kindlin, Kneen, Lentz, Pickart, Ramsey, Rollmann, Schmidt, Schwalbach, Stewart, and Viebahn—16.

The following voted for Jacob Rummel:

Messrs. Berner, Brockhausen, and Weber—3.

The following voted for S. A. Cook:

Messrs. Barnett and Neitzel—2.

The following voted for Mr. COOPER:

Mr. Zimmerman—1.

The following voted for Mr. Stout:

Mr. Daub—1.

The following voted for Mr. ESCH:

Mr. Bradford—1.

The following voted blank:

Messrs. Busacker, Coolidge, Curtiss, Ingram, Kamper, Kay, Keup, Keyes, Kimball, Leuch, Onstad, Roethe, Scott, Towne, and Wehrwein—15.

Absent or not voting:

Mr. Johnson—1.

Before the vote was announced,

Mr. Ledvina moved that the sergeant-at-arms be directed to call into the chamber all absentees who might be in the capitol.

Motion prevailed.
So ordered.

The speaker then announced the result of the vote, as hereinbefore recorded.

RETURN TO THE FOURTH ORDER OF BUSINESS.

Joint resolution 13 (assembly). By Mr. Frank Smith.

Joint resolution on the life and services of Judge Romanzo Bunn.

Whereas the legislature of Wisconsin, learning with profound sorrow of the death at his home in Madison, January 25, 1909, of Judge Romanzo Bunn, respectfully desires to record a tribute to his memory.

Judge Bunn was a strong type of our best citizenship, and his life was largely given to the cause of the public. In 1860 he served with force and fidelity as a member of the assembly, and later for nearly forty years on the state and federal bench where he acquired the distinction of being a just, upright, and able judge: Therefore be it

Resolved by the assembly (the senate concurring), That this expression of the sentiment of the legislature be incorporated with the official proceedings of this day, and that an engrossed copy hereof be transmitted to the family.

Privileged, by unanimous consent.
Read, and
Unanimously adopted by a rising vote.

On motion of Mr. Hughes the assembly adjourned.

STATE OF WISCONSIN, *Dane County, ss:*

I, F. E. Andrews, chief clerk of the senate branch of the legislature of the State of Wisconsin, the officer who, under the laws of the State of Wisconsin, is required to keep a journal of the proceedings of the state senate when in session and in whose custody the original journal of said senate is required to be kept, do hereby certify that the annexed copy of the journal of the senate branch of the legislature of

Wisconsin for Wednesday, the 27th day of January, A. D. 1909, has been compared by me with the original journal of the proceedings of said senate on said Wednesday, January 27, 1909, filed in my office and now on file therein, and is a true copy thereof.

In witness whereof I have hereunto set my hand this 1st day of February, A. D. 1909.

F. E. ANDREWS,
Chief Clerk of the Senate Branch of the Legislature of the State of Wisconsin.

[State of Wisconsin, senate journal, forty-ninth session.]

WEDNESDAY, JANUARY 27, 1909—10 O'CLOCK A. M.

The senate met.

The president in the chair.

Prayer was offered by Rev. E. A. Gilmore.

The roll was called, and the following senators answered to their names:

Senators Barker, Bird, Bishop, Blaine, Bodenstab, Brazeau, Browne, Burke, Donald, Fairchild, Fridd, Gaylord, Hudnall, Husting, Kleczka, Krumrey, Lehr, Lockney, Lyons, Marsh, Martin, Morris, Owen, Page, Pearson, Randolph, Sanborn, Stout, Thomas, Whitehead, and Wright—31.

Absent: Senators Hazelwood and James—2.

LEAVE OF ABSENCE.

Upon request of Senator Bird,

Leave of absence was granted to Senator James, for this session.

Upon request,

Leave of absence was granted to Senator Whitehead, for the rest of the week after this session.

Upon request of Senator Husting,

Indefinite leave of absence was granted to Senator Hazelwood, on account of illness.

CORRECTION OF THE JOURNAL.

Senator Hudnall moved that the journal of January 26, 1909, be corrected, on page 79, by striking out the motion of Senator Martin, and inserting in lieu thereof the following:

PROCEEDINGS OF THE SENATE.

3 P. M., JANUARY 26, 1909.

Senator Randolph inquired if nominations were to be made.

Senator Page replied: "Our candidate was nominated by the people."

The president then ordered the roll to be called. The clerk then began to call the roll, calling the name of Senator Barker.

Senator Barker arose and answered "Blank."

Senator Hudnall arose to a point of order and read from Rule 113: "Each house shall openly, by a viva voce vote of each member present, name one person for senator in congress," and said that Senator Barker's vote for "Blank" was not for a person. The president ruled the point of order well taken, and said that Senator Barker would have to vote for some person.

Senator Barker then voted for "Mr. Blank."

The president, after some discussion, ruled that Mr. Blank was not a person, and stated that Senator Barker would have to vote for some person.

Senator Barker then asked to be excused from voting.

Senator Randolph then moved that the senator (Barker) be excused from voting.

The president then put the question: "Does the senate excuse Senator Barker from voting?"

On a viva voce vote (the roll not being called nor requested) the president announced the motion lost and that the senate declined to excuse Senator Barker from voting.

Senator Gaylord moved that we have a roll call on the motion of Senator Randolph.

Senator Hudnall raised the point of order that the request for a roll call came too late, as the result of the vote had been announced.

The president ruled the point well taken, but stated that he had no desire to be technical and would allow a roll call.

Senator Hudnall then raised the point of order that under rule 67 the senate could not excuse senators from voting at that time, as "the house had commenced voting."

The president ruled the point well taken, and that the motion of Senator Gaylord was out of order.

Senator Martin then moved "that every senator in this body be excused from voting for anyone else except Mr. Blank during the pendency of this investigation, if he so desires."

The president stated: "The chair believes that the votes must be for eligible candidates for the United States Senate."

Senator Page moved that "the senator from the thirty-third be granted a leave of absence from this session."

Senator Owen moved "that rule 67 be suspended."

After some discussion Senator Owen moved "that rule 67 be suspended, so far as it relates to this election of United States Senator, until after this investigation is concluded."

Senator Hudnall then withdrew his point of order, stating that he had no objection to senators answering "present" as their names were called, if they did not desire to vote for any person for United States Senator.

Senator Martin moved that, "Any senator may simply answer 'present,' and not vote during the pendency of this investigation if he so desires, when his name is called."

Senator Gaylord moved an amendment that it is the sense of the senate that the journal record shows substantially the intention of the senate in the matter of the vote on the United States Senator.

A point of order was made by Senator Hudnall that the motion was out of order.

The president ruled that the point was well taken and that the motion was out of order.

Senator Fairchild moved that the motion to correct the journal be amended by adding to the last paragraph as a new paragraph the following:

"The president then stated that the motion of Senator Martin is, 'That senators be allowed to vote "present" instead of for an eligible individual or candidate.'"

Which amendment was accepted by Senator Hudnall.

The question was, Shall the journal be corrected as stated in motion by Senator Hudnall as amended?

The ayes and noes being requested, it was decided in the negative—ayes 13, noes 18, absent or not voting 2.

The vote was as follows:

Ayes: Senators Bird, Bodenstab, Brazeau, Burke, Fairchild, Hudnall, Lehr Lyons, Page, Stout, Thomas, Whitehead, and Wright—13.

Noes: Senators Barker, Bishop, Blaine, Browne, Donald, Fridd, Gaylord, Husting, Kleczka, Krumrey, Lockney, Marsh, Martin, Morris, Owen, Pearson, Randolph, and Sanborn—18.

Absent or not voting: Senators Hazlewood and James—2.

The question then was, Shall the journal as printed be approved?

The ayes and noes being requested, it was decided in the affirmative—ayes 18, noes 13, absent or not voting 2.

The vote was as follows:

Ayes: Senators Barker, Bishop, Blaine, Browne, Donald, Fridd, Gaylord, Husting, Kleczka, Krumrey, Lockney, Marsh, Martin, Morris, Owen, Pearson, Randolph, and Sanborn—18.

Noes: Senators Bird, Bodenstab, Brazeau, Burke, Fairchild, Hudnall, Lehr, Lyons, Page, Stout, Thomas, Whitehead, and Wright—13.

Absent or not voting: Senators Hazelwood and James—2.

And the journal of Tuesday, January 26, 1909, was declared approved.

Senator Whitehead moved that the clerk record in the journal hereafter all points of order made and the rulings of the Chair thereon.

Motion prevailed.

Senator Sanborn moved that the charge against the journal clerk and that question of having official stenographer to take daily proceedings be referred to the committee on legislative expenditures and employees.

Motion prevailed.

LETTERS, PETITIONS, ETC.

Petition No. 4 (senate). By Senator Hudnall. To committee on roads and bridges.

Petition No. 5 (senate). By Senator Hudnall. To committee on judiciary.

Petition No. 6 (senate). By Senator Hudnall. To committee on judiciary.

Petition No. 7 (senate). By Senator Hudnall. To committee on judiciary.

Petition No. 8 (senate). By Senator Hudnall. To committee on judiciary.

Petition No. 9 (senate). By Senator Hudnall. To committee on judiciary.

Petition No. 10 (senate). By Senator Hudnall. To committee on judiciary.

RESOLUTIONS INTRODUCED.

Joint resolution No. 5 (senate). Relating to the nationalization of trusts and monopolies.

Whereas so long as machinery is simple and easily handled by one man its owner can not dominate the sources of life of others; and, conversely, when machinery becomes more complex and expensive and requires for its effective operation the organized efforts of many workers, its influence reaches over wide circles of life, and the owners of such machinery become the dominant class; and

Whereas electricity, steam, and great water powers used in connection with the multitude of modern inventions have struck the death blow to manufacturing on a small scale, and manufacturing on a large scale makes monopoly an inevitable condition of the proper use of modern machinery, thus creating trusts and monopolies in the nature of the present industrial and commercial process, and producing a situation in which fully nine-tenths of the business transactions of the United States are handled by corporations; and

Whereas twenty-five years of attempted regulation of these corporations has resulted in a confession by the President of the United States of the impotence of the present state and federal governments in the presence of these titanic industrial and commercial forces; and

Whereas it is impossible to control the property of one man for the benefit of other men, or to control the property of one part of society for the benefit of the whole of society without violating the very meaning of property and private ownership; and

Whereas the private ownership of the great monopolies and trusts interferes with the proper use of these necessary social utilities, producing coal famines, railroad wrecks, insanitary and deadly industrial conditions, and a chronic state of unemployment among the useful workers: Now, therefore, be it

Resolved by the senate (the assembly concurring), That the State of Wisconsin do hereby instruct its Representatives in the National House of Representatives and in the United States Senate to introduce such measures and to take such action as shall be calculated to bring about the collective ownership of all industries which are organized on a national scale and in which competition has virtually ceased to exist, to the end that the property involved in these industries may be freely used for the advantage and benefit of the whole people.

By Senator Gaylord; to committee on manufactures and labor.

Joint resolution 6 (senate). Relating to the abrogation of extradition treaty with Russia.

Whereas the present extradition treaty now existing between the United States of America and the private government of the Czar of Russia is being used for the purpose of persecuting political refugees from that land of oppression; and

Whereas the United States has always been, and of right ought to be, forever an asylum for those oppressed by the despots of all lands: Now, therefore, be it

Resolved by the senate (the assembly concurring), That the legislature of Wisconsin hereby requests that the Wisconsin Members of the United States Senate take such action at once as shall lead to the abrogation of the treaty under which these persecutions are being carried forward, and the drafting of a new treaty under which political crimes shall not be made the motive for persecuting those who are seeking to escape from the darkness and despotism of other lands; and be it also

Resolved, That the secretary of state be instructed to transmit a copy of these resolutions to each of the Members of the United States Senate from Wisconsin and to the President of the United States.

By Senator Gaylord; to committee on federal relations.

Joint resolution 7 (senate). Relating to national constitutional convention.

Whereas the present Constitution of the United States was conceived and drafted under conditions which existed over one hundred years ago, which conditions no longer exist, for the greater part; and

Whereas it was never adopted by popular vote of the citizens of this Nation, but by a restricted suffrage indirectly expressed; and

Whereas the growing needs and powers of the people of the land are compelling Congress and the federal and other courts to seek authority for new duties and remedies for new ills in forced constructions of passages which when framed could not possibly have had the meaning now ascribed to them; and

Whereas abuses of property and other rights, as well as friction between the various departments of the Government have inevitably arisen and must increase under these conditions: Now, therefore, be it

Resolved by the senate (the assembly concurring), That the legislature of Wisconsin appeal to the other state governments of the United

States that they shall unite with this State in calling a national constitutional convention, as prescribed by Article V of the Constitution of the United States; and be it also

Resolved, That a copy of this resolution shall be transmitted by the secretary of state of Wisconsin to the governors and legislatures of the various States of the Union.

By Senator Gaylord; to committee on federal relations.

Joint resolution 8 (senate), relating to the abolition of United States Senate.

Whereas the United States Senate has been proven by the history of this Nation to be not a proper organ of democratic, or even of representative, government, because of the following facts:

(*a*) Its members can not be impeached;

(*b*) Its powers are extraordinary, giving it, together with the President, control over the appointing and treaty-making power, the latter enabling it to repeal a law enacted with the concurrence of the House of Representatives without the consent of the latter being given to such repeal;

(*c*) It is so constituted as to give equal representation to unequal elements, since smaller States like Nevada and Rhode Island have equal representation therein with New York and Pennsylvania;

Whereas the effort of large corporate and property interests to control the United States compels them to seek the control also of the state legislatures, by which the Members of the Senate are chosen, thus furnishing a fruitful incentive to political corruption, and compelling Members of the Senate who wish to retain their seats to exert an influence upon state politics which has most often been baneful in its nature; and

Whereas even the attempt to correct some of these evils by the nomination of Senators by direct vote of the people in the primary election is believed to have been the means of causing the corruption of the primaries; and

Whereas the long term of the Members of the United States Senate gives to that body an overwhelming control not only upon legislation, but also upon the political action of the Nation, removing it so much the more from the influence of the popular will; and

Whereas the Constitution of the United States offers no convenient means of a reform of these abuses so long as the United States Senate exists: Now therefore be it

Resolved by the senate (*the assembly concurring*), That the legislature of the State of Wisconsin does hereby appeal to the great sisterhood of States constituting this Nation that they present to the Congress of the United States the mandate of at least two-thirds of the sisterhood of States, to the end that an amendment to the Federal Constitution shall be adopted abolishing the United States Senate, and make such other changes as may be necessary to conform the Government to that change.

By Senator Gaylord; to committee on federal relations.

Joint resolution 9 (senate), relating to the unemployed.

Whereas the people of the United States are at this moment in the midst of one of those industrial breakdowns which periodically paralyze the life of this and other nations; and

Whereas in the nature of the industrial and commercial system now prevailing this unemployment of useful workers tends to become increasingly chronic, producing inevitably among the workers that habit of idleness and loss of self-respect which is found in the slum dweller and the tramp; and

Whereas the Nation is now suffering under the burden of an increase in crime the like of which is known in no other civilized land, due, in this land and time, as in others recorded in history, to the failure to provide a proper and legitimate field for the activity of its people: Therefore be it

Resolved by the senate (*the assembly concurring*), That the senate of the State of Wisconsin (the assembly concurring) do hereby instruct its elected Members of the National House of Representatives and in the United States Senate to introduce and forward by all proper means within their power such measures as shall be calculated to bring about—

1. The immediate government relief for the unemployed workers by the building of schools, by reforesting of cut-over and waste lands, by reclamation of arid tracts, by the building of canals, and by the extension of all other useful public works; all persons employed on such works to be employed directly by the Government under an eight-hour workday and at the prevailing union wages.

2. The loan by the Government of money to States and municipalities, without interest, for the purpose of carrying on public works.

3. Immediate contributions by the Government to the funds of labor organizations for the purpose of assisting their unemployed members, as is done in other civilized countries.

4. The establishment of a government policy which shall promote such other measures within its power as will tend to lessen the widespread misery of the workers caused by the impotence or negligence and misrule of the irresponsible owners of the sources and means of national wealth.

By Senator Gaylord; to committee on manufactures and labor.

Joint resolution 10 (senate), relating to the liquor traffic.

Whereas the liquor traffic constitutes a social and economic problem that requires the most careful study on the part of all who are interested in the common welfare, and especially on the part of those who are attempting to legislate with reference to the matter; and

Whereas practically every measure so far advanced upon the subject has entirely overlooked the tremendous effect of economic conditions upon the working class, the poor wages, the long hours, the insanitary and physically depressing conditions in the places of employment, the cheap adulterated food, and, above all, the housing of the working class in unhealthy, cheerless, comfortless hovels; and

Whereas these conditions, taken together, constitute, according to all scientific students of the subject, the most constant and powerful influence in creating and extending the evils of intemperance; and

Whereas it has been proven that where these conditions have been bettered by the increase in wages, shortening of hours, and improvement of conditions of labor, intemperance and the evil of the saloon have been lessened in that proportion; and

Whereas under the present economic conditions it is admitted and emphasized by every scientific and legislative investigation made that the saloon serves a very important and vital social function in our present society, especially in the cities, by offering to the working class a center of sociability, of warmth and cheer, of music and games, where they may read the papers and join in discussions, where they may even secure free food and some of the conveniences denied them in their homes, all at a price within their reach; and

Whereas this social function constitutes an absolute necessity and a positive right of the common people, which can not and ought not to be destroyed until either the municipality or the State shall find some way of separating this function from the private control of the saloon and establishing other centers of social life and amusement for the people that shall be in every way equal to and, if possible, superior in value and attractiveness; and

Whereas it is conceded that the adulteration of liquors and the use of the strongly alcoholic drinks constitutes the most serious evil of the liquor traffic; and

Whereas several methods of dealing with the liquor traffic are being urged in different directions, all of which fail in one or another respect to go to the root of the matter. For example, the public ownership and control of the wholesale and manufacturing part of the business by the government in Switzerland fails to properly regulate the retailing of liquor, thus leaving the evil effects of private management at that point; or, again, the state dispensary system in South Carolina, which is urged by some, provided that the 384 officials of the system in that State should all be appointed, thus creating a most dangerous political machine in connection with one of the most dangerous monopolies; or, again, the Gothenburg system of Norway and Sweden provides for the assumption of the retail or distributing business of the saloon by private companies, which in itself is objectionable and, besides, leaves the wholesale and the manufacturing part of the business in the hands of a great monopoly, whose evil influence is constantly operating against the good purposes of the system: Therefore be it

Resolved by the senate (*the assembly concurring*), That a special committee, consisting of two senators appointed by the president of the senate and three assemblymen appointed by the speaker of the house, shall be selected for the purpose of investigating all the different forms of public ownership, control, and regulation now in use in any part of the world and report to the next legislature some method of public ownership and regulation that will be best adapted to the social conditions and needs of the people of our State.

By Senator Gaylord; to committee on state affairs.

Joint resolution 11 (senate), asking Congress of the United States to enact into law H. R. 39.

Whereas it has come to the knowledge of the legislature of the State of Wisconsin that a measure is pending before the Congress of the United States (H. R. 39), intending to extend the limits of the Shiloh National Military Park for the purpose of showing, by appropriate markers, the movements of the confederate army in its approach to Shiloh and the movements of the Union Army, under General Halleck, in its advance from Shiloh to Corinth, and for making the said park accessible at all times to those who desire to visit it; and

Whereas this State, as well as the Government of the United States, the States of Illinois, Indiana, Iowa, Minnesota, Pennsylvania, Ohio, Alabama, and Tennessee have expended large sums of money by erecting monuments therein and otherwise beautifying the same: It is therefore

Resolved, That the legislature of the State of Wisconsin respectfully asks and urges the Congress of the United States to, at the earliest moment practicable, enact said H. R. bill 39 into law, so as to enable as many people as possible to visit this beautiful park, made historic by one of the most sanguinary battles fought during the civil war.

Resolved, That a copy of these resolutions be transmitted by the secretary of state to the Senate of the United States and to the House of Representatives of the United States and to each of the Senators and Representatives from this State.

By Senator James; to committee on military affairs.

Joint resolution 12 (senate) asking the Congress of the United States to refuse to enact the measure now pending relating to United States pension agencies.

Whereas it has come to the notice of the legislature of the State of Wisconsin that a measure is pending before the Congress of the United States which aims at the removal of 17 United States pension agencies from their present locations throughout the country to the city of Washington, D. C.; and

Whereas these pension agencies were established years ago for the convenience and accommodation of then only 232,000 pensioners of the United States; and

Whereas the number of pensioners has since that time increased to nearly 1,000,000 (being 951,687, June 30, 1908), and as this number is likely to further increase, owing to legislation affecting widows enacted April 19, 1909; and

Whereas this legislature is informed that all of the pensioners of the United States are vigorously protesting against this proposed centralization, consolidation, and removal to Washington, D. C., of these 17 pension agencies, as inimical to their interest and convenience: It is therefore

Resolved by the senate (*the assembly concurring*), That the legislature of the State of Wisconsin respectfully asks the Congress of the United States to refuse to enact such a measure, being fully convinced that the system at present in use, to which all pensioners have now become accustomed, will better subserve the interests of this vast body of pensioners who, owing to their services to the country as well as to their advanced age, are certainly entitled to consideration of their views and wishes on a measure that so vitally affects them.

Resolved, That a copy of these resolutions be transmitted by the secretary of state to the Senate of the United States and to the House of Representatives of the United States and to each of the Senators and Representatives from this State.

By Senator James; to committee on military affairs.

Joint resolution 13 (senate), to amend section 1 of Article IV of the constitution relating to legislative power.

Resolved by the senate (*the assembly concurring*), That section 1 of Article IV of the constitution be amended by striking out said section 1 and inserting in lieu thereof the following, so that when so amended the said section shall read as follows:

"SECTION 1. The legislative power shall be vested in a senate and assembly, but the people reserve to themselves power to propose laws and to enact or reject the same at the polls independent of the legislature; and also reserve power at their own option to approve or reject at the polls any act of the legislature. The first power reserved by the people is the initiative, and not more than 10 per cent of the legal voters shall be required to propose any measure by petition, and every such petition shall include the full text of the measure so proposed. The initiative petition shall be filed with the secretary of state not less than four months before the election at which they are to be voted upon. The second power is the referendum, and it may be ordered (except as to laws necessary for the immediate preservation of the public peace, health, or safety or public emergency) by petition signed by at least 5 per cent of the legal voters. The referendum shall be filed with the secretary of state not more than ninety days after the final adjournment of the session of the legislature which passed the bill on which the referendum is demanded. All elections on measures

referred to the people shall be had at the biennial regular general elections and at such other elections as the legislature may prescribe. Any measure referred to the people shall take effect and become the law when it is approved by the majority of the votes cast thereon, and not otherwise.

"The style of all measures proposed by initiative shall be: 'Be it enacted by the people of the State of Wisconsin.' This section shall not be construed to deprive any member of the legislature of the right to introduce any measure, or to deprive the legislature of the right to repeal any law, propose or pass any measure which may be consistent with the constitution of the State or the Constitution of the United States. The whole number of votes cast for governor at the regular biennial election last preceding the filing of any petition for the initiative or for the referendum shall be the basis on which the number of legal voters necessary to sign such petition shall be counted. The powers herein reserved to the people for the State at large are hereby further reserved to the legal voters of every locality as to all local legislation or action for the respective localities. The powers herein reserved to the people to propose laws and to enact or reject the same are hereby further reserved to the legal voters of the State, the power to propose amendments to the constitution in the same manner as herein provided for the initiative and referendum. The veto power of the governor shall not extend to measures referred to the people as herein provided. The legislature shall, at the session of the legislature immediately following the adoption of the above constitutional amendment, enact laws carrying into effect the provisions of this section and facilitating its operation, and in the event of the failure of the legislature to enact such laws, the governor, by the executive order, shall make such rules and regulations as may be necessary for carrying these provisions into effect."

By Senator Blaine. To committee on judiciary.

Joint resolution 14 (senate), to amend section 6 of Article V of the constitution relating to reprieves and pardons and creating a board of pardons.

Resolved by the senate, the assembly concurring, That section 6 of Article V of the constitution be amended by striking out all of said section 6 and inserting in lieu thereof the following section, so that when so amended the said section shall read as follows:

"SEC. 6. The legislature shall establish a board of pardons, to consist of the governor, the attorney-general, and the chief justice of the supreme court of the State of Wisconsin, and two qualified electors who shall be appointed by the governor with the consent of the senate, to remit fines and forfeitures, to grant reprieves, commutations, and pardons after conviction or on a plea of guilty for all offenses except treason and cases of impeachment, subject to such regulations as may be provided by law. Not more than three of such board of pardons shall belong to the same political party. Upon conviction for treason, the governor shall have the power to suspend the execution of the sentence until the case shall be reported to the legislature at its next regular meeting, when the legislature shall either pardon or commute the sentence, direct the execution of the sentence, or grant a further reprieve. The governor shall annually communicate to the legislature at each regular session each case of remission of fine, reprieve, commutation, or pardon granted by the board of pardons, stating the name of the convict, the crime for which he is convicted, the sentence, and its date, and the date of the remission, commutation, pardon, or reprieve, with the reasons of the board for granting the same. The legislature shall by law establish rules and regulations governing the remissions of fines and forfeitures and the granting of reprieves, commutations, and pardons, and until such rules and regulations are established, the constitutional provision and laws relating to reprieves and pardons shall be operative."

By Senator Blaine. To committee on judiciary.

RECESS.

Upon motion of Senator Sanborn, the senate took a recess until 12 o'clock m.

12 O'CLOCK M.

The senate was called to order by the president.

The senate repaired to the assembly chamber.

ELECTION OF UNITED STATES SENATOR.

(In joint convention.)

Lieutenant-Governor John Strange, president of the senate, called the joint convention to order and said:

"Gentlemen of the joint convention: You are assembled here for the purpose of expressing your choice for a United States Senator. In order to comply with the federal law, the clerk of the senate and the clerk of the assembly will read from the journal of each house, respectively, the proceedings of the preceding day with reference to the election of a United States Senator."

The chief clerk of the senate read the journal of the senate of January 26, 1909.

And the chief clerk of the assembly read the journal of the assembly of January 26, 1909.

The president then said:

"The clerk will call the roll, and as your names are called you will arise from your seats and announce the candidate of your choice."

Senator HUDNALL. I rise to protest against any other proceeding being taken in this joint assemblage at this time except the announcement of the presiding officer that Hon. ISAAC STEPHENSON is elected to the United States Senate for the term commencing March 4, 1909. I do that for the reason that it appears from the journal of the senate that the total number of votes cast for persons was 17, of which ISAAC STEPHENSON received 12, Neal Brown 4, and Jacob Rummel 1, and the journal of the assembly shows that of the members who voted for persons there were 60 for ISAAC STEEPHENSON, 16 for Neal Brown, and 3 for Jacob Rummel, and therefore, it appearing from the journals of both senate and assembly that ISAAC STEPHENSON received a majority of all of the votes cast in each house, it devolves then upon the president of this joint assembly to declare ISAAC STEPHENSON duly elected to the United States Senate, and then the duty devolves upon the president of the senate and the speaker of the assembly to certify his election to the governor and to the secretary of state, and they to certify his election to the United States Senate. Any other proceeding is out of order and nugatory.

PRESIDENT. Does the senator raise that as a point of order?

Senator HUDNALL. As a protest and as a point of order.

PRESIDENT. As a point of order, if the chair decided it, he would hold it not well taken.

Senator HUDNALL. May I inquire what is done with it as a protest?

PRESIDENT. The chair is a little more familiar with a protest of commercial paper than with a protest of that character. The chair will be obliged to hold that the senator is out of order in his protest, and out of order——

Senator HUDNALL. The gentleman whose name appears upon the back of this paper is a millionaire.

PRESIDENT. Well, he probably does not know anything about protests. Nominating speeches for candidates for the United States Senatorship will be now in order.

Senator OWEN. I move that the joint session do now proceed to ballot for United States Senator.

PRESIDENT. The clerk will call the roll, upon motion made by the senator from the tenth. The question will then be upon the motion made by the senator from the tenth, that we now proceed to a ballot for United States Senator.

Senator HUDNALL. I call for the ayes and noes on that question. That would be in accordance with my protest and my point of order, and I desire simply to have the record show it.

PRESIDENT. Under the rule, it requires that one-sixth to favor the motion. Sufficient number have arisen.

Senator BLAINE. I rise to a point of order. The proceeding under which the election of United States Senator takes place is prescribed by law, and provides that we shall proceed to elect a United States Senator. Therefore the motion to proceed to the election of Senator is not necessary, and is out of order.

PRESIDENT. The point of order is well taken.

Senator OWEN. I withdraw my motion.

SENATOR FROM THE SEVENTH. I rise to another point of order: I not believe that the gentleman has a right to withdraw his motion without the consent of the assembly, having been placed before the assembly.

PRESIDENT. The point of the senator from the seventh is well taken. The question, then, is upon the adoption of the motion made by the senator from the tenth.

Senator BLAINE. I would like a ruling upon my point of order.

PRESIDENT. The Chair was disposed to say the point of order was not well taken, but the Chair wants everything possible to develop to indicate the sentiment, and it is not the purpose of the Chair to be technical. The Chair will rule that the point of order is not well taken.

Senator OWEN. I have withdrawn my motion.

Mr. INGRAM. I will say I understood there was no second to the motion of the gentleman, and secondly, he is entitled to withdraw his motion according to parliamentary practice.

Senator HUDNALL. It does not require any second.

Senator PAGE. I would say that the fact that a sufficient number rose to demand an aye-and-no vote is at any time a sufficient second to any motion.

Mr. HAMBRECHT. I would like to answer the gentleman who made the remark that a second was required for the withdrawal, that when the Chair entertains the motion a second is not required.

Mr. LEDVINA. I call your attention to rule 64, page 91, which covers the point: "Any motion may be withdrawn by consent of the house before division or amendment."

Senator HUSTING. I rise to a point of order. The senator should be permitted to withdraw his motion for the reason that his motion was out of order. The statute prescribes the method by which a United States Senator should be elected. For instance, suppose this house, in joint assembly, should vote it down; that we should not proceed to the election of Senator; there would be a plain violation of the statute. The statute prescribes the order of proceeding, and nothing intervenes between the convening of the joint assembly and the taking of the vote. Everything else is out of order.

PRESIDENT. The Chair is inclined to agree with the senator from the thirteenth, as right, and will so rule. It is in order now that we proceed to the balloting for United States Senator. Members will rise and express their choice as their names are called.

Chief Clerk C. E. Shaffer, of the assembly, called the roll of the joint convention, and the vote for United States Senator was as follows:

Total number of votes cast, 131.

Of which ISAAC STEPHENSON received 65; Neal Brown, 21; Jacob Rummel, 4; John S. Donald, 1; H. A. COOPER, 11; JOHN J. ESCH, 7; W. D. Hoard, 2; John Strange, 1; J. H. Davidson, 2; Walter Owen, 3; Henry Lockney, 1; S. A. Cook, 4; J. H. Stout, 2; E. A. Edmunds, 1; L. H. Bancroft, 1; C. E. Estabrook, 1; C. M. Webb, 1; I. L Lenroot, 1; F E. McGovern, 1; and M. J. Cleary, 1.

The following voted for ISAAC STEPHENSON:

Senators Bird, Bodenstab, Burke, Fairchild, Hudnall, Lehr, Lyons, Page, Stout, Thomas, Whitehead, and Wright.

Messrs. Atwood, Ballard, Bancroft, Bray, Brew, Buslett, Benjamin A. Cady, Chapple, Chinnock, Cleary, Culbertson, Disch, Egan, Erickson, Fenelon, Fisher, Georgi (under protest), Grosse, Hambrecht, Hammill, Harras, Hoyt, Hull, Ingalls, Irvine, Jones, Kempf, Kubasta, Kull, Laycock, Ledvina, Le Roy, Mains, Marquardt, Nelson, Peterson, Philipps, Reader, Reynolds, Shaw, Frank Smith, Simon Smith (under protest), Stack, Stevens, Thomas, Towers, Twesme, Urquhart, Wehrwein, Wellensgard, Whitman, Whittet, and Wittig—65.

The following voted for Neal Brown:

Senators Husting, Pearson, and Randolph.

Messrs. Bichler, Virgil Cady, Domachowski, Farrel, Hughes, Kalaher, Kindlin, Kneen, Lentz, Pickart, Ramsey, Rollmann, Schmidt, Schwalbach, Stewart, Towne, and Viebahn—21.

The following voted for Jacob Rummel:

Senator Gaylord, and Messrs. Berner, Brockhausen, and Weber—4.

The following voted for John S. Donald:

Senator Barker—1.

The following voted for H. A. COOPER:

Senators Bishop, Blaine, Kleczka, Krumrey, and Martin.

Messrs. Comstock, Coolidge, Curtiss, Kamper, Wells, and Zimmerman—11.

The following voted for JOHN J. ESCH:

Senators Brazeau, Marsh, and Morris.

Messrs. Bradford, Busacker, Leuch, and McConnell—7.

The following voted for W. D. Hoard:

Senator Browne and Mr. Onstad—2.

The following voted for John Strange:

Senator Donald—1.

The following voted for J. H. DAVIDSON:
Senator Fridd and Mr. Crowell—2.
The following voted for Walter Owen:
Senator Lockney and Messrs. Kay and Keyes—3.
The following voted for Henry Lockney:
Senator Owen—1.
The following voted for E. A. MORSE:
Senator Sanborn—1.
The following voted for S. A. Cook:
Messrs. Barnett, Kimball, Mortensen, and Neitzel—4.
The following voted for J. H. Stout:
Messrs. Daub and Dorner—2.
The following voted for E. A. Edmunds:
Mr. Estabrook—1.
The following voted for L. H. Bancroft:
Mr. Haight—1.
The following voted for C. E. Estabrook:
Mr. Ingram—1.
The following voted for C. M. Webb:
Mr. Keup—1.
The following voted for I. L. Lenroot:
Mr. Johnson—1.
The following voted for F. E. McGovern:
Mr. Roethe—1.
The following voted for M. J. Cleary:
Mr. Scott—1.

The following remarks were made as the roll was called:

Senator BARKER. Mr. President, owing to the senatorial investigation, I to-day cast my vote for John S. Donald, of Madison.

Senator BISHOP. Pending the investigation now before the Wisconsin legislature, I cast my vote for the Hon. HENRY ALLEN COOPER.

Senator BLAINE. Mr. President, awaiting the result of the investigation as proposed by the state senate, I to-day cast my vote for the Hon. HENRY ALLEN COOPER.

Senator LYONS. Owing to the promise to my constituency, ISAAC STEPHENSON.

Mr. BALLARD. In view of the fact of the action taken by the members of the assembly this morning in regard to the resolution for investigation, I vote at this time for GUSTAV KÜSTERMANN.

Mr. COMSTOCK. Owing to the investigation at this time, I vote for the Hon. HENRY ALLEN COOPER.

Mr. DORNER. Pending the investigation, I vote for Hon. James H. Stout, of Menominee.

Mr. GEORGI. Mr. President, having due regard for the primary election law, and not knowing of any candidate otherwise than the one elected at the primary election, I feel bound, contrary to my own opinion, to vote for ISAAC STEPHENSON, but I do so under protest.

Mr. HAMBRECHT. Mr. President, owing to the fact that the people of the State of Wisconsin have placed in nomination at their primary election a man, I feel in duty bound to recognize that and vote for ISAAC STEPHENSON.

Mr. INGRAM. Mr. President, pending the investigation, I desire at this time to cast my vote for Gen. Charles E. Estabrook, of Milwaukee.

Mr. JOHNSON. Pending the investigation of this matter, I wish to cast my vote for the Hon. Irvine Lenroot.

Mr. KAMPER. Mr. President, pending the investigation at this time, I desire to vote for Henry Allen Cooper.

Mr. KUBASTA. In conformity with the primary-election law and wishes of my constituency and those in Wisconsin, I vote for ISAAC STEPHENSON.

Mr. LEDVINA. Mr. President, in conformity with the primary-election law, I vote for ISAAC STEPHENSON.

Mr. LEUCH. Mr. President, I came down here yesterday morning with a firm conviction of voting for ISAAC STEPHENSON for United States Senator, but I had also pledged my constituents in my district that if any specific charges were preferred against Mr. STEPHENSON, I would not vote for him until that investigation was disposed of. I am therefore bound to vote for JOHN J. ESCH at this time.

Mr. MAINS. ISAAC STEPHENSON, under protest.

Mr. MORTENSON. Mr. President, yesterday I unqualifiedly cast my vote for ISAAC STEPHENSON. In the light of attendant circumstances and the resolution pending before this assembly at the present time, I request that my vote at this time be cast for Samuel A. Cook.

Mr. ROETHE. Mr. President, I cast my vote for the man that carried my district in the primaries, Hon. Francis E. McGovern, of Milwaukee.

Mr. FRANK SMITH. Mr. President, owing to the fact that we have a primary-election law in this State, and under that law ISAAC STEPHENSON received the plurality of all votes cast for the office of United States Senator, and that Dane County was one of those counties that helped to roll up that plurality, I feel it my duty in carrying out the wishes of my constituents to vote for Hon. ISAAC STEPHENSON.

Mr. SIMON SMITH. Mr. President, having still in mind the vote of my district and having great respect for the primary-election law, I vote for ISAAC STEPHENSON under protest.

Mr. WEHRWEIN. ISAAC STEPHENSON, under protest.

Mr. WHITMAN. ISAAC STEPHENSON, no protest.

Mr. ZIMMERMAN. Mr. Speaker, permit me, to-day, as I did yesterday, to vote for the Hon. Henry Allen Cooper.

Mr. BALLARD. Mr. President, I wish to change my vote, under protest, for ISAAC STEPHENSON.

The president said:

It appears from the records of the joint convention that no person has received a majority of the votes cast for United States Senator.

Gentlemen, what is your further pleasure?

Senator Randolph moved that the joint convention be now dissolved.

The ayes and noes being demanded, it was decided in the affirmative—ayes 75, noes 55, absent or not voting 3.

The vote was as follows:

Ayes—Senators Barker, Bishop, Blaine, Browne, Donald, Fridd, Gaylord, Husting, Kleczka, Krumrey, Lockney, Lyons, Marsh, Martin, Morris, Owen, Pearson, Randolph, Sanborn, and Messrs. Ballard, Barnett, Berner, Bichler, Bradford, Brew, Brockhausen, Busacker, Chinnock, Comstock, Coolidge, Crowell, Curtiss, Doub, Domachowski, Dorner, Estabrook, Farrell, Fenelon, Georgi, Grosse, Haight, Hoyt, Hughes, Hull, Ingram, Johnson, Kalaher, Kamper, Kay, Kempf, Keup, Keyes, Kimball, Kindlin, Kneen, Lentz, Leuch, McConnell, Mortensen, Neitzel, Onstad, Roethe, Rollmann, Schmidt, Schwalbach, Scott, Simon Smith, Stewart, Towers, Towne, Viebahn, Weber, Wehrwein, Wells, and Zimmerman—75.

Noes—Senators Bird, Bodenstab, Brazeau, Burke, Fairchild, Hudnall, Lehr, Page, Stout, Thomas, Whitehead, Wright, and Messrs. Atwood, Bray, Buslett, Benjamin A. Cady, Virgil Cady, Chapple, Cleary, Culbertson, Disch, Egan, Erickson, Fisher, Hambrecht, Hammill, Harras, Ingalls, Irvine, Jones, Kubasta, Kull, Laycock, Ledvina, Le Roy, Marquardt, Nelson, Peterson, Philipps, Pickart, Ramsey, Reader, Reynolds, Shaw, Frank Smith, Stack, Stevens, Thomas, Twesme, Urquhart, Wellensgard, Whitman, Whittet, Wittig, and the speaker—55.

Absent or not voting—Senators Hazelwood, James, and Mr. Mains—3.

The senate retired and returned to the senate chamber.

ADJOURNMENT.

Upon motion of Senator Stout, the senate adjourned.

REVISION OF THE PENAL LAWS.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

Mr. OVERMAN. I believe the matter can be settled; that time can be saved and the code can become a law, as it ought, at this session, with certain amendments, and the differences can be settled. Therefore, I move that the matter be recommitted to the committee of conference with instructions to report back to-day.

The VICE-PRESIDENT. The motion is not in order. The Secretary will resume the reading of the amendment.

The Secretary resumed the reading of the amendment.

PENSIONS AND INCREASE OF PENSIONS.

Mr. McCUMBER. I ask the Senator from Utah to yield to me for the purpose of presenting a conference report.

The VICE-PRESIDENT. The Senator from North Dakota presents a conference report, which will be read.

The Secretary proceeded to read the report.

Mr. CLARKE of Arkansas. Is the report being read by unanimous consent?

The VICE-PRESIDENT. The right to present does not depend upon consent.

The Secretary resumed and concluded the reading of the report, which is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 8899) granting pensions and increase of pensions to soldiers and sailors of wars other than the civil war and to certain widows and dependent relatives of such soldiers and sailors, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same.

P. J. McCUMBER,
N. B. SCOTT,
JAMES P. TALIAFERRO,
Managers on the part of the Senate.

H. C. LOUDENSLAGER,
WM. H. DRAPER,
WILLIAM RICHARDSON,
Managers on the part of the House.

Mr. McCUMBER. If the Senator from Utah will yield to me for the purpose, I will ask that the report be adopted.

The VICE-PRESIDENT. Does the Senator from Utah yield for the purpose of having the Senate act upon the conference report?

Mr. CLARKE of Arkansas. There has been so much uncertainty about the right of conference reports that I think it is a good time to settle it by a vote of the Senate. I do not desire that those reports shall be acted upon exclusively at the option of the distinguished Senators from Idaho and Utah. If it is the will of the Senate that that shall be the rule, a vote to that effect will silence future opposition, and we will understand what we are entitled to.

Mr. McCUMBER. I am not claiming that we have any right to consider the report.

Mr. CLARKE of Arkansas. I think you have. I think an affirmative vote of the Senate will give you the right to consider the report. So far as I am concerned, I am not disposed to deny the right, but I should like to have it understood that there exists some power to deal with the question outside of the consent of the two distinguished Senators named.

Mr. LODGE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Massachusetts?

Mr. SUTHERLAND. I yield.

Mr. LODGE. I merely wish to say that under the rules of the Senate the presentation of a conference report is in order at any time, and when it is presented there is only one question that can be raised, and that is the question of consideration, which must be decided without debate.

Mr. SUTHERLAND. As I understand the situation, the Senate is now considering a conference report.

The VICE-PRESIDENT. That is correct.

Mr. SUTHERLAND. It would not be in order, it appears to me, to consider another conference report without displacing this one.

Mr. LODGE. I suggest that it is just as much in order to make a motion to proceed to the consideration of a conference report when another report is under consideration as it is to move to take up a bill against the bill which is the first order of business at 2 o'clock—the unfinished business.

The VICE-PRESIDENT. That is correct.

Mr. LODGE. Not that I desire to set the conference report aside, but the report of the Senator from North Dakota can be disposed of in a moment.

Mr. ALDRICH. Mr. President, it is perfectly competent for the Senator from Utah or the Senator from Idaho, after this report is disposed of, to move to proceed to the consideration of the other report. It is always within the control of a majority of the Senate, and it ought to be.

Mr. SUTHERLAND. I ask unanimous consent that the conference report now under consideration be laid aside, to be resumed after the disposition of the conference report in charge of the Senator from North Dakota.

The VICE-PRESIDENT. The Senator from Utah asks unanimous consent that the consideration of the pending conference report be temporarily suspended; that the Senate may act upon the conference report submitted by the Senator from North Dakota; and that the consideration of the pending conference report be resumed at the conclusion of the consideration of the other report.

Mr. CLARKE of Arkansas. I object to that, although I am entirely favorable to a vote in accordance with the motion made by the Senator from North Dakota. I do not desire to interpose any objection to the consideration of the matter contained in his report, but as I said a moment ago, and now repeat, I am not willing that the matter of the consideration of conference reports shall reside with the distinguished Senators from Idaho and Utah.

I think that is a matter exclusively under the control of the Senate. Whenever it is desirable to exercise it, I think the Senate has the power and can give or withhold it. If it be lodged with the Senators from Idaho and Utah in the matter of unanimous consent, they may arbitrarily withhold it or arbitrarily grant it. I do not believe in the present condition of business in the Senate it is wise to allow any such power to reside with any individual Senator, no matter how fair-minded he may be, and no matter how trustworthy he may be.

I am entirely willing that the Senator from North Dakota should move to take up the conference report, and in order to do so the pending bill should be laid aside; and I shall vote with him in support of such a motion. Then if the Senate desires to resume the consideration of the report in charge of the Senator from Idaho, as the Senator from Rhode Island has suggested, it may do so, it being a matter entirely within the control of a majority of the Senate at all times.

Mr. McCUMBER. I should not make a motion to act upon the conference report against the wish of the Senator having in charge the bill under consideration. I moved it at this time because it is a long bill and it will take some time to engross and enroll it, and to facilitate the business I thought we might as well dispose of it at this time. With the consent of both Senators, I move the adoption of the report of the committee of conference.

The VICE-PRESIDENT. The Senator from North Dakota moves the adoption of the report of the committee of conference.

Mr. CLARKE of Arkansas. The report can not be adopted, I take it, until the other report has been temporarily laid aside.

The VICE-PRESIDENT. Is there objection?

Mr. CLARKE of Arkansas. I object.

The VICE-PRESIDENT. It would have the effect of displacing the pending conference report. Is there objection to the request to temporarily lay aside the pending conference report for the consideration of the conference report submitted by the Senator from North Dakota?

Mr. CLARKE of Arkansas. I object. I want it disposed of by a vote of the Senate.

The VICE-PRESIDENT. The Senator from North Dakota moves that the Senate proceed to the consideration of the conference report submitted by him.

Mr. CLARKE of Arkansas. On that I call for the yeas. There is not a quorum of the Senate present at this time.

The VICE-PRESIDENT. The Senator from Arkansas demands the yeas and nays. Is there a second?

Mr. BEVERIDGE. Has there been a second?

Mr. CLARKE of Arkansas. I suggest the absence of a quorum, Mr. President, and then we will ask for the yeas and nays.

The VICE-PRESIDENT. The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich	Daniel	Hopkins	Paynter
Beveridge	Depew	Johnston	Penrose
Borah	Dick	Kean	Perkins
Bourne	Dillingham	Kittredge	Piles
Brandegee	Dixon	Knox	Rayner
Briggs	Dolliver	La Follette	Smoot
Brown	du Pont	Lodge	Stephenson
Bulkeley	Flint	Long	Sutherland
Burkett	Foraker	McCreary	Taliaferro
Burrows	Frazier	McCumber	Teller
Carter	Fulton	McLaurin	Tillman
Clapp	Gamble	Martin	Warner
Clarke, Ark.	Gary	Money	Warren
Clay	Guggenheim	Newlands	Wetmore
Crane	Hale	Overman	
Cullom	Hemenway	Owen	
Cummins	Heyburn	Page	

The VICE-PRESIDENT. Sixty-five Senators have responded to their names. A quorum of the Senate is present. The Senator from Arkansas demands the yeas and nays upon the question of agreeing to the motion made by the Senator from North Dakota. Is there a second? In the opinion of the Chair, there is not. The question is on agreeing to the motion of the Senator from North Dakota.

Mr. CLARKE of Arkansas. I ask the Chair to put that request again.

The VICE-PRESIDENT. Is there a second to the demand for the yeas and nays?

The yeas and nays were ordered.

Mr. BORAH. What is the motion, Mr. President?

The VICE-PRESIDENT. The Senator from North Dakota moves that the Senate proceed to the consideration of the conference report presented by him. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CLAPP (when his name was called). In the absence of the Senator from North Carolina [Mr. SIMMONS], with whom I have a general pair, I will withhold my vote. If he were here, I should vote "yea."

The roll call was concluded.

Mr. FULTON. I wish to make an announcement in regard to my general pair with the junior Senator from Arkansas [Mr. DAVIS], which I have transferred to the senior Senator from Washington [Mr. ANKENY]. It is understood, I think, that that may stand for the remainder of this session. I will not again make the announcement. I vote "yea."

Mr. SIMMONS. Has the junior Senator from Minnesota [Mr. CLAPP] voted?

The VICE-PRESIDENT. The junior Senator from Minnesota has not voted.

The result was announced—yeas 53, nays 7, as follows:

YEAS—53.

Aldrich	Cummins	Hansbrough	Perkins
Borah	Daniel	Hopkins	Piles
Bourne	Depew	Kean	Richardson
Brandegee	Dick	Kittredge	Scott
Briggs	Dillingham	La Follette	Stephenson
Brown	Dolliver	Long	Sutherland
Bulkeley	du Pont	McCreary	Taliaferro
Burkett	Flint	McCumber	Taylor
Burrows	Foraker	McLaurin	Tillman
Carter	Fulton	Martin	Warner
Clark, Wyo.	Gallinger	Money	Wetmore
Clarke, Ark.	Gamble	Nixon	
Crane	Gary	Page	
Cullom	Guggenheim	Penrose	

NAYS—7.

Clay	Johnston	Rayner	Warren
Heyburn	Paynter	Teller	

NOT VOTING—32.

Ankeny	Curtis	Hale	Overman
Bacon	Davis	Hemenway	Owen
Bailey	Dixon	Knox	Platt
Bankhead	Elkins	Lodge	Simmons
Beveridge	Foster	McEnery	Smith, Md.
Burnham	Frazier	Milton	Smith, Mich.
Clapp	Frye	Nelson	Smoot
Culberson	Gore	Newlands	Stone

So the motion was agreed to, and the Senate proceeded to the consideration of the conference report.

The VICE-PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24835) authorizing the necessary resurvey of public lands.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice-President:

S. 6074. An act to provide for holding sessions of the United States circuit and district courts at Springfield, Mass.;

S. 9006. An act to amend an act authorizing the Washington, Spa Springs and Gretta Railroad Company, of Maryland, to enter the District of Columbia, approved February 18, 1907;

S. 9373. An act to provide for the sale of isolated tracts of public land in Imperial County, Cal.;

H. R. 1622. An act for the relief of the estate of William J. Cussen;

H. R. 26915. An act making appropriation for the support of the army for the fiscal year ending June 30, 1910;

H. R. 27469. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 27926. An act to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River in the State of Indiana; and

H. R. 28047. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors; and

H. J. Res. 263. Joint resolution to provide for the distribution by Members of the Sixtieth Congress of documents, reports, and other publications.

REVISION OF THE PENAL LAWS.

Mr. HEYBURN. I move that the Senate proceed to the consideration of the report of the committee of conference on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

Mr. BAILEY. Mr. President, there is an agreement to renew the consideration to-day of the resolution which I offered yesterday. My understanding is that that resolution went over——

Mr. HEYBURN. I have moved to take up the conference report. I have made a motion.

The VICE-PRESIDENT. The Senator from Idaho moves to proceed to the consideration of the conference report on Senate bill 2982.

Mr. BAILEY. Is it competent for the Senator to make that motion against a unanimous-consent agreement?

The VICE-PRESIDENT. The motion is in order under the rules, and it is not debatable.

Mr. BAILEY. I wish to make a parliamentary inquiry. The suggestion was made to me that it was not a unanimous-consent agreement. It was a unanimous-consent agreement, and the RECORD will show it.

The VICE-PRESIDENT. The Chair will state the parliamentary situation as it is. The Senator from North Dakota [Mr. MCCUMBER] moved to proceed to the consideration of the conference report submitted by him. That motion, upon a vote of the Senate, prevailed. The effect of that vote was to displace the conference report which was before the Senate in charge of the Senator from Idaho. The Senator from Idaho now moves to proceed to the consideration of the conference report. That motion is in order, and it is not debatable.

Mr. BAILEY. I understand, Mr. President, but the parliamentary inquiry which I desire to make is whether it is permissible, under the rule and under the practice of the Senate, to move to take up any order of business against a previous order made by unanimous consent.

The VICE-PRESIDENT. The Chair is of the opinion that it is in order. In the case of a unanimous-consent agreement it is for the Senate to determine whether it will violate its agreement.

Mr. BAILEY. I believe I have never known that done since I have been in the Senate, and I suggest that the Senator from Idaho will make more progress not to attempt it.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Idaho.

Mr. BEVERIDGE. Mr. President, a parliamentary inquiry.

The VICE-PRESIDENT. The Senator from Indiana rises to a parliamentary inquiry.

Mr. BEVERIDGE. Did I understand the Chair to rule that the Senate might vote to displace a unanimous-consent agreement of the Senate?

The VICE-PRESIDENT. The Chair stated that it is in the power of the Senate to violate its unanimous-consent agreement by a vote.

Mr. BEVERIDGE. By a majority vote?

The VICE-PRESIDENT. It is not usual, but the Senate has the power to do it. The only question now before the Senate is the motion of the Senator from Idaho. The question is on agreeing to the motion of the Senator from Idaho to proceed to the consideration of the conference report.

Mr. CLARKE of Arkansas. Mr. President, there is no quorum present, and that motion we might want to amend. I make the point that there is no quorum, and I do it for the definite purpose of taking the sense of the Senate as to whether, with other matters pending——

The VICE-PRESIDENT. No debate is in order. The Senator from Arkansas raises the point of the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich	Cullom	Johnston	Paynter
Bailey	Daniel	Kean	Perkins
Bankhead	Dick	Kittredge	Piles
Beveridge	Dolliver	La Follette	Richardson
Borah	du Pont	Long	Simmons
Brandegee	Flint	McCreary	Smith, Md.
Briggs	Foraker	McCumber	Smoot
Brown	Frazier	McLaurin	Stephenson
Bulkeley	Frye	Martin	Stone
Burkett	Fulton	Milton	Sutherland
Burrows	Gallinger	Money	Taylor
Carter	Gamble	Nelson	Teller
Clapp	Gary	Nixon	Tillman
Clarke, Ark.	Guggenheim	Overman	Warner
Clay	Hansbrough	Owen	
Crane	Heyburn	Page	

The VICE-PRESIDENT. Sixty-two Senators have answered to their names. A quorum of the Senate is present. The question is on the motion of the Senator from Idaho to proceed to the consideration of the conference report submitted by him.

Mr. CLARKE of Arkansas. On that motion I call for the yeas and nays.

The yeas and nays were not ordered.

The motion was agreed to; and the Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

The VICE-PRESIDENT. The Secretary will proceed with the reading of the House substitute.

Mr. TELLER. Mr. President, now that this matter is properly before the Senate——

The VICE-PRESIDENT. It is properly before the Senate.

Mr. TELLER. I suppose it is subject to consideration. I do not care about discussing the question before the Senate properly, but I want to say a few words about the unanimous-consent agreement, assuming that there was a unanimous-consent agreement, a point upon which I do not pass.

Mr. BAILEY. Let me, then, if the Senator will permit me, call his attention to what occurred; and I think I may be permitted to say that this is the first time within my experience or within my knowledge that a unanimous-consent agreement has ever been set aside by a vote of the Senate. If a majority think they can dispose of that measure in this way they have made a grave mistake.

Mr. ALDRICH. Mr. President——

Mr. BAILEY. Let me finish what I want to call the attention of the Senator from Colorado to.

Mr. ALDRICH. I am sure that the Senator from Texas desires to state the question accurately.

Mr. BAILEY. I not only desire to do it, but I did it.

Mr. ALDRICH. There was no unanimous-consent agreement made.

Mr. BAILEY. That is a question to be determined by the RECORD, and I will read the RECORD.

Mr. GALLINGER. Let the RECORD be read.

Mr. BAILEY. I will read the RECORD. It was the Senator from Rhode Island who said he would not object to the course I proposed.

Mr. ALDRICH. Read the RECORD.

Mr. BAILEY (reading)—

If the Senator from Rhode Island is willing that this matter shall go over until to-morrow with his motion to refer it to the Judiciary Committee pending, I am perfectly willing that the matter shall take that course.

The Senator from Rhode Island replied:

I have no objection whatever to that course being taken, but I desire to remind the Senator from Texas and the Senate that at this stage

of the session, with the public business in the condition in which it now is, it will be utterly impossible for the Senate to enter upon a discussion of this grave question of the comity which is due from one great department of the Government to another without imperiling the public business. I shall feel bound to resist any lengthy discussion of this question if it is within my power to do so.

To which I rejoined:

Let me say to the Senator from Rhode Island that if the departments had respected the comity that ought to exist between the two branches of the Government this question would never have been here. But let the resolution go over until to-morrow.

The VICE-PRESIDENT. The resolution will lie on the table, with the motion of the Senator from Rhode Island to refer pending.

Mr. ALDRICH. Yes.

Mr. BAILEY. "Subject to call to-morrow," I added.

Mr. President, there was no other way for us to take that course except by unanimous consent. The Senator from Rhode Island had a motion to refer pending, and that motion was left in the air and could only have been left there by unanimous consent. The matter could only have remained on the table in that state of the parliamentary case by unanimous consent, and it is the barest quibble to say that there was no unanimous consent because Senators did not think it necessary to have the RECORD specify in so many words that the arrangement was one under unanimous consent.

Mr. TELLER. Mr. President, it is quite immaterial to me whether there was unanimous consent or not. I want to speak about the force and effect of a unanimous-consent agreement, because there has been some controversy here within a few minutes as to what is a unanimous-consent agreement.

Ever since I have been in the Senate there have been some Members of this body who have been in favor of what we call a "cloture rule," or what is termed in another place the "previous question." I wish to state what has been the custom of the Senate, in which I think Senators who have served a long time here will agree with me. We have resisted, and especially those Senators who have served a long time, the efforts for a previous question or a cloture rule. Recently, perhaps in the last five or six years, perhaps for ten years, no such effort has been made; but there grew up a system of treating public questions here in the Senate that probably does not exist in any other body in the world. I think it is as old perhaps as the Senate itself. I do not know when it originated, but I know when I came here it was the rule, and that is the unanimous-consent agreement. I should like the attention of the Chair as well as the Senate. This is a subject that I think should be considered carefully.

Mr. President, if it were ten days before adjournment I would make some remarks on the value of the rules and customs of this body; but as it is I shall not waste any time in that way. Unanimous consent is simply an honorable obligation on the membership of this body. It has no force or effect if any Senator on certain occasions, when he has the opportunity, should decline to accept it. When we agree to vote on a certain day we agree that debate shall end and a vote be taken. It is in the power of a Senator, without a violation of any written rule of the Senate, to say: "I decline to recognize this unanimous consent, and I want to proceed to discuss the question." If he does so, the President of the Senate has no power to prevent such discussion. But, Mr. President, in the nearly thirty years that I have been here, I have never known that rule to be violated except by accident, as it was last week, perhaps.

I have heard a great many Senators declare that as they were not present when the unanimous consent was entered into it was not binding on them, but on reflection I believe in every case they have concluded, whether they were present or absent, that they were honorably bound to respect that which was agreed to by the Senate. There is no rule, written or unwritten, which governs this body that is so important and so valuable as unanimous-consent agreements.

It has been charged against the Senate again and again that we have no way to stop debate and that we ought to have a rule such as I have stated. Magazine articles have been written about the time wasted in the Senate in debate, and the country has been sometimes stirred up by statements made in the public press that we lost time here in needless debate. I recall no great question that has ever been considered in the history of the Senate since I have been a Member of it that was not ultimately brought, and that, too, with the consent of the Senate, to a determination. It is the duty of the Members of this body to consider, when a question has been presented, whether or not it has been sufficiently debated, and when some friend of a measure usually would get up and say, "Now, I want a unanimous-consent agreement that the vote shall be taken next Thursday, or next Friday, or next week, or on a day fixed," that has been considered, and usually an amicable arrangement has been made. If the time asked was too short, Senators who wished to debate longer would arrange that there should be an extension of time. Then the request to vote would be agreed to, and we could vote on such a day on the bill and on the pending amendments.

That brings me, Mr. President, to something which occurred on Friday last, if I recollect correctly, when we had agreed that we would vote on a bill and the pending amendments to it, in my judgment. I do not hesitate to say that has been the practice of the Senate. To vote on a bill and pending amendments meant to vote on the bill and on the amendments. It did not mean that any Senator would have a right to get up and raise a question of order, but that we should vote on the amendments, the purpose being to bring the Senate to a vote. So we provide that that shall be done without debate either on the main question or on the amendments.

I have sometimes known a unanimous-consent agreement to be accompanied with some regulations or restrictions as to a vote, but that is not the usual method. We usually say we will vote on the bill and on the pending amendments. The other day the question of order was raised. The Chair held that the question was a pertinent and proper one, and very properly so, because, as I say, no Senator was obliged to observe that agreement unless he saw fit to do so. It was not in the power of the Senate to say to the presiding officer, "We will enforce this regulation," for it is not an enforceable regulation, except by the honorable obligation which every Senator must feel after such an agreement has been entered into.

The very thing that occurred the other day, Mr. President, will, I think, if Senators will give their attention to it for a moment, show the value of this rule and the danger of its infringement. The Senator who was taken off the floor and his amendment, properly, I suppose—I have no doubt of that—declared out of order, said that if he had known this was to be the rule or the regulation of proceedings he would not have consented to the agreement. Mr. President, you will have no unanimous-consent agreements unless we observe such agreements when made and in the terms in which they are made.

I want to say that I believe, as a rule, Senators mean to observe unanimous-consent agreements. While there were two violations of the unanimous-consent agreement, as I thought, on Friday last, I do not charge either of the Senators with the intention to violate that rule. I think that is the rule. I believe—and I want to emphasize it—a vote upon a bill and its pending amendments means a vote upon a bill and upon every amendment that is on the table, whether it be in order or out of order.

There was also on that occasion a motion to lay an amendment on the table. That, I think, comes within the rule, because then the Senate has a vote on the amendment, and it is just as much a vote on an amendment when you vote on a motion to lay it on the table as it is when you vote directly on the amendment.

I heard a Senator say the other day that he thought we ought to have a rule of the Senate to enforce unanimous-consent agreements. Mr. President, I do not believe the time will ever come, in this body, when it will be necessary to have a written rule on this subject. It has never been necessary in the past, and it will, in my judgment, never be necessary in the future to have such a rule.

I want to say that in all the years of my active service in the Senate, when great questions were presented and when there were a great many more political differences and much more of political bitterness than now prevails, we succeeded in ultimately bringing all of those questions to a proper determination by the Senate, or at least the Senate determined for itself what should be the decision. I trust that this unanimous-consent unwritten rule of the Senate will always be observed.

Mr. President, I believe this is so important that I have felt it my duty to discuss this subject. I apologize to the Senate for appearing to have lectured the Senate or to have presented a matter with which probably most Senators are as familiar, at least, as I am.

Mr. BEVERIDGE. Mr. President, certainly at this late hour in the session, and in the present congestion of public business, I should not take even a moment to discuss this or anything else, were it not for the fact, so well stated by the veteran Senator from Colorado [Mr. TELLER], that the particular point under discussion is, at least, as important as any possible matter of legislation.

On every occasion when the subject has been raised, I have stated on the floor—because I want it to be on record as many times as possible—that I, for one, am always against any possible form of cloture; that I have viewed with some alarm the rulings of the Senate itself within the last two years, which, taken together, might effectively involve cloture.

At the next session I hope that that matter will be brought up so that that important method of the Senate's procedure can be more definitely settled when men's minds are freed from the exigencies of particular occasions.

The only form in which we come to any suggestion of cloture, even, is the unanimous consent; and, of course, that is not cloture at all, because it merely means that when all Senators are through, when they have voiced their views, and the whole subject has been thrashed out, it is the judgment of the entire Senate that the whole matter ought to be brought to a conclusion by a vote.

So solemnly binding have I thought that such unanimous consent was, that I have, I frankly confess—as I think a great many other Senators in the Chamber, not only young Senators, but old Senators as well—thought that it was the actual law of the Senate. I see now that it is not; that it rests solely upon custom, and that that custom rests upon honor. That being the case, it can not be too earnestly and repeatedly stated in this body that a unanimous-consent agreement under no circumstances should be violated, and that, if possible, it should have more than the effect of a written rule of the Senate.

If the reverse were true, then when the Senate has come to an agreement that public business should be finally disposed of, and some Senator at the end, for some reason of passion or irritation, should take the floor, he could absolutely interrupt the business of the Senate, which the whole Senate, including himself, had agreed to conclude.

For example, take the contest that occurred in the Senate last year—which is only a type of many others—over the amendment to the naval appropriation bill involving the number of battle ships. It was agreed at a certain day, at a certain hour, the general debate should close, and that after that hour Senators might speak for ten minutes each. During that day there was a great deal of speaking before the hour of 4 o'clock arrived.

It happened to be my fortune to have participated in that debate in such manner that I was expected to close what was said on one side; but I had to do that under what we called the "ten-minute rule." In that ten minutes I was compelled to answer speeches of very able and very well informed Senators, lasting, altogether, some hours. When the end of that ten minutes was up, the Chair very properly rapped on his desk and said, "The time of the Senator from Indiana has expired," and I took my seat. I would have had the power, unless unanimous-consent agreements be sacredly observed, to have kept the floor as long as I could speak. I would have had the power to have defied the Chair, and the Chair's ruling would have amounted only to merely a suggestion reminding me of my honorable engagement with the Senate and the Senate's honorable engagement. Therefore, Mr. President, I say—and I am led to say so because, as the Senator from Colorado [Mr. TELLER] has said, this is a custom immemorial—that now that the suggestion is brought to the minds of a great many Senators, and I think the majority, that unanimous consent is not at all the law of the Senate, but only a custom resting upon honor, we had better bring this clearly to the minds of all of us.

It seems to me that the only concrete thing to do, now that the Senate is face to face with this situation, is to suggest to the Committee on Rules that at a convenient day in the future they report a rule which will state our custom in the form of an absolute rule; otherwise the Senate is at the mercy of any capricious man who for any reason sees fit to disregard the honorable engagements of the Senate.

Now, I will say to the Senator from Texas that if I considered what appears in the RECORD as a unanimous-consent agreement, I never would have voted to violate it by taking up this bill; but as unanimous consent itself is a question of custom, so the form of the unanimous consent is a question of custom. For that reason I do not think, from my brief experience in the Senate, that what the Senator read amounted to a unanimous-consent agreement. First of all, it was not stated in the form of words; second, it was not put by the Chair; third, the question was not asked, "Is there any objection?" which is the method we have of registering unanimous consent. I looked immediately upon the calendar, because, when the suggestion was made that there had been unanimous consent, I would have considered it a matter of dishonor to have violated it by a vote, and I do not find it here. My point is—and I think Senators will recognize it, now that it is clearly stated both by the Chair and the Senator from Colorado—that unanimous consent is purely a matter of custom, and yet the most binding law upon the Senate. In the same way the form of the unanimous consent is a matter of custom, and all the more important because it is not a rule of the Senate, but rests upon our honorable engagements. Therefore the form of unanimous consent has been, "I ask unanimous consent for such and such a thing." The Secretary takes it down. The Chair states the request for unanimous consent, so that every Senator may understand what he is consenting to, and the Chair puts formally the question, "Is there any objection?" and after waiting until all Senators can understand and agree, or disagree, no person objecting, the Chair says, "It is so ordered." Thereupon it becomes what we call "unanimous-consent agreement."

For that reason it seems to me that the colloquy between the Senator from Texas and the Senator from Rhode Island is what occurs every day on similar matters—merely a colloquy and not a unanimous consent—which is as well defined in form as the custom itself is well defined in practice.

Mr. BAILEY. Mr. President, I have no care about form; it is substance that appeals to me. I believe, and the Senate believes, that when the colloquy occurred and no objection was made, that gave me the right to have a vote on the motion made by the Senator from Rhode Island to-day, and without hesitation I assert here and now that except by unanimous consent the matter could not have taken the course it did take.

I believed that it was a unanimous-consent agreement. I acted on that belief; but I will make no mistake about such matters hereafter, and until this Congress adjourns there will not be another unanimous consent given. Now, if you think you can get along that way, proceed.

Mr. ALDRICH. Mr. President, in my long service in the Senate I have never known a unanimous-consent agreement to be violated.

Mr. BAILEY. Will the Senator tell me what this was if not a unanimous-consent agreement?

Mr. ALDRICH. The agreement was an agreement of a character that takes place constantly in the Senate. The Senator——

Mr. BAILEY. Can two Senators agree?

Mr. ALDRICH. I was only agreeing for myself. If the Senator will now allow me to make a statement as to just what occurred, in my own way, I will be much obliged to him.

The Senator offered a resolution in the course of the day to which nobody objected. Any Senator could have objected to the introduction of the resolution.

The Senator offered the resolution, and it was discusssed. I could have asked, or any Senator could have asked, that the resolution go over until to-day. The rules of the Senate require unanimous consent to have a resolution or a motion considered upon the same day that it is offered. Its introduction was out of order; its consideration was out of order, if any objection had been made; but it was introduced, considered, and went over.

Mr. BAILEY. By unanimous consent.

Mr. ALDRICH. Yes. It went over by unanimous consent, of course, as resolutions do every day. Went over until when? No time was fixed. If morning business had been reached this morning, this resolution would have been submitted to the Senate. It would then have been in order undoubtedly, and it could have been disposed of by a majority vote of the Senate by reference to a committee or otherwise, as business is ordinarily disposed of. It went over with an agreement that it should lie upon the table, according to the statement of the President of the Senate.

Mr. BAILEY. Will the Senator tell me what kind of an agreement?

Mr. ALDRICH. The agreement was stated by the President; it can be read again.

Mr. BAILEY. I am trying to ascertain whether or not the Senator from Rhode Island and myself can make an agreement, and whether it is not for the Senate either to ratify it by its silence or by its expressed consent.

Mr. ALDRICH. At what time does the Senator from Texas understand that this resolution will come up to-day for action?

Mr. BAILEY. I understood that it would come up whenever I called it, for I said "subject to call;" and there was no objection. Any Senator was in honor bound, according to my view of it, if he was not willing for that order to be made, to say so then, and thus advise me that I would not be permitted to call it up.

Mr. ALDRICH. Resolutions go over subject to call constantly in the course of the business of the Senate.

Mr. BAILEY. Under any rule?

Mr. ALDRICH. By unanimous consent, in the ordinary custom of the Senate.

Mr. BAILEY. By unanimous consent——

Mr. ALDRICH. By unanimous consent they go over subject to call. What does "subject to call" mean?

Mr. HEYBURN. I rise to a point of order.

Mr. ALDRICH. Does it mean that the Senate can take up a matter upon the call of a Senator to the exclusion of all other business at any time that he sees fit?

Mr. HEYBURN. I rise to a point of order.

Mr. ALDRICH. That surrenders the business of the Senate to one Senator. There was never any such construction placed upon a unanimous-consent agreement.

Mr. BAILEY. One Senator could have prevented it by saying "I object;" but he did not say so.

Mr. ALDRICH. Mr. President——

Mr. HEYBURN. I desire to state the point of order.

The VICE-PRESIDENT. The Senator from Idaho rises to a point of order.

Mr. HEYBURN. I assume that this discussion must be proceeding by unanimous consent. The Senate had already, before the matter was suggested, voted to take up the conference report. That business is before the Senate in pursuance of the vote. Now, the question as to the resolution introduced by the Senator from Texas arose after the Senate had voted to take up the conference report, and I think the discussion is proceeding out of order. Of course, if we are discussing——

Mr. BEVERIDGE. There is no such thing as a point of order on whether a Senator's remarks are germane in this body.

Mr. HEYBURN. I understand that.

Mr. BEVERIDGE. Mr. President——

Mr. HEYBURN. I think I have the floor.

The VICE-PRESIDENT. The gentleman from Idaho will state his point of order.

Mr. HEYBURN. I was beginning to state it when interrupted. My point of order is that the Senate has voted to take up the conference report. Of course Senators may discuss anything, and I am not objecting to their discussing the academic question as to whether or not there was a unanimous-consent agreement. I only wanted to suggest the point of order, so that we might be recalled to the fact that the matter before the Senate is not the resolution of the Senator from Texas, but is the conference report.

Mr. TELLER. Mr. President, a conference report, like any other subject before the Senate, is a debatable question.

Mr. HEYBURN. I realize that.

Mr. TELLER. And in this body, Mr. President, we have not a rule compelling one to speak germane to the question. We never have had such a rule. That is one of the rules that sometimes a majority adopts in order to keep a minority in check.

Mr. HEYBURN. Mr. President, will the Senator permit me to interrupt him a moment?

Mr. TELLER. Let me finish. I could just as well address the Senate on the Panama Canal as address it on this matter, and be clearly within the rules of the Senate.

Mr. HEYBURN. Will the Senator permit me to interrupt him a moment?

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Idaho?

Mr. TELLER. Certainly.

Mr. HEYBURN. I would not want it to be thought for a moment that I was not fully aware of that, or that I made the point of order because of the subject being discussed not being germane or otherwise. I made it to recall the Senate's attention to the order of business.

Mr. TELLER. Mr. President, the suggestion of the Senator from Idaho in rising to a point of order was certainly a declaration that I had been out of order in speaking.

Mr. HEYBURN. I would say——

Mr. TELLER. I stated distinctly that I was to address the Senate on this subject. Now, Mr. President, I want the Senator from Idaho to understand, if he does not—and I think he does—that he can not raise a question of order as to the character of speech that a Senator makes in this body. He may say that it is foolish; he may say that it is unwise; he may say that it is false logic, and all that, when he gets the floor, but he can not interfere with the discretion of a Senator in discussing any question when there is a bill before the Senate.

Mr. HEYBURN. Mr. President, I am somewhat taken by surprise, because I was unfortunate enough not to be in the Senate Chamber during any part of the time that the Senator from Colorado was addressing the Senate on this question. I had no reference whatever to his remarks. I was elsewhere at that time. My remarks were drawn by the discussion that was proceeding between the Senator from Rhode Island [Mr. ALDRICH] and the Senator from Texas [Mr. BAILEY], and I was not intending for a moment to suggest even that the discussion must proceed germane to the question.

Mr. BAILEY. If the Senator from Idaho will permit me, he did suggest that he rose to a point or order and declared that the conference report was before the Senate, and the Senator from Rhode Island and myself were not addressing ourselves to the question.

Mr. HEYBURN. Mr. President——

Mr. BAILEY (continuing). Which raised the very point as to whether or not we must make our remarks germane. If that rule prevailed in the Senate——

Mr. HEYBURN. Mr. President, I can not submit to any such interpretation——

Mr. BAILEY. The Senator will have to.

Mr. HEYBURN. No; I will not.

Mr. BAILEY. But he will.

Mr. HEYBURN. I will not have to submit, and the Senator was never more mistaken than when he claims that I have to submit.

Mr. BAILEY. The Senator has to submit to what I have said, because I spoke well within the record.

Mr. HEYBURN. Now, Mr. President, I will put something in the RECORD that will probably make my position plain. I came in the Chamber when the question was being discussed between the Senator from Texas and the Senator from Rhode Island as to the effect of the language used by the Chair yesterday at the time the resolution of the Senator from Texas was laid aside. As I left the Chamber that question was coming up. I merely rose to a point of order, which was as appropriate as any other action, not for the purpose of suggesting that the discussion was not germane to any question, but for the purpose of establishing the status of the measure before the Senate, in order to call attention to the fact that the vote of the Senate directing that the conference report under consideration be taken up was the order of business, because my mind was in some doubt as to what might have transpired during my brief absence. I am perfectly well aware of the fact that a Senator may discuss any question upon this floor.

Mr. ALDRICH. I think I have the floor. I was taken off by the point of order, and I take it for granted that I have now a right to the floor again.

Mr. HEYBURN. I did not suppose I was speaking in the time of the Senator from Rhode Island at all. He had resumed his seat and other Senators had spoken.

Mr. ALDRICH. I beg the Senator's pardon.

The VICE-PRESIDENT. The Senator from Rhode Island is entitled to the floor.

Mr. HEYBURN. Now, if the Senator from Rhode Island has the floor and desires to keep it, no one will more cheerfully yield it to him than myself, because I think I know how to get it when I want it. [Applause in the galleries.]

The VICE-PRESIDENT. The Chair must admonish occupants of the galleries that applause is not allowed under the rules of the Senate.

Mr. ALDRICH. Has the point of order been disposed of?

Mr. HEYBURN. I withdraw the point of order.

The VICE-PRESIDENT. The Senator from Idaho withdraws the point of order.

Mr. ALDRICH. I was stating what I understood to be the status of the resolution of the Senator from Texas. It went over, as resolutions go over constantly—it went over subject to call, if you please, and it was undoubtedly expected that it would come up to-day in the morning hour.

But the Senate subsequently practically abolished the morning hour by agreeing, by unanimous consent, to take up the proposition of the Senator from Idaho at 10 o'clock. We all understood that the resolution of the Senator from Texas was to come up to-day for consideration.

I have no objection to its being taken up now or at any other time. I want to avoid any misunderstanding about it, but certainly the proceedings which took place in the Senate yesterday upon the resolution of the Senator from Texas did not constitute a unanimous-consent agreement that the proposition should be considered at any time, except it went over by general consent until to-day, subject to disposition by the majority of the Senate.

Mr. BAILEY. I desire to ask the Senator from Rhode Island to define for my benefit the difference between "general consent" and "unanimous consent."

Mr. ALDRICH. There is no difference.

Mr. BAILEY. The Senator just this moment declared that the resolution went over by general consent.

Mr. ALDRICH. It did.

Mr. BAILEY. What is the difference between "general consent" and "unanimous consent?"

Mr. ALDRICH. None whatever.

Mr. BAILEY. Then the resolution must have gone over by unanimous consent.

Mr. ALDRICH. Of course it went over by unanimous consent. The only question is whether the resolution has any status for consideration agreed to by unanimous consent.

I am perfectly willing to ask that the resolution be taken up, or to move that it be taken up, if the Senator has any feeling about it; and my motion to refer it is in order. I am perfectly willing that the matter shall be taken up at any time.

Mr. BAILEY. All I want is a vote on it.

Mr. CARTER. I ask the Senator to yield to me for a moment.

The VICE-PRESIDENT. Does the Senator from Texas yield to the Senator from Montana?

Mr. CARTER. I understood the Senator from Rhode Island had the floor.

Mr. ALDRICH. I have the floor; I yield.

The VICE-PRESIDENT. The Senator from Rhode Island yields to the Senator from Montana.

Mr. CARTER. Mr. President, the statement of the Senator from Rhode Island that general consent, acquiescence in a situation——

Mr. ALDRICH. Yes.

Mr. BEVERIDGE. That is it.

Mr. CARTER (continuing). Is the equivalent of unanimous consent, as that term is used in this Chamber, seems to me to require modification.

Mr. ALDRICH. Unanimous consent or general consent to postpone a question is a different thing from definitely fixing a time for a vote or consideration by unanimous consent or by general consent.

Mr. CARTER. The record upon which this controversy arises is very brief. I will inquire whether it has been read in connection with the discussion?

Mr. BEVERIDGE. It has been.

Mr. CARTER. It has been read?

Mr. ALDRICH. It had better be read again.

Mr. CARTER. A resolution came up in the regular course of business, I believe, presented by the Senator from Texas, [Mr. BAILEY]. The Senator from Rhode Island [Mr. ALDRICH] made a motion to refer the resolution to a committee. The Senator from Texas was insistent upon immediate action on the resolution. A colloquy occurred——

Mr. BAILEY. Will the Senator permit me?

Mr. CARTER. Certainly.

Mr. BAILEY. I know the Senator wants to be accurate. I asked unanimous consent for the present consideration of the resolution. No objection was made, though consent was not expressly given, and the Senator from Rhode Island moved to refer. That seemed to me then to grant, if that be necessary, unanimous consent.

Mr. CARTER. O Mr. President, that would be wholly incompatible with admitting unanimous consent, because a reference to a committee would be the very opposite of present consideration.

Mr. BAILEY. Let us see if we understand the parliamentary rule in the same way. As I understand, the matter could not have been before the Senate at that time for motion or consideration except by unanimous consent. As I understand the rule, the resolutions must have gone over for a day except unanimous consent was given for their immediate consideration. That was my understanding when I asked unanimous consent for the present consideration.

Mr. CARTER. Mr. President, there should not be any doubt left as to what constitutes unanimous consent in this Chamber, because on all hands it will be conceded that momentous events may hang upon the unanimous consent. The phraseology or the language of this line of conversation, parliamentary, it is true, between the Senator from Rhode Island and the Senator from Texas was with a view to mutual accommodation as to the disposition of a matter concerning which they were not in agreement at the time. The Senator from Texas desired immediate consideration; the Senator from Rhode Island desired to refer the subject-matter to a committee. That formed an issue. The colloquy continued for a considerable length of time, and finally this language was used by the Senator from Texas in concluding his statement:

> Now, if the Senator from Rhode Island is willing that this matter shall go over until to-morrow with his motion to refer it to the Judiciary Committee pending, I am perfectly willing that the matter shall take that course.

Mark you, there was no consultation with the Senate. There was no appeal to the Chair to state the unanimous-consent agreement, as is the uniform practice. But the Senator from Rhode Island then said:

> I have no objection whatever to that course being taken, but I desire to remind the Senator from Texas and the Senate that at this stage of the session, with the public business in the condition in which it now is, it will be utterly impossible for the Senate to enter upon a discussion of this grave question of the comity which is due from one great department of the Government to another without imperiling the public business. I shall feel bound to resist any lengthy discussion of this question if it is within my power to do so.
>
> Mr. BAILEY. Let me say to the Senator from Rhode Island that if the departments had respected the comity that ought to exist between the two branches of the Government this question would never have been here. But let the resolution go over until to-morrow.
>
> The VICE-PRESIDENT. The resolution will lie on the table, with the motion of the Senator from Rhode Island to refer pending.
>
> Mr. BAILEY. Subject to call to-morrow.

Mr. BAILEY. Let me ask the Senator from Montana——

Mr. CARTER. Let us see if we understand each other. I think proper regard for a unanimous-consent agreement of this body is as important a question as can be presented to it. My observation, and without any exception, too, has been that when Senators seek to have the consent of the Senate to a given course of action in the future, they state in specific terms the thing to which consent is solicited. Thereupon the presiding officer of the body proceeds to state clearly and distinctly to the Senate the unanimous consent sought.

Mr. BAILEY. Now will the Senator permit me?

Mr. CARTER. Senators frequently suggest amendments, and the party asking the unanimous-consent agreement sometimes accepts. But nothing of that kind occurred here.

Mr. BAILEY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Texas?

Mr. CARTER. Certainly.

Mr. BAILEY. I wish to call the attention of the Senator from Montana to the fact that the presiding officer of the Senate did state substantially what was the understanding which the Senator from Rhode Island and I reached in the presence of the Senate.

Now, a moment ago the Senator from Montana said that this was merely an interchange of views between the Senator from Rhode Island and myself, and that the Senate was not consulted. He forgets this occurred in the presence of the Senate, and the silence of Senators assented to the arrangement which he and I were making; and then the Senator proceeded to say—in the beginning, I mean—that there was no statement of this by the presiding officer. But he finds at the conclusion of it that the presiding officer did state to the Senate substantially what the agreement between the Senator from Rhode Island and myself had been. Then, to make it more manifest, at least what my understanding of it was, I added to the statement of the presiding officer this qualification—that the resolution should go over, subject to call.

I do not profess to know very much about the rules. I believe it was the younger Pitt who said that he generally found that a man who knew much about parliamentary law seldom knew much about anything else. I do not profess to know much, although I believe it my duty, and the duty of every other Senator, to understand the rules of the body under which he must proceed; and I am perfectly willing, if I have misled myself, to take the consequences. But I am not willing to take the consequences if somebody else has misled me, and I undoubtedly have been misled, because I thought under this order I would have the right to call up the resolution to-day.

Mr. CARTER. I think the Senator has the right to call up the resolution right now.

Mr. ALDRICH. Yes.

Mr. BAILEY. If I can do it——

Mr. CARTER. Will the Senator answer me this question?

Mr. BAILEY. If I can.

Mr. CARTER. Does the Senator think that the business of the Senate could be safely guarded if subjected to this informal kind of method of reaching a unanimous-consent agreement instead of having the proposition stated by the Chair, as is our custom?

I do not recall a single instance in this Chamber where anything approximating or pretending to be unanimous consent has ever been arrived at except after a clear and specific statement by the presiding officer of the Senate, followed by the question, "Is there objection?"—and if there is no objection, it is announced, "The Chair hears none," and the agreement is thus consummated for unanimous consent.

Mr. BAILEY. I will answer the Senator very cheerfully, first, by saying he is mistaken when he states that that is always done. I have repeatedly seen Senators reach agreements, and the Chair would not restate them, but "without objection," the Chair would say, "such and such is the order." I think the better practice would be such as the Senator states. I think it would be the safer one if we are not to respect the spirit of the understanding as well as the letter. But this is the first time I have ever heard Senators quibble about the form of a unanimous consent.

Mr. CARTER. I ask the Senator in all candor to tell us if he feels that in the presence of the language I have just read any kind of agreement or prospect of agreement on action on the resolution had been reached. The Senator from Rhode Island concluded his statement with the words:

I shall feel bound to resist any lengthy discussion of this question if it is in my power to do so.

Mr. BAILEY. The Senator could do that by moving to lay on the table. That could have been reached.

Now, Mr. President, I want to call the attention of the Senator to the rule, the fifth paragraph of Rule XIV, reading as follows:

All resolutions shall lie over one day for consideration, unless by unanimous consent the Senate shall otherwise direct.

I had believed that a matter affecting the privileges of this body was not subject to the ordinary rules. I had believed, until my attention was called to it, that at any time a Senator had a right to rise in his place and direct the attention of the body to a matter affecting its privileges. It might affect its safety, and whatever affects its privilege does in some degree affect its safety. It does not seem to me consistent with the common sense of men that if I were to rise in my place here and offer a resolution that involved the very safety of the body, the lives of the Members, with regard to some defect in the building, that the resolution would have to lie over until to-morrow, because if it did the Senators would perhaps lie under for all time. It had not occurred to me that the rule was ever intended to fix the procedure with respect to questions affecting the privileges of the body. But I yield that point, and I accept the construction of the rule that it is as broad as its language imports and that every resolution, although it be a resolution touching the approach of an enemy or the falling of the building, under the rule must lie over for a day.

If that is true, then the Senator from Rhode Island could not have moved to refer the resolution to a committee, because it must have been before the Senate for action before it could be referred. How could the Senator make his motion unless the resolution was before the body? And the resolution could not have been before the body under the rules, except by unanimous consent.

Mr. ALDRICH. The resolution, once before the body by unanimous consent, a motion to refer would clearly be in order under the rule.

Mr. BAILEY. Mr. President, I have the Senator from Rhode Island and the Senator from Montana. The Senator from Montana has just stated, and the Senator from Rhode Island preceded him, that these orders were always made in solemn fashion. I challenge the Senator to find where it was stated that the resolution was before the Senate by unanimous consent. The only reference to unanimous consent in the whole debate is my own request for unanimous consent to proceed at once with the consideration of my resolution.

Mr. CARTER. At this point, will the Senator permit me to make an observation?

Mr. BAILEY. Certainly.

Mr. CARTER. Discussions have proceeded here times without number by unanimous consent, and no one mentions the fact. But if the point of order is raised, then the discussion ceases, because, proceeding by unanimous consent, the discussion can be terminated by objection.

I think the Senator may well consider this construction of the rule: His resolution had gone over regularly on the objection that might have been interposed to its consideration at the time. The next day it would have been laid before the Senate in orderly fashion and as a resolution coming over from the previous day. But the Senator by the language employed by him prevented the laying of the resolution before the Senate, because he specified that it was to go over subject to call rather than to be taken up in the regular order of business.

Mr. BAILEY. There was another difference arising out of the motion of the Senator from Rhode Island to refer. That differentiated the case from the ordinary one.

Mr. President, I desire to get out of this without any trouble to my friends on the other side, but I am going to make trouble for them unless I do get out of it in a proper way. I do not want to object to unanimous consent; that is not gracious; it is not even genteel; but if they deny the agreement as I understand it, I am going to retaliate——

Mr. ALDRICH. I have no objection——

Mr. BAILEY. Wait. I do not make that as a threat. I make that as an excuse for the request I am about to prefer. I am in an amiable mood about it, and if the Senate will agree that to-morrow at 1 o'clock this matter shall be taken up for a vote, I shall be content.

Mr. ALDRICH. I am willing to have it taken up now.

Mr. BEVERIDGE. For a vote?

Mr. ALDRICH. Yes; I am willing. I think the Senate is ready to proceed to the consideration of it now.

Mr. CULLOM. Get it out of the way.

Mr. ALDRICH. It has to be disposed of at some time, and we may as well dispose of it now as at any other time.

Mr. BAILEY. I only said to-morrow because I did not want to appear to be filibustering against the present business before the Senate.

Mr. ALDRICH. I think the resolution might as well be disposed of at one time as another.

Mr. BAILEY. Well.

Mr. HEYBURN. We would have to lay aside the pending business.

Mr. ALDRICH. Temporarily.

Mr. HOPKINS. What is to be voted on—the motion to refer?

Mr. ALDRICH. Yes.

The VICE-PRESIDENT. The Senator from Rhode Island asks unanimous consent that the consideration of the pending conference report be temporarily laid aside, and that the Senate proceed to the consideration of the resolution submitted by the Senator from Texas.

Mr. CLARKE of Arkansas. I object to its being temporarily laid aside. I am not opposed to its being laid aside by a vote. Then it can be restored to consideration by another vote.

The VICE-PRESIDENT. Objection is made.

Mr. CLARKE of Arkansas. If the Senator wants the resolution to be before the Senate, he can move to take it up and have a vote.

Mr. ALDRICH. I do not like to be involved in the complications——

Mr. CLARKE of Arkansas. It is no complication whatever.

Mr. ALDRICH (continuing). That arise under the discussion of the pending conference report, nor do I have any disposition to help the Senator from Arkansas to delay the consideration of it by various ways.

Mr. CLARKE of Arkansas. I have no disposition to help the Senators from Idaho and Rhode Island to take possession of the business of the Senate without the consent of the Senate.

Mr. ALDRICH. I am perfectly willing to make the motion now.

Mr. CLARKE of Arkansas. Well, make it.

Mr. ALDRICH. Or to ask for the consideration of the resolution of the Senator from Texas.

Mr. CLARKE of Arkansas. I shall be very glad to have the Senator make the motion, and I shall vote for it.

The VICE-PRESIDENT. The Chair calls the attention of Senators to the fact that they must address the Chair before they proceed.

Mr. ALDRICH. I think Senators ought to agree that no unnecessary time should be taken in the consideration of the resolution.

Mr. BAILEY. I want to say this——

The VICE-PRESIDENT. Does the Senator from Rhode Island yield to the Senator from Texas?

Mr. BAILEY. I have not myself yielded the floor.

The VICE-PRESIDENT. The Senator from Texas.

Mr. BAILEY. I will say to the Senator from Rhode Island that I shall not consume any further time. I have said all I care to say about it unless I intended to discuss it elaborately. But the Senator from Maryland [Mr. RAYNER] at one time had it in his mind to address himself to the question at some length, and I do not know whether he has changed his purpose or not. I should like to fix the vote on the resolution at a time when, if the Senator from Maryland should desire to address the Senate, he would not be precluded from doing so. The only thing I shall do before the matter is concluded is to put into the RECORD extracts from both the majority and the minority reports made to the Senate by the Judiciary Committee on the occasion to which I very briefly adverted yesterday morning; and when I shall have done that, I shall have occupied all the time and all the attention of the Senate that I desire.

Mr. ALDRICH. Then I make the request for unanimous consent that the resolution be taken up now for present consideration; that a vote be taken without further discussion——

Mr. BEVERIDGE. Immediately.

The VICE-PRESIDENT. The Senator from Rhode Island asks unanimous consent——

Mr. CLARKE of Arkansas. I object to the latter part of the request.

The VICE-PRESIDENT. The Chair will state the request. The Senator from Rhode Island asks unanimous consent that the resolution be taken up immediately for consideration——

Mr. ALDRICH. And that the pending motion be voted on, without further discussion.

The VICE-PRESIDENT. And that the motion of the Senator from Rhode Island be voted on without further debate.

Mr. BAILEY. Of course, the Senator from Rhode Island makes that request in the face of the statement I have made with reference to the Senator from Maryland [Mr. RAYNER]. It seems to me that he wants to force an objection——

Mr. ALDRICH. Oh, no.

Mr. BAILEY. From me or some other Senator on this side.

Mr. ALDRICH. No. I expected to get an objection from the Senator from Arkansas.

Mr. BAILEY. That is the reason the Senator preferred the request?

Mr. ALDRICH. No; I beg the Senator's pardon. I intended to follow it up with the statement that I would move to take up the resolution at any time that would suit the convenience of the Senator from Texas, not to interfere with any conference report or any appropriation bill.

Mr. BAILEY. Then we can reach an agreement. A parliamentary inquiry, Mr. President.

Mr. ALDRICH. I have no desire to object, other than is necessary from a proper regard for the public service. I am quite willing to have the resolution disposed of now or at any other time.

The VICE-PRESIDENT. The Senator from Texas will state his parliamentary inquiry.

Mr. BAILEY. I respected the limitations upon the time so much yesterday that I occupied less than three minutes on the matter.

Mr. ALDRICH. I understand that.

Mr. BAILEY. We can reach an understanding this way: I am going to take the judgment of the Chair on a parliamentary question first. If it is permissible for the Chair to answer the inquiry, I should like to know if it will be in order to-morrow at 1 o'clock for any Senator to move that the Senate proceed to the consideration of the resolution.

The VICE-PRESIDENT. The Chair is of the opinion that it would be.

Mr. BAILEY. Then, I will accept the assurance of the Senator from Rhode Island that he will make that motion; and of course if he does not, I can.

Mr. ALDRICH. I now ask unanimous consent that the resolution may be taken up at 1 o'clock to-morrow, the discussion to continue for thirty minutes.

Mr. HEYBURN. I object.

The VICE-PRESIDENT. The Chair will put the request. The Senator from Rhode Island asks unanimous consent that the resolution be taken up for consideration at 1 o'clock to-morrow, and that the discussion proceed for thirty minutes. Is there objection?

Mr. HEYBURN. I object.

The VICE-PRESIDENT. Objection is made. The Senator from Idaho objects.

Mr. ALDRICH. I give notice that at some convenient time to-morrow I shall move that the Senate proceed to the consideration of the resolution.

Mr. BAILEY. In order that every Senator may know exactly the time and be here to vote, I suggest that the Senator from Rhode Island say he will make it at 1 o'clock, or as near that time as practicable.

Mr. ALDRICH. I will make it at 1 o'clock, or as near that hour as possible.

Mr. LODGE. I desire to make an inquiry. Does the question come on the motion to refer?

Mr. ALDRICH. Yes.

Mr. BEVERIDGE. Certainly.

The VICE-PRESIDENT. That is the pending question.

Mr. HEYBURN. I do not want the RECORD to show that it comes up on the motion to refer, because the resolution is not under consideration. It is being discussed in connection with the penal-code bill, and to have the RECORD show that we had another matter under consideration at this time would not be appropriate.

Mr. BEVERIDGE. May I state to the Senator from Idaho that is not the motion the Senator from Rhode Island gave notice he would make to-morrow? His motion merely is to proceed to the consideration of the resolution. Then if we reach a vote and the resolution is taken up the question will come up on the motion of the Senator from Rhode Island to refer.

Mr. HEYBURN. I do not desire that to-morrow any claim shall be made that there was given consent, unanimous or otherwise, that to-morrow at any time we will proceed to the consideration of the resolution of the Senator from Texas. I do not care to-morrow to have repeated the controversy of to-day as to what constitutes unanimous consent. I give notice now that I shall resist it when it comes up.

REPORT OF BUREAU OF ANIMAL INDUSTRY.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Agriculture and Forestry and ordered to be printed:

To the Senate and House of Representatives:

I transmit herewith a letter from the Secretary of Agriculture, submitting a report of the operations of the Bureau of Animal Industry of the United States Department of Agriculture for the fiscal year ended June 30, 1908, prepared in compliance with the requirements of section 11 of the act approved May 29, 1884.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *March 2, 1909.*

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28243) to provide for the repair, maintenance, and preservation of public works on rivers and harbors, and for other purposes.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910; further insists upon its disagreement to the amendment of the Senate No. 58; agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon; and had appointed Mr. SCOTT, Mr. HAUGEN, and Mr. LAMB managers at the conference on the part of the House.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes; asks a conference with the Senate on the disagreeing votes of the two Houses thereon; and had appointed Mr. TAWNEY, Mr. SMITH of Iowa, and Mr. FITZGERALD managers at the conference on the part of the House.

REVISION OF THE PENAL LAWS.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

The VICE-PRESIDENT. The Secretary will resume the reading of the House substitute.

Mr. CLARKE of Arkansas. Mr. President, as I stated on former occasions, the sectionizing of the bill being read by the Secretary is not coincident with the printed copy. I therefore suggest the absence of a quorum, as I desire to have all Senators afforded an opportunity to hear what is being read.

The VICE-PRESIDENT. The Senator from Arkansas suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich	Cullom	Hale	Paynter
Bailey	Cummins	Heyburn	Penrose
Bankhead	Curtis	Hopkins	Perkins
Borah	Daniel	Johnston	Piles
Bourne	Depew	Kean	Richardson
Brandegee	Dick	Kittredge	Scott
Briggs	Dixon	Knox	Simmons
Brown	Dolliver	La Follette	Smith, Md.
Bulkeley	du Pont	Lodge	Smith, Mich.
Burkett	Elkins	Long	Smoot
Burnham	Flint	McCreary	Stephenson
Burrows	Foster	McCumber	Stone
Carter	Frazier	Martin	Sutherland
Clapp	Frye	Milton	Taliaferro
Clarke, Ark.	Gallinger	Money	Taylor
Clay	Gamble	Overman	Teller
Crane	Gary	Owen	Warner
Culberson	Gore	Page	Wetmore

The VICE-PRESIDENT. Seventy-two Senators have answered to their names. A quorum of the Senate is present.

SUNDRY CIVIL APPROPRIATION BILL.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives, disagreeing to the amendments of the Senate to the bill (H. R. 28245) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HALE. I move that the Senate insist on its amendments and agree to the conference asked by the House, the conferees to be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed Mr. HALE, Mr. PERKINS, and Mr. TELLER conferees on the part of the Senate.

Mr. HALE. I should like to give notice that I hope shortly to get the deficiency appropriation bill from the Printing Office, and I shall then ask the Senate to proceed to its consideration.

PUBLIC BUILDINGS.

Mr. SCOTT. Will the Senator from Maine allow me to present a conference report?

Mr. HALE. I have nothing at present.

Mr. SCOTT. I present a conference report on House bill 28167.

The VICE-PRESIDENT. The report will be read.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 28167) to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public-building acts, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 3, 4, 8, 9, 10, 11, 13, and 14.

That the House recede from its disagreement to the amendments of the Senate numbered 5 and 7 and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, so that said amendment shall read as follows:

"SEC. 3. That of the amount heretofore authorized for the United States government building at Boise, Idaho, so much thereof as may be necessary shall be available for the acquisition of additional land: *Provided*, That the limit of cost heretofore fixed shall not be exceeded."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, so that the same shall read as follows:

"SEC. 7. That the Secretary of the Treasury may, in his discretion, disregard the provision requiring sites to be bounded upon at least two sides by streets in so far as the same shall apply to the village of Penn Yan, N. Y."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: Change "Sec. 14" to "Sec. 13;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment as follows: Change "Sec. 15" to "Sec. 14;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment so that said amendment shall read as follows:

"SEC. 15. That the item contained in section five of the act of Congress entitled 'An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes,' approved May thirtieth, nineteen hundred and eight, for 'United States post-office at Washington, District of Columbia, five hundred thousand dollars,' be, and the same is hereby, amended so as to add to the same the following provision: 'That if any balance remains within said limit after acquiring the site herein authorized, the Secretary of the Treasury be, and he is hereby, authorized to expend so much thereof as may be necessary in the preparation of the plans for said United States post-office building on said site.'"

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, so that said amendment shall read as follows:

"SEC. 16. That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire by purchase, condemnation, or otherwise, a site for a federal building in the city of Lawton, Oklahoma, and he is authorized to expend for such purpose the proceeds arising from the sale of lots thirty-one and thirty-two of block forty-one of the official plat of the city of Lawton, Oklahoma, as provided for by section 33 of the so-called public building act, approved May 30, 1908."

And the Senate agree to the same.

On page 2 of the bill strike out all of section 3, being lines 8 to 12, both inclusive.

On page 6 of the bill strike out section 13, being lines 3 to 12, both inclusive.

The committee of conference further reports that they have been unable to come to an agreement on Senate amendment numbered 12, same being a provision fixing the limit of cost for the erection of a United States custom-house building at Boston, Mass.

N. B. SCOTT,
P. J. MCCUMBER,
Managers on the part of the Senate.

RICHARD BARTHOLDT,
EDWIN C. BURLEIGH,
WILLIAM G. BRANTLEY,
Managers on the part of the House.

Mr. SCOTT. I ask for the adoption of the report.

The VICE-PRESIDENT. The Senator from West Virginia asks that the Senate consider the report. Is there objection?

Mr. CLARKE of Arkansas. I object. I have no objection to voting on a motion to proceed to the consideration of the report, but I decline to give unanimous consent. That is the procedure we have adopted to-day. I will state to the Senator from West Virginia that in the result he will get all he wants, and it is consistent with what we have heretofore done.

Mr. SCOTT. I have been out on conference committees to-day trying to earn my salary. I was not aware that we were engaged on a filibuster. I move that the report be taken up for action.

Mr. CLARKE of Arkansas. I do not think the Senator from West Virginia——

The VICE-PRESIDENT. The motion is not debatable. The Senator from West Virginia moves that the Senate proceed to the consideration of the conference report.

Mr. CLARKE of Arkansas. I call for the yeas and nays on the motion.

The yeas and nays were not ordered.

Mr. CLARKE of Arkansas. I wish to give notice in this connection that if that occurs again I shall abandon the matter now under consideration. If the Democrats are not sufficiently interested in the measure before the Senate to stay here and exercise their constitutional rights they must adopt some other method of getting what I conceive to be justice for their section and their cause.

The VICE-PRESIDENT. The Chair will again put the question. Is there a second to the demand for the yeas and nays?

The yeas and nays were ordered; and, being taken, resulted—yeas 66, as follows:

YEAS—66.

Bailey	Depew	Hopkins	Piles
Bankhead	Dick	Johnston	Rayner
Beveridge	Dillingham	Kean	Richardson
Bourne	Dolliver	Kittredge	Scott
Briggs	du Pont	Knox	Simmons
Brown	Elkins	La Follette	Smith, Md.
Bulkeley	Flint	Lodge	Smith, Mich.
Burkett	Frazier	Long	Stephenson
Burrows	Frye	McCreary	Stone
Carter	Fulton	McCumber	Sutherland
Clapp	Gallinger	Money	Taylor
Clarke, Ark.	Gamble	Nelson	Teller
Clay	Gary	Overman	Warner
Crane	Guggenheim	Page	Warren
Culberson	Hansbrough	Paynter	Wetmore
Cullom	Hemenway	Penrose	
Cummins	Heyburn	Perkins	

NOT VOTING—26.

Aldrich	Curtis	Hale	Owen
Ankeny	Daniel	McEnery	Platt
Bacon	Davis	McLaurin	Smoot
Borah	Dixon	Martin	Taliaferro
Brandegee	Foraker	Milton	Tillman
Burnham	Foster	Newlands	
Clark, Wyo.	Gore	Nixon	

So the motion was agreed to; and the Senate proceeded to the consideration of the conference report.

The VICE-PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

Mr. SCOTT. I move that the Senate further insist upon its amendments in disagreement and ask for a further conference with the House thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed as the conferees on the part of the Senate Mr. SCOTT, Mr. MCCUMBER, and Mr. CULBERSON.

REVISION OF THE PENAL LAWS.

Mr. HEYBURN. I move that the Senate proceed to the consideration of the conference report on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

Mr. CLARKE of Arkansas. On that motion I call for a division.

The VICE-PRESIDENT. On the motion of the Senator from Idaho [Mr. HEYBURN], the Senator from Arkansas [Mr. CLARKE] demands a division.

Mr. CULBERSON. Mr. President, what is the motion of the Senator from Idaho?

Mr. HEYBURN. To proceed to the consideration of the conference report which we have had under consideration—on the criminal-code bill.

Mr. CULBERSON. Is it on motion? Are we proceeding now on motion or by unanimous consent?

The VICE-PRESIDENT. On motion. The Senator from Idaho has moved that the Senate proceed to the consideration of the conference report.

Mr. CULBERSON. I submit, under subdivision 3 of Rule VII, the question of whether or not that motion is in order.

The VICE-PRESIDENT. The Chair is of the opinion that the motion is in order under Rule XXVII.

Mr. CULBERSON. We have had no morning business, Mr. President.

The VICE-PRESIDENT. The Chair is of the opinion that the consideration of a conference report is in order. The motion is not debatable.

Mr. BEVERIDGE. A division has been called for.

The question being put; there were, on division—ayes 33, noes, 0.

Mr. CLARKE of Arkansas. I suggest the absence of a quorum.

The VICE-PRESIDENT. The Senator from Arkansas suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll; and the following Senators answered to their names:

Aldrich	Clay	Johnston	Piles
Bailey	Cullom	Kean	Rayner
Bankhead	Cummins	Kittredge	Richardson
Beveridge	Depew	La Follette	Scott
Bourne	Dolliver	Lodge	Smith, Md.
Brandegee	du Pont	McCreary	Smith, Mich.
Briggs	Flint	McCumber	Smoot
Brown	Foraker	Money	Stephenson
Bulkeley	Fulton	Nelson	Sutherland
Burkett	Gamble	Owen	Teller
Burrows	Gary	Page	Warner
Carter	Guggenheim	Paynter	Wetmore
Clapp	Heyburn	Penrose	
Clarke, Ark.	Hopkins	Perkins	

The VICE-PRESIDENT. Fifty-four Senators have answered to their names. A quorum is present.

Mr. HEYBURN. I now renew my motion, that the Senate proceed to the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

The motion was agreed to.

The VICE-PRESIDENT. The Secretary will resume the reading of the conference report.

The Secretary resumed the reading of the conference report, and proceeded to read section 219.

Mr. CLARKE of Arkansas. Mr. President, may I not inquire if the Secretary has not made a mistake in starting at section 219 instead of section 209? That section is found on page 109 of the printed bill.

The VICE-PRESIDENT. The Secretary will resume the reading of the amendment at section 209.

Mr. TELLER obtained the floor.

Mr. ALDRICH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Rhode Island?

Mr. TELLER. Certainly.

COMPENSATION OF CUSTOM-HOUSE OFFICIALS.

Mr. ALDRICH. I present a conference report.

The VICE-PRESIDENT. The Senator from Rhode Island presents a conference report, which will be read.

The Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 21003) fixing the compensation of certain officials in the customs service, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment as follows: Strike out all of the matter inserted by said Senate amendment and insert in lieu thereof the following:

"That the Secretary of the Treasury be, and he is hereby, authorized to increase and fix the compensation of laborers in the customs service, as he may think advisable, to a rate not exceeding eight hundred and forty dollars per annum.

"SEC. 2. That the Secretary of the Treasury be, and he is hereby, authorized to increase and fix the compensation of inspectors of customs, as he may think advisable, not to exceed in any case the rate of six dollars per diem, and in all cases where the maximum compensation is paid no allowance shall be made for meals or other expenses incurred by inspectors when required to work at unusual hours.

"SEC. 3. That the Secretary of the Treasury be, and he is hereby, authorized to increase and fix the compensation of deputy collectors, assistant appraisers, and examiners of merchandise, examiners of tea, and examiners and special examiners of drugs, in the customs service, as he may think advisable, not to exceed in any case three thousand five hundred dollars per annum.

"SEC. 4. That the Secretary of the Treasury be, and he is hereby, authorized to increase and fix the compensation of deputy naval officers and deputy surveyors of customs, as he may think advisable, not to exceed in any case three thousand dollars per annum.

"SEC. 5. That section 2746 of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows, to wit:

"'SEC. 2746. An additional compensation of 25 per centum may be continued, at the discretion of the Secretary of the Treasury, to the appraisers, deputy collectors, deputy surveyors, deputy naval officers, and weighers at the port of San Francisco: *Provided, however*, That the compensation so fixed shall not exceed the maximum amounts fixed by law.'

"SEC. 6. That the Secretary of the Treasury be, and he is hereby, authorized to increase and fix the compensation of assistant weighers in the customs service as he may think advisable, not to exceed in any case the rate of $4 per diem.

"SEC. 7. That hereafter the salary of the Treasurer of the United States shall be $8,000 per annum.

"SEC. 8. That all laws and parts of laws inconsistent with this act are hereby repealed."

And the Senate agree to the same.

NELSON W. ALDRICH,
EUGENE HALE,
H. M. TELLER,
Managers on the part of the Senate.

SERENO E. PAYNE,
JOHN W. DALZELL,
Managers on the part of the House.

Mr. ALDRICH. I ask for the adoption of the conference report.

The report was agreed to.

REVISION OF THE PENAL LAWS.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2982) to codify, revise, and amend the penal laws of the United States.

Mr. TELLER. Mr. President, it seems that there will be no pressing business before the Senate for a day or two, except the pending matter, and it is quite apparent that for an hour or two great progress is not to be made with the present order. I am therefore going to avail myself of the universal privilege of the Senate to make some remarks on this bill, but not about the bill. I want to submit very briefly some ideas and questions concerning the Panama Canal, of which we hear so much of late. I am inclined to do this because of the message that the President of the United States sent us a few days ago.

When the President-elect returned from Panama a few days since the President of the United States sent us a message, accompanied by the report of the engineers whom he had sent down to investigate, or, more properly speaking, whom he had sent down there to report in favor of the system that is at present in operation.

I am not going to say anything very interesting, I know, but I am going to say what I have to say, because I shall have no opportunity to say it after a few days. I am going to say it so as to put on record my judgment and my opinion as to this project. I have been familiar with it for many years, and I believe we have reached a point where every American citizen, who has any influence at home or abroad, in his own neighborhood or in national affairs, ought to do whatever he can to right what I think is a great mistake of the Government of the United States.

I have not the time to expatiate on the importance of this work, nor have I the time to take up its history, although it is an exceedingly interesting one, and to consider it as I would

if we were in the first part of the session. I feel constrained to make my remarks as simple, plain, and limited as possible.

The President in his message of February 17 says, speaking of this report:

> In fact, this report not only determines definitely the type of canal—

I supposed Congress had done that—

> but makes it evident that hereafter attack on this type—the lock type—is in reality merely attack upon the policy of building any canal at all. The board of engineers who signed this report are, of all the men in their profession, within or without the United States, the men who are, on the whole, best qualified to pass upon these very questions which they examined. I commend to you the most careful consideration of their report. They show that the only criticism that can be made of the work on the Isthmus is that there has sometimes been almost an excess of caution in providing against possible trouble. As to the Gatun dam itself, they show that not only is the dam safe, but that, on the whole, the plan already adopted would make it needlessly high and strong, and, accordingly, they recommend that the height be reduced by 20 feet, which change in the plans I have accordingly directed. Every American citizen should feel not merely gratification, but a very keen sense of pride in the statement made by this distinguished body of engineers as to the way in which the work has been done and in which it is now proceeding. The American people are to be heartily congratulated on everything of importance that has been done in connection with the building of the Panama Canal.

Mr. President, that is a challenge to every man who has not been in favor of the lock type of canal. If I had the time to take up the history of this work under the present administration I probably would consume a couple of hours or more. I have not so much time, but I shall touch upon the subject generally.

We all know that the world has long entertained the project of a waterway connecting the Pacific and the Atlantic oceans. Soon after the discovery of America the proposition was made, and later—possibly in 1815, or thereabouts—had there not been a revolution in the Spanish-American colonies in South America such a canal would have been attempted.

I think I may say that there never was a project to construct any other kind of a canal across the Panama Isthmus than a sea-level canal. There was a project for a canal at Darien, which was to be a sea-level canal. There was a project for a Nicaraguan canal, which was to be not a sea-level canal, but a lock canal. On various occasions I have expressed my opinion in this Senate on the propriety of constructing a lock canal on the Nicaraguan route, and, for fear I may forget it, I want to say now that if the first bill that came into the Senate providing for an interoceanic canal had been adopted and there had been a canal constructed such as I have described, there would not be one-half of the battle ships of the world that could get through it and a very considerable number of commercial ships would be in the same position.

In 1879, the most distinguished engineer then living, and so recognized in the world, Ferdinand de Lesseps, called a general convention of engineers from all parts of the world. I think he had in the neighborhood of a hundred engineers present at Paris, of which the largest number were those from the various countries of Europe. Some of them were Americans. They discussed for several days the character of the canal which should be constructed. I think it was generally conceded that it should be at Panama. The European engineers practically unanimously agreed that it should be a sea-level canal. I have not looked at the proceedings in twenty years, but I have a very distinct recollection that when the American engineers passed upon it they favored a lock canal simply on the question of expense. They said the lock canal was the cheaper canal of the two, which is yet to be determined, but that the sea-level canal would be so expensive that it could not be built.

Practically all the European engineers voted for the sea-level canal, and on the 1st day of January, 1880, Ferdinand De Lesseps, having landed a day or two before on the shores, opened the work on the canal. He brought with him some of the most distinguished engineers of Europe. He brought with him his family. It was a great affair. We were promised then that the canal would be speedily built.

I desire to say with all respect to these great engineers, that very few of them had ever seen the canal; very few of them knew what it would cost; very few of them knew how much work there was; and they estimated the entire cost of the canal as a sea-level canal at $140,000,000.

It was being built by a French corporation, of which Mr. De Lesseps was the head. They called on the French people mainly for their support. They worked it until 1889. I believe they calculated that the time would be somewhere between twelve and fifteen years. At that time, 1889, the corporation went into bankruptcy, and the work was discontinued. It was discovered that they had expended two hundred and sixty-two millions, I think, to be accurate, on the canal. The report of the engineers was that one-fifth of it had been completed. You can see that if one-fifth of it had been completed and had cost $260,000,000, it would practically be a prohibitory canal. But they had not spent all their money on the canal. They had spent much of it in a way that was not creditable to them; it ended in a great scandal; and the great engineer became a convict under the laws of France, and his last days were covered with darkness and disgrace.

Early in the history of this country we had people who went to Panama and made an examination of the line, and made an examination of the Darien line and the Nicaragua line, and their reports came here frequently. I am not able to give the exact date, but after I came into the Senate I remember very well the Maritime Canal Company, of New York, was organized, with a former Member of this body as its president, and prominent men connected with it; and they commenced work on the canal.

From that time on I have been pretty familiar with the project of a canal. On various occasions the canal proposition came before the Senate, and I believe every time it came before the Senate and there was a vote on it, it was in favor of it. There was the Nicaragua route. We had the estimate of a certain engineer who was very active at that time that the expense of the canal would be $62,000,000. This estimate was submitted to a board of American engineers, and they determined that they would add about $14,000,000 to that estimate. Subsequently another board passed upon it, and they added something to the estimate. Finally the canal company gave out to the public that it would probably cost in the neighborhood of $100,000,000 to build a lock canal, with locks 650 feet long and about 80 feet wide. It can be readily seen if we had built that kind of a canal there would not have been very much profit in it.

Before I pass to some other question, for fear I may forget it, I desire to call the attention of the Senate to the character of the canal now building. I can prove that it has been one kind of a canal one day and another kind of canal another. I believe they have now determined that the locks shall be 1,000 feet long and 110 feet wide. A man does not need to be an engineer to realize that the locks control the capacity of a canal. If the locks are too small for ships, ships can not get through, and I suppose I need not say that when the locks are once established they must remain until at least there shall be a change in the ideas about this matter, and we shall perhaps abandon the work already done. But I do not suppose that will be done for many years.

The Suez Canal to-day is double the capacity both in its width and in its depth nearly, that it was when it was first started. That is a canal without locks, the capacity of which they could increase without detriment to the commerce going through it. When you have a canal once established with locks, that governs the capacity of the canal.

Now, I wish to come back to the change of attitude on the part of the Government of the United States as to the canal. Every measure we passed through the Senate was for the Nicaragua Canal. Those bills never got through the House, and it was fortunate for us they did not. Possibly it may be unfortunate, for while we might have wasted a good deal of money on the Nicaragua route, perhaps we would not have wasted as much money as we shall waste at Panama; and if we are to have a lock canal it would be just as well to have it at Nicaragua as at Panama, practically.

Within the last year some time—less than a year ago—the Naval Board of the United States concluded that the canal was not being built big enough; that the locks ought to be longer and wider; and the Canal Commission concluded that, although they said most emphatically they did not think it was necessary to make them any longer or wider, they would make them longer and wider, and the President accordingly made the order that they should be made longer and wider—one a thousand feet long and 110 feet wide. We were told when they did that it was the last plan, and it was not necessary to make them any bigger.

The White Star Line to-day is building a ship at Belfast that is to be 1,000 feet long and a hundred feet wide. The White Star Company has determined to build a commercial ship of that type every year until it gets such a fleet as it wants. Does anybody here suppose that a ship a thousand feet long can pass through these locks? It is utterly impossible for it to do so. You must have some lee room at the end going in. You can not put a ship a thousand feet long into a thousand-foot lock.

Mr. President, I do not remember the exact date, but we passed a bill through this body which has been called the "Spooner Act" for the taking of this property from the French company. I presume the Senator from South Dakota can give me the date.

Mr. KITTREDGE. The date of the approval of the act was June 28, 1902.

Mr. TELLER. That act provided that the locks and the canal should be big enough to accomodate the commerce of the world.

If I may be allowed to stop for just a moment on that, I want to say that when the French company failed the Government of France proposed to take up this question and build the canal. I state what I know when I say that this Government then in a diplomatic way notified France that the company which had failed or any other private corporation might build the canal, but that no nation would be allowed to do it.

Mr. MONEY. Will the Senator from Colorado permit me?

Mr. TELLER. Certainly.

Mr. MONEY. Did not the Secretary of State also announce at that period to the courts of France and England that whoever built it, the canal would be considered a part of the coastline of the United States?

Mr. TELLER. Yes; he did that beyond question. We said to the world, when the greatest corporation ever formed at that time in Europe had failed and gone into bankruptcy, "You may build the canal by a corporation, but no nation shall build it. If it is to be built by any nation, we reserve the right to build it ourselves."

That put an obligation upon us to build a canal that would accommodate the commerce of the world. There was not a man in the Senate, in my judgment, who voted for the Spooner amendment who expected that he was voting for a lock canal—not one. I made some remarks, to be found in the RECORD, and I stated before voting on the bill that the world demanded, if we had a waterway across the continent, that it should be capacious enough to do the business of the world, and that I believed the only canal that would do that was a sea-level canal, and therefore I voted for the purchase of the Panama Canal, or the place to put a canal, because it was not much of a canal.

Everybody was for a sea-level canal. The present Executive was for a sea-level canal. The Senate was for a sea-level canal. The President-elect was for a sea-level canal, and so expressed himself on various occasions. The present Executive made a call, through the diplomatic branch of the Government, upon England, Germany, France, and Holland. He said to those governments, through the State Department, send us the main, the best, the most prominent and able engineers in your country. They sent over here four of those men, one from each country. They had the reputation, at home, of being the greatest engineers in that section of the world. One other man came with them. Just how he came I have never known. But he was a man who had been the chief operator and the chief constructor of the enlarged Suez Canal. He came, too.

The President of the United States assembled a lot of American engineers, to the extent so that the board, on which there were 5 foreigners, had on it 13 engineers. Some of them were noted engineers, but not all of them. I speak of the American engineers. After they had considered the question 8 of them determined that the only canal that ought to be constructed was a sea-level canal. The President of the United States set aside the majority and took the minority report, which was made by five members. Two of those members had been open and public advocates of a lock canal for many years. It was still to be left to the Senate and the House of Representatives what should be the character of the canal.

The bill passed the House of Representatives and came to this body. I do not make any mistake when I say that the bill as it came to this body had the support for a sea-level canal of a very decided majority of the Senate. We expected to amend the bill by making it a sea-level and not a lock canal. The Senator from South Dakota [Mr. KITTREDGE] was the acting chairman of the committee on this matter. I do not know but that he was the actual chairman at that time. At all events, the committee took much testimony of engineers, of shipping men, and the great majority of the engineers who came before the committee were in favor of a sea-level canal. Every single shipping man, I venture to say, declared for a sea-level canal and not a lock canal. If I am wrong about that, any Senator can correct me, because I have always understood that the unanimous voice of the shipping men of this country was for a sea-level canal.

In some way and somehow—I am not going into that matter—the Senate, by a bare, meager majority, voted, to the surprise of a great many, for a lock canal. We entered upon the lock-canal business. We made the time in which the canal should be built very short, and the cry was "Make the dirt fly."

This is an undertaking such as the world never saw before. There were more engineering difficulties to contend with than in any other enterprise ever undertaken by the human race. While there have been other canals built—like the Suez Canal, the Corinth Canal, the Manchester Canal, and the Kiel Canal—they were insignificant and of no consequence as compared with this canal. The Suez Canal was a dirt canal. Neither was it the first canal built across that country. More than five hundred years before Christ the Egyptians had built a canal from the Nile to the Red Sea, and it was kept up until at least the early part of the tenth century. Nebuchadnezzar is supposed to be the person who built a canal from somewhere in the vicinity of Babylon to the Persian Gulf, 500 miles, four or five hundred years before Christ. So canals are not new. Canals are probably about as old as the race.

We very strangely said that we would turn this whole thing over to the Executive; that he should build such a canal as he wanted. But we specified that it should be a canal that would meet the requirements of commerce, and such a canal was provided in the Spooner Act.

Now, what was done, Mr. President, when these engineers and when the Executive changed the type of the canal and when the Senate of the United States charged what should be the character of the canal? The other day the Senator from South Dakota [Mr. KITTREDGE] prepared and handed in to the Senate a small report on this canal, and to save time I am going to have it put in my remarks without reading.

The VICE-PRESIDENT. Without objection, permission is granted.

Mr. TELLER. I would rather have it put in at the end of my remarks, as I have some other papers of the same character that I wish to present.

The VICE-PRESIDENT. Without objection permission is granted.

Mr. TELLER. Mr. President, I can not state how many times this canal system has been changed, but I will say that on an average it has been changed every six months since we started to build it. We have had locks at this place and locks at the other place, dams at this place and dams at the other place. Every time the engineers told us, and the President backed up their report, that this was the favorite and proper place to build the canal. Six months afterwards, and sometimes there were not six months between the changes, they changed some part of the canal. If they did not change the locks, they changed the dams. They started the canal with the idea that there must be at Colon a breakwater that should cost $5,000,000. They abandoned that. They were to have a dam at Bohio. They abandoned that. They were to have locks at La Boca, and said there was no question about it; that that was the place to put the locks. They have abandoned that also. The advocates of the change said that it was best to change it, because the locks were too near the Pacific coast and there was danger from a hostile fleet. Mr. President, they ought to have thought of that when they were first determining that it should be there. I will show by the statement of the head of the department down there, Mr. Goethals, that he found it was not a place where a dam could be put and he abandoned it, not because he was afraid of Japan or some other country, but because he knew that a dam at that point would be a failure.

They were to have a canal with a few locks; I do not know how many. The last time I looked over the report of the Isthmian Canal Commission they had 16 locks at one place and another on the canal. I suppose they went upon the theory that the more locks there are in a canal the better the canal is.

We had a man in charge of the canal heralded as a great engineer. I believe he had been a railroad man some time in his day. He had probably run a railroad across the prairies in the West. He came before the committee. I state what I have seen in the record. When he said they ought to have a lock canal, and it was said to him, "I suppose you favor that on the ground of economy," he said:

> No, no; I would rather have a lock canal if it cost the same as a sea-level canal than to have a sea-level canal.

That is the class of men the President of the United States relies upon to expend at least six or eight hundred million dollars of our money.

As to the changes in the canal, I will read only a part of the paper I will put in in connection with the report. This is the Canal Record that I have before me, the official publication of the Government of the United States. I am going to read only an extract, and then I will ask to have it all put in. This is what Mr. Goethals said December 9, 1907:

> The adopted plan for the building of the Panama Canal contemplates the formation of a lake on the Pacific side by the construction of three earth dams (Sosa-Corozal, Sosa-San Juan, and Corozal Diablo), the differences of level between the lake and the Pacific being overcome by a flight of two locks projecting into the Pacific on the west side of Sosa Hill.

That has been abandoned since, and they have built one on the other side.

> The board of consulting engineers that accompanied you to the Isthmus in April last—

Remember that this was in 1907.

Mr. KITTREDGE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from South Dakota?

Mr. TELLER. Certainly.

Mr. KITTREDGE. Before they finally abandoned the dam at La Boca and the other dams mentioned, they had changed their plans from 3 dams on the Pacific side to 2 dams, and then they finally abandoned the La Boca dam altogether and dropped back in the interior to dams at Corozal and Pedro Miguel.

Mr. TELLER. That is a fact. I have not had time to go into the details of their changes. Any Senator who chooses to look over the records of the Canal Commission will find, as I said, that they changed every six months, and sometimes as often as every three months, in some feature of the canal, and after they had pronounced the original canal they planned as a faultless canal.

The board of consulting engineers that accompanied you to the Isthmus in April last, inspected the sites of the dams, as finally located, with the view to outlining a detailed description of the preparation of the foundations for the structures to be erected, reporting thereon as follows:

The borings showed so-called "mud" in the swampy portion having a depth of 8 or 10 feet. This material is firmer than we had expected—

They are almost always finding something better than they expected and then later they find it is a little worse than they expected.

And at the time of our visit, about two days after it had been flooded by spring tides, it could be walked on in most places.

I think a man does not have to be an engineer to know that that is a very unstable structure upon which to put a dam.

For the dam construction * * * we do not think it will be necessary—

This is the report of the engineers, "Special report of the chairman of the commission to the Secretary of War, recommending locks and dams at Miraflores instead of at La Boca"—

to remove the soft material at either of the places (Sosa-Corozal, Sosa-San Juan). The very softest material will either be displaced or consolidated by the material disposed on it. We do not think the amount displaced beneath the impervious portion of the embankment will be great, and if compressed in place the material will be impervious.

As regards the character of the material that should compose the body of the structures, the same board reported:

For the Sosa-Corozal and La Boca dams the bottom width of the impervious portion should not be less than would result from a top width of 80 to 100 feet at 15 to 20 feet above the water level in the lake, with slopes not steeper than 1 on 4 to 1 on 5. The resulting width at sea level would be 640 feet or more. The comparatively small cross section suggested for the impervious portion of each of the Pacific dams is permissible only if it is reenforced by wide and heavy rock embankments on both sides * * *. On account of the nature of the bottom on which this rock fill will be deposited for the dams on the Pacific side, it should extend a long distance outside of the impervious portion, in accordance with the principle adopted for the La Boca dam by the minority of the board of consulting engineers in 1905–6 of spreading the base on soft bottom so that the change in weight imposed on the foundations from the toe toward the crown will be gradual. This protection at the Sosa-Corozal and La Boca dams may be given great width with economy, since they will afford convenient dumps for the Culebra material.

I will put it all in the RECORD. I do not intend to say very much, but I wish to call attention to what already happened. This is Mr. Goethals's report:

To construct the dams in accordance with these views, trestles were built along the toes of the Sosa-Corozal dam, from which to dump material from the Culebra cut. The trestles failed, after the dumping of the material from them began, and the material overlying the rock moved laterally, carrying the superimposed mass with it, the dumps flattening out until the side slopes were about 1 on 12 and even less. In places this lateral motion continued for two weeks after dumping had stopped. The ground on either side of and at some distance from the dump was forced up, forming mounds of mud, the crests of which gradually approached the level of the top of the dump proper. After an equilibrium was established between the dump and the adjacent mounds the hump or wave would again move out when the track was shifted toward it, accompanied by a sudden vertical settling of the track of 6 to 10 feet when loaded trains were applied. It was thought that if the trestle were lower better results might obtain; but with the west trestle only 8 feet above the surface of the ground and the piles driven to rock, similar failures followed.

They did not drive it to rock; that was the trouble.

When the difficulties on the east trestle developed, an investigation, by boring and test pits, was made to determine the character of the material overlying the rock. It was found to be for the greater part an unctuous blue clay, without grit, possessing but little supporting power, instead of stiff clay, as indicated on existing profiles.

The investigations clearly demonstrate that the construction of dams which would remain in place after the lake is filled can be accomplished only by the removal of all material overlying the rock and, after preparation of the rock surface, by building the dams of selected material.

Any engineer of ordinary ability, of ordinary education, and ordinary experience ought to have known that that material would not stand and that it was not a stable foundation for a dam. Yet, Mr. President, these are the men the President speaks of with so much confidence and says their dictum that the dam is safe should be accepted by all men, engineers and laymen alike.

The depth to which the material will have to be removed is from 10 to 70 feet, and suitable material for dam construction will have to be transported to the site. Investigations of the foundations of the Sosa-San Juan dam show that the material is the same; the difficulties to be encountered will be greater because of the river.

Mr. BEVERIDGE. May I ask the Senator a question?

Mr. TELLER. You may.

Mr. BEVERIDGE. The Senator has just been reading about the depression in the Gatun dam; is it not?

Mr. TELLER. No; it is the La Boca dam.

Mr. BEVERIDGE. Was there any pressure of water back of it at the time the depression occurred, or did it just sink of its own weight?

Mr. KEAN. Mr. President, it is impossible to hear the Senator from Indiana or the Senator from Colorado on this side.

Mr. BEVERIDGE. I was just asking a question for information.

Mr. TELLER. I will answer the question. I understand that the place where the dam was proposed to be built was a swamp. That is all there was of it; it was a swamp. What the pressure may be back of it, I do not know. When I come to speak of the lower dam, I will call the attention of the Senator from Indiana to the material of the dam and the water filtering through it.

Mr. President, without keeping the Senator waiting, I simply want to say that they have changed the dams and the locks again. They had changed them once or twice before. Now there is another change. I am going to put this matter in the RECORD. It is good reading, and it is not ancient history, either.

Mr. HOPKINS. Mr. President, may I ask the Senator from Colorado a question?

Mr. TELLER. The Senator can.

Mr. HOPKINS. Is it not a fact that the general plan for a lock-level canal has been maintained from the first, and that any changes have been of minor detail which the experience there has shown would be beneficial to the general plan that was settled upon by the commission of engineers?

Mr. TELLER. That is not the fact.

Mr. HOPKINS. I will say to the Senator that that is my understanding, and I have given some thought and study to the subject.

Mr. TELLER. The general plan of a lock canal, of course, has been adhered to, but you have more locks than you ever anticipated having, and you have them in entirely different places. The bore of your canal is not what you have declared it should be or what you have settled on, and the width of your canal in places where you were going to have a lock is now curtailed. It is an entirely different canal from what the engineers laid down in the plan.

Mr. HOPKINS. The main dam, of course, is the Gatun dam. I understand that that dam is located where they originally planned it should be. These minor locks are a matter of detail to conform to the experience the engineers have had there in the construction of the canal on the original plan.

Mr. TELLER. The Senator asks leave to ask me a question, and I do not care about having him give me his views on the matter. I have only a short time in which to occupy the floor. I want to say that for three years after the canal was commenced nobody ever heard of a dam at Gatun. Bohia was the place where the dam was to be built, and we were told over and over again that they had found bed rock there.

Mr. HOPKINS. If the Senator will allow me, at the time I offered the substitute to the bill presented by the Senator from South Dakota, which provided for a lock-level canal, the plan then was to have the dam at Gatun. That was the legislation we had on the subject relating to the construction of a lock-level canal.

Mr. TELLER. I will deal with the Gatun dam.

Mr. HOPKINS. The plan was to have a dam at Gatun.

Mr. TELLER. The Senator will not be very proud of the Gatun dam when he knows the facts. If he does not know them he ought not to speak so confidently.

Mr. HOPKINS. Whether I am proud or not I will say to the Senator that all the engineers the President sent to Panama within a few months have confirmed the judgment of the engineers who placed the dam at this point.

Mr. TELLER. I shall have something to say about those engineers before I get through.

Mr. HOPKINS. If the Senator will allow me, I will state that Mr. Randolph, one of those engineers, lives in Chicago, and——

Mr. TELLER. I know him. I know who he is.

Mr. HOPKINS. I talked with him within a week, and in his conversation he confirmed everything stated in the report, and even more.

Mr. TELLER. That is in writing. The Senator does not need to tell to the Senate what is here in writing. I will put it in as a part of my remarks.

Mr. President, I am willing to be interrupted ordinarily in making a speech, but I am not going to be interrupted by a Senator who I think does not know any more about this matter than I do, because I do not want to bore the Senate. I am expecting every moment that a bill will be called up that will take me off the floor. I am making as much headway as I can.

Since we have struck the dams, although I have taken more time than I intended, I will talk a little about the Gatun dam. The Gatun dam site was examined carefully by engineers, American engineers and European engineers, and declared to be unsuitable by all of them at that time. It was then said that they had another place where they could get bed rock, and they claimed that at 128 feet they had struck bed rock. They had struck some floating bowlders in the mud. They brought up pieces of wood and all sorts of things, which showed that it was a wash from the hills. Later they concluded that the Gatun dam site was better than Bohia. So they moved down the river.

Mr. KITTREDGE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from South Dakota?

Mr. TELLER. I yield to the Senator.

Mr. KITTREDGE. Will the Senator permit me to make a short statement?

Mr. TELLER. Certainly.

Mr. KITTREDGE. The reason why the engineers abandoned the site at Bohio was due to the fact that upon a careful examination they ascertained that what they regarded in the first instance as a solid rock foundation were simply bowlders brought down by the drift of the Chagres River in the early days, and when they made further explorations they were unable to reach bed rock until the depth of 168 feet was reached. Therefore they were compelled to abandon Bohio, and then they adopted the other site.

Mr. TELLER. Then they adopted the Gatun dam. That is as I understand it. They were just as confident that Bohio was a proper site as they are now confident that Gatun is, and there is the same kind of material at one place as the other. The difference is so small that I do not believe it is worth taking into consideration.

Mr. HOPKINS. Will the Senator allow me there? I do not desire to interrupt him, but all the engineers claim that at Gatun they have a rock foundation. We have had before our committee borings showing the character of that foundation. When a number of the leading engineers were before the committee, engineers who had visited the Isthmus within the last few months, they said the foundation is even more solid than they found it at the time they made these borings. So there can not be any question of it at that time. I will say in answer to the Senator from South Dakota that at Bohio they go deeper than they first proposed, but the engineers even there could have constructed a dam. However, it was found more expedient and better for commercial purposes to have it at Gatun.

Mr. TELLER. Mr. President, the Senator from Illinois is the advocate of the lock canal. He has been filled up by the engineers who have gone down there to bolster up and make good the statement that they have made on former occasions.

I will call attention to the class of men the President sent down there. They were not disinterested men, but men who had declared over and over again for his lock canal. He did not pick out, and he will not pick out, any first-class engineers who have not been committed to a lock canal. I do not mean to say that there are not some good engineers who are in favor of a lock canal, but I do say that no good engineer ever went down there and examined that ground who did not say that the building of a dam is an experiment.

Mr. HOPKINS. But if the Senator will allow me——

Mr. TELLER. I mean except those committed to the lock canal.

The VICE-PRESIDENT. Does the Senator from Colorado yield further to the Senator from Illinois?

Mr. TELLER. I am not going to yield.

The VICE-PRESIDENT. The Senator from Colorado declines to yield.

Mr. TELLER. The Senator from Illinois can take the floor in his own right.

Mr. HOPKINS. I have not time to discuss it, but to many of the statements made by the Senator from Colorado I certainly disagree.

Mr. TELLER. The Senator can do so, because I disagree with his backers. I disagree with the men who say you can build a safe dam on a swamp. I say that no such dam was ever built, in the history of the world. I can show you many dams built on better foundations than that that have failed.

That is a matter of opinion, Mr. President. The Senator from Illinois is as confident of the canal as the President of the United States. He has the same reasons for it. He has heard the same statements. He has believed the same reports. I have not believed any of them. I know that those reports are not true. I know that there is not any foundation there that a reputable engineer ought to be willing to risk not a few million dollars but hundreds of million dollars, because upon the dam site at Gatun depends entirely the value of the canal. If it fails, your locks will be up in the air and will be of no advantage to commerce or to the world. This is an experiment upon which you are putting six or eight hundred million dollars when you could build a canal of a different type with less money.

Mr. President, I will not undertake to say what it would cost to build the canal. I do not believe anybody knows. I do not know that any examination was made that would justify a man in making a calculation any more than the French made when they said that $140,000,000 would build the canal. Our engineers, these same engineers that the Senator from Illinois is depending upon, made the proposition that $140,000,000 would do it, and then they made it $195,000,000, and $200,000,000, and so on.

Mr. KITTREDGE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from South Dakota?

Mr. TELLER. I yield to the Senator.

Mr. KITTREDGE. Will the Senator permit me to make an explanation concerning the Gatun dam, about which much has been said? The site upon which we are now building the Gatun dam has been condemned eleven times by boards of engineers, beginning with De Lesseps and ending with the board of engineers appointed by the President as a consulting board to advise Congress and examine concerning the type of canal to be constructed.

Mr. BEVERIDGE. When was that?

Mr. KITTREDGE. The report of that board of consulting engineers was made in 1905–6. I have it here.

Mr. TELLER. If the Senator has it there, I am entirely willing that he should put it into the RECORD.

Mr. KITTREDGE. I do not ask to put it in the RECORD. It is included in the remarks that I made concerning this subject on the 28th of May, 1906, and occupies about two pages and a half. I have no objection, however, to its going in.

Mr. TELLER. The Senator may put it in if he sees proper.

Mr. HOPKINS. Will the Senator from Colorado allow me a moment right there?

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Illinois?

Mr. TELLER. I will.

Mr. HOPKINS. I desire to say, Mr. President, that all of the information referred to by the Senator from South Dakota was before the American engineers when they settled upon the question of the dam at Gatun. They made examinations there, more in detail, more particularly, and more scientifically than were ever before made, and all of those engineers from that time to the present have simply confirmed what was reported by the engineers at that time. There is not an intelligent engineer who has investigated the subject since this report was made who takes issue with the engineers whose report is before the Senator from Colorado, a copy of which I hold in my hand. There can not be any question about the correctness of the statement that the Gatun dam is as solid as the Rock of Ages.

Mr. TELLER. I decline to yield to the Senator from Illinois, who is dealing absolutely in assertions.

The VICE-PRESIDENT. The Senator from Colorado declines to yield further to the Senator from Illinois.

Mr. FORAKER. Will the Senator allow me to ask him a question?

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Ohio?

Mr. TELLER. I do.

Mr. FORAKER. I have before me a report made by M. Bunau-Varilla before the Commercial Club of Boston only a few days ago, on February 25. In the course of his remarks, speaking

of the foundation of the Gatun dam, as I understand, he quotes from Colonel Goethals, in which he says:

> The rock of the upstream toe has sunk about 20 feet in height and 200 feet in length where it crosses the canal. In sinking it has squeezed out and pushed up the clay underneath.

I understand that in the construction of the Gatun dam it was provided that there should be a "toe," as it is called, constructed of stone at the base of the dam. The dam is half a mile broad, I believe, at the base, where the water is impounded. They commenced the work by constructing the toe of the dam, and when they got it 65 feet high it sunk down 20 feet for a distance of 200 feet.

Mr. BEVERIDGE. Why?

Mr. FORAKER. Because the foundation was of such a character, as he goes on to point out, that it would not sustain that weight. That seems important, Mr. President. This speech was handed me only this morning and I have been reading it as I have been sitting here in the Chamber to-day. I find it, to my mind at least, very instructive. I think the Senate and the country ought to have the benefit of it, and if the Senator does not object, I would like to have it printed in the RECORD, and will ask that it also be printed as a Senate document.

Mr. HOPKINS. Mr. President——

Mr. HALE. I ask the Senator——

Mr. TELLER. I decline to yield to the Senator from Illinois.

The VICE-PRESIDENT. The Senator from Colorado declines to yield. Is there objection to the request of the Senator from Ohio [Mr. FORAKER] that the document to which he refers be printed in the RECORD and also be printed as a public document.

Mr. HOPKINS. Mr. President, I dislike very much to object, but I think that statement ought not to go into the RECORD without a counterstatement going with it. I was not aware that this——

Mr. HALE. I call for the regular order, Mr. President.

Mr. HOPKINS. I was not aware that this debate was to come up this afternoon, or I would have had material here to have supported every statement made by the engineers on that subject.

The VICE-PRESIDENT. The Senator from Colorado [Mr. TELLER] has the floor.

Mr. FORAKER. Will the Senator bear with me for just a moment?

Mr. HALE. I ask for the regular order, Mr. President——

Mr. FORAKER. Mr. President, the Senator from Colorado, as I understand, was addressing the Senate on the conference report, which is before the Senate. I asked that I might interrupt him, and he granted me that permission, and until he complains, I decline to be stopped.

Mr. HALE. I have refrained from calling up the deficiency bill because I thought the Senator from Colorado desired to address the Senate. I held back the bill for that purpose; but, if I can get the leave of the Senate to take it up, I can not refrain from coming in if the whole time is to be taken up, not only by the Senator from Colorado himself, but by interruptions and discussing the whole question of the Panama Canal.

Mr. BEVERIDGE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Indiana?

Mr. TELLER. I do.

Mr. BEVERIDGE. The regular order, for which the Senator from Maine [Mr. HALE] calls, is at the present time the bill of which the Senator from Idaho [Mr. HEYBURN] has charge, upon which the Senator from Colorado [Mr. TELLER] is addressing the Senate.

Mr. HALE. But the Senator himself is on the floor.

Mr. BEVERIDGE. Yes; the Senator is. The regular order is what is now before the Senate.

Mr. HALE. And that is the Senator from Colorado?

Mr. BEVERIDGE. Yes.

Mr. TELLER. Realizing the great force of what the Senator from Maine [Mr. HALE] says and realizing that I was imposing on the committee, I was anxious not to be disturbed in the few remarks I was making. That is the reason I undertook to shut off the Senator from Illinois [Mr. HOPKINS].

Mr. FORAKER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Ohio?

Mr. TELLER. I yield to the Senator from Ohio.

Mr. FORAKER. Mr. President, I do not want to take the time of the Senate away from the consideration of the deficiency appropriation bill or any other bill that is reported; certainly I do not want to delay any of these matters; but I apprehend that the question which the Senator from Colorado [Mr. TELLER] is discussing is about as important as any other that is before the Senate, and even more important.

I do not know what ought to be the determination with respect to the Panama Canal. I only know, as I stated in the Senate some days ago, that I voted for a lock type of canal with some misgiving as to the wisdom of that vote. I have had that same misgiving ever since. I tried when there was an additional report made a few days ago to dismiss from my mind any further misgiving about it; but since then I have seen a number of facts stated in the press that have caused me to recur to that same state of mind. When I read this address made by Bunau-Varilla before the Commercial Club of the city of Boston only a few days ago—I read it here in the Chamber only this afternoon—my mind again went back, without any misgiving whatever, to the state of doubt, at least, in which it was before. I fear a great mistake will be made if the construction of a lock type of canal is insisted upon; but I am not prepared to discuss that and would not ask the Senate to bear with me that I might do it at this late day in the session; but I think the Senate ought to have the benefit of what this engineer has said. All that he says he backs up, it seems to me, with data that you will find conclusive in character, and I hope the Senator from Illinois will not object to this being put in the RECORD. If he should, I shall have to read it.

Mr. TELLER. I will put it in my speech.

Mr. BAILEY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Texas?

Mr. TELLER. Yes.

Mr. BAILEY. I should like to ask the Senator from Ohio if that is the same person who was the first duly accredited minister from the Republic of Panama to the Government of the United States?

Mr. FORAKER. I understand he is. I do not know what his standing ought to be, either as a minister or as an engineer, but I have always heard that he stands very high as an engineer throughout the world in the estimation of men who are competent to judge. At any rate, what he says here can not do anybody any harm, and it might do some good.

Mr. HOPKINS. Mr. President——

The VICE-PRESIDENT. Is there objection to the request of the Senator from Ohio?

Mr. BAILEY. I do not know how much of an engineer he is, but I think he is a most accomplished diplomat, for, as I understand, he is one of the few men who has had his credentials cabled to him.

Mr. FORAKER and Mr. HOPKINS addressed the Chair.

Mr. TELLER. I think I have the floor, but I yielded to the Senator from Ohio.

The VICE-PRESIDENT. The Senator from Colorado has the floor.

Mr. HOPKINS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Illinois?

Mr. TELLER. I do not yield to the Senator from Illinois.

Mr. HOPKINS. The Senator from Illinois is not asking the Senator from Colorado to do so.

The VICE-PRESIDENT. Senators will be in order.

Mr. FORAKER. If my request is not in order, I will hand the paper to the Senator from Colorado. He is making a speech and he can read it as a part of his remarks. It is more important than anything in regard to the deficiency bill or anything else.

Mr. HOPKINS. That ought not to go into the RECORD——

Mr. TELLER. I decline to yield.

The VICE-PRESIDENT. The Senator from Colorado declines to yield.

Mr. TELLER. I want to say a few words about the engineers who sent up the report the other day.

Frederic P. Stearns is the engineer who built a dam not far from the city of Boston, about which he boasted as being the type of dam to be built at Gatun. It was said that the dam at Gatun was going to be of that exact type. He built the Boston dam on ground where the conditions were infinitely better than at Gatun, but before it was filled with water, when it lacked 23 feet of having the water that it was capable of holding under his plans, 600 feet of the wall caved in. Had the dam been full, there would have been the absolute destruction of the dam and the town that lay under it. That is the man on whose statement the Senator from Illinois says the foundation is as solid as a rock.

Mr. Isham Randolph is an engineer of distinction in the city of Chicago. He has been committed to the lock plan of canal for years and was a member of the board of consulting engi-

neers. Why did the President send him down to Panama if he wanted to get the facts? He sent him down there because he wanted to get somebody to bolster up the present plan.

Mr. John R. Freeman comes from Rhode Island. I do not think he stands very high in the engineering profession of the world. These men are not amongst the selected engineers of this country. They are not those that the profession recognizes as engineers of high grade, and I doubt whether two or three of these men are engineers at all. If they are, I never heard of them as engineers, and I have a pretty fair knowledge, and have had for twenty-five years, of the engineers of this country who have distinguished themselves in any branch of engineering.

Mr. FORAKER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Ohio?

Mr. TELLER. I do.

Mr. FORAKER. If the Senator will allow me, I wish to ask him if it is not true—I ask simply for information—that all three of the engineers whom he has just named were known to be advocates of the lock type of canal before they went there?

Mr. TELLER. Absolutely. There was no man sent down there who did not go there pledged to a lock canal or who was not selected to go there by those who were committed to such a canal. I believe one or two members of that board are not engineers at all. As I have said, I have been pretty familiar with the engineers of this country, and I consulted a very prominent engineer the other day, who told me that he had never heard of them in the profession. I consulted one of the most noted engineers of the American Continent, and he said he never had heard of them.

Mr. President, of course these engineers were sent to Panama for the purpose of finding that the dam was safe. Let us look at it for a few moments. I will ask the Senator from Maine to give me a few minutes before he proceeds with his bill. I am not asking for the privilege, but I do not want to keep him waiting too long.

What is the condition of the Gatun dam? There is at that dam at least 168 feet of swamp. There are two gorges that go through that dam. That material is the same to the depth of nearly, if not quite, 300 feet. The report shows that when they went down below 30 feet as a rule they found artesian wells and artesian water. In the pits they dug it was true that the water was circulating at the surface as well as below.

It is well known to the engineers how much water falls on the watershed of the Chagres River. They know how much runs down the river; they know how much is evaporated and goes off into the air. Practically almost as much goes under the swamp as goes down the river.

I have here the report of the Isthmian Canal Commission, but I will not stop to read it. They make a very astounding and very wise statement. They say that water primarily falls from the clouds. I guess that is so. [Laughter.] I have always supposed that to be true. That is one of the things as to which I can agree with them. Water usually comes from the clouds. When it strikes the ground, sometimes it runs off in a river, sometimes it enters the ground, but it always goes out somewhere. There is a river running under the Gatun dam to-day that carries almost as much water as the Chagres River itself, which has been the great bugbear everybody has been afraid of.

There is no engineer in this country not connected with the administration of public affairs and possessing recognized character as an engineer who will stand before the Senate to-day and say that Gatun is a safe place for a dam. If that dam goes out, the whole canal will be ruined, no matter if you have spent $800,000,000 upon it. I do not mean to say that it would not be possible to reconstruct it; but if you did, it would cost as much more as the original cost. Why should the friends of the lock canal insist upon that type when it is believed by a great many engineers, at least, that you can build a sea-level canal for less than the lock canal now in process of construction? I only want to say a word or two about the locks——

Mr. TILLMAN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from South Carolina?

Mr. TELLER. I do not want to yield for a speech.

Mr. TILLMAN. I want to ask a question, if the Senator will give me some information.

Mr. TELLER. Very well.

Mr. TILLMAN. I want to know whether the plans which have been adopted contemplate the possibility of utilizing the work either for a sea-level or for a lock canal; in other words, there is talk about a lock canal and talk about a sea-level canal. If we should abandon the lock canal now, could we utilize some of the same cuts and places to hold water that have already been built or constructed or excavated, or would we have to go and begin de novo?

Mr. TELLER. No, Mr. President; practically all the expenditure on this canal, with the exception of that on the lock site, could be utilized. The work on the Gatun dam could not be utilized, but most of the other work could be utilized. I will ask the Senator from South Dakota [Mr. KITTREDGE] if that is not the fact? I so understand it.

We know something about dams in this country. There have been a great many dams constructed. Some of us may recollect the Johnstown disaster.

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Maine?

Mr. TELLER. I do.

Mr. HALE. I do not want to interrupt the Senator——

Mr. TELLER. I will say to the Senator that I will get through in a few moments. I do not mean that I will get through, but that I shall quit. [Laughter.]

Mr. HALE. Very well.

Mr. TELLER. This is a subject that I think any man who has studied it could readily talk for an entire day upon. If this was in the beginning of the session I should yield to the Senator, and resume subsequently; but as it is practically the last of the session, I will now continue and finish in a few moments.

Mr. HALE. I do not wish to interfere with the Senator.

Mr. TELLER. Mr. President, there are many objections that could be urged against this dam, and amongst others is the spillway. They selected a good place for the spillway; but if ever the dam gets full, the spillway is likely to go out.

I referred to the Johnstown dam. I want to speak of one or two other dams before I quit. The Johnstown dam went out, and to this day nobody knows why it went out. There had been as much water in the Johnstown dam repeatedly as there was at the time when the dam was swept away. About thirty years ago in Bristol, England, there was a reservoir to supply the town, which went out with great devastation and destruction of property and considerable loss of life. The best engineers of Europe were assembled to try to discover what was wrong about that dam. After weeks of attention and study and taking testimony, they said that the dam had been built according to the highest possible engineering standards. They found nothing to complain of in the dam, and yet the dam had failed. You can not tell what may happen to a dam. You can not tell what the trouble may be with the earth.

Mr. President, we were told some time ago that the Gatun dam would have an apron or shield, you might call it, to prevent the water from seeping through. That plan has been abandoned. They have found that the material for the dam is so solid and so impervious that they do not need anything of that kind, and yet they declared again and again that such an apron was to be constructed with cement and piles and other material, and if they could not do that other appliances would be used.

They propose to put this dam on the naked earth and take the chances; and since they have started it, as we have heard from the Senator from Ohio [Mr. FORAKER], the dam has been sinking, and it will continue to sink.

I only want to say a word or two about the locks. There is no pattern for the locks that they propose to build. No such locks have ever been built in the history of the world. They have not the character of foundation which I think they ought to have; and in that, I believe, I am supported by the best engineering talent on the American Continent. It is not my judgment, but the judgment of men who have been there to see it. I do not rely upon Mr. Randolph. I rely upon men whom I think have more knowledge than he, and who have not such relations with the transaction as to make them become the advocates of this particular system.

There is not a lock canal in the world that has been in operation for five years that has not had difficulty on account of its locks. They have had that experience in the Sault Ste. Marie Canal; they have had it in the Manchester Canal; they have had it in every country in the world where lock canals exist. The Kiel Canal and the Manchester Canal have had innumerable disasters. Perhaps a ship going into a lock could not be handled or controlled and would rush against the gates and tear them out. That is one of the dangers of a lock canal. If there is only one lock, it can be repaired; but with three locks, making a ladder 85 feet high—that is the height of the proposed lake back of the Gatun dam—if one of the gates is broken down by a ship, the whole system of locks is gone. That would be just as fatal as the breaking of the Gatun dam, but it would not be just the same.

Mr. President, these are things that I think American Senators and American legislators ought to consider. You may say we are a great, rich nation. We are. But we can not afford for

two reasons to build a canal that will be a failure. First, we can not afford the money. Secondly, which is of more importance to me and ought to be of more importance to the American people, we would be disgraced throughout the world. We have undertaken this as an enterprise of ours. We have said to the world, "Keep your hands off." Are we not under obligations to make such a canal as will accommodate the world's commerce? We are building it, not for ourselves, but for the world. We have not any use for it. In time of war we might send our ships through it, possibly. I doubt to-day whether if the canal was finished any Secretary of the Navy, if he had the time to send the ships around the Horn, would send them through the canal. He would not take the risk, because if the canal should break down with one of our ships it would entail a loss of five or six million dollars in a minute. You could not get the ship out. You could not make it useful. It would be gone forever.

What will the canal cost? Mr. Stevens, who was the engineer in charge at one time, said before the committee it would cost $300,000,000. We have spent now a large amount of money, and I do not suppose there is a man living, not even in the Senate, who can tell us what proportion of the canal is completed. Nobody can tell how much more it is going to cost. I think we are entitled to know how much more you are going to put in this scheme of a lock canal; and if you are going to build a lock canal, there are types better than this.

Engineers said to us over and over again, "You have made the cut at Culebra too narrow." The reply was, "Oh, no; we have it all right." The other day the incoming President, lately Secretary of War, went down there and said the cut must be widened a hundred feet. I approve of that. I think that is the wisest thing which has been done with respect to the canal for some time. Then he looked it over and concluded that there should be a breakwater at Colon, which had been originally planned and abandoned. Of course, it was abandoned in the interest of economy, to reduce the cost of the canal. He said there must be a breakwater. Every man who is acquainted with shipping knew that there would have to be a breakwater. The engineers did not abandon it. They simply deferred it. The incoming President said it would cost $10,000,000 to put in the breakwater. It will probably cost $20,000,000.

Here is $24,000,000 added by his visit to the canal, and yet the Senator from Illinois tells us that we should accept the opinion of the engineers, and their opinion was that we did not need a breakwater and did not need a wider cut. Their opinion was that we did not need a sea-level canal; that the locks need not be a thousand feet long or more than a hundred feet wide. The naval board said they ought to be a thousand feet long and a hundred and ten feet wide. The commission say in their report: "We did not think it necessary, but we will yield to the judgment of the naval board." They have cut and tried, as the expression is, not like engineers, but like laymen. How much will it cost?

Mr. President, the Senator from South Dakota calls my attention to the fact, of which I have a memorandum, that they are enlarging the Kiel Canal, and they are building their locks 147½ feet wide and we are building ours 110. The report of the engineer says that a 98-foot ship could pass through the canal. It might, possibly, but the chances are it would not. I stated when I began that the White Star Line is to-day building a ship 1,000 feet long and 88 feet wide. The ship men of the country predict that in a few years—thirteen years, one of them said—with the progress that has been made in shipbuilding, we will have ships a thousand feet long and 115 feet wide. Every battle ship will be longer than it is and much broader than it now is.

We are under obligations, not only to ourselves, but to the world, to build the locks so that they will be just as good for the commerce of fifty years from now as for to-day; and there is not a shipping man on the continent who will not tell you we will increase the length and width and depth of the ships. In a recently published statement, one of them said that if we go on in the way we have been going and increasing in the last ten years, in thirteen years we will have ships a thousand feet long and 115 feet wide. He had hardly made that statement before here comes the statement, well authenticated, that the White Star Line is building a ship a thousand feet long.

I called attention earlier, when I commenced speaking, to the fact that if the Nicaragua Canal had been built twenty years ago it would not be of much use now. If you build this canal, with the present limit of locks 1,000 feet and 110 feet wide, in a few years you will wish they were larger, and then it will be too late, because it will be impossible to move the locks inside a great length of time and without a great expenditure of money. I am not disturbed, however, so much about the money we are spending as I am that when we spend it we do not get anything in return. I think it should be the duty of this body to look into the matter and not leave it, as we have done, to engineers whose interest it is to support the canal that they decided on having simply because it was cheaper than the sea-level canal, when good engineers say the sea-level canal would be cheaper.

I am now going to give the Senator from Maine an opportunity to present his matter, not that I think I am out of order, because, by the rules of the Senate, I am strictly in order.

Mr. HALE. Certainly. The Senator is entirely in order.

Mr. TELLER. I do not want to interfere with appropriation bills. I know we are approaching the close of the session, and I therefore submit.

Before I leave the floor, is there any objection to putting in the RECORD some papers I have here? I intended to read them.

Mr. CULLOM. Put them in.

Mr. TELLER. If there is no objection, I will ask that they be printed in the RECORD.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and permission is granted.

Mr. FORAKER. I desire to say one word in answer to the Senator from Illinois [Mr. HOPKINS]. I have not offered any paper or any remark in any controversial sense. I think we ought to get all the information we can of every character in regard to this matter. It is not so important to me as it is to Senators who remain in the public service. I go out within a few days. They remain. If I were to remain here, I would get, and they ought to have, all the information obtainable, and I make the request for no reason in the world except that the Senate should have all the light it could get.

Mr. HOPKINS. In view of what the Senator from Ohio says, I shall not interpose the objection that it was my intention to make. I do not attach the importance to the speech that the Senator from Ohio does, and the criticisms I have heard made upon it satisfy me that it is entirely unreliable, But in view of the position taken by the Senator from Ohio, as I say, I shall not object to its being printed in the RECORD.

Mr. FORAKER. The Senator can do no greater service to the Senate and the country than by showing that it is unreliable. Until he or somebody else does show it is unreliable it is bound to make an impression, I think, on the minds of fair-minded men.

Mr. HOPKINS. In response to the Senator from Ohio I will say that I was not aware that this debate was to come up to-day. I have material on this subject which I think will be of interest to the Senate and the country. Had I supposed that it was to be discussed in the manner it has been presented I should have been here to present the other side.

The VICE-PRESIDENT. Will the Senator from Ohio restate his request?

Mr. TELLER. I will ask it, because I have some papers of the same kind. I have an article written by a very distinguished engineer in this country, who knows all about the canal. It is written in good temper and proper spirit. I ask that it may be printed in the RECORD in connection with the paper presented by the Senator from Ohio.

The VICE-PRESIDENT. Without objection, permission is granted.

Mr. FORAKER. I make the further request that the address delivered by M. Bunau-Varilla may be printed as a document.

The VICE-PRESIDENT. Without objection, it is so ordered.

Mr. TELLER. I hope these matters can be printed in the RECORD after my speech. I have an extract from the report of the committee, which I also desire to have put in. If it is desired, it may also be printed as a document.

The VICE-PRESIDENT. Without objection, it is so ordered.

The papers referred to are as follows:

APPENDIX A.

CHANGE IN CANAL PLANS.

Special report of the chairman of the commission to the Secretary of War, recommending locks and dams at Miraflores instead of at La Boca—President approves change.

DECEMBER 9, 1907.

The Hon. WILLIAM H. TAFT,
Secretary of War, Washington, D. C.

SIR: The adopted plan for the building of the Panama Canal contemplates the formation of a lake on the Pacific side by the construction of three earth dams (Sosa-Corozal, Sosa-San Juan, and Corozal-Diablo), the differences of level between the lake and the Pacific being overcome by a flight of two locks projecting into the Pacific on the west side of Sosa Hill.

The board of consulting engineers that accompanied you to the Isthmus in April last inspected the sites of the dams as finally located, with the view to outlining a detailed description of the preparation of the foundations for the structures to be erected, reporting thereon as follows:

"The borings showed so-called 'mud' in the swampy portion, having a depth of 8 or 10 feet. This material is firmer than we had expected,

and at the time of our visit, about two days after it had been flooded by spring tides, it could be walked on in most places. * * *

"For the same construction * * * we do not think it will be necessary to remove the soft material at either of these places (Sosa-Corozal, Sosa-San Juan). The very softest material will either be displaced or consolidated by the material disposed on it. We do not think the amount displaced beneath the impervious portion of the embankment will be great, and if compressed in place the material will be impervious."

As regards the character of the material that should compose the body of the structures, the same board reported:

"For the Sosa-Corozal and La Boca dams the bottom width of the impervious portion should not be less than would result from a top width of 80 to 100 feet at 15 to 20 feet above the water level in the lake, with slopes not steeper than 1 on 4 to 1 on 5. The resulting width at sea level would be 640 feet or more. The comparatively small cross section suggested for the impervious portion of each of the Pacific dams is permissible only if it is reenforced by wide and heavy rock embankments on both sides. * * * On account of the nature of the bottom on which this rock fill will be deposited for the dams on the Pacific side, it should extend a long distance outside of the impervious portion, in accordance with the principle adopted for the La Boca dam by the minority of the board of consulting engineers in 1905–6, of spreading the base on soft bottom, so that the change in weight imposed on the foundations from the toe toward the crown will be gradual. This protection at the Sosa-Corozal and La Boca dams may be given great width with economy, since they will afford convenient dumps for the Culebra material."

To construct the dams in accordance with these views, trestles were built along the toes of the Sosa-Corozal dam, from which to dump material into the Culebra Cut. The trestles failed after the dumping of the material from them began, and the material overlying the rock moved laterally, carrying the superimposed mass with it, the dumps flattening out until the sides slopes were about 1 on 12 and even less. In places this lateral motion continued for two weeks after dumping had stopped. The ground on either side of and at some distance from the dump was forced up, forming mounds of mud, the crests of which gradually approached the level of the top of the dump proper. After an equilibrium was established between the dump and the adjacent mounds the hump or wave would again move out when the track was shifted toward it, accompanied by a sudden vertical settling of the track of 6 to 10 feet when loaded trains were applied. It was thought that if the trestle were lower better results might obtain, but, with the west trestle only 8 feet above the surface of the ground and the piles driven to rock, similar failures followed.

When the difficulties on the east trestle developed, an investigation, by boring and test pits, was made to determine the character of the material overlying the rock. It was found to be for the greater part an unctuous blue clay without grit, possessing but little supporting power, instead of stiff clay, as indicated on existing profiles.

The investigations clearly demonstrate that the construction of dams which would remain in place after the lake is filled can be accomplished only by the removal of all material overlying the rock and, after preparation of the rock surface, by building the dams of selected material. The depth to which the material will have to be removed is from 10 to 70 feet, and suitable material for dam construction will have to be transported to the site. Investigations of the foundations of the Sosa-San Juan dam show that the material is the same; the difficulties to be encountered will be greater because of the river.

It is estimated that the cost of building the two dams, following the plan that the investigations and work done indicate as necessary, will be about $11,573,800. The estimate submitted by the minority of the board of consulting engineers for these dams is $4,314,000, a difference of $7,259,800.

As this difference to secure stability is excessive, an examination of the canal route from Pedro Miguel to the Pacific was undertaken to ascertain if more suitable places for the locks and dams could be found. In making these examinations, care was taken to secure samples of the materials to be encountered at various depths and cores procured of the rock. A careful study was made of all data obtained, and four possible projects present themselves for constructing that portion of the canal extending from the south end of Culebra cut to deep water in the Pacific Ocean.

First project. This is the present project and consists of one lock at Pedro Miguel and two at La Boca, with dams of suitable material on rock. The estimates submitted by the board of consulting engineers are corrected to conform to methods, quantities, and unit prices that additional information and experience show will give more nearly the actual cost of the work. The project provides a 500-foot channel from Pedro Miguel to Miraflores, a 1,000-foot channel through Sosa Lake to La Boca, and a 500-foot channel from La Boca locks to deep water.

Second project. Two locks at Pedro Miguel and one at Miraflores, with a 500-foot channel through the lake from Pedro Miguel to Miraflores, and a 500-foot channel from Miraflores to deep water in the Pacific Ocean.

Third project. One lock at Pedro Miguel and two at Miraflores, with a 500-foot channel through the lake from Pedro Miguel to Miraflores, and a 500-foot channel from Miraflores locks to deep water in the Pacific Ocean.

In this and in project No. 2 provision is made for diverting the waters of the Rio Grande and the Corundi and the Cocoli rivers, as well as for a channel of uniform width to the sea, having no connection with any other tidal basin. As a consequence the currents in the channel will result only from the tidal flow and will not attain a velocity as great as 1 foot a second, which will not interfere with navigation.

Fourth project. One lock at Pedro Miguel, one at Miraflores, and one at La Boca, with 500-foot channels between locks and to deep water in the Pacific.

In each case locks and dams are on rock foundations. Assuming that inverts are used, the total costs of the various projects are as follows:

Project No. 1	$58, 395, 540
Project No. 2	58, 467, 048
Project No. 3	50, 927, 268
Project No. 4	66, 690, 618

From the foregoing it is seen that project No. 3, one lock at Pedro Miguel and two at Miraflores, is the most economical. It has the advantage over the present project in that the dams of lower height, less length, and resting on rock comparatively near the surface can be more easily constructed and completed at an earlier date. It is to be preferred to project No. 1 by reason of the fact that the location of the locks secures them against all possibility of distant bombardment, and affords them greater security against gunboat or torpedo-boat attack.

The commission unanimously recommends the adoption of project No. 3 and its substitution for the existing project.

Very respectfully,

GEO. W. GOETHALS, *Chairman.*

APPENDIX B.

MEMORANDUM.

1. The first mention in the literature of the Panama Canal of the idea of constructing a dam at Gatun appears in the report of the International Canal Congress, held in Paris in 1878, under the auspices of M. de Lesseps. M. Kleitz, inspector-general of highroads and bridges, a government engineer of the French Republic, dissented from the view expressed by others favoring a sea-level canal, and urged that the Chagres Valley should be inundated, converting the same into an interior lake at an elevation of 78½ feet, proposing to maintain this level by a dam at Gatun, which he remarked was the point nearest the Atlantic which seemed to offer a favorable site for such a structure.

This suggestion was disapproved by the technical committee appointed by M. de Lesseps and a sea-level canal was favored, thus disposing of the proposition to erect a dam at Gatun.

2. The next mention observed in the literature of a dam at Gatun was by Ashbel Welch, former president of the Society of Civil Engineers of the United States, who in 1880 proposed that an artificial lake in the Chagres Valley be maintained by a dam at Gatun, its height not mentioned. Mr. Welch refers to Mr. C. D. Ward, member of the Society of Civil Engineers, as having first proposed a dam at this place, but no action by anybody authorized to express an opinion on this subject appears to have been taken.

3. Shortly before the collapse of the old Panama Canal Company M. de Lesseps, realizing that funds could not be raised in sufficient amount to complete the sea-level canal, adopted a suggestion made to him by M. Eiffel, who conceived the novel idea of constructing locks, to be located at various points along the canal line, these to be made of metal, the intention being to utilize them for the interoceanic transit for a few years and then to displace them and convert the lock transit into one at sea level. The points proposed for location of dams by M. Eiffel were eight or ten in number, the one nearest the Atlantic side of the Isthmus to be placed at Bohio.

4. In 1889 the old Panama Canal Company went into liquidation. The liquidateur appointed a commission, which made a study respecting the then condition of the works of the canal enterprise, and recommended to the liquidateur that the canal be completed, utilizing for this purpose all the work so far accomplished, but to introduce a system of lockage. A lock or locks at Bohio were proposed, but none at any lower point on the Chagres River. It was, of course, known to this commission that Gatun had previously been proposed for a dam and locks, but the liquidateur's commission rejected this idea.

5. The next study for a canal at Panama is embodied in a report made upon the proposition by N. B. Wyse, who was the officer of the French navy who had obtained from Colombia the original concession under which M. de Lesseps proposed to operate, and which concession is the basis of all work that has since been done at Panama. This gentleman proposed six locks in the Panama Canal, three of them to be at Bohio. He rejected the idea of a lock at any lower point on the Chagres. The report was addressed to the liquidateur of the old Panama Canal Company.

6. In 1892 M. P. Bunau-Varilla prepared a project for the completion of the Panama Canal. He proposed five locks on each side of the divide, the summit level to be raised to about 130 feet. The lock nearest the Atlantic side, recommended by M. Bunau-Varilla, was to be at Peña Blanca, about 1 mile below Bohio, but he suggested no lock at any point below Peña Blanca.

7. Soon after the organization of the New Panama Canal Company, which took place in 1894, a technical committee was appointed for the purpose of making a study of plans for the completion of the Panama Canal. The committee consisted of 12 eminent engineers. Included in that number were Gen. Henry L. Abbot, of the United States Corps of Engineers, and Mr. Hunter, recently member of the Board of Consulting Engineers for the Panama Canal. This committee reported to the New Panama Canal Company on November 16, 1898, and recommended a series of locks with a summit level at 90 feet. The locks on the Atlantic side were to be located two at Bohio and two at Obispo, but none at any point on the Chagres below Bohio, thus again rejecting Gatun as a site for a dam and locks. The report of this technical committee, which be it remembered was signed by General Abbot, contains the following:

"In the whole valley of the lower Chagres, between Gamboa and the sea, only one location showed favorable conditions for the building of a high dam capable of impounding a lake which could become the summit level." (See page 97, Part II, data on Panama Canal submitted to the Board of Consulting Engineers by the Isthmian Canal Commission September 1, 1905.)

In 1898 it was not known that the Chagres Valley at Gatun was filled with sand, gravel, clay, shells, and wood to a depth of 258 feet; yet General Abbot now thinks this site for a dam is available and suitable.

8. The first study made of the Panama Canal under United States Government authority was intrusted by the President to an Isthmian Canal Commission, of which Admiral Walker was chairman and Generals Hains and Ernst and Mr. Noble were members, and its report is dated November 16, 1901. A lock canal was proposed by this commission, with summit level at 90 feet, to be maintained by locks on each side of the Isthmus. With respect to location of locks, the commission remarked in its report: "No location suitable for a dam exists in the Chagres River below Bohio." General Hains and Colonel Ernst, present members of the Isthmian Canal Commission, signed this report. (See page 62 of the commissioners' report, government print.) In a paper read before the American Society of Civil Engineers on the 5th of March, 1902, Mr. George S. Morison, a very distinguished American engineer, who had been a member of the Walker Isthmian Canal Commission remarked: "All engineers who have examined the route of the Panama Canal agree that the neighborhood of Bohio is the only available location for a dam by which the summit level must be maintained." It therefore appears that the Isthmian Canal Commission unanimously and Mr. Morison specially rejected the idea of a dam at Gatun.

9. In 1904 Congress authorized the commencement of the work of constructing the Panama Canal, having previously purchased all the rights and franchises and property that belonged to the old French

companies, and having acquired a right of way from the sovereign Republic of Panama. This commission as a body never took any definite action with respect to the type of the canal that was to be constructed beyond ordering new examinations and consideration; but an engineering committee of its own members, consisting of Messrs. Burr, Parsons, and Davis, in February, 1904, recommended, the then chief engineer concurring, that no lift locks be utilized in the transit route that the Government was proceeding to construct, but, instead, that the canal be made at sea level. The report of this engineering committee was submitted to the commission, and at one of its meetings in March, 1904, Mr. Harrod moved "that the report of the engineering committee as respects a type of canal be adopted by the commission." (See p. 426, Proceedings of the Isthmian Canal Commission.) Action, however, upon this resolution was confined to a reference of the subject to a committee on engineering plans of the whole commission, and no further action by the commission has resulted.

10. Under authority of the President, by executive order dated June 24, 1905, a board of consulting engineers was appointed "for the purpose of considering the various plans proposed to and by the Isthmian Canal Commission for the construction of a canal across the Isthmus of Panama." This board consisted of eight American and five European engineers, the latter nominated, by request of the President, by the diplomatic representatives of foreign governments, and their report has been submitted to Congress. All plans for a canal at Panama that were on file in the office of the Isthmian Canal Commission were considered by the Board of Engineers. Their report is dated January 10, 1906, and a canal at sea level was recommended by the board, the report being signed by eight of the engineers composing it. But a minority report was submitted by five of the members, recommending a lock canal, three locks on either side of the Isthmus, with summit level at 85 feet. In the report of the minority of this board Gatun was selected as the site for the three locks on the Atlantic side, this summit of 85 feet to be maintained by a high earth dam at this point and the valley of the Chagres submerged and inundated throughout its whole extent, the lake extending nearly to Alhajuela. The majority of the board, eight to five, strenuously opposed the idea of a dam and locks at Gatun on two grounds: First, that the introduction of locks in a treatment of the question was objectionable from many points of view; and, second, that the maintenance of a summit level by means of an earth dam of immense magnitude to control the flood waters of this river introduced an element of great danger, since the dam, without sheet piling, was proposed to be founded on the alluvial-filled gorges of the Chagres River, where the depth at one point extended 258 feet below the level of the sea.

Of this minority one member, Mr. Noble, was a member of the former Isthmian Canal Commission, who, as above stated, had reported that Bohio was the lowest point on the Chagres where a dam was practicable.

11. The report of the board of engineers was reviewed by the present Isthmian Canal Commission, which then and now comprises Major Harrod and Generals Hains and Ernst. These three engineer members indorsed the recommendations of the minority of the consulting board for the lock canal with dam at Gatun, while Admiral Endicott, the fourth engineering member, indorsed the views of the majority for a canal at sea level.

It appears that in March, 1905, Major Harrod was, as above shown, opposed to any lock plan, and that his two associates favoring locks and the dam had said in 1901 that no proper site for a dam existed below Bohio.

It therefore appears that every consideration of the Panama Canal type by any unauthorized body, either corporate or governmental, rejected the idea of a dam at Gatun, and its indorsement is confined to a minority of the board of consulting engineers which was called by the President to advise him upon the type of canal that ought to be adopted, and to three members of the commission who had previously either been in favor of a sea-level canal or who had said, in effect, that Gatun was not a proper site for any dam.

Those who earlier proposed Gatun as a dam site, Messrs. Kleitz, Welch, and Ward, had no technical information whatever as to the physical characteristics of this site. Had these three engineers known that the dam would have to be nearly a mile and a half long, and that the alluvium in the gorge upon which the structure was to rest was 258 feet deep, it may be safely doubted if they would ever have proposed so hazardous a project.

EXTRACT FROM THE REPORT OF THE BOARD OF CONSULTING ENGINEERS UPON THE SUBJECT OF THE GATUN DAM.

The United States Government is proposing to expend many millions of dollars for the construction of this great waterway, which is to serve the commerce of the world for all time and the very existence of which would depend upon the permanent stability and unquestioned safety of all dams. The board is therefore of opinion that the existence of such costly facilities for the world's commerce should not depend upon great reservoirs held by earth embankments resting literally upon mud foundations or those of even sand and gravel. The board is unqualifiedly of opinion that no such vast and doubtful experiment should be indulged in, but, on the contrary, that every work of whatever nature should be so designed and built as to include only those features which experience has demonstrated to be positively safe and efficient.

APPENDIX C.

Extract from annual report, Isthmian Canal Commission, 1908 (H. Doc. 1054, 60th Cong. 2d sess., p. 7):

LOCKS AND DAMS.

This department of construction embraced the Gatun locks and the Gatun dam divisions, the Pacific division of locks and dams, and the division of meteorology and river hydraulics.

The locks are in pairs, and since the compilation of the last annual report the projected dimensions have been increased so that the width in the clear will be 110 feet, the usable length remaining, as heretofore, 1,000 feet. The question of increasing the width was raised by the general board of the navy in a memorandum to the Secretary of the Navy, dated Washington, October 29, 1907, setting forth "that the width of the locks as now fixed, namely, 100 feet, is insufficient for probable ships of future construction, and that sound policy would dictate an increase to a clear width of 110 feet."

While the commission, after due consideration, was of the opinion that the width already adopted for the locks—100 feet in the clear—was ample for all commercial vessels building or contemplated, and sufficient for any battle ship constructed, building, or projected, it felt that the wishes of the navy, as expressed by the general board, should be followed, there being no insuperable obstacles, and it accordingly recommended that the project be modified as desired. This modification was approved by the President under date of January 15, 1908.

The project prepared by the minority members of the board of consulting engineers for the lock type of canal provided for a flight of three locks at Gatun, a flight of two locks at La Boca, and one at Pedro Miguel. The locks at La Boca were placed on the west side of Sosa Hill, and were to overcome the difference of the level between the ocean and a lake formed by the Sosa-Corozal and the Sosa-San Juan dams. Steps were taken to construct the former of these dams in accordance with the proposed plan, and trestles were built along the toes from which to dump material from Culebra cut. The trestles failed after the dumping from them began, and the material overlying the rock moved laterally, carrying the superimposed mass with it. In places this lateral motion continued for two weeks after dumping had stopped. The ground on either side of and for some distance from the dump was forced up, forming mounds of mud, the crests of which gradually aproached the level of the dump proper. After an equilibrium was established between the dump and the adjacent mounds the hump or wave would again move out when the track was shifted toward it, accompanied by a sudden vertical settling of the track of 6 to 10 feet when loaded trains were applied. Dumping from trestles of less height secured no better results. (Pp. 7 and 8.)

APPENDIX D.

The minority of the consulting board in 1905 estimated the cost of the canal at $140,000,000; including payment to French company, $40,000,000, and sanitation, $27,000,000, increases the cost to $217,000,000.

The experts (1908) estimate that the work will cost $375,000,000.

There was to be 19.08 miles of lake navigation, 1,000 feet wide. This has been reduced to 15.7 miles.

There were to be dams near La Boca to cost $3,984,000. After attempting their construction with disastrous results, this plan was abandoned, it being estimated that these dams would cost $11,573,800.

There were to be two double locks at La Boca. These have been moved inland, one to Miraflores and one to Pedro Miguel and 3¼ miles of "greatly improved navigation" is abandoned, canal in excavation at sea level being substituted therefor.

There were to be 11.38 miles of the lock canal at sea level. Now it is proposed to make the sea-level part 15 miles, or very nearly one-third of the whole route.

The minority said that 200 feet was wide enough for the bottom width of the great Culebra cut. Now they say they want 300 feet, at an increased cost of $14,000,000.

They also determine in 1905 that the locks, 900 feet long, 95 feet wide, and 40 feet deep, were of ample size. Now they indorse locks of 1,000 feet in length, 45 feet depth, and 110 feet width, while the new German canal will have locks 147.8 feet wide.

The Gatun dam was to have been 135 feet high and contain 21,000,000 cubic yards of earth, loose rocks with sheet piling beneath. Now its height is reduced to 115 feet and its mass reduced to about 11,000,000 yards, the sheet piling to be left out.

There was to be a breakwater to protect Colon Harbor to cost $5,300,000. Now it is to cost over $11,000,000.

THE DAM.

The length of this earth structure is to be 7,700 feet, but the natural surface attains or exceeds this elevation in three places for about 700 feet in all. At the level of 21 feet above the sea it will be about 2,600 feet long between earth margins, in two sections, separated by the spillway hill. At the sea level its total length, also in two parts, between banks classed as argillaceous sandstone, will be about 2,800 feet. At this level the dam throughout, for length given, will rest upon brown or blue clay and silt. Under the dam and above the clayey sandstone are two geologic gorges, one 185 feet deep (below sea level) and the other 255 feet deep. These gorges are filled with river alluvium and other fluvial deposits, consisting, according to the official reports, of silt, soil, brown and blue clay, shells, rotten wood, sand, and gravel—the most, if not all, of it water bearing. The area in cross-section of the shallower gorge is about 205,000 square feet, and of the deeper one about 120,000 square feet, or a total of, say, 325,000 square feet—that is, over 7 acres. The mean height of the dam to proposed sea level above the natural soil is about 47 feet, and its area in longitudinal section, measured vertically, is shown by the official maps to be 362,000 square feet, or equal to 8.3 acres.

Leaving out of consideration the argillaceous sandstone, which is but another name for indurated clay, some of which, if not all, is also fissured and water bearing, the structure relied on to close the space between the hills is the earth dam—a structure in length equal to the distance from the Capitol to the Treasury and in some places as high as the New Willard, but averaging as high throughout its whole length as the four-story buildings along the Avenue—while under the dam will remain two masses of river wash—that is, clay, shells, rotten wood, sand, and gravel—one gorge half as deep as the Washington Monument is high and the other one-third as deep, while still below and under the abutting hills and under the Gatun locks (and it may be all around the margins and beneath the floor of the proposed lake, whose area is to be 174 square miles) is this same argillaceous sandstone, rhyolite, soft sandstone, conglomerate, and volcanic tuff. Some of it is known to be fissured and water bearing, and no one knows how much of it is not so.

The area in cross-section of the valley to be filled and of the gorges beneath, now filled with detritus, is over 15 acres. If Pennsylvania avenue, from the Capitol to the Treasury, should be filled to the level of the Treasury roof, the superfices, measured vertically, of the imaginary Pennsylvania avenue dam would just about equal that of the gap in the hills at Gatun that nature has partly filled with river drift, and that it is proposed to complete with 18,000,000 yards of mud deposited by a pumping dredge.

There has been much said recently about the blue clay under the proposed dam, some of which, loaded with low embankments of earth and loose rock, yielded to pressure and escaped laterally, resulting in the sinking of the embankment. The engineers tell us that when the load on this clay is "balanced," it will not move laterally, and will carry the load due to the superimposed mass of earth 30 feet deep at the up and downstream toes, and 135 feet deep at the crest.

The engineers of Panama who are so confident now that the Gatun dam can be "floated," so to speak, on this unctuous blue clay, have had some personal experience in attempting to do this very same sort of thing. They seem not to have profited by it.

On page 132, Volume I, of the Canal Record, December 25, 1907, is printed what purports to be a letter from Colonel Goethals to the Secre-

tary of War, dated December 9, 1907, whereby it is recommended, by the unanimous vote of the Canal Commission, to abandon the attempt to build two dams near La Boca, following in their construction the recommendations of the board of three consulting engineers, who were specially called to the Isthmus in April, 1907, for the purpose of inspecting these sites for dams and locks. Two of these same experts were again called to the Isthmus by the President to still further advise.
